
(C) by striking out paragraph (3) and inserting in lieu thereof the following:

"(3) for any person, with respect to any marine mammal taken in violation of this title, to possess that mammal or any product from that mammal;

"(4) for any person to transport, purchase, sell, or offer to purchase or sell any marine mammal or marine mammal product; and".

(2) Section 102(b)(3) of such Act is amended by striking out "or which has been listed as an endangered species or threatened species pursuant to the Endangered Species Act of 1973".

(3) Section 102(d)(1) of such act is amended by striking out "or endangered".

(b) PENALTIES.—Section 105(a) of the Act of 1972 (16 U.S.C. 1375(a)) is amended by inserting "(1)" immediately after "(a)" and by inserting at the end thereof the following new paragraph:

"(2) In any case involving an alleged unlawful importation of a marine mammal or marine mammal product, if such importation is made by an individual for his own personal or family use (which does not include importation as an accommodation to others or for sale or other commercial use), the Secretary may, in lieu of instituting a proceeding under paragraph (1), allow the individual to abandon the mammal or product, under procedures to be prescribed by the Secretary, to the enforcement officer at the port of entry.".

SEC. 4. STATE MANAGEMENT

(a) TRANSFER OF MANAGEMENT AUTHORITY.—Section 109 of the Act of 1972 (16 U.S.C. 1379) is amended—

(1) by redesignating subsections (c) and (d) as subsections (k) and (l), respectively; and

(2) by striking out subsections (a) and (b) and inserting in lieu thereof the following:

"SEC. 109. (a) No State may enforce, or attempt to enforce, any State law or regulation relating to the taking of any species (which term for purposes of this section includes any population stock) of marine mammal within the State unless the Secretary has transferred authority for the conservation and management of that species (hereinafter referred to in this section as 'management authority') to the State under subsection (b)(1).

"(b)(1) Subject to paragraph (2) and subsection (f), the Secretary shall transfer management authority for a species of marine mammal to a State if the Secretary finds, after notice and opportunity for public comment, that the State has developed and will implement a program for the conservation and management of the species that—

"(A) is consistent with the purposes, policies, and goals of this Act and with international treaty obligations;

"(B) requires that all taking of the species be humane;

"(C) does not permit the taking of the species unless and until—

"(i) the State has determined, under a process consistent with the standards set forth in subsection (c)—

"(I) that the species is at its optimum sustainable population (hereinafter in this section referred to as 'OSP'), and

"(II) the maximum number of animals of that species that may be taken without reducing the species below its OSP, and

"(ii) the determination required under clause (i) is final and implemented under State law, and, if a cooperative allocation agreement for the species is required under subsection (d)(1), such an agreement is implemented;

"(D) does not permit the taking of a number of animals of the species that exceeds the maximum number determined pursuant to subparagraph (C)(i)(II), and, in the case of taking for subsistence uses (as defined in subsection (f)(2)), does not permit the taking of a number of animals that would be inconsistent with the maintenance of the species at its OSP;

"(E) does not permit the taking of the species for scientific research and public display purposes, except for taking for such purposes that is undertaken by, or on behalf of, the State;

"(F) provides procedures for acquiring data, and evaluating such data and other new evidence, relating to the OSP of the species, and the maximum take that would maintain the species at that level, and, if required on the basis of such evaluation, for amending determinations under subparagraph (C)(i);

"(G) provides procedures for the resolution of differences between the State and the Secretary that might arise during the development of a cooperative allocation agreement under Subsection (d)(1); and

"(H) provides for the submission of an annual report to the Secretary regarding the administration of the program during the reporting period.

"(2) During the period between the transfer of management authority for a species to a State under paragraph (1) and the time at which the implementation requirements under paragraph (1)(C)(ii) are complied with—

"(A) the State program shall not apply with respect to the taking of the species within the State for any purpose, or under any condition, provided for under section 101; and

"(B) the Secretary shall continue to regulate, under this title, all takings of the species within the State.

"(3) After the determination required under paragraph (1)(C)(i) regarding a species is final and implemented under State law and after a cooperative allocation agreement described in subsection (d)(1), if required, is implemented for such species—

"(A) such determination shall be treated, for purposes of applying this title beyond the territory of the State, as a determination made in accordance with section 103 and as an applicable waiver under section 101(a)(3);

"(B) the Secretary shall regulate, without regard to this section other than the allocations specified under such an agreement, the taking of the species—

"(i) incidentally in the course of commercial fishing operations (whether provided for under section 101(a) (2) or (4)), or in the course of other specified activities provided for under section 101(a)(5), in the zone described in section 3(14)(B), and

"(ii) for scientific research or public display purposes (other than by, or on behalf of, the State), except that any taking authorized under a permit issued pursuant to section 101(a)(1) after the date of the enactment of the 1981 amendment to this subsection allowing the removal of live animals from habitat within the State shall not be effective if the State agency disapproves, on or before the date of issuance of the permit, such taking as being inconsistent with the State program; and

"(C) section 101(b) shall not apply.

"(c) The State process required under subsection (b)(1)(C) must comply with the following standards:

"(1) The State agency with management authority for the species (hereinafter in this section referred to as the 'State agency') must make an initial determination regarding the factors described in clause (i) of that subsection. The State agency must identify, and make available to the public under reasonable circumstances, the documentation supporting such initial determination. Unless request for a hearing under paragraph (2) regarding the initial determination is timely made, the initial determination shall be treated as final under State law.

"(2) The State agency shall provide opportunity, at the request of any interested party, for a hearing with respect to the initial determination made by it under paragraph (1) at which interested parties may—

"(A) present oral and written evidence in support of or against such determination; and

"(B) cross-examine persons presenting evidence at the hearing.

The State agency must give public notice of the hearing and make available to the public within a reasonable time before commencing the hearing a list of the witnesses for the State and a general description of the documentation and other evidence that will be relied upon by such witnesses.

"(3) The State agency, solely on the basis of the record developed at a hearing held pursuant to paragraph (2), must make a decision regarding its initial determination under paragraph (1) and shall include with the record a statement of the findings and conclusions, and the reason or basis therefor, on all material issues.

"(4) Opportunity for judicial review of the decision made by the State agency on the record under paragraph (3), under scope of review equivalent to that provided for in section 706(2) (A) through (E) of title 5, United States Code, must be available under State law. The Secretary may not initiate judicial review of any such decision.

"(d)(1) If the range of a species with respect to which a determination under paragraph (1)(C)(i) of subsection (b) is made extends beyond the territorial waters of the State, the State agency and the Secretary (who shall first coordinate with the Marine Mammal Commission and the appropriate Regional Fishery Management Council established under section 302 of the Act of April 13, 1976 (16 U.S.C. 1852)) shall enter into a cooperative allocation agreement providing procedures for allocating, on a timely basis, such of the number of animals, as determined under paragraph (1)(C)(i)(II) of subsection (b), as may be appropriate with priority of allocation being given firstly to taking for subsistence uses in the case of the State of Alaska, and secondly to taking for purposes provided for under section 101(a) within the zone described in section 3(14)(B).

"(2) If the State agency requests the Secretary to regulate the taking of a species to which paragraph (1) applies within the zone described in section 3(14)(B) for subsistence uses or for hunting, or both, in a manner consistent with the regulation by the State agency of such taking within the State, the Secretary shall adopt, and enforce within such zone, such of the State agency's regulatory provisions as the Secretary considers to be consistent with his administration of

section 101(a) within such zone. The Secretary shall adopt such provisions through the issuance of regulations under section 553 of title 5, United States Code, and with respect to such issuance the Regulatory Flexibility Act, the Paperwork Reduction Act, Executive Order Numbered 12291, dated February 17, 1981, and the thirty-day notice requirement in subsection (d) of such section 553 shall not apply. For purposes of sections 105, 106, and 107, such regulations shall be treated as having been issued under this title.

"(e)(1) Subject to paragraph (2), the Secretary shall revoke, after opportunity for a hearing, any transfer of management authority made to a State under subsection (b)(1) if the Secretary finds that the State program for the conservation and management of the species concerned is not being implemented, or is being implemented in a manner inconsistent with the provisions of this section or the provisions of the program. The Secretary shall also establish a procedure for the voluntary return by a State to the Secretary of species management authority that was previously transferred to the State under subsection (b)(1).

"(2)(A) The Secretary may not revoke a transfer of management authority under paragraph (1) unless—

"(i) the Secretary provides to a State a written notice of intent to revoke together with a statement, in detail, of those actions, or failures to act, on which such intent is based; and

"(ii) during the ninety-day period after the date of the notice of intent to revoke—

"(I) the Secretary provides opportunity for consultation between him and the State concerning such State actions or failures to act and the remedial measures that should be taken by the State, and

"(II) the State does not take such remedial measures as are necessary, in the judgment of the Secretary, to bring its conservation and management program, or the administration or enforcement of the program, into compliance with the provisions of this section.

"(B) When a revocation by the Secretary of a transfer of management authority to a State becomes final, or the State voluntarily returns management authority to the Secretary, the Secretary shall regulate the taking, and provide for the conservation and management, of the species within the State in accordance with the provisions of this Act (and in the case of Alaskan Natives, section 101(b) and subsection (i) of this section shall apply upon such revocation or return of management authority).

"(f)(1) The Secretary may not transfer management authority to the State of Alaska under subsection (b)(1) for any species of marine mammal unless—

"(A) the State has adopted and will implement a statute and regulations that insure that the taking of the species for subsistence uses—

"(i) is accomplished in a nonwasteful manner,

"(ii) will be the priority consumptive use of the species, and

"(iii) if required to be restricted, such restriction will be based upon—

"(I) the customary and direct dependence upon the species as the mainstay of livelihood,

"(II) local residency, and

"(III) the availability of alternative resources; and

"(B) the State has adopted a statute or regulation that requires that any consumptive use of marine mammal species, other than for subsistence uses, will be authorized during a regulatory year only if the appropriate agency first makes findings, based on an administrative record before it, that—

"(i) such use will have no significant adverse impact upon subsistence uses of the species, and

"(ii) the regulation of such use, including, but not limited to, licensing of marine mammal hunting guides and the assignment of guiding areas, will, to the maximum extent practicable, provide economic opportunities for the residents of the rural coastal villages of Alaska who engage in subsistence uses of that species.

"(2) For purposes of paragraph (1), the term 'subsistence uses' means the customary and traditional uses by rural Alaska residents of marine mammals for direct personal or family consumption as food, shelter, fuel, clothing, tools, or transportation; for the making and selling of handicraft articles out of nonedible byproducts of marine mammals taken for personal or family consumption; and for barter, or sharing for personal or family consumption. As used in this paragraph—

"(A) The term 'family' means all persons related by blood, marriage, or adoption, or any person living within a household on a permanent basis.

"(B) The term 'barter' means the exchange of marine mammals or their parts, taken for subsistence uses—

"(i) for other wildlife or fish or their parts, or

"(ii) for other food or for nonedible items other than money if the exchange is of a limited and noncommercial nature.

"(g) Neither the transfer of management authority to a State under subsection (b)(1), nor the revocation or voluntary return of such authority under subsection (e), shall be deemed to be an action for which an environmental impact statement is required under section 102 of the National Environmental Policy Act of 1969.

"(h) Nothing in this title shall prevent a Federal, State, or local government official or employee or a person designated under section 112(c) from taking, in the course of his duties as an official, employee, or designee, a marine mammal in a humane manner (including euthanasia) if such taking is for—

"(1) the protection or welfare of the mammal,

"(2) the protection of the public health and welfare, or

"(3) the nonlethal removal of nuisance animals, and, in any case in which the return of the mammal to its natural habitat is feasible, includes steps designed to achieve that result.

"(i) The Secretary may (after providing notice thereof in the Federal Register and in newspapers of general circulation, and through appropriate electronic media, in the affected area and providing opportunity for a hearing thereon in such area) prescribe regulations requiring the marking, tagging, and reporting of animals taken pursuant to section 101(b).

"(j) The Secretary may make grants to States to assist them—

"(1) in developing programs, to be submitted for approval under subsection (b), for the conservation and management of species of marine mammals; and

"(2) in administering such programs if management authority for such species is transferred to the State under such subsection.

Grants made under this subsection may not exceed 50 per centum of the costs of developing a State program before Secretarial approval, or of administering the program thereafter.".

(b) NO EFFECT ON CERTAIN COOPERATIVE AGREEMENTS.—Nothing in the amendments made by subsection (a) shall be construed as affecting in any manner, or to any extent, any cooperative agreement entered into by a State under section 6(c) of the Endangered Species Act of 1973 (16 U.S.C. 1535(c)) before, on, or after the date of the enactment of this Act.

SEC. 5. MARINE MAMMAL RESEARCH

Section 110(a) of the Act of 1972 (16 U.S.C. 1380(a)) is amended by adding at the end thereof the following new sentences: "In carrying out this subsection, the Secretary shall undertake a program of, and shall provide financial assistance for, research into new methods of locating and catching yellowfin tuna without the incidental taking of marine mammals. The Secretary shall include a description of the annual results of research carried out under this section in the report required under section 103(f).".

SEC. 6. MARINE MAMMAL COMMISSION

Title II of the Act of 1972 (16 U.S.C. 1401-1407) is amended—

(1) by striking out "furnish its reports and recommendations to him, before publication, for his comment." in section 202(b) and inserting in lieu thereof "provide each annual report required under section 204, before submission to Congress, to the Secretary for comment."; and

(2) by inserting ", or provide such grants to," immediately after "agreements with" in section 206(3).

SEC. 7. AUTHORIZATION OF APPROPRIATIONS

(a) DEPARTMENT OF COMMERCE.—There are authorized to be appropriated to the Department of Commerce, for purposes of carrying out such functions and responsibilities as it may have been given under title I of the Marine Mammal Protection Act of 1972, $7,223,000 for fiscal year 1982, $8,000,000 for fiscal year 1983, and $8,800,000 for fiscal year 1984.

(b) DEPARTMENT OF THE INTERIOR.—There are authorized to be appropriated to the Department of the Interior, for purposes of carrying out such functions and responsibilities as it may have been given under such title I, $1,600,000 for fiscal year 1982, $1,760,000 for fiscal year 1983, and $2,000,000 for fiscal year 1984.

(c) MARINE MAMMAL COMMISSION.—There are authorized to be appropriated to the Marine Mammal Commission, for purposes of carrying out title II of such Act of 1972, $672,000 for fiscal year 1982, $1,000,000 for fiscal year 1983, and $1,100,000 for fiscal year 1984.

The SPEAKER pro tempore. Is a second demanded?

Mr. FORSYTHE. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The gentleman from North Carolina (Mr. JONES) will be recognized for 20 minutes, and the gentleman from New Jersey (Mr. FORSYTHE) is recognized for 20 minutes.

The Chair recognizes the gentleman from North Carolina (Mr. JONES).

Mr. JONES of North Carolina. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in strong support of H.R. 4084, the Marine Mammal Protection Act of 1981. This bill, as amended, contains reauthorizations for appropriations to the Departments of Commerce and Interior and to the Marine Mammal Commission for fiscal years 1982, 1983, and 1984 to carry out their functions and responsibilities under the Marine Mammal Protection Act of 1972. The major significance of this bill, however, arises from the amendments it contains to the substantive features of the act.

I feel that it is altogether appropriate that I open these remarks with words commending the chairman and members of the Subcommittee on Fisheries and Wildlife Conservation and the Environment. They deserve praise for their early perception of the need for these amendments to relieve problems arising under the act and for their careful and conscientious method of bringing into hearings, conferences and negotiations representatives of the many different interest groups affected by these amendments. These representatives—from the environmental community, the fishing industry, the State of Alaska, and the relevant agencies—met numerous times. Thanks to their good faith efforts and the effective direction of the chairman and ranking member of the subcommittee, these representatives and their interest groups now stand solidly behind the amendments embodied in H.R. 4084.

H.R. 4084 also removes many points of stress and difficulty which were being encountered in the conscientious administration of the act by its principal administrators, the Secretary of Commerce and the Secretary of the Interior. I am impressed that H.R. 4084 also provides new definitions, deletes duplication, and simplifies, revises and corrects many terms which were causing confusion in implementing the act.

I am delighted that a solution has been found to the problem involved in the incidental take of porpoise by our U.S. tuna fishermen and that this solution seems to be acceptable to the interests affected—including the Department of Commerce which must administer the law, the tuna industry which must operate under it, and those concerned members of the environmental community who properly oppose any process which would dilute or weaken the protective purposes of the act.

I am particularly gratified that H.R. 4084 addresses the issue of return of management to the States. You will recall the dilemma which arose when Alaska sought return of management of walrus to that State, but could not because its constitution prohibited discrimination among its citizens and this principle was in conflict with the subsistence preference guaranteed to Alaskan Natives under the act. This dilemma is now resolved by H.R. 4084, which also considerably simplifies the procedural steps required to return management of marine mammals to the States.

I believe that H.R. 4084 represents a remarkable achievement and is a clear demonstration that virtually all problems can be resolved between persons who seek in good faith to attain that result which will best serve our Nation and its people.

I urge my colleagues to support H.R. 4084.

Mr. Speaker, I now yield such time as he may consume to the gentleman from Louisiana, Congressman BREAUX, the chairman of the subcommittee on Fisheries and Wildlife Conservation and the Environment.

Mr. BREAUX. I thank the chairman for yielding.

Mr. Speaker, it is with particular pleasure that I take the floor today to urge passage of H.R. 4084, a bill that would amend and reauthorize the Marine Mammal Protection Act of 1972. The pleasure derives from the fact that this legislation represents a consensus that has been agreed to by the States, the various industries that are affected by the Marine Mammal Protection Act and virtually all of the conservation interests that champion the act.

I would like to share with my colleagues the process we went through in developing this consensus. Last April, when we first had hearings on this legislation, the level of controversy was quite high. Almost all of the witnesses at that first hearing agreed that there were problems with the act. Certain provisions that simply did not work the way they were supposed to—but there was a concern from some that we could not address the problems in the act without reducing its effectiveness in protecting marine mammals. Other said that anything but the most radical surgery would do little to alleviate the problems.

To keep pressure on all those involved to work out the problems in the act, in May we passed a 1-year authorization out of the Committee on Merchant Marine and Fisheries. Then, over the course of the summer, we negotiated with the parties and hammered out language to remedy the problems. Bit by bit, a consensus was formed. First, representatives of the tuna fishermen and environmental community agreed to a solution to the problems involving the incidental take of porpoise in tuna fishing operations. The solution is not radical, it provides virtually the same level of protection as the current act does, but it removes the potential for lawsuits that could cripple the tuna industry. As such it will provide the tuna industry with the legal predictability it needs to attract capital. The tuna industry has agreed to continue research into methods to further reduce the number of porpoises taken in their fishing operations.

The next problem we faced was the issue of return of management to the States which has marine mammal programs consistent with the policies of the Marine Mammal Protection Act. The act provides for this but in the 9 years that the act has been in effect, management has been returned to only one State, Alaska, for only one species, the walrus—and the State had to return management back to the Federal Government because the act required that Alaska discriminate among its citizens in a manner that was prohibited by the State constitution. Working with the representatives of the States, the Alaska Natives and the environmental community, we again developed language that provides for maintenance of marine mammals at their optimum sustainable populations while reducing the procedural steps required before management can be returned to the States. To insure the integrity of the State determinations of population size and allowable take, we have provided for hearings on the record at the State level with the opportunity for cross-examination of witnesses. Once again, our solutions were not radical, but they will go a long way to make the act more workable.

Our last major problem involved those activities which result in the take of small numbers of marine mammals. A number of different activities that take place offshore, including commercial fishing for species other than tuna, oceanographic research, deep seabed mining, and oil and gas exploration and development, will occasionally result in the killing of a small number of marine mammals. It makes no sense to require those engaging in these activities to have to go through the same lengthy procedures as those whose activities result in the taking of thousands of animals. Once again we sat down with the representatives of the environmental community, commercial fishing interests and the industries involved. Once again we worked out language that will provide a more than adequate level of protection for marine mammals while reducing the regulatory burdens on those whose activities may affect marine mammals. Our amendment provides for the Secretary to waive the requirements for a permit when the number of animals taken will be so small that it will have a negligible impact on the species. To insure that the impact is negligible, our bill would require monitoring of the number of animals taken under these provisions and the Federal agencies would be directed to issue additional regulations for nonfishing activities to further minimize the take.

In addition to resolving these major concerns, we have also worked to iron out a number of more narrow but nevertheless important problems with the act as written. For example, H.R. 4084 resolves ambiguities in the definitions section of the act that have been a source of consternation for resource biologists, Federal agency administrators and everyone else associated with the Marine Mammal Protection Act since the act was passed. We have also addressed the problem of stranded animals to encourage rescue operations.

Mr. Speaker, H.R. 4084, as reported out of committee, contained authorizations for appropriations for fiscal years 1983 and 1984. We have amended that bill to include the authorization for appropriations for fiscal year 1982 which was separately reported out of committee in May in H.R. 2948. The authorization levels are consistent with the budget approved by Congress.

We have also included a minor amendment to which all of the parties have agreed. This amendment would limit the time period during which the State could object to the issuance of a permit for the taking of marine mammals for scientific research and public display purposes to the time period provided for in the normal regulatory process. This was done to prevent any additional delay in what is already a lengthy process.

Mr. Speaker, a number of people devoted a lot of energy and ingenuity to reach this consensus and I would like to express my appreciation to them. On most issues we face today we seem to becoming increasingly polarized—on this issue a number of people with conflicting interests managed to work out constructive solutions to problems in the act. In particular, I would like to thank Michael Bean of the Environmental Defense Fund, Dave Burney of the U.S. Tuna Foundation, Tom Tomassello of the National Wildlife Federation, Paul Lenzini of the International Association of Fish and Wildlife Agencies and John Katz and Dem Cowles of the State of Alaska. These people are largely responsible for us being able to bring a bill to the floor today that represents a true consensus.

Mr. Speaker, I urge my colleagues to support this bill.

Mr. FORSYTHE. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I too, wish to express my strong support for the passage of H.R. 4084 which provides authorizations for the Marine Mammal Protection Act and makes several significant improvments in the act.
act.

This historic act became public law in 1972 in response to a nationwide outcry over the growing need for legislation to protect marine mammal populations. At that time, Congress made the decision to protect our marine mammal species by establishing a Federal management program with a procedure for returning marine mammal management to the States.

The act has proven to be extraordinarily successful in curbing the population decline of several marine mammal species. However, the management of certain species and certain provisions dealing with the administration and implementation of the act have proven to be burdensome to the agencies charged with this responsibility, as well as to the several coastal States which seek return of management. The bill before us addresses the problems identified by the agencies, the States, and other individuals who have an interest in the Marine Mammal Protection Act.

As was pointed out in our committee's hearings, one of the most difficult problems with the act is returning the management of marine mammals to the States. Section 109 of the act provides that States may adopt and enforce laws relating to the protection and taking of marine mammals within their jurisdiction if the laws are consistent with the provisions of the act. However, in the case of Alaska, the State constitution and conflicting provisions within the Marine Mammal Protection Act prevent Alaska from managing the marine mammal populations within their jurisdiction. The result is that there is little or no management of marine mammals in Alaska because of the limited resources of the Federal agencies. Complicating these constitutional questions is the fact that the procedures involved in returning management to the States have proven to be very lengthy. In fact, in Alaska's case the process consumed 6 years. H.R. 4084 rewrites the return of management provisions of the act to correct all these deficiencies.

Another unintended result of the act is that the tuna industry has been unnecessarily tied up with constant litigation over incidental takings of porpoises, despite the fact that their efforts in improving fish gear and techniques have reduced the incidental takings during the course of fishing operations from an estimated 368,000 in 1972 to 15,303 in 1980. Congress never intended to shut down the yellowfin tuna industry when we passed a law with the goal of reducing the incidental kill and serious injury of marine mammals to insignificant levels approaching a zero mortality rate. These incidental takes have been reduced significantly and until new safety techniques and equipment are economically and technologically practicable to reduce the takings to even lower levels, the industry should be able to use present techniques and equipment.

To insure that the incidental mortality of porpoises will continue to decline with improved fishing techniques and equipment, H.R. 4084 amends section 110 to specifically provide for research to continue developing such techniques and equipment. The tuna industry is presently engaged in such research and has represented that it intends to continue that research and to support any other meaningful tuna-porpoise research and development. The amendment to section 110 makes it possible for the Government to participate in or support that research.

The tuna industry is not the only ocean resource industry which has experienced difficulties with the Marine Mammal Protection Act. Commercial fishing operations, other than tuna, and other types of activities carried out in our oceans also take marine mammals in the course of their operations. Although these takings are accidental and involve the taking of negligible numbers within a population, these industries are required to go through the same lengthy and burdensome procedures as is required for intentional takes. H.R. 4084 sets up a two-tiered system in order to deal with these activities.

Another problem with the act is that Federal Agencies have had difficulties in determining the levels of take which may be permitted within a species. This is due to the complexity of the definitions in the act which are generally ambiguous in nature. The bill before us today would no longer require calculations of historical levels of marine populations prior to commercial exploitation, a nearly impossible task for any scientist.

Mr. Speaker, we have attempted to alleviate the problems expressed by those individuals who testified before our committee or have otherwise brought matters to our attention. I encourage my colleagues to join me in supporting H.R. 4084. This bill has the support of the environmental community, the fishing industry, and the State fish and game agencies. Let us move now to enact legislation which has the concurrence of all these diverse groups in order to bring about proper management of our marine mammal pupulations.

□ 1430

Mr. Speaker, I yield to the gentleman from Alaska (Mr. YOUNG).

Mr. YOUNG of Alaska. Mr. Speaker, I rise in support of the amendments to the Marine Mammal Protection Act contained in H.R. 4084.

As you know, Alaska has the largest population of marine mammals of any State, including polar bears, whales, seals, sea lions, and sea otters. These animals are important to Alaskans as a

source of food, as a source of income for rural villages, and for their esthetic attraction.

For many years, marine mammals in the waters off Alaska were managed by the Alaska Department of Fish and Game. The Department did an excellent job of keeping these animals at a population level that would allow them to survive indefinitely. State management recognized that a balance needed to be maintained between the necessity of keeping marine mammal stocks at a productive level and the necessity of allowing a harvest for nutritional and other needs. Unfortunately, public pressure in 1972 resulted in the passage of the Marine Mammal Protection Act, which removed management authority from the States. Although a mechanism was established whereby States could regain management, this mechanism was so complex that only one return of management ever occurred. In fact, the State of Alaska has been trying for 9 years to regain management over a number of species and has been unsuccessful.

To further complicate matters, Federal management has actually involved no management at all. Thus we are now faced with such problems as an overabundance of walrus that appears to be leading to population density problems and an eventual massive die-off of walrus herds; an influx of sea otters into new areas with a resulting adverse impact on Dungeness crab stocks; and continued interference by marine mammals with fishing operations. Only by amending the act can these problems be solved.

The amendments contained in this bill will be helpful in solving these problems, although I do think that further work will be needed. There are two areas that are especially important to Alaska that I would like to note.

The first involves the incidental, nonintentional taking of marine mammals in the course of commercial fishing operations. This amendment does not address the tuna-porpoise controversy, which is handled elsewhere in the bill, but rather the continued conflict between marine mammals and other commercial fishermen engaged in such fisheries as salmon seining and gillnetting, bottomfish trawling, crabbing, and a number of others. This amendment was suggested by the commercial fishermen and is one that I have worked on closely while the bill was considered in committee. Pursuant to this amendment, the Secretary may allow a general 5-year permit to be published covering all fishermen in a particular fishery where marine mammal interactions occur. The intent is that all such fisheries be covered by these general permits. The permit would allow the incidental, nonintentional taking of marine mammals that have not been found to be depleted. There will be no necessity for individual fishermen or fishermen's groups to obtain permits. Rather, the Secretary will use some mechanism such as publication in the Federal Register to bring the permits into effect.

The permits will be published after the Secretary finds that the taking which is expected to occur over a 5-year period will have a negligible impact on a species or population stock. The term "negligible" might best be defined as it is in the American College Dictionary: an impact that is "not worth considering." Thus, if the taking does not cause a significant change in population size, health of animals, or location of population stocks, then it certainly is negligible.

In addition, the Secretary is to provide guidelines for the establishment of a cooperative monitoring system. Two things should be noted here. First, the Secretary is not to establish the system itself, nor is he to provide guidelines for the system. The system is meant to rely on the cooperation of commercial fishermen and it will not be effective if fishermen are forced into a particular monitoring scheme. Second, the system will be a voluntary one in which fishermen will feel free to provide information without threat of penalty. During testimony before the committee, representatives of the commercial fishing industry noted that often fishermen are afraid to provide data on marine mammal interactions because they would be incriminating themselves. Thus, it is necessary that the system be cooperative and voluntary so that we can obtain the data needed for sound marine mammal management.

Finally, it should be noted that the provision for taking does not apply in the case of marine mammal species or population stocks which are formally identified as depleted. In addition, the Secretary may suspend for a temporary period the permission for taking if such taking is having more than a negligible impact on a species or population stock. This suspension will occur only after notice and opportunity for public comment, including public hearings in the affected area whenever possible.

The second area that merits discussion is the streamlining of the mechanism whereby a State such as Alaska can regain management over marine mammals. A number of criteria are established for the return of management and a series of procedures that must be followed, including public involvement. While the committee established these safeguards, it is the intent that management be returned to the States wherever possible and as quickly as possible.

In those cases where the range of a species extends beyond State waters, the committee provided that a cooperative mechanism be established that would allow the States to have appropriate input into the management of marine mammals by the Federal Government in the Fishery Conservation Zone. This will include, where appropriate, adoption of State regulations by the Secretary. In no instance would it involve Federal management within State waters. In addition, any decisions involving management outside of State waters must be made with the cooperation of the appropriate regional fishery management council having jurisdiction in that area. Considering that many marine mammal/commercial fishing interactions occur within the Fishery Conservation Zone, it is very important that the regional councils be fully involved in the management process. The amendments stress that the Secretary must coordinate with the councils and not merely inform them of what he is doing.

One other matter that is important to Alaska is the establishment of a subsistence priority for rural residents. As I indicated, the taking of marine mammals for food is very important in rural Alaska. Because the subsistence issue has been discussed by the Congress before in action on the Alaska National Interest Lands Conservation Act, the committee decided to adopt much of the language from title VIII of that act when discussing subsistence use of marine mammals.

The key aspect of this discussion involves the definition of "rural resident." Section 109(f)(2) of H.R. 4084 states that "rural resident" has substantially the same definition as is found in section 803 of the Lands Act. This would mean that the residents, both Native and non-Native, of communities such as Dillingham, Bethel, Nome, Kotzebue, Barrow, and other villages scattered throughout the State will be considered as "rural residents." As I indicated, this is the same language found in existing law and in no way adds to or detracts from the legal authority to grant a subsistence priority to rural residents of Alaska.

One item that is not addressed in these amendments is the concept of optimum sustainable population (OSP). The committee did discuss the matter with interested parties and decided not to modify the existing definition in the law or as it is currently described in regulation. While I recognize the reasons for the committee's decision, I must emphasize that many of the problems that we have experienced with the Marine Mammal Protection Act are due to the confusing, unworkable, OSP definition. It is my hope that this issue will be addressed in the near future.

In sum, I would like to commend the committee for the excellent work that it has done and express my apprecia-

tion for the cooperation shown by the various groups and individuals who have provided information to us. I think that this is a bill well worth supporting.

Mr. Speaker, there is one question I would like to ask the chairman of the subcommittee and the ranking minority member that is of great interest to the State of Alaska. It is my feeling and my understanding that the definition of "rural resident," under the Lands Claims Act, the Lands Act itself, in section 109(f)(2) of H.R. 4084, states that "rural resident" has substantially the same definition as is found in section 803 of the Lands Act. This would mean that the residents, both Native and non-Native, of communities such as Dillingham, Bethel, Nome, Kotzebue, Barrow, and other villages scattered throughout the State will be considered as "rural residents." Am I correct in interpreting that this would be the intent of the committee?

Mr. BREAUX. Mr. Speaker, will the gentleman yield?

Mr. YOUNG of Alaska. I will be glad to yield.

Mr. BREAUX. Mr. Speaker, I will respond to the gentleman, first, by taking this opportunity to commend him for his efforts in bringing this bill to the floor today. Had it not been for his insistence on the provisions which allow the program management to be turned over to the various States, I doubt that we would be successful in getting it included in the legislation. So, I think to his credit, his work is brought forth today in the final product we are bringing to the floor.

In response to the specific question, I would respond that the answer is yes, that is our intent. I have visited many of those areas the gentleman from Alaska is concerned about, and I can attest to the fact that these are indeed rural areas as we intended when we wrote the legislation.

Mr. YOUNG of Alaska. I thank the gentleman.

Mr. FORSYTHE. Mr. Speaker, will the gentleman yield?

Mr. YOUNG of Alaska. I yield to the gentleman from New Jersey.

Mr. FORSYTHE. Mr. Speaker, I agree with the chairman of the committee. The gentleman has described the legislation as we understand it, and I think this is the way he wants it and the way it should be.

Mr. YOUNG of Alaska. I thank the gentleman from New Jersey.

Mr. FORSYTHE. Mr. Speaker, I yield 1 minute to the gentleman from California (Mr. CLAUSEN).

Mr. CLAUSEN. Mr. Speaker, I rise briefly to add my commendations to the previous speaker's comments for the very distinguished chairman and minority member of the subcommittee, as well as the full committee chairman and the members of the committee, for bringing about what I think is a very important comprehensive sort of compromise piece of legislation. It recognizes the legitimate interests of those special interests that are tracking this species, but at the same time it has the potential of providing the kind of conservation protection which the committee seeks.

I commend the Members for their efforts.

Mr. FORSYTHE. Mr. Speaker, I yield 2 minutes to the gentleman from New York (Mr. LENT).

Mr. LENT. Mr. Speaker, I rise in support of H.R. 4084, the proposed amendments to the Marine Mammal Protection Act of 1972.

This legislation, which makes needed improvements to the act, has been a long time in coming. My colleagues might recall that the Merchant Marine and Fisheries Committee earlier this year reported a 1-year authorization in an effort to assure that needed clarifications and revisions would be made without further delay.

I am pleased to report that our goal has been achieved. The 3-year authorization before us today is the result of careful deliberations and negotiations by all parties concerned about the proper implementation of the Marine Mammal Protection Act. It is a carefully balanced proposal which has won the support of virtually all groups concerned with this issue, and it deserves the support of this body.

Briefly, the bill retains the Marine Mammal Protection Act's important goal of reducing the incidental taking of marine mammals to insignificant levels, and provides for its achievement by requiring use of the best marine mammal safety techniques and equipment that are economically and technologically practicable.

Any taking which has more than a negligible impact on any species would require a permit, and the Secretary is required to monitor population levels to assure they are maintained at their optimum sustainable population.

I applaud my colleagues who developed this proposal which is wholeheartedly endorsed by the environmental community, State fish and game agencies, Alaskan Natives, and the fishing industry. H.R. 4084 deserves this Congress support and I urge its prompt passage today. Thank you.

Mr. FORSYTHE. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. JONES of North Carolina. Mr. Speaker, at this time, I would like to take a moment or two and commend both the subcommittee chairman and the ranking minority member, Mr. FORSYTHE, including the staff, for this spirit of compromise. It is impressing these chairmen of the committees that we do have a kind of a spirit of compromise. We are now moving legislation which heretofore would have been impossible.

This Marine Mammal Act is a good example of that, so, Mr. FORSYTHE and Mr. BREAUX, I want to again thank you and the staff of both committees.

● Mr. RICHMOND. Mr. Speaker, I rise in support of H.R. 4084, reauthorization of the Marine Mammal Protection Act.

Since enactment of the original Marine Mammal Protection Act in 1972, this country has made extraordinary progress toward the goals of protecting marine mammals and establishing sound resource management policies.

For example, in 1972, before the act took effect, over 400,000 porpoises were incidentally taken in tuna fishing operations. By 1980, this number had been reduced to slightly over 20,000 per year. The tuna industry deserves high praise for its efforts to develop fishing methods which reduce the number of porpoises incidentally taken and I am hopeful that the industry will continue its work in this direction.

H.R. 4084 supports the industry's efforts by authorizing funds for research into new methods of locating and catching yellowfin tuna without the incidental taking of marine mammals.

My colleagues on the Merchant Marine and Fisheries Committee are to be commended for their bipartisan efforts to draft a strong, multiyear reauthorization of the Marine Mammal Protection Act. The committee bill attempts to answer the concerns of the administration, industry, and the major environmental organizations interested in the legislation, and has the support of all three of these groups.

Mr. Speaker, if we are to continue on the path of sound marine mammal management, this act must be reauthorized and a multiyear reauthorization is critical if there is to be continuity and predictability in the administration of the act.

Once again, I commend my colleagues on the committee for their fine work and urge passage of H.R. 4084.●

● Mr. CORRADA. Mr. Speaker, I rise in support of H.R. 4084, the Marine Mammal Protection Act authorization. This legislation authorizes appropriations through fiscal year 1984 for programs under the Marine Mammal Protection Act.

This bill, as amended, authorizes $9.45 million in fiscal year 1982, $10.76 million in fiscal year 1983, and $11.9 million in fiscal year 1984, to the Departments of Commerce and the Interior and the Marine Mammal Commission.

The authorization for fiscal year 1982 comes as part of the committee amendment. It retains the act's goal of reducing the accidental deaths of porpoises caught during yellowfin tuna fishing operations to insignificant levels approaching a zero mortality. However, it specifies that the use of the best marine mammal safety techniques that are economically and technologically feasible are all that is required in order to satisfy the act's stated goal. The bill also establishes a simplified procedure by which responsibility for the management of marine mammals may be returned to any State. It allows a State to regain management authority after it develops a program to insure that marine mammal populations remain at optimum sustainable levels, that any take will be humane, and that annual reports concerning the administration of the program are submitted to the appropriate Federal agency. The measure also requires, in the State of Alaska, that a subsistence preference in the taking of marine mammals be granted to rural residents. Finally, it makes other minor changes in the act, including adjustments in the definition of some terms.

The Marine Mammal Protection Act has been remarkably successful in achieving its purpose of insuring that marine mammals are maintained at healthy population levels. In the area of reducing the incidental take of porpoises in tuna fishing operations, for example, the number of porpoises killed has dropped from an estimated 368,000 animals in 1972 to an estimated 15,303 porpoises in 1980. This dramatic accomplishment vouches to its success in responding to the growing concern about the decline of certain species. It has brought life back to the important role that marine mammals play in the system as well as their economic, esthetic, and recreational value. The purpose of this act must be carried on.

I urge all my colleagues to vote in favor of this legislation.●

● Mr. OBERSTAR. Mr. Speaker, I rise in strong support of H.R. 4084 and would like to take this time to compliment the gentleman from Louisiana, and Jeff Curtis of his staff for the leadership they have provided on this potentially controversial issue. The bill that the gentleman brings to the floor today strengthens the Marine Mammal Protection Act by making it more effective and workable.

The Marine Mammal Protection Act (MMPA) was enacted in 1972 for the purpose of insuring that marine mammals are maintained at healthy population levels. In passing the act, Congress responded to the growing concern about the decline of certain species and recognized the important role that marine mammals play in the ecosystem as well as their economic, esthetic, and recreational value.

This legislation has been effective in preserving many species, especially porpoises. The number of porpoises taken by the tuna industry and others has declined from a high of 368,000 in 1972 to under 16,000 a year last year. This is a significant achievement.

According to the Global Report 2000, over 3 million species of life have vanished from the Earth during the last millenium. Although many of these species vanished through the process of natural selection, many others perished through man's direct actions or a drastic change in their habitat. The bill before us today does provide essential habitat protections which are so important to the survival of many mammal species.

Ultimately, the concern we show or fail to show for the other living inhabitants of this planet reflects on our humanity. Again my compliments to the gentleman from Louisiana for his leadership on this most important issue. I urge passage of H.R. 4084 without delay.●

Mr. JONES of North Carolina. Mr. Speaker, I have no further requests for time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from North Carolina (Mr. JONES), that the House suspend the rules and pass the bill, H.R. 4084, as amended.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill, as amended, was passed.

A motion to reconsider was laid on the table.

## GENERAL LEAVE

Mr. JONES of North Carolina. Mr. Speaker, I ask unanimous consent that all Members who wish to do so may have 5 legislative days within which to revise and extend their remarks on the bill, H.R. 4084 just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from North Carolina?

There was no objection.

## APPORTIONMENT OF INTERSTATE HIGHWAY FUNDS

Mr. HOWARD. Mr. Speaker, I move to suspend the rules and agree to the concurrent resolution (H. Con. Res. 179) making apportionment of funds for the National System of Interstate and Defense Highways for the fiscal year 1983.

The Clerk read the concurrent resolution, as follows:

H. CON. RES. 179

*Resolved by the House of Representatives (the Senate concurring),* That the Secretary of Transportation shall apportion for the fiscal year ending September 30, 1983, the sums authorized to be appropriated for such fiscal year by section 108(b) of the Federal-Aid Highway Act of 1956, as amended, for expenditure on the National System of Interstate and Defense Highways, using the apportionment factors contained in revised table 5 of the Committee Print 97-18 of the Committee on Public Works and Transportation of the House of Representatives.

The SPEAKER pro tempore. Pursuant to the rule, a second is not required on this motion.

The gentleman from New Jersey (Mr. HOWARD), will be recognized for 20 minutes, and the gentleman from California (Mr. CLAUSEN) will be recognized for 20 minutes.

The Chair recognizes the gentleman from New Jersey (Mr. HOWARD).

Mr. HOWARD. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I commend to the House that House Concurrent Resolution 179 directing the apportionment of funds for the National System of Interstate and Defense Highways for the fiscal year 1983. House Concurrent Resolution 179 was reported by the Committee on Public Works and Transportation by voice vote on September 17, 1981. The Congressional Budget Office confirms that there will be no additional costs to the Federal Government as a result of this resolution.

Mr. Speaker, every 2 years, the Congress is required to take some action to approve the cost-based factors used by the Department of Transportation to apportion to the States interstate system construction funds. This approval action has traditionally taken the form of either a bill or a resolution, depending on whether the Congress is considering a highway bill at the time the matter arises for action. The Committee on Public Works and Transportation reported, on May 19 of this year, the bill H.R. 3210, which includes a provision approving a specific apportionment table related to that legislation. The committee intends to make every effort to see that H.R. 3210 is advanced to enactment in an expeditious manner.

However, substantial differences persist on the best approach to a highway bill between and among the administration, this committee and the other body. We want to advance H.R. 3210, the committee's 1-year bill, while the Senate and the administration are favoring multiyear legislation. Under the circumstances, it is conceivable the Congress might fail to get a highway bill this session.

Section 104 of title 23, United States Code, requires the FHWA to make fiscal year 1983 interstate system apportionments on October 1 of this year. Because the Department cannot make those apportionments without congressional approval of the interstate cost estimate, and because the Congress may not be able to advance

H.R. 3210 to enactment by October 1, the committee recommends the House discharge this important fiscal responsibility through the mechanism of House Concurrent Resolution 179 which, of course, would not require Presidential concurrence.

The committee acknowledges that the particular apportionment factors which H.R. 3210 entails represent a more desirable course of action. However, those apportionment factors relate directly to the program amendments in H.R. 3210 which shift certain projects out of the basic interstate construction program into a new 4R or reconstruction program. Obviously, these program changes require the enactment of a public law, subject to Presidential approval.

The question arises as to how to resolve the inconsistencies between H.R. 3210 and House Concurrent Resolution 179. First, we do not propose to change the standard rule of law which says that the provision enacted last will govern, if both pieces of legislation are enacted. Most likely House Concurrent Resolution 179 would be enacted first, superseded by H.R. 3210. During the conference with the other body, H.R. 3210 might have to be adjusted to reflect the latest progress made by the States in obligating their fiscal year 1983 interstate apportionments or adjusted on the basis of other considerations such as equity and ease of administration of the interstate program.

While it is the committee's intention to advance H.R. 3210 to enactment, to do so in an expeditious manner, I believe the House must approve this concurrent resolution so that the committee will have the parliamentary latitude to bring its bipartisan bill into law. What this means, of course, is that, should the Congress fail to get a highway bill by this session, the States and the people will know that the House of Representatives has discharged its responsibility.

□ 1440

Mr. Speaker, I urge the adoption of this concurrent resolution.

Mr. Speaker, I yield such time as he may consume to a member of the committee, the gentleman from Missouri (Mr. YOUNG).

Mr. YOUNG of Missouri. Mr. Speaker, on May 19 of this year, the Committee on Public Works and Transportation reported out a 1-year highway bill, H.R. 3210. Among the items contained in this legislation is a revised interstate cost estimate. The interstate cost estimate, or ICE, was to be used to instruct the Federal Highway Administration as to how to apportion interstate construction funds among the States beginning October 1, when the current ICE expires.

Although H.R 3210 is expected to be brought to the floor of this Chamber this Wednesday, the greatest likelihood is that the legislation will not be enacted before October 1. So, on that date, absent any other action, the Federal Highway Administration will be unable to apportion interstate construction funds among the States—effectively bringing the program to a halt in some States.

House Concurrent Resolution 179 is intended to preclude that possibility. It directs the Secretary to apportion the $3.2 billion authorized for fiscal year 1983 according to factors contained in the revised table 5.

I should need to explain two things to our colleagues. The first is, that interstate funds are made available to the States in the year before they are authorized. Hence, this ICE, taking effect at the very outset of fiscal year 1982 actually apportions fiscal year 1983 authorizations.

The other matter I would wish to point out is the difference between the ICE we are bringing up today, and the one included in H.R. 3210. Among the most significant provisions of H.R. 3210 is that which redefines the Interstate System. Certain types of interstate projects are made ineligible for construction funding, and included, instead, in an expanded 4R program. Among the types of projects newly falling into this category are soundwalls, landscaping, weigh stations, and in some cases, additional lanes in less-populated areas. But, again, each of these projects will become eligible for 4R funding.

This redefinition will help our Nation complete its interstate system by 1990 by reducing the cost of doing so from about $53 billion to around $37 billion. Because these legislative changes are contained in H.R. 3210, the interstate cost estimate contained in that legislation recognizes the changes and includes the lower estimate. But, absent that legislation, we must assume the higher estimate.

On Wednesday, I hope every Member will be able to join me in supporting H.R. 3210 and the reduced interstate cost estimate. But today it is incumbent upon each of us to support House Concurrent Resolution 179—so we can help make sure that the interstate construction program remains fully operative after October 1, irrespective of the status of H.R. 3210.

The issue today is really very straightforward and simple. House Concurrent Resolution 179 does not authorize a penny. It does allow interstate funds to be apportioned among the States. And, put most simply of all, it is a resolution that must be passed.

I move that we suspend the rules and pass House Concurrent Resolution 179.

Mr. CLAUSEN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise to associate myself with the effort on the part of the committee to advance this concurrent resolution and approve the cost base factors to be used by the Department of Transportation to apportion to the States Interstate Highway System construction funds for fiscal year 1983.

Mr. Speaker, as the Members know, I would prefer that we would be able to finalize the action on H.R. 3210, which is what the committee actually reported out. However, House Concurrent Resolution 179 is kind of an insurance policy or tandem vehicle which the committee agreed upon in order to complete our action so we would not bring the program to a halt on fiscal year 1983 funding by October 1 if H.R. 3210 was not enacted.

We would all prefer to be here supporting a cost estimate for the rest of the Interstate Highway System so we may complete the Interstate Highway System. In fact, we on the committee have taken that action and we will have our chance to vote on the legislation on Wednesday when H.R. 3210 is considered by this body.

Mr. Speaker, I will yield time to the gentleman from Florida (Mr. SHAW), who has been extremely diligent in his efforts, not only on behalf of the people he represents but the people of the State of Florida as well as other sections of the country who are concerned about the possibility of bringing this program to a halt.

Mr. Speaker, I yield such time as he may consume to the gentleman from Florida (Mr. SHAW) for any comments he may like to make.

Mr. SHAW. Mr. Speaker, I rise in support of House Concurrent Resolution 179. This resolution would comply with the statutory requirement that Congress voice its approval for the revised table V which is used as the basis for apportioning authorizations to the States in order to complete construction of our Nation's Interstate Highway System.

Section 104(e) of title 23, United States Code, requires the Federal Highway Administration to apportion Interstate System funds 1 year in advance of their fiscal year. The apportionment of those funds cannot occur until Congress has approved an updated interstate cost estimate, pursuant to section 104(b)(5)(A) of title 23.

The Interstate System is the only system which requires continuing congressional approval of apportionment factors developed by the Department of Transportation.

Our adoption of this resolution will permit the Federal Highway Administration to apportion interstate funds on October 1, 1981. Some States have already obligated almost all of the interstate apportionments previously allocated. For these States, it is possi-

ble that some obligation decisions during the first quarter of fiscal year 1982 could be adversely affected if new apportionments of interstate funds were not made.

Mr. Speaker, in a sense, our action today is an insurance policy to try to bring some stability into the Federal-aid highway program during these fluid times. It is an insurance policy that will permit the apportionment of interstate funds based on the factors contained in a table developed to conform with existing law. On Wednesday, this body will be considering H.R. 3210, a 1-year highway bill. H.R. 3210 includes a different table V, a table V whose apportionment factors relate directly to program amendments which shift certain projections out of the basic interstate program into a new 4R or reconstruction program. When H.R. 3210 is enacted and signed into law by the President, those apportionment factors will supersede our action today. But in the meantime, States would be permitted to move forward with the full complement of options regarding the obligation of funds during the first quarter of fiscal year 1982.

Absent the approval of this concurrent resolution, and the enactment of H.R. 3210 by October 1, 1981, a factor for allocating the $8.2 billion obligation limitation contained in the Omnibus Reconciliation Act of 1981 would be missing, to wit: the interstate construction fund apportionment due to be made by that date. The Federal Highway Administration believes that they could distribute the $8.2 billion obligation limitation using as a factor the interstate construction fund apportionments made on October 1, 1980. It is their view that they could subsequently adjust and revise the distribution when Congress approves the 1981 interstate cost estimate either by concurrent resolution or by public law. I believe that such a procedure as FHWA contemplates would comply with both the spirit and intent of Congress as expressed in the Omnibus Reconciliation Act of 1981. However, the passage of this concurrent resolution would remove any ambiguity regarding the legality of that action. I intend to support H.R. 3210 and I am delighted that it will receive prompt attention this week. With the assurances of prompt consideration of the programmatic changes that we all agree are necessary, I support the concurrent resolution and urge your support.

□ 1450

Mr. CLAUSEN. Mr. Speaker, I have no other requests for time.

Mr. HOWARD. Mr. Speaker, I have no further requests for time and I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from New Jersey (Mr. HOWARD) that the House suspend the rules and agree to the concurrent resolution, House Concurrent Resolution 179.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the concurrent resolution was agreed to.

A motion to reconsider was laid on the table.

## OVERSEAS PRIVATE INVESTMENT CORPORATION AMENDMENTS ACT OF 1981

Mr. BINGHAM. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 3136) to amend the Foreign Assistance Act of 1961 with respect to the activities of the Overseas Private Investment Corporation.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from New York (Mr. BINGHAM).

The motion was agreed to.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill, H.R. 3136, with Mr. LEVITAS in the chair.

The Clerk read the title of the bill.

The CHAIRMAN. Pursuant to the rule, the first reading of the bill is dispensed with.

Under the rule, the gentleman from New York (Mr. BINGHAM) will be recognized for 30 minutes, and the gentleman from California (Mr. LAGOMARSINO) will be recognized for 30 minutes.

The Chair recognizes the gentleman from New York (Mr. BINGHAM).

Mr. BINGHAM. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, the Overseas Private Investment Corporation (OPIC) is a program created by act of Congress in the early 1970's to supplement and enhance our foreign assistance program by encouraging private U.S. firms to undertake investments in the developing countries—investments particularly which would contribute to local economic development, and also benefit the U.S. economy. OPIC employs two major methods of doing that: It insures U.S. investors against political risks—expropriation, war and insurrection, and inconvertibility of funds. That insurance is issued directly to the U.S. investor, and he pays premiums for it.

OPIC also guarantees foreign investment loans against the same kinds of political risks. In such cases, typically, the guarantee is issued to a bank or other financial institution which loans money to a U.S. firm for a particular foreign investment.

OPIC also makes a small number of direct loans for foreign investments. Those are made only to facilitate foreign investment to smaller businesses which would otherwise be unable to engage in foreign investment.

The purpose of the bill before us is to extend OPIC's authority to continue these programs for an additional 4 years—through the end of fiscal year 1985. In the absence of this legislation, OPIC's operating authority would expire on September 30 of this year.

I want to emphasize, and the committee report on this bill emphasizes, that this bill does not authorize expenditure of any funds. While OPIC received some $100 million in appropriated startup funds when it was created, it has since operated on a self-sustaining basis. As the committee report notes, it has accumulated assets and reserves in excess of $600 million. Those reserves have come primarily from the insurance premiums I mentioned, and from liquidation of holdings that OPIC has obtained after paying claims. Over the years, OPIC has paid more than $100 million in claims to U.S. investors. At present, it is facing or anticipating claims of less than $50 million. On that basis, it is considered to be on sound financial ground from an accounting and actuarial point of view, and has been so certified by the General Accounting Office.

The fact that this bill does not call for authorization of any Government funds is confirmed by the Congressional Budget Office figures on this bill that are in the committee report, and to which I want especially to draw the Members' attention. Those figures indicate that OPIC operations under the authority proposed by H.R. 3136 will result in net gains to the U.S. Treasury of $1 million in fiscal 1982, $1 million in 1983, $6 million in 1984, $12 million in 1985, and $14 million in 1986. So this is a self-sustaining program which has no cost to the U.S. taxpayer beyond the funds which were originally appropriated, which OPIC still has, to which it has added through careful implementation of its insurance and guarantee programs.

I want to note, also, that the Congressional Budget Office projections of OPIC net income over the next several years takes account of the fact that this bill, H.R. 3136, would continue OPIC's direct loan program—the so-called DIF program. The administration, on budgetary grounds, had proposed to terminate that program. Its proposed continuation under this bill is the result of an amendment introduced by our colleague from California, Mr. LAGOMARSINO, the ranking minority member of the Subcommittee on International Economic Policy

and Trade, which I have the honor to chair. I am sure in his statement Mr. LAGOMARSINO will discuss in greater detail the need for the direct loan program. Suffice for me to say that I am pleased to support that provision. The Congress, in considering extension of OPIC's authority in 1977-78, gave a very clear directive to OPIC to do more in the way of supporting and promoting foreign investments by smaller businesses. Much of OPIC's insurance portfolio is, by necessity, devoted to the projects of larger firms. Through its direct loan program, however, OPIC can target help to smaller businesses. In fact, direct loans from OPIC are available only to smaller U.S. investors, and without that program it would be most difficult for OPIC to achieve the small business assistance responsibilities that Congress has mandated. So I join with my colleague in support of continuing the DIF program, and I congratulate him for his sponsorship of that provision which is in this bill, and also for his active support and assistance throughout the subcommittee's and the full committee's consideration of this legislation.

Mr. Chairman, I do not want to give the impression that OPIC insures, or guarantees, or provides loans for every U.S. foreign investment in a developing country that comes along. Quite to the contrary. OPIC projects must first meet very specific tests as to their actual contribution to the host country's economic development. Those tests are applied both before the investment, on the basis of data provided by the investor and the government of the host country, and also after the investment, on the basis of data on the project's actual operation. In addition, OPIC operates under several very important policy constraints. Again, these are reviewed in the committee report, but I want to emphasize one or two of them.

Probably the most important is the restriction, which is already in the law, that OPIC not support any project which would have harmful effects on U.S. employment. Those restrictions are formulated in such a way that they apply both to total U.S. employment, as well as employment in particular industries and sectors.

I cannot say that OPIC has never supported a project which might have had some negative impact on U.S. employment. In its startup years, before the present strict directives regarding U.S. employment were in the law, OPIC supported projects which at least raised questions as to their consistency with U.S. employment objectives. In recent years, however, the subcommittee which I chair has conducted quite extensive and detailed hearings in which we have reviewed many specific OPIC-supported projects. We have taken considerable care to look particularly at projects which appeared possibly to involve exportation of jobs—projects in the electronics industry, for example. In virtually all of the cases that this committee has examined, the details of the project indicated that it would not be likely to cost American jobs. So I feel comfortable in assuring the House that OPIC is taking special care to avoid any such projects, and has avoided such projects since the Congress has given clear direction on that point.

I would mention, in passing, that it is on the basis of this experience that the committee has proposed to eliminate certain specific restrictions in the act on, for example, citrus, sugar, palm oil, and copper projects. It is not that the committee anticipates OPIC will necessarily support such projects, although economic conditions have improved in some of those industries since Congress last considered OPIC legislation. But the general prohibitions in the statute against projects which would threaten U.S. employment, and the requirement that OPIC projects be consistent with the balance of payments and employment goals of the United States, are sufficient to insure that OPIC would avoid and reject projects in those or other sectors, which are at any given time extremely import sensitive, if a project were likely to result in further import pressures.

Finally, with respect to restrictions, I would remind Members that OPIC is required to take into consideration U.S. human rights policies in the countries where it operates, and with respect to the specific projects it supports. In fact, OPIC submits each project on a case-by-case basis to the Assistant Secretary for Human Rights and Human Affairs for its advice. During the previous administration it was the Christopher committee that reviewed OPIC projects and on one occasion recommended against OPIC support. That recommendation was followed. Under this administration, if the Office of Assistant Secretary on Human Rights has any doubts about a project, it can refer the matter to the Interagency Working Group on Human Rights and Foreign Assistance. OPIC has assured the committee that it will continue to reject any project which the State Department or the Interagency Working Group recommends be rejected. In addition, it has refrained on its own from supporting projects in Chile, Argentina, Uruguay, and several other countries for human rights reasons, among others. Although two of those countries—Argentina and Chile—would come within the new per capita income ceiling proposed by this bill, OPIC officials inform me they have no plans or intention of resuming support for projects in those countries.

Which brings me, Mr. Chairman, to the provisions of this bill which would slightly expand OPIC's operations. The most important of those would permit OPIC to issue insurance for a new category of political risks—namely losses that might occur due to civil strife. As the committee report notes, we examined very carefully just what was encompassed by the term civil strife, and the committee satisfied itself that this would not involve undue additional risk to OPIC, and that this type of insurance is not only desired by investors, but is practical and workable for OPIC to provide.

The bill also increases the per capita income ceiling beyond which OPIC may offer its programs only in exceptional circumstances. That ceiling is increased from $1,000 in 1975 dollars to $2,950 in 1979—a real—adjusted for inflation—increase of $1,200. This, quite obviously, will expand OPIC's ability to provide its services for U.S. investments not only in the least developed countries, but in some of the so-called middle-income developing countries. The committee feels that this is appropriate both to preserve OPIC's self-sustaining financial position, but more importantly, to offer evidence of active U.S. interest in the economic advancement in countries where, in many cases, direct U.S. foreign assistance is no longer provided.

The list of countries which would be affected by this increased ceiling is contained in the committee report, but I would note that simply because a country would now be within the ceiling does not mean that OPIC programs will necessarily be offered if other restrictions or considerations apply. As I mentioned just a moment ago, for example, persistent human rights violating countries will not be eligible even if they are under the per capita ceiling.

This increase in the per capita income ceiling is a compromise. The administration had proposed to remove the income restriction entirely. The committee preferred to retain at least this limit, and expects that OPIC's programs will still be concentrated in the least developed nations even with this change. OPIC projects in the least developed countries have now reached 67 percent of the dollar value of its portfolio, and the committee would expect that the concentration of effort in the least developed countries would continue at least at that level.

I believe the Members of the House will be interested, Mr. Chairman, in the fact that OPIC's programs, in addition to the developmental benefits they provide for less developed countries, contribute substantially to U.S. exports and the U.S. balance of payments. That contribution occurs both directly and indirectly. It occurs di-

rectly through immediate exports of equipment and supplies from the United States for use in the investment project. OPIC estimates that in the past 3½ years alone, projects it has insured or guaranteed have generated over $3.4 billion in such direct U.S. exports. These projects also generate indirect U.S. balance-of-trade benefits by retaining U.S. foreign markets that might otherwise be taken over by firms from other nations. But those are harder to measure. These export benefits are particularly important, Mr. Chairman, at a time when the U.S. balance of trade continues to be in substantial deficit, and I know that an increased number of Members are concerned about the need to stimulate U.S. exports. Certainly the OPIC program provides such a stimulus, and indeed the bill before us, H.R. 3136, adds positive trade benefits to the United States as one of the criteria OPIC should take into account in selecting projects and generally conducting its business.

Mr. Chairman, I believe that covers the major provisions of this bill. At the appropriate time during the amending process tomorrow I will offer two amendments requested by the Budget Committee technically to bring the bill into full compliance with the Budget Act. In conclusion, I would say to my colleagues in the House that I have been involved for some 6 years now in overseeing the Overseas Private Investment Corporation. It was subjected to very careful and even critical scrutiny by the House in 1977-78. Several important and, I think, useful amendments were adopted by the House. I think OPIC has responded very positively to those amendments, and that this program continues to be one of the very best bargains among all Government programs. It not only costs the taxpayer nothing, but it contributes very positively and importantly to America's image in the developing world, to economic development in less developed countries, and to our own economy and balance of trade. I commend this program and this bill extending OPIC to the Members of the House, and ask for your support.

Mrs. FENWICK. Mr. Chairman, will the gentleman yield?

Mr. BINGHAM. I yield to the gentlewoman from New Jersey.

Mrs. FENWICK. Mr. Chairman, I thank my colleague for yielding and would like to associate myself with his remarks. We have here an agency which is among all our Federal agencies indeed remarkable. It does not cost the taxpayers a dime. It is doing useful work. It is managed extremely well.

Hearings before our committee of which our distinguished colleague (Mr. BINGHAM) is chairman have shown the part it plays in the economy of this country and of our friendly trading nations. I hope very much this will receive the full approval of the House.

Mr. BINGHAM. I thank the gentlewoman for her remarks.

Before yielding the floor, Mr. Chairman, I would like to pay tribute to the ranking member of the subcommittee which has responsibility for this legislation, the gentleman from California (Mr. LAGOMARSINO). He has played a major role in the consideration of this legislation and is responsible for one of the major amendments that the committee incorporated in the legislation submitted by the administration. So I am very grateful to him for his work on this bill.

Mr. LAGOMARSINO. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I rise in strong support of H.R. 3136, legislation to reauthorize the operation of the Overseas Private Investment Corporation for an additional 4 years. The authority for OPIC's operation expires September 30, so it is imperative that we act expeditiously on this bill.

During its 11-year history, OPIC has admirably fulfilled its dual role of aiding development overseas and promoting U.S. exports. I have long favored the contribution that private investment offers for development. Secretary of State Haig, AID Director MacPherson, and U.S. Trade Representative Brock all strongly support OPIC and the part it has played in encouraging investment overseas. During our subcommittee's earlier consideration of this OPIC legislation, I received a letter from Ambassador Brock. He told me of the valuable role OPIC insurance of private investment plays in the expansion of our trade with the developing world.

In addition to the unanimous approval of this legislation by our subcommittee and the full Foreign Affairs Committee, the House Republican Policy Committee endorses this legislation to continue OPIC's program of insurance and direct lending authority.

The Republican policy statement points out that during the next 5 years OPIC projects are expected to result in $3 billion in U.S. exports, create a net gain of 9,800 jobs for American workers and taxpayers, and generate $247 million in capital flows back to the United States. It will do all that at the same time that it promotes projects approved by the host country designed to have significant development impact for that country.

I should note that some authorities have indicated the number of jobs created by increased exports would not be 9,800 but rather anywhere from 52,000 to 120,000. Even if the lowest figure were the result, it is still a significant contribution to the U.S. domestic economy.

OPIC operates on a self-sustaining basis, which requires no congressional appropriations. The initial capitalizations of OPIC of $106 million have grown to the point where it now has almost $700 million in total assets.

H.R. 3136 simply reauthorizes OPIC's operation for an additional 4 years, with three changes in its mandate: First, raising the per capita income restriction from $1,000 to $2,950, so that some middle income countries may become eligible for OPIC projects: countries like Turkey, Korea, the Barbados, Cyprus, and Brazil; second, explicit recognition of OPIC's contribution to expanding U.S. trade; and third, authorizing insurance coverage for civil strife.

For sometime, the Export-Import Bank and many other countries have permitted coverage for loss due to civil strife. Such coverage for OPIC could serve to encourage investments in countries where there are varying degrees of unrest, such as terrorism, sabotage, or riots, which do not necessarily reach the level of war, revolution, or insurrection, which are already covered by OPIC.

I would also like to make a few comments about one provision of H.R. 3136 which is the result of an amendment I offered during our subcommittee's markup: That is the continuation of lending authority for OPIC.

It seems to me, Mr. Chairman, that OPIC's direct loan authority, or the DIF as it is usually called, seems to have been an unintended victim of the administration's commendable efforts to pare back the direct lending activities of the Federal Government and to reduce Government spending generally. The reason I characterize it as an unintended victim is because the facts of the matter reveal that in contrast to other Government loan programs, OPIC's direct lending program not only lends at competitive rates to small businesses but also has been shown to make a profit for the Government.

But perhaps most important is the fact that OPIC's loan funds are internally generated and thus the Corporation does not turn to private credit markets directly or to the Federal financing bank. I know we all have been concerned with the so-called crowding-out effect of Government borrowing in credit markets and the effect that the Government's presence in credit markets has on high interest rates. But I can assure you that this is not the case with OPIC.

When OPIC was created, the Congress authorized OPIC to establish the direct loan program and to fund it with an initial $40 million capitalization. From the inception of OPIC operations, OPIC has earned $11.3 million in interest on the program through fiscal year 1980. Over the life

of the DIF, OPIC has not sought nor does it intend to seek further appropriations for additional funding of the program.

Mr. Chairman, as is clear from the wording of the provision restoring the DIF, we are not doing anything except reallocating OPIC's own earnings. In this case, what we are saying is that OPIC shall merely be authorized to utilize repayments of principal and interest to issue new loans in addition to which it may allocate 10 percent or more of its net income to its direct investment fund, the DIF. This formula would provide OPIC with an estimated $10 million for fiscal year 1982 which corresponds to the amount available under the DIF program this year.

I would also like to add that, as a member of the Inter-American Affairs Subcommittee, I am particularly aware of the importance of the administration's commitment to encourage development of the Caribbean basin countries. In this regard, OPIC's direct lending authority will provide an invaluable element of that regional policy. In the most recent fiscal year, OPIC made 18 direct loans, 16 of which were in the Caribbean basin area. Indeed, the fact that OPIC's direct loans can be targeted to specific countries and economic sectors that are of importance to U.S. foreign policy interests is one of the principal attractions of the DIF program.

Another aspect that must not be overlooked is that this program is essentially a program to encourage small business to make investments in overseas development. By law, only small business can participate in ths program and thus it serves the additional function of stimulating U.S. small business to venture into foreign markets.

Mr. Chairman, it is hard for me to understand how the elimination of a profitmaking venture will enhance the budgetary efforts of the administration given the fact that OPIC is not displacing any private borrower in the credit market.

I believe OPIC offers a valuable contribution both to America's own domestic economic health and to the developing countries, where private U.S. investment serves to promote both development and trade.

Mr. Chairman, I urge my colleagues to give their full support to H.R. 3136 to reauthorize the operation of OPIC.

● Mr. BROOMFIELD. Mr. Chairman, I support H.R. 3136, legislation reauthorizing the operation of the Overseas Private Investment Corporation for another 4 years. I want to emphasize that as a self-sustaining operation, OPIC does not require the Congress to authorize any additional appropriations for its programs. No funds have been appropriated for OPIC since 1974, and its capital and reserves now total almost $700 million.

During the recent Foreign Affairs Committee study mission to the Far East, I had an opportunity to discuss with American businessmen the need for a strong Government commitment to export promotion. Those businessmen strongly urged continued support for OPIC as part of the administration's efforts to improve America's international economic competitiveness.

While OPIC's primary function is to promote development, it serves the additional role of promoting America's export trade. It does this through promotion of private U.S. investment in the less developed countries. The administration believes, and I fully concur, that in a time of necessary budget restraint we must encourage U.S. companies to invest resources in worthy development projects overseas.

I might add the Committee for Economic Development in its study on transnational corporations and developing countries concludes, in part, that OPIC's programs in support of investment in the Third World should be reassessed with a view to extending their scope.

The very positive benefits of development for the LDC's and trade advantages for the United States make support for OPIC imperative. I urge my colleagues to give their strong support to H.R. 3136.●

□ 1500

Mr. BINGHAM. Mr. Chairman, I yield such time as he may consume to the distinguished chairman of the Committee on Foreign Affairs, the gentleman from Wisconsin (Mr. ZABLOCKI).

Mr. ZABLOCKI. Mr. Chairman, I first would like to commend the chairman of the Subcommittee on International Economic Policy and Trade, Mr. BINGHAM, and the ranking minority member, Mr. LAGOMARSINO, for the excellent work they have done in holding oversight hearings on OPIC and in developing this bill. For the first time in my memory, the bill was reported by the committee without controversy, largely due to the groundwork and efforts made by the subcommittee.

In its decade of existence, OPIC has proved itself an efficiently run quasi-governmental corporation that pursues public policy goals without taxpayer expense.

OPIC serves three important purposes: It promotes economic progress in developing countries through encouraging U.S. investment; in doing so, it promotes U.S. exports and more assured access to natural resources in other countries; and, its insurance has helped depoliticize investment disputes and allowed them to be resolved in a quiet fashion outside the political arenas.

OPIC has proved itself a worthwhile entity and I urge the Members to renew its mandate.

Mr. LAGOMARSINO. Mr. Chairman, I yield 1 minute to the gentlewoman from New Jersey (Mrs. FENWICK).

Mrs. FENWICK. Mr. Chairman, I rise in strong support of H.R. 3136, the legislation to amend and reauthorize the programs of the Overseas Private Investment Corporation.

OPIC is a unique Government agency—it successfully fulfills its mission of encouraging U.S. exports and promoting development in foreign countries, and it does so at no cost to the taxpayer. It is indeed a pleasure and a relief to support the reauthorization of an excellent program that requires no appropriation from this body.

The Subcommittee on International Economic Policy and Trade and the Foreign Affairs Committee held a lengthy and most revealing set of hearings on this legislation. Our hearings made it clear that OPIC's provision of political risk insurance, loan guarantees, and direct loans to U.S.-sponsored business projects abroad had the major effect of encouraging the sale of U.S. products abroad. In the past 3 years, OPIC has encouraged and assisted 306 development projects for a total investment of over $4 billion. The initial exports of U.S. machinery and equipment used to establish these products alone equaled $1 billion.

Just as importantly, the net effect of OPIC's support for these projects is to foster the creation and growth of private enterprise in the developing world. To the extent that OPIC is successful in encouraging private companies to invest in the less developed countries, the foreign aid bill to be paid by U.S. taxpayers will be reduced.

OPIC is and has been a fine program. It should be reauthorized, encouraged, and congratulated.

Mr. LUNGREN. Mr. Chairman, I rise in support of H.R. 3136 to reauthorize the Overseas Private Investment Corporation. In an increasingly interdependent world, foreign trade has become crucial to the well-being of the United States in both economic and strategic terms.

The activities of OPIC serve to enhance our position in international markets in two important ways. First, by encouraging the growth of private investment in developing countries, OPIC nurtures the economic base upon which our exporting industries rely. The developing nations do constitute an important part of our export markets, having absorbed fully 39 percent of U.S. exported manufactured goods and 32 percent of U.S. agricultural exports in calendar 1979.

About 6 percent of our total manufacturing work force is employed by virtue of this trade. So clearly, the United States has a strong interest in the vitality of Third World economies, which are themselves strengthened by the efforts of OPIC.

Second, on a more specific level, OPIC projects directly generate U.S. exports. Specific OPIC projects have directly resulted in procurement of more than $1 billion over the past 3 years and are projected to burgeon to $2 billion over the next 2 years.

Several new OPIC projects are expanding the dealership and distributorship networks for U.S.-made products overseas and assisting U.S. development projects by signing political risk insurance against losses due to volatile political situations.

But one of the OPIC activities which I find most beneficial to our interests by developing new and diversified foreign sources for strategic minerals which are not found in the United States. By encouraging the widespread development of strategic minerals, OPIC lends U.S. foreign policy a much needed flexibility in procurement of them.

For instance, when Zairean rebels caused the shutdown of cobalt mining operations there a few years ago, the price of that strategic mineral skyrocketed. But today, through the efforts of OPIC to expand the cobalt-producing capacities of Zambia and Botswana, the United States is no longer solely dependent on Zaire for this metal which is vital to our aerospace industry.

The functions performed by OPIC represent the very best characteristics of a free-market economy. Not altruistic in and of themselves, they expand the community of interest so that our domestic workers and workers in developing nations share in the greater universal prosperity which results.

I urge my colleagues to support H.R. 3136 so that OPIC can continue its very admirable pursuit of this goal.

● Mr. SHAMANSKY. Mr. Chairman, I rise in support of H.R. 3136 to renew the authority of the Overseas Private Investment Corporation. The Corporation plays an important role in strengthening the international competitive position of the United States. It also assists in the strategically important effort to assist the economic development of certain less developed nations.

The question has been raised before whether OPIC's mission is to foster development or aid U.S. business. The question seems to me to present an artificial dichotomy. OPIC's programs in practice not only benefit both U.S. businesses with overseas investments and the other countries in which those investments are located, but strengthens the global economy and increases the total world flow of goods and capital. OPIC's policy tries to match the resources of developing countries with the American private sector capital, technology, and experience necessary to boost development on a partnership basis.

Since the program is cost-free—OPIC by statute must be self-sustaining—everyone can win, even the U.S. taxpayer. Labor does not lose either, despite some criticism that OPIC exports U.S. jobs. Research shows clearly that foreign direct investment by the American private sector not only increases individual firms' exports but also boosts these companies' domestic employment.

Continuing research by the Business International Corp. has looked at U.S. foreign direct investment over the past 20 years. Its conclusion is that programs like OPIC's do increase both exports and domestic jobs. Focusing on the years 1970 to 1978, and nearly 100 American corporations with total sales of $430 billion, the researchers found a 203 percent jump in exporting to foreign affiliates. Exports to other purchasers rose 174 percent, and the value for both grew to $29 billion.

Foreign direct investment does not appear to reduce employment in the United States. The Business International Corp. study showed that while employment in the American manufacturing sector rose 3.5 percent from 1970–78, employment among firms participating in overseas investment grew by 12 percent. Companies with the most intensive foreign investment activities showed an employment increase of 14.8 percent, compared to a 4.3-percent increase among firms with the least overseas investment.

U.S. ventures overseas often lead to the growth of marketing networks to sell products manufactured in the local foreign economy as well as American imports from the parent firms. Without these U.S.-owned overseas marketing networks, both domestic local trade and our own export activity would be substantially lower. OPIC's activities help promote the development of such trading networks.

OPIC works primarily through insurance and finance programs. It provides protection against losses resulting from political upheavals faced by private investors in parts of the developing world, and also provides direct or guaranteed loans to foreign projects involving U.S. investors. In all this OPIC is differentiated from nearly all other U.S. foreign assistance programs by its self-supporting nature. Fiscal 1980 was OPIC's best year yet, with gross revenues of more than $76 million. By assisting with the flow of foreign investment to less developed countries, OPIC strengthens both the prosperity of those nations and the United States.

To those who question how the Corporation can support both international trade and internal development at the same time, I would answer, very well indeed. Thank you, Mr. Chairman.●

---

Mr. BINGHAM. Mr. Chairman, I have no further requests for time, and I yield back the balance of my time.

Mr. LAGOMARSINO. Mr. Chairman, I have no further requests for time, and I yield back the balance of my time.

The CHAIRMAN. All time has expired.

Mr. BINGHAM. Mr. Chairman, I move that the committee do now rise.

The motion was agreed to.

Accordingly the Committee rose; and the Speaker pro tempore, Mr. MURTHA, having assumed the chair, Mr. LEVITAS, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 3136) to amend the Foreign Assistance Act of 1961 with respect to the activities of the Overseas Private Investment Corporation, had come to no resolution thereon.

---

## GENERAL LEAVE

Mr. BINGHAM. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill, H.R. 3136.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

---

□ 1510

## OPPOSE SALE OF AWACS TO SAUDI ARABIA

The SPEAKER pro tempore (Mr. MURTHA.) Under a previous order of the House, the gentleman from California (Mr. DYMALLY) is recognized for 30 minutes.

Mr. DYMALLY. Mr. Speaker, I join with the California Democratic delegation and others of my colleagues in opposing the sale of AWACS and the F-15 enhancement package to Saudi Arabia. I believe with my colleagues that the proposed sale is contrary to the overall interests of the United States, a peril to the security of Israel, and an excessive demand upon our already proven support for the Saudi Government. Moreover, this arms sale introduces a new level of sophisticated weaponry to a highly volatile region. The threat of increased tensions and instability in the Middle East from the transfer of this equipment far outweighs any arguments that may be put forth on behalf of the sale.

Once again, the administration has put forth the Soviet threat as the dominant factor in its foreign policy

decisionmaking. At some point—and the sooner the better—Congress needs to firmly opt for diplomacy, rather than arms proliferation, as the solution to international conflict. If we are genuinely committed to arms control, this is an opportune time to affirm that position.

I urge the Members of this House to pursue tactics for bringing peace and stability to the Middle East, and to refrain from an action which can only make the situation more volatile and less susceptible to lasting solution.

## POSSIBLE CUTS FOR THE DEPARTMENT OF EDUCATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. DANNEMEYER) is recognized for 30 minutes.

Mr. DANNEMEYER. Mr. Speaker, when speaking of programs costing billions of dollars, or a Federal budget containing hundreds of billions of dollars, or national debts topping $1 trillion, I believe it is far easier to talk about these figures than it is to understand them, because I do not think we can visualize what a trillion dollars is.

It simply cannot be translated into a common experience such as an 18-cent stamp, a 79-cent Arby's special, $400-a-month rent, an $8,000 car, or even a $100,000 mortgage.

Well, the gross national debt grew in fiscal year 1981, which ends on September 30 of this month, at an average rate of $251.5 million per day. That astronomical figure is boggling enough, but think of it in these terms: That quarter of a billion dollars would provide social security benefits for 58,000 people; the $91-plus billion added to the debt this year would provide coverage for 21 million recipients. The added funds alone would be more than enough to keep the social security system solvent.

Instead, we throw the money down the old deficit drain.

It should be clear to everybody in the Chamber what really needs to be done. Rather than throwing good money after the bad, we ought to trim spending in order to avoid those $90 billion additions to the debt.

The money saved will be reflected in lower inflation and interest rates, thereby alleviating the plight of those individuals to whom social security represents the difference between retirement and poverty.

The Members will recall that over the course of the last several sessions this Member has presented to the House for its consideration a work product of the Republican Research Committee's Economic Task Force Budget Study Subcommittee, of which this Member is chairman. This proposal lists 272 items which could be cut for fiscal year 1982, whereby we could reduce spending by some $52 billion.

On previous days, this Member has read 21 items relating to the legislative branch, 8 in the judicial branch, 4 in the Executive Office, 15 in funds for the President, 27 in Agriculture, 8 in Commerce, 15 in defense-military, 4 in defense-civil, and 13 in Energy. Today I propose to read those for the Department of Education, consisting of 9 items, and Health and Human Services, consisting of 16 items.

Those nine items of the Department of Education, if adopted, would reduce spending in fiscal year 1982 by $1,006,609,200, and the 16 items in Health and Human Services, if adopted, would save the taxpayers $9,409,050,800.

I want to make it clear that these are not necessarily recommendations but they are options for the Members of the House to pursue as a means of bringing the projected deficit for the next fiscal year, which varies anywhere from $42 billion to $80 billion, depending on whom you choose to believe, almost within balance.

I think that is a laudable objective and it is one that we should pursue if we are to give life to the vision that all of us have; namely, to drive down the cost of money in this country.

We should bear in mind that the prime rate today is at a historic high, and if we are to bring that down, it is time to consider some of those options.

Almost everyone today will say we must reduce Federal borrowing, we must reduce Federal spending. The difficult thing is how and where.

One way would be to take a percentage, say 5 or 10 percent, off everything we spend. Those who are opposed to any reductions would then respond to that suggestion that it is a meat-ax approach and irresponsible. And, indeed, it is probably true, because I do not think that we could realistically talk about reducing all items equally.

With those beginning remarks, I would like to resume the brief analysis of these various items to give the Members a flavor of what they consist of.

In the field of education, the Office of Postsecondary Education, higher and continuing education; we would eliminate the special program for disadvantaged and funding for developing institutions.

The General Accounting Office has acknowledged that the program for disadvantaged students has been a failure and that the feature of the program for developing institutions does not, as intended, help schools but rather goes to certain students regardless of learning enhancements. The General Accounting Office has also observed that the program is full of fraud and abuse, and should be abolished, thereby saving $319,278,000.

In the "Office of Postsecondary Education, college housing loans": We would recover, pursuant to the recommendations of the General Accounting Office, some 10 percent of the outstanding loans. If we did this, we would save, or retrieve, some $300 million.

In the "Office of Educational Research and Improvement, education research and statistics": We would eliminate what remains of the old National Institute of Education function of this program. Jack Anderson has pointed out on more than one occasion the horrible waste and fraud in this program.

If we permitted this program to expire in fiscal year 1982, we would save the taxpayers some $82,900,000.

In the "Office of Civil Rights, salary and expenses": We would allow a growth of 20 percent above what we spent in 1980. The proposed outlay in 1982 represents an increase of 245 percent over what was spent in 1980, which we consider to be excessive.

If this were eliminated, we would save $31,236,600.

□ 1520

"Departmental management, salaries and expenses": Here again we would allow a 20-percent growth above 1980. The proposed outlays represent a 42.1-percent increase since 1980, which we believe to be excessive. If implemented, this would save $37,621,400.

"Departmental management, special statistical compilation and surveys": We would allow a 20-percent growth above 1980. The proposed outlays represent a 47.3-percent increase since 1980, which we believe is excessive. If implemented, this would save $47,389,200.

"Office of Bilingual Education and Minority Language Affairs": We would eliminate this office on the grounds that in our judgment, it is unnecessary. It would save $7,384,000.

We would implement recommendations correcting accounting procedures, as proposed by the General Accounting Office, departmentwide, in the Department of Education, which, if followed, would save the taxpayers $47 million.

In the "Office of Postsecondary Education, student loan insurance": We would seek to recover 20 percent from defaulted loans through more efficient and persistent efforts of collection. Total defaults and their resultant costs are projected to be in the total of $669 million for 1982. If we collected just 20 percent of that, we could bring into the Treasury $133,800,000.

In the "Health and Human Services Agency," which is, by the way, the second largest item in the budget of the Federal Government, total cuts come to 16 items, for a total reduction of $9,409,050,800.

"Public Health Service, National Institutes of Health, general medical sci-

ences health research": We would allow a 10-percent growth above what was spent in 1981. If this were implemented, we would save $21,587,000.

"Public Health Service, National Institutes of Health, environmental health science, health research": Here again we would allow a 10-percent growth above 1981. If implemented, this would save $6,211,800.

"Public Health Service, National Institutes of Health, aging, health research": We would allow a 20-percent growth above 1980. This proposed agency has a budget increase in the next fiscal year of some 37.5 percent above what was spent in 1980. We believe that is excessive and unreasonable. If implemented this would save $9,625,200.

"Public Health Service, National Institutes of Health, research resources": We would allow a 10-percent growth above what was spent in 1981. This would save $7,072,200.

"Public Health Service, Food and Drug Administration": We would cut 10 percent from 1981. Research and regulations continue to be arbitrary and capricious in too many cases. If implemented, this would save $40,121,400.

"Public Health Service, Assistant Secretary of Health, management and assistance to States": We would rescind 20 percent from the proposed funding. We would eliminate family planning, cut 10 percent from maternal and child health, community health centers and migrant health centers, which constitute 20 percent of the programs. Many of these that I have just described are nothing more than social engineering schemes and if these suggestions were implemented, we could save $126,134,200.

"Public Health Service, Assistant Secretary of Health, health maintenance organization loan guarantees": We would allow 20 percent above 1980. The proposed 161.6-percent increase is excessive. If implemented, this would save $9,095,000.

"Health Care Financing Administration, payments to health care trust funds": We would allow 15 percent above 1981. Since this program covers costs which are not financed by employer-employee contributions, the 86.1-percent increase since 1980 is excessive. We would use the current CPI rate of 11.3 percent as a guideline. If implemented, this would reduce spending for this particular program by $3,464,384,000.

"Social Security Administration, SSI program": We would cancel outstanding uncashed checks totaling some $40 million. We would reduce payments to newly arrived persons in the country who are taking advantage of this program to the tune of $32 million, for a total savings, if implemented, here of $72 million.

"Social Security Administration, Federal old-age and survivors insurance trust fund": We would enforce prompt payment by State and local governments. The General Accounting Office has estimated that the loss of interest due to slow deposits of tax payments amounts to $1,100,000,000.

"Social Security Administration, Federal old-age and survivors insurance trust fund": We would calculate benefits rounded to the nearest penny instead of dime, pursuant to the recommendation of the General Accounting Office. This would save $8 million in the next fiscal year.

"Social Security Administration trust funds": We would institute periodic personal consumption expenditure index instead of automatic CPI indexing, recommended by the General Accounting Office and the Congressional Budget Office. One of the main reasons that this change in accounting methods is proposed is the consideration that, as part of the existing system, housing is included, and properly it should be, but people do not buy a house each month. Therefore, we think a change in the index is called for. If adopted, this would save in the next fiscal year $3,800,000,000.

"Human Development Services, grants to States for social services": We would eliminate family planning. Proabortion aid ought not to be taxpayer-financed. This would result in a reduction of $87 million.

"Human Development Services, work incentives": We would eliminate this program. It provides grants to States for bureaucratic "job planning" for AFDC recipients, duplicative child care, and CETA-type public service employment. Members will recall that under the existing CETA program, which is still funded in the budget, programs were adopted nationwide for the purpose of developing jobs for those who needed them. We do not believe it is necessary for the Federal Government to, in effect, set up bureaucracies and State governments to be doing the same thing. If implemented, this would save in the next fiscal year $364,803,000.

"Department management, Office of Consumer Affairs": We would eliminate this as redundant, the Director of which also serves as Presidential Consumer Affairs Adviser. It would save $2,013,000.

Finally, departmentwide recommendations made by the General Accounting Office, if adopted, would result in savings for this department of $291,004,000.

This completes the two categories that I have brought to the attention of the Members today relating to the Department of Education and the Department of Health and Human Services. There will be approximately 10 or 12 more days on which this Member will be privileged to read an analysis of the balance of the remaining 272 items.

Again, let me say, this is being done for the purpose of illustrating to the Members of this Chamber that there is a way to reduce spending in fiscal year 1982 in a proper way without a meat-ax approach, and in so doing, drive down the cost of credit.

Does anybody in this Chamber really wonder what would happen if the Federal Government would reduce its demand for borrowing in the next fiscal year by $40 billion or $50 billion? It is predictable that if we had the courage to do that, it would drive down the cost of the prime rate to at least 12 percent within 60 days and that would have, in this Member's opinion, a dramatic impact on the revival of the housing industry and also the automobile industry all across this land.

In short, the adoption of this program of reducing the Federal demand for credit would lay the foundation for the true economic revival of this country. That is a worthy objective and it is what we are here to do. I would commend it to the Members for their consideration.

---

□ 1530

## THE FEDERAL RESERVE BOARD AND MONETARY POLICY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Massachusetts (Mr. FRANK) is recognized for 60 minutes.

Mr. FRANK. I thank the Speaker. I do not expect to consume 60 minutes. If I got on "Sixty Minutes," that would be a different story, but I do not expect to consume it.

I want to call the attention of the House to what seems to me to be a somewhat disturbing development, and for reasons of historical accuracy alone, we ought to confront it. I think, in fact, it goes beyond that. It goes to the question of what the economic policies, and particularly the mix of monetary and fiscal policies of the country ought to be.

There have been in recent months, and particularly beginning the latter part of August and for this past month, a spate of suggestions and reports that the problem that the country is going through with excessive interest rates right now, which everyone agrees are excessive, is really nothing that can be at all associated with the Reagan administration, and indeed, there have been suggestions—the President himself said it when he was in California on his vacation—that it is the fault of the Federal Reserve Board. The President and some of those associated with him, both in his administration and those who supported him on the congressional side, have really gone to great lengths to point

out that the Federal Reserve Board is an independent agency. And there has been a strong effort really to disassociate the Reagan administration and its overall policies from the policies of the Federal Reserve Board.

I understand the need for that politically and economically. The Reagan administration made a series of projections earlier this year about interest rates which have simply proven untrue. In particular, we were told that if certain parts of the President's program were adopted, interest rates would begin to drop, not obviously overnight, to previously tolerable levels, but that the drop would begin and would be very speedy.

Nothing has been more inaccurate in this whole year than those projections regarding interest rates. We now have finally an admission by the administration that interest rates are far too high. But there has been a very desperate effort to try and disassociate from that, and one of the forms that effort has taken, is the launching of a rather new group of born-again populists who have suddenly discovered that Wall Street and the financial community do not have America's best interests at heart, at least as they see it, and we have gotten from various people in the Republican leadership descriptions of Wall Street which we are not used to hearing from that side of the aisle.

But we have also gotten from within the administration disclaimers of an association, really, with the Federal Reserve Board.

I think we ought to be very clear as to what has been happening so far this year. If the administration wishes to change its views vis-a-vis the proper monetary policy, they ought to say so, but it simply is wholly inaccurate and wholly unfair and really not a legitimate debate tactic for the administration now to pretend that the Federal Reserve Board's tight money policies were something they had no association with.

On July 23 of this year, the Committee on Banking, Finance and Urban Affairs of the House, pursuant to the Humphrey-Hawkins bill, held hearings on monetary policy, and one of those who testified was Beryl Sprinkel, the Under Secretary of the Treasury for Monetary Policy, who was there not as an individual, not even as simply an official of the Treasury, but as the official spokesperson for the Reagan administration on monetary policy. And the message Dr. Sprinkel gave the Congress on July 23 was, "the Federal Reserve Board is doing a terrific job; let us support them." He said it is true there were some tough technical problems to be worked out, but the thrust of his comments—and he said it again and again—was that "we support the Federal Reserve Board; they are following the proper interest rate policy; they are doing the right thing."

For an administration which stated that official position in late July, pursuant to its statutory duty to tell us what they thought of monetary policy, now to act as if the Fed was somehow a loose cannon on the deck of the ship of state, is simply unworthy of the kind of respect for historical accuracy we ought to have here.

There was no suggestion on the part of the people in the Reagan administration until very recently that the Federal Reserve Board might be acting with too tight a noose with regard to monetary policy. And because this has now come into question, it seems to me reasonable to read into the record here some of the things that Under Secretary Sprinkel had to say; again, not just as an individual or as a longtime monetarist, but as the spokesperson for the Reagan administration on interest rates.

I am reading here from the transcript of the committee hearings, July 23. For instance, on page 16, Mr. Sprinkel told the committee:

> The attack on inflation can be successful only if we stay on the course of persistent slowing in the rate of growth of the money supply with the ultimate goal of a permanent, steady, noninflationary rate of monetary expansion.

Now, it is true one can say that is one's goal, but that the Federal Reserve Board had bungled the job. We are getting some suggestions now along that line.

But here is, in fact, what Dr. Sprinkel had to say about the Federal Reserve Board, on page 18. This, by the way, is a prepared statement. This is not some, perhaps, rattled response which he was forced to give by the tough questioning of people like my colleague, the chairman of the Housing Subcommittee, or others. This was the considered, prepared testimony of Dr. Sprinkel, on page 18.

> Thus we—

"We," being the Reagan administration, I assume; there was no indication he was speaking only for himself and Ms. Sprinkel, if there is one—

> Thus, we are quite pleased with the stated policy and the apparent determination of the Federal Reserve to reduce the long-term rate of money growth.

Now, that is a fairly explicit statement on July 23 of the Reagan administration's complete support for the policy of the Federal Reserve. Note, by the way, that the budget cuts that the President now finds somewhat insufficient had already been enacted. This was not said in anticipation of budget cuts which did not come. This is July 23. Gramm-Latta I and Gramm-Latta II had both become law. The laws were not yet signed in the second case, but they were enacted. There was no further question about what, in fact, the budget cuts were going to be. So this is not a case of its being undone by an insufficiency of budget cuts.

I should add or interject here, from the standpoint of historical accuracy, the President is also showing a kind of a retroactive magnanimity toward Congress which I think we ought to reject.

People will remember—and I think it was fairly clearly documented—when Gramm-Latta II, for instance, was passed, I do not remember the President or Mr. Stockman or others saying, "Is it not too bad that Congress gave the President so little of what he wanted?" In fact, the mood out of the White House and the mood in the country about the President was one of triumphalism. The President had won an enormous victory; he had gotten his program through. Members will remember that what the House passed, in fact, was a document unknown to the minds of many here; that was David Stockman's magical mystery tour that the House accepted. So there was no suggestion that we did not do enough. It is only now that it is not working as they projected that they tell us it was not enough.

Mr. GONZALEZ. Mr. Speaker, will the gentleman yield?

Mr. FRANK. I would be glad to yield to the gentleman from Texas.

Mr. GONZALEZ. I thank my distinguished colleague on the committee, the gentleman from Massachusetts.

May I say at this point for the record that the gentleman from Massachusetts (Mr. FRANK) is one of the most impressive Members I have met, both as a full Member of the House and specifically as a Member assigned to the Banking Committee. And although the gentleman is considered a freshman because, as I understand it, it is his first year here, I certainly would never describe him that way. The gentleman comes from a tremendous background of experience. He has worked in this environment before. But he is also a man who does his homework terrifically, and I wanted the record to show that, and also to show that he, as a member of the Subcommittee on Housing, which I have the privilege of chairing at this time, has been outstanding in his service as a member of this particular subcommittee.

I would like to say that the gentleman performs not only from the standpoint of being a Member of the House and a member of the party, but in this respect, that in the area in which he is discussing, turns out to be the minority party; not only because of the Gramm-Latta, senior, but the son of Gramm-Latta, and what now we are being asked to have, the test-tube baby of Gramm-Latta.

Also, we ought to stress that it was right before the July 23 appearance of Secretary Sprinkel, right before the

adoption of hands across the aisle tax supportive of the budgetary cuts.

So that I think the gentleman performs a very valuable job of accountability.

I would like to stress the fact that in furtherance of the proposition he is advancing, that notwithstanding any attempt now for the administration, the President on down, supporters in and out of the Congress, to try to wash their hands of any association with the Federal Reserve, there is no question that the Federal Reserve Board never has worked as intimately and with as full support as this one has from this administration.

Now, there is not a forecaster I know of any consequence, whether he is an economist, a Wall Streeter, a bond dealer, ex-Secretary of the Treasury, ex-Deputy Secretary of the Treasury in charge of monetary affairs, that will tell you, not a one—and I would say almost 100 percent Republican—will tell you, and are saying, that President Reagan can meet his budgetary goals for one reason—high interest rates, which is what the Federal Reserve policy is predicated on. And it is very much, I would like to point out to my distinguished colleague, the case we read about of the snake devouring his own tail.

□ 1540

The only trouble is that now the prescription we are being asked to take, which is more of the same, literally means that after that snake has already eaten up his tail, where does he go?

Mr. FRANK. I thank the gentleman. I would like to emphasize particularly the point the gentleman made that July 23, the date we are talking about when this very enthusiastic endorsement of the Federal Reserve Board interest rate policies was promulgated on behalf of the Reagan administration, it was at a time when the budget cuts, Gramm-Latta II were already adopted, and the tax bill was already clear in its outlines. There were a few last-minute bargains to be settled in the basement for a couple more votes bought with a couple extra million dollars, but the fundamental outlines of the tax bill were set, and we are now being told, the President has said, "I didn't get enough cuts and I got too much tax reduction. That is why things are not working, why interest rates are being a problem."

I am sure the gentleman from Texas joins me in welcoming their conversion to the substance warnings we offered earlier this year. But we also agree, that the record ought to be straight, that it is a conversion, not something that they were saying all along. The reason for that is when people have been wrong once on policy, there is a need to look at why they were wrong, and perhaps to reexamine the premises or the policy.

Let me stress, on July 23, when the budget cuts were adopted and the tax bill was virtually set as to its outlines, there was no suggestion from the Reagan administration that we were going to have a problem because of high interest rates, or that the deficits would be too large. In fact, Mr. Sprinkel, on behalf of the Reagan administration, says explicitly in the transcript exactly the opposite. On page 28 he said:

In the Meantime, deficits of the magnitude which are contemplated in the budget plan would not inhibit the ability of the Federal Reserve to control money growth. With a steady deceleration of money growth, any effect of the impending deficits on interest rates would be more than offset by the reduction of inflationary expectations. The major portion of today's high interest rates is the inflation premium, which would decline steadily as the trend of money growth is reduced.

There he is saying it, very clearly:

Any effect of the impending deficits on interest rates would be more than offset by the reduction of inflationary expectations.

Understand that that is why many of us are now saying there are flaws in the program which we are now suffering from, because it is explicitly stated here by Dr. Sprinkel—after they knew the budget cuts, after they knew what would be in the tax bill—they denied that the deficit then contemplated on July 23 would cause some problems. They were not concerned that high interest rates would jeopardize their budget projections.

Let me just return to several more quotations to make it clear that the administration, as the gentleman from Texas has said, was working very closely with the Federal Reserve Board and to refute any suggestion that the Federal Reserve Board's independence in some way has led to a frustration of the administration's goal; any suggestion that this was a runaway Federal Reserve Board—this has been a lie-down Federal Reserve Board. They have worked with the administration. Any suggestion to the contrary is clearly dispelled by just three more quotations by Dr. Sprinkel. There are many more throughout the transcript.

On page 31 he says:

I am convinced that most Americans—

Public opinion polling is not his strong point. He is a pretty good economist, but he is not a great public opinion pollster—

together with the members of this committee, join with the administration in firm support of the Federal Reserve's noninflationary monetary policy.

This is July 23, after we know the tax cut; we know the budget cuts and Dr. Sprinkel says—

join with the administration in firm support of the Federal Reserve's noninflationary monetary policy.

Because he says, for those who think the Federal Reserve is the cause of our problem, on page 46:

Let me say first that the tight-money policy does not cause high interest rates.

So, he is absolving the Federal Reserve completely.

Then, on pages 62 and 63—this is in answer to a question—he says:

Now, the burden on the Fed—I understand they have a very difficult problem and I do not want to make their difficulties worse. We want to work with them and we are doing so, and we are quite supportive of their general strategy and the way they are going about getting money under control.

In other words, it is not simply the goal of wringing inflation out by tight money they are talking about, it is the specific, "way they are going about getting money under control," which the Reagan administration approved.

One last quote on pages 75 and 76, again just to make the point no longer debatable that the Federal Reserve was really operating as part and parcel of the overall Reagan plan, and can hardly be accused today of having undercut it:

Now there is one thing that's forgotten, it seems to me. Namely, if we slow the rate of growth in the money supply as we are planning, as the Federal Reserve is planning to do, and we're supporting, this will slow down the rate of rise in nominal spending—

I will read it one more time:

if we slow the rate of growth in the money supply as we are planning, as the Federal Reserve is planning to do, and we're supporting, this will slow down the rate of rise in nominal spending—

Note that this was in answer to a question, and to prove the point of the gentleman from Texas, Sprinkel has made a little slip here. The first time he says "we," he means the Federal Reserve Board. Here is the Undersecretary of the Treasury, and he says, "as we are planning," and then parenthetically, "as the Federal Reserve is planning to do." In other words, the identification between Treasury and the Fed has become complete in his mind.

So, Mr. Speaker, that is where we are in regard to interest rates and monetary policy. At a point when the Reagan administration knew exactly what it was going to get in the budget cuts and almost exactly what it was going to get in the tax cuts, it was wholly supportive of the Federal Reserve Board, and said that there was no problem with respect to interest rates. The Reagan administration said on July 23, "We have no problem. Don't worry about interest rates affecting deficits."

Things have not worked out as they projected. Many of us are not surprised. That is why we voted against the program that seemed to be based on wishful thinking.

The only point I want to stress is that it is misleading both as a matter

of historical accuracy and future policy of the administration to try inaccurately to scapegoat the Federal Reserve Board. The errors, the problems that we now confront cannot be laid by the Reagan administration at anyone else's door. They got what they asked for; they got what they asked for from the Congress in the budget area; they got what they asked for in the tax cut area; and they got what they asked for from the Federal Reserve in the area of monetary policy.

If the economy is not responding appropriately, if Wall Street and Main Street and individual investors are not responding appropriately, that ought to lead us to go back and reexamine the premises and the psychology on which all of this was based. It ought not to lead to this kind of scapegoating, totally inaccurately, of the Federal Reserve Board.

## GENERAL LEAVE

Mr. FRANK. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks on the subject of my special order today.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

## EXTENSION OF AUTHORITY OF THE OVERSEAS PRIVATE INVESTMENT CORPORATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Connecticut (Mr. McKINNEY) is recognized for 5 minutes.

● Mr. McKINNEY. Mr. Speaker, today we are considering H.R. 3136, a bill to extend the operating authority of the Overseas Private Investment Corporation to September 30, 1985, to remove certain restrictions which tend to hamper its effectiveness, and to broaden the scope of its services.

It is a rare occasion that we have the opportunity to vote on legislation for a program that plays a key role in strengthening our relationships with the some 100 nations of the developing world, provides needed support for the U.S. business community in the highly competitive international marketplace, generates growth and new jobs in the domestic economy, and does these things without using the taxpayers' money.

The Reagan administration is committed to the encouragement of private sector enterprise as the most effective means for fostering continuing economic growth and self-sufficiency in the nations of the developing world. At the same time, the administration is well aware that increased U.S. private investment abroad will be a critical factor in sustaining our own economic growth.

Traditionally, the major source of capital for support of badly needed economic and social programs in the developing countries has been government-to-government assistance or concessional aid. But the need to combat inflation and to reinvigorate industrialized economies has led to severe cutbacks, not only in the United States but in other countries as well, and this decline comes at a time when the needs of the Third World are accelerating. The hard fact of the matter is that their needs today are far in excess of capacity of public assistance programs and thus there is a widening development gap which must be filled. The most immediate and practical solution is the encouragement of more private sector investment, and virtually all of the friendly developing countries are actively seeking U.S. investment.

Foreign investment is not a one-way street. Obviously, host countries can derive many benefits from the infusion of foreign capital, which creates new jobs, brings with it management expertise and training, generates tax revenues, and helps people to help themselves. But it is also true that the type of investment supported by the OPIC political risk insurance and finance programs contributes to our own growth by providing access to new markets for goods and services, creating job opportunities, and making positive contribution to our balance of payments. In short, everyone can come up a winner.

In spite of all this, there are those who contend that all U.S. companies investing abroad are suspect and that they are exporting jobs, reducing our export capacity, and neglecting the need for domestic growth. Certainly there have been cases in which U.S. companies have sought out cheap labor, but I would point out that OPIC maintains a rigid screening process and provides support only for the kind of enterprise that will help the host country and return positive benefit to our own economy.

In fact, the job export theory has been largely refuted in a series of nine studies made by Business International, Inc., an independent research, publishing, and advisory organization based in New York City, which recently published "The Effects of U.S. Corporate Foreign Investment, 1970-79." This study involved 104 U.S. companies with combined worldwide sales of $459 billion, of which $202 billion were made to overseas customers. In 1979, they accounted for $28 billion in U.S. exports and their gross worldwide investment at the end of 1979 was $240 billion, of which 70 percent was in the United States.

Perhaps the most significant fact of all revealed by a study of U.S. manufacturing employment during the period 1970-79 showed that the companies in the study increased their domestic payrolls by 27.8 percent while U.S. manufacturers as a whole increased by 4.4 percent. The gross trade surplus for the manufacturing companies included in the sample rose from $5.5 billion in 1970 to $18.4 billion in 1979.

Highlighting the positive impact of private investment abroad and OPIC's role in U.S. foreign economic policy, the Wall Street Journal in an article on April 11 of this year said:

> Income in the form of dividends, interest, management fees, royalties and other payments from earlier U.S. foreign investment allows the United States today to show a small current account surplus despite a large balance of trade payment deficit. During the past decade, the annual earnings from U.S. direct foreign investments have risen five fold, from $8.2 billion in 1970 to an estimated $41 billion in 1981. OPIC has a unique and important role in the foreign assistance effort through its encouragement of the kind of investment that serves two objectives—development abroad and the growth of U.S. business at home.

Relating this more specifically to OPIC and its performance since its renewal in 1978, I would point out that it has insured or financed 337 projects in 58 developing nations with an estimated total investment of more than $4.6 billion. OPIC's participation includes an aggregate of $2.9 billion of insurance issued and commitments for $227 million in investment guaranties and $15.5 million in direct loans to enterprises involving small business. It is interesting to note that this record was achieved despite congressional imposition of a number of restrictions that would be modified or removed by the current legislative proposal H.R. 3136.

To round out the picture of these 337 projects, projections for their first 5 years of operation are that they will create 57,000 new host country jobs, generate annual tax revenues of more than $532 million, and account for net foreign exchange benefits of $1.5 billion. From the U.S. standpoint, they are expected to generate more than $3.4 billion in direct exports over the 5-year period and to create some 56,000 added man-years of U.S. employment.

The Corporation closed fiscal 1980 in the strongest position in its history with total assets of $699 million. Gross revenues amounted to $76.1 million and net income after operating expenses was $65.8 million. Projections for fiscal 1981 indicate continued growth and an even stronger position. And again, I would remind you that this small organization—only 125 people in all—continues to operate without the use of appropriated funds.

All of us recognize the growing challenges of an increasingly interdepend-

ent world and the need for innovative approaches that will provide mutual benefit both for the developing world and the industrialized nations. We need new markets, access to new energy sources and scarce materials if we are to sustain our own growth. The developing nations need capital, expertise, training, and all the other elements which will help them to help themselves in a changing and competitive world.

OPIC is an outstanding example of what can be accomplished through a working partnership between the private sector and the Government. I urge my colleagues to support H.R. 3136, which will continue a highly successful and critically important program at a time when it is needed most.●

## CONGRESSMAN G. V. MONTGOMERY, DISTINGUISHED AMERICAN AND GUARDIAN OF OUR NATIONAL INTEREST

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from South Carolina (Mr. NAPIER) is recognized for 5 minutes and to revise and extend his remarks and to include extraneous material.

Mr. NAPIER. Mr. Speaker, when hundreds of people gathered recently to join in the dedication of the G. V. Montgomery National Guard Complex in his hometown of Meridian, Miss., among them was Vice President GEORGE BUSH who joked about a massive sign with 5-foot letters spelling out the name of the facility.

The Vice President, tongue in cheek, said he was critical of the sign. He said it should have been larger. That way, it could be read 140 miles away in Biloxi.

It is fitting that the sign on the G. V. Montgomery National Guard Complex is larger than most, because Congressman SONNY MONTGOMERY'S life has been just like that—larger than most.

He has served with distinction in everything he has ever undertaken. His military record reads like a page from a Hollywood movie script about larger-than-life heroes. His service was noted with not only the stars of a general officer, but such revered awards as the Legion of Merit, the Bronze Star for Valor, the Meritorious Service Award Commendation Medal. He not only served his Nation in one war, World War II, but returned to answer the call of duty during the Korean conflict.

His civic record is just as glittering with accomplishments including the Mississippi Magnolia Cross Award, the Red Cross Certificate of Merit, the National Guard Association's Distinguished Service Medal, named "Mississippian of the Year" by the Mississippi Broadcaster's Association, and countless others too numerous to mention.

Since the voters of the Third District of Mississippi sent him here 15 years ago, Congressman SONNY MONTGOMERY has approached his appointed tasks as an elected official in typical Montgomery fashion, full speed ahead. His record in Congress speaks for itself. It is a star-studded record carved in legislative history by a man whose principles fit the mold of Thomas Jefferson, who said: "In matters of principle, stand like a rock."

SONNY MONTGOMERY has stood like a rock in Congress, in war, in peace, in his community, in everything he has ever done and said. It is fitting that a National Guard armory be dedicated in his name, for he has been a guard of our national interests throughout his long and energetic life.

I want to take this opportunity to share the news reports of this dedication ceremony with my colleagues:

[From the Commercial Dispatch]

REPRESENTATIVE MONTGOMERY'S SIGN COULD HAVE BEEN A LITTLE LARGER

(By Rebecca Simmons)

MERIDIAN.—The pilot of Air Force Two didn't need air traffic controllers Monday to find his way to Key Field. All he had to to do was look for the mammoth sign on the side of a building near the airport spelling out in five-foot white letters "G. V. Montgomery National Guard Complex."

"I'm critical of the sign," said Vice President George Bush who was in Meridian for the dedication of the National Guard facility. "It should have been bigger. Then they could read it from Biloxi!"

As it stands, though, the farthest away the sign can be read is by passing motorists on nearby Interstate 59.

Over 2,000 people gathered in the G. V. Montgomery National Guard Complex to dedicate 17 acres of land and several buildings to the Meridian congressman. While an impressive list of dignitaries sat on the platform, including the Vice President, two U.S. Senators, an ambassador and a number of congressmen and much of the talk was about the military, the dedication managed to avoid typical ceremonial gab.

If people sitting in the hangar where the ceremony was held expected no more than a glimpse at Bush and a few dry remarks, they were pleasantly surprised.

"This has been an exciting two days for the Bushes," said the Vice President. "Yesterday we were sitting in the dugout (at the All Star baseball game) rubbing shoulders with great baseball players," he said. "And today we're in Meridian."

Lt. Gov. Brad Dye was the first to draw laughter when he referred to the building bearing Montgomery's name as a "fine political sign."

Dye added that "it couldn't have happened to a nicer, more dedicated Mississippian." On behalf of Gov. William Winter, he honored Montgomery by deeming him major general of the National Guard.

"I guess this just proved," said Bush, "old soldiers never die, they just keep getting promoted."

As Mississippi's senior Sen. John Stennis rose to the podium, Vice President Bush leaned forward and listened intently. Stennis recalled Bush's confirmation as head of the CIA and his outstanding contributions as vice president. "I've been proud of him," Stennis said.

Stennis then called Montgomery "one of our most valuable, most effective men in Washington.

"You're my congressman," he told Montgomery, "so I'm going to call you Sonny * * * you contributed to a fine group that set a good pace for the National Guard of America."

Stennis called for more support for the national guard in his remarks.

"I believe that day will come when the guard will be given additional responsibilities, additional duties," he said.

Then Meridian Mayor I. A. Rosenbaum came to Montgomery's rescue in defense of the sign. "No federal money went into the sign," he said. "It was paid for by the people of Meridian—paid in grateful appreciation to Sonny Montgomery.

"Sonny and I were in grade school together," the mayor recalled. "We both had dreams and ambitions. I wanted to be a fireman. He wanted to be the night clerk in a hotel that catered to ladies of the evening.

"Ladies and gentlemen," he said after a pause, "you are looking at two failures.

"But," he said, "the congressman wanted a big sign and we have accomplished a truly big sign."

During his remarks, Bush recognized Montgomery's accomplishments, noting that "the veteran has no greater champion in Washington than Sonny Montgomery."

Montgomery responded to Bush's remarks by saying "thank you for coming to my hometown and saying so many nice things about me in front of the people who know me best. Because you've said so many nice things, the next time we play paddle ball, I might let you win.

"It would be less than truth," continued Montgomery, "if I didn't say that I like the sign very much.

"But," he said, looking around at Bush, "the vice president said it should be larger, and I have to agree."

---

2,000 ATTEND EVENT

(By Rebecca Simmons)

MERIDIAN.—Vice President George Bush called for a strong military defense Monday as he spoke to an estimated 2,000 people at the dedication of the G. V. Montgomery National Guard Complex.

"No nation ever had to go to war because it was too strong," said Bush. "If we spend billions on defense, it is so that not one shot need ever be fired."

Bush referred to author Thomas Mann's definition of war, saying "war is only a cowardly escape from the problems of peace."

In a brief news conference following the dedication ceremony, Bush said Reagan's decision to proceed with full production of the neutron bomb "is a move that only enhances peace."

"It's not at all surprising that the Soviets, with an overwhelming tank advantage, would speak out so strongly against this decision," he said, pointing out that the decision concerned the "storage of the weapons, not a deployment on foreign soil.

"We have seen Russian tanks push ruthlessly in Afghanistan. We have seen uncertainty in Poland. We have seen simmering, ancient hostilities in the Middle East, genocide in Cambodia and we are seeing turmoil in Central America—turmoil not so far from our own border. We must recognize how precious our own peace is, and we must

work to keep this peace that is our only hope," he said.

Bush, while in Mississippi, attended a Republican fund-raiser in Biloxi where he pledged to "keep the screws tightened down" on government spending.

During a press conference in Biloxi, Bush committed himself to campaigning for Republican candidates in next year's Congressional elections—even if it meant campaigning against his good friends Sonny Montgomery and John Stennis.

Bush said he would campaign against Montgomery and Stennis, if necessary, to "get control of the U.S. House of Representatives for Republicans and keep control of the U.S. Senate for Republicans."

When asked if he would support Congressman Trent Lott should he decide to oppose Sen. Stennis in next year's Senate race, Bush said "I'll do in terms of campaigning what Trent Lott wants me to do."

Bush also backed President Reagan's handling of the air controllers' strike, saying, "He feels people should abide by the law."

Asked if he saw any signs that the vacationing president was softening his position, Bush said, "I see no change . . . I confidently expect he will not.

"Our policy cannot be dictated by unions supported by strikers," Bush said. Nor will it be affected by actions in other countries, he said, in an apparent reference to sympathy protests by Canadian controllers.

About 700 heard Bush speak in Biloxi at a $50-per-plate fund-raising dinner for Rep. Trent Lott, R-Miss., and local Republican organizations. Earlier Monday about 100 attended as Bush helped dedicate a new National Guard Armory in Meridian named in honor of Rep. G.V. "Sonny" Montgomery, D-Miss.

He told a news conference in Meridian that the administration was committed to a "disproportionate increase in defense spending," including higher pay, as a way of bolstering sagging military morale.

While at the banquet in Biloxi, Bush said, the Reagan administration had "reversed this trend of ever-increasing spending" and added, we are "going to keep the screws tightened down" on government spending.

He said such restraint would help people in lower income groups more than "if we created 100 new programs."

But spending cuts are not enough, Bush said. Federal regulations must be eased.

"It is just as important as tax relief," he said. As an example, he cited the auto industry which, he said, stands to save $50 billion over the next five years because of relaxed regulations.

---

BUSH HELPS DEDICATE GUARD COMPLEX

(By Andy Kanengiser)

MERIDIAN.—Motorists on Interstate 20 in Meridian can't miss the new $2.3 million G. V. Montgomery Army National Guard complex—or the tremendous sign that towers above.

"The congressman wanted a big sign on the complex, and together we accomplished it," Meridian Mayor I. A. Rosenbaum said yesterday during ceremonies at the Key Field site attended by a host of dignitaries, including Vice President George Bush and Mississippi Sens. John C. Stennis and Thad Cochran.

And Bush told the crowd of about 1,000 people, the sign on the complex named for the state's 3rd District congressman "could have been bigger." The sign has 6-foot letters.

Later, the 61-year-old Montgomery, chairman of the House Veterans Affairs Committee, agreed with the vice president. "The sign should be larger."

The modern complex replaces an outdated World War II structure located near the site. The new complex took about a year to build.

In addition to having the complex dedicated in his honor, the congressman was given a promotion. Lt. Gov. Brad Dye announced for Gov. William Winter the promotion of Montgomery from brigadier general to major general in his retired status with the Mississippi National Guard.

Montgomery, who serves on the house Armed Services Committee, and is chairman of the oversight and investigations subcommittee, retired from the national guard in 1980 with the rank of brigadier general after more than 30 years of military service.

During his remarks yesterday, Bush praised Montgomery's "already distinguished" careers in public service and the military.

Bush said America must be strong. "Our times are witness to terrible events," including the Russian invasion of Afghanistan, genocide in Cambodia, turmoil and "uncertainty" in Poland, hostilities in the Middle East and turmoil in Central America.

"No nation ever had to go to war because it was too strong," the former CIA director said.

"If we spend billions for defense, it is so that not one shot need be fired," he said.

The vice president, who appeared in Meridian with his wife, Barbara, later told a news conference here that President Reagan's decision to produce the neutron warhead and store it at home, will "enhance" world peace. "The president has made the right decision."

The Soviet Union, however, has strongly condemned Reagan's move. Tass, the Soviet news agency, said the Kremlin could not "remain an indifferent bystander" to neutron warhead deployment.

But Bush said he is "never surprised" at the statements of the Soviets.

Montgomery said he supports Reagan's decision as a means of deterring the Soviets, who have a tank advantage over the United States. "We can't build enough tanks to stop them."

Cochran said Reagan has made the correct decision. The junior senator from Mississippi said he believes Reagan's decision to manufacture the neutron bomb gives the U.S. an extra means of protection.

The ceremonies during another hot summer day in Lauderdale County came to a noisy conclusion when the Mississippi Air National Guard's 186th Tactical Reconnaisance Group, based at Key Field, conducted a "flyover" with its RF-4 Phantom jet aircraft.

---

[From the Clarke County Tribune]

BUSH LAUDS SONNY AT DEDICATION

Vice President George Bush, Monday, dedicated the new National Guard complex in Meridian honoring Congressman Sonny Montgomery and defended the President's decision to begin production of the controversial neutron bomb.

The Vice President joined Senators John Stennis and Thad Cochran, Lt. Gov. Brad Dye and local officials in praising Montgomery's service both as a U.S. Representative and as a National Guardsman.

Dye presented Montgomery with an additional star from Gov. William Winter raising him to the rank of Major General (retired) in the Army National Guard.

The Vice President said that Montgomery, a veteran of two wars, is an advocate of a "vigorous and ready National Guard." He added, "The veteran has not a greater champion in Washington than Sonny Montgomery."

At a press conference, Bush said Reagan's decision to produce the neutron bomb kept a promise made during the 1980 presidential campaign and would enhance world peace.

"It is a storage of the weapons, not a deployment on foreign soil," he said. "And I'm never surprised at the reaction of the Soviets, who hold a superiority in the number of tanks."

Bush hit hard on the military theme both during the press conference and in prepared remarks at the dedication ceremony. In honoring Montgomery at the formal opening of the $2.3 million complex, he said Montgomery understood the necessity of keeping America strong to deter Soviet aggression.

"No nation ever had to go to war because it was too strong," he said. "If we spend billions on defense, it is so that not one shot need be fired, ever, anyplace. Men like 'Sonny' Montgomery know that. He knows that's why one of the most vital aspects of our national defense is a vigorous and ready National Guard."

Bush quoted from author Thomas Mann's definition of war, calling it a "cowardly escape from the problems of peace," and said Americans must work hard to preserve times of peace.

"We have seen Russian tanks push ruthlessly into Afghanistan. We have seen uncertainty in Poland. We have seen simmering, ancient hostilities in the Middle East, genocide in Cambodia and we are seeing turmoil in Central America, turmoil not so far from our own border. We must recognize how precious our own peace is, and we must work to keep this peace that is our only hope," Bush said.

The National Guard complex honoring the Meridian-born Montgomery, an eight-term Democrat, includes an Army aviation support facility and a 200-man armory located at Key Field here. About 1,000 people turned out for the dedication, including Stennis, Cochran, Dye, Meridian Mayor I. A. Rosenbaum, congressmen from Arkansas, Texas and Alabama, and a number of other local and state officials.

Montgomery retired in 1980 from the Mississippi National Guard with the rank of brigadier general, but was honorarily promoted to major general at Monday's events. Much of the spotlight was on Montgomery, who paid tribute to Bush and Reagan for restoring confidence in American leadership. Montgomery also joked that a mammoth sign on the outside of the complex bearing his name wasn't big enough.

Bush agreed, and said, "If they made it bigger, they could read it in Biloxi," Bush flew late Monday to that coastal city to attend a fund-raiser for Fifth District Rep. Trent Lott (R-Miss.).

On whether the Reagan administration supports extending the 1965 Voting Rights Act, Bush said the President does support voting rights. "But he (Reagan) has not made a final decision on how that should be implemented."

Reagan has said he supports making the act, which provides for federal oversight of election procedures in several Southern states, eventually apply to all states.

Rosenbaum, in paying tribute to Montgomery, said as children the two had often discussed what their goals were in life.

"He (Montgomery) said he wanted to be a night clerk in a hotel that catered to ladies of the evening," Rosenbaum joked.

Stennis also praised Montgomery as well as Bush and said both worked to help the people. Stennis said Montgomery's military experience has made him a champion of veterans' rights in Washington.

Montgomery served in World War II and in Korea and has been awarded the Meritorious Service Metal and the Bronze Star for Valor. He became chairman of the House Veterans Affairs Committee earlier this year, and also serves as the chairman of the oversight and investigations subcommittee and as a member of the House Armed Services Committee, Montgomery is a former commander of the 150th Transportation Battalion, whose headquarters are in Meridian.

---

POLITICOS GATHER TO HONOR MONTGOMERY AT DEDICATION

(By Andi O'Neill)

Old friends got together in Meridian Monday to say "thank you" to one of their own by dedicating a National Guard armory in his honor.

Vice President George Bush headlined a star-studded list of political dignitaries who came from around the U.S. to help dedicate the new $2.3 million G. V. Montgomery National Guard Complex.

About 1,200 local citizens packed into the armory's hanger to watch the most high-level political gathering in Meridian in about eight years.

Bush was joined by both U.S. senators from Mississippi, three U.S. congressmen and an array of military officials in paying tribute to the 3rd District's eight-term representative.

Also taking part in the hour-long ceremony were Meridian Mayor I. A. Rosenbaum and Lauderdale County Board of Supervisors President Ikie Ethridge.

The dedication was billed as a non-political event, and all six speakers praised Montgomery's record and his contribution to the 3rd District as well as to the nation's military establishment, national guard and reserves.

Rosenbaum drew the biggest laugh of the day when he told the gathering how he and the congressman had failed to achieve their boyhood career goals.

"Sonny and I were raised together, grew up together," Rosenbaum said. "I wanted to be a fireman and the congressman wanted to be a night clerk in a hotel that catered to ladies of the evening."

After waiting for a wave of giggles to subside, the mayor said: "You see before you two total failures."

In introducing the vice president, Rosenbaum called him a man who "epitomizes the revival of an era the president is trying so hard to bring about."

Bush, who in 1967 was a freshman congressman, as was Montgomery, spoke affectionately of his former colleague.

"We're all here to honor a friend—to dedicate, officially, the G.V. Montgomery Mississippi Army National Guard Armory and the G.V. Montgomery Army Aviation Flight Facility," the vice president said. He added his congratulations to Montgomery's most recent promotion, announced by Lt. Gov. Brad Dye Monday, to major general in the National Guard.

Bush told the crowd that by remaining strong, America remained at peace.

"If we spend billions for defense, it is so that not one shot need be fired, ever—any place," Bush said. "Men like Sonny know that.

"He knows that's why one of the most vital aspects of our national defense is a vigorous and ready National Guard," the vice president said.

Montgomery in his speech reiterated his former colleague's sentiments by telling those present never to "underestimate the importance of the National Guard and Reserve."

"The Soviets only respect a country with a strong military," Montgomery said. "A strong military could deter the Soviets from starting" a worldwide conflict.

The 3rd District congressman said that bigger incentives and better facilities were needed "to keep the Guard strong."

At a press conference after the dedication, the vice president briefly fielded questions from reporters before heading to Biloxi for a Republican fund-raiser.

Asked about the neutron bomb, Bush said the president's decision over the weekend to proceed with the controversial weapon's development was a "commitment kept to the American people."

Bush also told reporters the best thing for the nation's military morale was support.

"Support and recognition (are needed) to keep the military strong," he said. "General support for the military will keep the country strong.

"The best antidote for morale problems is support," Bush said.

But the vice president added that not even the military is exempt from budget cuts under the Reagan administration.

"The military will bear its share of the cuts—it has to," he said. "Everybody has to."

Bush also told reporters that the White House is "reviewing" the 1965 Voting Rights Act, a law targeted for extinction by a broad spectrum of Southern officials.

The policy of the Reagan administration, Bush said, is to show "support for voting rights to eliminate any vestige of discrimination." But he said White House officials have not decided whether the 1965 law, setting strict election procedures and providing for close oversight by the federal government, is still needed to counter discrimination.

---

CROWD COUNTS VISIT A "GREAT DAY"

(By Tom Brennan and Sidney Cearnal)

Robin Holbrook was not impressed by the bunting, the band or the assembled political potentates gathered at the dedication of the G.V. Montgomery National Guard Armory Complex Monday.

For the 3-year-old daughter of Carol Holbrook and her husband Don, who is assigned to the Meridian Naval Air Station, the highlight of the day was meeting Vice President George Bush.

"He said he liked my pigtails and it was fun," Robin said after the nearly two-hour hoopla honoring the 3rd District congressman.

But for the adults in the crowd, it was a "GREAT DAY" when the second-highest ranking officeholder in the United States came to Meridian to help honor Meridian's favorite native son.

"It's a great day for Sonny (Montgomery)," Lauderdale County Chancery Clerk Hermon Gray Johnson said. "It's nice to honor the living while they are living."

Johnson was only one of a multitude of local and state officials gathered in the new multi-million-dollar maintenance facility. Although Gov. William Winter was unable to attend because of the National Governors Conference in Atlantic City, N.J. (where Bush was scheduled to speak today), he sent his regards and an extra star for Montgomery, a major general in the guard, through Lt. Gov. Brad Dye.

But for Dye, the honoree holds a special place too.

"I'm just honored to be here with Sonny Montgomery," Dye said shortly before the ceremonies began. Speaking of the five years they shared in the state legislature in the early 1960s Dye said, "I think it certainly speaks well for Mississippi that the vice president takes time from his busy schedule to appear in our state, and it's a tribute to the respect and esteem in which Sonny is held by the members of the (Reagan) administration."

"I'm just proud to be here," State Sen. Glen Deweese of Meridian said. "And proud we've got the vice president coming to Meridian, Mississippi.

"I'm proud that our congressman deserves to have the vice president come and dedicate this thing," Deweese said.

Also present was State Sen. Ellis Bodron of Vicksburg.

"There's almost no honor anybody can confer that Sonny Montgomery hasn't earned," that legislator said.

Another surprise guest was former Fayette mayor and civil rights leader Charles Evers, who said he had had a private meeting earlier in the day with Bush to discuss administration programs and their effect on state residents.

"I think it's great," Evers said of the day's events.

It was the almost overwhelming display of "patriotism" that caught the attention of Lauderdale County Board of Supervisors President Ikie Ethridge, who admitted he was nervous when he gave a welcoming address.

"It makes me feel so good to see this kind of patriotism again," Ethridge said. "I'm so proud for Sonny because he's served our area with dedication and distinction for 25 years.

"I just couldn't feel any better, I don't think, to know our congressman has these personal friends in Washington. It's a good feeling," he said.

Probably one of the most relieved persons after the day's events ended was the one who put the whole thing together, Montgomery's Meridian administrative assistant Jeannette Noe.

"I'm real pleased for the congressman that so many of his good friends turned out," she said. "I know I speak for him when I say he was well pleased and greatly humbled."

But Mrs. Noe laughed when asked if she would like to stage another dedication. "Let's wait awhile."

For some people at the dedication ceremonies, the day was long.

"I'll tell you I'm tired. Man, I'll be glad when it's over," said one employee of the firm catering a reception for dignitaries and friends of Montgomery.

But for one member of a military color guard, the heat and crowds were no problem.

"If it was anybody but Montgomery, it would be bad," said Sgt. 1st Class Ricky Posey. "I don't mind doing it for him. I just like him."

And, finally, it was a good day for 10-year-old Michael Alexander, who was attending the festivities with Cub Scout Pack 28 of Meridian.

"I liked it, yes ma'am."

□ 1550

## NOBLE CAUSE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Mississippi (Mr. MONTGOMERY) is recognized for 5 minutes.

● Mr. MONTGOMERY. Mr. Speaker, our colleague, Congressman LES ASPIN, recently focused a lot of light on an important veterans' issue that rarely gets enough attention. He pointed out how our veterans' population is aging and soon will be in need of considerable nursing home care that addresses the particular problems of the aged.

As chairman of the House Veterans' Affairs Committee, I wish to commend Congressman ASPIN for his efforts to bring more public attention to this issue. I also wish to draw the attention of all Members to a recent editorial in the Federal Times, which discusses Mr. ASPIN's points and the needs of the aging veteran. I include the text of the Federal Times editorial of July 20, 1981, entitled "Noble Cause" at this point in the RECORD:

[From the Federal Times, July 20, 1981]

NOBLE CAUSE

A congressman who is quick to rap the military—indeed, he might be termed a knee-jerk military rapper—wants the Veterans Administration to live up to its obligation to millions of former military men and women who will reach age 65 in the next 10 years.

Rep. Les Aspin, D-Wis., ardent foe of the Vietnam War, persistent critic of major and minor defense spending and a man considered by many military leaders to be nothing but a continual pain in the rear end, ought to win praise from all military men for calling on the nation, through its VA, to get with it.

Aspin says, rightfully, that the time is now for VA to get off its duff and begin to somehow care for possibly millions of the ten million World War II veterans who will reach age 65 by 1985 and will be entitled to VA hospital help.

The congressman noted that VA hospitals, like other hospitals, are set up to provide short-term curative medical treatment. "They are not set up to be nursing homes for the aged veteran, but that is the new demand they will face in this decade," he said, adding this:

"It is time for VA to be sharpening its pencils and coming up with specific plans to meet the needs of World War II vets * * *. You can't convert acute care hospitals into geriatic facilities in six months. And you can't release emergency room teams and hire skilled geriatric staff overnight."

We agree. The need to do something about VA hospitals in this regard cannot be overestimated. By 1985, one-third of all living military veterans will be over 65. By 1990, that percentage will increase to one-half. This is a telling point because at age 65, a veteran who cannot afford civilian hospital care is entitled to VA hospital care whether his health problem is service-connected or not. And many, then as now, will be unable to afford the high price of civilian hospitalization and nursing homes.

The fact of the matter is that VA hospitals do not have enough beds and enough staff now, and Lord only knows what will happen when caseloads multiply enormously in a few years.

VA hospitals and VA nursing homes also need specialists in geriatrics. Apparently not many doctors specialize in geriatrics. That's another problem.

Currently, there are 91 VA nursing homes for long-term geriatric treatment, located adjacent to VA hospitals around the country. In addition to these, the agency runs another type of extended care facility for elderly veterans, called domiciliaries. There are 15 of these now.

That's not enough, as VA admitted in a 1977 report, "The Aging Veteran: Present and Future Medical Needs," noting "an acute shortage of nursing home facilities for the placement of veteran patients."

What will happen as more and more World War II veterans become 65 and older?

This is subject matter that should be brought to the attention of the President. The military brass has a large and effective lobby on Capitol Hill. The lobby for enlisted, indigent veterans is not as effective. The state of VA hospitals proves that.

If Mr. Reagan and his colleagues want to understand the problem, as they most certainly should, we suggest they talk to Rep. Margaret M. (Maggie) Heckler of Massachusetts. For some time now, she has been fully aware of the VA hospital problem and has done her best to bring it to the attention of others in Congress. She is a Republican and White House people may find it more comfortable to talk with her about this problem than with, say, Democrat Aspin.

We suggest that the Disabled American Veterans Organization could also help to educate White House people on this extremely serious problem. Norman Hartnett at DAV headquarters would be most helpful, we are sure. He has been fighting the good fight for veterans in VA hospitals for a long time.

We congratulate the so-called anti-military man, Les Aspin, for being properly concerned with old soldiers.

We are hoping that many others will join him in this noble cause.●

## LEGISLATION TO RESTORE THE SEMIANNUAL COLA

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Maryland (Mr. BARNES) is recognized for 5 minutes.

● Mr. BARNES. Mr. Speaker, I urge my colleagues to join me in seeking to restore the semiannual cost-of-living adjustments for the millions of Federal civilian and military personnel. The COLA for September 1981, was repealed by the Omnibus Budget Reconciliation Act of 1981, so that retirees will now receive a single adjustment in March 1982. And now there are reports that the Reagan administration will seek to postpone even this reduced adjustment as part of its misguided campaign to fund its special interest tax breaks on the backs of the Federal retirement system and senior citizens generally.

The COLA issue is familiar to all Members of the House. We voted twice last year, 309 to 72, and 300 to 73, to reject efforts to tamper with the adjustments for the Federal retirement system. In 1976, Congress had reduced cost-of-living adjustments for Federal retireees and substituted the semiannual adjustment system. Now, only 5 years later, Congress has again disrupted the ability of Federal employees and retirees to make long-range career and retirement plans.

I have introduced, with the cosponsorship of Mr. FAZIO and Mr. HOYER, legislation which would restore the twice-yearly COLA adjustments in 1982 and subsequent years. I strongly urge Members to cosponsor the bill. The text of the legislation, H.R. 4467, follows:

H.R. 4467

A bill to amend title 5, United States Code, to restore semi-annual cost-of-living adjustments for Federal annuitants

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That section 8340(b) of title 5, United States Code, (as amended by the Omnibus Reconciliation Act of 1981) is amended to read as follows:

"(b)(1) The Office shall—

"(A) on January 1 of each year, or within a reasonable time thereafter, determine the percent change in the price index published for December of the preceding year over the price index published for June of preceding year, and

"(B) on July 1 of each year, or within a reasonable time thereafter, determine the percent change in the price index published for June of the preceding year over the price index published for December of the preceding year.

"(2) Except as provided in subsection (c) of this section, if in any year the percent change determined under either paragraph (1) A) or (B) indicates a rise in the price index, then—

"(A) effective March 1 of such year each annuity payable from the Fund having a commencing date not later than such March 1 shall be increased by the percent change computed such paragraph, adjusted to the nearest ⅒ of 1 percent, or

"(B) effective September 1 of such year each annuity payable from the Fund having a commencing date not later than such September 1 shall be increased by the percent change computed such paragraph, adjusted to the nearest ⅒ of 1 percent.".

(b) Section 8340(c)(1) of such title 5, United States Code, (as so amended) is amended to read as follows:

"(1) The first increase (if any) made under subsection (b) of this section to an annuity which is payable from the Fund to an employee or Member who retires, to the widow or widower of a deceased employee or Member, or to the widow or widower of a deceased annuitant whose annuity has not been increased under this subsection or subsection (b) of this section, shall be equal to the product (adjusted to the nearest 1/10 of 1 percent) of—

"(A) 1/6 of the applicable percent change computed under subsection (b) of this section, multiplied by

"(B) the number of full months (counting any portion of a month as a month)—

"(i) for which the annuity was payable from the Fund before the effective date of the increase, or

"(ii) in the case of a widow or widower of a deceased annuitant whose annuity has not been so increased, the number of months since the annuity was first payable to the deceased annuitant.".

SEC. 2. The amendments made by this Act shall take effect July 1, 1982, and shall apply to annuities which commence before, on, or after such date.●

□ 1550

## FEDERAL RESERVE BOARD IMPEACHMENT RESOLUTIONS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas (Mr. GONZALEZ) is recognized for 15 minutes.

Mr. GONZALEZ. Mr. Speaker, I rise in order to continue the brief 1-minute remarks that were made last Friday in respect to the introduction of two proposals, one a resolution and the other a bill, calling for the abolition of the Open Market Committee of the Federal Reserve Board. The resolution seeks the impeachment of the Open Market Committee in its entirety.

The Open Market Committee consists of the seven members of the Federal Reserve Board, plus five extraneous members, not Board members but some who are reported as private bankers and presidents of some of the banks in the system.

The proposal implements the first resolution I introduced before the break in August seeking the consideration of the impeachment of the Chairman of the Board, Mr. Paul Volcker.

Now, when Mr. Volcker appeared before the Banking Committee the day before the July 23 appearance of the Deputy Secretary of the Treasury for Monetary Affairs, I had a chance to confront him, and at that time I advised him what I was intending to do. I also said that it was not at all any personal thrust to him ad hoc or ad hominem, and that I intended to include the full Board, because it sounds drastic and it is drastic to consider the in extremis resort to impeachment.

But I want the record to clearly show that my action in this regard is no attempt to do so in a flight of fancy or out of an attempt to have a dramatic public relations type of approach.

I am sincere in my purposes for these actions. Extreme measures are needed to meet the dangerous conditions that confront every American—our standard of living. I have talked about these conditions even before this administration, so there is no partisan fervor motivating my actions. What motivates me is the stark reality confronting us, and the added dimension that I am very, very conscious and aware of my serious responsibility as a nearly 20-year member of the House Banking Committee. My resolutions have been referred to the Judiciary Committee, and I intend to follow through with further presentations to make sure that these proposals get serious consideration. That is all I ask, that we seriously consider these matters.

The impeachment resolutions are couched in general terms because I feel that if and until I do get serious consideration, it would be useless to be more specific. If I do get serious consideration, the bill of particulars will be drawn up. I have, not only general, but very specific documented occurrences to present to this body which, in effect, are contrary to what my predecessor speaker in the special order a few minutes ago was implying, that there is innocence in the actions and that it is not a runaway agency.

The Federal Reserve Board has been not only runaway, but it has been wholly unaccountable to the point that it has reached a degree of unacceptable arrogance. It is a creature of the Congress. It is not a body that was borne from the outpouring of the great god, Angus, as the Greeks used to describe it. It is a humanly created body. But as I told Mr. Volcker, its present Chairman, and as I have told everybody, including my colleagues in the Congress, the administrations, the Presidents, and the Federal Reserve Boards, we must look at the usurious high interest rate policy that is killing American business.

I am sure the Speaker will agree with me that we had always thought before that charging interest above a certain rate was illegal, and yet this Board has legalized usury on a national level. It has federalized and has sanctified usury and unconscionable interest rates at a level that no individual or collective body of citizens has experienced in the history of mankind. Even in the times of Jesus Christ it was wrong and illegal to even reach 10 percent of the current acceptable Federal level of interest rates that are now not only sanctified but talked about as if they are acts of God—and consequently something nobody can do anything about it. Why not bring them in and have them confront the charges?

□ 1600

What are those charges? What I am speaking of are high crimes and misdemeanors. Senators in their august and pristine grandeur across the Capitol dome, and us on the House side, especially my colleagues on the Banking Committee, have noted the arrogance with which the Federal Reserve Board condescends to take time and come before us and then to snort at us and say, "It is your fault; you have social programs you still must cut further." That is the whole blame.

These arrogant and wanton users of great power, the handmaidens of the malefactors of great wealth in and out of our country running the country and ruining the citizens, the businessmen in particular. Businesses are going out today in greater number and rates than ever before, approximating the depression level. They are going out, as I said earlier, like popcorn in a popcorn machine.

Can we afford to continue the complaisant and indulgent attitude of looking the other way and Pontius Pilate washing our hands and saying it is an act of God, what can we do?

What can you do? Do you mean you want to abolish the Federal Reserve Board?

Yes, I do. I introduced a bill to abolish the Federal Reserve Board and place its functions and duties where it belongs, and that is over in the Department of the Treasury, because then Presidents would be accountable as they should be. Abolish the Open Market Committee. Why? Nobody has advocated that. Oh, yes, you have dear colleague letters advocating we pass some kind of legislation that would restrict the activities of the Open Market Committee. Well, that is like Winston Churchill describing actions of some of his colleagues in the British Parliament when he said they acted like an 80 year old approaching a 16 year old virgin, tremulous, shaking in their boots, and fearful.

Since when has our American Government permitted the creation, the existence, and the perpetuation of a system where the most important constitutional power granted this Congress has been usurped by this body and then dares challenge the Congress as to its jurisdiction?

Of course, Lord Acton said unlimited, unreserved exercise of power not only tends to corrupt, it does corrupt. This institution is corrupted and it has been corrupted. It has sold our heritage for the mess of pottage while acting as the handmaiden for these great vested banking interests.

I told Mr. Volcker, and that is the only time he lost his cool, to his face that he has been responsive only to less than eight banks, not the general banking industry, the 14,000 or so of them that the Federal Reserve Board is supposed to be representing, but just the Chase Manhattans, the Chemical Bank and Trust, Continental Trust of Chicago, those that are the plutocrats of our financial markets in this country.

These words I speak, though they sound as if they are in anger, where restraint has been lost, I speak in measured form and after careful consideration of each word. I had to learn English and I love the two basic languages that have been my inheritance. I love them like nothing else. So, therefore, I am a great respecter and reverer of each word, and each word I have used has been evaluated and the problem is one that inescapably we must confront.

I feel sincerely that at this juncture, even if my recommendations were to be complied with, it may perhaps be too late. During the debates on the budget and on the tax measures I was told by some of my colleagues or asked "Henry, why fight? We should not obstruct the President because his program is wrong; it will end up wrong and then the tide will turn and we will be made to look right." That I think is wrong itself because I have never risen to oppose a program offered to us as a specific bill because it was any given President's program. There were many bills Presidents Johnson, Kennedy, Carter submitted that I voted against, argued against, criticized the administration, even sent telegrams to the President asking him to veto the passage of those that got by. I look upon it as an individual request for my vote and I evaluate it on that basis.

## SUMMARY OF EARLY WARNINGS ON SPENDING BILLS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Oklahoma (Mr. JONES) is recognized for 5 minutes.

● Mr. JONES of Oklahoma. Mr. Speaker, this week the House of Representatives is scheduled to vote on one appropriation bill that provides spending for fiscal year 1982—District of Columbia. Two other spending bills are also scheduled, the veterans' survivors benefits bill, which provides new entitlement authority, and the Federal aid highway bill, which appropriates new contract authority from the highway trust fund. I have asked the staff of the Budget Committee to continue the briefings that have been provided in the past to members of the Budget Committee and the House. The following materials factually compare the total amount of spending and credit provided in these bills with the targets for such spending and credit that resulted from congressional approval of the first budget resolution for fiscal year 1982. I intend to insert into the CONGRESSIONAL RECORD these staff analyses and analyses of all other appropriations, entitlement, or revenue bills as they are scheduled for floor action. It is my hope to provide these "early warnings" to interested Members every Monday. I believe that it is very important for the House to have information that compares such bills to the budget resolution—achievement of the resolution spending targets is not likely to occur unless the Members are clearly aware of the budget impact of their votes.

### SUMMARY OF EARLY WARNINGS ON SPENDING BILLS

#### H.R. 3995, VETERANS' AND SURVIVORS' COMPENSATION PAYMENTS

*This bill is basically in conformance with its Section 302 (Budget Resolution) targets.* It is under the President's request. The bill increases the rates of compensation for disabled veterans, with variable adjustments depending on the degree of disability. It also increases the maximum coverage of Servicemen's Group Life insurance and has a number of other miscellaneous provisions.

#### H.R. 4522, DISTRICT OF COLUMBIA APPROPRIATIONS

*This bill is under its Section 302 (Budget Resolution) targets and also under the President's Budget, both for budget authority and outlays.* The bill provides appropriations for payments and loans to the District of Columbia. The loan level is consistent with the credit targets in the resolution.

#### H.R. 3210, FEDERAL AID HIGHWAY ACT OF 1981

*This bill is under its Section 302 (Budget Resolution) targets.* It is a direct spending bill, providing budget authority from the Highway Trust Fund and specifying its use. The bill provides essentially the same amount requested by the President. The bill establishes limitations on highway construction and highway safety obligations. It redefines the total Interstate program and reduces its costs. It provides a new allocation formula, expands the 3R program to a 4R program by establishing reconstruction as a valid project. The bill eliminates the ½-of-1-percent minimum State allocation requirements.

#### EARLY WARNING REPORT

Bill: H.R. 3995, a bill to provide rate increases in Veterans' and survivors' compensation payments

This bill is under its target for new entitlement authority.

*Staff analysis*

Committee: Veterans' Affairs.

Subcommittee: Compensation, Pension, and Insurance.

Chairman: Mr. Hall (Texas).

Ranking minority member: Mr. Wylie (Ohio).

Scheduled: Monday, September 21, 1981 (Suspension).

*I. Description of bill*

The bill provides for variable rate adjustments in compensation payments to veterans with service-connected disabilities and an 11.3 percent inflation increase in dependency and indemnity compensation payments to veterans' survivors. Changes in the veterans' compensation payment schedule are shown below.

VETERANS' MONTHLY COMPENSATION

| Veterans disability rating (in percent) | Current law | H.R. 3995 | Increase over current law | |
|---|---|---|---|---|
| | | | Dollars | Percent |
| 10 | $54 | $58 | $4 | 7.4 |
| 20 | 99 | 109 | 10 | 10.1 |
| 30 | 150 | 165 | 15 | 10.0 |
| 40 | 206 | 229 | 23 | 11.2 |
| 50 | 291 | 325 | 34 | 11.7 |
| 60 | 367 | 415 | 48 | 13.1 |
| 70 | 434 | 505 | 71 | 16.4 |
| 80 | 503 | 595 | 92 | 18.3 |
| 90 | 566 | 680 | 114 | 20.1 |
| 100 | 1,016 | 1,131 | 115 | 11.3 |

The bill raises the maximum coverage of Servicemen's Group Life Insurance and Veterans Group Life Insurance from $20,000 to $35,000.

There are a number of other miscellaneous provisions, including a requirement that the Veterans' Administration (VA) and the Office of Management and Budget provide funds and employment ceilings established for the VA by Congress in the appropriations process.

*II. Comparison with target for new entitlement authority*

The bill is $17 million below the Compensation, Pension and Insurance Subcommittee target established in the Veterans' Affairs Committee's 302(b) report.

*III. Summary table*

[In millions of dollars]

| | New entitlement authority |
|---|---|
| 1. Amount in bill | 886 |
| 2. Prior action this session | 9 |
| 3. Total action to date | 895 |
| 4. 302(b) target | 912 |
| 5. Over(+)/Under(−) | −17 |
| 6. Amounts assumed but not yet considered | |
| 7. Over(+)/Under(−) | −17 |

*IV. Explanation of over/under*

The target allocation was established before the bill was finalized and the actual cost estimated. Therefore, the lower estimated cost reflects a technical remainder, not a substantive reduction.

*V. Comparison with the President*

The President's mid-session budget assumes $946 million in entitlement authority to fund an 11.2 percent across-the-board cost-of-living increase in veterans' and survivors' compensation benefits.

*VI. Amendments*

No amendments are permitted under suspension of the rules.

*VII. Definitions of terms in summary table, section III*

*Line 1.* Amount in bill: This amount is the estimated budget impact that will result from creating new entitlement benefits—in this case, higher VA compensation payments.

*Line 2.* Prior action: This amount reflects new entitlement authority (NEA) created through House-passed bills reported from the VA Subcommittee on Compensation, Pension, and Insurance.

*Line 3.* Total action to date: Line 1 plus line 2.

*Line 4.* 302(b) target: The target for new entitlement authority set for this Subcommittee by the Veterans' Affairs Committee.

*Line 5.* Over (+) or Under (−): Line 3 minus line 4.

*Line 6.* Amounts assumed but not yet considered: This reflects NEA amounts for legislation assumed in the First Budget Resolution which have not been considered by the authorizing committee.

*Line 7.* Over (+) or Under (−): Line 5 minus line 6.

Principal analyst: Martha Grundmann, Phone: X55792.

#### EARLY WARNING HOUSE BUDGET COMMITTEE

Bill: H.R. 4522, District of Columbia Appropriations.

This bill is under its targets for discretionary action.

*Staff analysis*

Committee: Appropriations.

Subcommittee: District of Columbia.

Chairman: Mr. Dixon (California).

Ranking minority member: Mr. Coughlin (Pennsylvania).

Scheduled: Tuesday, September 22, 1981.

*I. Description of bill*

This bill provides appropriations for payments and loans to the District of Columbia.

This bill as a whole is under the 302(b) targets for this subcommittee by $50 million in budget authority and outlays (the sum of lines 5 and 12 below). However, if amounts assumed in the Budget Resolution but not yet considered are added, the subcommittee would be under its targets by $37 million in budget authority and outlays (the sum of lines 7 and 14). The only mandatory amounts in this subcommittee's jurisdiction are outlays from prior-year budget authority.

*II. Comparison with target for discretionary appropriations action*

Pursuant to the Budget Act and House Budget Committee scorekeeping, the subcommittee has two targets: one for discretionary programs and one for mandatory programs. Since the Appropriations Committee is bound by existing entitlement law, it generally cannot effectively change the amounts required for the funding of mandatory programs. Its target for discretionary programs is therefore the main focus for this Early Warning report. Further, if the conference report on this appropriation bill exceeds the target for discretionary budget authority, the bill will be subject to the "delayed enrollment" provision of Section 305 of the fiscal year 1982 First Budget Resolution. As shown on line 7 below, the bill plus discretionary amounts not yet considered is below the 302(b) target for discretionary action by $37 million in budget authority and $38 million in outlays.

*III. Summary table*

[In millions of dollars]

| | Budget authority | Outlays |
|---|---|---|
| The amounts shown below are only for discretionary 1982 spending in this bill: | | |
| 1. Discretionary amounts in bill | 521 | 479 |
| 2. Prior action | | |
| 3. Total action to date | 521 | 479 |
| 4. 302(b) target | 571 | 530 |
| 5. Over (+)/Under (−) | −50 | −51 |
| 6. Amounts assumed but not yet considered | 13 | 13 |
| 7. Over (+)/Under (−) | −37 | −38 |
| The amounts shown below are only for mandatory appropriations included in this bill: | | |
| 8. Mandatory amounts in bill | | |
| 9. Prior action | | 32 |
| 10. Total | | 32 |
| 11. 302(b) target | | 32 |
| 12. Over (+)/Under (−) | | +1 |
| 13. Supplemental amounts needed | | |
| 14. Over (+)/Under (−) | | +1 |

*IV. Explanation of over/under*

The total of the 302(b) subdivisions made by the Appropriations Committee must equal the total amounts of the 302(a) allocation, but the assumptions which make up the subcommittee target need not be the same as the program assumptions that underlie the Budget Resolution. The specific assumptions behind the 302(b) target are not known—as a result, the specific programmatic reasons that the bill is over or under the subcommittee targets cannot be precisely identified.

The bill would appropriate $366 million for the Federal payment to the District of Columbia, $50 million less than the amount assumed in the Budget Resolution. Of this $50 million, $13 million was requested to fund the proposed transfer of some prosecutorial functions from the Federal government to the District of Columbia. The subcommittee passed over this request without prejudice pending completion of the authorization for the transfer.

*V. Comparison with the President's request*

This bill is below the President's request for discretionary items in this bill by $50 million in budget authority and $50 million in outlays.

*VI Credit—In millions of dollars*

The Budget Resolution contains non-binding targets for credit program amounts. This is the first year that there has been a credit scorekeeping system. There is no 302(a) and 302(b) allocation for credit program annual limits. For comparative purposes only, the table below shows the bill and First Budget Resolution assumptions. The budget authority and outlay effects of credit activity are reflected within the 302(a) and 302(b) allocation for budget authority and outlays.

[In millions of dollars]

| | Direct loan obligations | Primary guarantee commitments |
|---|---|---|
| 1. Credit program limits in the bill | 145 | |
| 2. Limits assumed in the Budget Resolution but not acted on in the bill | | |
| 3. Credit programs not subject to limit | | |
| 4. Total in bill | 145 | |
| 5. Budget Resolution assumptions | 145 | |
| 6. Over (+)/Under (−) | | |

The only credit activity in this bill is loans to the District of Columbia. The bill would limit those loans to $145 million in 1982, the same amount assumed in the Budget Resolution.

Principal analyst: Ed Brigham, Phone: 58797.

EARLY WARNING HOUSE BUDGET COMMITTEE

Bill: H.R. 3210, Federal Aid Highway Act of 1981.

This bill is consistent with the fiscal year 1982 budget resolution.

*Staff analysis*

Committee: Public Works and Transportation.

Subcommittee: Surface Transportation.

Chairman: Mr. Glenn Anderson (California).

Ranking minority member: Mr. Bud Shuster (Pennsylvania).

Scheduled: Wednesday, September 23, 1981 and the balance of the week.

*I. Description of bill*

The bill increases appropriations out of the Highway Trust fund so that overall Federal-aid highway contract authority (budget authority) is brought up to the Reagan administration level, which is $450 million over current law. It establishes limitations on overall highway construction and safety program obligations consistent with the Reconciliation bill and provides for a distribution formula for obligations to insure fair allocation of scarce Federal highway dollars. The legislation would also redefine remaining Interstate System costs to enable timely completion of the System and to provide a basis for apportioning fiscal year 1983 and future year Interstate construction funds. The current Interstate resurfacing, restoration and rehabilitation (3R) program would be expanded to include reconstruction (4R). The bill also eliminates the ½ of 1 percent guaranteed set-aside to States for Interstate funding.

*II. Comparison with target for direct spending action*

The bill funds the Federal-aid highway program at a level totally consistent with the amounts assumed in the First Budget Resolution for Fiscal Year 1982, which is the President's proposed level and is $450 million above current law budget authority.

*III. Summary table*

[In millions of dollars]

| | Budget authority | Outlays [1] |
|---|---|---|
| 1. Amounts in bill | 450 | |
| 2. Prior action | −273 | |
| 3. Total action to date | 177 | |
| 4. 302(a) target [2] | 940 | |
| 5. Over (+)/Under (−) | −763 | |
| 6. Amounts assumed but not yet considered | 600 | |
| 7. Over (+)/Under (−) | −163 | |

[1] Outlays are scored against the Transportation Appropriations Subcommittee.
[2] The 302(b) has not been reported by the Public Works Committee so comparison is made to the 302(a) allocation.

*IV. Explanation of over/under*

The level of spending for fiscal year 1982, including this bill, is lower than the First Budget Resolution ceilings because the Reconciliation bill included $149 million in highway safety reductions not assumed in the Resolution and because of a $14 million CBO scoring difference for total spending in the Surface Transportation Assistance Act of 1978.

*V. Comparison with the President*

The President's budget assumes $464 million in budget authority above current law for the highway program, the same as provided in this bill when adjusted for the CBO scoring difference.

*VI. Amendments*

None known at this time.

*VII. Definition of terms and table in summary table III*

*Line 1.* Amount in bill: This amount is the estimated budget impact that will result from creating new spending authority.

*Line 2.* Prior action: This amount reflects the enactment of the Reconciliation bill.

*Line 3.* Total action to date: Line 1 plus line 2.

*Line 4.* 302(a) target: The target for new spending set for this Committee by the House Budget Committee because the Public Works Committee has not submitted a 302(b) report.

*Line 5.* Over(+) or Under(−): Line 3 minus line 4.

*Line 6.* Amounts assumed but not yet considered: This reflects new spending authority assumed in the First Budget Resolution which has not yet been considered by the House but has been reported by the Public Works Committee (Airport Development and Planning program, H.R. 2643).

*Line 7.* Over(+) or Under(−): Line 5 minus line 6.

Principal analyst: Ken Leventhal, Phone: 58797.

SUMMARY OF AUTHORIZATIONS

H.R. 1952—CONSERVATION PROGRAMS ON MILITARY INSTALLATIONS AND PUBLIC LANDS

This bill would authorize conservation programs on military reservations and some public lands for fiscal years 1982–1986. $32.9 million would be authorized to be appropriated in fiscal year 1982. CBO estimates that if funded at that level, 1982 outlays would

be $28 million. The administration will not object to House passage of this bill.

H.R. 3016—TO GIVE PERMANENT EFFECT TO PROVISIONS OF THE FISHERMAN'S PROTECTIVE ACT OF 1967

This bill would permanently authorize a program of reimbursements to U.S. fishermen for certain losses resulting from seizures by foreign nations. The payments are funded by a combination of direct appropriations and appropriations of insurance reserves. The CBO estimates this bill authorizes $500,000 in budget authority for 1982, and that if used, it would result in $400,000 of outlays. However, the Commerce-State-Justice Appropriations bill, as passed by the House contains no appropriation for these payments. In addition, these payments are not assumed in the 1982 First Budget Resolution or the President's budget.

H.R. 1953, COUNCIL ON ENVIRONMENTAL QUALITY AUTHORIZATIONS

This bill authorizes appropriations for the operations of the Office of Environmental Quality and the Council on Environmental Quality during fiscal years 1982–1984. $500 thousand is authorized to be appropriated, which when combined with a permanent appropriation of $1.044 million would fund these programs at $1.5 million. CBO estimates that if funded at the $50 thousand level, 1982 outlays would be $473 thousand. These funds were not requested in the President's budget nor assumed in the budget resolution. The conference report on the HUD appropriation bill which has passed the House includes the $1.044 million assumed by the President, but does not include the $500 thousand authorized in this bill.

H.R. 4084—MARINE MAMMAL PROTECTION ACT AUTHORIZATION

This bill contains numerous technical and other amendments to the Marine Mammal Protection Act of 1972. The bill provides an authorization of $10.8 million in fiscal year 1983 and $11.9 million in fiscal year 1984. CBO estimates that if funded at these levels, fiscal year 1983 outlays would be $9.3 million and fiscal year 1984 outlays would be $11.7 million. No fiscal year 1982 authorization is necessary.

HOUSE CONCURRENT RESOLUTION 179—HIGHWAY ALLOCATIONS AUTHORIZATIONS

H. Con. Res. 179 is annually submitted legislation which allocates highway funding to the States. 23 U.S. Code 104(b)(5) requires Congressional approval for the Secretary of Transportation to allocate to the States the $3,235 million Interstate Highway program funding.

H. Con. Res. 179 has no budget impact. The program impact is to allocate to the States their fiscal year 1983 Interstate funding for advance planning.

H.R. 3136—OVERSEAS PRIVATE INVESTMENT CORPORATION (OPIC) AMENDMENTS

H.R. 3136 does not authorize the appropriation of any new funds. The bill extends the authority of OPIC from September 30, 1981, to September 30, 1985. It provides for the continuation of the Corporation's guaranteed loan and insurance program and earmarks a portion of the Corporation's earnings for use in its direct investment fund.

H.R. 4—INTELLIGENCE IDENTITIES PROTECTION ACT

H.R. 4 does not provide for the appropriation of any funds. It provides for penalties for the release of security information.

H.R. 1520—NATIONAL SCIENCE FOUNDATION AUTHORIZATION

This bill would authorize National Science Foundation activities for fiscal year 1982. $1,161 million is authorized to be appropriated. CBO estimates that if funded at that level, 1982 outlays would be $550 million. The President's budget request for NSF in fiscal year 1982 is $1,034 million which CBO estimates would provide $509 million in outlays. The HUD-Independent Agencies Appropriations Bill contains $1,071 million in budget authority which CBO estimates will result in fiscal year 1982 outlays of $520 million. This is the level approved by the conference committee and passed by the House. The conference report awaits Senate consideration.

H.R. 3377—AUTHORIZATIONS FOR THE NONPERFORMING ARTS FUNCTIONS FOR THE KENNEDY CENTER

This bill authorizes appropriations to the Secretary of the Interior for services necessary to the nonperforming arts functions of the John F. Kennedy Center for the Performing Arts, and for other purposes. $4.5 million is authorized to be appropriated in 1982. CBO estimates that if funded at that level, 1982 outlays would be $4.1 million. These funds are consistent with the President's budget request and the budget resolution. The Interior appropriations bill which has passed the House included $4.3 million for this purpose.●

## PRESIDENT REAGAN AND THE FEDERAL WORK FORCE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Michigan (Mr. FORD) is recognized for 5 minutes.

● Mr. FORD of Michigan. Mr. Speaker, one has to wonder if it is not President Reagan's ultimate goal to completely abolish the Federal work force. He seems to view these civil servants with total contempt.

Every time the President talks of cutting the budget, Federal workers are at the forefront of his list of victims. He appears to view them as the most expendable soldiers in the budget battle.

At the President's request last month, as part of the reconciliation debacle, the majority in Congress decided to eliminate twice-a-year cost-of-living adjustments for retired Federal workers, guaranteeing them less protection against soaring living costs without any guarantee the administration's program will reduce inflation.

Now the President wants to delay paying these retired workers any cost-of-living adjustment until October of 1982. He wants them, in effect, to pretend that nothing has happened to their purchasing power. Such disregard for reality is bound to have an adverse effect on the active Federal work force, whose morale is at low ebb.

Retired Federal workers received their last cost-of-living increase last March. One due in September was wiped out under budget reconciliation. The next one is due in March, but the President says cavalierly, let us delay that until October of 1982.

This would mean that these workers will have gone 19 months without any relief from inflation. The Congressional Budget Office estimates that in that same period the cost of living will have increased by about 13 percent—and this is an optimistic estimate. Are we going to tell these people already living on modest incomes to just ignore the fact that they will have to live on 13 percent less real income? I think this is pretty heartless.

Donald Devine, the Director of the Office of Personnel Management, recently has informed us that it will be necessary to reduce benefits of both working and retired Federal workers covered by the Federal employees health benefits program. This will be necessary, he said, to "protect the taxpayer" from an increase in insurance rates. In a real sense this will be tantamount to a reduction in income.

The White House wants as well to eliminate 75,000 more Federal jobs. The attitude seems to be that Federal workers are extra baggage that should be jettisoned.

We do not have Federal workers because we have tried to make work for people. We have them because there are jobs for them to do. When we eliminate Federal employees, we at the same time reduce or eliminate vital services to our citizens.

Maybe this is part of the administration's program to return us all to the era of rugged individualism where everyone takes care of himself and too bad for those who cannot.●

## POLAND: WHAT SHOULD THE UNITED STATES DO?

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Wisconsin (Mr. ZABLOCKI) is recognized for 5 minutes.

● Mr. ZABLOCKI. Mr. Speaker, I would like to bring to the Members' attention an excellent analysis of the economic situation in Poland and its implications.

Paul Marer, professor of International Business at Indiana University, recently sent me a copy of a statement entitled "Poland: What Should the U.S. Do?"

This paper provides a disturbing scenario on the possible outcome if Poland is unable to reverse its current economic decline and suggests a rational approach to the situation: a comprehensive economic stabilization and reform program supported by Polish membership in the IMF and World Bank and by a foreign assistance package financed by Western governments, international financial institutions, and private banks.

The analysis and suggestions in this paper, which follows, deserve our attention and consideration:

POLAND: WHAT SHOULD THE U.S. DO?

(By Paul Marer)

U.S. national interest in Poland is twofold. One is to preserve the political gains the Polish people have achieved through such institutions as the Church, private agriculture, and the trade union movement. It is vital to U.S. interests to assure Polish society's pluralism both for the sake of the Polish people and as an example to other countries of the direction in which a Communist society can evolve. The other is to prevent the outright repudiation of Poland's $26 billion debt to Western governments and banks, not only because the owed amount is large but because default is likely to trigger debt repudiation by other countries. The total impact could shake the Western financial system to its foundation.

If the U.S. and other Western countries continue to assume a "do nothing" or "do very little" political posture, here is the likely chain of events that can drag Poland (and our interests) into a disaster that nobody wants.

Poland today is in the midst of a tailspin economic crisis whose real causes go much beyond the sporadic strikes which make the headlines or the reduced workweek Solidarity negotiated. For decades, overriding priority has been given to heavy industry, making production simultaneously capital- and raw-material-intensive, thus, also import-intensive. The first half of the 1970s witnessed an almost indiscriminate expansion of industrial capacity, partly financed by Western credit.

Agriculture has been neglected. Shortages of inputs, a poor incentive system, bureaucratic interference, and unfavorable weather several years in a row have led to output levels much below their potential. Poland has had to import one-third of its grain at a cost of $1 billion annually.

Until the late 1970s the Polish leadership could sweep the problems under the rug by borrowing heavily from the West. Since 1979 Poland has been maneuvering desperately and, as we know, unsuccessfully to avoid forced rescheduling. It has cut imports, more and more of them essential, and pushed exports, more and more diverted from the domestic supply line, causing bottlenecks in industry, agriculture, transportation, and the retail sector. The outcome is a rapidly spreading under-utilization of productive capacity. Officially reported national income declined in 1979, in 1980, and a steep further decline of at least 15-20 percent is projected for 1981.

DEBT RESCHEDULING

Poland owes $10 billion to Western governments and $16 billion to commercial banks. So far rescheduling has involved only a portion of the total. In April Western governments agreed to defer 90 percent of the principal and interest on approximately $3 billion for 7 years, without imposing conditions that have real teeth, even though the Polish government is not coming to grips with the fundamental causes of its balance-of-payments problem. The reasons are: (1) Western creditors do not have a strong bargaining hand: what else can they do but reschedule? Default would hurt both sides. (2) West European governments and banks (under strong government influence) worry that if conditions were imposed, the East would accuse them of undermining detente. (3) Western policymakers are uncertain which steps would halt the Polish economy's nosedive, since the situation is unprecedented.

Rescheduling by commercial banks is under way and the banks are attempting to set conditions that have real teeth. The problem is that the Polish government has been unwilling to introduce, even as yet to propose, a comprehensive and feasible economic stabilization and reform program, except to raise retail prices steeply next January. Meanwhile Poland drifts.

This drift has ominous consequences. Because there is no program and because over the years Poland's leaders have reneged on many promises made to the people, Solidarity and other groups have no trust in the government's ability to lead the country out of crisis. Solidarity's leadership finds it increasingly difficult to control the anger of its rank and file.

Understanding the crisis-nature of Poland's economic situation, Solidarity in the past few months has reversed its earlier stand that it will negotiate only on issues that are the traditional concerns of labor unions and has taken the initiative proposing stabilization and reform programs. Solidarity now wants a constructive dialogue with the government since only a program supported by both the government and Solidarity has the chance to succeed. But the government stubbornly refuses to negotiate a comprehensive economic program with Solidarity.

Meanwhile, the international consequences of Poland's drift is that the foreign resources so desperately needed to help finance a stabilization and reform program are becoming unavailable from the West. Who can afford to continue to lend billions to a country whose leadership refuses to tackle seriously its own problems?

Unless the situation can be drastically turned around soon, Poland's economic tailspin will continue. The Polish government projects that the drastic drop in coal production and shortages of raw materials and spare parts will cause more than a third of industry to be idle by early 1982. Even if the first round of debt rescheduling allows all principal and interest due this year to be postponed, Poland will still be unable to generate enough exports to pay for essential imports.

The announced price rises will take effect in January, at a time when not only food and consumer goods but coal and electricity will also be in short supply. People will have to spend endless hours in lengthening queues, in freezing winter, to try to buy the essentials.

If the economy is allowed to drift, it can easily degenerate into total economic collapse and a breakdown of civil order. As Polish security forces and the military try to keep control, the scales will probably be tipped in favor of Russian troops intervening to preserve "law and order." In retaliation, the West will almost certainly stop selling commodities and extending credits to Poland and to countries that have participated in the invasion. Citing economic weakness and the Western embargo, Poland's new puppet government may be forced into a unilateral declaration of debt service moratorium of, say, five or ten years, which Western banks are likely to consider default. Banks will scramble to pull out their loans from the Soviet bloc which, along with the embargo, may well trigger default by some other bloc countries also.

This action-reaction sequence could bring East-West trade to a standstill although that would cause much greater problems for the Eastern countries, the blow for some firms and banks in the West will be severe. Seizing the default precedent and the confusion, it is possible that several large debtor countries outside the Soviet bloc will also insist on a moratorium on debt service, causing further panic in the international financial markets.

The Soviet Union will tell the East European countries: to keep your economies afloat, you now have no choice but to move toward greater economic integration with the USSR. The political price will of course be specified. If the Polish crisis happens to precede or coincide with a succession crisis in the USSR, a tough Russian stance vis-a-vis Poland and other East European countries will be even more likely, because no new Soviet leader would want to be tagged as responsible for "losing Poland."

U.S. LEVERAGE

Once Russia has opted for a military solution, the U.S.—having spoken repeatedly of its dire consequences—will have no leverage to alter fundamentally the scenario just described.

This is not the case today. While the U.S. has no power to control events in Poland or Soviet actions vis-a-vis Poland, it does have leverage to influence events. Our best political and economic interest is to forestall a military "solution" to the Polish crisis. The chances of a military solution would be greatly lessened if Poland's economic tailspin could be reversed, for which two conditions are essential. One is a comprehensive and feasible economic stabilization and reform program to which the Polish government, the party, the workers, and the peasants are irrevocably committed. The other is a foreign loan package to help finance such a program.

This is where U.S. leadership and leverage should enter. The U.S. government should take the initiative to put together a coalition of Western governments, private banks, and international financial institutions to arrange a three-year plan to reschedule all of Poland's debts and to provide Poland food, raw materials, and other types of long term credits under the following conditions.

A. That the Polish government put forth promptly a detailed and realistic economic stabilization and reform program, with a timetable of implementation, which has been approved by the elected representatives of Poland's workers and peasants. (Solidarity will have its national elections next month so its leadership will be in a good position to negotiate on government proposals soon thereafter.) Western creditors should not specify in detail the stabilization-reform program but should insist that an international task force be responsible for monitoring Poland's adherence to its own timetable. There should be clear understanding that new credits will be released only as program implementation proceeds as pledged. This is necessary in light of the fact that over the years the Polish government has provided its creditors targets of various sorts that have proved to be unrealistic and remained unfulfilled by wide margins.

B. That the Polish government accept certain specific recommendations regarding the earning and managing of hard currency. The recommendations should include:

(1) Joining the IMF and the World Bank. This makes sense not only because these organizations would be able to provide some of the new financing but also because they have the expertise to provide useful advice,

especially as it concerns the promotion of exports. (As of now, the IMF has much less expertise than some of the large international banks on how to restore external equilibrium in a centrally planned economy. Thus, it is important that membership in the IMF supplement and not supplant the other conditions.)

(2) Poland seeks external equity capital. This makes sense not only because any borrower is wise to rely on a mixture of debt and equity but because direct investment can help solve several problems simultaneously: increase ability to import machinery, equipment, and applied technology; contribute organizational, management and marketing expertise for the export sector; and provide employment for workers who may otherwise be without jobs as industries and enterprises are streamlined. Polish laws already permit foreign investment, but to attract long-term capital on a large enough scale, Poland will have to extend its scope and provide special incentives, such as free trade zones or export platforms similar to those currently operating in many countries.

RATIONALE OF THE RECOMMENDATIONS

U.S. leverage would apply pressure where it is most needed to avoid the collapse of Poland—on the Polish government which desperately needs food, raw materials, and spare parts to survive.

If the U.S. agreed to provide some resources, it would then also be in a position to pressure its allies to go along with its proposals. Since the plan would not impose political conditions on Poland and would not try to specify the content of economic reforms (only that its feasibility of implementation be demonstrated), the West could not be accused of interfering in Poland's internal affairs or trying to change the political-military map of Eastern Europe.

Among the lasting political benefits to the U.S. would be the gratitude of the Polish people (who are among the best friends this country has anywhere), both for our economic assistance and for pressuring their government to solve their problem. If the Polish government will not play ball, the U.S. will have lost nothing.

One obstacle is the expected political opposition in the U.S. to further loans to Poland at the time when so many domestic programs are cut. This could be overcome if the U.S. contribution required little or no immediate budget outlay, such as sending surplus agricultural commodities and other help to Polish agriculture on long-term credit and guaranteeing loans and investments provided by the private sector. The proposed program would be helped further by presidential leadership persuading the American people that it is in the U.S. national interest.

The question our policymakers must ponder is this: Will the U.S. stand idly by while events in Poland are rushing in a direction likely to be resolved against our vital interests or will the U.S. assume a leadership role and influence events toward a favorable outcome?●

## LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. DANIELSON (at the request of Mr. WRIGHT), for September 21 through 24, on account of serving as a member of the Inter-Parliamentary Union delegation.

## SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. DANNEMEYER) to revise and extend their remarks and include extraneous material:)

Mr. DANNEMEYER, for 30 minutes, today.

Mr. MCKINNEY, for 5 minutes, today.

Mr. NAPIER, for 5 minutes, today.

Mr. DANNEMEYER, for 30 minutes, September 22.

Mr. DANNEMEYER, for 30 minutes, September 23.

Mr. DANNEMEYER, for 30 minutes, September 24.

Mr. EMERSON, for 30 minutes, September 22.

(The following Members (at the request of Mr. DYMALLY) to revise and extend their remarks and include extraneous material:)

Mr. MONTGOMERY, for 5 minutes, today.

Mr. BARNES, for 5 minutes, today.

Mr. GONZALEZ, for 15 minutes, today.

Mr. ANNUNZIO, for 5 minutes, today.

Mr. JONES of Oklahoma, for 5 minutes, today.

Mr. FORD of Michigan, for 5 minutes, today.

Mr. ZABLOCKI, for 5 minutes, today.

Mr. BONKER, for 60 minutes, on September 23, 1981.

Mr. WILLIAMS of Montana, for 60 minutes, on September 23, 1981.

(The following Member (at the request of Mr. GONZALEZ) to revise and extend his remarks and include extraneous material:)

Mr. DYMALLY for 5 minutes, September 22, 1981.

## EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. LUNGREN, during general debate on H.R. 3136 in the Committee of the Whole today.

(The following Members (at the request of Mr. DANNEMEYER) and to include extraneous matter:)

Mr. GOODLING.

Mr. PARRIS.

Mr. BROWN of Ohio.

Mr. DERWINSKI.

Mrs. HECKLER in two instances.

Mr. COLLINS of Texas in three instances.

Mr. COLEMAN.

Mr. FINDLEY.

Mr. NAPIER.

Mr. MICHEL.

Mr. MOORHEAD.

Mr. CONABLE.

Mr. CLAUSEN.

Mr. CONTE.

(The following Members (at the request of Mr. DYMALLY) and to include extraneous matter:)

Mr. PEASE in two instances.

Mr. FORD of Michigan.

Mr. COELHO in two instances.

Mr. FAZIO.

Mr. DOWNEY.

Mr. ZABLOCKI.

Mr. EDWARDS of California.

Mr. STUDDS.

Mr. AUCOIN.

Mr. ANDERSON in 10 instances.

Mr. GONZALEZ in 10 instances.

Mr. BROWN of California in 10 instances.

Mr. ANNUNZIO in six instances.

Mr. JONES of Tennessee in 10 instances.

Mr. BONER of Tennessee in five instances.

Mr. IRELAND.

Mr. FARY.

Mr. MCDONALD.

Mr. PEPPER.

Mr. FAUNTROY.

Mr. HOWARD.

Mr. LANTOS.

Mr. FRANK in three instances.

Mr. RODINO in two instances.

Mr. STARK.

## SENATE JOINT RESOLUTION REFERRED

A joint resolution of the Senate of the following title was taken from the Speaker's table and, under the rule, referred as follows:

S.J. Res. 101. Joint resolution designating "National High School Activities Week"; to the Committee on Post Office and Civil Service.

## ADJOURNMENT

Mr. GONZALEZ. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 4 o'clock and 7 minutes p.m.) the House adjourned until tomorrow, Tuesday, September 22, 1981, at 12 o'clock noon.

## EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

2217. A letter from the Assistant Secretary of State for Congressional Relations, transmitting a copy of Presidential Determination No. 81-12, finding that it is in the national interest for the Export-Import Bank to extend credit in connection with certain trade with the People's Republic of China, pursuant to section 2(b)(2) of the Export-Import Bank Act of 1945, as amended; to the Committee on Banking, Finance and Urban Affairs.

2218. A letter from the Secretary of Transportation, transmitting a draft of proposed legislation to provide for the transfer of the Alaska Railroad to the State of

Alaska; to the Committee on Energy and Commerce.

2219. A letter from the Assistant Secretary of State for International Organization Affairs, transmitting copies of various reports prepared by the United Nations Joint Inspection Unit, pursuant to section 301(e)(3) of the Foreign Assistance Act of 1961, as amended; to the Committee on Foreign Affairs.

2220. A letter from the Director, Defense Security Assistance Agency, transmitting the quarterly report on foreign military sales as of June 30, 1981, pursuant to section 36(a) of the Arms Export Control Act; to the Committee on Foreign Affairs.

2221. A letter from the Assistant Attorney General for Legislative Affairs, transmitting a draft of proposed legislation to amend the Trading with the Enemy Act to authorize the use of assets vested under that Act during World War II for an ex gratia payment of $20,000 to the Government of Switzerland and to provide for the deposit in the Treasury of the remainder of such assets; to the Committee on Foreign Affairs.

2222. A letter from the Acting Comptroller General of the United States, transmitting a report on the processing of Defense Department personnel security clearances (GGD-81-105, September 15, 1981); jointly, to the Committees on Government Operations and Armed Services.

2223. A letter from the Acting Comptroller General of the United States, transmitting a report on the reporting requirements of the Public Utility Regulatory Policies Act (EMD-81-105, September 14, 1981); jointly, to the Committees on Government Operations and Energy and Commerce.

2224. A letter from the Acting Comptroller General of the United States, transmitting a report on the Small Business Administration's implementation of the Public Law 95-507 subcontracting and surety bond waiver provisions (CED-81-151, September 18, 1981), pursuant to section 7(j)(3) of the Small Business Act, as amended; jointly, to the Committees on Government Operations and Small Business.

## REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar as follows:

Mr. RODINO: Committee on the Judiciary. House Joint Resolution 220. Joint resolution proclaiming Raoul Wallenberg to be an honorary citizen of the United States, and requesting the President to ascertain from the Soviet Union the whereabouts of Raoul Wallenberg and to secure his return to freedom; with an amendment (Rept. No. 97-152, Pt. II). Referred to the House Calendar.

## PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. BENNETT (for himself and Mr. SPENCE):

H.R. 4529. A bill to authorize the transfer of 15 excess naval vessels; to the Committee on Armed Services.

By Mr. COLEMAN:

H.R. 4530. A bill to authorize designated employees in the Office of Inspector General, Department of Agriculture, to carry firearms and to make arrests and searches in the performance of their duties, and for other purposes; to the Committee on Agriculture.

By Mr. CONABLE (for himself and Mr. FORD of Tennessee):

H.R. 4531. A bill to amend the Internal Revenue Code of 1954 to clarify the standards used for determining whether individuals are not employees for purposes of the employment taxes; to the Committee on Ways and Means.

By Mr. EDWARDS of Oklahoma:

H.R. 4532. A bill to amend the Internal Revenue Code of 1954 to make permanent the 22-percent rate of percentage depletion for independent producers and royalty owners; to the Committee on Ways and Means.

By Mr. ERDAHL:

H.R. 4533. A bill to amend the Internal Revenue Code of 1954 to allow the targeted jobs tax credit for certain wages paid to individuals who have attained age 14 and who are participating in work experience and career exploration programs; to the Committee on Ways and Means.

By Mr. FORD of Tennessee:

H.R. 4534. A bill to require the Secretary of Health and Human Services to continue in effect the medicaid requirement that States provide 60-days' notice of certain changes in reimbursement methods or levels; to the Committee on Energy and Commerce.

By Mr. HARKIN:

H.R. 4535. A bill to amend the Internal Revenue Code of 1954 to deny any deduction or credit to any manufacturer of any breastmilk substitute for any activity which is not consistent with the International Code of Marketing of Breastmilk Substitutes; to the Committee on Ways and Means.

By Mr. LEACH of Iowa:

H.R. 4536. A bill to repeal certain provisions of the Economic Recovery Tax Act of 1981 which reduce the crude oil windfall profit tax, and to provide that the additional revenues resulting from such repeals shall be transferred to the Federal Old-Age and Survivors Trust Fund; to the Committee on Ways and Means.

By Mr. PARRIS:

H.R. 4537. A bill to provide for a 7.55-percent Federal employee pay increase; to the Committee on Post Office and Civil Service.

By Mr. SHARP (for himself, and Mr. BROWN of Ohio):

H.R. 4538. A bill to amend the Energy Policy and Conservation Act to extend certain authorities relating to the international energy program; to the Committee on Energy and Commerce.

By Mr. YOUNG of Alaska:

H. Con. Res. 185. Resolution to provide for the designation of "National Guard Day"; to the Committee on Post Office and Civil Service.

## MEMORIALS

Under clause 4 of rule XXII,

185. The SPEAKER presented a memorial of the Legislature of the State of California, relative to Rudolf Hess; to the Committee on Foreign Affairs.

## PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. LAGOMARSINO:

H.R. 4539. A bill for the relief of Mark Suzuki; to the Committee on the Judiciary.

By Mr. WINN:

H.R. 4540. A bill for the relief of Julia Irene Moore; to the Committee on the Judiciary.

## ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

H.R. 182: Mr. SOLOMON.

H.R. 478: Mr. FORSYTHE.

H.R. 1853: Mr. MCGRATH, Mr. COATS, Mr. ROBINSON, Mrs. BOUQUARD, Mr. PATMAN, Mr. GUNDERSON, Mr. GEPHARDT, Mr. REGULA, Mr. QUILLEN, Mrs. HOLT, Mr. MADIGAN, Mr. KRAMER, Mr. SILJANDER, Mr. CORCORAN, Mr. SNYDER, Mr. DANNEMEYER, Mr. BREAUX, Mr. WILLIAMS of Ohio, Mr. ROTH, Mr. BUTLER, Mr. LELAND, and Mr. JONES of Tennessee.

H.R. 2488: Mr. RITTER.

H.R. 2977: Mr. TRAXLER.

H.R. 3191: Mr. BAFALIS.

H.R. 3209: Mrs. FENWICK and Mr. RINALDO.

H.R. 3393: Mr. RANGEL.

H.R. 3394: Mr. RANGEL.

H.R. 3984: Mr. ROBERTS of South Dakota.

H.R. 4407: Mr. HYDE, Mr. BENJAMIN, Mr. ROTH, Mr. KRAMER, Mr. BARNARD, Mr. PETRI, Mr. MURPHY, Mr. SAM B. HALL, Jr., Mr. FORSYTHE, Mr. BAFALIS, Mr. WON PAT, and Mr. BADHAM.

H.R. 4409: Mr. OBERSTAR, Mr. FAZIO, Mr. EDWARDS of California, Mr. SIMON, and Mr. CONYERS.

H.R. 4449: Mr. BARNARD, MR. BEARD, Mr. BEVILL, Mrs. BOUQUARD, Mr. CARNEY, Mr. ROBERT W. DANIEL, JR., MR. DASCHLE, Mr. EVANS of Iowa, Mr. FORSYTHE, Mr. SAM B. HALL, JR., MR. HARTNETT, Mrs. HOLT, Mr. HOPKINS, Mr. HYDE, Mr. LEBOUTILLIER, Mr. LONG of Maryland, Mr. MARTIN of North Carolina, Mr. MOTTL, Mr. NELLIGAN, Mr. PARRIS, Mr. PETRI, Mr. PORTER, Mr. ROBERTS of South Dakota, Mr. ROTH, Mr. SOLOMON, Mr. STATON of West Virginia, Mr. STENHOLM, Mr. TRIBLE, Mr. WALKER, Mr. WATKINS, and Mr. WEBER of Minnesota.

H.J. Res. 168: Mr. CAMPBELL, Mr. HARTNETT, Mr. SPENCE, Mr. PETRI, Mr. GINGRICH, and Mr. ENGLISH.

H.J. Res. 214: Mr. BARNES, Mr. CARMAN, Mr. DASCHLE, Mr. DOWDY, Mr. EVANS of Iowa, Mr. FAUNTROY, Mr. FOWLER, Mr. HILER, Mr. HUCKABY, Ms. MIKULSKI, Mr. NELLIGAN, and Mr. WATKINS.

H. Con. Res. 100: Mr. FITHIAN.

H. Con. Res. 111: Mr. FITHIAN, and Mr. CARMAN.

H. Res. 142: Mr. DORNAN of California.

H. Res. 152: Mr. LANTOS, Mr. FITHIAN, and Mr. CARMAN.

## PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

201. By the SPEAKER: Petition of M. V. Williams, et al., Bristol, Tenn., relative to citizens' band radio regulation; to the Committee on Energy and Commerce.

202. Also, petition of the City Council, Broadview Heights, Ohio, relative to Federal judges; to the Committee on the Judiciary.

203. Also, petition of the 49th annual convention, New York State Department, Polish Legion American Veterans, Kenoza Lake, New York, relative to veterans' benefits; to the Committee on Veterans' Affairs.

## AMENDMENTS

Under clause 6 of rule XXIII, proposed amendments were submitted as follows:

### H.R. 4

By Mr. BENNETT:

—Page 3, after line 21, insert the following:

"(d) Whoever falsely asserts, publishes, or otherwise claims that any individual is an officer or employee of a department or agency of the United States engaged in foreign intelligence or counterintelligence activities, where such assertion, publication, or claim prejudices the safety or well-being of any officer, employee, or citizen of the United States or adversely affects the foreign affairs functions of the United States, shall be imprisoned for not more than five years or fined not more than $50,000, or both."

—Page 3, after line 21, insert the following:

(e) Whenever, in the judgment of the head of any department or agency engaged in foreign intelligence or counterintelligence activities, any person is about to engage in conduct that would constitute a violation of this Act, the Attorney General, on behalf of the United States, may make application to an appropriate United States district court for an order enjoining such conduct. Upon a showing that the safety or well-being of any officer, employee, or citizen of the United States would likely be jeopardized or that irreparable damage to United States foreign intelligence or counterintelligence activities or foreign affairs functions would be likely to result if such conduct is carried out, a permanent or temporary injunction, restraining order, or other order may be granted. Any proceeding conducted by a court under this subsection for the purpose of determining whether any information constitutes the type of information described in this Act shall be held in camera.

### H.R. 4522

By Mr. BENNETT:

—Page 21, after line 3, insert the following new section:

SEC. 122. None of the funds appropriated in this Act may be used to grant a business license to any person who, after the date of enactment of this Act, offers drug paraphernalia (as defined in the Model Drug Paraphernalia Act drafted by the United States Department of Justice, August 1979) for sale in the course of the business for which such license is required.

By Mr. PARRIS:

—Page 21, after line 3, insert the following new section:

SEC. 122. None of the funds appropriated in this Act may be used for the implementation of a personnel lottery with respect to the hiring of firefighters or police officers.

# EXTENSIONS OF REMARKS

## COSTA RICA IS 160 YEARS OLD—AND NEEDS OUR HELP

HON. MICHAEL D. BARNES
OF MARYLAND
IN THE HOUSE OF REPRESENTATIVES

*Monday, September 21, 1981*

● Mr. BARNES. Mr. Speaker, September 15 was the independence day of Central America's only democracy and our best and oldest friend in the region—Costa Rica. It was a melancholy birthday, marking not only the 160th anniversary of Costa Rica's independence from Spain, but also the continuing precipitous decline of the country's economy.

To combat this decline, a group of Costa Rican businessmen has formed a national effort for export development (ENADE) in an attempt to revitalize the economy. Representatives of this group were in Washington last week trying to convince Americans of the necessity of supporting Costa Rica's democratic, private-sector-oriented development efforts before the economy deteriorates beyond saving.

They brought with them a brief document telling their story, which I would like to share with my colleagues. As the document demonstrates, the need is great. I am tremendously gratified that the Appropriations Committee last week voted out $20 million in economic support funds for Costa Rica. This is the least we can do. It will create a demonstration effect to help Costa Rica get from other sources the amounts of necessary credit cited in the document.

I urge my colleagues to consider the following information carefully, and to support our efforts to help our Central American friend.

### ENADE—National Effort for Export Development

Since our visit to Washington D.C., 5 months ago, Costa Rica's economic situation has deteriorated at an alarming rate.

The seriousness of the gap between our annual earnings from exports and the portion of our external debt that must be paid within the year is now known. While exports are expected to reach $1.5 billion this year, the debt service for the last quarter of 1981 and the whole of 1982 will represent a disbursement of $927 million (including $120.2 million in principal and interest already due). (See attachment I). Incidentally these figures do not include private sector indebtedness.

It is estimated that the current external debt, including that of the private sector, is in excess of 3 billion dollars (it increased by 50 percent in barely 18 months), which is approximately equivalent to the 1981 GNP at current prices.

The scarcity of dollars with which to pay for our essential imports has reached a critical point. The free rate of exchange continues to rise: it has tripled the official rate of exchange in under twelve months, while the most conservative estimates indicate that it could well quadruple the free rate before the year is over.

At the time of writing this report, the free rate of exchange was ¢25 per dollar, or 2.9 times greater than the official parity of ¢8.60 per dollar.

The impact of the increase in the free rate of exchange on imports of essential goods and raw materials exerts pressure on costs and on inflation. If, at the outset of the year, it was estimated that we would have an inflation of 40 percent (in 1980 inflation came to 20 percent), it is now expected that this figure will rise to 60 percent.

The standard of living of the Costa Ricans, which suddenly dropped to half in December 1980 as a result of the de facto devaluation of the colon, is currently a third of what it was nine months ago. In one year, unemployment rose from 5 percent to 7.50 percent (65,000 persons out of a job) and could reach 10 percent by the end of the year if the Government should find itself forced to put a halt on investment programs and the private sector may be forced to close down or reduce operations. Hidden unemployment or underemployment affects 200,000 persons, or 27.8 percent of the active population.

The consolidated deficit of the public sector (Central government, autonomous institutions and state enterprises) had originally been set at $250 million for the current year which is equivalent to 9 percent of GNP. As a result of the devaluation (an increase in the cost of obligations and purchases abroad), this deficit could reach 13 percent of GNP or $350 million.

Credit to the private sector has been seriously restricted and, consequently, so have the possibilities for expanding production. While in 1975, of the total domestic credit outstanding of the National Banking System 81.3 percent corresponded to the private sector and 18.7 to the public sector, in 1980, and 1981 the proportion changed radically: 57.6 percent to the private sector and 42.4 to the public sector. As a result, the private sector was forced to turn to external credits for financing, thus initially aggravating the problem of the country's indebtedness abroad. Although, there are no official figures, it is estimated that the external debt of the private sector amounts to some $650 million, most of it in short-term loans (See attachment II).

An ever greater participation by the State in economic activities can be appreciated from an analysis of the employment figures. In 1977, the private sector absorbed 83.7 percent of the economically active population, with 16.2 percent employed by the public sector. Four years later, the private sector accounted for 80.6 percent of total employment and the public sector for 19.37 percent. One in every five persons making up the labor force of the country are working for the State (See attachment III).

The Government has tried to correct the situation, but the problems have now reached unmanageable proportions. Since February last year, when the authorities observed the first symptoms of deterioration, a contingency agreement was being negotiated with the International Monetary Fund. By June 1980 it was common knowledge that the limits set by the IMF program had been exceeded and attempts were made to renegotiate these in August. These conversations continued laboriously until March, 1981, when the IMF agreed to grant an extended fund facility agreement for three years amounting to $325 million.

In the meantime, the Government had decreed the fluctuation of the colon (partial in September, 1980, and total in December of that same year), at the same time increasing the excise and sales taxes and attempting to reduce public expenditure by setting up a budget authority with jurisdiction over the entire public sector.

None of the foregoing proved sufficient. The burden of the short- and medium-term external debt, a unanimous Supreme Court ruling declaring that the fluctuation of the colon was unconstitutional (an historic and unprecedented judgment) and, notwithstanding the efforts made to contain imports, the growing balance of trade deficit, have all contributed to make the situation untenable. The IMF Agreement, based on the expectation of additional net capital inflows, was again broken and the disbursements stopped under the extended fund facility. The Government is striving to persuade the IMF to again renegotiate. At the same time, it has in fact declared a moratorium on the external debt, while awaiting the results of Kuhn Loeb and Lehmann's efforts to secure a renegotiation from the creditors.

The preliminary report from this firm indicates that, as of July 15, 1981, that debt amounted to $322.5 million in short-term obligations and $2.3 billion in terms over one year; in other words, a total of $2.6 billion (See attachment IV, Tables 1 to 6).

Of this amount, $120.2 million is already past due, while $806.8 million, of which $510 million is principal, will mature over the next twelve months. If the trade balance deficit is added to these obligations, the total resource gap over the next twelve months will amount to $1.3 billion.

Even if the external debt renegotiation were to become a reality next month, allowing for a grace period of between 3 and 5 years obtained from the commercial banks and bilateral creditors on all principal payments, $504.6 million will still be required over the next twelve months, which together with current account balance needs amounting to $378.5 million gives a total of $883.1 million of foreign exchange urgently needed by Costa Rica in the near term.

The only way to close the gap would be through a more stringent reduction of imports, a further lowering of the standard of living and increased capital inflows from official and private sources abroad.

In the meantime, the Government has not been idle. Apart from the increase in the free rate of exchange and the subsequent decrease in imports, on September 1st the Government implemented further controls through import licenses and prohibited all imports of vehicles and capital goods, with the exception of spare parts.

---

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

Nevertheless, these measures appear to be insufficient and it is now clear that a long period of financial and fiscal disciplining is in store for this and future administrations as the economy will have to undergo far-reaching structural adjustments.

Substantial external assistance will be required if this disciplining and adjustments are to be achieved under the basic tenets of a democratic society and a market economy.

Allow me to illustrate another way the reasons why Costa Rica finds itself in the current situation. For at least four decades, Costa Rica has tried to achieve the double objective of improving the standard of living of its population while preserving its democracy. But social justice and strong, free political institutions are not easily attained within the framework of an underdeveloped country, where foreign earnings are vulnerable to declining international prices of the basic commodities and raw materials sold abroad and to soaring prices of the oil capital goods, financial resources and technology it must import.

These circumstances notwithstanding, from 1961 to date Costa Rica has achieved an excellent record in welfare indicators as shown in attachment V. Life expectancy, for instance, rose from age 61 to 68 in just 15 years. During that same period, the daily per capita intake of calories went from a below standard of less than 2,000 to a better average of 2,400.

Over a period of 24 years—from 1949 to 1973—two indicators also reflect substantial progress: the number of homes with electric or gas ranges rose from 25 to 44 percent, while the number of home owners rose from 38 to 50 percent.

Educational levels achieved by our population have long been a source of pride to the Costa Rican system: Registration in primary and secondary schools since 1960 has risen by a spectacular rate of over 320 percent (vs. an average population growth of two percent or better during the period), while the number of teachers has increased 260 percent and the number of schools 180 percent.

There are two indicators which portray our social development, the figures for electric consumption and telephone service underline the fact that the Costa Rican population has greatly benefited from economic progress. Per capita electricity consumption increased by 270 percent and although in 1960, 45 percent of the population had access to electrical service, by 1978 that percentage was 70. It should be pointed out that Costa Rica has abundant hydroelectrical resources and therefore does not need to import oil for electric generation.

In all fairness, this overall progress was too fast and too overwhelming, and perhaps one could argue that Costa Rica could not afford it. But we also have to admit that were it not for this sharing of the dividends of economic progress, Central America would have been deprived of this last functioning democracy.

The model proved its viability as long as international inflation was low, foreign resources and demand for our primary products assured us a continued net inflow of capital, and internal policies were sound and austere. But a combination of balance of payments difficulties, scarcity of foreign capital, deficit spending, oversupply of money and rising expectations of the Costa Rican people brought about by increasing social development is responsible for the current sad state of our affairs.

Few Costa Ricans disagree on what must be done. Under circumstances, we firmly believe the time has come to adopt severe and drastic limitations on public spending, plus a reduced dependence on foreign goods and adjusting our expectation to what we can actually afford. There is only one guarantee for the survival of our social and political system. If we want democracy to prevail in Costa Rica for a long time, and thus keep an option open for pluralistic societies in Central America, sound, private economic development—of the kind that has characterized our country in the last 40 years—must be allowed to flourish.

The only choice open to us at this time is to increase investments in the private sector in order to develop additional job opportunities and achieve a sustained growth. A nonprofit effort of the Costa Rican private sector aimed to promote and channel investment and capital resources to the country—known as ENADE (an acronym for National Effort for Export Development)—has been in the forming stages in the recent past. ENADE is by and large one of a very few programs so far designed with the aim of increasing production of goods marketable abroad, generating additional foreign exchange earnings so desperately needed for debt payment purposes and the continuation of an equitable distribution of wealth. BANEX, an AID-backed export bank and trading company is another Costa Rican effort with the same goals as ENADE.

Jamaica and Costa Rica are, for the moment, the only examples of Caribbean Basin countries whose democratic institutions are strong enough to provide an alternative to Marxism, terrorism or right-wing dictatorships. However, a distinction between the two countries must be made. Aside from the fact that neither Jamaica nor Costa Rica need military assistance for the time being, no other common ground exists between them. For all practical purposes, Jamaica has no influence over the Central American area, and, by the same token, Costa Rica does not have any influence in the Caribbean. Each country must, therefore, play its own role in an effort to neutralize the pressures on their respective areas resulting from the expansionist policies of the USSR and the open aggressiveness of its surrogate in the Hemisphere, Cuba. Different sets of policies must also be adopted in dealing with the social and economic weaknesses in both countries, allowing at the same time for adjustments in the differences in tradition, idiosyncrasies and political institutions.

The only hope for Costa Rica is a massive inflow of soft, long-term capital and technology, plus better access to markets in industrialized nations. We urgently need to fully develop our agro-industrial potential—a rich resource which is now practically untapped.

The ENADE group has returned to Washington with its homework done. Five months ago, ENADE was a possibility, a mere idea, presented in very sketchy form. We now have legally registered both the Foundation (FENADE) and the sister financial institution (COFEINADE). By way of example, we have selected twelve projects at the feasibility-study level to demonstrate how the ENADE concept would work. We are ready to channel financial resources immediately to reactivate the economy and help generate more employment and foreign exchange earnings.

ACOGE, as an association of entrepreneurs and business managers of long standing, can fully guarantee that ENADE does not pursue the personal interests of its members. The program we are pursuing for Costa Rica is aimed at producing a social impact with emphasis on the creation of more jobs and the redistribution of wealth.

We still believe that the answer to attacks on democracy lies in more democracy, more private enterprise, better income distribution. Militarization, repression or violence will only lead to greater injustice. We are capable of meeting the challenge of Marxism and terrorism armed with our civic resources and our traditional respect for human rights.

A New York Times article of August 19 said that while Costa Rica is generally believed to have an amateurish police force, it has in fact been unexpectedly successful so far in combating small guerrilla activity of recent origin. However, the long-term battle against destabilizing forces and Communism cannot be fought by Costa Rica alone.

Central America is in a state of revolution—with a post-revolution in Nicaragua, mid-revolution in El Salvador and pre-revolution in Guatemala. Before it is too late, Costa Rica must safeguard its model of democracy, free market economy and social justice from all contaminating influences. We are ready to accept our share of responsibility for the hardships we are enduring. The erosion of our standard of living, along with fiscal and financial discipline, are being stoically accepted by Costa Ricans. If we do not strengthen production and exports, however, it will be difficult to persuade our citizens that a free society and a market economy are consistent with sharing opportunities and progress.

Lack of substantial and timely economic support might be the one factor that could destroy our democratic structure. For the last 40 years a strong, dynamic and resourceful middle class has been emerging in Costa Rica, making it possible for the country to enjoy political stability and have confidence in the future.

Contemporary history in the Hemisphere, however, constantly reminds us that a political system based on a middle class is very vulnerable. The collapse of Uruguay, Argentina and Chile are tragic examples of the great amount of time and effort that is needed to bring back democratic institutions. With the help of our friends and by the Grace of God, I hope we can restore Costa Rica's economic health with preventive and timely medicine.●

## GARY HYMEL

### HON. E de la GARZA

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 16, 1981*

● Mr. DE LA GARZA. Mr. Speaker, during the summer we lost from our midst Gary Hymel, a key individual in the operation of the Speaker's office. For 15 years, whether working with the Speaker's office, the majority whip's office, or the majority leader's office, this gentleman has been an invaluable resource upon whom we all have been able to reliably depend for information in meeting our legislative and political needs. As Gary enters the private sector he will be sorely missed, but this definitely is an apropos occa-

sion for use of the adage our loss is their gain.

That Gary Hymel has many, many friends in this body is no secret. In fact, Gary has a knack of making friends wherever he goes. Distinguished by his unfailing consideration for others, he is the kind of friend anyone would be proud to have.

His outstanding ability is clear to all who know him or have been privileged to work with him. A man of knowledge, he has never neglected the needs of those around him and he has contributed to the dignity and effectiveness of our body by being to my mind a shining example of what a leader should be like.

He is a dedicated public servant of the highest caliber and I would like to wish him satisfaction and success in all his future endeavors as well as extend to him my commendation for his dedication to duty—dedication that relates not only to his job but also, and above all, to the best interest of his country.

His family I know is mighty proud.●

## HONORING REV. E. W. RAIMER

### HON. WILLIAM D. FORD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

*Monday, September 21, 1981*

● Mr. FORD of Michigan. Mr. Speaker, these are busy days for us in Washington. While we, in Congress, wrestle with the problems of high interest rates, balancing the budget, and defense spending, we must never forget the many constituents in our districts who serve their communities in very important ways and do not receive adequate recognition. One of these individuals is my friend, Rev. E. W. Raimer, who is being honored by his parishioners and associates at a retirement gathering in his honor on October 9.

An examination of Reverend Raimer's résumé makes one aware of his lengthy pastoral responsibilities. During his tenure as pastor of the Wayne Assembly of God, some of his other accomplishments have been:

Membership on the Citizens Advisory Council for the city of Wayne during an urban renewal program south of Michigan Avenue;

Membership on the Citizens Advisory Council for the city of Westland under (former) Mayor Tom Brown;

Membership on the Citizens Advisory Council of Canton Township;

Service as president and vice president of the Wayne-Westland Ministerial Association;

Service as chaplain at the Annapolis Hospital for 10 years;

Service on the board of directors of the Wayne-Westland Community Federal Credit Union for 27 years.

In addition to all of these responsibilities, he has served as Metropolitan Detroit youth director and the home missions representative and Sunday school representative in the southeastern section for his church.

Reverend Raimer moved to the Detroit area when he was 5 years old. As a very young man, he ministered at the Wayne County Jail, the Howard Street Rescue Mission, and the Detroit Rescue Mission. In 1940, he married Nellie Wajda and they have been blessed with four fine sons and five grandchildren.

It has been a privilege to work with Reverend Raimer, and I am proud to call this marvelous man to the attention of my colleagues in the House of Representatives. The 15th District is privileged to have many outstanding residents, but certainly Reverend Raimer must be one of those on everybody's top list.●

## HON. CATHERINE DORRIS NORRELL

### HON. CLEMENT J. ZABLOCKI

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

*Monday, September 21, 1981*

● Mr. ZABLOCKI. Mr. Speaker, I deeply regret that I was unable to participate in the special order reserved on Tuesday by the distinguished gentleman and leader from Arkansas (Mr. ALEXANDER) to honor the memory of the late Honorable Catherine Dorris Norrell, former Congresswoman and outstanding public servant from that great State.

I had the privilege of serving with Mrs. Norrell in the 87th Congress, as well as with her husband before her, the late William Frank Norrell, who was a distinguished Member of the House from 1939 until February 1961.

Mrs. Norrell was an able and popular successor to her husband as a Member of this body, but she was also a talented and impressive individual in her own right. Her record as a legislator, an educator and musician, and as a Deputy Assistant Secretary of State is one of considerable achievement and distinction.

Aside from her official positions, however, Mrs. Norrell was a strong and effective local leader, who was active in church and community affairs. She was, I am informed, the first woman to be elected deacon in the Baptist Church of Hawaii, while serving as Director of the U.S. Department of State Reception Center in Honolulu, and she was also a member of numerous business, professional and charitable organizations.

To her surviving daughter, Julia J. Norrell of Washington, D.C., and her many friends and admirers from all sections of the country, I wish to express, albeit belatedly, my deepest sympathy as well as my highest regard for her dedicated service to her district, her State, and the Nation.●

## DEPARTMENT OF AGRICULTURE'S OFFICE OF THE INSPECTOR GENERAL

### HON. E. THOMAS COLEMAN

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

*Monday, September 21, 1981*

● Mr. COLEMAN. Mr. Speaker, today I am introducing a bill that will give certain powers to the criminal investigators in the Department of Agriculture's Office of the Inspector General. My bill will permit these investigators, subject to regulations to be issued by the Secretary of Agriculture, to carry firearms, to make arrests without a warrant for any criminal violation of statutes administered by the Secretary of Agriculture committed in the presence of these investigators, to search the premises and seize evidence when making such arrest and to execute a warrant for the arrest, the search of the premises or the seizure of evidence.

Over the past several years the Department of Agriculture's Office of the Inspector General's workload of major criminal investigations has increased. Many of its investigations concern the food stamp program and the participation in this program has also markedly increased. In 1971 this program cost $1.6 billion. In 1981 it is estimated that the food stamp program will cost $11.5 billion. As the cost of the program increased, the criminal violations also increased. The Office of the Inspector General's criminal investigators began working undercover, developing informants, conducting surveillance of criminals and participating in searches and arrests.

It is charged with the responsibility of conducting investigations relating to the programs administered by the Secretary of Agriculture, one of which is the food stamp program. Some of you may have seen the recent national television program in which criminal activity in the food stamp program was exposed. Much of the film used on this program was obtained from the Office of the Inspector General and detailed the type of undercover operations it conducts. If you saw this program you can appreciate the dangerous situations in which these criminal investigators are placed—unarmed—dealing with criminals who usually are armed. These criminal investigators work closely with the U.S. attorneys and local law enforcement officials. However, it is often apparent, as with any undercover work, that immediate arrests should be made. I understand that many U.S. attorneys have asked

these criminal investigators to make these arrests and have expressed their concern that the investigators are unable to do so.

I believe that these criminal investigators should have certain limited law enforcement authority. Let me emphasize limited law enforcement authority. I also believe that they must continue to work closely with the U.S. attorneys and local law enforcement officials to insure coordinated efforts to combat criminal activities in the food stamp program and other programs administered by the Secretary of Agriculture.

In 1981 approximately 600 indictments have been returned for food stamp trafficking, based on the investigations of the Office of the Inspector General. Just last week 40 people were arrested or indicted as a result of a large-scale investigation in southeastern Virginia into criminal activity in the food stamp program. These arrests and indictments were a result of the efforts of the Office of the Inspector General working with the U.S. attorney and local law enforcement officials throughout the Tidewater area.

These criminal investigators undergo basic criminal investigative training at the Federal Law Enforcement Training Center in Georgia. They are classified as criminal investigators. They are qualified to conduct these investigations; however, they do not have the basic law enforcement authority afforded other investigators with similar responsibility.

This bill will give them this authority. The Secretary of Agriculture will issue the rules and this authority can be used only when the investigators are engaged in the performance of their official duties.

I urge you to support this bill, to give these criminal investigators within the Department of Agriculture's Office of Inspector General the authorities commensurate with their responsibilities.●

## TRIBUTE TO ANTONIE BREDEMEYER

### HON. CLARENCE J. BROWN

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

*Monday, September 21, 1981*

● Mr. BROWN of Ohio. Mr. Chairman, today I wish to call to the attention of my colleagues a special tribute to Mrs. Antonie Bredemeyer, a great supporter of the causes of the mentally ill in the State of Ohio. She fought hard to insure the rights of those who could not fight for themselves; she spoke in behalf of those whose voices otherwise would not be heard. The concerns of the mentally ill were her concerns, and she never forgot them.

As a former chairman of the Clark County Mental Health Board—the only person to ever hold that position for a period of 3 years—Mrs. Bredemeyer was a guiding force behind the county's efforts to seek a Federal community mental health grant in the midseventies. She directed her considerable talents toward achieving the goals of deinstitutionalization and assuring equal access to quality mental health care in the community.

Having sacrified considerable career opportunities in her homeland of West Germany in order to accompany her husband Hans to the United States, Toni fought selflessly, for the rights of the mentally ill in my district and the State of Ohio.

On September 28, 1981, the members of the Clark County Mental Health Board and several of her peers in the mental health community, will dedicate the broad conference room in memory of Toni Bredemeyer and her efforts on behalf of the mentally ill. I know that I speak for all those who knew Mrs. Bredemeyer when I extend our sincere sympathy to her husband Hans and their daughter Kara.●

## PROFESSIONAL CAREER AND FAMILY LIFE

### HON. THOMAS J. DOWNEY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Monday, September 21, 1981*

● Mr. DOWNEY. Mr. Speaker, one of the most difficult questions in contemporary American life is that of reconciling family and career. While most of us give first priority to our families in the abstract, when it comes to specific allocations of time many Americans instinctively give first priority to their work, particularly if husband and wife are both involved in challenging and demanding professions.

Recently I had the pleasure of meeting Randy and Michael Wertheimer, and observing their splendid way of handling the problem. Both are physicians in hands-on patient-care specialties. Yet they have decided to give first priority to their children and, by careful planning and determination, have been able to stand by this decision without impairing their careers. It has not been easy or painless, but it has worked.

Their story appeared recently in the University of Massachusetts Medical Center magazine, which I now insert in the RECORD:

REDEFINING ROLES

Randy and Michael Wertheimer met at Swarthmore College. Since then, they have married, graduated from medical school, completed medical residencies, accepted faculty appointments at UMass, and become the parents to two beautiful children.

What makes this couple stand out is not that both are physicians, but that in thirteen years of marriage, they have created a lifestyle which imbues both work and family with equal value.

When the Wertheimers first met, Randy was a college freshman and Michael a senior. Four years later, they married. By then, Michael was a graduate of the University of Pennsylvania Medical School and had accepted a residency in surgery at Beth Israel Hosptial in Boston. Randy had a B.A. in art history which she set aside to enter medical schoool at Boston University.

When Michael came to UMass Medical Center to complete his surgical residency (he is now an Assistant Professor of Surgery and of Family and Community Medicine and Assistant Dean of Student Affairs), Randy came to join the UMass Family Practice Residency Program.

"Luck was with us. Finding compatible positions can be very tricky, and I'm sure if I hadn't been accepted at Boston University and later at UMass, there would have been some serious problems to solve," Randy says.

At the end of Randy's first year as a Family Practice resident, Rachel was born, to be followed two years later by Benjamin. "It took me four years to complete a three-year residency program."

Although Randy was the first resident to attempt a flexible program schedule which would accommodate both family and medical training, she has not been the last.

"With great difficulty, it can be done." Randy, now on the staff of the Hahnemann Hospital Family Health Center in Worcester, feels strongly that this type of flexible arrangement should be encouraged not only for women in medicine, but men as well. "People should not be penalized for time spent with their families."

"This is a very serious issue," Michael points out. "The usual role model is the woman who decelerates her career during childbearing. Medicine relates in a serious way only to 'one hundred percenters.' I can't accept that standard. I want both a full professional and a full family life."

Although she knew what demands it would make on her time, Randy was interested in family medicine from the moment she entered medical school. "It really excited me. I love delivering the baby, the following through with the whole family. The obstetrical part of family practice adds more uncertainty to the work schedule, with guaranteed middle-of-the-night deliveries, but I would never give it up."

Michael, as a surgeon and a member of the Medical Center's trauma team, is also frequently on call, but he and Randy have been able to balance their obligations so that one or the other is with the children most of the time.

"Many of my colleagues find it hard to relate to my lifestyle; it's hard for them to understand the relationship I have with my family. It imposes an enormous amount of extra pressure, but it can be done, and it's worth it," Michael explains.

"I had to learn that I can't do everything," Randy says. "I strongly wanted us to take care of ourselves. I feel that's important in grounding you and making you feel attached to things and each other. But I know now if I use up the little time I have running to the stores and scrubbing floors, there will be no quality time left at home."

For both Randy and Michael, having children has meant a shifting of priorities. "During Randy's residency, she often had night calls and I spent those nights at home with Rachel. She comes with me on Satur-

days sometimes when I make rounds, and she's made many trips to the emergency room in her pajamas.

"Free time away from work is spent with the kids," Michael adds. "We do things as a family and with other families. What time we have with the children is very precious and we won't give it up for anything."

Michael feels that most fathers never get that kind of quality time with their children, that for many men, parenting is secondary, an hour at home in the morning and another at night. "That's simply not enough for me. On a difficult day, I'll rush home, organize dinner, let the sitter go, feed, bathe and diaper the baby, and then spend time with the children before I put them to bed. The asset of that would be an incredible primary relationship with my children."

Randy and Michael are convinced that at least for Rachel's first year of life, they were interchangeable as parents. "That's a special thing to me," Michael says. "I needed to do this then. I want to do it now. Perhaps I wouldn't have written the script this way ten years ago, but I can tell you I'm happy and fulfilled in my career and have an extraordinary family life."

Of course, to make it all work, Randy and Michael have to have some very good and reliable sitters. "And, all of this leaves very little time for anything but work and children right now," Randy points out.

Michael does not want to give the impression that these choices have been without significant stress. "It would be dishonest of us not to paint a clear and balanced picture of what this all means. It is not the norm and may be considered by some to be eccentric."

According to the Wertheimers, the pressure to succeed professionally as teacher, researcher and physician does not diminish, rather another dimension is added, the pressure to succeed as parents.

"Balancing these things and doing well at all of them is a continuing source of difficulty, uncertainty and guilt," Michael points out. "The dilemma of choosing between competing demands, each of which is equally desirable, isn't resolved without pain. . . . It is like the juggler forever working with five or six balls, losing contact with some of them for periods of time, but trying desperately not to lose control over any of them."

Michael and Randy point out that to make it work one has to be incredibly efficient and highly organized.

Although the Wertheimers recognize that many dual-professional couples have solved their scheduling problems by hiring someone full-time to care for the children, they do not consider this an acceptable solution for them.

"Sure I'd like to go to the Y more," Michael admits. "But this is a conscious decision I've made. I really enjoy immensely this 'little kid' stage. And it's very limited—just five years or so—Rachel is already three."

Michael is sure they're not alone. "More articles like this, which talk about the male side of the issue, will help to legitimize it, and perhaps medical centers will begin to develop support systems and attitudes which make the choice a little easier."

"It's time that institutions began to put a premium on family life and child rearing," Randy says. "We need a different role model for women in medicine that includes motherhood and family."

"We also need new role models for men," Michael adds. "We have to start from scratch . . . eliminate defined roles and move into more interchangeable roles. And it won't be easy because most men don't even recognize the problem. The nurturing role is, in the end, the essence of the physician's role as 'care giver' and what better training for this role than parenting."●

## ROY WILKINS

### HON. DON J. PEASE

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 15, 1981*

● Mr. PEASE. Mr. Speaker, America has lost a great leader with the death of Roy Wilkins, an individual who pioneered the Nation's oldest and largest civil rights organization—the NAACP.

Roy Wilkins survived harsh criticism and hostility from opponents who were enraged by his leadership in the battle for equality of opportunity for all Americans. He outlasted the attacks directed at him by some militants who thought of him as out-of-date and ineffective. Most importantly, he was tireless in pursuit of the betterment of American society.

We should remember Roy Wilkins for his contributions toward renunciation of the "separate but equal" doctrine by the U.S. Supreme Court in the case of Brown against Board of Education and toward enactment of the 1964 Civil Rights Act. These achievements bear witness to his steady leadership and outstanding public service.

With the silencing of Roy Wilkins, we have lost a great man, true of faith and strong in leadership, who lived for the sake of us all.●

## IRRESPONSIBLE SECRETARY OF INTERIOR

### HON. DON EDWARDS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Monday, September 21, 1981*

● Mr. EDWARDS of California. Mr. Speaker, along with growing numbers of my colleagues and citizens throughout the country who care about the future of our environment, I join in opposition to the manner in which Secretary Watt has been using his position as Secretary of the Interior to exploit the natural resources of our great land.

I have worked with both Republicans and Democrats, liberals and conservatives, in opposing Mr. Watt's efforts to reopen the four northern basins in Outer Continental Shelf Lease Sale 53, a move which clearly overstepped the Federal authority which has been carefully laid out by Congress. In the face of the outraged outcry from State and local officials, and the California business community, the Secretary, with great reluctance, was compelled to retreat from his plans.

However, the Department has now issued its new plans for the OCS 5-year schedule. Mr. Watt has shifted radically from the carefully thought-out plan of former Secretary Cecil Andrus. Mr. Watt now proposes a new basin-wide program encompassing every tract in the lease sale. His logic is that by allowing oil companies to develop gas and oil products everywhere off the coast, regardless of possible harm to the fishing industry, tourism, or the environment, more energy will be produced for the Nation.

When the Congress approved the OCS Act of 1977, careful steps were taken to include the States in the deliberation of the leasing program. While recognizing that oil development must occur, the act was meant to insure that all development must be undertaken carefully to provide maximum protection to the environment. That is the law.

Under Mr. Watt's 5-year plan, it will be impossible to collect the environmental data needed for leasing simply because the area is too large for State and oil industry personnel to handle. Companies are not going to know whether it is worth their money to bid on particular tracts. A tremendous amount of litigation will arise and in fact the entire process of leasing OCS lands for energy development is going to slow down. Even the oil industry has criticized Watt for moving too fast. There is not going to be more energy production—instead, Mr. Watt is leading us down the road to no energy production.

The world is not going to change overnight. We have worked long and hard to see that a balance is struck between the protection of the environment, our clean water, our clean air, and our energy resources. Let us not turn our backs on these responsible and worthwhile goals by the frantic call of our irresponsible Secretary.●

## QUICK ACTION NEEDED ON MILK LAW

### HON. PAUL FINDLEY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

*Monday, September 21, 1981*

● Mr. FINDLEY. Mr. Speaker, Friday the Senate passed a farm bill that more closely reflects the limitations we have placed on the agricultural functions of the budget. It is unclear, at this time, when the House will consider this legislation, or even which bill we will consider; however, it is essential that we move quickly, with an eye on the budget.

This is particularly true in the case of milk.

Passage of a farm bill by September 30, permitting the Secretary of Agriculture to set dairy prices at 70 percent to 90 percent of parity, is crucial to the economic well-being of the American consumer, as well as the success of the administration's economic recovery program. Unless this legislation is approved, milk support prices will be mandatorily and unnecessarily increased, thereby contributing simultaneously to higher food prices and greater Federal deficits.

The milk support program was originally established by the Agricultural Adjustment Act of 1949. This measure authorized the Secretary of Agriculture to set support prices between 75 percent and 90 percent of parity, the specific level to be determined on the basis of the price necessary to balance supply and demand conditions. The 1949 act worked reasonably well, but was amended in 1977, which has resulted in large dairy surpluses. The basic flaw in the 1977 farm bill was that it decreased the Secretary of Agriculture's discretionary authority. The bill mandated a support price not lower than 80 percent of parity and required semiannual price adjustments. The net effect of this legislation was to increase milk support prices more than the cost of production and even faster than the consumer price index.

The 1977 act expires on September 30, and unless the law is changed, the provisions adopted in the Omnibus Budget Reconciliation Act will prevail. This measure requires the Secretary of Agriculture to set support prices between 75 percent and 90 percent of parity, and mandates semiannual price increases effective April 1, 1983. The Secretary would be allowed to set support prices at the 75-percent minimum only when the following year's CCC net purchases are estimated to be greater than 5.5 billion pounds of milk equivalent.

When purchases were expected to be smaller than this amount, a sliding scale would require the price to be increased by 1 percent of parity for each 500 million pound decline in anticipated purchases. When purchases are estimated to be below 1 billion pounds the mandatory minimum support price would be 85 percent of parity. Basically, these are the proposals for the farm bill adopted by the House Agriculture Committee. They were incorporated into the Omnibus Budget Reconciliation Act. It is now the law of the land and will remain so for the next 4 years unless it is changed by the farm bill.

If present law is left intact, Government outlays for the dairy support program will total about $2.2 to $2.8 billion next year. Additionally, consumers will pay approximately three-quarters of a billion dollars in unnecessarily higher prices for dairy products. Thus, the total—Government and direct cost to consumers—will be about $3 to $3.5 billion.

This year the Government purchased about 9 percent of the dairy farmer's production. Next year, production is expected to greatly outpace demand for dairy products. Thus, Government support will increase above its already burdensome levels.

Currently, the Government is holding 765 million pounds of nonfat dry milk, 440 million pounds of butter, and 545 million pounds of cheese. This translates into over 1 years' commercial use of powder, 6 months' worth of butter, and the equivalent of 1½ months' commercial use of cheese. Storage space is already critically scarce and expensive. To unload the stock, CCC is selling these surplus goods at distressed prices to foreign countries and for animal feed uses. All of this at a time when we are supporting an administration in the White House committed to reduced inflation and lower Government spending.

To help bring supply and demand back into line, the administration is supporting a bill which would provide the Secretary with the discretion to support prices between 70 percent and 90 percent of parity, and if CCC expenditures exceed a certain level, to set support prices below 70 percent of parity. The Senate has adopted this provision. Those who have supported the President in his tax and budget-cutting programs must consider the economic importance attached to this issue. It cannot be categorized as a profarm or antifarm issue—but rather as a realistic effort to both protect the consumer from unwarranted food price hikes, and to uphold the cornerstone of the adminstration's policies—reducing unwarranted Government expenditures. According to recent cost studies, at 70 percent of parity, dairy farmers would still be assured of support prices which equal or exceed their cost of production.

Congress must act quickly to pass the farm bill, incorporating the administration's dairy support provisions. Therefore, I urge my colleagues to join me in supporting the dairy provisions in the farm bill passed Friday by the Senate.●

## SOVIETS DISSIDENTS

### HON. WILLIAM F. GOODLING

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

*Monday, September 21, 1981*

● Mr. GOODLING. Mr. Speaker, when Secretary of State Alexander Haig meets with Soviet Minister Andrei Gromyko we on Capitol Hill would like Secretary Haig to make known American disquietude over Soviet dissidents whose only crime is to express a desire for such basic liberties as freedom of expression, the right to practice the religion of one's choice, or to emigrate. For this reason, I have cosigned two letters urging Secretary Haig to bring up the issue of Soviet treatment of dissidents to Gromyko. The first letter, written by Congressman FISH of New York, deals with a number of dissidents, including physicist Andrei Sakharov, Anatoly Shcharansky and Ira Nudel, as well as lesser known dissidents Victor Brailovsky, Vladimir Kislik and Kim Fridman, who were recently tried and condemned for their attempts at free expression. The second letter, written by Congressman FRANK of Massachusetts, centers on Anatoly Shcharansky. We all know the shocking story of Shcharansky's imprisonment hours after his marriage, and of his wife's subsequent deportment. Now Mr. Shcharansky's health is reported to be deteriorating daily, so that his life may well depend on whether or not he is released—for which reason his is one of the most pressing cases. Shcharansky, like Ira Nudel, suffers because he is Jewish and wishes to emigrate to Israel.

The resolutions presently before the House concerning Anatoly Shcharansky, Yuri Badzyo, and Yurij Shukhevych are of primary importance. It is absolutely pertinent that President Reagan remind the Soviets of their human rights obligations under the Helsinki agreement, as well as the U.N. Charter; the administration is noted for taking a tough stand vis-a-vis the Soviet Union, let it be especially tough on this important issue.

As for the Soviets, if they seriously want to open another phase of the SALT process, then let them make a gesture of good faith. Let them put into effect the human rights provisions of the Helsinki agreement which they signed and swore to uphold. When the leaders in the Kremlin allow Shcharansky to rejoin his wife in Israel, when Ira Nudel and Andrei Sakharov are allowed to join their relatives in the West, and when Badzyo, Shukhevych, and the other dissidents in Soviet prisons and mental institutions are released, then we in Washington will know that the Soviets are ready to come to meaningful agreements in military and economic sectors.●

## A-95 A VALUABLE TOOL

### HON. LES AuCOIN

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

*Monday, September 21, 1981*

● Mr. AuCOIN. Mr. Speaker, the concerned county commissioners of Polk County, Oreg., have alerted me that HUD Secretary Pierce has requested an exemption of all HUD programs from circular A-95 of the Office of

Management and Budget. I have determined that OMB is seriously considering adoption of this request.

The A-95 circular review procedure provides State and local officials the opportunity to participate in the review of proposed Federal grants and projects. Through this intergovernmental communications process, A-95 has proven to be a valuable tool for assessing local needs, coordinating resources, and preventing waste or duplication of government services. I am amazed that an administration which trumpets the philosophy of bringing the government decisions "closer to local people" is now attempting to slam the door on local government.

At a time when greater responsibility is being placed upon State and local governments, information of the sort produced by the A-95 process is crucial. At a time when all appropriations—including those for housing assistance programs—are minimal, it is more necessary then ever to insure that funds are utilized in the most effective way.

An old carpenter once told me: "Never tear down a wall until you know why it was built in the first place." In its zeal to cut and eliminate, the administration may be about to make this mistake. A-95 is not some ineffective, inefficient bit of bureaucratic redtape. I urge the administration to preserve the review, and to differentiate between rules which truly improve the quality of programs, and those which are indeed ineffective and burdensome.●

## A MORE EQUITABLE COST-OF-LIVING INCREASE FOR FEDERAL EMPLOYEES

### HON. STAN PARRIS

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

*Monday, September 21, 1981*

● Mr. PARRIS. Mr. Speaker, today I am introducing legislation that would give Federal employees a 7.55-percent pay increase in place of the 4.8-percent increase that has been requested by the President. This increase would request exactly one-half of the 15-percent increase transmitted to the President by his own pay agents.

In recent months, our former and current Federal employees have been the target of many budget reduction activities. Federal retirees have had their biannual cost-of-living allowances reduced to once a year and there have been attempts to reduce benefits under the Federal employees health benefits plan and the Federal Employment Compensation Act. Although I trust that further consideration of the possible merger of the Federal civil service retirement fund and the social security trust funds have been abandoned, there remains the possibility that it may be reconsidered in the future. Many thousands of Federal employees are now caught up in the reduction-in-force process which is having a devastating impact on their careers and the well-being of their families. Together, these actions are lowering the morale and expectations of those individuals who have contributed so greatly to our Nation.

On top of all these hardships and instability, Federal employees are now being asked to sacrifice even more by accepting a pay increase far too low to have any significant impact. The President's own pay agents have reported that Federal employees should receive at least a 15.1-percent pay increase.

As many of my colleagues know, I am dedicated to improving the Nation's economic condition. I believe that Government spending must be carefully controlled and Federal taxes reduced. I also believe that Federal employees, who like all Americans are reeling from the impact of soaring inflation and high taxes, agree with me that this Nation's economic policies must be altered if we are to avoid financial disaster in the future.

However, we must insure that whatever actions must be taken to restore this Nation's economic vitality must be taken in a way that does not disproportionately affect one segment or group of citizens. I believe that a 4.8-percent pay increase for Federal employees in addition to the other sacrifices they have been required to make, it unfair. We are asking the Federal worker to contribute to and bear an unequal burden in an effort to reduce Government spending and lower fiscal deficits.

If we want to attract and retain qualified and competent individuals to serve our Nation, we must provide them with realistic salary increases. In the interest of effective and efficient Government, I urge my colleagues to support this measure and allow Federal employees a 7.55-percent pay increase.●

## FUENTES: SALVADOR'S OPPOSITION

### HON. GERRY E. STUDDS

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

*Monday, September 21, 1981*

● Mr. STUDDS. Mr. Speaker, the Governments of France and Mexico recently issued a statement which recognized the fact that those actively in opposition to the present Government of El Salvador now constitute a representative political force within that country. Yesterday, the noted Mexican writer Carlos Fuentes commented on this initiative in an article which appeared in the New York Times. Given the importance of this subject, and also given the eloquence and persuasiveness of Mr. Fuentes, I believe it is appropriate to bring this article to the attention of my colleagues:

[The New York Times, Sept. 16, 1981]

SALVADOR'S OPPOSITION

(By Carlos Fuentes)

MEXICO CITY.—When President José López Portillo of Mexico and President Reagan meet in Grand Rapids, Mich., on Friday at the opening of the Gerald R. Ford Library and Museum, the explosive Central American situation will have changed substantially since their last meeting, in Washington in June. The new factor is the joint Franco-Mexican declaration, issued Aug. 28, recognizing the opposition in El Salvador as a "representative political force."

The document, presented to the United Nations Security Council by Foreign Ministers Clause Cheysson of France and Jorge Castañeda of Mexico, has been denounced at "interventionist" by nine Latin American countries, among them Venezuela, a democracy, and Chile, a brutal dictatorship.

But here in Mexico City, public opinion is reasoning that the Salvadoran opposition—both the guerrillas of the Farabundo Marti National liberation Front and the political leadership of the Democratic Revolutionary Front—already have been given a powerful representative role by the militant policies of the Reagan Administration.

Washington's approach could internationalize the Salvadoran conflict by turning it into an East-West confrontation. But while this is only a potential danger, genocide has become an everyday occurrence: 25,000 Salvadorans have died, and it is not peace that is at hand but rather the prolonged horrors of a stalemated civil war in which the army and death squads murder indiscriminately while the ruling military-civilian junta desperately asks Washington for more and more military aid.

The Franco-Mexican initiative serves two immediate purposes. First, it deliberately creates a situation in international law that permits invocation of the Geneva convention for the protection of combatants in cases of civil strife and the application of a policy of neutrality toward all the parties in the conflict.

To argue that Mexico and France are intervening in El Salvador by asking everyone not to intervene is pure nonsense. But to argue that the junta has invited the United States to furnish it with arms and money, thus legitimizing United States intervention, is to evoke the parallel ghosts of Afghanistan, Czechoslovakia, and Vietnam. It might even incite a symmetrical Soviet action in Poland.

Since the Reagan Administration has cast the Salvadoran conflict in East-West terms, both the genocide and prospect of internationalization legitimately worry Mexico and France.

As for its second purpose, the joint document foresees, with reasonable hope, that the Salvadoran people are capable of comprehensive political negotiations that would both restructure the armed forces and create proper conditions for free elections.

The Franco-Mexican declaration seeks to open a realistic democratic process that cannot begin with elections but rather must recognize that without a previous negotiation process, the planned elections for a

constitutional assembly next March will be a sham.

Who will participate in elections under the shadow of the unregenerate army and security forces that only last winter murdered the top echelon of Democratic Revolutionary Front leaders and that in 1972 deprived President-elect José Napoleón Duarte and Vice President-elect Manuel Guillermo Ungo of their legitimate victories at the polls? President Duarte and Mr. Ungo, who now heads the Democratic Revolutionary Front, are rivals. Why should the army respect in 1981 what it so wantonly disregarded in 1972?

The present course of events in El Salvador will lead to large-scale extermination. The triumph of the extreme left in the field would provoke an extreme reaction by the United States, thus inviting even more merciless repression; the triumph of the extreme right would perpetuate uncontrolled genocide.

Presidents Lopez Portillo and François Mitterrand have acted to avoid all these extremes. They offer Mr. Reagan the opportunity to give up his phantasmagorical argument of Communist intervention.

El Salvador's representative forces are now recognized by two countries with close political, economic, and diplomatic ties to the United States. Neither France nor Mexico want a Sovietized regime in El Salvador but neither do they want a United States protectorate that is fated to suffer relentless violence. Their proposal would lead to a social democratic republic that is attainable only if the rights and duties of the opposition are recognized along with the social and economic causes of the Salvadoran upheaval, thus creating conditions for the implementation of a comprehensive democratic process.

Real friends are independent friends who speak truthfully and propose intelligent, even if difficult, solutions. Mexico and France have offered the United States a way out of the swamp. Mr. Reagan should seize the opportunity. Michigan is a good place to do it, and, since Prime Minister Pierre Elliott Trudeau of Canada also will be present, it might be a good time to demonstrate that in the Western Hemisphere, the United States prefers its friends to its satellites.●

## THE CRISIS IN THE EUROPEAN STEEL INDUSTRY—WRONG DECISIONS AND DISTORTIONS OF COMPETITION

**HON. JOHN L. NAPIER**

OF SOUTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

*Monday, September 21, 1981*

● Mr. NAPIER. Mr. Speaker, as we race hurriedly toward the 21st century, there are several economic factors which are being formed now which will weigh heavily on the entire world. We have already witnessed a major transformation in the energy situation worldwide and watched as that crisis created a ripple effect in all other segments of the world economy.

One industry I would like to focus attention upon today is the steel industry, especially the European steel industry. As the world population continues to expand and the gross national product increases, there will be a continued increase in worldwide steel consumption. This fact has been rather eloquently described in a recent speech by Dr. Willy Korf, president of Korf-Stahl AG, Baden-Baden to the Frankfurt branch of the German-French Association and the Bank für Gemeinwirtschaft AG, Frankfurt.

Korf Industries is the mother company of Georgetown Steel, which is located in my district in South Carolina. I believe it is instructive to review European thought on this timely subject.

I commend Dr. Korf's remarks to my colleagues.

Ladies and Gentlemen, after seven years' duration the "crisis in the European steel industry", the subject of my address today, has now reached a climax.

Not a day has passed in recent weeks without a report appearing in the press on our industry's critical situation and possible solutions (some of them wishful thinking) being discussed. These articles carry headlines such as "extension of crisis article 58", "voluntary quota agreement through EUROFER II", "revision of subsidization code", "equalization levies or import quotas on subsidized steel from EEC countries", etc.

In these circumstances, an outsider could well ask (and with justification) why this industry has been going through a period of crisis for so long and why advantage is not taken of the cartels prescribed by the EEC Commission or the opportunities of forming cartels offered (something other industries can only dream of) in order to tackle the problems.

One point must be made clear in this connection: there is no such thing as a worldwide steel crisis, nor has there been one in recent years. The problem is without doubt a European one, with its own specific causes. This is evidenced by the fact that Japan and the USA, the major steel producing countries apart from Europe, achieved substantial profits in 1980. Despite a 16.4 percent decline in sales as against 1979, the US steel industry as a whole showed a profit after taxes of $1.6 billion or a cash flow of $3.5 billion (after depreciations of $1.9 billion). This is a remarkable result in a year when the US steel industry experienced its worst sales crisis for many years; at times plants were only operating at 50 percent capacity.

In order to get a better grasp of the steel industry's situation let us review its historical development.

In the traditionally industrial countries like the USA and Europe, especially Germany, industrialization really began with the foundation of the iron and steel industry in the 19th century. On the basis of local iron ore and/or coal deposits, blast furnaces were built with integrated steelworks and foundries, and related mechanical engineering enterprises were established. In the course of time large conglomerates grew up known as "heavy industry" which dominated the industrial scene for over a century and up to about 50 years ago accounted for around 80 percent of total industrial turnover. It was, therefore, not surprising that the steel industries and their managers regarded themselves as the economic overlords, the more so since steel used to be even more important in the manufacture of arms and hence of greater political significance than it is today.

The result of this monopoly status was that the steel industry failed to become competition-oriented; it was accustomed instead to allocating its products. As soon as marketing problems arose in times of economic crisis, the immediate reaction—at least in Europe—was to form cartels to deal with the crisis.

The importance of the steel industry for the overall economy has been considerably diminished by the new industries which have emerged since the Second World War, e.g. the aircraft, computer, chemical and electrical industries.

The steel industry's share of total industrial sales in the highly developed countries has thus fallen to 8–10 percent, but most steel industrialists still think they carry as much weight as their counterparts did 50 years ago.

Viewed in terms of the number of people employed, the steel industry also ranks far behind other sectors in importance today.

In 1980, for example, the employment figures in West Germany were:

| | |
|---|---|
| Mechanical Engineering Industry | 1,000,000 |
| Electrical Industry | 975,000 |
| Automobile Industry | 800,000 |
| Chemical Industry | 567,000 |

while the comparable figure for the steel industry was 284,000. The situation in the other EEC countries is similar.

Another consequence of the sector's inflexibility was that no significant technological innovations were made; the blast furnace has remained the chief method of extracting iron from ore for the last 150 years. The modern oxygen converters are merely more sophisticated versions of the old Thomas or Bessemer steelworks, the only difference being that all the units have increased in size, reducing the enterprises' potential for flexibility.

All the key developments such as continuous casting, direct reduction and the modern electric arc furnace technology originated either in pioneering small steel companies or in non-steelmaking enterprises.

If we look back at the situation in the Western World after the Second World War—say in 1950—the only important steel industries (consisting almost exclusively of large enterprises) were the U.S. and European ones, which operated in closed markets and supplied the rest of the world with exports.

There have been some major changes since then. For example, world steel production rose from just under 200 million tons in 1950 to over 700 million tons in 1980, i.e., in the space of only 30 years. In Japan a whole new steel industry with a capacity of over 120 million tons per year has grown up, meaning that today Japan produces the same amount of steel as the U.S., Europe, or the Soviet Union (as against five million tons in 1950).

The Japanese achievement shows that it was altogether possible to build modern, competitive steel industries in the Western World in the last 25 years, even when 90 percent of the raw materials required—i.e., iron ore and coal—have to be imported, as is the case in Japan.

Furthermore, developments in the field of electric arc furnace technology together with continuous casting methods have led to the birth of a completely new type of steelworks—the so-called mini steel plant. This permits the efficient production of steel from scrap or direct reduced iron in small production units. Suddenly steelmaking facilities no longer needed to be so gigantic. Worldwide there are now 300 mini

steel plants with a total capacity of 100 million tons, which achieve relatively better operating results than the huge integrated steelworks.

Another development in the last 20 years has been the establishment of steelworks in developing countries, whose industrialization programs are based on steel, just as ours once were. Brazil is a typical example, with a production volume of 14 million tons last year.

Let me now return to the crisis in Europe and comment on its causes, the numerous wrong decisions that have been taken and the distortions of competition that have persisted for many years.

The wrong decisions can be traced back primarily to the desire of many European governments to nationalize the major part of their large steel industries, as happened e.g. in the United Kingdom and Italy, or to their practice of reducing steel enterprises to a state of dependence by granting subsidies or government loans (e.g. France and Belgium). At the present time, 70 percent of all the steel companies in Europe are dependent on the state or on their governments.

As a result European steelworks made losses running into billions of dollars which were financed by their national governments by means of subsidies or loss takeovers. This situation is still going on and is, if anything, worsening. According to a German Steel Association survey, the subsidies paid since 1975 and promised up to 1983 total DM 60 billion—an unbelievable figure, which ought to be causing the finance ministers of the countries involved some concern.

It would appear, however, that political considerations, with respect to the loss of jobs have caused all economic caution to be thrown to the winds, which is a crucial mistake, since this trend is resulting in greater and greater distortions of competition and increased tension among the Common Market countries.

We have succeeded in Germany in restructuring and modernizing the steel industry by our own efforts and (almost) without any state aid. Since the emergence of the last steel crisis in 1975 the German steel industry has cut it work force by 50,000 without producing any strikes or social unrest. In any case the German steel industry's present structure enables it to complete with the world's most cost-effective producers. It cannot compete, on the other hand, with the combined forces of most of Europe's taxpayers, who subsidize their steelmakers to the tune of up to DM 150.—per ton. Even with the most modern facilities and an average sales price of DM 650.—per ton of ordinary steel, it is impossible to make up for an advantage of this kind.

Since I am addressing a meeting of the German-French Association it seems appropriate to trace briefly the development of the French steel industry from private ownership to nationalization.

When the Vth Republic was founded and General de Gaulle came into office in 1958, there were roughly 20 private steel companies operating independently of one another in France. These included such celebrated names as De Wendel, Sidelor, Knutange, Hayange, Neuves Maisons-Chatillon-Commentry etc. These enterprises benefited from the economic upswing in Western Europe along with all the other European steelworks, i.e., they sold their products not only in France but also exported them to the other countries belonging to the European Coal and Steel Community. This was set up in 1951 and permitted the duty-free exchange of steel products among the member countries.

De Gaulle's administration was anxious to boost and stabilize the French economy after the political confusion of the IVth Republic and especially to curb inflation. It therefore determined high-handedly the prices of various products—including steel—and controlled them, thus keeping them artifically below the true international market price and causing the companies concerned a loss in earnings. The French plants were compelled under the non-discrimination provisions of the ECSC Treaty to sell their steel in Germany and elsewhere in Europe at the same low prices as in France. This was very agreeable for the German steel consumers, which included my wire plant in Kehl at that time, especially in competition with the German steel companies. The result of this situation for the French steel mills was, however, that they did not earn sufficient money to create reserves and modernize their plants.

By the mid-1960's this emaciation process had advanced so far for some French steel plants "thanks to" state intervention that they were no longer viable without government support. With the assistance of the Chambre Syndicale Siderurgie—the French steel industry's commercial association—the Government granted these companies loans in order to enable them to survive. Simultaneously a wave of mergers occurred, with the result that there are only two groups, SACILOR and USINOR, which have swallowed up all the other French steel enterprises (excluding the special steels industry, i.e., Pechiney-Ugine-Kuhlman, Creusot-Loire and Pompey).

There are just a few small companies left like the Scoiete Metallurgique de Normandie, which belongs to the private Empain-Schneider group, and two mini steel plants, including the Scoiete Metallurgique de Montereau near Paris, in which my company has a 50 percent interest.

By the end of 1978 the loans and loan guarantees of the French Government to the steel industry had reached a total of FF 17 billion; since the companies concerned were unable to repay these loans due to the steel crisis which had commenced in 1975, the debts were converted compulsorily into capital. This capital was then combined, resulting in effect in the expropriation of the private majority shareholders, who only hold insignificant interests in the industry today.

In 1978 the French Government drew up a so-called "steel plan" which made provision for another FF 50 billion to be pumped into the steel industry, which was now nationalized. The official purpose of these funds is to finance modernization and social benefit schemes, but there is no question that they are also used to cover the current losses made by SACILOR and USINOR.

Without doubt the French steel industry's managers have made some mistakes in the last 20 years, especially by clinging to their rigid association policy and failing to make technical innovations. In retrospect, however, it was primarily the state's intervention in the free trade economy from the late 1950's onwards by restricting earnings artificially that brought about the nationalization disaster.

Another example of a government's harmful intervention in the steel industry is the United Kingdom, where the Labour Government nationalized almost the entire steel industry in 1968 and combined it into a mammoth enterprise. It became obvious very quickly that size alone was not a panacea; the management of the British Steel Corporation was unable to cope with the multifarious problems of the assortment of plants compulsorily amalgamated. Gigantic losses totalling millions of pounds were the result, which ultimately had to be paid for by the British taxpayer.

The case of British steel exemplifies particularly clearly that governments are no better at running large companies than wicked capitalists or their managers—quite the opposite, in fact.

Today the Thatcher Government is making great efforts to repair the damage by closing down the obsolete plants which have been kept alive artificially for years and encouraging the industry to contract and modernize.

The list of examples of harmful government intervention in the steel industry could be continued with countries such as Italy, Belgium and Luxemburg. The question inevitably arises as to why these governments are prepared to provide their steel industries with so much financial aid and to cover all their losses.

As I pointed out earlier, this cannot be attributed to the fact that the steel industries employ the most people—or even to the fact that individual national economies have come to rely on this sector. And if it is true that there is considerable excess capacity worldwide, shutting down some European steelworks would not necessarily lead to difficulties of supply, as steel is sold and transported around the world.

What impresses me as being the real cause is managers, trade unions and governments, which are lobbied by various pressure groups, dealing with questions concerning the steel industry too emotionally. In my opinion, the steel industry in Europe must reestablish sound business principles and economic practices, which have deteriorated in the past years. This whole crisis business would probably come to an end as soon as the executives of steel enterprises are uniformly judged on the basis of their financial results and are forced to compete once again.

German steel industry, which has received little or no government aid up to this point, suffers most from the crisis in the European steel industry: it must pay out of its own pocket for the subsidies received by the consumers of neighboring countries from their respective governments through the steel companies. As a result, equity capital and reserves have been practically exhausted. A significant aspect in this respect is the fact that the domestic steel prices in America, Japan or Brazil exceed European prices by DM 100.—to DM 150.—per ton, which is the amount subsidized by the European governments concerned.

What can be done to restore normal conditions to the European steel industry?

Any arrangements, be they compulsory or voluntary quotas or minimum price provisions, can only have a limited favorable effect because they do not correspond with the principles of competitive and free trade and because outdated structures are thus preserved. In order to prevent this, unprofitable facilities must be shut down once and for all so as to allow for an appropriate reduction of total capacity.

It is not clear how many tons per year are produced with excess capacity, since the figures concerning European steel industry are completely distorted. This is easily ex-

plained. Each country and each steel enterprise tries to come off well when the quotas, which are based on capacities, are distributed. As a result, according to EEC-statistics the Federal Republic's raw steel capacity allegedly amounts to 69 million tons per year although any expert knows that little more than 50 million tons could be produced in the case of a steel boom.

Presumably, a 20 million ton reduction of capacity (instead of a 40 million ton reduction as is sometimes demanded) would help solve the problem and ensure the existence of the remaining plants by allowing them to utilize 80 percent of their capacity. The fact that most American steel companies already achieve a break-even point of 60 to 65 percent is traceable to their more favorable equity position.

The large integrated steel enterprises must also realize that products such as reinforcing bars, steel bars and wire rod can be produced at lower costs in mini steelworks than with blast furnaces. Thus, restructuring implies that the large enterprises would no longer manufacture these products.

However, as long as the governments of our five neighboring EEC-countries mentioned earlier continue to finance the losses of their steel companies with subsidies or loss-takeover agreements, the above developments will not take place.

I am quite certain that if tomorrow a binding agreement were reached between the EEC-governments to the effect that losses were no longer to be financed, the European price of steel would immediately rise to the international level which exceeds the European price by DM 100.—to DM 150.—or 20 percent per ton. In other words, the managers of subsidized companies would be forced to either adjust their prices to production costs or to go bankrupt. Obsolete and outdated plants would disappear in the process, which development could be accelerated by establishing a system of shutdown bonuses; such systems have been introduced to other branches of industry before.

Of course, the shutting down of facilities would involve making many workers redundant. This would pose a serious problem which could, however, be dealt with by using the funds otherwise granted for subsidization to create new and productive jobs in other branches or sectors or, if need be, by using them to finance social plans.

In any case, there is no reason why the European steel industry should not recover if all participants are truly dedicated to this goal. European countries with steel companies which are government controlled or which depend on government aid ought to be glad to rid themselves of this financial burden. The most promising means of avoiding further subsidies would be to denationalize the nationalized steel enterprises after the necessary process of contraction and restructuring and, wherever required, dividing them up into more efficient units has taken place. Private stockholders and the money market would be willing to invest if the European steel industry once again became as profitable a sector as it is in other countries.

In conclusion, I would like to remark on the future prospects of the product steel in general:

Worldwide steel consumption will continue to increase due to the growing population and the increase in the GNP worldwide. However, rather than in the industrialized nations, this increase will take place mainly in the developing countries, which will become new and important steel producers. As world steel production, i.e., sales amounted to more than 700 million tons per year in the past years, a demand totalling nearly one billion tons per year can be expected in ten years. Considering the enormous capital investments required for erecting new steelworks today and the time that elapses between the point at which the decision to construct a steelworks is made and the point at which production fully commences, it appears doubtful whether the future increase in steel consumption can be handled despite the existing excess capacity in Europe. I do not wish to appear over-optimistic with regard to a temporary steel shortage, but such a shortage will develop, and it will bring about better times for the European steel industry.●

## ROBERT E. SEIDENGLANZ

### HON. CARLOS J. MOORHEAD

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Monday, September 21, 1981*

● Mr. MOORHEAD. Mr. Speaker, I would like to take this opportunity to congratulate Robert E. Seidenglanz and Compact Video Systems, Inc. of Burbank, Calif. on this their 10th anniversary celebration.

As founder, chairman of the board, president and chief executive officer of Compact Video, Bob Seidenglanz represents the classic American success story, the American dream come true.

Back in 1970, he left ABC's Wide World of Sports and went to work on what he knew to be a better idea. As an experienced television engineer, he understood the superior nature of video tape over film in the television industry.

He also understood its drawbacks. To shoot video tape required a 40-foot trailer jammed with video equipment, a 15-man crew and a day's setup time. It was costly and cumbersome.

Seidenglanz knew there was a lot of room for improvement and that is what he set out to prove just over 10 years ago in his Burbank garage. What emerged from those efforts was Compact Video Systems, Inc., currently a $57 million company that does three principle things.

First, it rents out video tape trucks and crews to shoot commercials and variety shows. Second, it manufactures and sells compact and efficient mobile tape facilities for up to $3 million and fixed television studios for up to $10 million. Third, it owns postproduction facilities where tapes shot by Compact Video or anyone else, can be edited, dubbed, or colored.

When Compact Video celebrates its first 10 years on September 24, it will open the new $30 million Compact Entertainment Center in Burbank. This center not only represents the foresight and progressive dynamism of Bob Seidenglanz and Compact Video but the vitality of the video industry as well.

I am especially pleased that this company is located in Burbank. It not only energized the economy of the community, but insures that Burbank will remain at the center of an expanding entertainment industry.

Mr. Speaker, Horatio Alger would have loved the saga of Robert Seidenglanz.●

## GREATEST NEED OF AGE NOT MET

### HON. CLAUDE PEPPER

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

*Monday, September 21, 1981*

● Mr. PEPPER. Mr. Speaker, I am honored to submit for the perusal of my colleagues the following most poignant essay of the late Mrs. Gladys S. Eggers. Mrs. Eggers, of Alexandria, La., died in March of this year at age 82.

Among Mrs. Eggers' effects, her son, John W. Eggers, came across the following perceptive and beautifully expressed thoughts, which he kindly shared with me.

I commend Mrs. Eggers' sensitive observations to you with the assurance that, regardless, of age, you will indeed be enriched by them.

GREATEST NEED OF AGE NOT MET

What a baffling thing old age is. It doesn't bring the peace we were led to expect. The area that lies between "here and hereafter" is a difficult passage to travel. One must make the journey to fully understand it.

The pattern of today is such that at a certain point, it seems desirable that we should leave the mainstream and be channeled into a small tributary where the flow is at a gentler speed.

But even here there are obstacles. While our responsibilities lessen, our limitations and our frustrations increase and certain humiliations can be painful.

Our young folks want to be kind to us, I am sure, but they don't know how we feel. It seems to them all our needs are met. We are comfortably housed, well fed, protected from hazards, provided with companionship and thoughts reverting more and more to all those good times we had together.

What time is it? I don't know. Life is now regulated largely by impulse. The clock plays a minor part. Routine has been done away with. We have no one waiting for us. We are needed by no one. One thing old age teaches us is to tolerate monotony.

Length is only one dimension of life—our life is only concern about the state of our health. And we refuse to deny ourselves some "little pleasures" which we are told that are not good for us—if we want a drink of coffee at midnight, sit on the back porch, or play solitaire—what of it?

Our life has been a rich experience. When the time comes for us we shall go willingly with no consciousness. Will it be to a nursing home or hospital or shall we go directly with no stopovers?

Our new life is taking shape. The barriers of our little world are closing in on us. We are not sad or discontented—just tired.

My solace is our memories left untouched by the devastating hand of time. We have had good old days and enjoyed them and our memory and pictures will preserve them. The home in which we have spent our last years is quite pleasant and comfortable. All our possessions which mean nothing to others is what we have left of our past.

The telephone rings. For a few minutes we listen to a beloved voice. Distance is wiped away . . . .

We relive so many experiences of days long past. We find our diversions. What else do we need? It is the need to know there is a place where we belong. This is something no nursing home or retirement home or hospital can provide. There, institutions are staffed by dedicated people but it is not their function to soothe our yearning hearts.

Lack of physical strength keeps us inactive and often silent. Age creeps up so stealthily that it is often with shock that we become aware of its presence. Perhaps that is why so many of us reach old age utterly unprepared to meet its demands. Our interest in the goings on in the world outside, our ever-tightening barriers have not withdrawn—it is not interest we have lost but rather the means of getting around and the physical stamina to sustain us as we go.

The thought of where we shall go from here lurks in our bitterness but with tenderness toward our fellow travelers on our long journey.●

## DEDICATION OF THEODORE HERBERG MIDDLE SCHOOL

### HON. SILVIO O. CONTE

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

*Monday, September 21, 1981*

● Mr. CONTE. Mr. Speaker, I would like to bring to the attention of my colleagues a history of solid achievements in a career all of us consider important to our Nation, and a much deserved recognition of those achievements.

One of my Pittsfield, Mass., constituents, and a very good friend, Mr. Theodore Herberg, will this week have a junior high school formally dedicated in his name. Of all of the people I have known over the years who have given the major part of their lives to educating our young people, I can honestly think of none more deserving than Theodore Herberg.

For over 50 years, this outstanding public servant has occupied virtually every capacity in the field of public education, ranging from teacher to curriculum coordinator to adviser to superintendent. It is impossible to measure the knowledge Theodore Herberg has, in these capacities, transmitted to young people over the years, just as it is impossible to measure the scope of the contributions he has made to the Pittsfield education community. What we can measure however, is the level of respect and admiration he has commanded over the years as evidenced in the dedicating of a school in his name. I can think of no better tribute to a more dedicated individual.

The day of September 25 will mark the formal dedication of the Theodore Herberg Middle School. But long after that ceremony, the citizens of Pittsfield, Mass., are going to remember a man whose name meant so much to public education.●

## TRIBUTE TO JAMES C. ROGERS, JR.

### HON. DON H. CLAUSEN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Monday, September 21, 1981*

● Mr. CLAUSEN. Mr. Speaker, I am saddened to report the shocking and violent death of one of the most able members of our professional staff of the Committee on Interior and Insular Affairs of the House of Representatives. James Carlisle Rogers, Jr., 34, a trusted employee and loyal friend of mine for many years, was murdered Saturday in his Georgetown home by an assailant who has not yet been identified.

That such a fine young man with a most promising career should be cut down in the prime of life is tragedy indeed; that it should happen in broad daylight in the heart of the Nation's Capital adds frustration and anger to the tragedy. Those of us who knew Jim and worked with him can only hope that the person responsible for this senseless and insane act will be apprehended and brought swiftly to justice.

Born October 30, 1946, in Eustis, Fla., Jim received his B.A. degree in economics at Florida Southern College in Lakeland, then went on to earn the juris doctor degree from Stetson University College of Law in St. Petersburg, Fla., in 1972. At Stetson University, he was faculty research assistant to the professor of international law and a member of the editorial board of the College of Law.

From 1972 to 1975, Jim served the U.S. Securities and Exchange Commission as a senior attorney-adviser for finance in the Division of Market Regulation, where he prepared regulations for international applicability and acted as liaison with the Departments of State and Treasury on securities/financial matters.

Before coming to the House of Representatives as professional staff member and special counsel to the Hon. Albert Johnson, the ranking Republican on the Committee on Banking, Finance and Urban Affairs, in 1976, Jim served for a year in the Office of the Secretary of the Treasury as financial program planner for Secretary William E. Simon.

His service on the Banking and Finance Committee included his providing liaison for the ranking Republican with the Departments of State, Treasury, and Commerce, as well as with the Securities and Exchange Commission, the Export-Import Bank, the International Bank for Reconstruction and Development, the Federal Reserve System, and the International Trade Commission.

Jim Rogers joined my staff in 1977. During my years as the ranking Republican on the Committee on Interior and Insular Affairs, his staff work was invaluable to me in the areas of energy and natural resources. He was a man who was committed to service: Service to his Maker, his country, to his fellowman, and to every cause he felt to be right and just.

He had an exceptionally fine investigative mind, which permitted him to represent the committee in an outstanding manner in Alaska, Panama, and other sections of the country as he attempted to evaluate problems and potential problems that related to our energy distribution system. He and I shared the view that an improved energy distribution network was essential to the security of this Nation.

Jim was also a patriot in the finest sense of the word. He served with distinction with the U.S. Army Reserve, took great pride in his work, and had great concern and love for his country.

In Jim's 5 years as a member of the Interior Committee staff, many of us grew to know him quite well and to appreciate his special kind of humor and personal qualities.

We will always remember him for his colorful way of dressing and his equally bright and friendly smile.

He could often be found at his desk before and after regular work hours pouring over the Wall Street Journal and the New York Times. He had a particular love for the financial world and an indepth understanding of the ups and downs of the stock market and prime interest rate.

Sadly, we will always remember one of his favorite sayings when we had finished debating a philosophical issue or an unresolved world matter, Jim would ask, "What does it all mean?" With the shocking announcement of his death at the hands of an assailant, his words echo in our minds. What does his death mean? it is tragic and unnecessary. He was struck down in the prime of his life with a promising and rewarding career ahead of him. He was an ambitious man and highly intelligent, qualities which we expected would lead him to greater public service and high Government office.

No words can really express the emptiness we all feel and the void which has been left. We hope and pray that his assailant is captured.

Our prayers go out to Jim's family. His mother and father were a major

part of Jim's life. He was truly devoted to them both and always mindful of their needs. He frequently visited them and stayed in close communication. We know what a terrible loss they have suffered and pray that God will give them strength.

There is no way, of course, that any of us can convey our feelings of sorrow and grief to his bereaved parents. We can only assure them that in all of his duties in the House of Representatives their son served his Nation loyally and well. He was a responsible man in a very responsible position, and everything he did reflected an upbringing based on the time-honored principles of personal integrity, professional excellence, and conscientious attention to duty.

Jim was recognized as a true professional by not only the committee staff and by my personal staff, but by all the other staff elements on Capitol Hill. His peers really had the highest respect and admiration for him, and all of Capitol Hill is in deep shock over his death.

Mr. Speaker, I know that all of my colleagues on the Interior Committee, along with the many other Members of Congress who knew Jim, join me in offering our heartfelt condolences to his parents in this dark hour.●

## THE SISTERS OF MERCY IN KNOXVILLE

### HON. JOHN J. DUNCAN

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

*Monday, September 21, 1981*

● Mr. DUNCAN. Mr. Speaker, under the leave to extend my remarks in the RECORD, I include the following:

The Sisters of Mercy began their history of ministry in 1831, a history of unselfish labor, glorious service and outstanding progress and success. In Knoxville we have been privileged to have members of this order caring for our sick, educating our young, and feeding and clothing our poor for nearly 100 years. The work of the Sisters of Mercy stretches across denominational lines and provides a model of Christianity for all the people of east Tennessee.

I would like to take the opportunity to pay homage to this charitable community of women as it celebrates 150 years of many ministries given for the glory of God. Mother McAuley's dream has grown to encompass not only the ghettoes of Dublin, where the order was founded, but also many cities and towns in the United States and around the world. We in Tennessee are particularly proud of the noteworthy accomplishments and many services made by the sisters in the past 100 years.

The Sisters of Mercy first came to Tennessee November 1, 1866, in answer to the call of the Bishop of Nashville. These six women, headed by Mother Mary Clare McMahon, came to Nashville to teach the youth of the post-Civil War South. The order has remained in the State ever since; founding schools and hospitals, performing their religious duties, and offering spiritual guidance to generations of Tennesseeans.

It is rare to find a group so devoted to its cause, so filled with the serene knowledge that they have made the right choice in order to create a better world. Considering the sacrifices these women have made one is struck by their high spirits and good humor. They do not seek the monetary gain or power so many battle for today, but are content with a smile, or word of thanks.

They came to Knoxville to teach and began in St. Mary's and Holy Ghost Schools in the early 1900's. Just over 50 years ago they inaugurated St. Mary's Memorial Hospital which has expanded and modernized to meet the health needs of its east Tennessee patients.

I recall seeing the sisters who lived at the convent of St. Mary's School during my tenure as mayor of the city. I have since had many opportunities to meet with these good women and have always been impressed with their interests, attention, and courtesy. St. Mary's and Holy Ghost Schools have since closed, but the Sisters of Mercy continue to teach at St. Joseph's Sacred Heart, and Knoxville Catholic High School. The products of their teaching can be found in some of the most respected and prominent Knoxvillians today.

Teaching, as I have noted, is only a portion of the work the Sisters of Mercy perform. The city's residents think of them most often in connection with St. Mary's Medical Center. Since April of 1930 the hospital has not only provided the best in medical care, but also a spiritual care for its patients which is unencumbered by religious labels. This care and attention is recalled for many years afterwards by the center's convalescents. It broadens the respect felt for the sisters' mission to those of other faiths.

I can only say that if the work accomplished by the Sisters of Mercy has been half as successful in other cities as it has been in Knoxville, then many will be thankful for the 150 years of service by the Sisters.●

## THIRTY YEARS OF SERVICE

### HON. ROBERT H. MICHEL

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

*Monday, September 21, 1981*

● Mr. MICHEL. Mr. Speaker, I want to take this opportunity to express my thanks and appreciation to Mike Michaelson, the superintendent of our radio and TV gallery here in the House, for 30 years of dedicated and effective service.

As you know, Mike will be venturing into the private sector next month. He has accepted a position with C-Span.

Mike has endured more than any of us can imagine in his tenure here. He has been witness to and a participant in a dramatic technological revolution in mass communication. He has helped apply these revolutionary changes to the coverage of the House of Representatives in a manner that has served the best interests of the general public. Mike can be very proud of the role he has played and the historic milestones he has helped to achieve.

Throughout his years with us, he has been a true professional and a true friend, balancing the best interests of both the press and the body politic as no one else could. We own him a debt of gratitude.

It is comforting to know that while Mike is leaving, he is not going very far. C-Span is in the thick of the technological advancements that will enable millions of Americans to have a front row seat, not only for House floor deliberations, but also for committee proceedings. I know that Mike, with his vast experience on the Hill, will continue to do us a great service in this new assignment. As always, the public will be the greatest beneficiary of his talents.

I regret to see him leave and wish him well.●

## DIABLO CANYON

### HON. TONY COELHO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Monday, September 21, 1981*

● Mr. COELHO. Mr. Speaker, a crucial factor in the development and preservation of a healthy economy in any area is the availability of energy—particularly adequate electricity supplies. We all know that industrial growth does not occur without available energy, and it is for this reason that I believe it is now time to end the prolonged and sometimes bitter debate concerning the issuance of an operating license for Pacific Gas & Electric Co.'s Diablo Canyon Nuclear Powerplant in California.

Unit 1 has been complete since January 1981; Unit 2 was completed in June of this year. Diablo Canyon meets or exceeds every regulatory requirement, and all needed modifications to the plant have been made.

It has been estimated that the cost of this licensing delay to the consumers of California will be at least $500 million. The delay has already threatened to impair the reliability of the re-

gion's electrical generating capacity which would, of course, have a negative impact upon the area's economic vitality.

A recent editorial on this subject appeared in the August 3 edition of the Fresno [Calif.] Bee and is a well-reasoned argument for the plant's opening. I submit the editorial, "Diablo Canyon: Let It Go," to be reprinted here.

DIABLO CANYON: LET IT GO

It's time for an end to the protests. Opponents of Pacific Gas and Electric's Diablo Canyon nuclear power plant have had every opportunity to challenge the safety and the environmental impact of that plant. They have been heard in court and in public hearings, and federal regulators have responded to their concerns by requiring PG&E to make all sorts of studies and design and engineering improvements. In the wake of Three Mile Island, the regulators imposed new delays to recheck themselves and added new safety requirements.

One cannot fault the cautiousness or the openness of this regulatory process, and it has come to the point where one must, therefore, accept its conclusion. The federal regulators have decided that the Diablo Canyon plant is safe, can withstand any likely earthquake, and should be permitted to begin operational testing soon. While reasonable people might still disagree about the wisdom of allowing any nuclear power plant to open, there is no more information to be gained from further factfinding about Diablo Canyon, no more attention to be focused by further demonstrations. The controversy at this point is essentially political, and it must finally be left to the Nuclear Regulatory Commission, the arbitrator our political representatives have chosen, to resolve it.

It is much clearer now than it once was that utilities should be wary of constructing new nuclear power plants. The decline in building and the lack of funding for nuclear plants across the country attest to the fact that making nuclear power plants reasonably safe—and slogging through the lengthy regulatory procedures necessary to assure their safety—has turned into a very expensive proposition. But the Diablo Canyon plant has already been built, the money already spent and the regulatory process already nearly completed. By now it would be economically irrational to refuse to open it.

It is true that far more money has been spent on the Diablo Canyon plant than originally estimated (and its 14-year construction history does not offer much encouragement for new nuclear building). But these costs are still moderate compared to what it would cost to start building even a non-nuclear replacement plant today. Indeed, if oil prices keep rising the way they have been and if Diablo Canyon functions as well as it's designed to, the cost of electricity is actually likely to be lower for PG&E customers once Diablo Canyon is on line than it would be with continued oil use instead. Moreover, if Diablo Canyon does not go on line, PG&E would be in desperate financial trouble, and it would be the ratepayers who would finally have to bail it out.

The Diablo Canyon case is not yet closed. Operational tests must still prove the plant's reliability, and emergency plans must meet regulatory approval before the plant is permitted to go on line. But in a way the debate over Diablo Canyon is already a relic of an era when California utilities were still planning for enormous increases in electricity consumption and were still wedded to large power plants as the best way of meeting those needs.

By now, the experts have agreed that very little consumption growth is to be expected in California, and both the state's energy officials and the private utilities have endorsed future supply plans that depend on the more cost-effective options of conservation and the development of smaller, diversified power sources. In addition, Californians have passed a law prohibiting the siting of any more nuclear power plants in the state until the problems of nuclear waste disposal have been resolved.

Diablo Canyon's opponents have lost their battle, but while they were busy their war seems to have been won. It is time to go home.●

## FACING THE CONSEQUENCES OF STOCKMAN'S MISCALCULATIONS

**HON. DONALD J. PEASE**

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

*Monday, September 21, 1981*

● Mr. PEASE. Mr. Speaker, recent official estimates have put the Federal deficit for fiscal year 1982 in the neighborhood of $80 billion, much higher than OMB's current estimate of $60 billion and far beyond the administration's original estimate of $42 billion. The Reagan economic recovery program has been enacted virtually intact, for better or worse. We must now face the consequences.

This is a topic that I discussed in my two most recent weekly newspaper columns. They follow:

WASHINGTON REPORT, SEPTEMBER 16, 1981

As Congress returned to work last week after an August recess, all the talk was of the national economy and of high interest rates.

The immediate focus of concern was the high interest rates that are throttling the auto, home construction, real estate and savings industries. Congressmen heard plenty of complaints as they crisis-crossed their districts during the August recess.

The larger and even more serious issue is what lies behind the high interest rates—the apparent conviction of Wall Street financiers that President Reagan's recently enacted economic recovery plan will produce disastrously high federal deficits for at least the next three years.

In July's Mid-Session Review of the Budget, Reagan budget director David Stockman was still claiming that the federal deficit would be $42 billion in fiscal year 1982, $23 billion in 1983 and zero (a surplus of $500 million) in 1984.

Now Stockman's Office of Management and Budget is telling the Senate Budget Committee that the deficits will be more like $60 billion in fiscal year 1982, $72 billion for 1983 and $78 billion for 1984.

Many independent economists say the latest OMB deficit figures are too low. A budget deficit of $100 billion for 1984 is the more commonly used figure.

To put those figures into perspective, recall that, previously, the highest federal deficit in U.S. history was $66 billion in fiscal year 1976.

No wonder Wall Street and the Federal Reserve Board are keeping interest rates high.

To put it mildly, panic was starting to set in last week in Washington.

There was great concern generally. Every American—regardless of political party—has to worry about the effect on the whole nation of the economic outlook for the next three years.

In addition, there was great concern politically—at the White House and among Republican congressional leaders who pushed the Reagan economic recovery plan through Congress last summer. Said House Minority Leader Robert H. Michel: "Within 90 days, something's got to give. I'm a political creature, and our political futures (require) there's got to be some movement (on interest rates) before spring."

Panic is never a good atmosphere in which to make important decisions. My own concern is that the White House and Congress could rush into patchwork solutions over the next few weeks that would in the long run worsen an already-serious situation.

In my view, my former House colleague David Stockman made a dreadful mistake when he convinced President Reagan that he could simultaneously slash taxes, boost defense spending and balance the federal budget.

But that mistake is history now. It was ratified into law last summer. The task this fall is for the White House and Congress to summon up the statesmanship to face the consequences honestly and to adopt sensible solutions.

WASHINGTON REPORT, SEPTEMBER 23, 1981

Last week I wrote that my former congressional colleague, David Stockman, now director of the Office of Management and Budget, had made a dreadful mistake when he convinced President Ronald Reagan that he could cut federal taxes, increase defense spending and balance the federal budget all at the same time.

One of the serious consequences of that dreadful mistake is in the area of national defense.

The United States is sending confusing signals to the Soviet Union on defense. Surely, the current discussion of the defense budget is convincing the Soviets that the U.S. is a paper tiger on defense spending.

When President Reagan assumed office last January, he made it crystal clear that he wanted a large, steady increase in defense spending over the next several years.

You can argue the wisdom of that policy, but at least it was a definite, unambiguous policy. The Soviets, who have been steadily increasing their own defense spending for years, knew they were in for a taste of their own medicine. Certainly, clarity and consistency are virtues when dealing with the Soviet Union.

Unfortunately, David Stockman was wildly unrealistic when adding up his budget numbers. In July, Congress adopted the entire Reagan economic package virtually intact. In August, everyone discovered that the emperor had no clothes—that the budget deficits would be much higher over a three-year period than Stockman had forecast for the president.

Thus, in September, the Reagan Administration began talking about cutting back on its promised defense spending increases.

Stockman was urging cuts of $20 to $30 billion. Secretary of Defense Caspar Wein-

berger urged no cuts. Reagan approved $13 billion in cuts over three years. Senate Republican leaders said they would cut more than that.

What must the Soviets be thinking about our resolve to boost defense spending?

Adding to the confusion was Reagan's peculiar statement in August warning the Russians that they faced an arms race if they wouldn't negotiate arms limitations. It was the Reagan Administration which six months earlier pulled the rug out from under arms negotiations and said the U.S. would re-arm first and negotiate later.

I predict that our confusing signals to the Soviets will get even more confusing over the next three years. The magnitude of Stockman's miscalculations on the budget is still barely perceived. An anguished President Reagan and a reluctant Congress will be forced to deeper cuts in defense and every other governmental activity in a near-impossible effort to balance the federal budget over the next three years.

There is one solution which could balance the budget and also send an unmistakably strong message to the Kremlin. It is for President Reagan to say to the American people: "We're going to raise taxes enough to pay for the increased defense spending." But that won't happen, given Reagan's aversion to federal taxes.

So there will have to be cutbacks in defense spending plans. My aim will be to urge that (1) as much of the cuts as possible come from waste and fraud, (2) Congress resist buying every glamorous but expensive new weapons system being pushed by the defense industry, (3) defense dollars be targetted to manpower needs, better training, more adequate maintenance of existing equipment, and increased capabilities for our conventional forces.●

## NATIONAL HISPANIC HERITAGE WEEK

### HON. JOHN G. FARY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

*Monday, September 21, 1981*

● Mr. FARY. Mr. Speaker, I would like to bring your attention to the fact that last week was National Hispanic Heritage Week. This give us pause to enjoy a wonderful cultural event and to think seriously about the problems Hispanic Americans encounter as well as the special qualities they bring to our culture.

The Hispanic heritage is the heritage of all Americans, as many of the explorers and settlers of this continent were Hispanic. They have fought side by side with people of all origins to establish this great country of ours. The Hispanic community has given us generals, admirals, philosophers, statesmen, musicians, athletes, and Nobel Prize winners. Although honoring the contributions of Hispanics is important, it is not enough. This week we must pledge to work for the betterment of their condition in the United States. Despite the invaluable contributions of these people, they still have not been provided with adequate opportunities in housing, education, and labor. Hispanics are our fastest growing minority, yet we have barely begun to address the problems of immigration, voting rights, language, and the housing situation.

As we honor the contribution of our Hispanic brothers and sisters, let us not forget the contribution we could make to them in return.●

## TRIBUTE TO ROY WILKINS

### HON. ROBERT GARCIA

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 15, 1981*

● Mr. GARCIA. Mr. Speaker, I want to pay tribute to a most distinguished American, Roy Wilkins. Undoubtedly, Roy Wilkins will stand out as a major contibutor toward the realization of equality for all. Great advances have been made in the civil rights cause of this Nation, and one individual who was intrumental in that achievement was Roy Wilkins. He headed a nonviolent movement for social change and was guided by the belief that there is equality and freedom for all. This was through one of the most difficult periods of our Nation's history—the sixties and early seventies. His departure means the loss of a great civil rights champion, who had spirit and vision. His persistence and manner of approach, enlightened Americans to the realities of black America and of the poor of all colors in our society. His love for his country was so great that he never gave up on her as so many did during those troubled years, despite the obvious contradictions. He pointed out the ills of our Nation, but he had the vision and and belief that our society was capable of more and better achievements. Roy Wilkins believed that equality and freedom for all would lead us as a nation, to heights of greatness never achieved before in the history of mankind.

In short, Roy Wilkins was an individual who labored to eradicate discrimination, racism, and the hatred that permeates America. His entire life was devoted to the attainment of equality and justice for all mankind. Through his leadership, the NAACP was recognized as the vanguard in the struggle for equality. Roy Wilkins was intrumental in the enactment of the antilynching laws, as shocking as it sounds. His presence was felt during the landmark Supreme Court case of Brown against Board of Education in 1954, which mandated an end to separate and unequal education. He marched on Washington to bring about social change and pressed for passage of important civil rights legislation. He was the force behind the successful passage of the Civil Rights Act of 1964 and the Voting Rights Act of 1965.

There is no question that his presence and drive for racial equality has made a difference in America. Let his departure rekindle a national awareness and commitment to his unfinished dream. Many have forgotten that discrimination and racism is still alive and well in America 1981. We must come together to assure that the gains made through the efforts of Roy Wilkins will not end, but will be recognize and enhanced.

P.S. We know you're up there looking down * * * we won't let you down.●

## NATIONAL CYSTIC FIBROSIS WEEK

### HON. BARNEY FRANK

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

*Monday, September 21, 1981*

● Mr. FRANK. Mr. Speaker, during National Cystic Fibrosis Week, I would like to take this opportunity to salute the fine research program into this fatal disease that is going on at Boston's Children's Hospital. Scientists are working on the vexing problems of cystic fibrosis in the Nation's first research facility specifically committed to the basic study of cystic fibrosis and related respiratory diseases.

Operational in 1980, the Ina Sue Perlmutter CF Research Center is a project of the board of directors of the Massachusetts Chapter of the Cystic Fibrosis Foundation in cooperation with the Children's Hospital Medical Center of Boston. The nearly 8,000-square-foot facility is a new floor constructed over the pediatric research laboratory building in the center of the Children's Hospital complex.

The location provides CF scientists with access to many other research disciplines housed in the research building and enables them to consult with experts in other scientific fields.

Such a collaborative approach to the study of CF is necessary because of the complex nature of the disease. Scientists have yet to identify the basic genetic defect responsible for CF and many other critical questions related to cause, prevention, and treatment remain unanswered. Although dramatic gains during the past two decades have improved the length and quality of life for patients, cystic fibrosis remains the No. 1 killer of children and young adults in the United States.

Directing the Boston research center is Dr. Harvey R. Colten, with responsibilities for clinical operations and research projects. His background is as a physician, clinician, and research scientist with particular interest in host defenses, chronic inflammation, and lung disease.

Dr. Colten heads a research staff of six noted senior scientists, each having

expertise in a specific field of investigation. Each has a staff of junior scientists, fellows, and technicians assisting in the center. Professional staff members hold concurrent appointments to the department of pediatrics at Harvard Medical School and the department of medicine at Children's Hosptital.

According to Dr. Colten, interest and activity in CF research are at all-time highs. He attributed this enthusiasm to the heightened emphasis on basic research by the CF Foundation, to the increasing support of CF research by the National Institutes of Health, and to the widening awareness among scientists in related disciplines that their work may be relevant to CF.

Dr. Colten noted that cystic fibrosis, which primarily affects the lungs and digestive system by producing an abnormal accumulation of thick, gluelike mucus, is more and more being viewed as a basic biological problem. Broad, multidisciplinary research thus promises to yield the best results, he said, and the Boston center gives scientists the latitude to explore new and sometimes unpopular ideas.

Even prior to the opening of Boston's CF center, cystic fibrosis and Children's Hospital have been closely linked. Dr. Sidney Farber was one of the first doctors to recognize CF as a disease and identify its effects on many parts of the body, not just the pancreas. Children's Hospital's special reputation in the care of CF patients belongs to Dr. Harry Schwachman and his staff. Over the past four decades, they have provided national leadership in developing programs for diagnosis (including introduction of the sweat test, the simple and definitive test for CF) and care of children and young adults with the disease. Though recently retired as director, Dr. Schwachman remains active in the hospital's CF program as a special consultant.

Besides being the largest recipient of pediatric research grants in the world, funding more than 250 qualified scientists annually, the medical center also has the world's largest CF clinic. Of all the illnesses for which youngsters are admitted to Children's Hospital, CF ranks second in the number of patient days.

The number of CF patient care days has grown to nearly 3,500—representing 300 admissions to the hospital. Today, the hospital serves nearly 700 active CF patients referred to the hospital from most of the 50 States and many foreign countries.●

## A TRIBUTE TO DEAN K. CLOWSE

### HON. TOM LANTOS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Monday, September 21, 1981*

● Mr. LANTOS. Mr. Speaker, I rise in tribute to Dean K. Clowse, a leader whose distinguished service to the American labor movement will be greatly missed. My condolences and those of my colleagues are extended to the Clowse family and the United Steelworkers of America who have suffered the loss of this great man.

Dean K. Clowse committed his life to the continual development of free trade unions throughout the world. His service to his Government and to the labor movement were outstanding. The void left by Dean's death will be great. He touched the lives of Presidents, foreign leaders, Members of Congress and countless Americans.

The Washington Post offered a glimpse of the outstanding activities of this man's lifetime. I submit the following article for the benefit of my colleagues and request that all of us reflect on the contributions of this important man.

[From the Washington Post, Sept. 8, 1981]

DEAN K. CLOWES, 58; FORMER OFFICIAL IN LABOR DEPARTMENT

Dean K. Clowes, 58, a Deputy Under Secretary of Labor for International Affairs from 1979 to 1981 and a former official of the United Steelworkers of America, died of cardiac arrest Thursday at George Washington University Hospital. He was a resident of Silver Spring.

Mr. Clowes began his union career as a CIO representative in Atlanta in 1948. From 1949 to 1953, he was a CIO adviser to the Marshall Plan, the aid program under which the economy of western Europe was restored after World War II, in Washington, France and Italy.

In 1953, he joined the Steelworkers as a representative in Canton, Ohio. He was assistant director of the United Steelworkers in Baltimore from 1956 to 1960 and then spent three years as the union's international affairs representative in Washington.

Mr. Clowes was deputy director of the AFL-CIO African-American Labor Center in New York from 1964 to 1968. He then returned to Washington and was director of the Steelworkers' political action and international affairs departments before joining the Labor Department in December 1979.

Mr. Clowes was a labor adviser in the Kennedy presidential campaign of 1960. In the 1964 campaign, he was a staff labor coordinator for vice president Hubert H. Humphrey and held a similar position in Humphrey's presidential bid four years later.

He was a member of the Charter Commission of the Democratic Party from 1973 to 1974. He served on the executive committee of the National Council on Aging and was a member of the labor advisory committee on multilateral trade negotiations.

Mr. Clowes, who was born in Pennsylvania, was a 1948 graduate of The Citadel in Charleston, S.C.

Survivors include his wife, Gladys, two daughters, Joan and Kathleen, and a son, Philip Dean Clowes, all of Silver Spring.●

## LEGISLATION TO CLARIFY THE TAX STATUS OF INDEPENDENT CONTRACTORS

### HON. BARBER B. CONABLE, JR.

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Monday, September 21, 1981*

● Mr. CONABLE. Mr. Speaker, the distinguished gentleman from Tennessee and my colleague on the House Ways and Means Committee, HAROLD FORD, has joined with me in introducing legislation to maintain and advance national policies as well as to preserve our common-law treatment of the independent contractor. We will be seeking cosponsors as the Congress must address this issue in the near future.

The independent contractor is an important part of the American economy and is essential if individual entrepreneurship in small business is to flourish in the United States. Over the past several years the IRS has begun a campaign to change the tax status of small business people filing as independent contractors. As a result of harassment by the IRS, Congress enacted protective interim legislation in order to allow it time to study the entire independent contractor issue. The moratorium was extended to July 1, 1982, so our committee and the Congress will address the issue promptly in order to establish certainty and insure due process for taxpayers who would come under attack by the IRS after that date.

For that reason, Mr. FORD and I have introduced legislation that creates a clear "safe harbor" for independent contractors who have substantial capital assets invested, or whose income is subject to fluctuation because it is based on sales or other variable output rather than the number of hours worked. We have intentionally made the "safe harbor" coverage as broad as possible in order to eliminate excessive recourse to report language, a preferable approach in view of the U.S. Court of Appeals for the D.C. Circuit's recent decision in National Small Shippers Traffic Conference, Inc. against Civil Aeronautics Board. The article from the Congressional Quarterly, April 26, 1980, on this case, is included at the end of my remarks.

The report, however, will have to give attention to licensed professionals, though having invested considerable time and money to acquire credentials to practice, do not have a substantial investment in capital assets and are frequently compensated on a retainer or hourly fee basis. Mr. Ford

and I do contemplate that necessary report language must also avoid extending the scope of the bill to include nonprofessional workers who are paid on an hourly basis and who have not been traditionally held to be independent contractors, for this is consistent with the overall objectives of our bill and with the policy of the labor unions.

STATE INTENT IN LAW, NOT REPORTS, HILL TOLD

(By Irwin B. Arieff)

If Congress wants to make itself perfectly clear, it should state its legislative intent in the language of a statute itself, not in a committee or conference report.

That was the warning given by a three-judge panel in a recent federal appeals court decision. It could lead to a significant change in Congress' habit of explaining in committee reports how it wants a law implemented.

Some Washington lobbyists already have taken note of the decision and are changing their tactics accordingly.

The Feb. 11 decision by a panel of the U.S. Court of Appeals for the District of Columbia Judicial Circuit, in the case of *National Small Shipments Traffic Conference, Inc.* v. *Civil Aeronautics Board,* is significant because it has been common practice for Congress to provide instructions in committee and conference reports on how federal agencies shoud interpret and enforce the laws Congress passes. Traditionally, the courts have relied on these instructions in gauging Congress' intent.

The appeals court's action threatens to change that practice. The decision carries particular clout because the D.C. court reviews more appeals from federal agency actions than any other federal appeals court.

"It has enormous implications for the way things are done up here," commented one Senate aide. "People are always saying, 'We can take care of that in the report language.' Well, that may not be the case any more."

LOBBYISTS AFFECTED

Some lobby groups alreay have taken the court's advice to heart.

For example, during the Senate Commerce Committee's recent consideration of trucking deregulation legislation (S. 2245), trucking industry representatives carefully monitored the bill's drafting to ensure that the statutory language was as clear as possible, according to committee aides. (Weekly report, p. 1027.)

"They're afraid the courts will no longer look at the committee report," one staffer explained.

"In the past, we have looked to report language as a tool to help us keep the ICC [Interstate Commerce Commission] at bay," a trucking lobbyist said. The ICC regulates much of the industry's operations.

For example, the lobbyist pointed out, the language of the ICC's fiscal 1980 appropriations bill mentioned only the amount of money the agency could spend. However, the Senate report accompanying that measure warned the ICC not to implement any final trucking deregulation rules until Congress could act on a separate deregulation bill. (1979 Almanac p. 221)

Because of the court decision, the lobbyist said, the industry would try to avoid relying on such devices.

THE COURT DECISION

The appeals court's decision came in a case involving the authority of the Civil Aeronautics Board (CAB) to regulate the domestic air cargo transportation industry following the passage in 1977 of legislation (PL 95-163) deregulating that industry. (1977 Almanac p. 559)

In regulations issued in 1978, the CAB exempted domestic air cargo carriers from a number of regulatory duties, including a requirement that they file a "tariff" with the CAB before offering any new service.

The advance filing of tariffs serves to inform the agency and the public of the service the firm intends to offer and the rate it will charge for that service. However, the requirement also makes it practically impossible for one firm to get a competitive jump on another.

The filing exemption was immediately challenged in federal court by several shippers' groups, airline firms and the Air Transport Association of America. They charged that the exemption contradicted Congress' intent in passing the 1977 law.

The deregulation provisions had been tacked onto an unrelated House-passed bill on the Senate floor, so neither the House nor the Senate committee report on the legislation discussed them. Because the provisions were accepted by conferees, however, they were discussed in the conference report.

In attempting to determine Congress' intent, the court, therefore, had only two sources of information: the conference report (H. Rept. 95-773) and the law itself.

The conference report explicitly stated that the conferees "do not contemplate that the board will exempt carriers from the requirement of filing tariffs." Tariffs, the report explained, "provide valuable notice of rates to users of air transportation," and their filing would be "necessary for the board to effectively carry out its duties. . . ."

On the other hand, the law itself authorized the CAB to exempt cargo carriers from "any" requirement of existing aviation law "if it finds that the exemption is consistent with the public interest."

"UNMISTAKABLE LANGUAGE" LACKING

In its decision, the three-judge panel concluded that the CAB acted properly in following the language of the law itself rather than the language of the legislative history.

"Courts in the past have been able to rely on legislative history for important insights into congressional intent," stated Chief Judge J. Skelly Wright, writing for the panel. "Without implying that this is no longer the case, we note that interest groups who fail to persuade a majority of the Congress to accept particular statutory language often are able to have inserted in the legislative history of the statute statements favorable to their position, in the hope that they can persuade a court to construe the statutory language in light of these statements. This development underscores the importance of following unambiguous statutory language absent clear contradictory evidence of legislative intent."

"The only credible support that [the challengers in the case] offer," Wright went on, "is the statement in the conference report that the conferees did not contemplate that the board would grant exemptions from the tariff filing requirement."

"We must assume that if Congress had intended to limit the board's exemption authority in the manner suggested by the air carriers, it would have said so in unmistakable language," Wright concluded.●

## HARRY J. SULLIVAN

### HON. PETER W. RODINO, JR.

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

*Monday, September 21, 1981*

● Mr. RODINO. Mr. Speaker, I want to share with my colleagues the sadness I am feeling at the passing of a close friend who served the people of New Jersey with distinction for several decades. When Harry J. Sullivan died on Sunday, my family and I lost a longtime friend and ally who was in my corner ever since he managed my first election campaign in 1946. The State of New Jersey lost one of its most trusted and dedicated public servants.

A lifelong resident of Belleville, N.J., Harry was best known as the director of the public safety department. But he also served as undersheriff in Essex County, as the director of New Jersey's Civil Defense and Disaster Control during World War II, and as past president of the League of New Jersey Municipalities. Harry was always involved in the community, giving hundreds of hours of his time to civic and church organizations. He was also a gold card member of the Police Benevolent Association.

Harry Sullivan was not well known outside of his home State. He never ran for higher public office. But his life is a lesson to all public officials everywhere—for he was a man who held sacred the public trust of his office. A man of the highest integrity, Harry Sullivan reminded all public officials that they were responsible to the men and women of their community. Harry enjoyed the confidence and friendship of the people of Belleville, who admired this reserved yet compassionate man.

They will miss him dearly, as I will. He leaves behind his wife Gladys, his daughters Mrs. Maryann Baxter and Patricia Pelszymski, his sons Harry J. Jr., John F., and Paul U., many grandchildren and great-grandchildren, and two sisters, Mrs. Mary Westlake and Mrs. Teresa Conklin.

I extend to all of them my deepest sympathies at their loss.●

## DON'T BLAME WALL STREET FOR REAGAN'S PROBLEMS

### HON. JOHN F. SEIBERLING

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

*Monday, September 21, 1981*

● Mr. SEIBERLING. Mr. Speaker, the distinguished economics journalist Hobart Rowen, writing in the Wash-

ington Post of September 17, had some very pointed things to say about the effort of the White House and others to look for scapegoats for the economic mess that has already commenced as a result of the enactment of President Reagan's budget and tax program.

Under the headline indicated, Mr. Rowen notes that:

It's interesting—to say the least—to find an administration like Reagan's, theoretically committed to the free-enterprise system, grumbling at the market's response to its policies.

Mr. Rowen points out that from the very beginning respected Wall Street analysts warned that the arithmetic of Reaganomics did not add up. I personally brought some of those warnings to the attention of Congress before the tax bill was enacted. Those interested will find them in the CONGRESSIONAL RECORD. As Mr. Rowen says, no act of faith could change the numbers:

How could you cut taxes $732 billion over a 4-year cycle and come up with a balanced budget? They said. How could you brag about cutting civilian expenditures $40 billion this year at the same time you were making a $1.5 trillion commitment for defense by the year 1986? How could you stimulate economic growth when a stringent monetary policy would depress business activity?

As Rowen also points out, the President still has a chance to reduce the outlandish size of the defense commitment, and make other budget cuts as well. But the piddling $13 billion reductions—in proposed increases—in defense spending announced last weekend are not enough.

In my opinion, Mr. Speaker, Congress and the administration should also postpone or repeal some of the more irresponsible tax cuts too, particularly those that resulted from the bidding contest that took place between the administration and the Ways and Means Committee and resulted in giving away billions to the oil industry and other special interests who hardly fall into the category of the truly needy.

Rowen concludes that:

If there is a hopeful sign in a dismal picture, it is that Reagan may be beginning to recognize that he was sold a bill of goods by fanatics who told him that rose-colored expectations are a substitute for reality.

We must all join in that hope.

The full text of the Hobart Rowen article follows these remarks:

[From the Washington Post, Sept. 17, 1981]

DON'T BLAME WALL STREET FOR REAGAN'S PROBLEMS

(By Hobart Rowen)

Returning home after a couple of weeks in Japan, and reading the newspapers and newsmagazines, I am struck by two facts. First, the political pundits have discovered the economy and the importance of economic issues. Second, some of them join the Reagan administration in accusing Wall Street of "nonsupport" of Reaganomics.

My colleague, David S. Broder, for example, is concerned "to see the big wheels of Wall Street so callously scuttling the very program that American business, in a literally unprecedented fashion, had pressured Congress to pass just a few weeks ago."

In looking for scapegoats (apart from the White House and its ideologues) for the present mess, congressional Democrats would be a much more logical target than Wall Street. The Democrats, mesmerized by the president's political charisma, played a me-too game on Capitol Hill. In fact, Democrats on the House side bid up the ante on the tax bill enough to make the final legislation even more inflationary than the original Republican proposals.

It is true, as Broder says, that businessmen supported Reagan's budget cutting as well as personal and business tax-rate proposals. But businessmen, in or out of Wall Street, never were seduced, as was the Reagan administration, by the supposed magic of supply-side economics that could translate huge Treasury tax losses into Treasury revenue gains. Even if the process took time, the supply-siders told Reagan, the intervening budget deficits didn't really matter. Businessmen didn't buy that notion, either.

Reagan's monetarists also assured him that the deficits wouldn't be inflationary so long as the Federal Reserve didn't "monetize" the debt—that is, print money to cover the deficits. But in the real world, deficits do matter: The government is forced to borrow huge amounts of money, and the American economy doesn't generate enough savings to supply all of the demands for credit from the government and the private sector together.

What happens, of course, is that the people with money to lend insist on—and get—a higher rate of interest. And those who borrow have a choice: pay the rate or go without.

That's the way a market economy works, and it's interesting—to say the least—to find an administration like Reagan's, theoretically committed to the free-enterprise system, grumbling at the market's response to its policies.

A review of the facts will show that, from the very beginning, respected Wall Street analysts, notably Henry Kaufman of Salomon Bros. and Albert Wojnilower of the First Boston Corp., warned that the arithmetic of Reaganomics didn't add up, and no act of faith, for which the president had begged in his April 28 speech to Congress, could change the numbers.

How could you cut taxes $732 billion over a four-year cycle and come up with a balanced budget? they said. How could you brag about cutting civilian expenditures $40 billion this year at the same time you were making a $1.5 trillion commitment for defense by the year 1986? How could you stimulate economic growth when a stringent monetary policy would depress business activity?

Now that predictions made by Kaufman, Wojnilower and others are turning out to be highly accurate, we have a classic situation in which the messenger boy—in this case, Wall Street—is being chastised for the message conveyed on the ticker tape showing sharp declines in stock and bond prices. But jawboning Wall Street to be more supportive isn't going to work. Brokers and their customers still know how to add and subtract. Says Edgar Fiedler, vice president for research of The Conference Board, an association of industrialists in New York: "Seeing is believing—behavior has to change."

Unhappily, the genie may be out of the bottle on tax cuts, but the president still has a chance to reduce the outlandish size of the defense commitment, and to make other budget cuts as well. The piddling $13 billion reductions (in proposed increases) in defense spending announced last weekend aren't enough.

If there is a hopeful sign in a dismal picture, it is that Reagan may be beginning to recognize that he was sold a bill of goods by fanatics who told him that rose-colored expectations are a substitute for reality.

To me, the big mystery is not Wall Street's highly rational lack of confidence in Reagan, but why the Democrats continue to sidestep a golden opportunity to jump all over Reagan and Reaganomics. Where are Teddy Kennedy, John Glenn, Gary Hart, Jimmy Carter, Fritz Mondale, Hugh Carey, Jerry Brown, or any other Democrats with pretensions to high national office?

There appears, still, to be no Democratic alternative to Reaganomics. By default, the only effective political criticism I hear comes from the AFL-CIO.●

## CONTROL FEDERAL SPENDING

### HON. MARGARET M. HECKLER

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

*Monday, September 21, 1981*

● Mrs. HECKLER. Mr. Speaker, in this time of economic crisis it is incumbent on every Member of Congress to search for responsible means of controlling Federal spending. Only by eliminating the fat from the budget—by phasing out unnecessary and wasteful programs—can we have any hope of restoring public confidence and revitalizing our economy.

Budget cutting is by its nature a complex and politically difficult process. Yet there are within the Federal budget some examples of programs that are so clearly unnecessary—so obviously wasteful—so plainly negative in their effect on the public interest—that they should be at the top of the list of candidates for systematic reduction.

In recent years the Congress has twice defeated sugar price support programs which would have imposed heavy burdens on the American consumer and taxpayer. My distinguished colleague from New York, Mr. PEYSER, and I worked with a coalition of consumer groups to defeat the most recent effort to institute such a program—in 1979—by a vote of 158 to 249. And yet once again, the issue of sugar price supports has come before the House—this time an effort to establish a price level of 19.6 cents per pound.

The gentleman from New York has written a perceptive analysis of this program, which appeared in the September 10, 1981, edition of the New York Times. His article states clearly a point that many of us in this House have repeatedly made, and which we

will continue to make in the months ahead: at a time when the American public is being called upon to make very real sacrifices in the name of fiscal restraint, there should be no room in the budget for a program whose major effect is to foist artificially high prices on the American consumer.

As the professed goal of so many in this Chamber lies in finding responsible budget reductions, I would ask that this article be printed in the RECORD, and suggest to all my colleagues that they consider its message most seriously:

SUGAR DADDY

(By Peter A. Peyser)

WASHINGTON.—With food prices again leading the way in the recent surge of inflation, it seems incredible, but it is nevertheless true, that the Reagan Administration is continuing to back a sugar-loan program, an outdated peanut-allotment program, and an outrageous dairy-price-support program.

In its economic-recovery program, the Administration is saying that extensive budget cuts are in order and that the elderly must tighten their belts and look for reductions in Social Security benefits.

It is telling indigent students that their higher-education grants must be drastically reduced, and it is telling middle-income students that eligibility requirements for guaranteed student loans must be severely tightened.

It is telling the unemployed that extended benefits and job programs must be eliminated. Yet it is also saying that certain privileged special-interest groups—the sugar lobby, the peanut lobby, and the dairy lobby—will be protected.

With the budget cuts that the public has been asked to bear, how, in good conscience, can the Administration say to the taxpayers that they must provide the money to guarantee major corporate sugar growers a captive Federal market for all the sugar they grow? This in turn drives up the price for all commercial sugar products. These corporate growers have been reaping huge profits without a Federal sugar-support program for the last several years. Conservative estimates by the Congressional Budget Office show that a re-established sugar-support program would cost taxpayers at least $200 million in fiscal years 1982 through 1985, would require the Government to borrow more than $1 billion, further tightening credit markets, and would force consumers to pay $2 billion more for sugar products. A Department of Agriculture study in May indicated that the sugar program would add $5 billion to consumers' costs over the next four years.

Moreover, we are asked to accept a peanut program, which seems to survive whether there is a Democratic President from Georgia or a Republican from California in the White House. The advocates of the peanut program are actually proposing to Congress an increase of nearly 50 percent in their support level. They contend that this program does not really cost anything. This is untrue.

The consumer is paying the highest price ever for peanut butter yet the restrictive Federal peanut program prohibits farmers from growing peanuts unless they are among the privileged few who have peanut acreage that is passed down from generation to generation. Peanut butter prices could drop 25 to 30 percent if this antiquated, special-interest program was terminated.

Now for the biggest inequity: the $2.2 billion dairy-price-support program.

Congress has mandated that the Secretary of Agriculture support the price of milk by buying milk and milk products, such as cheese and butter. The price is being supported at an artificially high level, thereby driving up the price that the consumer pays for all dairy products. The program is extraordinarily wasteful and one need only look at one phase of it—butter—to realize this fact. The Government buys excess butter for $1.40 a pound. In the last eight months, the Government has bought more than 500 million pounds of this butter and is paying about $300,000 a day to store it in refrigerated warehouses. This equals $110 million a year for storage alone. You and I are paying $2.20 a pound for butter in the supermarket while we as taxpayers this year will foot nearly a billion-dollar bill for the Government to buy more than 600 million pounds of butter—25 percent of all the butter produced in 1980.

This ridiculous situation gets worse when we learn that the Administration has agreed to sell nearly 200 million pounds of this butter to New Zealand for 70 cents a pound. Eventually New Zealand's surplus butter will end up in the Soviet Union. In effect, taxpayers will be subsidizing the citizens of the Soviet Union to the tune of $140 million.

Congress will be acting on all these price-support programs in its consideration of the 1981 farm bill. Of these programs, Congress in recent years has had the courage to defeat only the sugar program. Now corporate sugar growers are moving to restore it.

With all the sacrifices that the Administration has asked the public to accept on behalf of its economic-recovery program, its approval of expensive and inflationary support programs cannot be justified.

Not only would the economic-recovery program be jeopardized, but also the Administration's credibility would also be seriously called into question by continuation of these outrageous programs.

It is time for the public to speak out and demand that these runaway programs be stopped.●

## WHY HIGHWAY DEATHS ARE CLIMBING AGAIN

### HON. JAMES J. HOWARD

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

*Monday, September 21, 1981*

● Mr. HOWARD. Mr. Speaker, the death toll on our Nation's highways is rising. Poor enforcement of the 55-mile-an-hour speed limit, higher incidences of drunk driving and inadequate highway maintenance are major factors contributing to this trend.

I highly recommend to my colleagues the following two articles which briefly and succinctly analyze the problem. Both appeared in the September 14, 1981 issue of U.S. News and World Report.

WHY HIGHWAY DEATHS ARE CLIMBING AGAIN

Deteriorating roads and growing disregard for safety rules are creating more tragedy on the nation's highways.

Some 53,000 travelers, it's estimated, will lose their lives this year in traffic accidents and 2 million more will suffer disabling injuries.

With car travel up because of plentiful gasoline supplies and the air-traffic controllers' strike, experts fear that it won't be long before the death toll approaches the record 56,278 killed in 1972. Behind that worry:

An epidemic of drunk driving.

Mass disregard of speed limits.

Widespread failure to use seat belts and other restraints.

The mix of more smaller cars with ever bigger trucks.

Lagging highway maintenance.

Steps are being taken at both the federal and state levels to attack these hazards, but officials admit that so far it's a losing battle.

Says James King, chairman of the National Transportation Safety Board: "We're losing more than 50,000 people a year on the nation's highways, and we seem to be accepting that kind of carnage as a matter of course. People seem persuaded that nothing can be done about it.

At the top of the list for many safety officials is keeping drunk drivers off the road. Autopsies show that more than 50 percent of drivers killed in accidents were legally drunk at the time. In the past 10 years, more than 250,000 people have died in crashes involving intoxicated drivers.

Effort to end the slaughter center on tougher enforcement by police, steeper penalties and an increase in the minimum drinking age.

With the help of $150,000 in special federal funds to pay state troopers overtime wages, Maryland this year launched a crackdown on drunk drivers. More police are on the roads late in the evening and early in the morning to spot intoxicated drivers who give themselves away by taking wide turns at corners, neglecting to turn lights on, braking erratically or straddling dividing lines between lanes.

Through the first seven months of the year, the campaign has resulted in 6,275 arrests, more than the total for all of 1980.

In most states and cities, however, enforcement remains lax. Last year, there were about 1.2 million drunk driving arrests—an average of only 98 arrests per police department, according to analyst John Moulden of the National Highway Traffic Safety Administration (NHTSA).

"In no way does that tackle the problems, especially when drunk drivers get off with a slap on the wrist," says Moulden. "The federal government can't solve drunk driving, but we can keep getting information out and try to help build a citizens' lobby."

One group, Mothers Against Drunk Drivers, has 14 chapters that lobby state legislatures. Their efforts and those of others have helped to spur 20 statehouses into introducing bills that specify tougher penalties, license suspensions and rehabilitation programs for intoxicated motorists

NEW LEGISLATION

For instance, Montana now has a mandatory jail sentence of one day for a first offense and seven days for a second offense, along with a court-order rehabilitation program.

In Maine, a law going into effect this fall is aimed at repeat offenders and those who try to elude arrest or exceed the speed limit by 30 miles an hour while drunk. Violators will face a mandatory two-day jail sentence,

at least a $350 fine, a minimum 90-day license suspension and a criminal record.

In addition, concern over the problem of fatal crashes involving drivers under 21 has been a factor that has led 14 states to raise the minimum drinking age.

On the federal level, Representative Michael Barnes (D-Md.) has introduced a bill that would encourage states to fix a minimum mandatory sentence of 10 days of community service for first offenders. It also would require fines, license suspensions of up to one year and participation in alcohol-treatment and safety programs. Repeat offenders could get up to 10 days in jail and a mandatory license suspension of at least one year.

States not following the federal guidelines would risk losing federal highway-safety funds.

Others are urging tougher enforcement of the 55-mile-an-hour speed limit. Experts say the standard, adopted in 1974 after the Arab oil embargo, was instrumental in bringing highway deaths down from 55,511 in 1973 to 46,402 in just one year.

The toll dropped further in 1975, but since then fatalities—and highway speeds—have edged upward.

In many states, enforcement is slack and fines light. For example, Montana, Nevada and Idaho impose fines of only $5 for exceeding 55. Nor has any state lost federal highway funds, as the law dictates, because of lax enforcement.

Indeed, the Reagan administration appears to be looking the other way. Notes NHTSA Administrator Raymond Peck: "Questions of speed limit belong to the states."

Yet NHTSA's own task force on the issue concluded that the removal or substantial weakening of the 55-mph limit would result in as many as 20,000 additional crash deaths and hundreds of thousands of additional injuries over the next five years.

BUCKLE UP

The administration also appears to be in no hurry to order new forms of passive restraints in autos. Already on record against air bags, Reagan officials are expected to recommend a slower schedule for phasing in automatic seat belts than had been mandated by Carter's administration.

Many safety experts are recommending automatic restraints because nearly 90 percent of Americans who have seat belts in their cars are not using them, despite studies that show their value in preventing death and lessening injury.

Says Gary Butler, a safety expert at NHTSA: "We know that seat belts are at least 60 percent effective in reducing fatalities and injuries. If used, they could save up to 28,000 lives a year."

Others urge that people at least take precautions to restrain children when traveling. About a dozen states have education programs or laws mandating use of belts and car seats for children.

One of the toughest is Tennessee's, which requires that children from infants to 4 years of age be buckled in an approved car seat. If a motorist is caught without one, a state trooper can stop the car, install a seat and write a ticket to cover its cost. The driver returns the seat to authorities and has to prove that he or she has bought one.

Since the state began enforcing the measure in September, 1979, only one child in the age group affected has been killed in a traffic accident. In that time, police have issued some 3,000 such citations to parents.

Says Capt. Fred Schott of the state Department of Safety: "We have situations where other passengers are killed, injured or horribly disfigured but children under age 4 are unhurt, thanks to the child restraints."

BIG TRUCKS, LITTLE CARS

Highway officials are less sure about solutions to another highway worry: The trend toward smaller cars at a time when more and bigger trucks travel the roads.

NHTSA notes that in 1979 small cars were involved in 55 percent of all fatal crashes, even though they accounted for only 38 percent of the cars on the road. Agency figures also show that accidents involving heavy trucks—those weighing more than 10,000 pounds—increased by 48 percent between 1975 and 1979.

Federal officials say that in a crash between a subcompact and a full-sized car, the unrestrained occupant of the subcompact is 8.2 times more likely to be killed or seriously injured than are the occupants of the large car. In a collision with a heavy truck, occupants of small cars are 35.8 times more likely to be harmed.

Safety experts point out that most highways were designed for standardsized autos of the 1960s, not today's tinier models. Roads were built for drivers sitting at a higher level than they do in small cars, and barriers were intended to stop heavier, taller vehicles.

The driver's lower "height of eye" in a small car makes it more difficult for a motorist to see over a hill or around a curve. As for barriers, one Safety Board source says: "What we have are barriers that will save people from going over the bridge but kill them in the process."

Steps are being taken to solve these problems. A 1979 report on excessive truck weights by the General Accounting Office, the investigative arm of Congress, has led to new efforts to insure safety in a truck fleet that is expected to double by 1995.

Among other things, the report showed that 25 percent of tractor-trailers were running over their allowable weights, which GAO claimed causes major harm to highways. Since the report. Kenneth Pierson, director of the Department of Transportation's Bureau of Motor Carrier Safety, says that states have expanded their weighing programs to avoid losing federal highway funds.

The Federal Highway Administration also is trying to ferret out mechanical problems, which its studies show are found in at least 15 percent of tractor-trailers. Some spot checks have revealed that more than 40 percent of trucks were violating safety standards for brakes, tires and lights.

A federally funded program to improve safety-inspection teams in four states—Michigan, Utah, Idaho and Alaska—has helped to reduce truck accidents by 35 percent.

Still, Pierson estimates that about half the states do not have safety-inspection programs of their own for trucks. Other critics call for better braking standards for trucks and more-effective barrier devices on backs of trucks to prevent smaller vehicles from sliding underneath tractor-trailers.

BUMPY ROADS

Perhaps more serious than any of these problems is the deteriorating condition of the nation's highways. The backlog of immediate repairs on the 40,000-mile interstate highway system stands at more than 6 billion dollars, and some 17 billion will be needed for resurfacing and maintenance in the next decade.

The condition of roads outside the interstate system is even worse. One recent federal study showed that such highways are the scene of more than 90 percent of the nation's fatalities each year.

To raise more money for needed repairs, some 40 states are trying to increase their fuel taxes. Others, such as Michigan, are launching information programs over the radio and in newspapers to warn motorists of the most hazardous stretches of road.

One thing is certain: Aside from a renewed seat-belt program, Washington won't soon be starting any major highway-safety campaigns. In the fiscal year that begins October 1, federal aid for highways has been reduced from 9.01 billion dollars to 8.55 billion dollars, while funds for safety programs were cut by 70 percent, to 547 million.

Experts fear that less federal aid puts states in a vulnerable position at a time when traffic deaths are rising. Notes an official with NHTSA: "Many of the states are in pretty serious financial trouble when it comes to transportation. Safety will not be a top priority if states are left to finance projects on their own."

---

NEW WAYS TO KEEP CARS ON THE ROAD

With only limited funds for new roads, States are focusing on what they can do to make their existing highways safer.

A report released in mid-August by the Road Information Program, a Washington, D.C., group, on just one State—Louisiana—blamed out-of-date roads for causing 85 accidents a day and costing 148 million dollars annually in medical bills, property damage and payments to victims and survivors.

To improve existing roads, State highway departments are relying more on such devices as brighter pavement markings, more-flexible barriers and improved lighting.

One of the most potent weapons in this campaign is a tiny glass bead no bigger than 6 millimeters. When mixed with white or yellow striping paint, the beads boost reflective power on center lines and edge lines, keeping motorists from veering into another lane or drifting off the side of the road.

Research shows that the improved markings can dramatically reduce accidents, particularly on dark, winding secondary roads. They are especially useful in protecting drivers whose vision and reactions are impaired by fatigue or alcohol.

A four-month test on a dangerous 5-mile stretch of Union Valley Road in West Milford Township, N.J., found that the number of accidents was cut by 44 percent after the reflectorized lines were introduced. At the same time, the accident rate on adjacent stretches of road without the new markings increased by 18 percent.

A three-year study by the Highway Commission of Kansas involving 389 miles of secondary roads showed a 16.5 percent reduction in accidents and a nearly 40 percent decline in fatalities with reflectorized lines. Tests in Arizona, Illinois, Ohio and Utah produced similar reductions in accidents.

Those results have led to introduction of the beads in several other states."It's a case of self-interest performing a public service," says General Balcar, vice president of Potters Industries, a New Jersey-based producer of the beads, which are fashioned from waste glass.

Potters, the 3M Company and General Electric are among the firms producing another important safety device: Reflectorized road-delineator posts. Placed at intervals of

150 to 200 feet—closer on curves—the posts also have been found to reduce accidents. In other applications, reflector squares are embedded in the edge lines.

Among other steps, roads are being resurfaced to include grooves that prevent tires from losing traction during rainy weather.

DESIGN TRENDS

Barriers and guard rails are being modified to minimize the damage to small cars. Used increasingly if the "New Jersey" barrier, a concrete median barrier that can withstand the force of large cars but is designed with a sloping face to prevent small cars from flipping over on impact.

William Cooper, chief engineer for the Arkansas State Highway Transportation Department, says such medians have eliminated most head-on collisions.

Crashes also are less serious, he points out, where curved guard railings are in place to deflect vehicles rather than stop them and where barrels are used as shock absorbers at ramp entrances and other danger spots.

In lighting, more road departments are using sodium-vapor lights that are more energy-efficient and can be left on longer without added costs. Also more common: Aluminum lighting poles and highway signs that break away on impact.●

## THE MX: FORGET IT!

### HON. BARNEY FRANK

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

*Monday, September 21, 1981*

● Mr. FRANK. Mr. Speaker, James J. Kikpatrick is a very thoughtful conservative who recently offered President Reagan a bit of very useful advice. Mr. Kilpatrick has proposed one very obvious solution to some of the budget deficit difficulties which the President now finds himself in as a result of congressional adoption of the policies he has proposed to us. Mr. Kilpatrick's suggestion is to drop the MX altogether.

The MX makes very little sense militarily and it now becomes clear that it is a serious economic error to commit untold billions toward this project. By following James J. Kilpatrick's advice and dropping this project, the President could demonstrate his willingness to make substantial cuts in unnecessary defense expenditures, thus doing a great deal to restore some of the confidence of the financial community in his program. And he would also make our defense policy a good deal more sensible. Mr. Kilpatrick's article follows:

[From the Boston Globe, Sept. 17, 1981]

JUST FORGET IT!

(By James J. Kilpatrick)

WASHINGTON.—If there is to be any prayer of a balanced budget, the defense budget must be cut drastically. But how? Last weekend, the President proposed reductions of $13 billion over three years. The reaction on Wall Street was ho-hum. On the CBS Morning News, a leading financier said that if the Administration came up with $30 to $40 billion in cutbacks, the Street might conclude that Mr. Reagan meant business. And if not? The financier shrugged the shrug that bankers are born to shrug.

By nice coincidence, the question of how to cut the defense budget arises side by side with another pressing question: What should be done about the MX missile? Should 200 of these monsters be deployed in 4,600 shelters in Utah and Nevada? Or 100 of them in 2,000 shelters in Nevada alone.

It occurs to me that Mr. Reagan could cut this Gordian knot with a single whack. Drop the MX altogether! Just don't build the damned thing.

Such a solution has the virtue of simplicity: it also has the virtue of sanity.

The military planners who are selling this bill of goods rarely speak in military terms. They have taken up mind reading as a hobby. They would put Mr. Brezhnev into analysis: Lie down, Leonid, and tell us why, with your 5,000 warheads, you feel insecure. Then they work on the President. Lie down, Ronald, and let us see if another 200 missiles would cure the blues.

In any rational view our nation already is sufficiently equipped. Our missiles are poised to impose upon the Soviet Union devastation beyond imagination. At some point, enough must be enough. At some point, gauzy conjecture ought to yield to reality.

What reality? The reality of the prime rate. Our economy depends largely upon two industries, construction and automobiles. When they are sick, the economy is sick, and both are down with the wasting disease. And the virus of exorbitant interest feeds upon federal deficits. Once government borrowing is brought under control, the sick economy will start to recover.

The President's proposed $13 billion reduction in defense outlays will help: if we added the savings that could be achieved by abandoning the folly of the $20 billion MX, the picture would immensely improve.

The oldest rule for hunting ducks is to go where the ducks are. If Mr. Reagan is to bag his balanced budget, he need only look to the western deserts where this marvelous redundancy would be deployed. That is where the ducks are.●

## THE ROLE OF THE SOCIALIST INTERNATIONAL—PART III

### HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

*Monday, September 21, 1981*

● Mr. McDONALD. Mr. Speaker, I now present the conclusion of the address by Count Hans Huyn of the West German Bundestag, in which he suggests the means of counteracting Socialist influence in the West. The reason for doing so is, of course, the basic one of physical survival, because the Socialist International which thrives with the enthusiastic assistance of the West's mass media is operating in open cooperation with the Communist Party of the Soviet Union. A "Freedom International" ought to be established, he says, in order to counter the deliberately demoralizing influence of the Socialist International.

There is in fact a sort of second government under Willy Brandt, which acts as an echo of the Kremlin and helps reinforce Moscow's minutely planned long-term "misinformation" campaigns in Germany and, with the help of the Socialist International, in the whole of Europe. The position has already been reached where Helmut Schmidt can take no decision in his own cabinet without first obtaining the agreement of the party—under the chairmanship of Willy Brandt—and the SPD parliamentary group—under the chairmanship of Herbert Wehner.

Another prominent member of the Socialist International, the former Swedish Prime Minister, Olof Palme, is chairman of the ICDSI (Independent Commission on Disarmament and Security Issues), the so-called Palme Commission. Attempts are continually made in this organization to further the Soviet Western policies rather than to effect genuine disarmament at the lowest possible level. Members carry on as if disarmament negotiations were valuable in themselves. At the Conference of Communist Party Leaders in Prague in 1978, the General Secretary of the Communist Party of the Soviet Union, Brezhnev, had the following to say:

As a result of détente we will have achieved most of our objectives in Western Europe by the year 1985. We will have extended our economy and there will have been such a decisive shift in the present balance of power that we will be in a position by 1985 to enforce our will whenever it is necessary.

It fits in very well with Moscow's ideas, of course, when so-called friends of peace stage anti-American demonstrations in the free part of Germany. This fits in very well with the strategy of uncoupling Germany and Europe from the United States. It does not require much imagination to see the effect that these events will have on our American friends when they are carefully filmed by left-wing media and delivered free to the American viewers. In the eyes of the American television viewers it is of course not "the Marxists or left extremists" but "the Germans", who are demonstrating against American protection, which preserves equilibrium and thus peace. The United States says quite correctly, "You are the ones under threat; if you haven't even the courage to say that you need assistance, why should we make sacrifices for your defense and protection?" Who could blame America if it withdrew under these circumstances? It would not be the first time that America went into isolation, but in all probability the results would be much more fateful than on previous occasions.

During the election campaign in 1980, the SPD tried to divide Germans into good and bad, i.e., into those who were for peace and those who were against peace or put it at risk. This is a

dialectical trick of Herbert Wehner, which he uses continuously in situations vital to the German Federal Republic.

The way in which left-wing circles in Germany are behaving in this respect is really shameful. They consciously poison the whole German-American relationship by untrue statements. They carry on as if the United States had demanded the deployment of atomic weapons in Europe at the time of the NATO rearmament resolution or as if the American Government were considering the strategy of a limited atomic war. All these activities serve the deliberate purpose of poisoning German-American relationships. Egon Bahr, the architect of the "Ostpolitik," tried to convince his readers in "Vorwärts" on the 12th of March 1981, that the Soviet Union was on the retreat everywhere in the world whereas the Americans were attempting to succeed with a policy of strength.

The new American Government knows that it cannot stop this development with kind words alone or only through disarmament negotiations. The West has to oppose the Soviet Union not only with a military equilibrium but with at least as strong a political will.

Europe plays a key role in the long-term strategy of Moscow. Europe, which is economically strong but politically weak, is decisive for the fate of the world. If the Soviet Union can extend its influence over the West, not even using military intervention but only by increasing political influence—either by military threats from the Warsaw Pact or blackmail of the Europeans by withholding raw materials and fuels—then Europe, if it tends more and more toward Moscow, will insure the Soviet Union a stronger world position relative to the United States.

The objective of Soviet politics is to hinder anything which connects European security with the United States in the Atlantic framework.

It is only too easy to understand that the way in which the Liberal/Socialist government is pushing the Federal Republic of Germany into a "self-Finlandization," and the terrifyingly well-developed decoupling process from the United States, has produced growing doubt about the loyalty of the Federal Republic of Germany to the Alliance not only in political leadership circles but widely throughout the United States. However, it is precisely this that the Soviet Union wishes to achieve and for this reason, renewed isolationism in the United States would fit in well with the calculations of Moscow. We must not let this happen.

We must take the offensive against this development. We need a "Freedom International" with the objective of intensive and regular cooperation between all the non-Marxist and free parties.

We can certainly learn from the other side with regard to method and intensity. The Soviet Union has adopted the quotation from Clausewitz: "The conqueror loves peace, he prefers to take over our country without war" and with some skill combines a further quotation from Carl von Clausewitz in the opposite direction. Clausewitz said that war is the continuation of politics by other means. In the CPSU leadership, they do not begin with politics, like Clausewitz, but with war—for Moscow, the cold war is the continuation of the "hot war" by other means and "détente" is the continuation of the cold war by other means.

For this reason, the present political challenges include the wide field of subversion and disguised aggression, so wonderfully understood by the Soviet Union. It occurs below the threshold level of a large-scale war, which we all fear. There is no field of action in society neglected by our opponents. I can only list a few here—public opinion, political parties, trade unions, schools, universities, even the churches. In my opinion, the first task of offensive public relations on the side of freedom is to inform the public.

I have tried to do this in my book "The Attack," which appeared in 1978. In it, I devoted a chapter to the use of international terrorism by the KGB as a means of destabilizing Western society. My other book, "Five to Twelve—The World After Afghanistan," appeared at the end of 1980. This book has two parts; the first is called "The Challenge" and the second "The Response." I have there attempted to indicate the possibilities which are open to the free societies of the West to oppose the Soviet advance in all fields.

First of all, it is necessary to insure the balance of power, to recognize Soviet strategy and to keep the public in the West well informed. The next point is the further development of the Atlantic Alliance, which really only protects the main entrance of Europe from Soviet attack. However, what use is the best alarm and security installation at the front door if the enemy can threaten us through the rear door? It is particularly important that we Europeans are clear that we do not only have to defend our freedom in the territory of the Atlantic Alliance but that our interests are much wider spread. It is not satisfactory to leave this task to our American friends alone. Furthermore, free Europe must develop more self-confidence in the security field and stronger responsibility within the Atlantic Alliance in order to fulfill its historical role as partner of the United States.

The way in which the actions of the Socialist International in Central and South America play into the hand of the Soviets can be easily seen from the praise given by the Moscow "Pravda," which in January of this year emphasized the "evolution of the foreign political concepts of the Socialist International in the last 10 years."

The SI openly supports the pro-Cuban regime in Nicaragua and the extreme left-wing guerrilla groups in El Salvador. The next Congress of the Socialist International is to take place in Managua. In Puerto Rico, they struggle together with Havana against the alleged "colonial status" of the island. Whereas the pro-Soviet mini-State of Grenada is accepted as a full member of the International, the East European Social Democratic Parties in exile have only an advisory function. In the Near East, the PLO is the favorite child of the International and in Africa, it is the Communist SWAPO. The SI is therefore very useful to the Kremlin. The Central Committee Secretary, Ponomarev, included the Socialist International in the "peaceful forces" of the world in April 1978.

We Germans and the European conservatives are very relieved to know that after years of uncertainty the United States has returned to a clear-cut line with respect to its foreign policy. We rejoice over evey unambiguous word from Washington. I am particularly thankful to President Reagan for his clear words on the occasion of the 20th anniversary of the building of the Berlin wall and the clarity with which he renewed the United States' guarantee for the freedom of West Berlin. In the statement of his belief in a future of freedom, the American President has given new strength for this future to many people who are not living in freedom.

We must accept the challenge. The task is to defend peace and our freedom. We must recognize that the final objective of Soviet politics is world domination and that they attempt to achieve this as far as possible quietly and undercover. They use tools some of which are very effective. We must develop our own instruments of protection and learn how to use them. We must also recognize another fact—in this struggle America and Europe cannot be victorious independently, they can only succeed jointly.

For years, efforts have been made in Europe to oppose the Socialist International with something comparable. I myself am a founder member of the European Peoples' Party, a combination of Christian Democratic parties in the European Parliament. We tried to include the conservative parties in the European Peoples' Party. This has unfortunately failed because of the veto of our Christian Democratic sister party in Holland. This was followed by the foundation of the EDU, the Euro-

pean Democratic Union, in which the conservative parties of the neutral European States are also represented. We therefore have a wide body for the exchange of ideas and information and for discussion. What we need is an improved coordination of operations. The EDU must naturally result in future in a Freedom International. Fortunately, the EDU has already made contact with sister parties in Japan, Australia, and New Zealand and included them in the work. It is important that we should also win over our American friends for joint activities. Only then can we meet the challenge of the popular front cooperation between Moscow and the International of Socialism and act against them as the defenders of freedom.

Peace alone is not the highest value. There is also the peace of the graveyard, the concentration camp and the GULAG Archipelago. We must maintain and secure for ourselves and our children peace in freedom. The first condition for the maintenance of freedom is the readiness and the courage to act for it.●

## RADICAL MANIPULATION OF SOLIDARITY DAY

**HON. LARRY McDONALD**
OF GEORGIA
IN THE HOUSE OF REPRESENTATIVES

*Monday, September 21, 1981*

● Mr. McDONALD. Mr. Speaker, on Saturday, September 19, 1981, an estimated 400,000 people made their way to New York's Central Park to be entertained by musicians Paul Simon and Art Garfunkle, two songwriters who as Simon and Garfunkle achieved fame during the 1960's. Mayor Ed Koch of New York City summed up the views of those 400,000 people in the Simon and Garfunkle audience, applauding it as a "terrific performance."

On the same day, at enormous monetary cost and at great administrative effort, the American Federation of Labor-Congress of Industrial Organizations (AFL-CIO) brought to Washington, D.C., from across the country about half that number of people for a march and rally against the economic policies of President Reagan.

"Solidarity Day," as the AFL-CIO effort was known, has to be seen in the context, not only of the vast attendance in New York to hear Simon and Garfunkle, but also in context with the AFL-CIO's claim to represent 15 million workers. So despite fine weather, free cross-country transportation, free food, free entertainment, and in some instances payment of $50 to participants for demonstrating, the Solidarity Day organizers were able to bring only 1 percent of their active membership to Washington—supplemented by a band of leftist activists from a variety of partisan organizations, many of which are stridently hostile to the responsible leadership of the AFL-CIO.

The motivation of many attending Solidarity Day was made clear by the fact that the largest contingent in the protest came from the ranks of the leftist-led American Federation of State, County and Municipal Employees (AFSCME), a union whose manifest self-interest in maintaining and expanding bloated "big government" spending was reflected in the union's support for outworn, wasteful so-called social welfare programs and in AFSCME contingents chanting,

Reagan, Reagan we're no fools; you is [sic] just a capitalist tool.

However, according to its organizers, the purpose of "Solidarity Day" was more lofty than what was espoused by the AFSCME contingents. "Solidarity Day," said the AFL-CIO, was:

To demonstrate the widespread opposition to the Administration's assault on vital social programs and to promote jobs, justice and equality. The focus will be on the following areas of concern (in alphabetical order): Civil Rights, Education, Energy, Environment, Fair Trade, Fair Taxes, Health and Safety, Housing, Jobs, Justice, Lower Interest Rates, Social Security, Voting Rights and Women's Rights."

The members of the "Solidarity Day" advisory board responsible for the event were Lane Kirkland, AFL-CIO; Thomas R. Donohue, AFL-CIO; Arnold Aronson, Leadership Conference for Civil Rights (LCCR); Tony Bonilla, League of United Latin American Citizens (LULAC); Kenyon Burke, Division of Church & Society of the National Council of Churches (NCC); Jacob Clayman, National Council of Senior Citizens (NCSC); Sam Church, United Mineworkers (UMW); Murray Finley, Amalgamated Clothing and Textile Workers (ACTWU); Douglas Fraser, United Auto Workers (UAW); Dorothy Height, National Council of Negro Women (NCNW); Benjamin L. Hooks, National Association for the Advancement of Colored People (NAACP); Rev. Jesse Jackson, Operation PUSH; Vernon Jordan, National Urban League; Coretta King, Full Employment Action Council (FEAC); Henry Lacayo, LCLAA; Msgr. Francis J. Lally, Office of Domestic Social Development, U.S. Catholic Conference; Rev. Joseph Lowery, Southern Christian Leadership Conference (SCLC); Lloyd McBride, United Steelworkers of America (USWA); Joyce Miller, Coalition of Labor Union Women (CLUW); Gaylord Nelson, Wilderness Society; Charles Pillard, International Brotherhood of Electrical Workers (IBEW); Reese Robrahn, American Coalition of Citizens with Disabilities (ACCD); Bayard Rustin, A. Philip Randolph Institutes; Chuck Senci Concerned Seniors for Better Government (CSBG); Albert Shanker, American Federation of Teachers (AFT); Donald Slaiman, Jewish Labor Council (JLC); Eleanor Smeal, National Organization for Women (NOW); Jessica Smith, Frontlash; Sharon Stark, Consumer Federation of America (CFA); Douglas Tuthill, U.S. Student Association (USSA), and William Wynn, United Food and Commercial Workers (UFCW).

AFL-CIO President Lane Kirkland invited the participation of all trade unions, including those not currently affiliated with the federation, as well as other organizations that are affiliated with the Leadership Conference on Civil Rights and the Budget Coalition. Additionally, a number of national organizations—political, racial, professional, and other special interest—endorsed Solidarity Day and sent contingents to the Washington march.

Manifestly, the AFL-CIO has the right to make known its views on the economy through Solidarity Day-type demonstrations. As President Reagan said, "the frustrations of working people enduring a sluggish economy, persistent inflation and high interest rates and being asked to swallow economic medicine that is hardly sweet" is easily recognizable and understandable.

However, the partisan political views expressed by the Solidarity Day speakers and leftist-led contingents together with their indiscriminate wholesale rejection of the administration's economic measures indicates that the leaders of labor's intransigent left who were strongly represented on the Solidarity Day Advisory Board are manipulating the AFL-CIO leadership for their own purpose. That purpose is the destabilization of the Reagan administration by political action combined with illegal Federal union strikes and slowdowns.

It is also apparent that for some time Marxist-Leninist totalitarian organizations and extremists have been seeking to use the AFL-CIO event for their own purposes. When challenged on this matter in relation to Communist participation in Solidarity Day, the AFL-CIO leadership blandly stated that it would not "disinvite" any groups. Furthermore, too late to make any difference, the AFL-CIO said that it "did not welcome" Communists involvement.

Mr. Speaker, for the millions of anti-Communist trade unionists, this is not enough. George Meany never hesitated to call a Communist a Communist and "include them out" of AFL-CIO activities, as witness the 1975 Washington rally when a mass protest against unemployment came to an early end because of the disruptive behavior of uninvited radical groups.

In an effort to identify the totalitarian influences in this Solidarity Day

event, the authoritative Information Digest, the leading U.S. publication reporting on American political and social movements, has prepared a lengthy study of radical involvement in Solidarity Day from which I have developed the following information.

The Communist Party, U.S.A. (CPUSA) gave full coverage in the party press of Solidarity Day from its inception. On August 15, CPUSA General Secretary Gus Hall called for all-out Communist support of the September 29 protest, urging the "declaring of a state of national emergency on September 19, a day of new heightened struggle, new unity, new coalitions, new alliances" against the "corporate-Reagan offensive" and "policies of racism."

However, well before the CPUSA's official announcement of support for the September 19 demonstration, the party's front organizations had come out in support of Solidarity Day. For example, Women for Racial and Economic Equality (WREE), a CPUSA front group which is the U.S. section of the Soviet-controlled Women's International Democratic Federation (WIDF), adopted as its priority resolution during its July 9-12, 1981, convention support for the Solidarity Day rally. WREE is working closely with the Coalition of Labor Union Women (CLUW).

Two days before the AFL-CIO's Solidarity Day, the CPUSA made plain its agenda—destruction of the existing two-party system and creation of a new political party. In the words of a Daily World editorial:

> Only unity of labor and other people's organizations can achieve victory over Reagan's "give the rich everything" policies. * * * When the protesters go home from Washington, we will all have two important jobs—to defeat every "cutback representative" in Congress, and to take the steps to make sure that decent representatives replace them. We think a united people's party is an important tool in achieving both. Isn't a new people's party an idea whose time has come?

Labor Today, the official publication of the CPUSA's front for penetration of the trade unions, Trade Unionists for Action and Democracy (TUAD), was even more bluntly explicit, writing:

> Today's demonstration represents, in embryo, the new people's political alliance, based upon organized labor and encompassing every abused and aggrieved and insulted constituency across the land.

As one example of possible CPUSA manipulation, at Operation PUSH's 10th convention in Chicago, its leader, Rev. Jesse Jackson, called for full participation by his group in Solidarity Day. Rev. Jackson's top aide and adviser is Jack O'Dell, also known as Hunter Pitts O'Dell, formerly the CPUSA's top southern organizer. Under the alias "Cornelius James," O'Dell was a member of the Communist Party, U.S.A. National (now Central) Committee and at the same time was a top-level aide to Rev. Martin Luther King, Jr.

It should be noted that a book published this year entitled "The FBI and Martin Luther King, Jr.," reported that on June 22, 1963, President John F. Kennedy met with Reverend King and told him that two of his closest advisers, lawyer Stanley Levison and Jack O'Dell, were Communists and urged King to "get rid of them." But Reverend King did not "get rid of" either Levison or O'Dell and maintained a documentable yet semicovert relationship with them until his death.

Operation PUSH also supported the Solidarity Day demonstration at a labor breakfast during its convention attended by what the CPUSA's Daily World termed "some 500 secondary and top leaders of the trade union movement." Among those who attended were William Lucy, international secretary, AFSCME and leader of the Coalition of Black Trade Unionists (CBTU); Charles Hayes, district director and vice president, United Food and Commercial Workers Union (UFCW) and who is an identified CPUSA member active in the leadership of the Coalition of Black Trade Unionists (CBTU); Addie Wyatt, international vice president, UFCW, and president, CLUW; Frank Rosen, director, district 11, United Electrical Workers Union (UE) and an identified CPUSA member; Marc Stepp, past vice president, UAW; and James Balanoff, outgoing director, district 31, United Steelworkers of America (USWA).

From that point onward, most U.S. left groups including Communists, Trotskyites, black militant groups, and assorted "new leftists" joined the organizing effort to bring their members to Washington for the September 19 march. But they did not seek to have their members march as easily identified members of totalitarian Marxist-Leninist parties, but as members of trade union locals or assorted so-called peace groups.

Those present included:

Communist Party, U.S.A., the official Soviet-line Communist Party which serves as an agency for propaganda and Soviet covert action under the direction of the International Department of the Central Committee of the Soviet Communist Party. The CPUSA claims to have some 10,000 current members and 100,000 supporters. While the membership claim appears exaggerated, it is noted that the Communists now have more power on the New York City Council than ever before in their history.

Trade Unionists for Action and Democracy (TUAD) is the chief CPUSA front for penetration of the trade union movement. But the Communist Party, U.S.A. is active in other labor movement organizations such as the Coalition of Black Trade Unionists (CBTU) and Coalition of Labor Union Women (CLUW). The CPUSA retains strong influence in the remnants of several unions expelled from the CIO because of their Communist Party control. A number of officials from those old Communist-controlled unions have retained influence as their unions have undergone mergers such as the old Mine, Mill and Smelter Workers into the United Steel Workers of America (USWA); the United Packinghouse Workers into the Amalgamated Meatcutters and now the United Food and Commercial Workers; and district 65 (Distributive Workers) into the United Auto Workers (UAW).

Socialist Workers Party (SWP), a Trotskyite Communist Party that collaborates with the Soviet Union's efforts against the United States and which recently formed a strong alliance with Cuba. The SWP is the U.S. section of the Fourth International, the Brussels-based principal coordinating body for Trotskyist parties. The SWP and its youth arm, the Young Socialist Alliance (YSA) claim some 2,500 members.

The SWP has been conducting a major effort to "colonize" trade unions in key services and industries including the traditional steel and auto unions and the various public employee unions that organize teachers, social workers, and other white collar and bureaucratic employees.

Workers World Party (WWP), now a hardline "Stalinst" party strongly supportive of Cuba, North Korea, and the Soviet Union, the WWP was formed 20 years ago by a small group of ultramilitant Trotskyist backers of the Cuban revolution who split off from the SWP. The WWP has an estimated hardcore membership of 600. Its major fronts include the People's Anti-War Mobilization (PAM), Youth Against War and Fascism (YAWF), and the National Anti-Draft Network (NADN). WWP's trade union front, the center for United Labor Action (CULA) has been relatively inactive recently.

Puerto Rican Socialist Party (PSP), a Castroite Communist Party with a long record for violence that serves as the umbrella group under which the FALN and other revolutionary terrorist groups operate. The PSP has maintained an office in Havana since 1960. Its demands for Puerto Rican independence are backed internationally by the Soviet-controlled front organizations led by the World Peace Council and in the United Nations by Cuba and the Soviet bloc. On the U.S. mainland, the PSP claims 2,000 members.

The PSP controls several radical labor groups in Puerto Rico including the electrical workers union, UTIER,

and the United Workers Movement (MOU).

Various Trotskyite splinter groups including the violence-oriented Spartacist League (SL), the militant Revolutionary Socialist League (RSL), and the International Socialists (IS) which control Teamsters for a Democratic Union (TDU).

Democratic Socialist Organizing Committee/New American Movement, two organizations, the one the U.S. incarnation of the leftwing of "Euro-socialism" which is willing to collaborate with the Communists and the other, the U.S. expression of "Euro-Communism," which have ratified their merger. DSOC has traditionally worked within the leftwing of the Democratic Party. The groups together total some 4,000 members.

ACORN—the Association of Community Organizations for Reform Now—based in New Orleans and active in Arkansas and other States, ACORN is attempting to harness traditional American populism to Marxist socialism. Its organizers are veterans of the community organizing projects of Students for a Democratic Society (SDS), and appear to be attempting to build a grassroots political base for Marxists to gain public office disguised as populists and reformers.

Various black militant groups such as the explicitly anti-imperialist and anticapitalist National Black Independent Political Party.

Progressive Labor Party (PLP), an ultradoctrinaire self-described revolutionary Communist party with a long record for engaging in violent confrontations with rival totalitarian groups and with police. PLP and its front, the International Committee Against Racism (ICAR), maintain an extreme stance of opposition not only to the U.S. Government, but also to the leftwing of the trade union leadership.

During the Solidarity Day event, PLP attempted to stage a breakaway march calling for a general strike, and from the steps of the National Archives harangued the AFL-CIO contingents. When the PLP attempted to march into the trade union groups, prompt and effective action by the Metropolitan Police Department resulted in their being contained and subsequently dispersed.

Early in August, William Winpisinger, president of the International Association of Machinists, cochairman of SANE, and associate of the Institute for Policy Studies, invited a number of peace groups to join the IAM contingents on Solidarity Day.

The Militant, the publication of the Socialist Workers Party (SWP), reported that Winpisinger had sent out a special mailing encouraging peace groups to participate. The article quoted IAM staffer Barbara Shailor as saying:

We think it's very important to have a full turnout of peace groups on Solidarity Day.

As a result of Winpisinger's invitation, letters were sent by the peace groups to their members. Typically, the letters stated that the IAM had provided the peace groups with lists of the IAM's State coordinators as contacts about general Solidarity Day planning and for transportation to Washington.

I would point out that Winpisinger's next slap to the AFL-CIO is a planned trip to Moscow in October in order to meet with the leaders of the Soviet Union's phony union movement—the same Communist bureaucrats who today are taking the lead in attacking the free trade union movement in Poland, Solidarity.

Among the organizations who joined with Winpisinger in supporting his action, and who were invited to be present in the Solidarity Day demonstration with the IAM were:

American Friends Service Committee (AFSC), formed by a group of socialist Quakers opposed to the draft in World War I, the AFSC has been penetrated and used by Communists since the early 1920's when it sent Jessica Smith to the Soviet Union to determine famine relief needs in Russia which was suffering from the effects of forced collectivization of farms and the effects of civil war.

In its literature, the AFSC has publicly and consciously chosen to support revolutionary terrorist groups and has tried to justify revolutionary armed struggle and terrorism by claiming that the armed violence of the freedom fighters—terrorists—will bring a socialist utopia that will end the violence of the status quo, by which AFSC means the existence of poverty, social and economic inequalities, unemployment, and lack of a decent education.

In the early 1970's, the Philadelphia meeting of the Society of Friends withdrew its financial support from the AFSC as a result of its support of violence.

Committee Against Registration and the Draft (CARD), a Washington-based coalition of revolutionary, "peace," disarmament and socialist-pacifist groups including the American Civil Liberties Union (ACLU), SANE, American Friends Service Committee (AFSC), Mobilization for Survival (MFS) and Coalition for a New Foreign and Military Policy (CNFMP). CARD chapters in Detroit and some other areas have been taken over by the Socialist Workers Party (SWP), the U.S. section of the main coordinating body for Trotskyite Communist parties, the Fourth International.

Clergy and Laity Concerned (CALC), a self-described "anti-imperialist" organization founded by the National Council of Churches (NCC) to oppose United States support of South Vietnam. Led for a number of years by Rev. Richard Fernandez, CALC's representative in the leadership of the pro-Hanoi People's Coalition for Peace and Justice (PCPJ) which organized violent anti-Vietnam protests, and by Don Luce, an apologist for the Hanoi regime, CALC has interpreted "anti-imperialism" to include support for Soviet-backed Third World revolutionary terrorist movements and Marxist totalitarian regimes.

Coalition for a New Foreign and Military Policy (CNFMP), a Washington-based lobbying organization against U.S. defense spending. The CNFMP formerly was called the Coalition to Stop Funding the War and was the lobbying arm of the Communist-dominated anti-Vietnam coalitions. Members of the coalition and its projects range from several fronts of the Communist Party, U.S.A., through "peace" and "disarmament" groups to the Institute for Policy Studies (IPS), a Marxist think tank with which the CNFMP works closely. IPS has been characterized as the "perfect intellectual front for Soviet activities which would be resisted if they were to originate openly from the KGB."

Fellowship of Reconciliation (FOR), a socialist/pacifist group that has actively worked in Soviet-initiated disarmament campaigns and in backing the Marxist-Leninist terrorist movements in Southeast Asia.

Institute for Policy Studies (IPS), a Washington-based revolutionary think tank that has consistently supported policies that facilitate the foreign policy goals of the Soviet Union and weaken the position of the United States. This has been true whether the issue is disarmament—for the West—and transferring defense appropriations into social welfare programs, abolition of nuclear power—for the West, opposition to the activities of foreign and domestic intelligence agencies—for the West—or support for Soviet-backed revolutionary terrorist groups in Asia, Africa, Latin America, Western Europe, and the Middle East.

To put its policy recommendations into action, IPS has built networks of contacts among congressional legislators and their staffs, academics, government officials, and the media.

IPS has been described as the "perfect intellectual front for Soviet activities which would be resisted if they were to originate openly from the KGB."

Mobilization for Survival (MFS), an organization founded by two veteran Communists, Sid Peck and Sid Lens, both active for two decades with the Soviet-controlled World Peace Council and its affiliates. The MFS is designed to harness antinuclear and environmentalist activists to the campaigns to block development and deployment of new U.S. defense systems which, of

course, aids the U.S.S.R.'s drive for total military superiority.

The MFS calls for the transfer of U.S. defense appropriations to social welfare programs. Major MFS national members include the AFSC, FOR, USPC, WILPF, WRL, CNFMP, and numerous local antinuclear, disarmament and environmental groups.

The MFS international task force was organized and chaired by two WPC activists, Terry Provance, head of the AFSC's disarmament program and a former CNFMP staffer, and Katherine "Kay" Camp, a leader of the Women's International League for Peace and Freedom (WILPF). The leader of the MFS labor task force is Gilbert "Gil" Green, a longtime member of the CPUSA Political and Central Committees who served throughout the period of anti-Vietnam agitation as the Communist Party's official liaison in the leadership of the Communist-dominated anti-Vietnam coalitions.

National Alliance Against Racist and Political Repression (NAARPR), a CPUSA front organization formed in 1973, led by CPUSA Central Committee members Charlene Mitchell and Angela Davis. NAARPR's primary function is to serve as the Communist Party's spearhead in manipulating black community groups and civil rights organizations.

The NAARPR is active in supporting the "prison movement" which attempts to organize and radicalize violent convicted prisoners. It should be noted that a number of revolutionary convicts have become leaders of terrorist groups including the Symbionese Liberation Army and its predecessor, the Venceremos Organization (VO), the George Jackson Brigade in Seattle, Wash.; and the Black Liberation Army, a splinter from the Black Panther Party.

NAARPR's Communist Party leaders also have been active in antipolice agitation in racially tense communities suffering from riot and preriot conditions; and in supporting political prisoner status for convicted criminals.

On September 1, NAARPR executive secretary Charlene Mitchell released a statement that NAARPR

> Stands firmly committed to doing all within its capacity to turn all out for Solidarity Day * * * to reject Reaganomics and government repression. * * * the antilabor, antipeople, and blatantly racist policies of the Reagan administration are a clear and present danger to us all. Yet we firmly believe that labor and its allies can turn back the tide of racist and political repression, can lead our country to reorder its budget priorities so as to put human needs before profits and military adventurism. * * * sound the warning for those who take from the needy and give to the greedy.

National Conference of Black Lawyers (NCBL), a U.S. affiliate of the Soviet-front International Association of Democratic Lawyers (IADL). Although the NCBL merely an estimated 500 members as compared to the 6,000 in the predominantly white National Lawyers Guild, the NCBL is often used ahead of the NLG in "solidarity work" with Third World revolutionaries and in taking positions on radical issues in the United States for racial considerations.

National Lawyers Guild (NLG), organized with the assistance of the Comintern in 1936 as a Communist legal action front, the NLG remains the principal legal bulwark of the CPUSA, its fronts and controlled unions. While there are small numbers of Maoists, Trotskyites, and independent Marxist "New Leftists" in the organization, the NLG's international positions demonstrates that the real domestic control of the NLG lies with the supporters of the Soviet and Cuban Communist regimes.

The NLG is the largest U.S. affiliate of the International Association of Democratic Lawyers (IADL), described in a CIA report on Soviet propaganda operations prepared at the request of the House Intelligence Committee and published by the committee in 1978, as "one of the most useful Communist front organizations at the service of the Soviet Communist Party."

New Democratic Coalition (NDC), an organization founded in the mid-1960's by IPS leader Marcus Raskin as a vehicle for left-of-center progressives working within the Democratic Party reform movement.

Operation Push, a Chicago-based group headed by Rev. Jesse Jackson, a former leader of the Southern Christian Leadership Conference. Operation Push's international relations director, Jack O'Dell, alias Hunter Pitts O'Dell, still an editor of the CPUSA's Freedomways magazine, was formerly CPUSA's top southern organizer and a member of its National (now Central) Committee. In the early 1960's, O'Dell's high-level position as an aide to Rev. Martin L. King in the Southern Christian Leadership Conference caused a national controversy.

With O'Dell as Jackson's international adviser, Operation Push has become involved with pro-Palestine Liberation Organization activities as well as backing for Soviet-trained terrorist groups in southern Africa. CPUSA support for Operation Push dates at least to the early 1970's when the Communist Party pointed out Operation Push's basic anticapitalist tenor.

Sane, "a citizens organization for a sane world," was formed in the early 1960's as part of the disarmament ban-the-bomb movement. Sane has been active in drives against development or deployment of new U.S. weapons systems and against U.S. foreign policies that interfere with Soviet goals. Sane's tax-exempt funding arm, the Sane education fund, is controlled by members and veterans of the Institute for Policy Studies.

In May 1981, Sane cosponsored a Capitol Hill meeting against U.S. plans to strengthen NATO by deploying new medium-range missiles in Western Europe that featured foreign leaders of the World Peace Council and Richard Barnet, cofounder of IPS. Sane's cochairmen are Seymour Melman and IAM president William Winpisinger. Other top leaders of the group include IPS cofounder Marcus Raskin; Edith Tiger, director of the National Emergency Civil Liberties Committee (NECLC), a CPUSA front organization targeted against the U.S. internal security and intelligence programs; and David Cortright, Sane executive director and IPS veteran.

Southern Organizing Committee for Economic and Social Justice (SOCESJ), a Communist Party, U.S.A. front organization founded and led by Anne Braden, for many years one of the top CPUSA recruiters and organizers in the South. Braden is also active in the NAARPR, WILPF, and WREE.

U.S. Peace Council (USPC), the U.S. affiliate of the Soviet-controlled World Peace Council. USPC leaders include such CPUSA veterans as Abe Feinglass, a member of the WPC presidential committee; and Michael Myerson, a longtime functionary of the New York State Communist Party.

The World Peace Council is the Soviet Union's major international Communist front organization and has its headquarters in Helsinki, Finland. According to a 1978 CIA study prepared at the request of the House Intelligence Committee, the WPC operates under the joint control of the International Department of the Central Committee of the Communist Party of the Soviet Union (CPUSU) and the KGB. The WPC's primary function is to influence public opinion and governmental policies in non-Communist countries along lines favorable to Soviet policy goals. In other words, the WPC and its affiliates are vehicles for Soviet covert action.

War Resisters League (WRL), the U.S. section of the War Resisters International (WRI), an organization of militant socialist pacifists which has collaborated with the Communist-led peace and disarmament campaigns for many years. WRI sections in a number of countries including West Germany have fallen under the control of the pro-Soviet Communists. In its publications, the WRL has supported terrorist groups ranging from the Irish Republican Army and Palestine Liberation Organization to the West German Red Army Faction (Baader-Meinhof gang).

Women for Racial and Economic Equality (WREE), a CPUSA front organization which is the U.S. affiliate of the Women's International Demo-

cratic Federation (WIDF), another of the Soviet-controlled international Communist fronts that serve as vehicles for Soviet covert action. WREE's primary target as co-optation is the Coalition of Labor Union Women (CLUW), headed by Joyce Miller and UFCW vice president Addie Wyatt.

Women's International League for Peace and Freedom (WILPF), founded by socialist-pacifists opposed to World War I, WILPF has been thoroughly penetrated by the Communist Party. WILPF works closely with the WPC and WIDF and is highly active in the leadership of the U.S. antidefense and disarmament campaigns.

Other special interest groups ranging from gay rights advocates and the National Organization for Women (NOW) through the antinuclear and ecology groups to the supporters of the Soviet and Cuban-backed terrorist revolutionary movements in Latin America, Africa, and the Middle East were present in the Solidarity Day march in order to protest various aspects of the Reagan administration's policies.

While the responsible leadership of the AFL-CIO were able to exclude the most extreme revolutionary factions from the official Solidarity Day program, and prevent, by use of their own 400 platform security marshals, revolutionary groups from placing their banners in full TV camera range or from taking over the microphones, they were not able to prevent small acts of vandalism and violence by some of the extreme militant groups such as the Progressive Labor Party or to prevent an unprovoked attack on CBS news commentator Lem Tucker by their own security marshals—an attack which resulted in Mr. Tucker suffering three broken ribs and possibly severe internal injury, and which, although reported by the wire services, was largely ignored by the print media.

However, regardless of the minimal violence during Solidarity Day, tremendous damage was done to the democratic labor movement during the organizing for the event by the AFL-CIO's disinclination to exclude the Marxist-Leninists. The disciplined revolutionary left and spurious "peace" groups were able to make their impact because from the first announcement of Solidarity Day, these groups were among the most active in each local planning area.

They organized telephone banks, hired buses, and provided the manpower to insure a large participation by the far left in the demonstration. Working with the local trade union establishment, such as city and town labor councils, these leftist groups made themselves invaluable to the non-Marxist local trade union organizers of Solidarity Day. Local union officials were given little encouragement and direction by the AFL-CIO leadership how to keep out radicals.

Having achieved their penetration of organized labor and attained an acceptance and "respectable" status with local union officials, it was unlikely that the radicals would involve themselves either in confrontations or adventuristic violence during Solidarity Day. But long term, these groups, many of whom work with the Soviet Union's covert action and propaganda apparat, may have created a climate in which they can collect future political dividends.

The relatively small turnout of trade union activists indicates that the AFL-CIO leadership erred in allowing itself to be dragged along by their leftist fringe personified by William Winpisinger, Jerry Wurf, and Douglas Fraser.

The appearance of the Marxist-Leninist parties and Communist-controlled "peace" groups of Solidarity Day is a further embarrassment to the legitimate trade union movement which must result in both a loss of credibility and a demand by the rank-and-file for the removal of anti-Americans from their positions of leadership and influence.●

## SENATE COMMITTEE MEETINGS

Title IV of Senate Resolution 4, agreed to by the Senate on February 4, 1977, calls for establishment of a system for a computerized schedule of all meetings and hearings of Senate committees, subcommittees, joint committees, and committees of conference. This title requires all such committees to notify the Office of the Senate Daily Digest—designated by the Rules Committee—of the time, place, and purpose of the meetings, when scheduled, and any cancellations or changes in the meetings as they occur.

As an additional procedure along with the computerization of this information, the Office of the Senate Daily Digest will prepare this information for printing in the Extensions of Remarks section of the CONGRESSIONAL RECORD on Monday and Wednesday of each week.

Any changes in committee scheduling will be indicated by placement of an asterisk to the left of the name of the unit conducting such meetings.

Meetings scheduled for Tuesday, September 22, 1981, may be found in the Daily Digest of today's RECORD.

### MEETINGS SCHEDULED

#### SEPTEMBER 23

9:00 a.m.
*Small Business
To hold hearings on the impact of high interest rates on small business, and to examine their future credit needs.
424 Russell Building

Select on Intelligence
Closed business meeting.
Room S-407, Capitol

Joint Economic
Monetary and Fiscal Policy Subcommittee
To hold hearings to examine Social Security employment, savings, and retirement programs.
1224 Dirksen Building

9:30 a.m.
Commerce, Science, and Transportation
Merchant Marine Subcommittee
To resume hearings on S. 1593 and S. 125, bills revising and clarifying U.S. regulation of international liner shipping in the U.S. foreign trade.
235 Russell Building

Governmental Affairs
Governmental Efficiency and the District of Columbia Subcommittee
To hold hearings on S. Res. 207, disapproving certain action of the District of Columbia government relating to the reform of the sexual assault laws of the District of Columbia.
357 Russell Building

Governmental Affairs
Intergovernmental Relations Subcommittee
To hold oversight hearings to review standard language to be included in all future block grant legislation.
3302 Dirksen Building

10:00 a.m.
Energy and Natural Resources
Business meeting, to consider pending calendar business.
3110 Dirksen Building

Environment and Public Works
To resume markup of an original bill authorizing funds for the municipal wastewater treatment construction grant programs of the Clean Water Act.
4200 Dirksen Building

Foreign Relations
To hold hearings on the nominations of Thomas Aranda, Jr., of Arizona, to be Ambassador to Uruguay, and Frank Ortiz, Jr., of New Mexico, to be Ambassador to Peru.
4221 Dirksen Building

Judiciary
Business meeting, to consider pending calendar business.
2228 Dirksen Building

Labor and Human Resources
Investigations and General Oversight Subcommittee and Labor Subcommittee
To hold joint oversight hearings on the activities of the Occupational Safety and Health Administration.
4232 Dirksen Building

#### SEPTEMBER 24

9:00 a.m.
Commerce, Science, and Transportation
To hold hearings on S. 1402, establishing uniform width and length standards for commercial motor vehicles on interstate highways.
1224 Dirksen Building

*Small Business
To continue hearings on the impact of high interest rates on small business and to examine their future credit needs.
424 Russell Building

9:30 a.m.
*Banking, Housing and Urban Affairs
Business meeting, to mark up S. 1230, authorizing the minting of special coins commemorating the 1984 summer Olympic games in Los Angeles, California
5302 Dirksen Building

Commerce, Science, and Transportation
Merchant Marine Subcommittee
To continue hearings on S. 1593 and S. 125, bills revising and clarifying U.S. regulation of international liner shipping in the U.S. foreign trade.
235 Russell Building

Judiciary
*Constitution Subcommittee
To resume oversight hearings on the implementation of the Freedom of Information Act, and on S. 1247, S. 1235, and S. 587, bills providing for the protection of certain confidential information from the disclosure requirements of the Freedom of Information Act.
2228 Dirksen Building

10:00 a.m.
Armed Services
To hold hearings on the nominations of James F. Goodrich, of Maine, to be Under Secretary of the Navy, Thomas K. Turnage, of California, to be Director of Selective Service, and John S. Herrington, of California, to be an Assistant Secretary of the Navy, and routine military nominations.
212 Russell Building

Budget
To resume hearings on the proposed second concurrent resolution revising the Congressional Budget for the Federal Government for fiscal years 1982, 1983, and 1984.
6202 Dirksen Building

Energy and Natural Resources
To hold hearings on the nomination of Henry E. Thomas IV, of Virginia, to be an Assistant Secretary of Energy for International Affairs.
3110 Dirksen Building

Foreign Relations
To hold hearings on the proposed Convention with Canada with Respect to Taxes on Income and Capital (Ex. T, 96th Cong., 2d Sess.).
4221 Dirksen Building

Governmental Affairs
To hold hearings on the nomination of Loretta Cornelius, of Virginia, to be Deputy Director of the Office of Personnel Management.
3302 Dirksen Building

Joint Economic
To hold hearings on the Consumer Price Index figures for the month of August.
2154 Rayburn Building

2:00 p.m.
Budget
To continue hearings on the proposed second concurrent resolution revising the Congressional Budget for the Federal Government for fiscal years 1982, 1983, and 1984.
6202 Dirksen Building

Foreign Relations
To continue hearings on the proposed Convention with Canada with Respect to Taxes on Income and Capital (Ex. T, 96th Cong., 2d sess.).
4221 Dirksen Building

## SEPTEMBER 25

9:30 a.m.
Commerce, Science, and Transportation
To hold hearings on the nomination of Harold E. Shear, of Connecticut, to be Administrator of the Maritime Administration, Department of Transportation.
235 Russell Building

Finance
Taxation and Debt Management Subcommittee
To hold hearings on miscellaneous tax proposals.
2221 Dirksen Building

10:00 a.m.
Armed Services
To hold closed hearings on the military and technical implications of the Airborne Warning and Control System (AWACS) and the F-15 enhancements arms sales package to Saudi Arabia.
S-407, Capitol

Energy and Natural Resources
Energy Research and Development Subcommittee
To hold oversight hearings on the viability of the domestic uranium mining and milling industry.
3110 Dirksen Building

Environment and Public Works
Business meeting, to consider pending calendar business.
4200 Dirksen Building

Foreign Relations
To hold hearings on the nominations of Ronald I. Spiers, of Vermont, to be Ambassador to the Islamic Republic of Pakistan, and Harry G. Barnes, Jr., of Maryland, to be Ambassador to India.
4221 Dirksen Building

Joint Economic
To hold hearings to review the effects of high interest rates on the economy.
2154 Rayburn Building

## SEPTEMBER 28

9:00 a.m.
*Labor and Human Resources
Aging, Family, and Human Services Subcommittee
To resume oversight hearings on the role of the Federal Government in family planning programs of Title X of the Public Health Services Act.
4232 Dirksen Building

9:30 a.m.
Foreign Relations
International Economic Policy Subcommittee
To hold hearings on international investment policy.
4221 Dirksen Building

*Select on Indian Affairs
To hold hearings on S. 874, providing for additional protection of steelhead trout as a game fish.
6226 Dirksen Building

10:00 a.m.
Armed Services
To resume hearings on the military and technical implications of the Airborne Warning and Control System (AWACS) and the F-15 enhancements arms sales package to Saudi Arabia.
318 Russell Building

Judiciary
To hold hearings on proposed legislation to reform the Federal criminal laws and streamline the administration of criminal justice.
2228 Dirksen Building

## SEPTEMBER 29

9:30 a.m.
Energy and Natural Resources
To hold hearings on S. 1544, authorizing funds for fiscal years 1982, 1983, and 1984 for state and local energy block grant programs.
3110 Dirksen Building

Veterans' Affairs
Business meeting, to mark up S. 349, providing for limited judicial review of the administrative action of the Veterans' Administration, and for reasonable fees to attorneys representing legal counsel for veterans, and H. Con. Res. 76, expressing the sense of Congress that the Secretary of the Army provide for a plaque in Arlington National Cemetery honoring members of the U.S. Armed Forces who died during the rescue attempt in Iran.
412 Russell Building

10:00 a.m.
Governmental Affairs
To hold hearings on proposed legislation to extend certain provisions of the Inspector General Act of 1981 to the Departments of Justice, Defense, and Treasury.
3302 Dirksen Building

Governmental Affairs
Governmental Efficiency and the District of Columbia Subcommittee
To resume hearings on S. 744, authorizing the District of Columbia to issue general obligation bonds to pay specified eligible liabilities.
357 Russell Building

Judiciary
Business meeting, to consider pending calendar business.
2228 Dirksen Building

2:00 p.m.
Judiciary
To continue hearings on proposed legislation to reform the Federal criminal laws and streamline the administration of criminal justice.
2228 Dirksen Building

## SEPTEMBER 30

9:30 a.m.
Commerce, Science, and Transportation
To hold joint oversight hearings with the House Committee on Science and Technology on Federal patent policy.
235 Russell Building

Environment and Public Works
Transportation Subcommittee
Business meeting, to mark up S. 1024, authorizing funds through fiscal year 1986 for the construction and safety of Federal highways.
4200 Dirksen Building

10:00 a.m.
Energy and Natural Resources
Business meeting, to consider pending calendar business.
3110 Dirksen Building

Judiciary
Immigration and Refugee Policy Subcommittee
To hold hearings on matters relating to the hiring of illegal aliens.
412 Russell Building

*Judiciary
Separation of Powers Subcommittee
To hold hearings on proposals to restrict the power of Federal courts in matters of school busing, focusing on the social impact of forced busing.
2228 Dirksen Building

2:00 p.m.
Environment and Public Works
Transportation Subcommittee
Business meeting, to continue markup of S. 1024, authorizing funds through fiscal year 1986 for the construction and safety of Federal highways.
4200 Dirksen Building

OCTOBER 1

9:30 a.m.
Foreign Relations
To hold hearings on the Airborne Warning and Control System (AWACS) and the F-15 enhancements arms sales package to Saudi Arabia.
1202 Dirksen Building

Labor and Human Resources
To hold hearings on the nomination of C. Everett Koop, of Pennsylvania, to be Medical Director in the Regular Corps of the Public Health Services and the Surgeon General of the Public Health Services, Department of Health and Human Services.
4232 Dirksen Building

10:00 a.m.
Energy and Natural Resources
Energy and Mineral Resources Subcommittee
To resume hearings on S. 1542, prohibiting a company operating a common carrier railroad from holding Federal coal leases unless the coal is used for railroad purposes.
3110 Dirksen Building

Judiciary
Separation of Powers Subcommittee
To continue hearings on proposals to restrict the power of Federal courts in matters of school busing, focusing on the legal and constitutional issues of busing.
2228 Dirksen Building

2:00 p.m.
Foreign Relations
To continue hearings on the Airborne Warning and Control System (AWACS) and the F-15 enhancements arms sales package to Saudi Arabia.
318 Russell Building

OCTOBER 5

9:30 a.m.
Judiciary
*Constitution Subcommittee
To resume hearings on proposed constitutional amendments relating to abortion.
2228 Dirksen Building

Labor and Human Resources
Labor Subcommittee
To resume hearings on S. 1182, improving the administration of the Longshoremen's and Harbor Workers' Compensation Act by removing certain inequities, reducing incentives for fraud and abuse, and assuring immediate compensation benefits and competent medical treatment for injured employees.
4232 Dirksen Building

2:00 p.m.
Judiciary
*Criminal Law Subcommittee
To hold hearings on S. 101 and S. 751, bills to eliminate and establish an alternative to the exclusionary rule in Federal criminal proceedings.
6226 Dirksen Building

OCTOBER 6

8:30 a.m.
Energy and Natural Resources
Energy Conservation and Supply Subcommittee
To hold oversight hearings on the Department of the Interior's proposed five-year plan of oil and gas development in the Outer Continental Shelf.
3110 Dirksen Building

10:00 a.m.
Commerce, Science, and Transportation
To hold hearings on S. 709, prohibiting the sale of beverage containers without a minimum refund value, and prohibiting the sale of metal beverage containers with detachable openings.
235 Russell Building

Environment and Public Works
Business meeting, to consider pending calendar business.
4200 Dirksen Building

Labor and Human Resources
Investigations and General Oversight Subcommittee
To hold hearings to explore the cause and effect of missing children, focusing on home environment, local law enforcement action, and citizen action groups.
4232 Dirksen Building

OCTOBER 14

9:30 a.m.
Judiciary
*Constitution Subcommittee
To resume hearings on proposed constitutional amendments relating to abortion.
2228 Dirksen Building

OCTOBER 15

9:30 a.m.
Judiciary
*Constitution Subcommittee
To resume oversight hearings on the implementation of the Freedom of Information Act, and on S. 1247, S. 1235, and S. 587, bills providing for the protection of certain confidential information from the disclosure requirements of the Freedom of Information Act.
2228 Dirksen Building

10:00 a.m.
Environment and Public Works
Business meeting, to consider pending calendar business.
4200 Dirksen Building

OCTOBER 16

10:00 a.m.
Judiciary
Separation of Powers Subcommittee
To resume hearings on proposals to restrict the power of Federal courts in matters of school busing, focusing on certain community problems.
2228 Dirksen Building

OCTOBER 19

10:00 a.m.
Energy and Natural Resources
Energy Regulation Subcommittee and Water and Power Subcommittee
To hold joint oversight hearings on hydroelectric development and related licensing procedures.
3110 Dirksen Building

OCTOBER 20

9:00 a.m.
Labor and Human Resources
To hold oversight hearings on the implementation of the Comprehensive Employement Training Act (CETA).
4232 Dirksen Building

10:00 am.
Commerce, Science, and Transportation
Business, Trade, and Tourism Subcommittee
To hold hearings on S. 1233, establishing a service industries development program in the Department of Commerce.
235 Russell Building

Energy and Natural Resources
To hold joint hearings with the Subcommittee on Nuclear Regulation of the Committee on Environment and Public Works on S. 1606, to provide for a nuclear property damage insurance fund, and to provide funds for the cleanup of the contaminated nuclear facility at Three Mile Island.
3110 Dirksen Building

Environment and Public Works
Business meeting, to consider pending calendar business.
4200 Dirksen Building

Environment and Public Works
Nuclear Regulation Subcommittee
To hold joint hearings with the Committee on Energy and Natural Resources on S. 1606, to provide for a nuclear property damage insurance fund, and to provide funds for the cleanup of the contaminated nuclear facility at Three Mile Island.
3110 Dirksen Building

OCTOBER 21

10:00 a.m.
Commerce, Science, and Transportation
Business, Trade, and Tourism Subcommittee
To continue hearings on S. 1233, establishing a service industries development program in the Department of Commerce.
235 Russell Building

Labor and Human Resources
Alcoholism and Drug Abuse Subcommittee
To hold hearings to examine the impact of marihuana on youth, focusing on the areas of health and education.
4232 Dirksen Building

Labor and Human Resources
Education Subcommittee and Employment and Productivity Subcommittee
To hold joint oversight hearings on the implementation of vocational education and youth employment programs.
1224 Dirksen Building

OCTOBER 22

9:30 a.m.
Judiciary
Constitution Subcommittee
To resume hearings on S. 1554, S. 1253, S. 482, and S. 440, bills to amend the Federal Criminal Code with respect to the circumstances under which a person charged with or convicted of a crime may be released on bail or personal recognizance.
Room to be announced

Labor and Human Resources
To hold oversight hearings on activities relating to affirmative action of the Office of Federal Contract Compliance Programs, Department of Labor.
4232 Dirksen Building

OCTOBER 23

10:00 a.m.
Energy and Natural Resources
Energy Regulation Subcommittee and Water and Power Subcommittee
To resume joint oversight hearings on hydroelectric development and related licensing procedures.
3110 Dirksen Building

OCTOBER 27

9:30 a.m.
Labor and Human Resources
To hold hearings on S. 1483, proposed Radiation Exposure Compensation Act.
4232 Dirksen Building

10:00 a.m.
Energy and Natural Resources
Energy and Mineral Resources Subcommittee
To hold oversight hearings on America's role in the world coal export market.
3110 Dirksen Building

Environment and Public Works
Business meeting, to consider pending calendar business.
4200 Dirksen Building

OCTOBER 28

9:30 a.m.
*Labor and Human Resources
Labor Subcommittee
Business meeting, to consider S. 1182, improving the administration of the Longshoremen's and Harbor Workers' Compensation Act by removing certain inequities, reducing incentives for fraud and abuse, and assuring immediate compensation benefits and competent medical treatment for injured employees.
4232 Dirksen Building

10:00 a.m.
Energy and Natural Resources
Energy and Mineral Resources Subcommittee
To continue oversight hearings on America's role in the world coal export market.

To continue oversight hearings on the implementation of Title I, establishing wellhead prices for natural gas, of the Natural Gas Policy Act (P.L. 95-621).
3110 Dirksen Building

# SENATE—*Tuesday, September 22, 1981*

*(Legislative day of Wednesday, September 9, 1981)*

The Senate met at 11 a.m., on the expiration of the recess, and was called to order by the President pro tempore (Mr. THURMOND).

PRAYER

The Chaplain, the Reverend Richard C. Halverson, LL.D., D.D., offered the following prayer:

Let us pray.

Sovereign Lord of history and the nations, we are humbled before Thee as we contemplate the awesome duty of government in the light of history and the present situation. We remember the dedication, the sacrifice of those who have gone before. We recall the humble dependence upon Thee that is expressed in our founding documents. We are mindful of the values and priorities inherited from the Judeo-Christian tradition of our fathers. Forgive us God when we ignore or demean or violate the spiritual roots which launched this incredible Nation.

We praise and thank Thee for the incalculable resources of our land: Its mountains and plains, its lakes and rivers and streams, its vast forests and fertile soil, its industry and inventiveness, its rich mixture of people of every nation and race and language and culture and creed—a microcosm of the world.

As many nations look to the United States as the central stronghold of justice and freedom, help us to repent of our pride, sin, and failure; help us to be faithful to the mandate of our legacy—to what Senator Dirksen called our "divine rendezvous." Help us to see what is right and best for all peoples and to do Thy will on Earth as it is in heaven. In Jesus' name. Amen.

## RECOGNITION OF THE ACTING MAJORITY LEADER

The PRESIDENT pro tempore. The acting majority leader is recognized.

## THE JOURNAL

Mr. STEVENS. Mr. President, I ask unanimous consent that the Journal of the proceedings be approved to date.

The PRESIDENT pro tempore. Without objection, it is so ordered.

## THE GOVERNMENT BRAIN DRAIN

Mr. STEVENS. Mr. President, we still have a crisis on our hands. Yet, it is not receiving the attention it deserves. The crisis has been termed, "the Government brain drain."

This Nation can ill afford to lose its best thinkers, managers, scientists, engineers, lawyers and others at a time like this. Yet, that is exactly what is happening. Executive resignations and retirements in the various Federal agencies have doubled and tripled in the last 3 years.

At a hearing recently before the Subcommittee on Civil Service, the Director of the Office of Personnel Management stated:

The loss of seasoned executives is much worse in the high technology occupations. At a time when Government programs are becoming more and more scientific particularly in fields such as defense and health, the inability to attract and keep science administrators is clearly our most serious recruitment problem. Recent retirements from SES have included the Director of the Air Force's Turbine Engine Division, Solid State Sciences Division and Mathematical and Informational Sciences program. At HHS the Directors of the Laboratory of Molecular Virology and the Bureau of Medical Devices are examples of recent retirement losses.

Mr. President, these are only a few of the reams of examples we heard.

Another witness, Mr. John Otto, Executive Assistant Director, Federal Bureau of Investigation, revealed facts which have the potential of seriously undermining our Nation's law enforcement activities. Many years ago to promote efficiency among its personnel and in its programs, the FBI instituted a transfer program.

In this program, agents and supervisors are transferred around the country for various enforcement activities. Such transfers are normally accompanied by promotions. Mr. Otto testified that the FBI's career development and transfer program have almost come to a standstill.

No one will volunteer for such activities because the pay cap precludes any additional remuneration. How do we expect our laws to be enforced when we have no one to transfer to the areas where the laws are being violated?

Mr. President, there are many reasons why senior executives are leaving the Government in droves. However, the major factor is inadequate compensation. A short-term solution to plug up the dike is to lift the pay cap on the executive branch. I urge my colleagues to join with me in this effort today.

Finally, Mr. President, I ask unanimous consent that the testimony of a Mr. Gerard R. Esposito be printed in the RECORD at the conclusion of my remarks. Mr. Esposito is a regional director of an Internal Revenue Service operation, responsible for directing cases with proposed deficiencies in excess of $3 billion. His testimony clearly delineates his and his family's personal costs by his remaining with the Federal Government.

There being no objection, the testimony was ordered to be printed in the RECORD, as follows:

STATEMENT OF GERARD R. ESPOSITO

I have worked for the Internal Revenue Service for more than 20 years. Beginning my career as a Revenue Agent at GS 5, I worked my way up through the technical ranks and then through the entry, middle, and top management levels. In 1973, I was selected for my organization's Executive Development Program which I completed successfully, and subsequently, I was promoted to the position of Assistant District Director in Seattle, Washington in March 1975. I was promoted to District Director in Fargo, N.D. in 1977, and about two years later, I received a promotion to the Regional Director of Appeals in N.Y.C., the position I now hold. I have dedicated myself to the advancement of the public interest, and I have continually sought to fulfill my appointed responsibilities to my utmost ability.

Each of these promotions required extensive relocations, greater responsibilities, and new demands upon me. For example, my most recent promotion was from Director of a District with less than 140 employees to a Regional Director of an operation which covers seven states. I now manage more than 320 employees with a workload of Appeals cases with proposed deficiencies in excess of $3 billion dollars. To effectively manage an operation of this size involves a great deal of time away from home at the various field offices to insure, among other things, that we effectively meet the needs of the public. This requires substantial sacrifices by my wife and 3 children as well as by myself.

I accepted these additional responsibilities willingly. Yet one would think that, with these greater burdens, I would have concomitantly received greater remuneration and benefits. In fact, however, because of the pay lid, inflation, moving expenses, increased mortgage interest payments, income tax on reimbursements, increased commuting costs, utilities and other necessities, my losses and cost of living have soared while my income has remained unchanged since 1978. First, allow me to substantiate these losses and the rise in my cost of living.

1. Sale of Personal Residence:

Although I made a small profit on the sale, I was forced to drop my price by more than $10,000 to sell the house in North Dakota quickly so that my family could relocate together. There were many other houses similar to mine on the market at the same time. The price reduction was designed to capture the only buyer in the market in our price range. While this may be considered a paper loss, it did leave us with $10,000 less available cash to put down on our new home.

2. Since moving into our new residence, we have had to invest about $6,000 to make our new home more liveable. Such items as storm doors and windows, carpeting and conversion of our heating system to save money and energy are very costly.

3. Moving Expenses:

Unfortunately, the Government inadequately reimburses us for the cost of relocation. More often, we in Government must subsidize part of the costs of moving. In my instance, this amounted to approximately $2,000 to move household goods, for temporary quarters, house-hunting costs and relocation of self and family.

4. Income Tax on Reimbursement:

The taxable amount of moving expense reimbursements added on to my income was about $4,500. The tax on this totaled nearly $2,200. This additional expense was particularly hard to accept since I had already lost so much on this move.

5. Increased Mortgage Interest Payments:

With less capital available to reinvest, we were forced to take a larger mortgage loan. Although our present home is nearly comparable with our former home, we have had to pay $130 more per month due to higher interest rates. Being unable to secure a conventional mortgage, we had to settle for a mortgage which requires a "balloon" payment of the unpaid principal in three years. This means that in about 15 months, I will have to pay off the loan or seek refinancing at interest rates that have already reached levels we cannot afford. We may be forced to sell our home before the 15 months expires for whatever we can get to avoid even greater losses when the loan falls due.

6. Increased Commutation Costs:

These costs increased from $40 a month in North Dakota to more than $189 per month in my present location. My commuting costs are scheduled to increase again in January 1982 to more than $235 per month, and additional increases are projected each January for several years thereafter.

In addition, to meet our special requirements for education and to stay within an affordable price range for homes, we had to settle in an area which extended my round trip commuting time from 30 minutes in North Dakota to 4 hours in my present location.

7. Utilities and Other Necessities:

My present cost of electricity and oil far exceeds that which I paid in North Dakota. It also appears that my electric bills will be increased shortly. This amounts to an increase of $100 per month.

One can see that up to now this move has cost me more than $10,000 out of my own pocket (not including the amount shown for sale of personal residence) and my net available cash each month has been reduced by more than $600. My wife has been forced to take a job to help offset most of this reduction. However, real estate taxes are due to increase next month by some undetermined amount, my commuting expenses will probably go up another $45 in a few months and my electric bills will also probably increase. Without a pay raise, it will be extremely difficult to manage even with my wife working.

These costs could have been better absorbed had my pay increased as I had anticipated it would. Instead, my present annual salary remains at the $50,112.50 pay cap ceiling as it has for the past three years. When I moved to NYC in 1980, there was discussion of lifting the pay cap and adjusting salaries to that proposed for the Senior Executive Service by the President, meaning that on October 1, 1981, I would be earning a minimum salary of $61,000.

This was a significant factor in deciding to move. On the other hand, had I remained in Seattle, Wash., I would be earning the same amount I am currently, but without the dislocation and disruption to my wife and children, greater costs (which forced my wife to take a job outside the home), and added responsibilities.

In retrospect, I would have been wiser to have foregone my promotions. Is this the Government's idea of incentive? Is this a means of gaining the most experienced people, of building morale, of promoting efficiency and diligence? How much longer can this dichotomy exist between reasonable expectation and reality?

I have worked energetically and honestly for the public good with my primary goal being to increase efficiency and productivity in government. This is an occupation I enjoy, feel successful at, and wish to remain in, but with the current pay situation, I am finding it harder to rationalize such a commitment.

I firmly believe that something must be done to alleviate these problems; to provide economic incentives to encourage rather than discourage promotion; to alleviate the financial burdens of relocation, and to maintain the experienced and proven successful individuals who now and in the past have maintained and run the best government mankind has ever fashioned.

I thank you for this opportunity to testify, and I am prepared to answer any questions you might have.

Mr. STEVENS. Mr. President, I yield the remainder of our time to the distinguished Senator from Wyoming.

The PRESIDENT pro tempore. The Senator from Wyoming.

Mr. WALLOP. Mr. President, I thank the acting majority leader.

## REVIEW OF TAPES AND RECORDINGS IN THE MATTER OF SENATOR WILLIAMS

Mr. WALLOP. Mr. President, I once again rise this morning, as I shall do throughout this week, to urge Senators to take advantage of the viewings of the tapes and recorded material in the matter of Senator WILLIAMS and the recommendation of the Senate Ethics Committee that he be expelled from the Senate.

It can only be fair, both to Senator WILLIAMS and to the Senate itself, in its ultimate reputation as the body of all Senators, that we treat this matter with the care, concern, and respect that it deserves. We are going to meet twice on Wednesday at 9:15 and 2:15, and at the same times on Friday in room 457 of the Russell Building. The presentation, in total, will take some 3½ hours of Senators' time. It is critical, Mr. President, that these tapes be viewed. Yesterday only nine Senators took advantage of the opportunity. There are but 4 more showings for the remaining 89 Senators to inform themselves.

Mr. President, it is my suggestion that Senators first view the tapes and then commit themselves to the study of the proceedings and the report of the Ethics Committee. Again, I say that any Senators who have questions may refer them to the attending committee staff at the viewings, or we shall make available to any Senator who so desires the wisdom and advice of special counsel as to the nature of the proceedings or as to any other questions that a Senator may have.

The committee has had its work praised as being scrupulously fair by counsel to Senator WILLIAMS. To keep it fair we require a commitment from individual Senators to devote their time and intellect to so serious a judgment as to expel a colleague.

We are under judgment by the public as we exercise our judgment on the fitness to serve of one of our Members. We should not be driven by anything but fair judgment of the factual material presented.

Each Senator has the obligation to Senator WILLIAMS and to the Senate to judge with knowledge. Our reputation as an institution is at stake. Senator WILLIAMS' personal reputation is at stake. I ask my colleagues: Do you dare do less than your best as you fairly and legitimately can? This judgment is serious.

If Members will look in the CONGRESSIONAL RECORD of September 15, they will see the schedule that takes place within those 3½ hours. It may not be necessary to commit to the full 3½ hours at any one time. One can take an hour-and-a-half, 2 hours, an hour, and stop at one point and then go back in and enter them at another point. We have tried to find as many hours as possible to make it achievable for Senators to view them all.

Mr. President, I urge my colleagues from the bottom of my heart to take this time. This judgment before us cannot be treated lightly. In fairness to the public, in fairness to the Senate, and in fairness to Senator WILLIAMS I urge Senators to take advantage of these showings, because the issue before us is so serious in every respect.

Mr. President, I thank the acting majority leader. I yield back the remainder of my time.

The PRESIDING OFFICER (Mr. LUGAR). The acting majority leader is recognized.

Mr. STEVENS. Mr. President, I reserve the remainder of our time and the time that was allocated to the distinguished Senator from Wyoming.

## RECOGNITION OF THE MINORITY LEADER

The PRESIDING OFFICER. Under the previous order, the minority leader is recognized.

## THE REAGAN ADMINISTRATION ON INTEREST RATES

Mr. ROBERT C. BYRD. Mr. President, there has been a great deal in the Reagan administration's economic program that is inconsistent, or just plain wrong.

Few issues, however, have been as replete with turnabouts, inconsistencies, and doubletalk from administration officials as has the question of high interest rates.

I ask unanimous consent that a special report prepared by the staff of the Democratic Policy Committee entitled "The Reagan Administration on Interest Rates" be printed in full in the RECORD.

There being no objection, the report was ordered to be printed in the RECORD, as follows:

THE REAGAN ADMINISTRATION ON INTEREST RATES

"If this program (President Reagan's economic program) is enacted, there is no need for interest rates at 15 percent."—Treasury Secretary Donald Regan, January 6, 1981.

". . . The turnaround that we have forecasted in interest rates is already a reality."—CEA Chairman Murray Weidenbaum, March 11, 1981.

". . . I think we are making major progress in getting interest rates down."—Treasury Under Secretary Beryl Sprinkel, March 20, 1981.

"Well, these things never happen overnight . . ."—Treasury Secretary Donald Regan, May 31, 1981.

"You cannot get inflation under control without having high interest rates."—Treasury Secretary Donald Regan, July 14, 1981.

". . . (interest rates) will begin to come down by the end of the year."—Deputy Press Secretary Larry Speakes, August 31, 1981.

" 'Generally, we have been in tandem with the Fed,' Speakes said."—The Washington Post, September 10, 1981.

A COMPARISON OF ECONOMIC ASSUMPTIONS—PROJECTED INTEREST RATES FOR 91-DAY TREASURY BILLS

[In percent]

| | 1981 | 1982 | 1983 | 1984 |
|---|---|---|---|---|
| Reagan administration: | | | | |
| February 1981 | 11.1 | 8.9 | 7.8 | 7.0 |
| July 1981 | 13.6 | 10.5 | 7.5 | 6.8 |
| Congressional Budget Office, September 1981 | 14.5 | 12.4 | 11.4 | 10.1 |

Following the 1980 presidential election and throughout the first few months of 1981, the Reagan Administration repeatedly predicted significant and rapid drops in interest rates over the course of 1981 and 1982.

December 1980:

"When interest rates peak and begin to decline, Mr. Regan predicted, they 'will come down almost as quickly as they came up.' "

Source: The Wall Street Journal, December 19, 1980.

January 6, 1981:

Treasury Secretary Donald Regan:

"If this program (President Reagan's economic program) is enacted, there is no need for interest rates at 15 percent."

Source: Senate Finance Committee Hearings.

February 18, 1981:

| Forecasted interest rates, 91-day Treasury bills: | *Percent* |
|---|---|
| 1981 | 11.1 |
| 1982 | 8.9 |
| 1983 | 7.8 |
| 1984 | 7.0 |
| 1985 | 6.0 |

Source: "America's New Beginning: A Program for Economic Recovery", released in conjunction with President Reagan's Economic Address to Congress.

February 20, 1981:

Treasury Secretary Donald Regan:

"All I will suggest is that interest rates are going to be heading down over the rest of 1981 and into 1982."

Source: House Budget Committee Hearings.

February 23, 1981:

"Stockman told reporters yesterday. 'We believe that if our full economic plan . . . is put into effect, interest rates in the private market, the prime rate and other sources of credit will fall equal to or below' the 8½ percent and 9½ percent rates presently charged by the Export-Import Bank 'within a very short period of time'."

Source: The Washington Post, February 24, 1981.

"When pressed later, Stockman said he had gone too far. 'I thought about that and I think I misspoke a little,' he said through spokesman Ed Dale. 'We do anticipate a substantial decline in interest rates, but I can't say that they will be down to 8.5 percent at any early time.' "

Source: The Chicago Tribune, February 25, 1981.

March 11, 1981:

CEA Chairman Murray Weidenhaub:

"I note that interest rates, such as the prime rate, have been declining very substantially in the course of 1981, so that the turnaround that we have forecasted in interest rates is already a reality."

Source: House Budget Committee hearing.

March 20, 1981:

Treasury Under Secretary Beryl Sprinkel:

"I would be very unhappy if we had to wait 1½ to 2 years to accomplish that objective of getting interest rates down . . . I am more optimistic than that, however, I think we are making major progress in getting interest rates down."

Source: Senate Finance Committee hearings.

A few months later, forced to take into account persistently high interest rates, the Administration retreated from its original predictions. Though it remained optimistic that interest rates would decline, its optimism became more guarded, and the Administration forecasted slower, less dramatic drops in interest rates which would not begin to occur until the end of 1981.

May 6, 1981:

"Mr. Regan said the prime rate was 'not going over 24 percent, but it may get to 20 percent or higher and stay higher for several months'."

Source: The New York Times, May 7, 1981.

May 31, 1981:

Treasury Secretary Donald Regan:

"Well, these things never happen overnight . . . Now, it won't be dramatic at first. But I suspect that by the end of the year, they'll (interest rates) be way down from the rates where we are right now."

Source: ABC News "Issues and Answer."

July 1, 1981:

". . . 'I think we'll get single digit interest rates in 1982,' Mr. Regan said, referring to the rate at which the Treasury sells its 13 week bills."

Source: The Wall Street Journal, July 2, 1981.

July 15, 1981:

| Forecasted interest rates, 91-day Treasury Bills: | *Percent* |
|---|---|
| 1981 | 13.6 |
| 1982 | 10.5 |
| 1983 | 7.5 |
| 1984 | 6.8 |

Source: "Mid-Session Review of the 1981 Budget".

August 31, 1981:

". . . Deputy White House press secretary Larry Speakes yesterday repeated the White House view that interest rates 'will begin to come down by the end of the year.'"

Source: The Wall Street Journal, September 1, 1981.

Throughout the first half of 1981, while predicting significant and immediate progress in achieving lower interest rates, the Administration responded to growing doubts and criticisms about its highly optimistic forecasts by insisting that its fiscal and monetary policies would bring about a definite decline in interest rates.

February 22, 1981:

Treasury Secretary Donald Regan:

". . . Up to this point . . . there has been no fiscal discipline. There's been no discipline on the part of the Federal Government. We intend to put that discipline into the Federal budget. When we do that, that will make the job of the Fed much easier. That will get inflation down, and along with inflation, interest rates."

Source: NBC's "Meet the Press."

March 11, 1981:

CEA Chairman Murray Weidenbaum:

"In terms of interest rates, it is my view and that of a great majority of the economic profession that the major reason for high and rising interest rates is their embodiment of inflationary expectations . . . Enacting the largest program of budget restraint in American history will be the largest, sharpest, clearest signal to financial markets at home and abroad that this Nation is determined to bring down inflation and, hence, that will turn around the inflationary expectations and truly bring down those interest rates according to our expectations."

Source: House Budget Committee hearings.

March 20, 1981:

Treasury Under Secretary Beryl Sprinkel:

"In my judgment, the Reagan Administration is pursuing a low-interest rate policy. The reason that I think it is a correct statement is that the level of interest rates, in my judgment is primarily a function of the level of inflation, and which in turn, is a function of how much money is pumped into the economy."

Source: Senate Finance Committee hearings.

June 22, 1981:

"Vice President Bush said that 'high interest rates will come down and come down relatively rapidly when people see that we're determined to grab control of the budget deficit' and Federal spending.

Mr. Regan applauded the Reserve Board's policy, saying, 'The Fed is in the process of getting money under control. We don't fight inflation with the weapon of high interest rates, we fight inflation with the weapon of cutting off money. That doesn't have to produce high interest rates'."

Source: The Wall Street Journal, June 23, 1981.

Only a week later, the Administration began to waiver and back away from its original argument that its economic policies would unquestionably lead to lower interest rates.

July 1981:

"Asked if it is better for the economy and the fight against inflation in the long run to have relatively high interest rates even with a sluggish economy, Regan replied: 'I'm not advocating this course. What I am advocating is that we continue to be strong on money and monetary policy. That is, that we continue to make certain that the growth of money is slowed and that it's as steady as we can possibly get it. And then we'll have to see what the effects on interest rates will be.' "

Source: The Washington Star, July 8, 1981.

In mid-July, the Administration completely abandoned its earlier position on interest rates. In a dramatic reversal of its previous statements, the Administration admitted that high interest rates were a painful, but necessary, part of its economic program.

July 12, 1981:

"Because of the 'bitter medicine' of high interest rates, 'our economy is slowing down, and I think that's healthy because we have to slow the economy to get inflation out of it,' said Treasury Secretary Donald Regan (on CBS News' "Face the Nation")."

Source: The Wall Street Journal, July, 13, 1981.

July 13, 1981:

Treasury Secretary Donald Regan:

"We are determined to get inflation under control. This is one of the main features of

President Reagan's economic package. You cannot get inflation under control without having interest rates. This is one of the side effects."

Source: That Washington Post, July 14, 1981.

As interest rates remained at extremely high levels, the Administration repeatedly reaffirmed its support and acceptance of such high rates by publicly expressing support for the Federal Reserve Board's policy of very slow money supply growth. While oftentimes attempting to criticize and blame the Federal Reserve for the persistently high interest rates, the Administration always qualified its statements to include support for the Board's tight money supply policy.

August 6, 1981:

Treasury Secretary Donald Regan:

"The Fed has to be careful to make sure it keeps its credibility so it has got to hang tough. . . The last thing we want (Paul Volcker, the Federal Reserve Board Chairman) to do is to reverse too quickly and slam the accelerator on."

Source: The New York Times, August 7, 1981.

August 27, 1981:

President Ronald Reagan:

"Let me point out one thing. The Fed, the Federal Reserve System, is independent, and they're hurting us in what we're trying to do as much as they're hurting everyone else."

Source: Remarks at a Republican fundraising reception.

August 28, 1981:

"Speakes said Presidential aides asked him (President Reagan) after the remarks if he meant to criticize board chairman Paul A. Volcker. 'No, I was talking about interest rates,' Speakes reported the President said. . . . 'He has complete confidence in the course that the Fed is pursuing now . . .'."

Source: The Washington Post, August 29, 1981.

August 31, 1981:

" 'Generally, we have been in tandem with the Fed,' Speakes said."

Source: The Washington Post, September 1, 1981.

September 9, 1981:

CEA Chairman Murray Weidenbaum:

"The Fed is steering a vehicle on a very rough road. Now it's off on the right shoulder, and we expect the next turn to put it back onto the road. . . . The one thing we should not have is monetary ease."

Source: The Washington Post, September 10, 1981.

Mr. ROBERT C. BYRD. Mr. President, I yield to the Senator from Wisconsin.

## THE GENOCIDE CONVENTION AND LEGAL JURISDICTION

Mr. PROXMIRE. Mr. President, after 32 years, the Genocide Convention is still before this body. We have failed to ratify it in the past because of unfounded fears that the convention could somehow compromise the sovereignty of the United States.

This fear is based in part on a passage of the convention which states that one may be put on trial for genocide by "a competent tribunal of the State in the territory of which the act was committed * * *."

Some claim that this clause would allow Americans to be tried in foreign countries for such practices as hostile actions against a warring enemy. According to these critics, this clause strips the United States of jurisdiction over its own citizens.

These charges ignore the facts. The report of the Sixth Committee of the General Assembly, in explanatory remarks on the Genocide Convention, states that this part of the convention "does not affect the right of any state to bring to trial before its own tribunals any of its nationals for acts committed outside the state." Moreover, extradition could take place only where there is an extradition treaty in force.

Existing extradition treaties would be revised to include genocide, but this would have to be done separately by Congress. In addition, Congress would not be obliged to negotiate treaties with countries with which we do not now have them. Our extradition laws are rigorously drafted to prevent abuses of our citizens abroad.

In short, international laws governing jurisdiction are not altered by the Genocide Convention. This convention does not threaten our Government's jurisdiction over our citizens. We must not let false assumptions about the convention block its long overdue ratification. These assumptions have been refuted again and again. I urge immediate ratification of the Genocide Convention.

Mr. President, I thank the minority leader for yielding.

Mr. ROBERT C. BYRD. Mr. President, I yield the floor at this time.

The PRESIDING OFFICER. The acting majority leader is recognized.

Mr. STEVENS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. WALLOP. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

## VITIATION OF TIME UNDER SPECIAL ORDERS

Mr. WALLOP. Mr. President, I ask unanimous consent that the remaining time under special orders allocated to the Senator from Wyoming and others be vitiated.

The PRESIDING OFFICER. Without objection, it is so ordered.

## ROUTINE MORNING BUSINESS

Mr. WALLOP. Mr. President, I ask unanimous consent that there now be a period for the transaction of routine morning business.

The PRESIDING OFFICER. The Chair states that under the previous order, there will now be a period for the transaction of routine morning business not to extend beyond the hour of 11:30 a.m.

Mr. WALLOP. Mr. President, I suggest the absence of a quroum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

## COLUMN BY CARL ROWAN FAVORING AWACS SALE

Mr. THURMOND. Mr. President, a well-reasoned article by Carl Rowan in support on the sale of AWACS to Saudi Arabia appeared in the September 20, 1981 issue of the Savannah Morning News.

Mr. Rowan favors the sale because our friends in Saudi Arabia are threatened by many forces in the Middle East and their downfall would cut off the lifeblood of the Western industrial world. He also finds that Israel would not be endangered by the sale but would, in fact, in the longer run benefit from the sale.

The points made by Mr. Rowan on this issue show considerable foresight and are accompanied with a warning:

If the Congress blocks the AWACS sale, the longrun cost will be great for the United States and Israel.

Mr. President, I ask unanimous consent that this article which appeared under the heading "Let AWACS Be Sold" be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

LET AWACS BE SOLD

(By Carl Rowan)

WASHINGTON.—We are in for a time of nastiness as the debate intensifies over the proposed sale of five AWACS radar surveillance planes and other military equipment to Saudi Arabia. Already we hear charges that the U.S. is jeopardizing Israel just to get back 8.5 billion petrodollars and that senators opposing the sale are groveling for campaign donations from Jews.

When we sweep some of the emotion aside, a few points seem remarkably clear. The first is that for more than three decades the United States has honored its commitment to Israel, even at great financial and political cost.

In 1973, when Israel was in military peril, the United States launched an airlift that helped Israel to turn her war fortunes around—and the U.S. warned the Soviet Union that Israel would survive as long as the United States survives.

There is nothing about the proposed AWACS sale that suggests the U.S. is either abandoning or diminishing its commitment to Israel, so it seems to me that the Begin administration and its U.S. supporters are being shortsighted when they push Americans into strife over the AWACS.

Neither this sale nor 100 like it would make Saudi Arabia a credible threat to Israel's security. Beyond that, the U.S. has made it clear that it intends to keep Israel stronger than all her potential foes combined. Thus, I cannot swallow suggestions that this AWACS deal is going to leave Israel naked to her enemies.

On the other hand, there are myriad threats to Saudi Arabia. The Soviet Union,

some other Arabs, Moslem fanatics and several other nations and groups would love to oust the Saudi royal family, or to take other actions to gain control of the Saudi oil fields. Perhaps never in history has a nation had so much to defend and so little with which to defend it.

Whatever threatens Saudi Arabia also threatens the lifeblood of the industrial West, a point so obvious that the Israelis ought to be saying, "We understand why you must deal with Saudi Arabia on the basis of the same kind of respect you show us."

Instead, the Begin government is spreading a warning around this town that the U.S. errs in arming a "corrupt, anachronistic" regime in Riyadh that the Saudi royal family will go the way of the shah of Iran before the end of this century.

Even though the alarmists can suggest no feasible alternaitve to the royal family, some members of the Senate are so gullible as to fasten on the above argument, ignoring the Saudi contribution to the United States' security, and thus indirectly to Israel's.

America's current economic woes are modest compared with what they might be if Saudi Arabia had not worked so diligently to halt the spiral of petroleum prices.

Some opponents of the sale argue that we dare not entrust sophisticated weapons to the Saudis because the Russians will quickly get our secrets. This is a galling argument, given the fact that Great Britain has produced some celebrated traitors, West Germany has had communist spies right in the office of the chancellor, and other U.S. allies like Italy and France have huge Communist Parties, with communists in their Cabinets. When we entrust weapons and secrets to these countries, how do we say to the Saudis (who don't even have diplomatic relations with the Soviets): "We can't trust you the way we do our other friends"?

If the Congress blocks the AWACS sale, the long-run cost will be great for the United States and for Israel. It is easy for Israel to say to the U.S.: "If you are our friend, you cannot be Saudi Arabia's friend." But what does Israel do if the United States is crippled and must struggle on one economic leg?

The AWACS sale must go forward.

---

## WHY THE AWACS SALE IS GOOD FOR US

Mr. THURMOND. Mr. President, an excellent article, authored by Richard Allen, National Security Adviser to President Reagan, in support of the AWACS sale to Saudi Arabia, appeared in the September 20, 1981 issue of the Washington Post newspaper.

Mr. Allen states why the national security interests of the United States would be enhanced by the sale and answers, point by point, the arguments which have been advanced by opponents of the sale.

Mr. President, I ask unanimous consent that this article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

### WHY THE AWACS SALE IS GOOD FOR US

(By Richard V. Allen)

The President's decision to sell equipment to enhance the air defense capabilities of Saudi Arabia has stimulated intense debate and considerable passion, which have sometimes obscured the core issues. The case for the sale of AWACS, however, can be stated simply and directly: AWACS and the other air defense equipment would make a substantial contribution to the security interests of the United States in a vital part of the world without endangering the security intercsts of Israel.

This is the studied conclusion of our best military and foreign policy experts. It is also the considered judgment of the president.

The proposed equipment package consists of conformal fuel tanks to extend the range of the F15 fighter aircraft, AIM9L Sidewinder air-to-air missiles, KC707 aerial tankers and E3A Airborne Warning and Control Systems (AWACS) aircraft.

But this sale is not simply an $8.5 billion transaction between an arms supplier and arms recipient. The Saudi equipment package is a central part of a comprehensive U.S. regional strategy to strengthen the stability and increase the security of friendly countries in an area of the world that is vital to the United States and its Western allies.

The proposed sale directly serves U.S. interests in the following ways:

First, it contributes to Saudi capabilities to defend its oil facilities—which are so important to us and our Western allies—from regional threats. In doing so, it responds to the legitimate security requirements of the country whose cooperation is central to the success of our regional security strategy.

Second, it enhances the effectiveness of our own military capabilities if we were ever called upon to deploy U.S. forces in the area. The Saudi AWACS aircraft themselves could help meet our requirements for an early warning network. Moreover, the extensive logistics base and support structure we will be providing as part of the equipment package will be fully compatible with U.S. military equipment.

Third, it advances our goal of enhancing the security of states throughout the Gulf area by laying the groundwork for greater U.S.-Saudi defense cooperation and by supporting the Saudi efforts to develop stronger air defense cooperation among the Gulf states.

Fourth, it helps to rebuild confidence in the United States as a credible arbiter of regional tensions by demonstrating our value as a reliable security partner. This sense of confidence and security is an essential ingredient in fostering a willingness among countries in the area to work for—and to take the political risks posed by—a durable Mideast peace.

In brief, the case for the air defense enhancement package is an impressive one. Yet the proposed sale has aroused widespread controversy and considerable opposition. Much of the opponents' case, however, is based on misunderstandings and misconceptions both about the capabilities of the equipment we are selling and about how that equipment would be used. If the administration is successful in debunking the mythology that surrounds AWACS, the result will be a clear and compelling case that will command overwhelming support in favor of the sale.

The following are some of the misconceptions most frequently heard about the Saudi equipment package:

Argument One: The United States will receive no political benefits—no quid pro quo—from this sale.

Our friendship with Saudi Arabia is not based solely on its role as an oil supplier. Saudi assistance has been crucial in the past in helping nations break away from Soviet influence. Saudi Arabia is playing an increasingly important role in assisting vitally important countries such as Pakistan to shore up their defenses against Soviet expansionism. It has played a key diplomatic role in defusing the crisis in Lebanon and in promoting security cooperation among moderate Persian Gulf states.

Cooperation with friends is not a commodity to be bargained or haggled over. Experience has shown that the quality of our relationship with Saudi Arabia is affected by the security environment that country faces. Events in Iran and the Yemens, Soviet intervention in the Horn of Africa, and the invasion of Afghanistan have all intensified legitimate Saudi security concerns and have taken their inevitable toll of Saudi confidence. We expect Saudi cooperation in fostering peace and stability to broaden as the Saudis become more secure.

Argument Two: AWACS would pose a significant threat to the security of Israel.

President Reagan and his administration are committed to the long-range security of Israel. We also understand Israel's deep and genuine concerns, which were the subject of extensive discussions between the president and Prime Minister Begin just last week. We recognize that the Saudi equipment package will have an effect on Israeli defense planning.

The fact is, however, that the Saudi equipment package—including AWACS—would not pose a qualitatively new threat to Israel or measurably affect her ability to defeat any combination of potentially hostile forces in the region. This judgment is the consensus of both military and intelligence experts.

There are some technical facts that need to be borne in mind: AWACS is essentially an unarmed flying radar platform that has no intelligence collection capabilities; it cannot detect ground targets such as tanks, and it cannot operate effectively with air forces of other countries without extensive joint training and a sophisticated communications network that only the United States could provide.

At least as important, however, are the practical considerations. It is a simple fact of life that AWACS aircraft are scarce, expensive and vulnerable. The five AWACS aircraft that would be sold to Saudi Arabia are sufficient to maintain one AWACS continuously in the air. This means that any AWACS deployments to other parts of Saudi Arabia would necessarily come at the expense of full coverage of the eastern province where the oil facilities and other vaulable assets are located (and which would benefit most from the improved early warning that AWACS would provide).

It is true that if the Saudis chose to expose their AWACS—which is as vulnerable to attack as the Boeing 707 aircraft from which it is derived—by operating it close to Israel, the aircraft could collect data on Israeli air activities. That information, however, would be valuable for only a few minutes and—as noted above—could not be effectively passed to non-Saudi aircraft.

But all of this is academic. Israeli's air defense system—as the Saudis fully recognize—is extraordinarily capable. Saudi missions into or near Israeli air space—either to engage Israeli aircraft or to strike Israeli targets—would be prohibitively costly and would leave Saudi Arabia vulnerable to air attack from every direction. The Saudis are all too aware of this reality.

The fact is that this sale will not alter the balance of power in the region or jeopardize Israel's security. We repeat: The president is irrevocably committed to protecting Israeli's security and to preserving Israel's ability to defeat any combination of potentially hostile forces in the region. The proposed Saudi sale neither casts doubt on that commitment nor compromises those Israeli capabilities.

Argument Three: The Saudis don't need and can't use AWACS. AWACS really is a

Saudi-imposed test of the U.S.-Saudi political relationship.

There can be no doubt that future U.S.-Saudi relations would be affected by a congressional rejection of this sale, as would the prospects for forging a strategic consensus and lasting peace in the region. But this does not make the equipment package a test of wills. It simply means that rejection would inescapably cause the Saudis to doubt American willingness and ability to meet legitimate Saudi defensive requirements and to work together in pursuit of common security and political objectives.

The vulnerability of the highly concentrated Saudi oil facilities is serious. As the Iran-Iraq war has demonstrated, the threat that these oil facilities could come under attack is real. As our own actions at the start of that war demonstrate, AWACS would be crucial in defense of the Saudi oil fields. The loss of Saudi oil for a prolonged period would be disastrous for the United States and our allies.

With current Saudi capabilities, an attack by low-flying aircraft could not be detected by ground-based radar until it was within two to four minutes of the oil fields. Even under the best conditions, no air force could respond to this threat in time.

AWACS will allow the Saudi air force to detect attacking enemy aircraft 150 miles or more from the oil fields. The Saudi air force will then have about 15 minutes' warning—enough time to scramble and intercept enemy aircraft before they reach the oil fields.

AIM9L Sidewinder air-to-air missiles give the Saudi air force the capability to intercept attacking aircraft head-on. This capability will greatly improve the chances of successfully intercepting hostile aircraft before they are able to bomb the oil facilities or other Saudi targets.

Conformal fuel tanks and KC707 tankers allow Saudi F15s to be based in west central Saudi Arabia, where they would not be vulnerable to a surprise enemy attack and from which they could sustain combat even if bases in eastern Saudi Arabia were put out of action. KC707 tankers also will allow AWACS to remain on station for extended periods of time.

In brief, the Saudis believe they have a legitimate defensive requirement for the AWACS and other equipment we propose to sell. U.S. military experts and policymakers agree with this assessment. The air defense package will improve Saudi capabilities to deter and, if necessary, defend against regional air attacks. The result will be a more secure Saudi Arabia, which will be an anchor of stability within the region and a bulwark against challenges and coercion from outside the region. Such a stable and secure Saudi Arabia clearly serves the security interests of the United States.

Argument Four: We should "lease" rather than sell AWACS to the Saudis.

After the outbreak of the Iran-Iraq war and at the request of the Saudis, the United States deployed four U.S. Air Force AWACS aircraft to Saudi Arabia to help defend the oil facilities. These aircraft are still in the area. Some have argued that, rather than sell AWACS, we should simply continue the present arrangement under a lease agreement in which the Saudis would pick up the tab.

This proposal is superficially attractive. It would appear to maintain close U.S. control over these assets while minimizing the risks that some people believe would be entailed by a sale. The fact is, however, that such an arrangement is unacceptable to the Saudis and unnecessary to secure our interests.

The Saudi government, like any sovereign regime, recognizes its right and responsibility to defend its own population and territory. Moreover, the Saudis have sound political reasons to want to minimize and overt foreign military presence in their country. In brief, the Saudis cannot accept a leasing arrangement because it would not satisfy the requirements of sovereignty nor respect political realities.

For the Saudis, it is not a case of AWACS or nothing. The British Nimrod has capabilities that are compatible to AWACS, while the French have aircraft/missile combinations that would be attractive alternatives to the F15/AIM9L.

The issue is not whether the Saudis will obtain an enhanced air defense capability, but who will sell it to them. The United States has the choice between benefiting from the closer cooperation and continuing presence that would flow from the sale of the Saudi equipment package or yielding that role to other suppliers. For the Israelis, the question is whether their long-term security interests are better served by a continuing and strengthened U.S. role in Saudi Arabia, or by a Saudi Arabia with substantially the same military capabilities but less responsive to U.S. advice and influence.

A lease arrangement provides the appearance of extensive U.S. control over the operation of the AWACS and safeguards against its misuse. In reality, however, there is no important difference between a lease and a sale. The nature of the AWACS is so complex that U.S. personnel will be required in-country to maintain key elements of the system for its entire life. The withdrawal of U.S. support for the AWACS—whoever owns the aircraft—would quickly result in the system ceasing to operate.

Argument Five: Selling AWACS to the Saudis would jeopardize U.S. security by risking the loss of sensitive technology that is at the heart of our own defense.

AWACS is a very capable system, but selling it to the Saudis does not pose serious risks that sensitive technology will be compromised. The reasons can be traced to the nature of the technology itself and to the arrangements that will be taken to safeguard it.

The AWACS as it will be delivered to Saudi Arabia in the mid-1980s is a system which was designed in the 1960s. The radar is now textbook technology and the computer is commercially available. The Saudi AWACS will not contain certain of the internal components that are restricted to U.S. or NATO use.

Only the computer software—which is the heart of the system—is regarded as sensitive. The information required to recreate this software will not be supplied to the Saudis (nor to NATO). If the software embedded in the AWACS computer should fall into Soviet hands, it would require a massive effort and several years to decipher. At the same time, we could easily change the software in U.S. AWACS within a matter of days, negating Soviet exploitation.

Despite their outstanding record of protecting senstive equipment and information, the Saudis recognize and have accepted the need for stringent safeguards in this case.

The analysis above demonstrates that the proposed air defense package for Saudi Arabia will make an important contribution to the security of all states in the region—Israel as well as Saudi Arabia—and will promote our efforts to forge a strategic consensus in the area. The package is not a political favor we are extending to the Saudis, but a balanced and effective component of a comprehensive regional strategy to counter Soviet adventurism and to create the conditions for a durable Mideast peace.

The proposed sale successfully balances the imperative of Israeli security with the need to respond to threats to essential natural resources and regional stability. It provides equipment that meets the defensive requirements of a close friend and key regional state in a way that also protects sensitive technology and makes a tangible contribution to U.S. military capabilities.

The concerns expressed about the Saudi air defense package are sincere. The dilemmas they highlight are difficult. But once the misunderstandings are clarified and the misconceptions are corrected, the case against AWACS surely will yield to the inherent logic of the case for AWACS. That is the basis for the president's confidence in the outcome of the current congressional debate.

---

## A REPLY TO CRITICS OF THE PRESIDENT'S PROGRAM FOR ECONOMIC RECOVERY

Mr. MATTINGLY. Mr. President, as we are all too aware, the news media lately has been full of reports and commentary on the failure of President Reagan's program for economic recovery. No matter that the budget reductions and tax cuts do not take effect until October 1. The negative elements here in Congress, the special interest groups who live by the Federal dole, and the media are claiming the defeat of the President, the majority in Congress and the popular mandate of the American voters. As a general surrounded by the enemy once said to the Germans at the Battle of the Bulge; I say to those negative elements in our land: Nuts.

While the so-called Solidarity forces marched on Washington, 250,000 extremists claiming to represent the entire Nation, delivering the same old tired and failed rhetoric that has given us the economic crisis, the loss of opportunity and hope for the future that we face—a reporter for the Washington Post was visiting the town of Gainesville in my State of Georgia.

Gainesville is located in north Georgia, in the beautiful foothills of the Appalachian Mountains. The main product of this very American town is poultry. Besides being a major agricultural producing center, Gainesville is the second fastest growing area in the State. Gainesville, in other words, represents the best of the American economic system: progress, opportunity, and meaningful growth.

The reporter, Art Harris, did not talk to economists, or bureaucrats, or lobbyists, or Wall Street brokers. He talked to farmers, small businessmen, veterans, and mill workers. And the message he reported should lend courage to the heart and spine of every one of us here in this body and in the House. The message is that the people are still with us and the President. Americans are still willing to sacrifice for the greater good of their country. Main street understands the necessity of spending cuts, tax cuts and spending for an adequate defense even if Wall Street does not.

Let me take a minute to quote my fellow Georgians.

From a veteran who lost his Federal subsidized job when the grant ran out 5 months ago—

Ronald Reagan is the best thing that has happened to America since the pop-top beer can. I'm willing to give up my military retirement pay too, as long as everyone else gives up theirs if that's what it takes. The government doesn't owe me a thing. I'll make it on my own.

From a car dealer hit hard by interest rates—

But if that (high interest rates) are what it takes to stop inflation, let's do it. I'm willing to bite the bullet.

From a poultry plant manager on the program—

I'll have to bear with it. The cuts are hurting me and many other people, but there's no other way. We'll be nationally bankrupt otherwise.

There is much more to give those of us who have lately become weak in our resolve new heart. I want to commend this article of Monday, September 21, to my fellow Senators as proof of the continuing American strength. Those who govern have always derived their strength from the governed. That is the way the Founding Fathers planned it. That is the strength of democracy. I hope my fellow Senators will read this brief report and renew their resolve for what they were sent to Washington to do.

Mr. President, I ask unanimous consent to have printed in the RECORD the article from the Washington Post to which I have referred.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Washington Post, Sept. 21, 1981]

A COUNTERPOINT TO CONCERNS OVER BUDGET

(By Art Harris)

GAINESVILLE, GA.—Neal Evans lives in a $180-a-month room with stove in the Dixie Hunt Hotel here, watching his savings slip away, riding the back roads to find work. A certified welder, he has had interviews with a dozen companies since he lost his $12,000-a-year job weatherizing houses for the poor under a federal grant that ran out five months ago.

His job prospects look bleak, he says, slumping into a worn leather chair in the dreary hotel lobby, a victim of Reaganomics. A working man, he should hate the president's tight-fisted economics, like the more than 250,000 who marched in Washington in protest Saturday. But he doesn't.

"Ronald Reagan is the best thing that has happened to America since the pop-top beer can," says Evans, 47, a retired Navy chief petty officer who was wounded twice in Vietnam.

He adds that he's willing to give up his military retirement pay, too, "as long as everyone else gives up theirs," if that's what it takes to balance the budget. "The government doesn't owe me a thing. I'll make it on my own."

Beyond the Potomac, people like Evans offer a counterpoint to the rising level of concern over Reagan budget policies expressed by the throngs who marched in the largest Washington rally since civil rights days. They were mad as hell, fed up.

But walk down Main Street in this conservative southern town, billed as the Chicken Capital of the World for its processing plants, where 700,000 birds are plucked and packaged a day, and you'll find dozens of working-class people like Evans, middle managers, small businessmen, Democrats and Republicans who exhibit a remarkable spirit of self-sacrifice.

Many say they'll stay behind the president, even as his policies nibble away at their American dreams.

"The man-on-the-street interviews we do show a good deal of support for the president," said Robert Campbell, the balding, bespectacled editor of The Gainesville Times. "The general feeling is, 'Give Reagan a chance' " to let his policies take effect.

The town, population 35,000, lies 50 miles north of Atlanta. This is the heartland of Carter country, in the only Deep South state to vote against Reagan last November. But Campbell describes that vote as "more pro-Carter than anti-Reagan, Carter being the home boy."

In the Dixie Hunt Hotel bar, a crowd of insurance agents, lawyers, real estate salesmen, secretaries and school teachers celebrated that it was Friday and toasted the Georgia Bulldogs.

One patron, a federal agent, has a wife, three children and a mortgage, but was almost upbeat about the news that Reagan planned to ax his whole department, the Bureau of Alcohol, Tobacco and Firearms.

"Some may call me a naive fool, but I've been a bureaucrat 16 years and if it takes my job to get this country back on track, so be it," he said, nursing a drink with friends. "This country has been going for the last 50 years borrowing from Peter to pay Paul. There comes a time when you have to 'fess up."

High interest rates have kept buyers away from his used car lot, said Bill Millican, 45, a Goldwater Republican. "But if that's what it takes to stop inflation, let's do it," he said. "I'm willing to bite the bullet." He's slashed the price on his cars; he hopes the bar "cuts the price on their beer. It's got to stop somewhere, hopefully."

Cutbacks in federal aid to the handicapped have forced county officials to slash special education programs like the one that trains Robert Carr's 15-year-old retarded daughter, "my pride and joy." But Carr isn't bitter.

"I'll have to bear with it," says the 48-year-old poultry plant personnel manager. "The cuts are hurting me and many people, but there's no other way. We'll be nationally bankrupt otherwise."

Not everyone hereabouts remains thrilled over falling stock prices, soaring interest rates, tax reductions, budget cuts, a tight-fisted monetary policy and plans to slash Social Security, as Washington policies trickle down to these rustic foothills of the Great Smokey Mountains.

At a shopping mall on the outskirts of town, grim-faced farmers in overalls lowered the tailgates on mud-caked pickups and talked of their hard times as they began hawking okra, tomatoes, snap beans, relish.

Johnny Redd, 68, a farmer who voted for Reagan, raises gourds and corn on 126 acres just outside town. The cost of fertilizer has doubled since Reagan took office, he groused. He wants to trade in his 1966 Chevrolet pickup, but doesn't have $14,000 for a new one.

The little money he earns at open air markets "don't go nowhere. I can't get a dollar ahead. It was bad enough when Carter was in there, but now it's worse. Don't know who to blame it on, but prices have got to stop someplace."

He came out of retirement after Reagan took office. "I had to go back to work," he said. "He's put all us old folks back to work." He waved a callused hand toward the gray-haired farmers in the parking lot. "Look at all these old folks out here."

Beyond the town square, where a bronze statue of a Confederate soldier stands watch just a stone's throw from a 30-foot marble monument to a rooster, Wayne McGee, 50, cooks up perhaps the tastiest fried chicken in town at the L&K Cafeteria, where he earns $200 a week. He's still keeping the faith with Reagan, he says, even though high interest rates have made it hard for him to borrow what he needs to build an extra bedroom.

"I figure if we stick with his policy, it will bring rates down. But we've got to let his tax cuts and cuts on all the programs take effect. We gotta give him time."

At the L&K, mill workers sit side-by-side with the millionaires who own some of the town's mills and poultry plants. McGee, who conducts his own straw poll outside the kitchen, says "the millionaires are for him and the workers are for him. We only have a couple who aren't" for Reagan's policies.

"I like everything he's doing except for Social Security cuts," he says.

Kevin Brown, 24, a black who earns $4.92 an hour as a poultry worker, says he voted for Reagan and would vote for him today. "At least he's trying," he said. "He's done everything he said he would do. But he needs to cut more programs. A lot of people need help, but there are a lot of people on welfare who could get a job."

Real estate appraiser James Patterson, 68, spooning some cherry cobbler, said. "I'm a Democrat, but I'm with Reagan. With Carter, we were going to hell down a one-way street."

Yet, he sympathized with those who felt the squeeze. "I don't want anyone to suffer. I've been down and out myself. I just don't want to pay for parasites," he said.

"I say cut waste from federal programs, make 'em hard-nosed. Everybody should have an opportunity, but no one should have a premium. It's going to hurt, but the only way to save ourselves is to get up off the floor and fight, hit the other guy more than he hits you."

Bob Williams sells whiskey, and Reagan, he says, has started people drinking the hard stuff like nothing he's ever seen. He adores the president's policies. "People are buying anything to kill the pain of inflation," he says.

"The worse the economy is, the better my business is. People are drinking and getting divorced. When Reagan finishes cutting all the CETA workers, I'll make a fortune selling cheap wine."

---

## COMPETITION FROM THE JAPANESE SPACE PROGRAM

Mr. CANNON. Mr. President, on April 20 of this year a prestigious committee of Japanese industrial and academic leaders issued a report on the current status of the Japanese space industry and the steps that Japan should take during the next 10 to 20 years to increase substantially its share of this high technology industry. The Japanese committee's report illuminates some of the competition that the United States is likely to face in the space area in the future.

Currently the Japanese import approximately as much space-related equipment as they export. This amounts to approximately 20 percent of the total sales of their space industry. In order to reduce their imports, they are seeking to eliminate their dependence on U.S. space technology and at the same time develop their own national capability. Recently, Japan's National Space Development Agency, their equivalent of our NASA, indicated its desire to increase the use of Japanese produced equipment in its own space systems. While they are seeking to eliminate their need for imports during the 1980's, they are planning to increase their exports. By 1990

the Japanese hope to increase their level of exports from 20 percent to more than 30 percent of their total sales.

The Japanese report estimates that the annual sales of the Japanese space industry will grow from its present level of 100 billion yen (about $400 million) to 500 billion yen a year in 1990, and to 1 trillion yen a year in the mid-1990's.

Thus, during the 1980's Japan's space industry would grow to five times its current size and continue this growth during the 1990's. The Japanese not only expect to share in the growth in demand for satellites but also in the manufacturing of various products in space and in developing and launching their own rockets.

The Japanese space program will be based upon a coordinated effort by the Japanese Government, industry, and universities in a manner similar to NASA's arrangements in this country. There is, however, one important difference. Whereas U.S. support for NASA has declined substantially over the past 15 years and shows no sign of reversal, the Japanese commitment to a growing space program appears to be quite strong.

The Japanese realize the value of such a high technology program as a stimulus for their economy and as a means to improve the quality of life in Japan. Their support of high technology and innovation is well placed. A recent item in the Wall Street Journal indicates that Japan now expects to pass the United States in per capita GNP by 1990. We ought to realize, as the Japanese do, that our civilian space program is not just another line item in the Federal budget. Not all Federal expenditures are the same. Some are investments that will provide many long-term benefits.

The Japanese, by becoming the world leader in the production of steel and manufacture of automobiles, have shown that they can be a strong international competitor with U.S. industry. With increased competition from the Japanese as well as the European space industries at a time when there is a decline in U.S. funding for space-related R. & D., I hope that we do not lose our preeminence in space.

Mr. President, I had the entire Japanese report translated and found it quite interesting. I mentioned some of their expectations, but rather than insert the entire report in the RECORD, I would like to include only the table of contents and the introduction and conclusion. If any of my colleagues would be interested in seeing the entire report, I would gladly make it available to them.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

REPORT OF THE DELIBERATION COUNCIL ON BASIC PROBLEMS IN THE SPACE INDUSTRY

TABLE OF CONTENTS

*Introduction*

Chapter I. The Present Situation in the Space Industry.

Section 1. The scope of space industry.

Section 2. The present situation in the utilization of space.

(1) In the field of communications.

(2) In the field of broadcasting.

(3) In the field of weather observation.

(4) In the field of terrestrial observation.

(5) In the field of scientific and other observations.

(6) In the field of materials experiments.

(7) In the field of rocket launchings.

Section 3. The present situation in the space industry.

(1) Space industry in the world.

(2) Space industry in Japan.

Section 4. Special characteristics of the space industry and significance of its growth.

(1) An industry envisioning man's future.

(2) An industry with expectations of obtaining a broad diffusion effect of technology.

(3) A creative knowledge-intensive industry.

(4) An industry essential for economic stability and security.

(5) An industry offering new dreams to mankind.

Chapter 2. Future Prospects of the Space Industry.

Section 1. The future course of space utilization and its contribution to society.

(1) In the field of communications.

(2) In the field of broadcasting.

(3) In the field of weather observation.

(4) In the field of terrestial observation.

(5) Developing new fields while studying its utilization.

Section 2. Future prospects of the space industry.

(1) Perspective on the world's space industry.

(2) Perspective on Japan's space industry.

Chapter 3. Problematical Points on the Development of Japan's Space Industry.

Section 1. A frail technical base.

(1) Overseas dependency on essential technology.

(2) The lag in domestic production of parts and materials.

Section 2. The narrow base of space industry market.

(1) Government demand the mainstay.

(2) Lag in overseas advances.

(3) Effects of cost price.

Section 3. Problematical points in systematization.

(1) Technology induction control based on United States' OMC and Export Control based on U.S.-Japan Exchange of Protocol.

(2) Relation with existing related regulations.

(3) Limitations of orbital and frequency resources.

(4) Launching site problems.

Chapter 4. Policy for Japan's Space Industry Development.

Section 1. Establishment of an independent technology.

(1) Development of positive technology source in Japan.

(2) Furtherance of independent technology development in the civilian sector.

(3) Promotion of technology development based on national experimental research organizations.

(4) Promotion of international joint development.

(5) Promotion of domestic production of space-use parts and materials.

(6) Furtherance of acquisition of space-use machinery testing and manufacturing facilities.

(7) Maintenance of a stable budget for space development.

Section 2. Expansion of space-industry demand.

(1) Dissemination and development of utilization and technology.

(2) Promoting overseas markets.

(3) Promotion of "cost-down."

Section 3. Policies on systematization.

(1) Technology induction control based on U.S. OMC and policy on export control based on U.S.-Japan Exchange of Protocol.

(2) Policy on expansion of launching satellites and their utilization.

INTRODUCTION

1. A new page in space utilization was written when, on April 15, the manned space shuttle Columbia returned safely to earth after its maiden flight of 54 hours.

In 1969, when man first reached the moon in Apollo II, the world heralded the feat as a triumph in man's scientific achievement. However, the success of the space shuttle as formally inaugurating the space utilization age was coolly received.

2. Now man, supported by modern scientific progress, has succeeded in developing rockets and satellites and in acquiring the means of his own access to space. In space development initiated primarily by the U.S. and U.S.S.R. after World War II, the objective was mainly the establishment of a rocket and earth satellite technology, but owing to the subsequent 30 year-accretion of technology, space utilization has already commenced with intelsat employed as international telephone relay, international television relay, weather satellites for meteorological observations, telecommunications, broadcasting, and terrestrial observations, and man has already been enjoying their benefits. In this sense, man, while advancing space development and enjoying its fruits, is awaiting the dawn of the space age.

Looking at space development and space utilization prospectively into the 21st century, we can envision space factories, electrical resources from planets, space colonies, and the like expanding without limits and, hopefully, which will go a long way toward solving man's important problems of energy resources and population.

3. In Japan's space development and utilization program since the successful launching of the satellite Osumi in 1970, Japan has succeeded in launching 20 satellites to date, but in technical standards, there is a big gap compared to the U.S. and Europe.

The space industry which supports Japan's space development and utilization has been instrumental in the following ways:

(1) Through satellites and rocketry-use facilities, it has made possible the utilization of air space and has contributed to the improvement of life.

(2) By attaining a very high level of technology and relying on its diffusion effect, it has upgraded Japan's industrial technology.

(3) It has advanced Japan's creative knowledge-intensive industry.

(4) It has been an indispensable industry for Japan's economic security and stability.

(5) It has presented a new dream to mankind.

However, in observing the actual situation of Japan's space industry, it is characterized by:

(1) A frail technical base;

(2) A narrow-based demand market;

(3) The onus of existing regulations on technology induction is troublesome, and ways must be found to overcome the burden.

However, recent technological progress makes us take notice: no one ever thought of reaching the moon after only 60 years since the Wright brothers' flight.

4. On the basis of the afore-mentioned situation, the Space Industry Basic Problems Deliberation Council was established last year in November to study the current state of the space industry, its future course, problematical points, and furtherance.

This was the first attempt in Japan to systematically take up the space industry as an industry, and this report shows the results obtained through a course of seven meetings held by the Deliberation Council. The scale of Japan's space industry has barely reached 100 billion yen in annual sales,

but has begun to attain the status of an industry as such. It is at this juncture that we hope that this report will be helpful in the development of Japan's space industry.

CONCLUSION

Japan has the future prospect of advancing a high-level welfare society, but there are many matters which must be resolved, such as energy resources and economic security and stability.

Japan's GNP is second in the Free World and Japan's scientific and technological standards, especially in electronics and machinery is second to none.

However, Japan's space industry which is trying to stand on its own feet and space utilization lag behind those of U.S. and Europe.

Owing to the recent space shuttle success, the world is in a major transitional stage to enter the space utilization age, and Japan, too, should ride on the wave of the future and move steadily forward.

In this sense, more than ever before, the demand for fostering the space industry is great.

In the future, in order for Japan's development of the space industry in line with the U.S. and Europe, it is necessary to plan for its furtherance from the standpoint of a long-range view and global outlook.

To this end, the government's vigorous implementation of its policy is desirous, and it is hoped that this report will form a guide for its implementation.

## A BALANCED NATIONAL ENERGY POLICY

Mr. JACKSON. Mr. President, many of us have seen or read about a DOE memorandum dated September 15 that purports to indicate how the DOE intends to meet its revised fiscal year 1983 budget targets assigned by the Office of Management and Budget. It is my hope that this document is a misprint, perhaps an early draft that already has been rejected by the administration.

On the other hand, if it is accurate, then the Department of Energy apparently will seek to achieve its budget cuts by phasing out the fossil fuels program, the energy conservation program, the renewable energy program and finally by slashing nearly in half the budget for the strategic petroleum reserve.

Mr. President, if this document has any veracity, we are launched on a course of sheer madness. What kind of a signal are we sending to the world and especially to OPEC with such a hard about turn in national energy policy? Have we so soon forgotten that energy is a major aspect of national security and our foreign policy?

For example, the strategic petroleum reserve is our most important energy program for national security in this decade. We have a quarter billion barrel stockpile in sight now—projections show 240 million barrels will be in storage by December 31 of this year. An adequate SPR is attainable if we continue buying oil aggressively and the time is right to buy oil.

Moreover, Congress has created an off-budget account to fund the SPR, so the administration can buy oil aggressively without contributing to the perceived deficit. I would prefer that we fully fund the SPR on-budget, but if the funds are not available on-budget, as this DOE document indicates, then let us keep the SPR off-budget. And if pleasing Wall Street is the primary objective of the administration, I would venture to say that most people on Wall Street understand the need for it (perhaps better than OMB Director Stockman) and would approve of full funding of the SPR.

Mr. President, the proposed abolition of our energy conservation programs is equally disturbing.

This administration is fortunate indeed that there is an oil glut in the world today due to decreasing demand for oil. Let us not forget what is causing that oil glut.

While domestic production of crude oil is down by 0.6 percent for the first 253 days of this year as compared to last year, we are importing 22.7 percent less oil (excluding SPR) as compared to last year. Besides Saudi oil production, energy conservation is acknowledged to be a major factor here.

Energy analysts have recently noted that U.S. oil savings between 1979 and 1980 accounted for over half of the Free World's reduction in oil consumption between 1979 and 1980. In fact, our oil savings in that period were as much as the total oil consumption in many industrialized nations in Western Europe and Asia.

No other oil-importing nation can maintain that world oil glut as well as the United States, simply because of the magnitude of our oil imports and our potential for energy conservation.

What signal are we sending abroad if we phase out our programs to weatherize our buildings and to perform research on more efficient furnaces, water heaters, and appliances? Earlier, the DOE said that we should accept a 79-percent cut in the fiscal year 1982 conservation budget because the energy tax credits were sufficient incentive. Now the Wall Street Journal reports that the administration is considering abolishing these tax credits. And this DOE memo contemplates a further 84-percent cut in conservation programs and preparation for a shutdown case.

If this memo is accurate, Mr. President, I have to conclude that this administration totally fails to understand how much it has benefited from energy conservation.

Then there is a proposal contained in this memo that the fossil energy program prepare for a shutdown. What signal are we sending to our allies if, first, they see us dismantling our fossile energy program; second, they see the electrocardiogram on the Synthetic Fuels Corporation is nearly flat; and third, they see that the dredging of our coal exporting ports is stalled by a philosophical opposition to Government involvement? At such a rate, Mr. President, will OPEC ever have anything to fear from the Saudi Arabia of coal, as we are often called?

My colleagues know that I am a staunch supporter of nuclear energy in this country. Yet I take little consolation that this DOE memo shows an increase over the fiscal year 1982 request in the nuclear programs among all the budget options listed. While this funding is needed, and it is essential, we still are not moving toward what the nuclear industry needs worst of all—nuclear waste legislation and standardized designs. What signal, Mr. President, are we sending when we fail to establish the necessary Federal nuclear waste program because of philosophical opposition to Government involvement, even if, as approved by the Senate last year, the costs of that involvement would be fully reimbursed?

The real danger in this memorandum, assuming it has some validity, is that it proposes that the United States severely restrict its options for our energy future. I reject the notion that fossil fuels development, energy conservation, renewable energy resources (including solar) have no role in a Federal energy policy. Our national security demands that we maintain and develop a balanced set of options.

Mr. President, once again we hear proposals to abolish the Department of Energy. Before, I could excuse this talk as uninformed campaign rhetoric. I thought surely these newcomers would learn that even prior to the last election well over half of the DOE's budget was devoted to defense and the strategic petroleum reserve.

Are we to believe that the energy security of the United States is now assured? Or are we to believe that by abolishing the DOE we will achieve energy security?

Mr. President, I do not believe that balancing the budget requires that we abandon a balanced national energy policy or that we jeopardize the attainment of energy security. I certainly hope that this memorandum and the rumors of efforts to abolish the DOE do not reflect the views of this administration.

I ask unanimous consent that this document be included in the RECORD.

There being no objection, the memorandum was ordered to be printed in the RECORD, as follows:

DEPARTMENT OF ENERGY

REVISED FISCAL YEAR 1983 OMB BUDGET REQUEST

As a result of the Presidential review of the overall Federal budget, the Department must stringently reduce fiscal year 1982 and 1983 budget authority and outlays. Achieving these reductions will require a substantial downward adjustment of fiscal year 1983 budget requests, as well as reductions of fiscal year 1982 and prior year funds. Because of the time lag between budget authority and outlays in any given year, significant reductions to budget authority may be required, in order to reduce outlays by the required amount. This is especially true in the case of fiscal year 1983. The attached formats are to be prepared by your organization and will serve as the primary decisional documents in determining how the deductions will be spread to the various decision units. These forms are to be received in the Office of Budget no later than C.O.B., September 21, 1981.

Attachment A is a table reflecting the allocation to your organization of the re-

duced ceilings. In some cases, this allocation reflects several reduction levels. The table is stated in terms of budget authority and outlays. Departmental components must distribute the allocation to the various decision units and identify reductions in their fiscal year 1983 budget, as well as reductions in fiscal year 1982 and prior year funds which must be proposed in order to comply with the budget authority and outlay ceilings.

An analysis, in the format of Attachment B, must be completed for each decision unit. The starting point for the analysis for fiscal years 1983 is the first decrement below the original Department request (previously known as "Revised OMB Target"). For fiscal year 1982, the starting point is the President's budget request currently pending before Congress. The analysis provides for identification of reductions to budget authority and outlays in both fiscal years 1982 and 1983. The format provides for a listing of reductions and subtotals for each funding level included in the attached allocation of reductions. The second part of the analysis requires a narrative explanation of the impact of the reduction. The narrative should be objective and explain what will be accomplished at the reduced funding levels, as well as what will not be accomplished. The reductions included must reflect the true priorities of the Department. No attempt should be made to offer up activities which have a high priority in an effort to avoid reduction.

Departmental organizations should also prepare a summary schedule in the format of Attachment C. A separate summary table should be prepared for budget authority and budget outlays.

As indicated above, Attachments B and C are due to the Office of Budget on September 21. Hearings before the Secretary, Deputy Secretary and Under Secretary will be scheduled the week of September 21. Final revised allowances will be distributed September 25. Revised budgets reflecting the Secretary's allowance will be due to the Office of Budget on October 2. Additional guidance, as necessary, will be provided as developed.

DEPARTMENT OF ENERGY—OMB BUDGET CASES

[In millions of dollars]

| | Budget authority | | | | Outlays | | | |

[1] In addition, these programs are to prepare a shutdown case.

## CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. Is there further morning business? If not, morning business is closed.

## ORDER OF BUSINESS

The PRESIDING OFFICER. The majority leader is recognized.

Mr. BAKER. Mr. President, what is the business now before the Senate?

The PRESIDING OFFICER. As to the business before the Senate, the majority leader has authority to call up the following bills from the calendar: Calendar Order No. 233, S. 1365 the Bankruptcy Act Amendments; Calendar Order No. 237, S. 1475 Extension of Energy Policy and Conservation Act; Calendar Order No. 85, S. 306 the Hydroelectric bill; and Calendar Order No. 117, S. 1135 the Defense Production Act; not necessarily in that order.

Mr. BAKER. I thank the Chair.

## BANKRUPTCY ACT AMENDMENTS

Mr. BAKER. Mr. President, pursuant to the authority granted on yesterday, I call up Calendar Order No. 233, and ask for its immediate consideration.

The PRESIDING OFFICER. The bill will be stated by title.

The legislative clerk read as follows:

A bill (S. 1365) to amend the Bankruptcy Act regarding farm produce storage facilities, and for other purposes.

The Senate proceeded to the consideration of the bill.

Mr. BAKER. Mr. President, the distinguished chairman of the Finance Committee and the manager on behalf of the minority, I am advised, are available and will be here shortly.

The bill is now before the Senate. I announce, however, that it is my intention shortly to ask the Senate to recess over until 2 p.m. So I do not anticipate that there will be any significant amount of debate on this measure at this time.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. Mr. President, what is the pending business?

The PRESIDING OFFICER. The pending business is S. 1365.

UP AMENDMENT NO. 404

(Purpose: To provide for Clarification of Ambiguities, and for other purposes)

Mr. DOLE. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Kansas (Mr. DOLE) proposes an unprinted amendment numbered 404.

Mr. DOLE. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 2, line 10, add the following after the word "quantities":

"; however, such term shall not be construed to include any retail grocery business operation."

On page 3, strike out lines 14 through 18, and insert in lieu thereof the following:

"(5) Fifth, allowed unsecured claims of farmers or other persons engaged in farming operations arising from the sale or conversion of farm produce to or by a debtor engaged in the business of operating a farm produce storage facility—

(A) where such sale or conversion occurred within 180 days before the date of the filing of the petition or before the cessation of the debtor's business, whichever occurs first; but only

(B) to the extent of $2,000 for each such individual."

On page 4, strike out lines 2 through 4, and insert in lieu thereof the following:

"(a) Notwithstanding any other provision of this title, in a case filed under such title by, or with respect to, a person engaged in the business of operating a farm produce storage facility, the court"

On page 5, line 9, delete the word "the" which follows the phrase "physical assets of", and insert in lieu thereof the word "all"; and on line 10, delete the word "facility" and insert in lieu thereof the word "facilities".

On page 6, strike out lines 20 through 23, and insert in lieu thereof the following:

"(i) a quantity of farm produce sold by the trustee was held by the debtor as bailee only, without benefit of legal or equitable title, and that title to such produce was vested in the claimant; or"

On page 7, line 2, insert the following after the word "value": "or burdensome".

On page 7, line 24, strike out all through page 8, line 3, and insert in lieu thereof the following:

"(A) With respect to claimants who have established to the court's satisfaction that the trustee sold farm produce as to which title lies in the claimant, the"

On page 9, line 3, insert the following after the word "value": "or burdensome."

On page 9, strike out lines 21 through 25, and insert in lieu thereof the following:

"(D) Expenses and compensation of the court or trustee incurred pursuant to the liquidation and abandonment of farm produce and proceeds thereof shall be paid, in conformity to the provisions of section 330 of this title, in the following manner:"

On page 11, strike out lines 5 and 6, and insert in lieu thereof the following: "rights of ownership to farm produce, legal or equitable title to which does not exist in the debtor, as reflected by the"

On page 13, strike out lines 11 through 19, and insert in lieu thereof the following: "council pursuant to such section. The appeal shall be perfected in accordance with the rules applicable to the prosecution of appeals under this title. The district court (or bankruptcy panel) shall rule upon the issue of whether or not the order of stay so entered is appropriate, in consideration of the provisions of Rule 62 of the Federal Rules of Civil Procedure and the law applicable thereunder, within thirty days after the docketing of the appeal."

On page 14, strike out lines 16 through page 16, line 2, and insert in lieu thereof the following:

"(g) In actions filed under this title in any State wherein an agency exists which operates under the supervision of that State's government, and which is charged with the responsibility for presiding over the liquidation of an insolvent farm produce storage facility licensed under the laws of such State, the bankruptcy court shall appoint the director of such State agency to act as co-trustee together with the private trustee, if any, appointed under this title, and such party shall perform the duties required of the trustee under this section until the completion of the distribution of the proceeds of farm produce required by this section: Provided, that such co-trustee shall not be relieved of its responsibilities before the orders of abandonment required to be entered under this section are made. Said co-trustee shall perform all duties required of the trustee under this section, but shall not be required to perform any duties of the trustee mandated by any other provisions of this title. Said co-trustee shall not recover any compensation out of the assets of the estate for the services performed under this section.

"(h) In actions filed under this title by a debtor in the business of operating a farm produce storage facility licensed under the United States Warehouse Act, the bankruptcy court shall appoint the Administrator of the Agricultural Marketing Service of the United States Department of Agriculture to act as co-trustee together with the private trustee, if any, appointed under this title; and such party shall perform the duties required of the trustee under this section until the completion of the distribution of the proceeds of farm produce required by this section: *Provided*, that such co-trustee shall not be relieved of its responsibilities before the orders of abandonment required to be entered under this section are made. Said co-trustee shall perform all duties required of the trustee under this section, but shall not be required to perform any duties of the trustee mandated by any other provisions of this title. Such co-trustee shall not recover any"

On page 17, add the following after line 21:

"SEC. 11. Section 545(2) is amended by striking the semicolon following the word "exists", and adding the following: ", except that this section shall not apply to a lien interest arising by virute of the provisions of 7 U.S.C. s. 262(a);"

Mr. DOLE. Mr. President, the Senator from Kansas is pleased to bring up S. 1365 for consideration, together with certain amendments thereto which I have filed with the clerk today. I would like to make a few comments for the record concerning the bill and these amendments.

S. 1365 is the result of the inquiry of the Judiciary Subcommittee on the Courts into problems posed for the agricultural communities of our Nation by farm produce storage facility bankruptcies. Over the past few years, in a number of States of the Central Midwestern and Southeastern parts of the United States, there has been a steady annual increase in the number of crop elevator insolvencies which have detrimentally affected farm producers, elevator financiers, and other segments of the agribusiness community.

Perhaps the most serious result of these bankruptcies has been that farm producers have, in most cases, been unable to obtain quick distribution of the crop assets they hold in storage in those defunct elevators. Farmers in Missouri, Kansas, Indiana, Iowa, Nebraska, Illinois, and Arkansas have seen thousands of bushels of grain, soybeans, and other cash crops tied up in bankruptcy courts under circumstances making it difficult, if not impossible, for those farmers to recover the crops, owned by them, which had been deposited with those elevators on storage contracts.

In response to this problem, hearings were held before the Subcommittee on the Courts of the Judiciary Committee with the objective of examining what changes might be made in current bankruptcy law and procedures to expedite the abandonment of crops which are not part of the estate of a bankrupt elevator operator, as well as those secured to the extent of their market value, which have no equity value for the estate.

Two days of hearings, at which abundant written and oral testimony was presented, and the research of Judiciary Committee staff elicited the need for the changes in law and procedure which are embodied in this bill.

Mr. President, the Senator from Kansas will not take the time now to detail the provisions of the bill. A complete statement detailing the circumstances surrounding this legislation, the events that gave it impetus, and the various provisions of the bill and their effect on existing law and practice will be inserted in the RECORD at the conclusion of my remarks.

In essence, the bill provides for an expedited abandonment procedure for crop assets held by an insolvent elevator operator: It provides for the granting of a statutory lien to farm producers on crop assets held by an insolvent elevator warehouse upon a sales contract for which the producer has not been paid: And it grants a priority position to farm producers in any distribution of assets to unsecured creditors, where those producers have, even after distribution, still suffered a loss due to shortage of crop assets on hand.

It would also bring the State and Federal agencies who have statutory responsibility for supervising the liquidation of insolvent elevators into bankruptcy proceedings to act as cotrustee in directing the liquidation of farm produce and distribution of assets, thus ending conflicts in jurisdiction between bankruptcy courts and those agencies.

The amendments which I have offered to the bill would make several minor changes which have been requested by the Departments of Agriculture and Justice. The amendments are primarily technical in nature, and do not affect the thrust of the legislation: they are based upon comments received from those agencies after the committee report was filed.

Most of them involve substituting language of greater specificity for passages perceived as ambiguous by those who have had opportunity to review the bill, or correcting erroneous cross referencing citations; and they are self-ex-

planatory. I would, however, call attention to the fact that a $2,000, 6-month limitation is placed upon the priority created in the bill for farm producers who wind up in the position of general insecured creditors in a storage facility bankruptcy by these amendments. This will conform the priority provision in the bill to other, similar sections of the bankruptcy code, and will be more equitable to other creditors in the bankruptcy proceeding.

I have proposed this change because, as I have pointed out in previous statements, I am concerned that this bill not be viewed as class legislation designed to benefit farmers at the expense of other creditors in bankruptcy. Also, I note that these amendments provide for the exemption of the new statutory lien for farmers from the effect of section 545(2) of title 11, the lien avoidance section of the code.

The previous amendments I filed on July 27 (amendment No. 523) have been incorporated into the amendments I filed today, and I urge favorable action by the Senate on the amendments filed today and the bill as amended thereby.

Mr. President, the only concern which have been expressed to me about the content of our final legislation as modified by these amendments relate to, first, the statutory lien created for farmers; and second, the requirement in this legislation that the trustee in bankruptcy liquidate crop assets and distribute the proceeds of those assets to the farmers and other owners of grain. With respect to the first matter, I call attention to the final language of the statutory lien section, which limits that lien to a period of 60 days from the date the contract for sale is formed.

This limitation was placed upon the lien after suggestions received by banking groups that there be a time limitation imposed. Some have expressed concern that this provision might inhibit the financing flexibility of smaller elevators: However, I am of the opinion, after exploring this issue with a number of persons who are directly involved in the elevator financing end of the business, that it will result in a more careful analysis, by the lending institutions in the field, of the financial stability of local elevators. Further, the fact that the lien is for a limited duration means that a financing bank need only conduct an examination of the books of the elevator to determine the amount of produce purchases for the preceding 60 days and discount any loan by an equivalent amount to protect its position.

On the matter of liquidation, I would note that every agency with which my staff has had discussions concerning the problems of distribution has emphasized the importance and efficiency of following the practice of straight liquidation of farm produce and distribution of the proceeds thereof, rather than attempting to distribute crops in kind. The reasons for this are fourfold: First, the problems of shrinkage and spoilage would require that an insolvent elevator be emptied and reloaded to accurately assess the quantity and quality of produce on hand; second, the inevitable administrative problems that will result when some owners request distribution in kind, while others request distribution in cash: third, the problem of protecting the security and quality of produce which is held by the trustee pending any appeal of abandonment orders; and fourth, the increased administrative costs which result from these problems.

My legislation avoids all of these problems by requiring liquidation of the crop assets at the outset of any bankruptcy proceedings. And there are advantages for the farm producer: First, the value of his produce is not diminished by spoilage or theft (as is often the case under present procedure, where the produce sits untended in a warehouse for months or years on end); second, in the event of an unsuccessful appeal of abandonment orders—where a stay on distribution of proceeds is ordered by the bankruptcy court—the owner of grain who is entitled to distribution gets his share with interest, plus the difference between his original share value as liquidated, and any higher intermediate price which that share would have obtained on the open market during the pendency of appeal.

Under the procedure incorporated in this bill, the farmer can take his cash distribution and within a day of final distribution repurchase his position in the crop if he believes market conditions warrant it.

For these reasons, Mr. President, I submit that this legislation is more than adequate to protect the interests of grain owners caught in the web of an elevator bankruptcy.

Mr. President, I ask unanimous consent to have printed in the RECORD the purpose of the bill.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 1365

I. PURPOSE OF THE BILL

The purpose of the bill is to amend the Bankruptcy Reform Act of 1978, and Chapter 10 of Title 7 U.S.C. (U.S. Warehouse Act), to accomplish the following objectives:

(1) Create a procedure which would require expedited abandonment of farm produce required to be abandoned under provisions of the bankruptcy code which is held by a debtor in bankruptcy who is engaged in the business of operating a farm produce storage facility;

(2) Create a procedure to govern distribution of abandoned farm produce which protects the ownership interests of parties who have delivered such farm produce over to a debtor engaged in the business of operating a farm produce storage facility upon a contract of bailment;

(3) Create a statutory lien in favor of farm producers who have delivered farm produce to a storage facility upon a contract of sale but have not received payment therefor, for a maximum period of sixty days from the date of the execution of the contract of sale, such lien to attach to any farm produce then owned by the debtor;

(4) Create a priority position, in the distribution of assets to general unsecured creditors in bankruptcy, in favor of farm producers with respect to debts arising out of the sale or conversion of farm produce to or by a debtor in bankruptcy engaged in the business of operating a farm storage facility;

(5) Prohibit the scheduling of the business debts of a person engage in the business of operating a farm produce storage facility in wage-earner proceedings under Chapter 13 of the bankruptcy code; and

(6) Prohibit the involuntary bailment of farm produce owned by third parties to a debtor who, being engaged in the business of operating a farm produce storage facility, seeks reorganization of such business under the provisions of Chapter 11 of the bankruptcy code.

II. INTRODUCTION

Mr. President, S. 1365 was introduced by the Senator from Kansas on June 15, 1981. The bill is designed to respond to the concerns and needs of the farm producing community with respect to farm produce storage facility bankruptcies, as those concerns and needs were expressed during hearings held before the Judiciary Committee's Subcommittee on the Courts on April 6th and May 18th, 1981. These hearings were prompted by the circumstances surrounding the bankruptcy of three farm produce storage companies which owned and operated thirteen crop storage facilities in the states of Missouri and Arkansas. Testimony of Mr. Thomas Hopkins, Coordinator of the Grain Regulatory Services Program of the Missouri Department of Agriculture, before the Subcommittee reflected that these elevator companies (commonly owned by three brothers, d/b/a/Frisbee Cotton Company, James Gin and Elevator Company, and James Agri-Center, Inc., and hereinafter referred to as the James Brothers Elevators), filed voluntary petitions in bankruptcy in the United States Bankruptcy Court for the Eastern District of Arkansas on August 11, 1980. Two of these companies applied for liquidation under Chapter 7 of Title 11; the third (James Agri-Center) filed for reorganization under Chapter 11 of that title.

Mr. Hopkins related that immediately prior to the filings in bankruptcy, the James Brothers had, on August 8, 1980, notified the Missouri Department of Agriculture that all their legal entities were unable to comply with the requirements of the Missouri Grain Warehouse Law and that they wished to voluntarily surrender possession of the five Missouri warehouses to the Department. By orders dated August 12, 1980, the Director of the Missouri Department of Agriculture was appointed receiver of each of the Debtors' warehouses by those Circuit Courts of Missouri in accordance with the authority set forth in Section 411.519.6 of the Missouri Grain Warehouse Law. Upon such appointment, employees of the Department took possession of each of the five warehouses.

Within a short time of the filings in bankruptcy on August 11, 1981, the Arkansas bankruptcy court appointed an interim trustee for the partnership debtors. The bankruptcy trustee obtained an order dated August 27, 1980, from the bankruptcy court authorizing him to operate the business of the partnership debtors, which included the right on his part to perform grain purchase agreements that the debtors had made with farmers. Upon request, he was also given the right to resell the grain so purchased to other parties pursuant to certain contracts of purchase and sale, which involved large quantities of grain. Some of the farmer-sellers were even being required to sell additional grain to the trustee, who refused to release their stored grain. Because of their ability to take possession of their own property, the farmer-depositors took possession of, and barricaded others from entering, the Ristine, Missouri, grain warehouse administered by the bankruptcy trustee. The bankruptcy trustee responded with a motion to the court for orders finding the farmers in

contempt of court, which asserted that these Missouri farmer-depositors were guilty of unlawful possession, criminal trespass, and blockade.

On September 17, 1980, the bankruptcy court granted an order directing the United States Marshal for the Eastern District of Arkansas and the United States Marshal for the Eastern District of Missouri to remove all persons blockading the facilities and directing that the marshals arrest and bring before the bankruptcy court any persons found to be blockading or barricading the James Brothers facilities or interfering with the trustee's "capacity to operate the debtor's business"; United States Marshals appeared at the premises in force. In response to demands of the trustee in bankruptcy, the Missouri Receiver involuntarily surrendered possession, and, on September 17, 1980, the Missouri Department of Agriculture's employees turned over the keys to the bankruptcy trustee, his emloyees and agents. The Missouri Department of Agriculture's employees surrendered to the trustee only because they were threatened with contempt.

After consideration by the Missouri Attorney General and the Missouri Department of Agriculture of the options available to the state of Missouri to preserve the integrity of its Grain Laws, the state of Missouri filed enforcement proceedings in the Circuit Court of New Madrid County, Missouri, on October 20, 1980. After an ex parte hearing, that Circuit Court issued a temporary restraining order prohibiting the bankruptcy trustee from exercising any jurisdiction with respect to the grain located in Missouri. Immediately thereafter, the legal representatives of the Missouri Department of Agriculture were advised that contempt proceedings against the Circut Court would be held in the Bankruptcy Court on October 22, 1980. On October 30, 1980, the state of Missouri filed a Petition for Writ of Prohibition in the District Court in Arkansas and, on December 2, 1980, that Court decided the Bankruptcy Court had jurisdiction with respect to the grain located in Missouri.

That decision held, in effect, that the bankruptcy court properly exercised preliminary jurisdiction over crop assets in which the debtor held a possessory interest, subject to final determination of ownership interests as between holders of warehouse receipts (documents of title) and scale tickets (receipts) obtained from the debtor as documentary evidences of ownership of crop assets delivered to the debtor upon contracts of bailment, on the one hand, and the debtor and the debtor's assignees, on the other. (*In Re State of Missouri, et al* vs. *United States Bankruptcy Court for the Eastern District of Arkansas*, Nos. 80–2198 and 89–2179 [8th Circ. 1981].)

Farm producer-depositors became increasingly impatient during the litigation process described above, and on February 16, 1981, one producer forcibly removed approximately 33,000 bushels of soybeans from the Ristine, Missouri elevator under jurisdiction of the Bankruptcy Court, which he owned and had deposited therewith. This was done in violation of orders of the Bankruptcy Court and with the assistance and support of several hundred farmers. The soybeans removed were taken to a nearby elevator and redeposited. As a result of this action, that producer was arraigned on federal charges relating to these acts in early March of 1981. The charges were subsequently drooped by a federal grand jury on March 20, 1981.

The events in the James Brothers case were symptomatic of similar problems experienced by farm producer groups and state Department of Agriculture officials in farm storage facility bankruptcies throughout the United States during the past several years. Testimony before the Subcommittee on the Courts established that the following problems, encountered in the James Brothers cases, have repeatedly hindered the proper distribution of farm produce located in storage facilities that are the subject of proceedings in bankruptcy:

(1) Delay in abandonment of crop assets owned by parties who have delivered such assets to the debtor upon a contract of bailment, with delays in excess of two years not uncommon;

(2) Conflicts in jurisdiction between the bankruptcy courts and state agencies charged with the responsibility of supervising the liquidation of insolvent storage facilities;

(3) The requirements of present law which mandate that owners of crop assets held by the debtor solely on the basis of his status as a bailee must share grain assets held by the trustee in bankruptcy on a pro rata basis with any creditor holding a security interest in assets of a similar type which are owned by the debtor, such that the bailors of such storage contract crop assets have the value of their property diminished for the benefit of such creditors when there is a shortage of produce on hand;

(4) The unprotected status, as unsecured creditors in bankruptcy, of farmers who have sold crops to a farm produce storage facility but have not received payment for that crop;

(5) The reluctance of some courts to accept warehouse receipts and scale tickets, the principal documents used in warehouse business to establish record of ownership of crop assets stored in warehouse facilities on bailment contracts, as evidence of ownership in bankruptcy abandonment proceedings; and

(6) The tendency of certain bankruptcy courts to attach bailed property for the payment of trustee fees and expenses incurred in performing services unrelated to that bailed property.

The Subcommittee on the Courts received testimony from officials of the United States Department of Agriculture, state warehouse regulatory and licensing agencies, farm producer organizations, the National Grain and Feed Association, and representatives of various banking associations which detailed the occurrence of these problems in warehouse bankruptcies in twenty-two states of the midwest and southeastern areas of the United States during the past two years. Witnesses further described hardships thus created for the agricultural communities affected by storage facility bankruptcies, including disruption of local commodity markets; economic stress upon farmers (in many cases forcing farmers to incur increased debt obligations) with a resulting "ripple" effect on local agribusiness companies; and tensions between local farmers, businesses, and officials of government agencies involved in the problem (law enforcement authorities, Courts, and state and federal agricultural officials).

In response to the events surrounding the James Brothers cases, the Senator from Kansas drafted and introduced, on March 31, 1981, S. 839, a bill designed to address these problems. After hearings were completed, a substitute bill was prepared and introduced as S. 1365 on June 15, 1981. S. 1365 incorporates many of the original provisions of S. 839, in addition to further measures recommended by witnesses who appeared at the hearings, or submitted written comment. S. 1365 was polled out of the Subcommittee on the Courts on June 22, 1981, and was considered and was ordered reported favorably by the full Committee on the Judiciary on June 25, 1981. The Committee Report was filed on July 27, 1981.

After the bill was ordered reported, the committee received the Administration's views on the bill by letter from Secretary of Agriculture John Block, who expressed some concern regarding (1) what law would be applicable to the determination of the status of storage facility receipts as evidence of ownership of crops and (2) an ambiguous cross referencing cite in the bill.

The concerns of the Department of Agriculture relating to the applicability of state law to the determination of ownership interests in property mandated to be abandoned under the bill reported have been addressed in the comments contained in the sectional analysis included as part of the Committee Report. Specifically, the comments accompanying section 1, subsection (3), and section 6, subsection (a)(3)(A) of the new section 555 created by section 6 of the bill, mandate that state or federal law (whichever is applicable), usages of trade, and the nature of the contract between the parties shall be referred to in determining questions of ownership.

Finally, the Department's suggestion that subparagraph (a)(4)(D) of the new section 555 created by section 6 of the bill be amended to clarify cross references relating to the payment of fees and expenses of the court and trustee is endorsed by the Senator from Kansas. Due to the delayed receipt of the Department's comments upon the bill, this change could not be made prior to the Committee vote on reporting out the bill. Accordingly, the change suggested by the Department has been incorporated into the amendment which the Senator from Kansas filed. In addition, the amendment which the Senator from Kansas filed addresses another matter which was of concern to him throughout the hearings on this matter. That concern is, that the bill not appear to be "class" legislation favoring farmers at the expense of other creditors in bankruptcy. The focus of the Senator from Kansas' concern is the priority created for farm producers who, having suffered ultimate loss at the hands of the operator of a storage facility in bankruptcy due to a shortage of crop assets in the storage facility, become unsecured creditors in bankruptcy to the extent of that loss. As the bill is reported, there is no time or dollar limitation upon that priority, in contrast to other priorities—such as wages and pension plan payments—which are contained in the bankruptcy code. The amendment offered by the Senator from Kansas deals with this problem by placing a one-year/two-thousand dollar limitation upon that priority payment to farm producers, thus affording more equity to other unsecured priority claimants in the bankruptcy proceedings.

Mr. President, the Senator from Kansas would request that a summary of the bill, and a sectional analysis thereof which has been prepared by staff, and reviewed and approved by the Senator from Kansas, be printed in the RECORD following these remarks.

### III. PROVISIONS OF S. 1365: SUMMARY AND SECTIONAL ANALYSIS

#### *A. Summary*

The bill reported by the Committee contains provisions which respond to the problems identified by witnesses as areas of primary concern in six principal ways, as detailed below:

(1) The bill creates a statutorily mandated timetable to govern abandonment of farm produce in a bankruptcy filed by a debtor operating a farm produce storage facility, which timetable would require abandonment of bailed grain and grain secured to the extent of its market value within 110 days of the filing of the bankruptcy petition (except in cases posing unusually complex issues);

(2) The bill creates a two-tiered method of distribution of crop assets required to be abandoned under provisions of the bank-

ruptcy code which is designed to protect persons who have delivered crop assets to the debtor upon a bailment contract from having their property interest diminished for the benefit of creditors holding a security interest in crop assets owned by the debtor;

(3) The bill contains measures requiring the appointment of state or federal agencies charged with the responsibility of liquidating farm produce storage facilities as interim trustee to supervise the liquidation of crops on hand in a bankrupt storage facility;

(4) The bill contains measures requiring the bankruptcy court to accept value warehouse receipts and scale tickets (designated as storage facility receipts in the bill reported) as proof of ownership of crop assets possessed by the debtor upon contracts of bailment;

(5) The bill creates a statutory lien in favor of farm producers who have sold farm produce to a bankrupt facility but who have not received payment for such produce, which lien extends from the date of the contract for sale for a period of sixty days under the bill as reported;

(6) The bill incorporates measures which would act to prohibit an involuntary bailment of crop assets owned by third parties to a farm produce storage facility which is the subject of reorganization proceedings under Chapter 11 of Title 11, U.S.C.; and

(7) The bill grants farm producers a priority position in the distribution of assets of the bankrupt to general, unsecured creditors when those farm producers have suffered a loss as a result of sale or conversion of farm produce to or by a debtor operating a storage facility, after trustee and court expenses, wages of employees, and pension plan payments.

The bill contains additional sections which are designed to inhibit frivolous appeals of abandonment orders, and eliminate the possibility of a debtor engaged in the business of operating a storage facility seeking adjustment of the debts of that business in wage-earner proceedings under Chapter 13 of Title 11, U.S.C.; as well as certain definitional and technical amendments.

*B. Sectional Analysis*

The amendments contained in sections one through six, and eight through ten of this bill are amendments to Title I of the Bankruptcy Reform Act of 1978, public law 95-598 (Title 11, U.S.C.). In these sections, all section and subsection references are to title I of the Reform Act, unless otherwise indicated.

Section seven of this bill amends Chapter 10 of Title 7 of the U.S. Code, 39 Stat. 488 et seq.

Sec. 1. Provides for definition of terms used in this bill, by addition of definitional sections to s. 101 of Title 11.

Subs. (1)(19). Defines "farm produce" to include all crops (from whatever source), poultry, livestock, and dairy products in an "unmanufactured state". The term "unmanufactured state" is intended to be broadly construed so as to encompass produce which, although initially subjected to a refinement process of some type by the producer thereof for such purposes as preservation, elimination of impurities, or similar processing steps necessary to the preparation of the produce for sale or storage, nevertheless retains its character as the result of the production effort in bulk form. The term is intended to include such items as milk, cheese, honey, and fruit produce.

Subs. (1)(20). Defines "farm produce storage facility" to include business entities which either store farm produce on bailment contracts, and/or purchase it in bulk quantities from persons engaged in farming operations.

Subs. (2). Technical amendment, renumbering affected sections.

Subs. (3)(43)). Defines "storage facility receipt" to include any document of the type routinely issued by the operator of a farm produce storage facility as evidence of ownership of farm produce stored in a bankrupt facility. The term includes, but is not limited to, documents known as "warehouse receipts", "scale tickets", or other similar designations provided they are issued for the purpose indicated. It is intended that resolution of the question of the purpose for which the document was issued be accomplished by reference to state or federal law (whichever is applicable), usages of trade, and the nature of the contract between the parties. It is intended only that the identity of the original bailor be required to be recorded on the face of the document, so as to facilitate verification.

Sec. 2. Amends title 11, U.S.C. s. 109(e) to prohibit a debtor operating a farm produce storage facility from seeking to schedule the debts of that business in a Chapter 13 wage-earner proceeding under Title 11. The intent is to confine relief for a debtor operating a farm produce storage facility to that available under the provisions of Chapters 7 and 11, so as to avoid unnecessary disruption to agricultural communities occasioned by unduly lenient wage-earner plans.

Sec. 3. Technical amendment, renumbering affected sections.

Sec. 4. Technical amendment, renumbering affected sections.

SEC. 5(1). Amends s. 507(a)(5) of Title 11 to substitute new language for the section. The new language creates a priority in the distribution of assets to general, unsecured creditors, in favor of farm producers who suffer loss pursuant to the sale or conversion of farm produce to or by a debtor engaged in the business of operating a farm produce storage facility. Together with the amendments made by s. 5(2) and (3) of the bill, this section restructures the distribution of assets to such creditors so as to allow farm producers to participate in priority distribution after those distributions made from trustee and court expenses, wages and pension plans, and before distributions made to individuals on account of the deposit of money in connection with the purchase, lease, or rental of property or the purchase of services not delivered or provided. Thus, the priorities contained in the present section 507(a)(5) and (a)(6) are subordinated to the new priority, and the present section 507(a)(5) and (a)(6) are renumbered as (a)(6) and (a)(7) by sections 5(2) and 5(3) of the reported bill.

The priority so created is a new one which is designed to enhance the other protections afforded under this bill to farm producers in an effort to cushion them from the threat posed to their economic viability by a farm * * *.

Mr. DOLE. I should like to state for the information and knowledge of the distinguished minority leader and others who have an interest that this is the same proposal that Senator DANFORTH, Senator EAGLETON, and other Senators proposed and which was adopted as a part of the farm bill which passed the Senate last Friday.

It is our hope that this amendment will become a part of the farm bill but, if not, we hope that passing it by itself will go directly to the House Judiciary Committee where Congressman GLICKMAN and others, Congressman GLICKMAN from Kansas, have an interest in the bill and will be working with Chairman RODINO in an effort to move the bill out of that committee.

I know of no objection to the proposal. It was adopted unanimously as a part of the farm bill last, I think it was, last Thursday.

Mr. ROBERT C. BYRD. Mr. President, I am informed that Senators HEFLIN and BIDEN are supportive of the bill and have no objection to the amendment offered. Therefore, there is no objection on this side.

The PRESIDING OFFICER. The Senator from Kansas.

Mr. DOLE. Mr. President, I move the adoption of the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Kansas.

The amendment (UP No. 404) was agreed to.

● Mr. DANFORTH. Mr. President, ruinous hardship can result from a grain elevator bankruptcy.

The farmer who has faced down the escalating costs of seed, fertilizer, machinery, and other supplies; who has survived the uncertainty of weather and market prices; who has invested in the harvest and transport of his crop to storage; who depends on the sale of his product to finance the next season's production—this farmer should not have to see his crop tied up for years in litigation or, worse yet, sold to satisfy other creditors if the warehouse in which it is stored goes belly up.

Yet, under present bankruptcy law, the farmer can find himself in precisely this fix: deprived of the fruits of his labor, through no fault of his own, at the very moment that his need for cash is most pressing.

Missourians are all too familiar with the troubles that can occur under current law. The colossal failure of the Ristine elevator near New Madrid threw a harsh spotlight on its shortcomings.

Although very few grain elevators ever go bankrupt, I am advised that in Missouri alone more than $7 million in unsettled claims remain on the books; some of these claims date from 1975.

S. 1365 would address the shortcomings of current law. S. 1365 is a revision of the measure amending the Bankruptcy Act introduced by Senator DOLE and myself on March 31. On July 27, the measure was favorably reported by the Judiciary Committee.

In its essence, S. 1365 would accomplish three things. First, it would enable producers with crops in storage to establish title to the grain quickly, thus giving them a position from which to protect their assets. Second, the bill would establish strict timetables and methods for the distribution of assets. Finally, farmers would be in a more favorable position to secure their share of the assets than provided under present law.

I commend Senator DOLE for his hard work in fashioning the necessarily complex provisions of S. 1365 and for his able handling of the bill in the Judiciary Committee.

I strongly urge the passage of S. 1365. There are too many farmers in Missouri and other States who have been forced—

through no fault of their own—to learn that justice delayed can be justice denied.●

The PRESIDING OFFICER. If there are no further amendments, the question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading and to be read a third time.

The bill (S. 1365), as amended, was read the third time and passed as follows:

S. 1365

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That section 101 of title 11, United States Code, is amended—

(1) by adding after paragraph (18), the following:

"(19) 'farm produce' means the product of a person engaged in a farming operation, including crops, poultry, livestock, or dairy products in an unmanufactured state;

"(20) 'farm produce storage facility' means any business enterprise operated by any person for the purpose of (A) providing facilities for the temporary storage of farm produce; or (B) purchasing farm produce from persons engaged in farming operations in bulk quantities; however, such term shall not be construed to include any retail grocery business operation;";

(2) by renumbering paragraphs (19) through (40) as paragraphs (21) through (42), respectively; and

(3) by adding after paragraph (42) as renumbered by this section, the following new paragraph:

"(43) 'storage facility receipt' means any document of the type routinely issued by a debtor operating a farm produce storage facility for the purpose of establishing a record of ownership of a quantity of farm produce which is stored with such facility by any person upon a contract of bailment. Such term shall include a warehouse receipt or a scale ticket, provided identification of the owner of the produce represented thereby is clearly noted upon the face of such document.".

SEC. 2. Section 109 of title 11, United States Code, is amended in subsection (e) by inserting after "commodity broker," the following: "or a person engaged in the business of operating a farm produce storage facility (with respect to the debts of that business),".

SEC. 3. Section 502(i) of title 11, United States Code, is amended by striking out "507(a)(6)" and inserting in lieu thereof "507(a)(7)".

SEC. 4. Section 503(b)(1)(B) of title 11, United States Code, is amended by striking out "507(a)(6)" and inserting in lieu thereof "507(a)(7)".

SEC. 5. Section 507(a) of title 11, United States Code, is amended—

(1) by adding after paragraph (4) the following:

"(5) Fifth, allowed unsecured claims of farmers or other persons engaged in farming operations arising from the sale or conversion of farm produce to or by a debtor engaged in the business of operating a farm produce storage facility—

"(A) where such sale or conversion occurred within one hundred eighty days before the date of the filing of the petition or before the cessation of the debtor's business, whichever occurs first; but only

"(B) to the extent of $2,000 for each such individual.";

(2) by striking out "(5) Fifth" and inserting in lieu thereof "(6) Sixth"; and

(3) by striking out "(6) Sixth" and inserting in lieu thereof "(7) Seventh".

SEC. 6. Title 11, United States Code, is amended by adding after section 554 the following:

"§ 555. Expedited abandonment of farm produce

"(a) Notwithstanding any other provision of this title, in a case filed under such title by, or with respect to, a person engaged in the business of operating a farm produce storage facility, the court shall follow the procedures herein stated, unless otherwise indicated.

"(1) Within ten days after the filing of the petition, the court shall direct the trustee who has been appointed to supervise liquidation and management of the estate to conduct an examination of the debtor, and of the debtor's books, records, and accounts to determine the identity of persons—

"(A) who either have or may claim to have an ownership interest in farm produce delivered over to the trustee by the debtor by virtue of having—

"(i) retained title to farm produce stored with the debtor upon a contract of bailment;

"(ii) purchased produce from the debtor which was then, in turn, bailed to the debtor for storage purposes;

"(iii) taken assignment of, or title by judgment to, the debtor's ownership interests in produce owned by the debtor; or

"(iv) taken assignment of the ownership interest of any such parties; and

"(B) who claim status as secured creditors of the debtor arising out of a security interest in any farm produce which is delivered over to the trustee by the debtor, which farm produce is property of the debtor's estate.

"(2) Within thirty days after the filing of the petition, the trustee shall conduct an examination of the debtor and his records and, if necessary, shall conduct an audit of the physical assets of all farm produce storage facilities operated by the debtor for the purpose of determining the quantity, quality, and type of farm produce, if any, which has been delivered over to the trustee by the debtor. The trustee shall then sell such farm produce for its then current fair market value, and place the proceeds of such sale on deposit in an interest-bearing account of a type which will obtain the maximum return on such proceeds as may be practical.

"(3)(A) Within sixty days after the filing of the petition, the court shall, after notice to interested parties (including those persons identified by the trustee as having or claiming a direct ownership interest in farm produce delivered to the trustee, or a secured interest therein) conduct a hearing, at which all requests for abandonment of the proceeds of farm produce held by the trustee brought pursuant to the provisions of section 554 of this title shall be heard and determined. No request for abandonment of farm produce proceeds shall be considered which is not filed by a claimant with the court at least five days before the commencement of the hearing: *Provided,* That the court may grant leave for the filing of a request after such time period upon a finding by the court of excusable neglect justifying delay. No such request may be considered by the court after the distribution of farm produce proceeds by the trustee which is provided for herein commences, except in cases where notice or actual knowledge of the pendency of the proceedings was not provided to a claimant due to fraud, negligence of the trustee, or other cause beyond the control of the claimant. The court shall order abandonment of the proceeds of farm produce held by the trustee, in the manner specified below, with respect to each claim of an affected creditor or other party in interest who establishes, to the court's satisfaction, that—

"(i) a quantity of farm produce sold by the trustee was held by the debtor as bailee only, without benefit of legal or equitable title, and that title to such produce was vested in the claimant; or

"(ii) a quantity of farm produce sold by the trustee which was determined to be part of the debtor's estate is (at the time of the hearing) of inconsequential value or burdensome to the estate in consideration of a valid security interest existing therein in favor of the claimant.

"(B) Any claimant's production to the court of a valid storage facility receipt held by that claimant as evidence of ownership of a quantity of farm produce sold by the trustee shall be sufficient to establish a right to possession in such claimant of a share of the proceeds equal in value to the quantity, quality, and type of farm produce specified in such document. In any case where a claimant has placed the original of such document on deposit with any party as collateral for a loan, without assigning ownership interests in the farm produce over to such party, an affidavit from such party verifying ownership of such receipt by the claimant shall be sufficient to establish a prima facie claim of right to possession of proceeds in such claimant.

"(4) Within ninety days after the filing of the petition, the court shall direct the trustee to effect abandonment of the farm produce proceeds found to be subject thereto in accordance with subsection (a)(3) of this section, in the following manner:

"(A) With respect to claimants who have established to the court's satisfaction that the trustee sold farm produce as to which title lies in the claimant, the trustee shall apportion to each claimant out of the whole sum of farm produce proceeds held by the trustee that claimant's pro rata share (in comparison to the shares of like claimants) of the proceeds held by the trustee which are equivalent in value to the quantity, quality, and type of commodities which were originally delivered by such claimant, or the claimant's predecessor in title, to the debtor upon the contract of bailment. The value of such produce shall be calculated by reference to the price obtained for it at the time of sale. Distribution shall take place with respect to each of such claimants only after the deduction from such claimant's share of the proceeds of any commercially reasonable storage charge then due the debtor's estate from the particular claimant, plus any commercially reasonable charge for the expense of removing the particular claimant's farm produce from the storage facility.

"(B) With respect to claimants who have established to the court's satisfaction that the estate's interest in quantities of farm produce which (i) are part of the debtor's estate, and (ii) are subject to a security interest existing in favor of such claimants, is of inconsequential value or burdensome to the estate by virtue of such security interest, the trustee shall next distribute from the remaining proceeds of the liquidation of farm produce required by subsection (a)(2) of this section, a share of such proceeds to each of such claimants according to the value of their secured interests in the farm produce sold, as the same may be entitled to under law. Distribution shall take place with respect to each of such claimants only after the deduction from such claimant's share of any commercially reasonable charge for the expense of removing the farm produce represented by the proceeds distributed to that claimant.

"(C) Distribution of farm produce proceeds which are ordered abandoned by the court, shall commence within twenty days of the entry of the orders of abandonment.

"(D) Expenses and compensation of the court or trustee incurred pursuant to the liquidation and abandonment of farm produce and proceeds thereof shall be paid, in conformity to the provisions of section 330 of this title, in the following manner:

"(i) first, out of the funds retained by the trustee for storage charges and produce delivery charges, to the extent feasible;

"(ii) second, out of accrued interest on farm produce proceeds, to the extent feasible; and

"(iii) third, out of the whole quantity of farm produce proceeds held by the trustee prior to distribution of such proceeds.

No other expenses of the court or trustees shall be deducted from farm produce proceeds.

"(E)(i) If, after satisfaction of the claims of those persons entitled to abandonment of the proceeds of farm produce held by the trustee, there be any remaining proceeds of farm produce held by the trustee, such unclaimed proceeds shall be retained by the court in an interest bearing account, for the benefit of any persons who may present an untimely claim of right to abandonment in accordance with subsection (a)(3)(A) of this section, for a period of one year from the date of the entry of the orders of abandonment. At the expiration of such period, such funds shall be distributed in accordance with section 726 of this title

"(ii) The trustee many conduct such examination of the debtor or other persons as may be necessary for the purpose of determining the identity of any persons to whom have been assigned the rights of ownership to farm produce, legal or equitable title to which does not exist in the debtor, as reflected by the books and records of such debtor and for which no claim has been made; and shall provide notice of the pendency of the action to any person who is so identified.

"(b) This section shall be applied by the court solely for the purpose of effectuating abandonment of farm produce which is not property of the estate, or is of inconsequential value to the estate, and shall not be construed to limit the right of any party to seek abandonment of any other property delivered over to the trustee in accordance with section 554 of this title.

"(c) Distribution of farm produce ordered abandoned by the court pursuant to this section shall not be delayed due to the pendency of any appeal from the orders of abandonment, except that a stay of orders entered pursuant to this section may be entered by the bankruptcy court under the following circumstances:

"(1) the party filing the request for stay, except for the United States, shall post a bond or other security in an amount equal to the amount of farm produce proceeds, distribution of which is affected by the requested stay; and

"(2) the parties entitled to distribution of farm produce proceeds under the terms of the abandonment orders affected by the stay shall, if successful in defending the appeal, be awarded their pro rata share of the proceeds of the liquidation; plus a sum equal to the difference in value between the awarded share and the highest intermediate value (between the date of the entry of the order of stay and the date of final distribution) of the produce sold which was owned by, or secured to, such parties; plus interest on the amount of the original award at the prevailing rate allowed by law upon judgments, with interest to accrue from the date of the entry of the order of stay. The interest payment, and differential payment, provided for herein shall both be satisfied out of the bond posted by the party requesting the stay, to the extent feasible. In the case, of an appeal by the United States, it shall be satisfied out of accrued interest on the proceeds on deposit, to the extent feasible. The party or parties requesting such stay and prosecuting such appeal shall, if successful on appeal, be entitled to interest at the prevailing rate allowed by law upon judgments upon any sum which the court may ultimately award, such interest to be calculated from the date of the entry of the original order of abandonment appealed from.

"(d) Any order of stay entered by the bankruptcy court pursuant to subsection (c) of this section shall be immediately appealable as of right by any aggrieved party, to the district court for the division and district wherein the bankruptcy court exercises its jurisdiction; or, to a panel of bankruptcy judges as provided by section 405(c)(1) of title 28, United States Code, if the same has been ordered by the circuit council pursuant to such section. The appeal shall be perfected in accordance with the rules applicable to the prosecution of appeals under this title. The district court (or bankruptcy panel) shall rule upon the issue of whether or not the order of stay so entered is appropriate, in consideration of the provisions of Rule 62 of the Federal Rules of Civil Procedure and the law applicable thereunder, within thirty days after the docketing of the appeal.

"(e) In any action brought pursuant to chapter 11 of this title, the provisions of this section shall govern the abandonment of farm produce held by the trustee or debtor in possession of a farm produce storage facility business for which reorganization is sought, which farm produce is not property of the debtor's estate but is held by the debtor upon a contract of bailment only. The abandonment of any quantity of such produce shall take place only upon the request of the owner thereof, and shall be done regardless of its effect upon any existing or proposed plan of reorganization.

"(f) The time limits set forth in this section may be extended by the court for good cause shown; however, the distribution of farm produce ordered abandoned by the court shall not be deferred beyond one hundred and forty days after the date of the filing of the petition, unless the court finds that—

"(1) the interests of justice so require in light of the complexity of the case; and

"(2) the interests of those claimants entitled to distribution upon their claims will not be materially injured by such additional delay.

"(g) In actions filed under this title in any State wherein an agency exists which operates under the supervision of that State's government, and which is charged with the responsibility for presiding over the liquidation of an insolvent farm produce storage facility licensed under the laws of such State, the bankruptcy court shall appoint the director of such State agency to act as cotrustee together with the private trustee, if any, appointed under this title; and such party shall perform the duties required of the trustee under this section until the completion of the distribution of the proceeds of farm produce required by this section: *Provided*, That such cotrustee shall not be relieved of its responsibilities before the orders of abandonment required to be entered under this section are made. Said cotrustee shall perform all duties required of the trustee under this section, but shall not be required to perform any duties of the trustee mandated by any other provisions of this title. Said cotrustee shall not recover any compensation out of the assets of the estate for the services performed under this section.

"(h) In actions filed under this title by a debtor in the business of operating a farm produce storage facility licensed under the United States Warehouse Act, the bankruptcy court shall appoint the Administrator of the Agricultural Marketing Service of the United States Department of Agriculture to act as cotrustee together with the private trustee, if any, appointed under this title; and such party shall perform the duties required of the trustee under this section until the completion of the distribution of the proceeds of farm produce required by this section: *Provided*, That such cotrustee shall not be relieved of its responsibilities before the orders of abandonment required to be entered under this section are made. Said cotrustee shall perform all duties required of the trustee under this section, but shall not be required to perform any duties of the trustee mandated by any other provisions of this title. Such cotrustee shall not recover any compensation out of the assets of the estate for the services performed under this section.".

SEC. 7. (a) Chapter 10 of title 7, section 255, of the United States Code, is amended by inserting a comma after the word "storage", and by inserting the following language between the words "storage" and "in" thereof: "marketing, handling, shipping, or other disposition"; such that the section, as amended, shall read as follows: "Any person who deposits agricultural products for storage, marketing, handling, shipping, or other disposition in a warehouse licensed under this chapter shall be deemed to have deposited the same subject to the terms of this chapter and the rules and regulations prescribed thereunder.".

(b) Chapter 10 of title 7, United States Code, is amended by adding after section 262 thereof the following:

"262a. Statutory lien, pending payment for agricultural products sold to a warehouseman

"Any farmer (as defined in title 11, U.S.C. 101) who, having delivered agricultural products to a warehouseman licensed under this chapter upon a contract for sale, or having sold to such warehouseman products previously delivered upon a contract for storage, and who has not received the consideration agreed upon for the sale of said products from the warehouseman, shall have a lien against like products in the licensed facility in excess of that required to satisfy receipted or other storage obligations; against like products in transit for which payment has not been made to the warehouseman; and against unencumbered products held in other locations for the account of the warehouseman, or the proceeds from any of the foregoing, to the extent of the consideration agreed upon for the purchase of the product sold. Such lien shall attach at the time of the formation of the contract for sale and shall continue until the obligations of the warehouseman to the seller of the products are satisfied, or the expiration of sixty days, whichever is earlier.".

SEC. 8. Section 1123(a)(1) of title 11, United States Code, is amended by striking out "or 507(a)(6)" and inserting in lieu thereof "507(a)(5) or 507(a)(7)".

SEC. 9. Section 1129(a)(9)(B) of title 11, United States Code, is amended by striking out "or 507(a)(5)" and inserting in lieu thereof "507(a)(5), or 507(a)(6)".

SEC. 10. Section 1129(a)(9)(C) of title 11, United States Code, is amended by striking out "507(a)(6)" and inserting in lieu thereof "507(a)(7)".

SEC. 11. Section 545(2) of title 11, United States Code, is amended by striking the semicolon following the word "exists", and adding the following: ", except that this section shall not apply to a lien interest arising by virtue of the provisions of section 262(a) of title 7, United States Code;".

Mr. DOLE. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. DOLE. I thank the distinguished minority and majority leaders and the cosponsors of the bill. There are a num-

ber of cosponsors, and I ask unanimous consent that their names may be added.

The PRESIDING OFFICER. Without objection, it is so ordered.

The cosponsors are: Senators DANFORTH, JEPSEN, KASSEBAUM, GRASSLEY, GORTON, PERCY, RANDOLPH, DURENBERGER, WALLOP, and EAGLETON.

Mr. DOLE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

## RECESS UNTIL 2 P.M.

Mr. BAKER. Mr. President, there are meetings now that must be conducted off the floor on both sides of the aisle of an official nature which I believe will contribute to the further progress of the Senate's agenda.

I ask unanimous consent that the Senate stand in recess until the hour of 2 p.m. today.

There being no objection, the Senate, at 12:02 p.m., recessed until 2 p.m.; whereupon, the Senate reassembled when called to order by the Presiding Officer (Mr. MCCLURE).

Mr. STEVENS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. STEVENS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. HEINZ). Without objection, it is so ordered.

## EXTENSION OF SECTION 252 OF THE ENERGY POLICY AND CONSERVATION ACT

Mr. STEVENS. Mr. President, I ask that the Chair lay before the Senate, Calendar Order No. 237, S. 1475, the International Energy Agency Act.

The PRESIDING OFFICER. The clerk will state the bill by title.

The assistant legislative clerk read as follows:

A bill (S. 1475) to extend the expiration date of section 252 of the Energy Policy and Conservation Act.

The Senate proceeded to consider the bill.

Mr. MCCLURE addressed the Chair.

The PRESIDING OFFICER. The Senator from Idaho.

Mr. MCCLURE. Mr. President, is there a unanimous-consent agreement limiting the time on this bill?

The PRESIDING OFFICER. There is no unanimous-consent request.

Mr. MCCLURE. I thank the Chair.

Mr. President, on July 29 the Committee on Energy and Natural Resources favorably reported S. 1475, without amendment. The vote was 17 to 0. S. 1475 was introduced by myself, together with Senator JACKSON, on July 14. The bill would amend section 252 of the Energy Policy and Conservation Act by extending the expiration date of section 252 from September 30, 1981, to June 30, 1985.

Section 252 of the Energy Policy and Conservation Act authorizes U.S. oil companies to participate in voluntary agreements for implementing the allocation and information provisions of the agreement on an international energy program. That program provides a mechanism for an oil allocation system to be utilized by the participating countries in the event of a major oil supply disruption. Section 252 also provides a limited defense against any antitrust suits that may be brought against U.S. oil companies participating in the international energy program. The antitrust defense is limited to actions taken in implementing the allocation and information provisions of the program.

As I previously noted, the current expiration date of section 252 is September 30. If the Congress fails to act by that date and section 252 is allowed to expire, U.S. oil companies participating in the international energy program would be compelled to cease their participation in the program. If that should occur, the allocation mechanism of the program could not operate effectively in the event of any new disruption of oil supplies in the international oil market.

The Committee on Energy and Natural Resources held a hearing on S. 1475 on July 20. Testimony was provided by witnesses from the Department of Energy, the State Department, and the Justice Department. It was evident from the testimony presented at the hearing that the administration continues to take the position that maintaining the antitrust exemption is an extremely important component of our national energy policy. I certainly concur with that assessment.

If the expiration date of section 252 were extended to June 30, 1985, as proposed in S. 1475, the expiration date of the antitrust exemption would be synchronized with the expiration of titles I and II of the act. Those titles relate to domestic energy supplies, the strategic petroleum reserve, and standby energy authorities, including authorities with respect to the international energy program.

Mr. President, I will offer an amendment to S. 1475. The amendment would change the expiration date of section 252 from June 30, 1985 to April 1, 1982. This amendment is the result of recent discussions I have had with Senator METZENBAUM and Senator THURMOND. This short-term extension will provide the Committee on Energy and Natural Resources with sufficient time to consider more permanent legislation, following oversight hearings on the operation of the international energy program and the participation of the United States in that program.

Although the Committee on Energy and Natural Resources has primary jurisdiction over legislation on this matter, I have agreed to a sequential referral of subsequent legislation to the Committee on the Judiciary. The sequential referral would be for a limited period of time, following introduction of new legislation during the short-term extension of section 252 beyond September 30, 1981. The referral would enable the Committee on the Judiciary to consider the antitrust implications of section 252.

The Congress has extended the expiration date of section 252 on four previous occasions. Three extensions occurred during 1979, and the fourth occurred in March of this year, when the date was extended from March 15 to September 30. A fifth extension, also on a short-term basis, presumably will be approved by the Congress prior to the end of this month.

Mr. President, it is my judgment that we would best serve our Nation's foreign policy interests if we ultimately extended section 252 well beyond another 6-month period. Short extensions of only 6 months raise questions in the minds of our allies as to the degree of commitment of our Government to international energy cooperation. There should be no doubt about our commitment, because this Nation and its allies continue to face the very real possibility that new oil import disruptions will occur.

The international energy program serves as a partial deterrent to such disruptions, at least to the extent that it would reduce the effectiveness of planned embargoes. The U.S. Government should send to the oil exporting nations a strong signal of support for the international energy program. That signal would be a long-term extension of the antitrust exemption in section 252.

The agreement creating the international energy program was originally signed in 1974 as the result of an effort by the United States to promote cooperation among major industrial countries in reducing dependence on imported oil. There are presently 21 signatories to the agreement, consisting of most of the principal industrialized oil consuming nations. The agreement provided for creation of the International Energy Agency as an automonous entity within the Organization for Economic Cooperation and Development.

The agreement also provided that the IEA would serve as the medium for the operation of an international oil sharing system for use during oil supply emergencies. It also required each country to establish an emergency petroleum storage program, and to have a means for restraining demand for petroleum products in the event of an interruption of petroleum supplies to the IEP countries.

Section 252 of EPCA sets out procedures applicable to the development or carrving out of voluntary agreements and plans of action to implement the allocation and information provisions of the international energy program. Under this authority, U.S. oil companies entered into the voluntary agreement and plan of action to implement the international energy program. At present, 22 U.S. oil companies, including both major international oil companies and independent oil companies, are participants in the voluntary agreement.

Participation by the United States in the International Energy Agency is central to the pursuit of our long-term international energy objectives. In general terms, the IEA provides a unique and effective forum for consultations and joint actions with our principal allies in the industrialized world. It represents a shared commitment to cooperate in dealing with one of the most critical issues of our time. More specifically, in terms of facing oil shortages, the United States benefits from the IEA emergency sharing commitment.

Our participation in the allocation program reduces our vulnerability to politically inspired embargoes directed solely at the United States. Moreover, during a general triggering of the system, member countries would share the shortfall equitably, and the result would be a reduction in the devastating racheting of prices that otherwise would result from individual members scrambling for oil on their own.

Mr. President, the Senator from Ohio (Mr. METZENBAUM) is a member of the Committee on Energy and Natural Resources and is also an active member with interest in the antitrust areas within the Judiciary Committee. He has expressed a concern that, rather than a long extension of the antitrust provisions of this act, that we have a shorter extension to permit both the Energy and Natural Resources Committee and, if desired, the Judiciary Committee, to look at the functioning of the International Energy Agency and U.S. Government participation and the participation of U.S. oil companies in that mechanism.

I have agreed that, in order to accommodate that review, rather than extending section 252 for 4 years, as was agreed in the committee action and as expressed in the bill, that I would, together with the Senator from Ohio, offer an amendment to extend it only to April 1, 1982. We would then, early in the next calendar year, have legislation introduced which would effect or seek to effect a longer extension of that antitrust provision. Without settling the jurisdictional question between the Committee on Energy and Natural Resources and the Committee on the Judiciary with respect to their responsibility in the antitrust area, we would, in the next extension to be offered early next year, have a sequential referral of any such legislation introduced in the next calendar year so that both the Committee on Energy and Natural Resources and the Committee on the Judiciary would have the opportunity to examine the functioning of the program as well as the antitrust aspects that are within the concern of the Judiciary Committee.

It was also my statement that I made on the floor last Thursday and I would reiterate here that it would be my intention to have oversight hearings held by the Committee on Energy and Natural Resources with respect to the functioning of the program, how well it is functioning, what is our Government's participation in it, and what kind of participation has there been by U.S. oil companies and other commercial entities that operate in conjunction with the International Energy Agency.

I believe that at the appropriate time, then, the Senator from Ohio and myself will offer that amendment. I know of no objection to the amendment. I hope that it can be adopted expeditiously and that we can then go on to the passage of the bill.

For those who may be listening or are interested in what the procedures may be, I know of no request for a rollcall on this relatively short extension of the provisions of section 252. It is not now my intention to ask that there be a rollcall.

With that, I am pleased to yield to the Senator from Ohio.

Mr. METZENBAUM. Mr. President, the Senator from Idaho, the chairman of the committee, accurately states the understanding.

I am not clear on one point. It occurs to me—and I am not certain that it can be done—that it might be more helpful, more expeditious, if we can work it out, within the limitations of the time that we are always under in this body, so that the hearings might be held this year, both by the Energy Committee and the Judiciary Committee. I am suggesting that we leave the timing of the hearings an open question; it being my thinking that, rather than trying to run ourselves up against a deadline around April 1 of next year, we would try to go forward and explore these subjects at an early point, assuming we could find the appropriate witnesses to address the issue.

Mr. McCLURE. Will the Senator yield?

Mr. METZENBAUM. Yes.

Mr. McCLURE. I note, on my part, with respect to the scheduling of such matters before the Energy and Natural Resources Committee, I certainly have not ruled out the possibility of handling it yet this calendar year. It is just a commitment that we will do it before we get to that date next year.

Mr. METZENBAUM. I should like to urge my good friend, the chairman of the committee, that there is much merit in doing it as early as possible. Once we get back in January, it is an election year. There will be all sorts of pressures on. I think that we can do it in a more orderly manner. I make that as a suggestion, not as a demand.

Mr. President, I support the amendment which is to be offered, because I think the limited extension of section 252 is appropriate. I recognize that the current authorization for our participation in IEA expires in 1 week and I would not wish to cause any permanent changes in our IEA role at this time.

However, Mr. President, I must be candid. I have very grave reservation about our Nation's participation in IEA. I doubt the value of IEA to the American public, to the American consumer, to our Nation. I doubt that IEA can effectively allocate world oil supplies during a severe shortage. I doubt the United States could fulfill its emergency obligations under IEA without wreaking havoc domestically, especially with this administration's laissez faire attitude toward emergency preparedness.

Perhaps most importantly, Mr. President, I doubt the wisdom of providing an antitrust defense to U.S. oil companies participating in IEA. Allowing the oil companies to operate jointly in the international oil market has tremendous implications for the enforcement of our antitrust laws, implications which must be carefully examined.

I agreed to this short extension, Mr. President, only because I reached an understanding with the chairman of the Committee on Energy and the chairman of the Committee on the Judiciary that a bill providing for more permanent action will soon be introduced and referred to both the Energy Committee and the Judiciary Committee for their prompt, careful, and thorough consideration.

Mr. President, the real issue is, what do we gain from our participation in IEA? What do we gain by permitting major oil companies to collaborate in sizing up and shaping the world oil markets free of any liability whatsoever under our antitrust laws?

I am afraid the answer, Mr. President, may be that we gain very little—very little at all. And I am not alone in this assessment. The GAO has just released a major, comprehensive study of the IEA which was requested by Senator BAUCUS and myself. Its conclusions are devastating.

Mr. President, I ask unanimous consent that portions of the report be printed in the RECORD at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. METZENBAUM. First, Mr. President, the study concludes that the emergency sharing system—the core element of the IEA's allocation program—probably will not work. IEA grew out of Henry Kissinger's proposal that oil consuming nations band together to share the burdens of short-term oil supply disruptions such as the 1973 Arab oil embargo.

The mechanism for apportioning each country's share of oil during a supply crisis is the emergency sharing system. Now the GAO says this system probably will not work. Because of data error, lack of a comprehensive price dispute mechanism, and a misleading representation of emergency oil stocks, GAO has serious questions about the system's workability. And, Mr. President, I might add, the GAO is not alone in this conclusion. The Congressional Research Service came to a similar conclusion in an October 1980 report; and the U.S. Department of Energy—the Agency coming to Congress asking for an extension of the EPCA authorities for IEA—reached a similar conclusion itself in March 1981.

It is no wonder that the emergency sharing system has never been triggered. Member countries are most likely afraid to trigger it because that would demonstrate the stark reality—the "emergency sharing system," the linchpin of the IEA, the rationale for its existence—just will not work.

Mr. President, I am not unaware of the fact that the criteria that triggers

the allocation system has not actually been reached. But the fact is that the nations themselves are concerned as to whether it would work and the GAO and the Department of Energy itself have questioned the workability.

Second, the GAO also concluded that the IEA has not decreased member countries' vulnerability to oil supply disruptions as shown by the recent international oil crises of 1979 and 1980. Again, the GAO study is not alone in its conclusion. Here is what a recent article by Brian Donovan in the APF Reporter had to say about the 1979 crisis:

During the puzzling oil crisis of 1979, while oil companies and their critics argued over the reasons for gas lines and soaring prices, one little known public official, Dr. Joachim W. Koenig (Director of IEA's Division of Emergency Planning and Preparation) had more inside information about what was going on than anyone else outside the industry . . .

Koenig's findings raised new questions about the actions of major oil companies during the crisis. The IEA documents portray the world's oil consuming countries as the losers in a struggle for information on why the world price of oil was doubling and what, if anything, the countries could have been doing to stop it . . .

After the crisis, Koenig wrote a report that infuriated some company officials in the IEA's advisory committees. Although the report has never been released, its findings are outlined in other IEA documents. According to those documents, Koenig found that:

Major oil companies exacerbated a relatively minor shortage by building up "excessive" stockpiles of oil and gasoline during the spring and summer of 1979, instead of releasing the supplies to the market place.

The companies did not give enough facts to the IEA and the consuming nations' governments, creating what Koenig called a "crisis of information" instead of a "crisis of volume."

As a result, the consumer governments, especially the United States Government, grew excessively worried about heating oil supplies for the winter of 1979–80 and took actions that helped worsen the gasoline shortage and drove up world oil prices . . .

Mr. President, I want to point out that that is an absolutely devastating statement, coming from a totally responsible source, that the consumer governments, including our own, became excessively worried about heating oil supplies for the winter of 1979–80 and took actions that helped worsen the gasoline shortage and drove up world oil prices.

It is predicated on the fact, as the article also points out, that the companies did not give enough facts to the IEA and the consuming nations' governments and created a crisis of information instead of a crisis of volume.

Mr. Donovan's quote continues:

An examination of the shortage, based on documents and interviews with company officials and outside experts raises points that reinforce Koenig's conclusions.

For instance:

Despite sworn statements to Congress by Exxon and Gulf that they distributed oil without regard for expected profit margins in different countries, executives of both companies wrote memoranda which make it clear that the opposite was true. . . .

While the Carter administration was telling the Congress and the public in the spring of 1979 that a 2-million-barrel-a-day world shortage existed, it had access to IEA reports saying there appeared to be no significant shortage.

Mr. President, many of us on the floor of the Senate and throughout the countryside indicated previous occasions that it was an artificial shortage, that the shortage was not a real one.

Now we find confirmed that the IEA and the companies and the Carter administration, all working hand in glove, caused a "shortage" to exist that in reality did not actually exist. The public, in the spring of 1979, were told that there was a 2-million-barrel-a-day shortage, but the facts as reported in confidential memoranda that were available indicated that that was not a true statement.

To continue Mr. Donovan's article:

The IEA Secretariat's confidential analysis on March 28, 1979, said: "Oil is flowing from the wells and being imported by consuming countries but, through justifiable prudence perhaps reinforced by a speculative element, it appears to be sticking in the distribution system."

These are not the words of a U.S. Senator, Mr. President. These are the words of the IEA Secretariat's confidential analysis. And this analysis means that the companies were holding oil back and were not letting it flow. The article continues:

DOE proprietary figures show many major companies in the U.S. held more gasoline in storage during the May and June gaslines than they had had the previous year.

A Texaco spokesman said:

There were, in retrospect, sufficient oil supplies in the first half of 1979 to have avoided the shortages that occurred.

The administration stuck with its assertion of a 2-million-barrel-a-day shortage to justify price decontrol for crude oil even though it knew a key assumption behind that figure was wrong . . .

Mr. President, if ever there was a confirmation of the fact that the American people had been misled for the purpose of swelling the treasuries of the oil companies of the world, and particularly of this Nation, these confidential memoranda do indeed confirm just that.

IEA accomplished nothing during the 1979 "shortage." As Mr. Donovan found, oil-consuming countries were the big losers and the international oil companies were the big winners. Individual consumers waited in gas lines and saw the price of gasoline and heating oil soar. The oil companies watched their profits go through the ceiling.

Third, in virtually every circumstance, the GAO concludes, the United States would end up having to export some of its oil abroad. Only if there were a repeat of something like the 1973 oil embargo—an eventuality most experts do not believe likely—would the American consumer receive any oil supplies from the 20 other IEA participating countries. That means one thing and one alone. That means that our participation in the IEA is a one-sided deal. That means that there is no benefit to the American consumer, no benefit to the American public, no benefit to this Nation. What are we getting in return for a commitment of this immense magnitude?

Mr. President, we must have satisfactory answers to these questions before we vote on the next extension of the antitrust defense and EPCA's other authorizing provisions for IEA.

If the only gainers are the oil companies and other countries' consumers, then we ought to think very carefully about the commitment we have made.

We should question whether our further participation is warranted, whether the antitrust exemption should continue. What logical purpose is there for us to be in the IEA? That is one of the reasons why I am particularly pleased that the chairman of the Energy Committee and the chairman of the Judiciary Committee have indicated that there will be hearings to determine whether or not our further participation is warranted.

Fourth, not only would American consumers lose net oil supplies in most emergency scenarios, but, according to the GAO, it is unlikely that we could respond domestically to the disruptions caused by our having to export oil abroad.

Let me emphasize: Part of our participation in the IEA is a requirement that in the event of a shortage worldwide, we will give up our oil. Mr. President, what have some of the other IEA nations done for this Nation? When have they indicated in recent years their willingness to be of help? In this instance, we are willing to help them at the expense of the American consumer.

It is a problem, if we have to export oil abroad, and it is especially a problem because this administration endorses no emergency allocation system for distributing oil domestically in times of an emergency. The President wants to let price be the allocator. You and I know what that means. It means only the rich will be able to drive their cars. It means only the rich will be able to heat their homes.

That is what has come about by reason of this combination of our being in the IEA and the President having decontrolled the price of oil. It means that everyone but the privileged few will suffer a serious setback in their standard of living. It means that many will have to choose between eating and staying warm. This is an intolerable situation, Mr. President. Not only would our participation in IEA cause us to export oil during most emergency situations, but also, we do not even have the mechanism for coping with the disruptions that would result here at home.

Fifth, apparently it is not enough that the IEA has been a failure so far in insulating member countries from international supply disruptions. Now, according to GAO, the IEA is trying to move in a direction not originally envisioned by Congress when it initially authorized our Government's participation in IEA and provided the antitrust defense to participating oil companies. Now IEA staff want it to become a manager of international oil markets in nonemergency situations.

Of course, the oil companies will have to participate in this. And of course the oil companies will need an even broader antitrust defense to participate in this

elaborate process of regulating their own supply actions.

Frankly, Mr. President, I do not like it. According to GAO, IEA is attempting to move into areas not authorized under current law, and I think we need to examine this new direction very, very closely. If we are not getting anything worthwhile out of the current system in exchange for giving the oil companies a significant antitrust defense, then why should we broaden IEA's mandate and broaden the defense? If the U.S. consumers stand to lose as a result of emergency sharing system allocations, how would they fare under these nonemergency measures?

What justification is there for permitting IEA to head in this direction? These are all questions that we must examine very, very carefully in both the Energy and Judiciary Committees before any subsequent measure is acted upon.

Sixth—and I believe this is very significant according to the GAO study, the public accountability mechanism set up by EPCA to provide a check on oil company activities has been a failure. Although EPCA required that transcripts of industry advisory meetings be kept and made available to the public, the State Department routinely classifies so much of these transcripts that they are useless to the public.

It is about time that the State Department butted out of issues of this kind. The State Department does not do its own job very well, without getting into the international oil situation and trying to tell IEA how to operate and trying to tell Congress what we may have as information and what the GAO may obtain as well.

But the gray-strips boys in the State Department want to move in, and they have been continuing to move in. When I attended the IEA meeting, it was not the Energy Department that was speaking up; it was the State Department.

As the GAO study says:

> Unless this classification problem is addressed, the transcripts appearing in the DOE public reading room will continue to represent an incomplete record of what transpired at the meetings.

Mr. President, this is a serious defect not contemplated by those who originally agreed to provide an antitrust defense to the oil companies. Transcripts of industry IEA meetings were to be made available to the public so that potential victims of industry anticompetitive behavior could monitor oil company involvement in IEA. But the GAO tells us those transcripts are worthless for monitoring purposes.

This is a glaring problem that I hope the oversight hearings and the hearings with respect to the pending legislation will address. This is a problem that must be rectified before we are again asked to extend the defense.

Moreover, Mr. President, the State Department has not only denied the public meaningful access to the IEA transcripts, it has also kept GAO—Congress investigatory arm—out of the IEA ministerial meetings as well.

I personally was involved with other Senators in attempting to prevail upon the State Department to take some action in this connection, but they resolutely refused to do so. How can we in Congress hope to evaluate the efficacy of the IEA, if our own investigators are not permitted to attend IEA meetings for the purpose of preparing a report to Members of this body? This is simply unacceptable.

I urged, I cajoled, I importuned, I tried as hard as possible to get the State Department to permit the GAO to attend the meetings so that they might learn what was going on, on behalf of the Congress of the United States, and their answer was, "No."

Mr. President, I am saying to the State Department now, I am saying to the chairman of the Energy Committee, and I am saying to the chairman of the Judiciary Committee that this Senator will insist that those transcripts no longer be kept private. There is no reason. What is so secret about them?

Oil companies meet together and have their deliberations, absent any antitrust liability. The people of this country are not permitted to know, through their elected representatives, and we in Congress are not permitted to know through our designated investigative arm. That will be a condition precedent before we conclude the final legislation on this subject.

Finally, we must be concerned about who is making our international energy policy decisions. According to the GAO report, in the current administration, the Office of Management and Budget has played a key role in preparing our Government's position at IEA ministerial meetings.

It is interesting that it is no longer the Department of Energy that is involved in international energy policy. Now the State Department also is getting shoved aside by the Office of Management and Budget. Mr. Stockman does not have enough to do in attempting to balance the budget, but now he is also making international oil policy for this country.

I want to know which Member of this body in which I serve consented to the appointment of Mr. Stockman as head of OMB so that he could make international energy policy. I know this is one Senator who never contemplated that Mr. Stockman would be making those decisions or that anyone else at the OMB would be making those decisions. I wish to question Mr. Stockman closely about how he or his representatives are arriving at their policy decisions with respect to international oil policy.

What factors do they weigh? To what extent do they take into consideration the impact of their decisions on the American consumer?

Mr. President, there are too many unanswered questions about our participation in IEA to simply continue the status quo for another 4 years.

I am pleased that the chairman of the Energy Committee has agreed with the amendment that is to be proposed that the expiration date will be extended to April 1, 1982 and that during that interim period a full exploration of all the issues in connection with the IEA will be held.

I have previously stated that I will cooperate in bringing about final disposition of this issue by April 1, 1982. I know, as I previously indicated, that that assumes we will be able to have adequate time and adequate hearings with respect to the issues at stake.

I hope both committees with relevant jurisdiction promptly undertake a thorough review of our involvement in this agency and the implications it has for the American public and our Nation.

I thank my good friend, the chairman of the Energy Committee, for recognizing the need for such a joint review. And I thank my distinguished colleague, the chairman of the Judiciary Committee, for his support in this effort.

I look forward to working with both of them as well as the ranking minority member of the Energy Committee, Senator JACKSON, who has given this subject much attention and has his own concerns and support for the legislation. I look forward to working with all of them as we explore the issues in connection with this subject.

I thank the President.

EXHIBIT 1

REPORT BY THE COMPTROLLER GENERAL OF THE UNITED STATES

DIGEST

The International Energy Agency (IEA), established in 1974 and composed of 21 oil consuming countries, is a multilateral organization designed to facilitate responses to short-term energy disruptions and long-term supply problems. IEA's Emergency Sharing System is the mechanism available to respond primarily to short-term supply interruptions. As IEA's principal proponent, the United States contributed 25 percent ($2.45 million) of the agency's budget for fiscal year 1981.

The IEA serves as an energy policy coordinating forum for consuming nations. It has improved member countries' understanding of the oil market and provided them with a better sense of what needs to be done on an international and national level during a period of continuous supply uncertainty.

The IEA's success in a rapidly changing market environment depends greatly on the willingness of participating countries to support its basic objectives of (1) sharing supplies in an emergency, (2) developing a comprehensive oil market information system, (3) establishing a long-term cooperation program emphasizing import controls and accelerated development and use of alternative fuels, and (4) improving consumer-producer relations.

This review was requested by Senators Max Baucus and Howard M. Metzenbaum of the Judiciary Committee.

IEA ORGANIZATION AND MANAGEMENT

The IEA is an autonomous organization of the Organization for Economic Cooperation and Development (OECD). Although the IEA's annual budget ($9.8 million in fiscal year 1981) is part of the OECD budget, the IEA Governing Board, composed of delegates from each participating country, controls IEA's budget and overall operations.

An international Secretariat of 126 staff prepares many of the IEA's market analyses and policy option studies. A voluntary group of 47 oil companies (21 from the United States) provides data on the oil market and implements emergency allocation decisions. A smaller advisory group drawn from the industry group, the Industry Advisory Board, advises and consults with the Secretariat and representatives of the Governing Board.

Although industry influence is significant in the IEA, the Governing Board is the final decisionmaker. It meets frequently and makes decisions on a consensus basis.

At Governing Board meetings, only government representatives of participating countries and the Secretariat attend. No transcripts of Governing Board meetings are made. Written conclusions, which are not made available to the public by the IEA, are sent to participating governments. (See pp. 21 and 22.)

Meetings between the IEA and industry are not open to the public. Members of Congress and their designees are permitted to attend, however, and monitors from the Departments of Justice, Energy, and State and the Federal Trade Commission attend for antitrust purposes. Justice and the Federal Trade Commission make semiannual summary reports of industry IEA activities to the Congress. (See pp. 22, 23, and 86 through 89.)

SUPPLY DISRUPTIONS

IEA's complex Emergency Sharing System suffers from data errors, lack of a comprehensive price dispute settlement mechanism for member countries, and a misleading representation of emergency reserves, which raise serious questions about the System's workability. A March 1981 appraisal of the most recent test of the System by the Department of Energy's Economic Regulatory Administration underscored these deficiencies. (See ch. 3.)

Under most supply disruption scenarios involving the IEA Emergency Sharing System, the United States will be obliged to divert oil imports to other IEA countries. In situations similar to the Arab Oil Embargo of 1973–74, when the United States was the boycotted country, the United States would benefit under the System.

Sharing supplies during an emergency is the heart of the IEA system and is considered to be in the broad economic, foreign policy, and national security interests of the United States. Without IEA, the United States would be forced to compete with many of its allies for scarce oil supplies, with potentially harmful effects to relations with them. GAO's assessment of IEA member countries' efforts to cope with future oil supply disruptions indicates that IEA member countries have established an institutional framework and developed broad policy objectives but have yet to greatly reduce their vulnerability. (See pp. 44 and 45.)

OIL MARKET INFORMATION

With the cooperation and assistance of the oil companies, IEA countries have developed information systems on crude oil costs, crude oil import prices, and financial operations of international oil companies. A framework for consultation with oil companies was created which allows representatives of the Governing Board and the Secretariat to discuss energy policy with individual oil companies that would not be covered in a regular reporting system. However, the IEA information system falls far short of being a comprehensive global system capable of describing the market's total operation and structure. (See ch. 4.)

LONG-TERM COOPERATION

IEA countries have agreed to general long-term principles focusing on intensified conservation, reduced import dependence, and expanded research and development, but individual country performance has not always reflected these commitments because of differing national energy policies, programs, and procedures as well as levels of implementation. These problems are further exacerbated by national political differences and general economic policy conflicts which, coupled with environmental concerns in some countries, have produced significant obstacles to long-term cooperation. Nevertheless, the IEA seems to have heightened member countries' awareness of the effects of oil dependence and encouraged them to establish target goals and coordination. (See ch. 5.)

U.S. POLICY TOWARD AND MANAGEMENT OF U.S. PARTICIPATION IN THE IEA

Management of U.S. participation in the IEA, an informal process involving the Executive Office of the President and the Departments of State and Energy, has generally been effective. However, some international energy policy decisions have been inconsistent with U.S. positions in the IEA. This was apparent in the U.S. 1979 decision to temporarily subsidize distillate oil imports for home heating purposes, which contradicted its position as a member of the IEA to reduce oil imports. It was also apparent at the 1979 Tokyo Summit when U.S. participants prepared for the conference without integrating actions already taken or under consideration in the IEA.

The current administration is reviewing U.S. policy toward the IEA. Although the review has not been completed, the Secretary of Energy, as the chief U.S. delegate to the June 1981 IEA ministerial meeting, reaffirmed that the IEA will remain the focus of U.S. international energy policy. He emphasized that it is the central mechanism for protecting industrialized countries from unexpected and unwarranted oil supply disruptions and, in the long-run, for reducing dependence on insecure foreign sources of oil. While reiterating its support for the IEA, he underscored the new administration's commitment to market forces and stock draws as the primary response to international supply crises and emphasized that the formal IEA Emergency Sharing System should be used only as a last resort. He also stressed that in subcrisis situations, the United States supports ad hoc measures that would be defined in the event the market mechanism and stock drawdown did not work. (See ch. 6.)

ANTITRUST ISSUES

U.S. participation in the IEA reflects a dichotomy between the operational role of the Departments of State and Energy and the regulatory role of the Department of Justice and the Federal Trade Commission. Under the Energy Policy and Conservation Act of 1975, as amended, Justice and the Federal Trade Commission are primarily responsible for monitoring the participation of U.S. oil companies in the IEA for antitrust purposes. In recent years, antitrust considerations have increasingly intruded upon energy and foreign policy objectives in U.S. representation in the IEA. Foreign governments and oil companies in particular have reacted negatively to the extension of U.S. antitrust law into a multilateral organization.

Nevertheless, assuming that the United States and other participating countries desire some form of international emergency allocation, the existing antitrust system, accompanied by strict monitoring of oil company activities, appears far preferable to unilateral oil company allocation decisions.

U.S. legislation and the Voluntary Agreement governing U.S. oil company involvement in the IEA provide the United States with the unusual opportunity of observing the oil industry in action during an emergency. This is in marked contrast to the situation in 1973, when industry managed the shortage and reallocated supplies without direct Government involvement.

EFFECTS OF THE CHANGING ROLE OF THE IEA ON THE UNITED STATES

IEA participating governments and companies expressed concern about the failure of member countries to restrain rising oil prices and the failure of the current formula for computing oil allocation rights and obligations to adequately consider the differing economic needs and capabilities of member countries. The 1979 Iranian crisis, which sparked a 160-percent increase in world petroleum prices in the absence of a serious supply shortage of 7 percent or more, revealed the vulnerability of the IEA. Efforts by participating countries to reduce anticipated consumption by 5 percent failed to prevent the crisis.

In the wake of the Iranian crisis, IEA governments have attempted to become more involved in implementing and monitoring joint energy policy. Following the onset of the Iraq-Iran war in September 1980, IEA adopted two new activities that particularly affect price.

The first is a system for consultation between governments and industry on oil stock policies. IEA member countries decided that oil stocks should be used flexibly to meet short-term market disruptions, thereby discouraging purchases on the spot market and reducing upward pressures on price.

The second essentially is an informal sharing system to correct petroleum supply imbalances. It was designed primarily to moderate potential market pressures on prices during the latter part of 1980 and the first quarter of 1981 due to potentially serious supply imbalances resulting from the Iraq-Iran conflict.

Whether the informal sharing system is covered by U.S. legislation implementing the International Energy Program which established the IEA has been questioned.

Legislation implementing U.S. obligations under the Program was based on the assumption that the international oil allocation would not arise until the threshold of a 7-percent shortage in oil consumption was reached.

The informal sharing system substantially changes this obligation: imbalances are not limited to 7-percent or greater oil supply shortfalls before certain actions are taken, and international oil allocation has become an instrument for restraining rapid spot market oil price increases by correcting supply imbalances. The informal sharing system also has the potential for supplanting the use of the selective trigger under the International Energy Program.

Particular concerns about the informal sharing system that Congress should be aware of include its impact on U.S. antitrust issues and other complementary energy legislation. (See ch. 8.)

AGENCY COMMENTS AND GAO'S EVALUATION

Several agencies commented that GAO's report presented a useful and comprehensive overview of IEA's structure, operation, and problems. However, the Departments of State, Energy, and Justice, and the Federal Trade Commission disagreed with several of GAO's conclusions.

Energy and Justice argue that the 1980 test of IEA's Emergency Sharing System clearly demonstrates the workability of the System.

State claims that the United States would have no allocation obligation to give up oil supplies in certain non-embargo situations.

Justice and the Federal Trade Commission disagree with some aspects of GAO's evaluation of the U.S. antitrust clearance procedure.

Justice disagrees with GAO's negative characterization of foreign reaction to U.S. antitrust monitoring in the IEA.

State and Energy disagree with GAO's description of IEA's 1980 decisions concerning sharing of supplies and stock management in the wake of the Iraq-Iran war.

Despite these disagreements, GAO remains convinced that (1) the 1980 test of the Emergency Sharing System challenges the System's viability in an actual emergency, (2) in the majority of supply disruptions, the United States would have to divert oil supplies to other IEA countries, (3) decisions stemming from the interagency antitrust

clearance process should be explained, (4) foreign reaction to U.S. antitrust monitoring of U.S. industry involvement in IEA activities remains negative, and (5) IEA Governing Board decisions in late 1980 responding to the Iraq-Iran war represented for this event the establishment of an informal sharing system and a flexible stock management policy.

Specific agency comments and GAO's evaluation appear in chapters 3, 7, and 8 of the report.

The PRESIDING OFFICER (Mr. D'AMATO). The Senator from Washington is recognized.

Mr. JACKSON. Mr. President, once again I am pleased to speak in favor of legislation to extend the expiration date of certain authorities pertaining to the allocation and information provisions of the international energy program.

As I have said on the floor many times before, I am a supporter of the international energy program. I want to see it continue to operate, and to be made even more effective.

This section has been extended four times before. This will be the fifth. Each time Congress has acted to extend the section it has been on a temporary basis, supposedly for the purpose of providing the executive branch with sufficient time to complete a comprehensive analysis of the program.

I am beginning to believe that we are pulling the wool over our own eyes. It is becoming clear that the administration does not plan any in-depth analysis of our international energy situation. While I must congratulate them for their willingness to fill the strategic petroleum reserve, I must also observe that that seems to be the extent of their international energy policy. Otherwise they are prepared to give blind faith to the free market to protect us from what could be a free world economic disaster.

The Senator from Idaho (Mr. McCLURE) and I have discussed this matter on a number of occasions. He and I introduced S. 1475, a bill to extend the antitrust exemption to June 30, 1985, in order to get the administration's attention on the need to give a serious look at the IEA and specifically the need for new legislation to met our international obligations once the Emergency Petroleum Allocation Act expires at the end of this month. In addition, the Senator from Idaho has introduced legislation, S. 1503, which we are in the process of marking up in the Energy Committee to give us the protection we need in times of a severe petroleum supply shortage.

I state for the record, that I am pleased and impressed with the manner in which the Senator from Idaho has been proceeding on the emergency preparedness legislation. I commend him for his efforts and pledge my full support. And I might add that the committee is proceeding without the benefit of the administration's assistance because they appear blind to the international security implications of a petroleum supply crisis.

The administration's only analysis of the IEA and the issues involved in responding to oil supply interruptions was submitted to the committee on July 23, 1981. That paper, entitled "Domestic and International Energy Emergency Preparedness," explains why the administration has chosen to rely on the free market to allocate and price our most precious commodity, even in times of a supply interruption.

Mr. President, I simply cannot agree with that analysis. In my opinion, it is woefully inadequate. I do not believe that most of the members of the Energy and Natural Resources Committee agree with that analysis. Nor do I believe that most of our allies agree with that analysis.

I am not one of those who believes that Government knows best how to allocate and price all commodities. Nor am I one who believes that we, as public policymakers, should abdicate our responsibilities and turn the protection of our population in times of crisis over to the major corporations in the world. I might point out that none of the witnesses who testified before the committee on this subject agreed with the notion that we should leave ourselves unprotected in time of a crisis. Even the most optimistic assessments I have seen show that the free world will be dependent upon Persian Gulf nations for a majority of our vital crude oil supplies for the foreseeable future.

I hope that the Energy Committee will report an amended version of S. 1503 to the Senate floor in the very near future. Perhaps that will get the administration's attention.

We need to conduct a thorough examination of the mechanisms available to us and to our allies for sharing vital energy supplies in times of a supply interruption. The International Energy Agency's international energy plan is a vital part of emergency plans. Perhaps a thorough review of the Agency would reveal areas in which the IEA and IEP programs could be strengthened. I note that the Senator from Idaho (Mr. McCLURE) has agreed with the request of the Senator from Ohio (Mr. METZENBAUM) that the Energy and Natural Resources Committee hold hearings concerning the efficacy of U.S. participation in the IEA. I look forward to those hearings. I intend to explore the possibility that the U.S. commitment to, and role in, the IEA be strengthened, rather than weakened. In addition, I hope that we will explore mechanisms to make it possible for the IEA to respond to member countries' needs before the 7-percent crude sharing mechanism is triggered.

I must admit that I am not particularly comfortable with the attention that our efforts on the energy emergency legislation have been given to date. That is why I chose this opportunity to comment on the subject.

At a minimum, our Government has a responsibility to the American people to be prepared to protect them in times of crisis. We have no less of a responsibility to our allies to help do what we can to protect all of us from the economic havoc a cutoff of Persian Gulf oil supplies could bring. Even the most ardent free marketeers recognize the legitimate role of Government in times of crisis.

Let us not wait too long to get on with the task.

I yield the floor.

UP AMENDMENT NO. 405

(Purpose: To amend the bill to change the expiration date to April 1, 1982)

Mr. McCLURE. Mr. President, I send an amendment to the desk on behalf of myself and the Senator from Ohio (Mr. METZENBAUM) and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Idaho (Mr. McCLURE), for himself and Mr. METZENBAUM, proposes an unprinted amendment numbered 405.

Mr. McCLURE. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 1, line 5, delete "'June 30, 1985'" and insert in lieu thereof "'April 1, 1982'".

Mr. McCLURE. Mr. President, this is the date change that I discussed in my introductory remarks and to which the Senator from Ohio made reference.

I know of no objection to the amendment. I move its adoption.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (UP No. 405) was agreed to.

Mr. McCLURE. Mr. President, in conclusion, let me indicate to those who may be observing our actions today both here in this country and overseas, that the change in date and the temporary extension should not be taken as any backing away by the United States of its IEA responsibilities, nor do they indicate any predisposition to judge the question of how we will respond to those responsibilities.

We do recognize that the consumption of energy in the United States does have an impact upon the world energy supplies and upon the world economies.

Those foreign observers who may look at this date change should not be under any illusion concerning the determination of the American public, the Congress, and the administration to respond to our responsibilities in whatever way we may determine, but in a very positive and affirmative way.

I know of no further objection.

I think we are ready for final consideration of the bill.

The PRESIDING OFFICER. The bill is open to further amendment. If there be no further amendment to be proposed, the question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading and was read the third time.

The PRESIDING OFFICER. The bill having been read the third time, the question is, Shall it pass?

So the bill (S. 1475), as amended, was passed, as follows:

S. 1475

An act to extend the expiration date of section 252 of the Energy Policy and Conservation Act

*Be it enacted by the Senate and House of Representatives of the United States of*

*America in Congress assembled*, That section 252(j) of the Energy Policy and Conservation Act (42 U.S.C. 6272(j) is amended by striking "September 30, 1981" and inserting in its place "April 1, 1982".

Mr. McCLURE. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. JACKSON. Mr President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

---

## CONSTRUCTION, OPERATION, AND MAINTENANCE OF HYDROELECTRIC POWERPLANTS AT CERTAIN WATER PROJECTS

Mr. MURKOWSKI. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of S. 306, Calendar No. 85.

The PRESIDING OFFICER. The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (S. 306) to authorize the Secretary of the Interior to construct, operate, and maintain hydroelectric powerplants at various existing water projects, and for other purposes.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Alaska?

There being no objection, the Senate proceeded to consider the bill (S. 306) which had been reported from the Committee on Energy and Natural Resources with amendments, as follows:

On page 2, line 9, strike "(g), (h), or (i)" and insert "(e), (f), or (g)".

On page 3, line 2, after "from", insert "Federal";

On page 3, line 11, after "such", insert "Federal";

On page 4, strike line 1, through and including line 4;

On page 4, line 5, strike "(d)", and insert "(c)";

On page 4, strike line 9 through and including line 12:

On page 4, line 13, strike "(f)" and insert "(d)";

On page 4, strike line 17, through and including line 19, and insert the following;

(e) Red Bluff powerplant unit, Central Valley project, California, consisting of four turbine generator units of two thousand five hundred kilowatts each at Red Bluff Diversion Dam.

On page 5, line 1, strike "(h)", and insert "(f)";

On page 5, line 4, strike "(i)", and insert "(g)";

On page 5, strike line 7, through and including line 16, and insert the following:

(h) Palisades powerplant enlargement, Palisades project, Idaho-Wyoming, consisting of one or more turbine generator units so as to increase the powerplant capacity by ninety thousand kilowatts.

(i) Anderson Ranch powerplant unit, Boise project, Idaho, consisting of a turbine and generator unit to increase the powerplant capacity by thirty thousand kilowatts.

(j) Minidoka powerplant rehabilitation and enlargement, Minidoka project, Idaho-Wyoming, consisting of a turbine generator unit of thirty thousand kilowatts in replacement of existing units one through six.

On page 6, line 9, after "The", insert "Federal";

On page 6, line 16, strike "Canyon Ferry powerplant enlargement";

On page 6, line 19, strike "Pick Sloan program power marketing program", and insert "Eastern Division, Pick Sloan Missouri Basin program power marketing program; and";

On page 6, strike line 22, through and including page 7, line 7, and insert the following:

(3) Palisades powerplant enlargement, Anderson Ranch powerplant unit, and Minidoka powerplant rehabilitation and enlargement shall be marketed through the Federal Columbia River Power System.

On page 8, line 4, strike "January 1979", and insert "October 1981";

On page 8, line 12, after "the", insert "Federal";

On page 8, line 13, beginning with "In", strike through and including page 9, line 10, and insert the following:

(b)(1) Friant powerplant unit, $25,390,000.

(2) Whiskeytown powerplant unit, $3,390,000.

(3) Yellowtail Afterbay powerplant, $24,200,000.

(4) Buffalo Bill Dam powerplant replacement, $26,100,000.

(5) Red Bluff powerplant unit, $38,030,000.

(6) Stony Gorge powerplant unit, $4,020,000.

(7) Monticello powerplant unit, $11,830,000.

(8) Palisades powerplant enlargement, $65.300,000.

(9) Anderson Ranch powerplant unit, $13,200,000.

(10) Minidoka powerplant rehabilitation and enlargement, $60,000,000.

On page 10, strike line 3, through and including line 13.

So as to make the bill read:

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled*, That the Secretary of the Interior, acting pursuant to the Federal reclamation laws (Acts of June 17, 1902, 32 Stat. 388 and Acts amendatory thereof and supplemental thereto), is authorized to construct, operate, and maintain hydroelectric powerplants at existing reclamation project facilities at locations and in the approximate capacities set forth in section 4 of this Act: *Provided*, That construction by the Secretary of the Interior of a powerplant designated in subsection (a), (e), (f), or (g) of section 4 of this Act may not proceed prior to October 1, 1983, or if a license has been issued prior to such date to a non-Federal entity pursuant to section 4(e) of the Federal Power Act (16 U.S.C. 797) to construct such powerplant. In carrying out the purposes of this Act, the Secretary of the Interior is authorized to modify the capacity of a powerplant designated in section 4 as determined to be necessary or desirable during postauthorization study and design, and after consultation with the Secretary of Energy.

SEC. 2. The Secretary of Energy is authorized to construct, operate, and maintain transmission facilities as required physically to connect the hydroelectric powerplants authorized in this Act to existing power systems and as he determines necessary to accomplish distribution and marketing of power generated by powerplants constructed pursuant to this Act, and to purchase replacement capacity, energy, or both in order to maintain deliveries to customers during unit outages which result from Federal construction of the powerplants authorized in this Act.

SEC. 3. During Federal construction of powerplants authorized in this Act, the Secretary of the Interior and the Secretary of Energy shall seek to minimize the loss of capacity, energy, or both to power customers due to unit outages which result from such construction. The Secretary of Energy shall seek to maintain deliveries of capacity, energy, or both at contract prices to customers affected by unit outages resulting from such Federal construction.

SEC. 4. (a) Friant powerplant unit, Central Valley project, California, consisting of—

(1) a turbine generator unit of two thousand seven hundred kilowatts on the river outlet from Friant Dam;

(2) a turbine generator unit of five thousand kilowatts on the outlet to the Madera Canal at Friant Dam; and

(3) a turbine generator unit of fifteen thousand kilowatts on the outlet to the Friant-Kern Canal at Friant Dam.

(b) Whiskeytown powerplant unit, Central Valley project, California, consisting of a turbine generator unit of three thousand kilowatts on the outlet works of Whiskeytown Dam.

(c) Yellowtail Afterbay powerplant unit, Pick-Sloan Missouri Basin program, Montana, consisting of a turbine generator unit of ten thousand kilowatts on the outlet works of Yellowtail Afterbay Dam.

(d) Buffalo Bill Dam powerplant replacement, Shoshone project, Wyoming, consisting of a turbine generator unit of twenty thousand kilowatts in replacement of an existing unit of five thousand kilowatts at Buffalo Bill Dam.

(e) Red Bluff powerplant unit, Central Valley project, California, consisting of four turbine generator units of two thousand five hundred kilowatts each at Red Bluff Diversion Dam.

(f) Stony Gorge powerplant unit, Orland project, California, consisting of a turbine generator unit of three thousand kilowatts on the outlet works of Stony Gorge Dam.

(g) Monticello powerplant unit, Solano project, California, consisting of a turbine generator unit of sixteen thousand kilowatts on the outlet works of Monticello Dam.

(h) Palisades powerplant enlargement, Palisades project, Idaho-Wyoming, consisting of one or more turbine generator units so as to increase the powerplant capacity by ninety thousand kilowatts.

(i) Anderson Ranch powerplant unit, Boise project, Idaho, consisting of a turbine and generator unit to increase the powerplant capacity by thirty thousand kilowatts.

(j) Minidoka powerplant rehabilitation and enlargement, Minidoka project, Idaho-Wyoming, consisting of a turbine generator unit of thirty thousand kilowatts in replacement of existing units one through six.

SEC. 5. (a) Hydroelectric power generated by Federal facilities constructed pursuant to this Act shall be delivered to the Secretary of Energy for distribution and marketing through existing Federal hydroelectric power marketing programs in accordance with existing law and policy consistent with the provisions of this Act.

(b) The Federal powerplants authorized in this Act shall be financially integrated with and the power marketed under rate schedules in effect for the several programs as follows:

(1) Friant, Red Bluff, Whiskeytown, Stony Gorge, and Monticello powerplant units shall be marketed through the Central Valley project power marketing program;

(2) Yellowtail Afterbay powerplant unit, and Buffalo Bill Dam powerplant replacement shall be marketed through the Eastern Division, Pick-Sloan Missouri Basin program power marketing program; and

(3) Palisades powerplant enlargement, Anderson Ranch powerplant unit, and Minidoka powerplant rehabilitation and enlargement shall be marketed through the Federal Columbia River Power System.

SEC. 6. Powerplants authorized in this Act shall be designed, constructed, and operated in such a manner as to be compatible with valid existing water rights or water delivery to the holder of any valid water service contract.

SEC. 7. The interest rate used for computing interest during construction and interest on the unpaid balance of the reimbursable cost of a powerplant authorized in this Act shall be determined by the Secretary of the Treasury, as of the beginning of the fiscal year in which construction of such powerplant commenced, on the basis of the computed average interest rate payable by the Treasury upon its outstanding marketable public obligations which are neither due nor callable for fifteen years from the date of issue.

SEC. 8. (a) There are hereby authorized to be appropriated beginning October 1, 1981, to the Secretary of the Interior for construction of the powerplants authorized in this Act the amounts set forth in subsection (b), on the basis of October 1981 price levels, plus or minus such amounts as may be justified by reason of ordinary fluctuations of construcion cost indexes applicable to the type of construction involved herein. There are also authorized to be appropriated to the Secretary of the Interior such additional sums as may be required for the cost of replacement capacity, energy, or both purchased under section 2, and for the operation and maintenance of the Federal powerplants authorized by this Act.

(b) (1) Friant powerplant unit, $25,390,000.

(2) Whiskeytown powerplant unit, $3,390,000.

(3) Yellowtail Afterbay powerplant, $24,200,000.

(4) Buffalo Bill Dam powerplant replacement, $26,100,000.

(5) Red Bluff powerplant unit, $38,030,000.

(6) Stoney Gorge powerplant unit, $4,020,000.

(7) Monticello powerplant unit, $11,830,000.

(8) Palisades powerplant enlargement, $65,300,000.

(9) Anderson Ranch powerplant unit, $13,200,000.

(10) Minidoka powerplant rehabilitation and enlargement, $60,000,000.

(c) There are also authorized to be appropriated beginning October 1, 1981, such sums as may be required by the Secretary of Energy to accomplish the purposes of section 2 of this Act.

Mr. MURKOWSKI. Mr. President, I ask unanimous consent that further reading of the committee amendments be dispensed with and that they be considered and agreed to en bloc and that the bill as thus amended be treated as original text.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. JACKSON. Mr. President, I rise in strong support of the passage of S. 306. Those of us from the Pacific Northwest know the value of hydroelectric power. Hydro development, particularly in these times of energy uncertainty, will provide a lasting legacy for the future. Recently I was privileged to be present at the dedication ceremony of the Russell D. Smith Hydroelectric Powerplant on the Columbia Basin project in Washington State. The plant was developed as a cooperative venture by the three irrigation districts on the project and has a capacity in excess of 6 megawatts. The districts have plans to develop an additional 100 megawatts of new hydropower on the project.

S. 306 allows time for local interests to develop some of the sites authorized in the bill. This is a good provision. As all of us recognize, there have been problems with Federal development because of the time it takes from the initial project proposal to when the power actually comes on line. In the case of the Russell D. Smith Powerplant, the elapsed time from the first application to the Federal Energy Regulatory Commission to dedication was just a little over 2 years, a remarkable effort. In those instances such as in the Columbia Basin project where non-Federal development can be undertaken with the assurance that Federal project and water user interests are protected, I would certainly hope that others will follow the lead set in the Columbia Basin.

As for the projects which are exclusively authorized for Federal development in S. 306, I would urge that the Congress act as expeditiously as possible to assure adequate funding. One of our best expenditures of Federal dollars in the energy area at this time is for the development of our hydropower resources. This has certainly been true for the Federal Columbia River power system.

I compliment the chairman of the Subcommittee on Water and Power, Mr. MURKOWSKI, and the chairman of the committee, Mr. MCCLURE, for their efforts on this important legislation.

Mr. MATSUNAGA. Mr. President, will the Senator from Washington yield?

Mr. JACKSON. Yes.

Mr. MATSUNAGA. I fully subscribe to the statement made by the Senator from Washington. I ask unanimous consent that I may be added as a cosponsor of the measure.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MCCLURE. Mr. President, I am very pleased that the Senate is able to consider S. 306. As many of my colleagues will recall, similar legislation which I had cosponsored passed the Senate in the 96th Congress, but too late for the House to consider prior to adjournment.

Although the projects authorized in S. 306 are all physically located in the Western United States, in reality S. 306 is a national bill. As noted in the committee report, the hydroelectric projects will have the potential of generating the equivalent in energy of over 1 million barrels of oil each year. This energy will not be subject to rising fuel costs or foreign embargoes. It is domestic energy dependent upon domestic resources and is subject to the control of no foreign power. To the extent that these projects will reduce our dependence upon oil—all citizens of the United States will benefit.

Mr. President, the Congress has a major responsibility for the fiscal well-being of our Nation and the wise expenditure of funds by the Federal Government. Funding of these projects will not constitute a loss to the Treasury. On the contrary, the Government and the taxpayer will be repaid, with interest, by the ratepayer.

At today's costs, the projects in S. 306 are a bargain to the consumer. By utilizing existing dams we can minimize the cost of new energy. I am hopeful that as the Committee on Energy and Natural Resources examines further the potential for more hydroelectric power development additional opportunities will be found. Already, as a result of legislation which was approved by the Congress last year, the Department of the Interior's Bureau of Reclamation has the authority to undertake detailed feasibility investigations of an additional 800 megawatts of potential hydropower capacity. I am hopeful that the results of these studies will be forwarded as rapidly as possible to the Congress.

Mr. President, I wish to thank my colleagues on the committee and particularly the distinguished chairman of the Subcommittee on Water and Power (Mr. MURKOWSKI) for his efforts in assuring the timely consideration of this measure by the full Senate.

Mr. President, I want to conclude by echoing the remarks made by the Senator from Washington in complimenting the Senator from Alaska who is the chairman of the Subcommittee on Water and Power.

Mr. MURKOWSKI has done a remarkably fine job in managing that subcommittee in all of its deliberations, and I want to underscore his participation in the floor management and in the passage of this legslation.

I thank the Chair.

The PRESIDING OFFICER. The Senator from Washington.

UP AMENDMENT NO. 406

(Purpose: To authorize federal construction of hydroelectric power facilities at Whiskeytown Dam, but not before October 1)

Mr. JACKSON. Mr. President, I send to the desk an amendment for the senior Senator from California (Mr. CRANSTON).

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Washington (Mr. JACKSON) on behalf of Mr. CRANSTON proposes an unprinted amendment numbered 406.

Mr. JACKSON. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is a follows:

On page 2, line 9, after "(a)," insert "(b),"

Mr. JACKSON. Mr. President, I have a statement by Senator CRANSTON which I ask unanimous consent to have printed in the RECORD.

● Mr. CRANSTON. Mr. President, this amendment would authorize the Department of the Interior to construct hydroelectric power facilities at the Whiskeytown Dam in California, but not before October 1, 1983, or if a license has been issued prior to that date to a non-Federal entity. The purpose of the amendment is to permit the city of Redding, Calif., to pursue its plans to install power facilities at Whiskeytown Dam itself. The city of Redding received a preliminary permit from the Federal Energy Regulatory Commission in October 1980 and is now in the process of applying for a license. The city has already invested considerable time and taxpayers' money in pursuing the project.

S. 306 as reported from the Senate Energy and Natural Resources Committee provides conditional Federal authorization of hydroelectric facilities at various other Federal sites where a non-Federal

entity has already obtained a preliminary permit from FERC. I believe that the same consideration should be given to the city of Redding in connection with the Whiskeytown Dam project.

I would like to note that in the situation where a non-Federal entity is licensed to construct a hydroelectric generation facility at an existing Federal dam owned by the Department of the Interior, it would be necessary for that entity to enter into a contract or agreement with the Department with regard to the operation of the powerplant. One of the primary purposes of such contracts and agreements is to establish an understanding that the operation of the plant would be consistent with and not jeopardize the interests of the existing water users and other authorized uses and purposes. It is my understanding that the contract or agreement would be specific with respect to when the powerplant would be operated and under what conditions operations would need to be reduced or suspended. Of course, the licensing process of the Federal Energy Regulatory Commission would involve extensive review by the Department of the Interior and ample opportunity would be provided to address any potential operational problems which may surface.

In addition, I understand that S. 306 does not exempt these projects from compliance with NEPA, the Fish and Wildlife Coordination Act, or other existing environmental review procedures. There will be opportunity to avoid or mitigate potential fishery problems through early consultation under the Fish and Wildlife Coordination Act between the Bureau of Reclamation and State and Federal fish and wildlife agencies in the case of Federal development, or through the FERC licensing procedures in the case of private development. These procedures will give resource agencies adequate time to recommend incorporation into project construction plans of fish screens, release control structures, fish flows, and other appropriate conservation measures so that a balance can be maintained between important power and fishery needs.

Since this is the case, I understand that my amendment regarding the Whiskeytown Dam is acceptable to the managers of the bill. I ask that it be adopted.●

Mr. MURKOWSKI. The Senator from California's proposed amendment was a matter of discussion before the Committee on Energy and Natural Resources during the May 7 business session and was given recognition in the committee report. I ask unanimous consent that the appropriate portion of the committee report addressing the amendment be printed in the RECORD.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

FURTHER DISCUSSION

During Committee discussion of S. 306, it was noted that Senator Cranston had urged that the bill be amended so as to provide a "conditional authorization" for the Whiskeytown powerplant unit as is presently provided in the bill for the Friant, Red Bluff, Stone Gorge and Monticello proposals. The Committee recognizes the validity of Senator Cranston's proposal but is reluctant to provide such an opportunity for non-Federal development in the absence of information regarding the compatibility of non-Federal development with existing project operation and obligations. It is noted that although the Administration in its testimony identified the Whiskeytown powerplant unit as the subject of interest by non-federal entity for the development—no recommendation was made to provide the project with a conditional authorization. The Committee decided to order S. 306 reported with the Whiskeytown authorization as is, but with the understanding that Senator Cranston's concern may be addressed on the floor of the Senate if information indicates that non-Federal development would be compatible with existing project operations and obligations.

Mr. JACKSON. I understand there is no objection to the amendment. It has been cleared all the way down.

The PRESIDING OFFICER. The question is on the agreeing to the amendment of the Senator from California.

The amendment (UP No. 406) was agreed to.

UP AMENDMENT NO. 407

(Purpose: To authorize federal construction of hydroelectric power facilities at Boca Dam and at Prosser Dam in California and Nevada)

Mr. JACKSON. Mr. President, again in behalf of Senator CRANSTON I have an amendment which I send to the desk.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Washington (Mr. JACKSON) for Mr. CRANSTON proposes an unprinted amendment numbered 407.

Mr. JACKSON. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 6, following line 2, insert the following new paragraph:

(k) Boca powerplant unit, Truckee storage project, California-Nevada, consisting of a turbine generator unit of nine hundred kilowatts on the outlet works of Boca Dam.

(l) Prosser powerplant unit, Washoe project, California-Nevada, consisting of a turbine generator unit of one thousand kilowatts on the outlet works of Prosser Dam.

On page 7, following line 11, insert the following new paragraph:

(4) Boca powerplant unit and Prosser powerplant unit shall be marketed under arrangements to be made by the Secretary of Energy in accordance with authority set forth in section 5(a) of this Act.

On page 9, following line 22, insert the following new paragraphs:

(11) Boca powerplant unit, $840,000.

(12) Prosser powerplant unit, $1,240,000.

Mr. JACKSON. Mr. President, I have a statement of Senator CRANSTON with respect to this amendment, and I ask unanimous consent to have it printed in the RECORD.

● Mr. CRANSTON. Mr. President, this amendment would authorize the Department of the Interior to construct hydroelectric power facilities at the Boca Dam, a part of the Truckee storage project in the States of California and Nevada, and at the Prosser Dam, a part of the Washoe project also in California and Nevada. Together the two projects would provide 1,900 kilowatts of power and cost $840,000 and $1,240,000 respectively.

As originally introduced, S. 306 provided for the authorization of Federal construction of powerplants at the Boca Dam and Prosser Dam sites. However, the Senate Energy and Natural Resources Committee deleted these two projects from the bill in response to administration testimony that non-Federal entities were interested in developing the resources and that such development would not adversely affect existing project operations or obligations.

Since that time, I have been informed by the non-Federal entity involved—the Truckee-Donner Public Utility District—that it does not intend to proceed with construction of the hydroelectric power facilities in spite of the fact that the district has received a preliminary permit from the Federal Energy Regulatory Commission.

The Department of the Interior is developing power at Stampede Dam which is located within a radius of 4 miles of Boca and Prosser. The Truckee-Donner PUD believes the same entity should develop all three sites since single entity development would serve to reduce operation and maintenance costs.

Mr. President, I understand that there is no objection in restoring the provisions on Boca and Prosser Dams to S. 306, and I ask that the amendment be adopted.●

Mr. MURKOWSKI. I thank the Senator from Washington and the Senator from California, and I am persuaded that the questions raised by the committee have been fully addressed.

Mr. JACKSON. Mr. President, I understand there is no objection to the amendment. It has been cleared all the way around, and I suggest we go to a vote.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from California.

The amendment (UP No. 407) was agreed to.

● Mr. HATFIELD. Mr. President, as my colleagues will recall, during the 96th Congress, the Senate considered and approved a measure similar to S. 306. Unfortunately, the House was not able to consider the measure prior to adjournment and valuable time was lost in moving forward with these important energy projects. In order that we may move forward in a timely fashion to develop these sources of clean energy, I urge my colleagues to endorse S. 306 this afternoon.

Mr. President, I would like to point out that funding for these projects has already been anticipated in our projected spending targets: That construction and operation of these 12 projects would add over 236 megawatts of generating capacity while not requiring the construction of any new dams or reregulating structures.

Hydroelectricity is truly our only renewable energy resource and is one of the few energy sources which can have an immediate impact on enhancing our domestic energy supply situation. I urge immediate passage of this legislation.●

Mr. MURKOWSKI. Mr. President, as chairman of the Subcommittee on Water and Power of the Committee on Energy and Natural Resources it was my privilege to chair the hearing to take testimony on S. 306, which would authorize the Secretary of the Interior to construct hydroelectric power developments at existing projects of the Bureau of Reclamation.

This is a good bill and the projects which will be authorized in S. 306 are the most economical renewable energy resources that can be developed at this time. I am hopeful that additional opportunities for this kind of development will be called to the attention of the subcommittee as the 97th Congress progresses.

During the May 7 markup on S. 306, the full committee recommended the amendment of the bill to include authorization of three additional projects which had not been included in the original bill. All of these projects are located in Idaho, and, as in the rest of the bill, the proposals involve only existing Bureau of Reclamation projects.

The three projects, Palisades, Anderson Ranch, and Minidoka, have already been the subject of extensive study by the Bureau of Reclamation and I am convinced that it is appropriate that they be added to this bill.

I should point out that all three projects have good benefit-to-cost ratios and that related benefits will accrue to the entire area served by the Federal Columbia River power system.

Mr. President, I could not help but think during the hearing on S. 306 of my own State of Alaska where the opportunity for additional hydroelectric development is greater than any other single State.

Well over 32,000 megawatts of hydroelectric capacity at 64 different sites in Alaska have already been identified and I am confident that additional sites exist.

The role that hydroelectric resources have played in the development of the conterminous United States has been important and will continue to be a strong one, but the role that such development could play in Alaska could be even more significant.

Mr. President, as subcommittee chairman, I lend my strong support to passage of S. 306 and urge its adoption by the Senate, but I must admit I am looking forward to the time when my own State of Alaska will be able to move ahead on the timely development of needed hydroelectric plants.

Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 97–61), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

BACKGROUND

In 1977, the Department of the Interior's Bureau of Reclamation (now the Water and Power Resources Service) published a report entitled "Western Energy Expansion Study." The report, as part of the WPRS general investigations program examined the potential for the development of hydroelectric power, including pumped storage, at both new sites and existing WPRS facilities in the seventeen Western States. A total of 127 proposals for development of hydroelectric resources were examined of which 61 proposals were recommended for further study at that time

Because of the renewed interest in the development of hydroelectric resources due to the rising costs of fossil and nuclear electric generation, the late Senator Lee Metcalf introduced on October 10, 1977, legislation to authorize the Secretary of the Interior to construct additional generating units at eight of the sites which had been examined in the Western Energy Expansion Study. Similar legislation had also been introduced in the House of Representatives but the 95th Congress adjourned prior to final action on either bill.

With the 96th Congress, similar legislation (S. 1420) was introduced but with the benefit of additional studies undertaken by the Water and Power Resources Service the measure authorized construction of powerplants at thirteen existing water resource development projects. An amended version of S. 1420 was passed by the Senate on December 5, 1980 but was not considered by the House prior to adjournment of the 96th Congress. In the 97th Congress, S. 306, identical to the version of S. 1420 which had passed the Senate was introduced on January 29, 1981.

As ordered reported by the Senate Committee on Energy and Natural Resources, S. 306 authorizes the addition of hydroelectric generating capacity at ten sites with an installed additional capacity in excess of 234 megawatts and an annual generation of approximately 662 million kilowatt-hours; or the equivalent in energy of over one and a half million barrels of oil.

For comparative purposes, a brief summary of the project statistics of S. 306 as introduced and as ordered reported by the Committee follows:

S. 306: SUMMARY—AS INTRODUCED

| Project | Capacity (megawatts) | Cost (millions) | Generation (million kilowatt-hours) |
|---|---|---|---|
| Friant, Calif.[1] | 22.7 | $19.15 | 101 |
| Whiskeytown, Calif. | 3.0 | 2.57 | 11 |
| Canyon Ferry, Mont. | 90.0 | 87.6 | 55 |
| Yellowtail, Mont. | 10.0 | 19.5 | 62 |
| Hoover Dam, Ariz./Nev. | 500.0 | 279 | 0 |
| Buffalo Bill, Wyo. | 20.0 | 20.3 | 60 |
| Red Bluff, Calif.[1] | 15.0 | 21 | 53 |
| Stoney Gorge, Calif.[1] | 3.0 | 1.92 | 11 |
| Monticello, Calif.[1] | 16.0 | 8.77 | 43 |
| Boca, Calif. | 2.0 | .93 | 3 |
| Prosser, Calif./Nev. | 1.0 | 1.24 | 3 |
| Blue Mesa, Colo. | 55.0 | 36.3 | 0 |
| Total | 737.7 | 498.28 | 402 |

S. 306: SUMMARY—AS ORDERED REPORTED

| | | | |
|---|---|---|---|
| Friant, Calif.[1] | 22.7 | $25.39 | 101 |
| Whiskeytown, Calif. | 3.0 | 3.39 | 11 |
| Yellowtail, Mont. | 10.0 | 24.2 | 62 |
| Buffalo Bill, Wyo. | 20.0 | 26.1 | 60 |
| Red Bluff, Calif.[1] | 10.0 | 38.03 | 53 |
| Stony Gorge, Calif.[1] | 3.0 | 4.02 | 11 |
| Monticello, Calif.[1] | 16.0 | 11.83 | 43 |
| Palisades, Idaho | 90.0 | 65.3 | 158 |
| Anderson Ranch, Idaho | 30.0 | 13.2 | 19 |
| Minidoka, Idaho | 30.0 | 60 | 144 |
| Total | 234.7 | 307.64 | 662 |

[1] Conditional authorization.

● Mr. SPECTER. Mr. President, while the committee report on S. 306 states that under current law, capital and operating costs of hydroelectric powerplants and reclamation sites are reimbursable to the Federal Government over the operating life of the facility, usually 35 years, I should like to note that section 7 of S. 306 provides that the interest rate for computing interest both during construction and on the unpaid balance of the reimbursable costs shall be determined on the basis of the computed average interest rate payable to the Treasury on the obligation.

This is, in fact, a hidden, off-budget subsidy to a section of the country where energy costs, according to a recent study by the Northeast-Midwest Institute, are substantially below the costs of the Northeast and Midwest.

Our low-head hydro possibilities, as disclosed by a recent Corps of Engineers analysis, provides an opportunity for more equitable treatment to Pennsylvania and other States of the Northeast.

I shall, therefore, soon be calling on the Congress to redress these present fiscal inequities.●

● Mr. WALLOP. Mr. President, I am here to lend my support to S. 306 because I believe that every decision we make regarding our country's abundant, yet precious, resources today, will shape the very livelihoods of future generations of Americans tomorrow.

Energy exploration and development, specifically harnessing our available resources and probing for new ones will top the list on the domestic agenda for the rest of this century. S. 306 will help America make maximum use out of one of our resources—water—and its tremendous existing potential for generating electric power. This bill seeks to upgrade and retrofit existing plants, rather than building new ones which is a very sound approach considering our current budget-trimming atmosphere.

One project mentioned in the proposal, for example, is the Shoshone powerplant in my State of Wyoming. In upgrading this particular plant, the existing and somewhat obsolete 5 megawatt powerplant will be increased to 20 megawatts, will be more efficient and yet remain a clean method of generating a greater amount of electrical power for the people of Wyoming.

I am pleased with one particular aspect of S. 306—its environmental soundness. Rather than attempting to clear new sites for new plants, this legislation strives to upgrade our existing facilities which will maintain and protect the environment of each State while harnessing a greater amount of an available source of energy in the process.

I commend Senator MURKOWSKI and the Senate Energy Committee staff for the good work done in bringing this bill to the floor.●

Mr. JACKSON. I believe there are no further amendments, and I believe we can go to third reading.

The PRESIDING OFFICER. If there are no further amendments, the question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading and to be read a third time. The bill was read the third time.

The PRESIDING OFFICER. The question is, Shall the bill pass? (Putting the question.)

The bill (S. 306), as amended, was passed as follows:

S. 306

An act to authorize the Secretary of the Interior to construct, operate, and maintain hydroelectric powerplants at various existing water projects, and for other purposes.

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That the Secretary of the Interior, acting pursuant to the Federal reclamation laws (Acts of June 17, 1902, 32 Stat. 388 and Acts amendatory thereof and supplemental thereto), is authorized to construct, operate, and maintain hydroelectric powerplants at existing reclamation project facilities at locations and in the approximate capacities set forth in section 4 of this Act: *Provided,* That construction by the Secretary of the Interior of a powerplant designated in subsection (a), (b), (e), (f), or (g) of section 4 of this Act may not proceed prior to October 1, 1983, or if a license has been issued prior to such date to a non-Federal entity pursuant to section 4(e) of the Federal Power Act (16 U.S.C. 797) to construct such powerplant. In carrying out the purposes of this Act, the Secretary of the Interior is authorized to modify the capacity of a powerplant designated in section 4 as determined to be necessary or desirable during postauthorization study and design, and after consultation with the Secretary of Energy.

SEC. 2. The Secretary of Energy is authorized to construct, operate, and maintain transmission facilities as required physically to connect the hydroelectric powerplants authorized in this Act to existing power systems and as he determines neecssary to accomplish distribution and marketing of power generated by powerplants constructed pursuant to this Act, and to purchase replacement capacity, energy, or both in order to maintain deliveries to customers during unit outages which result from Federal construction of the powerplants authorized in this Act.

SEC. 3. During Federal construction of powerplants authorized in this Act, the Secretary of the Interior and the Secretary of Energy shall seek to minimize the loss of capacity, energy, or both to power customers due to unit outages which result from such construction. The Secretary of Energy shall seek to maintain deliveries of capacity, energy, or both at contract prices to customers affected by unit outages resulting from such Federal construction.

SEC. 4. (a) Friant powerplant unit, Central Valley project, California, consisting of—

(1) a turbine generator unit of two thousand seven hundred kilowatts on the river outlet from Friant Dam;

(2) a turbine generator unit of five thousand kilowatts on the outlet to the Madera Canal at Friant Dam; and

(3) a turbine generator unit of fifteen thousand kilowatts on the outlet to the Friant-Kern Canal at Friant Dam.

(b) Whiskeytown powerplant unit, Central Valley project, California, consisting of a turbine generator unit of three thousand kilowatts on the outlet works of Whiskeytown Dam.

(c) Yellowtail Afterbay powerplant unit, Pick-Sloan Missouri Basin program, Montana, consisting of a turbine generator unit of ten thousand kilowatts on the outlet works of Yellowtail Afterbay Dam.

(d) Buffalo Bill Dam powerplant replacement, Shoshone project, Wyoming, consisting of a turbine generator unit of twenty thousand kilowatts in replacement of an existing unit of five thousand kilowatts at Buffalo Bill Dam.

(e) Red Bluff powerplant unit, Central Valley project, California, consisting of four turbine generator units of two thousand five hundred kilowatts each at Red Bluff Diversion Dam.

(f) Stony Gorge powerplant unit, Orland project, California, consisting of a turbine generator unit of three thousand kilowatts on the outlet works of Stony Gorge Dam.

(g) Monticello powerplant unit, Solano project, California, consisting of a turbine generator unit of sixteen thousand kilowatts on the outlet works of Monticello Dam.

(h) Palisades powerplant enlargement, Palisades project, Idaho-Wyoming, consisting of one or more turbine generator units so as to increase the powerplant capacity by ninety thousand kilowatts.

(i) Anderson Ranch powerplant unit, Boise project, Idaho, consisting of a turbine and generator unit to increase the powerplant capacity by thirty thousand kilowatts.

(j) Minidoka powerplant rehabilitation and enlargement, Minidoka project, Idaho-Wyoming, consisting of a turbine generator unit of thirty thousand kilowatts in replacement of existing units one through six.

(k) Boca powerplant unit, Truckee storage project, California-Nevada, consisting of a turbine generator unit of nine hundred kilowatts on the outlet works of Boca Dam.

(l) Prosser powerplant unit, Washoe project, California-Nevada, consisting of a turbine generator unit of one thousand kilowatts on the outlet works of Prosser Dam.

SEC. 5. (a) Hydroelectric power generated by Federal facilities constructed pursuant to this Act shall be delivered to the Secretary of Energy for distribution and marketing through existing Federal hydroelectric power marketing programs in accordance with existing law and policy consistent with the provisions of this Act.

(b) The Federal powerplants authorized in this Act shall be financially integrated with the power marketed under rate schedules in effect for the several programs as follows:

(1) Friant, Red Bluff, Whiskeytown, Stony Gorge, and Monticello powerplant units shall be marketed through the Central Valley project power marketing program;

(2) Yellowtail Afterbay powerplant unit, and Buffalo Bill Dam powerplant replacement shall be marketed through the Eastern Division, Pick-Sloan Missouri Basin program power marketing program;

(3) Palisades powerplant enlargement, Anderson Ranch powerplant unit, and Minidoka powerplant rehabilitation and enlargement shall be marketed through the Federal Columbia River Power System; and

(4) Boca powerplant unit and Prosser powerplant unit shall be marketed under arrangements to be made by the Secretary of Energy in accordance with authority set forth in section 5(a) of this Act.

SEC. 6. Powerplants authorized in this Act shall be designed, constructed, and operated in such a manner as to be compatible with valid existing water rights or water delivery to the holder of any valid water service contract.

SEC. 7. The interest rate used for computing interest during construction and interest on the unpaid balance of the reimbursable cost of a powerplant authorized in this Act shall be determined by the Secretary of the Treasury, as of the beginning of the fiscal year in which construction of such powerplant commenced, on the basis of the computed average interest rate payable by the Treasury upon its outstanding marketable public obligations which are neither due nor callable for fifteen years from the date of issue.

SEC. 8 (a) There are hereby authorized to be appropriated beginning October 1, 1981, to the Secretary of the Interior for construction of the powerplants authorized in this Act the amounts set forth in subsection (b), on the basis of October 1981 price levels, plus or minus such amounts as may be justified by reason of ordinary fluctuations of construction cost indexes applicable to the type of construction involved herein. There are also authorized to be appropriated to the Secretary of the Interior such additional sums as may be required for the cost of replacement capacity, energy, or both purchased under section 2, and for the operation and maintenance of the Federal powerplants authorized by this Act.

(b) (1) Friant powerplant unit, $25,390,000.

(2) Whiskeytown powerplant unit, $3,390,000.

(3) Yellowtail Afterbay powerplant, $24,200,000.

(4) Buffalo Bill Dam powerplant replacement, $26,100,000.

(5) Red Bluff powerplant unit, $38,030,000.

(6) Stoney Gorge powerplant unit, $4,020,000.

(7) Monticello powerplant unit, $11,830,000.

(8) Palisades powerplant enlargement, $65,300,000.

(9) Anderson Ranch powerplant unit, $13,200,000.

(10) Minidoka powerplant rehabilitation and enlargement, $60,000,000.

(11) Boca powerplant unit, $840,000.

(12) Prosser powerplant unit, $1,240,000.

(c) There are also authorized to be appropriated beginning October 1, 1981, such sums as may be required by the Secretary of Energy to accomplish the purposes of section 2 of this Act.

Mr. JACKSON. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. McCLURE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. MURKOWSKI. Mr. President, I ask unanimous consent that the Secretary of the Senate be authorized in the engrossment of S. 306 to make any necessary technical and clerical corrections.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MURKOWSKI. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

(Mr. GORTON assumed the chair.)

Mr. STEVENS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STEVENS. Mr. President, what is the pending business?

The PRESIDING OFFICER. There is no pending business.

## EXTENSION OF DEFENSE PRODUCTION ACT OF 1950

Mr. STEVENS. Mr. President, I ask that the Chair lay before the Senate S. 1135, Calendar Order No. 117.

The PRESIDING OFFICER. The clerk will state the bill by title.

The legislative clerk read as follows:

A bill (S. 1135) to extend by 5 years the expiration date of the Defense Production Act of 1950.

The Senate proceeded to consider the bill (S. 1135) which had been reported from the Committee on Banking, Housing, and Urban Affairs with an amendment as follows:

On page 2, line 2, strike "1986", and insert "1982":

So as to make the bill read:

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That the first sentence of section 717(a) of the Defense Production Act of 1950 (50 U.S.C. App. 2166(a)) is amended by striking out "September 30, 1981" and inserting in lieu thereof "September 30, 1982".

## RECESS UNTIL 4 P.M.

Mr. STEVENS. Mr. President, the managers of the bill will not be available until 4 o'clock. I ask unanimous consent that the Senate stand in recess until 4 p.m.

There being no objection, the Senate, at 3:07 p.m., recessed until 4 p.m.; whereupon, the Senate reassembled when called to order by the Presiding Officer (Mr. EAST).

## EXTENSION OF DEFENSE PRODUCTION ACT OF 1950

The PRESIDING OFFICER. The clerk will state the pending business.

The assistant legislative clerk read as follows:

A bill (S. 1135) to extend by 5 years the expiration date of the Defense Production Act of 1950.

The Senate continued with the consideration of the bill.

Mr. BAKER. Mr. President, the managers of this bill will be available shortly.

Mr. President, for the moment, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

## ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, I believe that the managers of the Defense Production Act are not ready yet to proceed with the consideration of that matter. I ask unanimous consent that there now be a brief period for the transaction of routine morning business to extend not longer than 10 minutes in which Senators may speak, with the other proviso that at the close of morning business, according to the order just entered, the Senate resume consideration of the Defense Production Act.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. PRESSLER addressed the Chair.

The PRESIDING OFFICER. The Senator from South Dakota.

## OPPOSITION TO COMPENSATION FOR IRANIAN HOSTAGES

Mr. PRESSLER. Mr. President, I rise to say that I sent a letter to the President in opposition to paying those citizens who were hostages in Iran financial compensation in addition to their hardship pay and regular pay. This was a difficult decision, but I do it for a number of reasons.

As a Vietnam veteran—and I believe as the only current U.S. Senator to have actually served in ground operations in Vietnam—I can attest that this payment is blatantly unfair to Vietnam veterans. We cannot find enough money to fund properly the agent orange legislation—and Vietnam veterans benefits are at about 35 percent on a parity basis with World War II veterans. Take the case of a young person drafted into combat in Vietnam. He served for 13 months against his will with no escape. He came home to scorn and derision. He received no such compensation. Why should we not vote him some special compensation? The principle is the same.

Furthermore, it is my conviction that those people who choose to enter a profession—be it military or the Foreign Service or a similar occupation—do so at certain risks, and we establish a bad precedent by paying compensation of so much per day. I think it is proposed to be about $5,500 per hostage in this case. I know it sounds, that one is not taking a grateful position to the hostages. Indeed, I am very grateful for what they did. They have been recognized—and they deserve it. For example, according to the September 22, 1981, New York Times:

State Department and Pentagon officials say that efforts have been to accommodate requests for special assignments at home or abroad. Many requests have been for assignments to posts in Western Europe.

Mementos and gifts for the former hostages still pour into the liaison group's Washington headquarters. While the flow is slackening, there appears to be little slackening in requests for speeches by former hostages.

If we trace back even in recent history there have been many hostages who have not been paid compensation. Foreign Service officers have the benefit of travel, excellent jobs—and people are lined up to join. There are some risks, too.

I believe in paying the salary, I believe in paying the combat pay, I believe in paying the hardship duty post pay, but I do not believe in paying extra compensation if something goes wrong. We are establishing a bad precedent here that somehow violates principle. There are people waiting in line to get into the Foreign Service—if you are in the Foreign Service of your country, indeed, there are many attractions to serving abroad, the privilege of being a Foreign Service officer, the privilege of representing our Government abroad, the travel benefits, the educational benefits. We have people waiting in line for these jobs—we should not have a precedent to pay people cash if something that can be reasonably expected to occasionally happen does occur.

Also, there has now been a demand from some of the hostages for additional compensation. I am shocked at this concept of public service.

But my main objection is the basic principle that we compensate people in dollar amounts for being hostages. I think it is a very bad precedent.

Let me repeat that I think our Vietnam veterans—not the ones who were prisoners of war, but the veterans—should be offended by this, should take offense, and the reason being that we have been unable to come up with appropriations that amount to very much for such things as agent orange. It is true we did classify agent orange as a disease for consideration, but we did not add any additional appropriations. The parity for Vietnam veterans, in terms of the veterans' benefits compared to World War II veterans, is below 40 percent.

I am not saying that Vietnam veterans necessarily deserve anything for having served their country. Many of us do not want any special consideration. We merely want the opportunities that usually go with being a veteran, and I say that as a Vietnam veteran.

But this matter is bothersome to me, the payment of additional compensation, in addition to salaries, in addition to time off, and in addition to rehabilitation. We are taking care of these hostages on many fronts, and we have already given them extraordinary recognition.

There have been so many precedents in American history where hostages have been held and we have not paid compensation. We have followed the basic principle of saying to someone that:

You serve your country abroad and we will pay you this salary. This is the deal. You go. There are certain risks involved. You are not being drafted. You may resign anytime. There may be hardships. You may be captured. It is public service.

This is in sharp conflict with what was said to most Vietnam veterans who actually served—

You are drafted, you must go, you cannot resign, you will fight for your life in a disease-infested environment, and you will be scorned at home.

Who should be compensated?

So, the point is, to the Vietnam veteran, this appears very unfair. As a Vietnam veteran myself, I tend to agree.

Yes, I think Vietnam veterans should and will take it as an insult, because it is giving more monetary recognition to a group of people who served this country well, granted I am not saying anybody did not. I am not critical in any way of the hostages. I do not even know if most of them wanted this much money. But I have talked to Vietnam veterans who are very upset about this, it is another indication at a time when Congress is in a budgetary deficit, at a time when Congress cannot appropriate more money for the veterans and GI bills, similar to what was after World War II, they find this "passing strange" to put it mildly.

Finally, I think it is a bad precedent in principle. You serve your country, you get a certain level of pay, in this instance they were also getting hardship pay. There are certain risks and benefits in the Foreign Service and serving abroad. When you join the military you take certain risks but you also get certain benefits. And one of the great benefits is one of public service. These people got their pay, their promotions, they also got many other recognitions, many more than the

Vietnam veterans did. To pay each of them $5,500 more is a great mistake. I shall oppose it.

## UNANIMOUS-CONSENT AGREEMENT

Mr. BAKER. Mr. President, I have consulted at some length now with the minority leader and with other Senators who are directly involved with the measures I am about to identify. I would like at this point to propound a unanimous-consent request.

Mr. President, I ask unanimous consent that at any time after 1 p.m. on Wednesday, September 23, 1981, the majority leader, after consultation with the minority leader, be authorized to proceed to the consideration of S. 1196, the foreign assistance bill.

I further ask unanimous consent that any time on Thursday, September 24, or thereafter, the majority leader, after consultation with the minority leader, be authorized to proceed to the consideration of House Joint Resolution 325, a continuing resolution, provided, however, that House Joint Resolution 325 has then reached the Senate Calendar of Legislative Business.

Mr. President, I further ask unanimous consent that in the event the Senate proceeds to the consideration of House Joint Resolution 325 on the basis of this order or any other basis, that S. 1196 be temporarily laid aside and that a call for regular order will not bring S. 1196 as the unfinished business.

Mr. President, in the request there are four words, "or any other basis," referring to the basis on which the foreign assistance bill is laid aside and we proceed to the consideration of the joint resolution. I strike those four words from the unanimous-consent request and otherwise repropound the request.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. BAKER. I thank the Chair, the minority leader, and all Senators for making it possible to gain this agreement. The net effect of this, Mr. President, is to let us finish the bill now pending, the Defense Production Act, this afternoon. I know of no other significant legislative or executive business that can be transacted by the Senate today. So I expect that we will recess shortly after the completion of that measure. Then the Senate will turn to the consideration of the foreign assistance bill tomorrow, but not before 1 p.m.

## ORDER FOR RECESS UNTIL 11 A.M. TOMORROW

Mr. BAKER. I inquire of the Chair, is there an order for the convening of the Senate on tomorrow?

The PRESIDING OFFICER. There is an order to convene at 10 a.m.

Mr. BAKER. Mr. President, I ask unanimous consent that the time of the convening of the Senate be changed to the hour of 11 a.m. on tomorrow.

The PRESIDING OFFICER. Without objection, it is so ordered.

## ORDER OF PROCEDURE

Mr. BAKER. At 1 p.m. the majority leader is authorized to ask the Senate to proceed to the consideration of S. 1196, the foreign assistance bill. I hope the foreign assistance bill can be completed promptly.

On tomorrow I will inquire further about the possibility of a time agreement for amendments or for final disposition of that measure. In any event, it will be necassary, as soon as possible, to proceed to the consideration of the continuing resolution, House Joint Resolution 325. I expect that the Senate will be occupied with the foreign assistance bill, with the continuing resolution, and perhaps the debt limit bill, or one of the two or both of the debt limit bills, for the balance of this week and for most of next week.

I will have a further update on the outlook for the Legislative Calendar, I trust, either tomorrow or the following day.

## BEST WISHES TO JOE STEWART

Mr. BAKER. Mr. President, all staffs are not created equal, because all employees are not created equal. Joe Stewart has worked in the U.S. Senate since 1951, and he is far from equal.

This year, Joe is leaving the Senate, and I want to take this opportunity to tell him that he will be missed.

Joe most recently had served as the Secretary for the Minority in the Senate, but that position is merely the culmination of an impressive list of Senate capacities, all of which he served distinguishedly.

Joe first came to Washington as a page for Senator Holland of Florida. After his graduation from Capitol Page School, he was named to the staff of the Democratic cloakroom. Throughout this period in his career, Joe attended undergraduate and law school, as a night student, maintaining full-time employment with the Senate.

Following graduation from law school, Joe became a member of the Senate Committee on Appropriations staff, where he remained until he became a legislative assistant to Senator ROBERT C. BYRD. In 1977, Joe was named as assistant to the majority leader for floor operations. In 1979, he was elected Secretary for the Majority.

I am sure that I speak for all my colleagues in the Senate in expressing a debt of gratitude to Joe Stewart, and extending to him all the best in the years to come.

## ADDRESS BY SENATOR STAFFORD AT THE 68TH INTERPARLIAMENTARY CONFERENCE

Mr. BAKER. Mr. President, the distinguished President of the Interparliamentary Union, Senator STAFFORD, has just returned from an intrepid trip to Havana, where he represented the United States in the 68th Interparliamentary Conference.

Unfortunately, the conference was besieged by unjust lambasting and behavior which was repugnant to international diplomacy.

Nonetheless, I want to take this opportunity, Mr. President, to congratulate Senator STAFFORD on his conduct in the face of such conditions. His presence proved to be a stablizing force for many who were shocked at the outbursts of Mr. Castro.

I am proud of my appointment of Senator STAFFORD, he has served the Senate and the entire Nation befittingly.

At this time, I ask unanimous consent that Senator STAFFORD's speech at the conference be printed in the RECORD.

There being no objection, the speech was ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR ROBERT T. STAFFORD

Mr. President, Fellow Delegates: The purpose of the IPU is to foster mutual understanding and to seek, by means of dialogue, to attain the common objective of world peace. Dialogue and debate are really the only ways for this organization to survive—dictatorial and violent rhetoric, repetition of time-worn slogans will, I fear, lead the Union to sterile encounters and ultimate ruin.

My delegation came to this meeting in Havana, despite certain controversy in our own country, with the clear intention of being constructive. We are still of this mind. However, I can only state that as a member of U.S. delegations to the IPU during the past 10 years and having attended at least 20 opening conference sessions, yesterday's outrageous "lecture" causes me to wonder whether this organization is not being transformed into a propaganda forum for individuals who do not share the same regard for truth and decency as those truly experienced in genuine parliamentary traditions.

In every opening ceremony I can recall, the head of state of the host government has welcomed the conference membership and has wished us well in our deliberations. None has ever used the position of host to further personal ambition and attack a guest state or group of states with distortions and lies.

The U.S. delegation was astounded yesterday to find ourselves—in a supposedly opening ceremony—under the most severe attack ever mounted in our memory of the IPU. Even though Mr. Castro stated he intended to criticize the policies of an administration and not of a people, it is very difficult for us to treat his polemic in that vein. His remarks went far beyond credibility and decency for us not to take them personally as citizens of the United States.

The attack violated the spirit of the IPU. It was without factual basis. It was an insult to the United States and its delegation to this conference. We deeply resent the attack and will not forget it.

I will not dwell on the many absurd assertions of yesterday's diatribe. Let me simply conclude this portion of my statement by saying that far from using biological weapons against Cuba, the United States, through the Pan American Health Organization has actually been sending a chemical, "abate," to Cuba to help combat the dengue fever epidemic—a humanitarian act of which I suspect the Cuban people are largely unaware. Similarly the Castro government, recently from a port not very far from this site, threw off its undesirables, its convicts and its mentally incapacitated, along with those who wanted to go, and forced a tremendous social and humanitarian burden on the United States which, frankly, has required difficult efforts in my country to handle.

But really, I say fellow delegates, we are here today to discuss more than vicious rhetoric.

We are to discuss today what we, as parliamentarians, can do to uphold and promote the objectives of disarmament. Yet this concern cannot allow us to forget that disarmament is not really an end in itself. Disarmament can only be a means to a more important objective—that of promoting world peace and security. Let us not forget that our real objective, as responsible parliamentarians in a dangerous world, is to seek, promote and use every appropriate means available—short of armed force or other forms of coercion—to create and sustain a world as secure and peaceful as possible so that civilizations can survive, cultures can flourish, nations can progress and individual humans can enrich themselves and live long lives free from threats of catastrophic war.

Arms control and disarmament, if properly implemented, lead us in that direction.

Sometimes, I fear there are those among us in certain capitals of the world who overlook the ultimate aim we should strive for—peace and security and a world free from the threat of nuclear holocaust. Debates on disarmament have had a lack of orientation and worse have been used by some as a propaganda tool aimed at deflecting attention from real and ongoing uses of arms in conflict—from persistent aggression and subversion which are clear and active threats to world peace and security.

In this regard, it is difficult for many of us in my country and elsewhere to take very seriously the commitment of the Soviet Union to promote world peace and security when its forces continue to occupy the formerly independent, non-aligned country of Afghanistan, in complete disregard of world opinion. We further doubt Soviet sincerity when we consider its bankrolling of armed aggression of other states elsewhere in the world.

On this point, I should like to echo the comments expressed earlier by the Canadian, Australian, United Kingdom and Federal Republic of Germany delegates concerning the decision of the steering committee regarding the amendment proposed by Western groups reiterating the call of the IPU concerning Afghanistan. In my view, the decision in effect suppresses a free vote on an issue important to many in this hall. Certainly it is relevant to the discussion of arms control and disarmament. I hope this decision which tends to undermine the parliamentary process will be reversed.

The aggression in Afghanistan jeopardizes peace and security. Americans abhor this aggression, they abhor subversion. In this hemisphere, we live uncomfortably with attempts by Cuba and the Soviet Union to upset elected governments and try to make resort to arms the only available option for nations wanting benefits for their peoples.

Given the use of force in international relations today, we are increasingly aware of the need to work to prevent conflict. Arms control and disarmament proposals offer a partial guide to achieve this goal and would contribute mightily to reducing tensions in the world. The United States looks forward to progress in the various negotiations.

However, let us not be misguided in our pursuit or arms reductions. Arms reductions effected by one side alone hardly provide for the security we would hope to achieve.

We have heard about the so-called U.S. attempts at gaining military superiority. However, there was little recognition that, in the past few years, the Soviet Union has taken distinct military advantages. While reference has been made about U.S. moves, none was made of Soviet activity in Europe. The Soviet Union has deployed a whole new generation of nuclear weapon systems, particularly the SS–20 missiles that threaten all of Europe with nuclear devastation. Soviet advance in this area has been steady, comprehensive and in no sense a reaction to NATO's defense program which, frankly, has hardly matched the velocity of the Soviet momentum. Add to the SS–20 missiles, the long range Backfire bombers and an array of other Soviet nuclear missiles and nuclear capable aircraft, all of which are already deployed, and it is no wonder that Party Secretary General Brezhnev calls for moratorium in Europe—the Soviet Union wants moratorium because it wants to preserve its own advantages in nuclear superiority.

Similarly, the Soviet Union propagandizes loudly about the so-called "neutron bomb" precisely because this weapon poses the possibility of countering advantages which the Soviet Union has already developed and deployed in ground forces, particularly tank capability, in Europe.

It is not some new found altruistic or humanitarian vision that motivates the intensity of the Soviet campaign. In fact, the Soviet Union itself has the ability to deploy neutron weapons.

Weapons development and deployment is not taken lightly in the United States. In fact, we have had extreme debate in our own Congress on whether to and how to develop numerous systems. We have controls which we proudly show the world and public scrutiny of arms control implications of all new developments. I suspect the weapons procurement decisions in the Soviet Union are much less subject to public scrutiny and control. I strongly suspect Soviet citizens have little or no control over the future of Soviet arms developments—which proceed at tremendous speed.

Arms control has been a primary policy objective of Americans for years. We have tried for strategic controls, theater controls, testing controls, and conventional arms controls. Agreements have been consummated, and we all live in the world today with many more reins placed on the means of destruction. There are in fact proposals—such as the one before the Madrid meeting on security and cooperation in Europe—that look toward disarmament and which the Soviet Union has opposed. We must move ahead.

This very month, Secretary Haig will meet with Soviet Foreign Minister Gromyko to start their discussions on, among other things, theater nuclear forces. By the end of this year, productive exchanges between American and Soviet officials could occur.

These arms control discussions cannot survive in a world of aggravated tension. World leaders and parliamentarians must work to create a climate conducive to disarmament. We have to proceed to obtain peaceful solutions to problems. The European Community has proposals for solving the Afghanistan problem. The United Nations and Southeast Asian nations have concrete recommendations for solving the Kampuchean problem.

On the Mideast, an extremely volatile area with tremendous implications for world peace, the United States has attempted in the past, and still is striving to bring peace to that area by encouraging reasoned discussion of issues and productive, step-by-step negotiation. The Camp David accords still offer, we believe, the most fruitful prospect for bringing peace to the Middle East. After all, and despite criticism, there is a peace treaty, Israel has withdrawn from some occupied territory and promise continues for productive efforts on autonomy talks.

Moreover, colleagues, the United States helped facilitate a ceasefire in Lebanon—only the most recent example of the efforts of many lands to restore peace to that strife-torn country. To seek to impugn our motivation is ridiculous and not worthy of further comment. Suffice it to say that, Mr. President and colleagues, the United States will seek every opportunity to promote harmony among the great peoples of the Middle East.

In conclusion, there are ideas, and countries willing to press them, that can promote a more secure and peaceful world. However, implementation of these ideas will require more than unproductive rhetoric—we have to explore, debate and negotiate rationally and honestly. The risk of catastrophe is far too great for us to deal any other way.

## CONCLUSION OF MORNING BUSINESS

Mr. BAKER. Mr. President, I know of no further morning business to be transacted, and I am prepared to yield the floor.

The PRESIDING OFFICER. If there is no further morning business, morning business is closed.

## EXTENSION OF DEFENSE PRODUCTION ACT OF 1950

The Senate continued with the consideration of the bill (S. 1135).

The PRESIDING OFFICER. The Senator from Utah.

Mr. GARN. Mr. President, this bill is simply a 1-year extension of the Defense Production Act, which has been unanimously agreed to by the Banking Committee.

Mr. PROXMIRE. Mr. President, the Senate will today consider a 1-year extension of the Defense Production Act. The administration asked for a 5-year extension of the Defense Production Act. This committee has reported out a bill extending the act for 1 year only. There is some indication that the act may be used to subsidize and establish floor prices for certain strategic materials or provide loan/guarantees. The Senate should be on notice that any such program will be given the most thorough and careful scrutiny.

This administration has taken great pride, and properly so, in its advocacy of free market principles. Competition not regulation, the administration, argues is the best way for an economy to allocate scarce resources. Inflation is this Nation's No. 1 problem. In a free market prices fluctuate up or down depending on demand. But price fixing by private monopolists or by Government flat clearly prevents the free market from serving as the best anti-inflationary medicine.

Establishment of floor prices for certain commodities would remove the discipline of the free market on prices and create a situation where prices would ratchet only up not down. Floor prices on commodities would create a subsidy and build in a strong inflationary bias. No industry should be favored by such bailout subsidies contrary to the free market. At a time when everyone is being asked to make sacrifices no sector of the economy should be given favored treatment by guaranteed floor prices.

Mr. President, I make that statement not because this bill would fix prices or provide for a floor, but it is, as I say, a 1-year extension, not a 5-year extension. I am concerned that there will be pres-

sure, as there always is from the interested parties, to put a floor under their price and in doing so. as I say, remove the fluctuations of the market which alone can give us the kind of price stability and can counteract inflation over the long run.

Mr. President, I thank my good friend from Utah. I yield the floor.

Mr. SCHMITT. A parliamentary inquiry, Mr. President. The clerk reported a bill for a 5-year extension. Has the committee amendment been agreed to?

The PRESIDING OFFICER. The committee amendment has not been agreed to. Once agreed to, it will read a 1-year extension instead of a 5-year extension.

Mr. SCHMITT. Mr. President, a further parliamentary inquiry.

Is it necessary to amend the title to reflect that?

The PRESIDING OFFICER. There is a committee amendment to the title.

Mr. SCHMITT. The correct procedure would be, prior to the clerk reading, to amend the title, is that correct?

The PRESIDING OFFICER. After passage.

Mr. SCHMITT. Mr. President, I commend the distinguished chairman of the Banking Committee, the Senator from Utah, for proceeding in an expeditious way on this extension.

In answer to the distinguished Senator from Wisconsin, the only reason that I can see for us to extend this for only 1 year is to have the opportunity for the Banking Committee to fully examine the applicability of the Defense Production Act in assisting the administration, the Congress, and the country to move forward in a much broader recognition of the problems that face this country with respect to its strategic mineral supplies. In addition it would be worthwhile to examine the Defense Production Act thoroughly during this coming year to see if it, in fact, will support the variety of initiatives that might be necessary for the administration to take in order to insure that this country will not face a serious embargo of a particular strategic commodity, and that it can, in fact, survive such an embargo either through domestic productions under the provisions of allocation or the provisions of substitutes for such a mineral commodity.

I am sure the Senate will agree to this bill and I shall certainly give my commitment to my colleagues that during this coming year, I shall cooperate fully with the chairman of the full committee to see that we do move forward with hearings so that we fully understand how this act can assist the Nation to overcome what is truly a crisis today; that is, our vast dependence on a wide variety of strategic minerals and materials imported from abroad.

Mr. President, before we move to pass the bill itself, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The committee amendment will have to be acted upon before floor amendments will be in order.

The question is on agreeing to the committee amendment.

The committee amendment was agreed to.

UP AMENDMENT NO. 408

(Purpose: To extend the reporting date for the Commission studying the role of gold in monetary systems)

The PRESIDING OFFICER. The clerk will state the amendment of the Senator from New Mexico.

The assistant legislative clerk read as follows:

The Senator from New Mexico (Mr. SCHMITT) proposes an unprinted amendment numbered 408.

At the end of the bill add the following new section:

GOLD COMMISSION EXTENSION

Section 10(b) of Public Law 96-389 (31 U.S.C. 822a note) is amended by striking out "one year after the date of enactment of this Act" and inserting in lieu thereof March 31, 1982".

Mr. SCHMITT. Mr. President, this amendment, as is obvious, would extend the reporting date for the Gold Commission to March 31, 1982. The Banking Committee has unanimously voted to report legislation to extend the life of the Commission until that time.

Mr. President, on June 16, 1980, the Senate agreed to an amendment to S. 2271, the Bretton Woods Agreements Act, which established a Gold Commission to "conduct a study to assess and make recommendations with regard to the policy of the U.S. Government concerning the role of gold in domestic and international monetary systems." The Commission was directed to transmit its report to Congress no later than 1 year after the date of enactment, October 7, 1981.

Due to the change in administration, members of the Commission were not appointed until late spring, and the first meeting did not occur until July 16, 1981. The second meeting occurred on September 18, only 3 weeks before the deadline for the Commission's report to Congress.

It seems clear that an issue as complex as the role of gold in the domestic and international economy cannot be carefully studied in only two meetings, under the pressure of a fast approaching deadline.

In fact, a great deal of the discussion at the last Commission meeting was on the question of extension of the deadline. This date represents a rough consensus of where that ought to lie. The vote actually was tied between dates not too far removed from this. I think it is clear that the Commission generally will support this date, although it will be hard to tell that from the discussion we have had.

Nevertheless, there was not a feeling that we ought to go for a full year, nor was there a feeling that we ought to confine ourselves just to a few more weeks. So I submit to my colleagues that this is probably the best general date that we could come up with.

Mr. President, the report resulting from the procedure, if it were conducted under the October 7 deadline, could not do justice to the subject which the Commission is supposed to study and cannot provide clear guidance to the Congress on this controversial issue. For this reason, I am offering this amendment to extend the life of the Commission until March 31, 1982. This will provide time for a full examination and public discussion of the role of gold in our economy.

If we fail to extend the time limit, the report that results from the Commission will fail to provide the definitive statement I think the Congress would like to see.

I realize that there are Members who feel strongly that the United States should return to a gold standard at the earliest possible date. Others think that such a step would lead to economic chaos. I for one have not made up my mind on this matter, nor do I understand the issue fully enough to agree that a conclusion can be reached. Still, I think the Commission is correct that a study must be done before clear conclusions can be reached. But whether one favors or opposes a return to a gold standard, I think we can all agree that it would be preferable to have the issue resolved with this Commission, than to have the matter perpetuated with an incomplete and inconclusive report.

Mr. President, I believe the distinguished Senator from Connecticut wishes to enter into this colloquy and I yield to him at this time.

Mr. DODD. I thank the Senator for yielding.

Mr. President, I support the amendment being offered by the distinguished Senator from New Mexico to extend the old Commission's deadline for filing its report on the role of gold in the domestic and international monetary systems.

I could not agree more with the Senator from New Mexico about the confusion surrounding this issue of the gold standard and I have not made up my mind, either. I look forward to the meetings of the Commission so we shall be able not only to report back to this body but to the American people on the Commission's conclusions.

As the Senator from New Mexico pointed out, there was a general feeling that the Gold Commission's report deadline should be extended. A bare majority of the Commission members supported a March 31 deadline. This seemed to be a reasonable time for the Commission to do its work.

The Secretary of the Treasury has accurately pointed out, and I believe those sentiments have been expressed by the Senator from New Mexico, that the Commission members could not even agree on the historical facts, let alone a policy. So we have our work cut out for us.

Mr. President, this is a reasonable amendment, one that enjoys almost total support on this side. I am pleased that the Senator from New Mexico has offered it.

Mr. SCHMITT. I thank the Senator and I do enjoy the opportunity to work with him on the Commission.

Mr. GARN. Mr. President, I compliment both of my colleagues, the Senator from Connecticut and the Senator from

New Mexico, for agreeing to this compromise and this extension. Under the circumstances. I think it is a wise decision and certainly, on behalf of the majority, I am willing to accept the amendment of the Senator from New Mexico.

Mr. SCHMITT. Mr. President, I move the adoption of the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from New Mexico.

The amendment (UP No. 408) was agreed to.

Mr. GARN. I move to reconsider the vote by which the amendment was agreed to.

Mr. SCHMITT. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. GARN. Mr. President, I know of no further amendments. I move third reading.

The PRESIDING OFFICER. The question is on the engrossment and the third reading of the bill.

The bill was ordered to be engrossed for a third reading and was read the third time.

Mr. GARN. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of H.R. 2903.

The PRESIDING OFFICER. The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (H.R. 2903) to extend by 1 year the expiration date of the Defense Production Act of 1950.

The PRESIDING OFFICER. Without objection, the Senate will proceed immediately to the consideration of the bill.

Mr. GARN. Mr. President, I move to strike all after the enacting clause of H.R. 2903 and to substitute therefor the text of S. 1135, as amended.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Utah.

The motion was agreed to.

The PRESIDING OFFICER. The question is on the engrossment of the amendment and the third reading of the bill.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read a third time.

The PRESIDING OFFICER. The bill having been read the third time, the question is, Shall it pass?

The bill (H.R. 2903) was passed.

Mr. GARN. I move to reconsider the vote by which the bill was passed.

Mr. SCHMITT. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. GARN. Mr. President, I ask unanimous consent that S. 1135 be indefinitely postponed.

The PRESIDING OFFICER. Without objection, it is so ordered.

---

## THE PEACE CORPS

Mr. HAYAKAWA. Mr. President, 20 years ago to this day, on September 22, 1961, President John Kennedy signed a bill creating the Peace Corps. In my judgment, the Peace Corps has proved to be one of the finest expressions of American idealism and one of the most effective instruments of our foreign policy.

During the past 20 years, over 80,000 volunteers have served as ambassadors of peace, concern, and friendship in almost 90 underdeveloped countries. We bring to these countries our knowledge and skills in health, nutrition, agriculture, engineering, and education.

We have been to such strange places as Solomon Islands and Papua, New Guinea. We have been in many countries in Africa. We have been all over the place, helping with the lumber industry, the fishing industry, the care of children, education, drainage, cleaning up water pollution. Everything conceivable that is needed for the health and comfort of underdeveloped countries we have contributed freely.

I recall that when I was in Liberia, I met a young lady from the United States who was living by herself just outside a Liberian village, in a little hut, living just like the Liberians did in that rather impoverished village. She was devoting her whole life to learning the language, taking care of the children, and introducing methods of child care that were unfamiliar to the Liberian population there. This kind of dedication is to be found all through the Peace Corps.

In return, we learn not only of foreign cultures and languages, but we develop a sense of international responsibility and brotherhood, while we are teaching new means to improve the material well-being of the world's poor, we are gaining a better appreciation of our own good fortune to be Americans. The careers of some of our most capable professors, international businessmen, and foreign service officers have been inspired and built upon a Peace Corps experience. Some former volunteers have even become U.S. Senators.

As a long-time supporter of the Peace Corps, I am proud of the fact that there are more Peace Corps volunteers from California than from any other State. While on my recent trip through Southeast Asia, I saw, in Thailand and Malaysia, the enthusiastic attitude of our volunteers and the wonderful work they are doing.

I believe it was in Malaysia that I attended a Peace Corps party. Wonderful people of various ages, more young than old, were having a sort of celebration; and the idealism and dedication they had toward their work was clearly visible in the way they talked about their jobs and about their friendship with each other and about their friendship with the local people.

Regrettably, the Peace Corps has recently come under attack as being "an unpleasant vestige of Kennedy liberalism." I can only surmise that these detractors are uninformed as to the objectives and accomplishments of the Peace Corps in the less-developed world.

Mr. President, I ask unanimous consent to have printed in the RECORD an article from the Washington Post in which the attack upon the Peace Corps from the far right is reported and, to a considerable degree, refuted.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

PEACE CORPS, IN ITS 20TH YEAR, UNDER ATTACK FROM THE FAR RIGHT

(By James Naughtie)

The Peace Corps, in its 20th anniversary year, is at the center of an increasingly bitter administration battle over its independence and its budget, a battle that officials say could damage its work overseas.

The corps is under strong attack from hard-line conservative groups with access to high administration officials, and at the same time is facing budget cuts that could reduce the number of volunteers going abroad.

As a result, according to well-placed sources in the Peace Corps, Director Loret Ruppe is spending valuable time defending the corps' work and countering accusations from the far right that it is "anti-Reagan." The effect, the sources said, has been to reduce morale among full-time officials and to discourage prospective volunteers.

Much of the irritation among Peace Corps workers is directed at staff members of the Action agency, which is linked administratively to the corps. Although an executive order by President Carter in May, 1979, guaranteed autonomy for the Peace Corps, with only some shared support services, the two organizations share the same building and there are close management links.

According to one Peace Corps official, there is constant friction between the staffs, leading to such incidents as the appearance on walls and elevators in the Action offices of copies of an article highly critical of the Peace Corps that appeared in the conservation publication "Human Events."

The article attacked the corps' 20th anniversary celebration in June, which it claimed became a forum for "virtually every anti-Reagan freak around." The Peace Corps was described in the article as "a dangerously anti-Reagan instrument."

The accusations caused considerable distress in the Peace Corps, because they were considered unfounded and because copies were known to have been circulated at the White House. Ruppe, according to officials close to her, was outraged by the article.

She is reportedly convinced of President Reagan's support for the Peace Corps but dismayed by conservative attacks on her, because she believes that the work of the corps in the Third World should be attractive to those who profess to believe in "self-help."

The main focus of the anti-Peace Corps campaign is legislation to separate the corps completely from Action. That move is opposed by the administration, on the grounds that it would cost about $3 million a year more to run separate organizations. The bill, passed by the Senate, faces some House opposition, but a congressional staff source said Friday that the bill is expected to become law.

It was introduced in the Senate earlier this year as part of the campaign by liberals to block the nomination of Thomas Pauken as head of Action. One of the arguments used against Pauken, a Republican congressional candidate in Texas last year, was that his connection with military intelligence in Vietnam would be damaging to the Peace Corps, because it would provide opportunities for the Soviet Union to charge volunteers with intelligence links.

As a result of the controversy surrounding his nomination, and his reputation as a hard-line conservative, Pauken is regarded warily by many Peace Corps officials, and the friction with Action staff has tended to confirm their initial fears, according to sources in the corps, despite an apparently good working relationship between Pauken and Ruppe.

Pauken has made it clear that one of his main aims as Action director is to launch an

assault on the VISTA program, established in the 1960s to help depressed areas in the United States by organizing teams of volunteers to advise on various topics.

However, what concerns some Peace Corps staff members is that Pauken, who has publicly expressed support for the corps, is closely associated with some of the far right groups now calling for it to be brought under stricter control.

On June 19, for example, Pauken addressed a meeting of the Kingston Group, a private discussion group set up by several conservative organizations, including the Conservative Caucus and the Committee for the Survival of a Free Congress, which meets regularly in the back room of a private house on Capitol Hill.

During this meeting an 11-page list of VISTA programs was circulated. According to a participant at the meeting, the list was handed out by Pauken, who said the programs were "leftist" and were to be dissolved.

Pauken denied in an interview that he had handed out any list at the meeting, but said his staff might have done so. He said the Action staff was examining individual programs to see if they fulfilled the criteria laid down for the agency.

One of the participants at the Kingston Group meeting, who was invited as part of a Conservative Progress Briefing in Washington, described the session as "a shock" because of the passionate antagonism to federal programs displayed and the intolerance to any one not associated with the far right.

The open hostility of some Action officials to the Peace Corps is causing fears that this year's budget cuts may be the prelude to a more severe cutback. The 1982 appropriation has dropped to $95 million, from $106 million in fiscal 1981, and activities are expected to be concentrated in fewer countries. By 1983 the number of volunteers is expected to be about 20 percent below the figure planned for 1982 by the Carter administration. There are currently 5,400 volunteers in 60 countries.

Yet Ruppe and her staff are convinced that the Peace Corps delivers a large benefit to the nation, at a relatively small cost. One report from a senior official now circulating in the office describes a lengthy tour to African countries where volunteers are at work and concludes: "The United States does not yet realize the incredible impact that the Peace Corps has on these smaller nations—an incredible impact on their societies, world outlook, identities, and conceptualization of the West."

Tuesday is the 20th anniversary of the signing of the Peace Corps Act, and an atmosphere of celebration might be expected. But instead, many officials are frustrated and distressed by the attacks which are forcing them to spend time on defensive bureaucratic maneuvers and which they believe could discourage volunteers. They are also concerned that President Reagan's support for the corps might be undermined by hardliners who regard it as an unpleasant vestige of Kennedy liberalism.

As a result, Peace Corps officials believe they may even be facing a battle for survival.

Mr. HAYAKAWA. Mr. President, I am convinced, as is Peace Corps Director Loret Miller Ruppe, that President Reagan heartily supports the Peace Corps. Certainly those who profess to believe in the virtues of self-help should be strong backers of the Peace Corps, as self-help is the essence of the Peace Corps message.

The Peace Corps unit is successful when they are no longer needed in the particular place to which they have been assigned. That is their definition of success. It means that the capacity for self-help has been developed in that region.

In closing, I wish to congratulate the Peace Corps for its magnificent record throughout the world, many underdeveloped countries, large and small, have benefited from the work of dedicated Americans. Equally important, America is richer for the experience.

Happy birthday, Peace Corps, and many happy returns.

Mr. SCHMITT. Mr. President, will the Senator from California yield?

Mr. HAYAKAWA. I yield.

Mr. SCHMITT. Mr. President, I compliment the Senator, as I often enjoy doing with respect to the issues about which he chooses to address this illustrious body.

I shall reminisce a little. I was not in the Peace Corps, but I did have the opportunity to be an exchange student in a developed country, Norway, back in 1957 and 1958. At that time, I had an opportunity to interact with many exchange students in residence at the University of Oslo who were from the now-termed developing countries of the world. In that interaction and exchange, the idea that we should have some kind of a more technically and experience-oriented exchange of people to people came out of those discussions; and I included that in my report to the U.S. Educational Foundation in Norway when I left that country. A short time later, President Kennedy came forth with the Peace Corps, which was exactly what I believe a great many of us of that generation were waiting for.

The next contact I had with the Peace Corps was in traveling through the developing countries of the world as an astronaut, after my return from the most recent mission to the Moon, Apollo 17, and discovered that in many of the consulates and in the embassies, but mostly in the consulates in the back country of these developing countries of Africa, Asia, and Latin America, where I was traveling, you would find the graduates of the Peace Corps who were serving as tremendously capable and experienced lower echelon Foreign Service officers. They had moved out of the Peace Corps into the Foreign Service, with a tremendous knowledge of the language, customs, and mores of the particular countries in which they served. So, obviously, it was doing a great deal of service to our foreign activities.

The only disappointment was that we were treating—and still are treating—these younger members of the Foreign Service very shabbily in terms of the compensation we offer them for the service they do the country in these very out-of-the-way but important assignments.

The unfortunate thing that happened to the Peace Corps was that the management of it, for an interim period, began to concentrate on the more social disciplines, in terms of the people they were bringing into the Peace Corps—the younger, less experienced people who did not really fit the early mold of the Peace Corps; whereas, we had been getting people with something in their background and experience that was directly applicable to the needs of a particular community or set of individuals within a developing country.

That is why the Peace Corps was successful initially: It was a transfer of know-how, of experience, from Americans to the people of these countries. We sort of digressed from that lesson for a few years; and I believe that, as a result, the Peace Corps fell into some disrepute, and perhaps some of it was deserved.

I have had the opportunity recently to talk with Tom Pauken, the new administrator of ACTION, under which the Peace Corps is located administratively, and I am tremendously encouraged by his belief that we must continue the movement back to the experience-based orientation of the Peace Corps.

His commitment to the Peace Corps is as strong as anyone that I have run into, and I am tremendously excited that we may once again be able to rejuvenate and expand this opportunity for young Americans and old Americans—older Americans——

Mr. HAYAKAWA. Yes.

Mr. SCHMITT [continuing]. To move forward with the transfer of know-how into the developing world.

If we do not make that a base of our foreign policy, that transfer of know-how from developed nations like our own into developing nations such as the Peace Corps has served, then, frankly, I think we are doomed to failure in our entire conduct of foreign policy relative to these countries.

The transfer of dollars has not served those countries or our own foreign policy well in most instances, but the transfer of know-how, the money that goes into the mind, rather than money that goes into the pocket, is what again and again the middle class or the incipient laboring and business middle class of these countris told me was the absolute essential ingredient for their progress. Money will not do it because money never gets to the level where it is necessary for progress. But know-how can always get where it is necessary for progress in these countries, and that was the essence of the Peace Corps and I think can and should be the essence of the Peace Corps in the future.

Again, I compliment the Senator from California for his excellent statement on the history and progress of the Peace Corps, and certainly they have an additional friend in the Senator from New Mexico.

Mr. HAYAKAWA. I thank the distinguished Senator from New Mexico for his support of my comments, and I thank him also for the addition of his experience to mine in commenting on the Peace Corps' record.

I emphasize again what Senator SCHMITT has said that people who have skills to contribute rather than simply money to contribute are of tremendous importance, and it is not to be forgotten, and I think we should remind our constituents, that people who are retired and still in good health are perfectly welcome in the Peace Corps, and people who are retired from skilled professions, machinists, farmers who know how to dig a well, farmers who have had agriculture experience of a variety of kinds,

all sorts of people from manual occupations who find themselves with early retirement and good health are perfectly welcome because they especially are needed in some of these areas where these technical skills are extremely rare.

So, it is not only a matter of young, idealistic people trying to see the world; it can be for older, idealistic people, also, and they also can see the world and profit from it.

Mr. SCHMITT. As usual the Senator makes exactly the right point in defining what is and I believe should be the essence of the Peace Corps: It is the transfer of skills and experience from one population of people who are free to populations who yearn to be free, not only free from the political shackles they live under but also equally free from the dangerous shackles of an economy that will not support either their lives or their ability to raise and feed a family.

Mr. HAYAKAWA. I thank the Senator from New Mexico and I thank the Chair.

## THE 20TH ANNIVERSARY OF THE PEACE CORPS ACT

Mr. TSONGAS. Mr. President, 20 years ago today, on September 22, 1961, the Congress created what has come to be one of the most successful, yet undervalued elements of our Nation's foreign policy—the Peace Corps. In commemoration of this historic event, I would like to bring to the attention of my colleagues the accomplishments of this outstanding organization.

The Peace Corps is America's only truly "people-to-people" foreign aid program. Working at the local level, Peace Corps volunteers deliver development assistance directly to the less fortunate people of the world while offering these people a very personal view of American values and commitments. Dollar for dollar, the Peace Corps has excelled as an effective, yet inexpensive foreign assistance program.

However, this has not been a one-way street. After they have spread good will by taking our basic values overseas, Peace Corps volunteers bring world awareness back to their own communities. I, for one, can personally testify to this two-way role of the Peace Corps. As one of the several hundred members of the first Peace Corps contingent, I spent 2 years working with the people of Ethiopia. Nothing before or after that time has shaped my view of the world so deeply. As an American, I was overwhelmed by the numerous obstacles to progress in a developing country.

As a Peace Corps volunteer, I was able to share my talents in helping these deserving people overcome the barriers to progress. Today, I am sure that more than 80,000 present and former volunteers would join me in affirming the effectiveness of the Corps as a vehicle for human development and intercultural understanding.

As we prepare to meet the challenges of a new decade, one thing is certain: global interdependence is a reality. At a time when a quarter of the world's population lives in abject poverty and when the next serious conflict between nations could mean the obliteration of mankind, the need for the Peace Corps is greater than ever. Third World nations, in the face of world economic stagnation and Soviet adventurism, have never needed support from the West as much as they do now. And the United States, in the face of increasing economic competition from Europe and Japan, has never needed to invest in the Third World as it does today.

The world needs a credible exponent of basic democratic and humanitarian values. These values are rooted in our culture and history, and we should champion them. Third World people need to have us honor this principle because if we do not, no one effectively will. And ultimately, it is the moral and economic strength of America that will count, not just our military might.

The reality of the Third World dictates a particular American policy in order to be effective—and that policy happens to coincide with the best of our moral principles. The 20-year success of the Peace Corps demonstrates that these two goals are fully compatible. Let us opt for both morality and reality—let us continue to support the Peace Corps.

Mr. President, the morning newspaper carried the story of the starvation, malnutrition, and general despair of those who are victims of the war between Ethiopia and Somalia, those living in the Ogaden region. Those are very real people and, as I speak, they suffer and they die, and that suffering will someday have its impact upon all of us.

One of the things the Peace Corps has done is to sensitize us to the condition of people around the world, and I hope as the Peace Corps enters its third decade the Senate, indeed the House as well, will support it, will support it strongly, and realize that it is worthwhile not for its own sake but for the people it helps and, most importantly, for our own country as well.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. CHAFEE). The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. DODD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

## THE 20TH ANNIVERSARY OF THE PEACE CORPS

Mr. DODD. Mr. President, on this day 20 years ago, President John F. Kennedy signed the Peace Corps Act, strengthening America's Commitment to the poor and disadvantaged of the world. In its creation, he accurately foresaw an organization that would be defined by a people-to-people character. The Peace Corps was created in order to give everyday American citizens the unique opportunity to represent the best humanitarian instincts of the American people in assisting less fortunate people around the world. For 20 years this organization has nobly fulfilled its duties without wavering from its original purpose.

Along with the great wealth of our national inheritance—the people and riches of our country—comes the responsibility to use our resources for the benefit of all mankind. Under the banner of the Peace Corps, American men and women leave the familiarity and security of home to help others in distant lands. The volunteers in this program respond to this highest calling by toiling diligently against the frontiers of poverty, ignorance, and underdevelopment. In this process these volunteers offer the world a very personal view of Americans putting their ideals and commitments on the line.

The Peace Corps is defined by purpose, involvement, and caring. One only has to visit a country where the Peace Corps is present in order to understand this. It has a strong and positive impact on the host nations—an impact on their societies, world outlook, identities, and conceptualization of the West. Prime Minister Edward Seaga of Jamaica summarized the importance of the Peace Corps in the world community by remarking that—

> The Peace Corps . . . is wanted, needed, and loved by so many countries of the world.

In this era of cost-benefit analysis, we can see that the Peace Corps brings benefits to our international stature that far outweigh the cost. Dollar for dollar, the Peace Corps has excelled as an effective yet inexpensive American aid program. In addition, the more than 90,000 returned volunteers have made significant contributions to our society as a result of their experience in this organization.

The successful future of mankind is to no small degree dependent upon global interdependence. The Peace Corps brings to other nations the best of our society and in return, we receive a greater understanding of the cultures with whom we share this Earth.

President Kennedy remarked that—

> In some small village, volunteers will lay a seed which will bring a rich harvest for us all in later days.

On this anniversary 20 years to the day, its validity remains unquestioned.

As a former Peace Corps volunteer myself, I take particular pride in honoring the Peace Corps on this special day.

## ORDER FOR RECOGNITION OF CERTAIN SENATORS TOMORROW

Mr. STEVENS. Mr. President, I ask unanimous consent that there be special orders tomorrow morning, following the time under the standing order for the two leaders, for Senator WALLOP for 5 minutes, Senator BUMPERS for 15 minutes, Senator BAKER for 15 minutes, and Senator PERCY for 15 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

## ORDER FOR AUTHORITY FOR BUDGET COMMITTEE TO FILE SENATE RESOLUTION 203

Mr. STEVENS. Mr. President, I ask unanimous consent that the Committee on the Budget have the authority to file Senate Resolution 203, a budget waiver,

with respect to the consideration of Senate bill No. 10 until 6 p.m. today.

The PRESIDING OFFICER. Hearing no objection, it is so ordered.

## THE CALENDAR

Mr. STEVENS. Mr. President, I ask unanimous consent that the Chair lay before the Senate calendar order No. 253, S. 892; calendar order No. 254, S. 187; calendar order No. 255, S. 634; calendar order No. 256, S. 763; calendar order No. 257, S. 764; calendar order No. 258, H.R. 618; calendar order No. 259, H.R. 2218; and calendar order No. 272, Senate Resolution 198; that all of those calendar items be considered en bloc, that the amendments be adopted en bloc, and that the motion to reconsider that action be in order en bloc.

The PRESIDING OFFICER. Is there objection?

Mr. ROBERT C. BYRD. Mr. President, reserving the right to object, and I shall not object, these various measures have been cleared in the caucus today and the minority is ready to proceed en bloc.

## AMENDMENT OF FEDERAL GRANT AND COOPERATIVE AGREEMENT ACT

The bill (S. 892) to amend the Federal Grant and Cooperative Agreement Act, was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

S. 892

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That section 10(d) of the Federal Grant and Cooperative Agreement Act of 1977 (Public Law 95–224; 41 U.S.C. 501 note) is amended by deleting the sentence: "This authority shall expire one year after receipt by the Congress of the study provided for in section 8 of this Act.".

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

## TRANSFER OF CERTAIN LANDS IN MONTANA

The Senate proceeded to consider the bill (S. 187) to authorize the Secretary of the Interior to convey certain lands near Miles City, Mont., and to remove certain reservations from prior conveyances, which had been reported from the Committee on Energy and Natural Resources with amendments, as follows:

On page 2, line 7, strike "tract Q,", and insert "tract Q and tract S"; and

On page 2, line 21, strike "Sec. 31.", and insert "Sec. 3.".

So as to make the bill read:

S. 187

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That the Secretary of the Interior be, and he hereby is, authorized and directed to convey by patent to the city of Miles City, a municipal corporation organized and existing under the laws of the State of Montana, to wit: Lots 9, 17, 21 (all presently encumbered by the Miles City public water system); lots 28, 31, and 32, all in section 32; lots 16 and 17 in section 33, township 8 north, range 47 east, Principal meridian, Montana, and *tract Q and tract S,* townships 7 and 8 north, range 47 east, Principal meridian, Montana.

SEC. 2. The Secretary of the Interior is authorized and directed to convey to the city of Miles City, Montana, such evidence as is necessary to remove the reversionary provisions for public lands previously patented or conveyed by act of Congress, to wit: Patent numbered 1021511, tracts A and B; patent numbered 1122295, tracts E and F; patent numbered 1173770, tract G; patent numbered 1173768, tract K; patent numbered 1173769, tract L; patent numbered 1178764, tract M; patent numbered 1219817, tract P, all located in townships 7 and 8 north, range 47 east; and tract D located in township 8 north, range 47 east Principal meridian Montana.

SEC. 3. The Secretary of the Interior is further authorized and directed to convey to county of Custer, State of Montana, such evidence as is necessary to remove the reversionary provisions for public lands previously patented, to wit: Patent numbered 1023689, tract C; patent numbered 25–76–0099, tract T, located in townships 7 and 8 north, range 47 east, Principal meridian, Montana, and patent numbered 25–76–0100, lot 20, located in section 33, township 8 north, range 47 east, Principal meridian, Montana.

SEC. 4. The patents and documents issued pursuant to sections 1, 2 and 3 of this Act shall contain a reservation to the United States of all gas, oil, coal, and other mineral deposits as may be found in such lands and the right to the use of the lands for extracting and removing same.

SEC. 5. No conveyance shall be made pursuant to this Act until payment has been made for the fair market value of the interest being conveyed. Where initial conveyance of these lands was conditioned upon payment of a reasonable consideration on the basis of use, the Secretary is directed to determine the basis for the payment made at the time of the original conveyance. If such payment reflected fair market value without any reduction in that price because of the reverter, no additional payments shall be required.

The amendments were agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

## EXCHANGE OF CERTAIN LANDS IN IDAHO AND WYOMING

The bill (S. 634) to authorize the exchange of certain lands in Idaho and Wyoming, was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

S. 634

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That, notwithstanding any other provision of law, the Secretary of Agriculture (hereinafter referred to as the "Secretary") is hereby authorized to exchange the parcel of land described in section 2 (parcel A) currently owned by the United States, for the parcel of land described in section 3 (parcel B) and any improvements thereon, currently owned by Richard Hendricks of Preston, Idaho. Such exchange shall be made without additional consideration and in lieu of receiving monetary payment.

SEC. 2. For the purposes of this Act, parcel A shall consist of the following described tract of land consisting of approximately 81.78 acres: Township 33 north, range 119 west, 6th principal meridian, Lincoln County, Wyoming, section 14, southeast quarter northwest quarter and southwest quarter northeast quarter, containing approximately 80 acres, and township 35 north, range 119 west, 6th principal meridian, Lincoln County, Wyoming, section 28, beginning at the southwest corner of lot 2, thence north 15 rods, thence east 19 rods, thence south 15 rods, thence west 19 rods to the point of beginning.

SEC. 3. For the purpose of this Act, parcel B shall consist of the following described tract of land, consisting of approximately 5.9 acres: That portion of the southeast quarter southwest quarter of section 8, township 9 south, range 42 east, Boise meridian, Caribou County, Idaho, beginning at the southeast corner of the southeast quarter southwest quarter of section 8, thence west 376 feet, more or less, to an intersection with the easterly right-of-way of the Oregon Shortline Railroad, thence north 7 degrees 10 minutes east, 131 feet to a point of spiral; thence northerly along a curve to the left, the said centerline of main track has a spiral angle of 3 degrees 30 minutes with 6 by 38 foot chords, a distance of 232 feet to a point of spiral curve; thence along a curve to the left with a radius of 2,010.1 feet a distance of 520 feet; thence south 87 degrees 22 minutes east a distance of 269 feet, thence north 428 feet, more or less; thence east 30 feet; thence south along the east line of said southeast quarter southwest quarter 1,320 feet, more or less, to the point of beginning.

SEC. 4. Upon the conveyance of parcel B and any improvements thereon from Richard Hendricks by warranty deed to the United States acting through the Secretary, the Secretary is authorized and directed to convey by quitclaim deed, all right, title, and interest of the United States in parcel A to Richard Hendricks: *Provided,* That the conveyance of parcel A shall be subject to valid existing rights of third parties and a reservation by the United States of all mineral interests and of the existing road right of way in land section 14; *And provided further,* That the conveyance of parcel B to the United States may be subject to a reservation of all mineral interests therein to Richard Hendricks.

SEC. 5. The lands acquired by the Secretary by this Act shall, upon acquisition, become part of the Caribou National Forest and shall be administered in accordance with the laws, rules, and regulations applicable to the National Forest System.

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

## TRANSFER OF CERTAIN FEDERAL LANDS

The bill (S. 763) to authorize and direct the Secretary of the Interior to convey, by quitclaim deed, all right, title, and interest of the United States in and to certain lands that were withdrawn or acquired for the purpose of relocating a portion of the city of American Falls out of the area flooded by the American Falls Reservoir, was considered, ordered to be

engrossed for a third reading, read the third time, and passed, as follows:

S. 763

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That the Secretary of the Interior is hereby authorized and directed to convey by quitclaim deed to the city of American Falls, Idaho, without cost, the following real property located within or adjacent to the city limits of said city of American Falls, reserving all right-of-way and oil and gas in land to the United States:

(a) The area identified as the Campbell Stebbins Park, containing approximately 41.5 acres, including the park area located between the Oregon Trail Highway and the Oregon Short Line Railroad, and the area identified as a Public Square, containing approximately 8.8 acres, all as shown on the official plat of the Reclamation Addition to the city of American Falls approved October 18, 1923, and recorded in the county of Power, Idaho, as instrument numbered 32042.

(b) Block 44 of the original townsite of American Falls; containing approximately 3.3 acres,

(c) A tract of land containing 11.7 acres, more or less, described as follows:

Beginning at the northwest corner of the southwest quarter of section 21, township 7 south, range 31 east, Boise meridian;

thence south 45 degrees 16 minutes east, a distance of 1,870.3 feet, more or less, to the southeast corner of said southwest quarter;

thence north 58 degrees 28 minutes west, a distance of 96.3 feet;

thence north 68 degrees 17 minutes west, a distance of 1,339.2 feet, more or less, to a point on the west section line of said section 21, and said point being 548.2 feet north of the southwest corner of said section;

thence north along the west section line a distance of 770.5 feet, more or less, to the northwest corner of the southwest quarter of said section 21, the point of beginning.

(d) A tract of land containing 8.79 acres more or less in the south half of the southwest quarter, section 28, township south, range 31 east, Boise meridian, Idaho, and more particularly described as follows:

Beginning at the southwest corner of said section 28;

thence north 44 degrees and 38 minutes east, 1,868.6 feet to the 16/17 corner of said section;

thence east along the north boundary of the southeast quarter southwest quarter of said section 28, 367.2 feet to a point;

thence south 324.9 feet to a point;

thence north 89 degrees and 59 minutes west, 92.8 feet to a point;

thence south 49 degrees and 23 minutes west, 361.9 feet to a point;

thence south 78 degrees and 34 minutes west, 708 feet to a point;

thence south 26 degrees and 55 minutes west, 333.7 feet to a point;

thence south 61 degrees and 51 minutes west, 271.6 feet to a point;

thence south 43 degrees and 29 minutes west, 280.3 feet to a point on the south boundary of said section 28;

thence south 89 degrees and 59 minutes west along the south boundary of said section 28, 34.9 feet to the place of beginning.

(e) A tract of land containing 8.0 acres, more or less, located in the west half of the southwest quarter, section 28, township 7 south, range 31 east, Boise meridian, Idaho, and more particularly described as follows:

Beginning at the southwest corner of section 28;

thence north 44 degrees 38 minutes east, a distance of 1,886.6 feet to the northeast corner of the southwest quarter southwest quarter, of section 28;

thence north a distance of 1,320 feet to the northeast corner of the northwest quarter southwest quarter of section 28;

thence west, a distance of 30 feet to a point on the east edge of Hillcrest Avenue;

thence southwesterly along a curve on the side of Hillcrest Avenue a distance of 2,955 feet to a point on line between sections 28 and 29;

thence south 65.0 feet to the southwest corner of section 28, the place of beginning.

Such property shall be conveyed subject to the reservation of rights-of-way for ditches, canals, and pipelines constructed by the authority of the United States and to other existing rights-of-way of record. The conveyance of such property shall contain a reservation to the United States of all oil and gas in the land, together with the right to prospect for, mine, and remove the same under such regulation as the Secretary of the Interior may prescribe.

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

## PROTECTION OF THE JOHN SACK CABIN

The bill (S. 764) to provide for the protection of the John Sack Cabin, Targhee National Forest in the State of Idaho, was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

S. 764

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That, for the purpose of providing for the public use and enjoyment of the John Sack cabin, Targhee National Forest, State of Idaho, and to protect and preserve such cabin as a unique example of craftsmanship, the Secretary of Agriculture, in consultation with the Island Park Interpretive Association and other interested organizations, shall take such action as may be necessary in order to provide for the protection and maintenance of the John Sack cabin and associated structures. In carrying out the requirements of this Act, the Secretary is authorized, in accordance with existing law, to enter into a cooperative agreement with, or to issue a special use permit to, an appropriate person or organization pursuant to which such person or organization shall provide such protection and maintenance.

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

## TRANSFER OF CERTAIN INTERESTS IN PUBLIC LANDS TO THE CITY OF ANGELS, CALIF.

The bill (H.R. 618) to convey certain interests in public lands to the city of Angels, Calif., was considered, ordered to a third reading, read the third time, and passed.

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

## TRANSFER OF CERTAIN NATIONAL FOREST SYSTEM LANDS IN THE STATE OF NEVADA

The bill (H.R. 2218) to direct the Secretary of Agriculture to convey certain National Forest System lands in the State of Nevada, and for other purposes, was considered, ordered to a third reading, read the third time, and passed.

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

## RELEASE OF BENEDICT SCOTT FROM IMPRISONMENT IN THE SOVIET UNION

The Senate proceeded to consider the resolution (S. Res. 198) expressing the sense of the Senate that Benedict Scott (Vytautas Skuodis) be released from imprisonment in the Soviet Union.

Mr. PERCY. Mr. President, there are unfortunately many prisoners of conscience in the Soviet Union, but it is rare indeed that one of them has a claim to American citizenship.

Benedict Scott (Vytautas Skuodis in Lithuanian) was born in Chicago on March 21, 1929, and is an American by right of birth. His parents returned to then-free Lithuania while he was still a small child, and he and they were caught there in 1940 by the Soviet invasion and annexation of Lithuania.

Young Scott grew up to be a respected scientist in hydrology and geological engineering at the University of Vilnius, and a committed Roman Catholic. For his work in support of the Lithuanian national and religious movement, and his membership in the Catholic Committee for the Defense of Believers' Rights in Lithuania, and the Lithuanian Helsinki monitoring group, he was arrested in January 1980.

Last December he was tried and sentenced to 7 years in a hard labor camp, followed by 5 years of internal exile, for "anti-Soviet agitation and propaganda." Last June he is reported to have begun a hunger strike in prison in protest of the violations of human rights and spiritual deprivations of Soviet authorities.

Senate Resolution 198, which I have introduced and which Senators DIXON, HAYAKAWA, DODD, SPECTOR, RIEGLE, LEVIN, and DOMENICI join in cosponsoring, supports continuing efforts of the administration to protest this imprisonment of an American citizen, and calls directly on the Soviets to release him. The Soviets do not recognize Scott's still valid American citizenship, and it is up to Americans to continue to press his claim on his behalf. I urge my fellow Senators to support this worthy cause.

The resolution (S. Res. 198) was considered and agreed to.

The preamble was agreed to.

The resolution, and the preamble, are as follows:

S. RES. 198

Whereas Benedict Scott (Vytautas Skuodis) was born on March 21, 1929, in Chicago, Illinois, and is by right of birth a citizen of the United States of America; and

Whereas Scott and his parents emigrated to the independent Republic of Lithuania in 1930, which in June 1940 was invaded and annexed by the Union of Soviet Socialist Republics; and

Whereas Scott is a highly respected scientist, having served on the faculty of the University of Vilnius as a lecturer on hydrology and geological engineering, and is a founder of the Lithuanian environmental protection group; and

Whereas Scott fully supported the work of the Lithuanian national and religious movement, assisted in the work of the Catholic Committee for the Defense of Believers' Rights in Lithuania, and joined the Lithuanian Helsinki Group; and

Whereas on January 9, 1980, Benedict Scott was arrested in his home, tried and sentenced on December 22, 1980, to seven years in a hard labor camp and five years internal exile under article 68-1 of the Lithuanian SSR Criminal Code for "anti-Soviet agitation and propaganda", a sentence he is currently serving in a Soviet prison camp in the Mordovian ASSR; and

Whereas on June 15, 1981, it is reported that Scott began a hunger strike to protest violations of human rights and spiritual deprivations by Soviet authorities; and

Whereas the Government of the United States has never recognized the occupation and annexation of Lithuania into the Soviet Union; and

Whereas the United States has repeatedly expressed its support for the right of self-determination for Lithuania; and

Whereas it is the responsibility of the Government of the United States to protect and support its citizens unjustly held captive by foreign governments; Now, therefore, be it Resolved, That it is the sense of the Senate that—

(1) Benedict Scott be released from prison and be allowed to emigrate to the land of his birth, if he so chooses, and

(2) the Senate urges the President, the Secretary of State and the United States Delegation to the Madrid Conference on Security and Cooperation in Europe to express at each opportune moment and in the strongest terms the opposition of the United States to the imprisonment of Benedict Scott.

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the resolution was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

## SOCIAL SECURITY

Mr. MITCHELL. Mr. President, the President has made clear his true intentions in proposing to cut social security benefits. As part of his plan to reduce the deficit in fiscal year 1982, he has renewed his proposal to delay by months the cost-of-living increases for social security recipients. This proposal lacks the support of the American people and the Congress, and I call on the President to withdraw it.

I have for months said that the true motivation for the President's social security proposals was to balance the budget, not to correct the problems with social security. Highly pessimistic economic assumptions were used to justify social security reductions, in sharp contrast to the optimistic forecast used in the budget and tax debates.

Inclusion of the proposal to delay cost-of-living increases in the spending reduction package confirms its true purpose.

The administration has failed to make the case for its proposed reductions. The public has not been convinced, nor has the Congress.

A recent Congressional Budget Office study of social security financing firmly refutes the case for the COLA delay. Under CBO's economic assumptions, interfund borrowing, when combined with the reductions in benefits already enacted or part of the President's original budget cuts, is sufficient to solve the short-term financing problem. Even under CBO's pessimistic forecast, the combined trust fund reserves do not fall below critical levels until 1985. The haste with which the President is requesting congressional action is unwarranted.

In direct contradiction to the President's repeated promise, this proposal directly affects the benefits that current retirees will receive. The administration's announcements on social security have needlessly alarmed our retirees and those workers paying into the system. I believe that the President should end his efforts to balance the budget through social security cuts and withdraw his proposal for a delay in the inflation adjustment from consideration by the Congress.

The task facing the Congress is not only to put the social security system on a solid financial basis but also to restore confidence in the social security system which has been shaken by the administration's actions. If the following actions are taken, we would accomplish these objectives.

First, the Congress should reject all efforts to balance the budget by cutting social security benefits. The Senate, in a 96-to-0 vote, has already accepted this in principle. As we approach specific legislation, we should reaffirm this position.

Second, the President should withdraw his proposal to delay by 3 months the cost-of-living adjustment for retirees. This is the most blatant attempt to cut social security to reduce next year's deficit. Faith in Congress ability to handle the financing issue in a fair and effective way would be enhanced by withdrawal of this unwise proposal.

Third, transfer of funds among the three social security accounts should be authorized. This move would resolve the short-term financing problem.

Fourth, the minimum benefit should be restored for those currently receiving the minimum. The capricious termination of the minimum benefit, which was proposed by the administration, has shaken the faith of retirees that the Federal Government will live up to its commitments. According to the CBO figures, this measure could be accommodated without threatening the short-run solvency of the system, once interfund borrowing is allowed.

Fifth, measures to improve the interest earned by the trust fund reserves should be taken. Investment practices followed in the past have resulted in lower-than-average returns. At a time when significant benefit cuts are being debated, we should settle for nothing less than the maximum return on trust fund balances.

## MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Saunders, one of his secretaries.

## EXECUTIVE MESSAGES REFERRED

As in executive session, the Acting President pro tempore laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

## DEVELOPMENTS WITH RESPECT TO DECLARATION OF EMERGENCY IN IRAN—MESSAGE FROM THE PRESIDENT PM 79

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States, together with accompanying papers; which were referred to the Committee on Banking, Housing, and Urban Affairs.

*To the Congress of the United States:*

Pursuant to Section 204(c) of the International Emergency Economic Powers Act (IEEPA), 50 U.S.C. Section 1703(c), I hereby report to the Congress with respect to developments since my report of February 24, 1981, concerning the declaration of national emergency with respect to Iran in Executive Order No. 12170 of November 14, 1979. This declaration and previous actions under it were described in earlier reports submitted to the Congress.

1. Pursuant to my decision, reflected in Executive Order No. 12294 of February 24, 1981, that the January 19, 1981 agreements with Iran should be implemented, the Department of the Treasury, acting under my delegation of authority to the Secretary of Treasury, issued a series of regulations to implement Executive Orders Nos. 12276–12285, signed by President Carter on January 19, 1981, and my Order of February 24. Among other things, these regulations revoked certain trade and financial sanctions against Iran, provided for the transfer of blocked Iranian assets to Iran and to a security account for U.S. claimants against Iran, and suspended certain claims of U.S. nationals against Iran pending review by the Iran-U.S. Claims Tribunal. With the exception of regulations issued July 6 and August 17, which are attached herewith, regulations issued since February 24, 1981 have been provided to Congress in accordance with the National Emergencies Act, 50 U.S.C. Section 1641(b).

2. On July 2, 1981 the Supreme Court in the case of *Dames & Moore* v. *Regan*, 49 U.S.L.W. 4969 (U.S. July 2, 1981) (No. 80-2078), upheld the President's authority to nullify attachments and other judicial orders with respect to assets of Iran, to order the transfer of those assets

pursuant to the agreements with Iran, and to suspend certain claims of U.S. nationals against Iran and Iranian entities.

3. Following the Supreme Court decision and pursuant to certain of the Executive Orders mentioned above, financial assets exceeding two billion dollars held by persons within the United States were transferred to the Federal Reserve Bank of New York in mid-July. The agreements provided that a total of one billion dollars of the assets formerly held by domestic banks was to be transferred to an interest-bearing security account in a foreign bank to be used for payment of Claims Tribunal awards to U.S. nationals against Iran. The remainder of the assets was to be transferred through a foreign bank to Iran.

The technical arrangements for the establishment of the security account were concluded on August 17 by the Central Bank of Algeria, Bank Markazi Iran, the Federal Reserve Bank of New York, and the N.V. Settlement Bank of the Netherlands, a subsidiary of the Netherlands Central Bank. In connection with the arrangements, the U.S. agreed to provide special liquidity support of up to $500 million to the Netherlands Central Bank if lawsuits or other proceedings involving the security account impair the bank's ability to defend the guilder.

On August 18, the funds were transferred by the Federal Reserve Bank of New York to the Settlement Bank. Because of the delay in concluding arrangements for the security account, this transfer was delayed one month from the original transfer date of July 19 contemplated under the agreements.

4. Certain questions concerning the security account which were not resolved in our negotiations with Iran will be referred to the Claims Tribunal, which is expected to decide the issues shortly. These questions concern (1) the disposition of the interest accruing in the funds in the security account; (2) indemnification of the Settlement Bank of the Netherlands and the Netherlands Central Bank, as manager of the funds deposited with the Settlement Bank, against any claims relating to the security accounts; (3) payment of the administrative fees of the Settlement Bank; and (4) payment of settlements with U.S. claimants worked out directly between the U.S. claimants and Iran.

As now constituted, the Claims Tribunal consists of three Iranian, three U.S., and three neutral arbitrators (two from Sweden and one from France). The Tribunal has held preliminary organizational meetings and is expected to receive claims during the three-month period beginning October 20.

5. Other financial questions remain unresolved. U.S banks and Bank Markazi Iran are continuing to negotiate concerning the repayment of nonsyndicated loans and disputed interest from the $1.418 billion escrow account which is held by the Bank of England. To date, no payments have been made out of this account.

6. Pursuant to the January 19 agreements, the transfer of certain nonfinancial Iranian property, such as tangible merchandise, is to be made in accordance with directions from Iran. In many cases, there are questions concerning the exact nature of Iran's interest in these properties. Under my delegation of authority, the Treasury Department is reviewing those cases brought to its attention in which the entitlement of Iran is challenged or in which Iran has not paid claims or charges against the properties. In exercise of its discretion, Treasury has the power to license various transfers involving these properties.

7. Although the hostages have been released and certain assets returned to Iran, several financial and diplomatic aspects of the crisis with Iran have not yet been resolved and continue to present an unusual and extraordinary threat to the national security and foreign policy of the United States. I shall continue to exercise the powers at my disposal to deal appropriately with these problems and will continue to report periodically to Congress on significant developments.

RONALD REAGAN.

THE WHITE HOUSE, *September 22, 1981.*

## MESSAGES FROM THE HOUSE

At 2:37 p.m., a message from the House of Representatives, delivered by Mr. Berry, one of its reading clerks, announced that the House has passed the following joint resolution, without amendment:

S.J. Res. 65. Joint resolution proclaiming Raoul Wallenberg to be an honorary citizen of the United States, and requesting the President to ascertain from the Soviet Union the whereabouts of Raoul Wallenberg and to secure his return to freedom.

The message also announced that the House has agreed to the following concurrent resolution, in which it requests the concurrence of the Senate:

H. Con. Res. 106. A concurrent resolution to provide for the printing of the brochure entitled "How Our Laws Are Made".

## HOUSE CONCURRENT RESOLUTION REFERRED

The following concurrent resolution was read, and referred as indicated:

H. Con. Res. 106. A concurrent resolution to provide for the printing of the brochure entitled "How Our Laws Are Made"; to the Committee on Rules and Administration.

## APPLICATIONS CALLING FOR CONSTITUTIONAL CONVENTIONS

(Applications calling for a constitutional convention, received since 1974, are as follows:)

ABORTION

State, date received by the Secretary of Senate:
Alabama, May 7, 1980.
Arkansas, May 17, 1977.
Delaware, June 9, 1978.
Georgia,[1] March 8, 1979.
Idaho, March 21, 1980.
Indiana, February 22, 1977.
Kentucky, March 22, 1978.
Louisiana,[2] July 22, 1976.
Massachusetts, May 23, 1977.
Mississippi, February 26, 1979.
Missouri, May 5, 1975.
Nebraska, May 3, 1978.
Nevada, June 25, 1979.
New Jersey, April 5, 1977.
Oklahoma, April 24, 1980.
Pennsylvania, April 25, 1978.
Rhode Island, May 17, 1977.
South Dakota, April 19, 1977.
Tennessee, May 1, 1980.
Utah, May 2, 1977.

[1] Adopted by Georgia House of Representatives only.

[2] Received by U.S. House of Representatives only.

BALANCED BUDGET

State, date received by the Secretary of the Senate:
Alabama, March 13, 1979.
Arizona, April 10, 1979.
Arkansas, March 8, 1979.
Colorado, April 5, 1979.
Delaware, February 25, 1976.
Florida, March 1, 1979.
Georgia, February 6, 1976.

Louisiana, July 17, 1979.

WITHHOLDING OF FEDERAL FUNDS

Arizona, May 14, 1980.

## REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. DOMENICI, from the Committee on the Budget, without amendment and without recommendation:

S. Res. 203. A resolution waiving section 402(a) of the Congressional Budget Act of 1974 with respect to the consideration of S. 10.

By Mr. HATFIELD, from the Committee on Appropriations, with amendments:

H.R. 4121. An act making appropriations for the Treasury Department, the U.S. Postal Service, the Executive Office of the President, and certain Independent Agencies, for the fiscal year ending September 30, 1982, and for other purposes (Rept. No. 97–192).

## EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. ROTH, from the Committee on Governmental Affairs:

Charles A. Bowsher, of Maryland, to be Comptroller General of the United States for a term of fifteen years.

THE NOMINATION OF CHARLES A. BOWSHER

REPORT TO THE SENATE

The Committee on Governmental Affairs, to which was referred the nomination of Mr. Charles A. Bowsher, of Washington, D.C., to be the Comptroller General of the United States, having considered the same, reports favorably thereon and recommends that the nomination be confirmed subject to the nominee's commitment to respond favorably to requests to appear and testify before any duly constituted committee of the Congress.

SUBMISSION OF NOMINATION

The Senate formally received the nomination of Charles A. Bowsher, of Washington, D.C., to be the Comptroller General on August 19, 1981. The nomination was subsequently referred to the Committee on Governmental Affairs.

EDUCATION AND EXPERIENCE OF MR. BOWSHER

Mr. Bowsher spent his undergraduate years at the University of Illinois, where he finished with a Bachelor of Science Degree in 1953. He then studied Business Administration at the University of Chicago. He was granted an M.B.A. in 1956. In 1957, the nominee was certified as a Public Accountant.

After receiving his degree from the University of Illinois, and while pursuing his Masters at the University of Chicago, Mr. Bowsher held two different positions. In 1953, he worked with the Internal Audit Staff of the Chrysler Corporation for a short period of time before joining the U.S. Army as a private. He was in the Army from 1953 until 1955, when he left the service with a rank of Private First Class.

Mr. Bowsher has spent the majority of his career with Arthur Andersen & Company. He commenced his service with the firm in 1956, and became a partner in 1967. At that time he was working with the Chicago office. In 1967 he left the firm to come to Washington to serve as the Assistant Secretary of the Navy for Financial Management with the Johnson Administration. He remained in that position through the early years of the Nixon Administration until returning to Arthur Andersen in 1971.

Mr. Bowsher is married to the former Mary C. Mahoney. They have two children—Kathryn who is now 16 years old and Stephen, who is presently 13.

COMMITTEE ACTION

Under procedures established by the Committee for considering nominations, a detailed biographical and financial information questionnaire was submitted to Mr. Bowsher. The Committee also requested that the nominee respond to pre-hearing questions in writing. These questions concerned both substantive policy matters relating to the mission of the General Accounting Office and specific actions Mr. Bowsher intends to take as Comptroller General of the U.S. Both the biographical information and the responses to the prehearing questions are appendices to this report. It is the policy of the Committee that a nominee's financial disclosure statement is not reproduced or published. However, this information is retained in the Committee offices for inspection by the public.

Also enclosed as an appendix to this report is a description of the duties of the Comptroller General and Summary of the duties and activities of the General Accounting Office.

Committee procedures call for an independent review of a nominee's background. This includes a review of any investigative reports compiled concerning the nominee, including the Federal Bureau of Investigation's summary report on the background of the nominee and an interview with the nominee. All of these requirements were met during the Committee's investigation, and a confidential staff report, which concluded that no further investigation is necessary, was filed with the Chairman and the Ranking Minority Member and made available to all other Members of the Committee.

On September 17, 1981, Mr. Bowsher appeared before the Committee on Governmental Affairs to testify on his appointment to be Comptroller General of the United States.

COMMITTEE RECOMMENDATION

Based on its review of the nominee's responses to the biographical and financial questionnaire, the FBI investigative report, the responses to the prehearing questions, personal interview with the nominee, and the testimony and responses to questions at the hearing itself, the Committee believes that Mr. Bowsher is well qualified by reason of training, education, experience and integrity to be the Comptroller General of the United States.

ROLLCALL VOTE IN COMMITTEE

On September 18, the Chairman took a vote to recommend that the nomination of Charles A. Bowsher to be Comptroller General of the United States be confirmed. The response was as follows:

Yeas: Senators Roth, Percy, Stevens, Cohen, Durenberger, Mattingly, Rudman, Eagleton, Chiles, Nunn, Glenn, Sasser, Pryor, and Levin.

Nays: 0

A. BIOGRAPHICAL INFORMATION

1. Name: Charles A. Bowsher.

2. Address: 4503 Boxwood Road, Washington, D.C. 20016.

3. Date and Place of Birth: May 30, 1931, Elkhart, Indiana.

4. Marital Status: Married. Mary C. Mahoney.

5. Names and ages of Children: Daughter—Kathryn M. Bowsher—16 years; Son—Stephen C. Bowsher—13 years.

6. Education: University of Illinois, Bachelor of Science, 1953; University of Chicago, M.B.A., 1956; Certified Public Accountant (CPA), 1957.

7. Employment Record: 1953—Chrysler Corporation, Internal Audit Staff; 1953–55—U.S. Army; 1956–67—Arthur Andersen & Co., Partner, 1967–69—West Washington, Chicago, Ill.; 1967–71—Assistant Secretary of the Navy (Financial Management), The Pentagon, Washington, D.C.; 1971–81—Arthur Andersen & Co., Partner, 1666 K Street, N.W., Washington, D.C.

8. Government Experience: 1953–55—U.S. Army (Private to Private First Class); 1967–71—Assistant Secretary of the Navy (Financial Management).

In November, 1967, I was nominated by President Johnson as Assistant Secretary of the Navy (Financial Management). I was confirmed by the U.S. Senate and assumed that office on December 18, 1967. I was reappointed by President Nixon and served until June 30, 1971, when I resigned to return as a Partner of Arthur Andersen & Co.

As the Assistant Secretary of the Navy (Financial Management), I had the responsibilities of the Comptroller and Chief Financial Officer. This included direct supervision of an annual budget of over $20 billion, a budget department of 250 people, an accounting and systems department of 4,500, and an internal audit staff of 500. In addition, I had the coordination responsibility for both the Senate and House Appropriations Committee, the Office of Management and Budget, and the General Accounting Office.

1971–81—As Managing Partner of Arthur Andersen & Co.'s Government Services Industry Program and Chairman of the American Institute of Certified Public Accountants (AICPA), Executive Committee on the Federal Government, I have spent a decade working with and advising government leaders on financial and general management problems at the national, state and local levels.

I have been instrumental in Arthur Andersen's efforts to encourage public discussion on the need for sound financial reporting within the public sector. In 1975, Arthur Andersen & Co. initiated a research project to review the financial reporting of the Federal government. A summary of findings, conclusions, and an illustrative set of consolidated financial statements for the United States Government was published in a booklet entitled Sound Financial Reporting in the Public Sector. In 1976, the firm published a second booklet, entitled Sound Fiscal Management in the Public Sector, which raises some of the questions and issues that should be considered by public officials, civic groups, and concerned citizens to assess whether their government has adequately met the requirements of sound fiscal management. I was the supervisory partner on both of these efforts.

I had firm-wide responsibility for engagements involving compliance with the new election laws and supervised the writing and publication of the firm's booklets, Financial Management Systems for Political Campaigns and Audit Criteria for Federal Political campaigns. During the Presidential campaign of 1976, Arthur Anderson & Co. was appointed accountants and auditors for both President Ford and President Carter. In 1978, we performed a review of the audit process for the Federal Election Commission. In 1980, we assisted President Carter's and President Reagan's campaigns.

I have supervised many professional engagements in the public sector. Two of the more important engagements involved work with New York City and the District of Columbia. Arthur Andersen & Co. was retained to advise the Secretary of the Treasury of the United States on various financial and accounting matters with respect to the "New York City Seasonal Financing Act." I also supervised the engagement that the firm conducted for the U.S. Senate Committee on the District of Columbia.

Since 1971, I have also supervised engagements for the Department of Interior, the Department of the Treasury, the Price Commission (Phase II), the Federal Energy Office (FEO), the General Accounting Office (GAO), the Agency for International Development (AID), the Federal Reserve System and AMTRAK.

I served on the Advisory Committee to the Secretary of Health, Education and Welfare (HEW) and Commissioner of Social Security on Medicare Administration in 1973–74.

I served as a member of the Secretary of the Navy's Navy and Marine Corps Acquisition Review Committee (NMARC), and a member of the Deputy Secretary of Defense Acquisition Advisory Group in 1974–75.

I served on an Advisory Committee to the

Administrator of the General Services Administration (GSA) in 1978.

9. Business Relationships: I have been associated with Arthur Anderson & Co. for 25 years (as a Partner since 1967) except for the three and one-half year period I served in the Federal government as Assistant Secretary of the Navy.

Our firm and professional ethics prohibit partners of CPA firms serving as directors/officers of other business oganizations.

During my career with Arthur Andersen & Co., I have served as a consultant to many large, medium and small business clients, plus a significant number of non-profit clients.

10. Memberships: American Institute of Certified Public Accountants (AICPA); Chairman—Federal Government Executive Committee; Chairman—Subcommittee, Relations with the General Accounting Office (GAO); Chairman—Subcommittee, Federally Assisted Programs, National Security Industrial Association (NSIA); Trustee, Member of Executive Committee; and Chairman, Finance Committee.

Alumni Council—University of Chicago Graduate School of Business; Alumni Board—Pi Kappa Alpha (University of Illinois); Past Chairman of Board of Visitors—Defense Systems Management School; Past Member of Public Sector Advisory Committee, Metropolitan Washington Board of Trade.

11. Political affiliations and activities: I have not held office with a political party nor have I been a candidate for any public office. Arthur Andersen & Co. has been the auditors for the Republican National Committee and the Democratic National Committee since 1973. In addition, the firm has provided professional services to Republican and Democratic candidates in Presidential, Senate and House races.

12. Honors and Awards: Navy Distinguished Public Service Award (1969 and 1971); Department of Defense Distinguished Public Service Award (1971).

13. Published Writings: The Federal Budget, Cost-Based in the 1980's (With Arthur Schoenhaut and Rear Admiral Stanley S. Fine, USN (Ret.)).

Federal Taxation of Political Activities (1980);

Financial Management Guide for Federal Elections (1979);

Some Thoughts on Financial Audits in the Public Sector (1979);

The Wage/Price Program (1979);

Sound Fiscal Management in the Public Sector (1976);

Sound Financial Reporting in the Public Sector (1975);

Federal Tax Aspects of the Political Process (1975);

Audit Criteria for Federal Political Campaigns (1974); and

Financial Management System for Political Campaign (1972).

14. Speeches: The Federal Budget—Cost-Based in the 1980s; Some Thoughts on Financial Audits in the Public Sector; Sound Financial Reporting in the Public Sector; Sound Fiscal Management in the Public Sector; Financial Management Guide for Federal Elections; and Federal Taxation of Political Activities.

15. Selection: a. Do you know why you were chosen for this nomination by the President?

I was chosen for the Comptroller General position from a list of eight candidates selected by the Congressional Commission. I believe the President reviewed the background and qualifications of all eight candidates and selected me on the basis of my qualifications.

b. What do you believe in your background or employment experience affirmatively qualifies you for this particular appointment?

I have had twenty-five years of professional experience both in the private sector and in the public sector. I have previously served as Assistant Secretary of the Navy for nearly four years and have served as a consultant an advisor to government at all levels during the past ten years.

---

RESPONSES OF CHARLES A. BOWSHER

I. NOMINATION PROCESS AND POTENTIAL CONFLICTS

*Question 1.* Were any conditions, expressed or implied, attached to your nomination to be the Comptroller General?

Answer. There were no conditions, in any manner or form, attached to my nomination to be the Comptroller General.

*Question 2.* What commitments have you already made with respect to the policies and programs you will attempt to implement as Comptroller General?

Answer. I have made no commitments to any policies or programs I will attempt to implement as Comptroller General. When the President nominated me, however, he stressed the importance of the Office of the Comptroller General and the need for me to objectively assure that, through GAO's work, the government would be better accountable to the public for proper and effective expenditure of their tax dollars. I am committed to that policy, a policy which the past Comptroller Generals have also effectively adhered to.

*Question 3.* Are there any issues involving GAO from which you may have to disqualify yourself? If so, please explain.

Answer. At this time I cannot identify any particular matter that is likely to pose a conflict of interest. However, my duties as Assistant Secretary of the Navy (Financial Management) from 1967–1971 and as managing partner of Arthur Andersen's Government Services Industry Program brought me into close contact with the fiscal and procurement problems of various Federal agencies and State and local governments. To the extent that GAO audits may address those particular problem areas, it is possible that my personal involvement in a particular matter may give rise to an appearance of a conflict of interest.

If confirmed as Comptroller General, I would recuse myself from direct involvement in, or giving advice on, the specifics of any particular matter in which I participated personally and substantially as Assistant Secretary of the Navy and as a partner in Arthur Andersen & Co. I do not believe that this recusal need extend to matters of a general policy or rule making character, nor do I anticipate that the necessity to recuse myself from a particular matter will interfere with my fulfilling the obligations of the Office of the Comptroller General.

Insofar as my retirement and insurance arrangements with Arthur Andersen are concerned, I believe that those continuing financial interests are too remote to affect the integrity of my service as Comptroller General. Accordingly, I have requested a waiver from Mr. Fielding, Counsel to the President, as authorized by law, to obviate any conflict of interest impilcations rgearding any particular matters in which I may become involved which concern Arthur Andersen & Co.

*Question 4.* What special talents do you feel will make you particularly effective as Comptroller General?

Answer. I have had twenty-five years of professional experience both in the private sector and in the public sector. I have previously served as Assistant Secretary of the Navy for nearly four years and have served as a consultant and advisor to government at all levels during the past ten years.

II. RESPONSIBILITIES OF THE COMPTROLLER GENERAL

*Question 1.* What do you believe are the most important functions of the position to which you have been nominated?

Answer. The fundamental underlying strength of GAO as an important agency of government lies in its credibility as an objective, non-partisan analyst and reporter of conditions surrounding government program administration and design. I believe the most important function of the Comptroller General is to assure that the GAO effectively assists the Congress in its oversight of the management of government operations while maintaining the public's confidence and respect in the non-political, objective nature of the analyses provided under his leadership.

There are many other critical functions of the Comptroller General:

Being the final arbiter within government as to the legality of a wide range of public expenditures.

Prescribing accounting principles and standards and related requirements for executive agencies and approving executive agency accounting systems.

Being a spokesman in various forms for efforts to improve generally the management of government institutions.

Being the leader of the dedicated core of men and women of the GAO and the concomitant responsibility to assure that the GAO staff is the best possible to effectively fulfill its mission.

All these functions need to be carried out in a way that enhances the usefulness of the GAO to the Congress as an objective voice within government reporting on how well the government works.

*Question 2.* How do you envision the relationship and responsibilities of GAO to a) the President b) the Congress c) other executive branch agencies?

Answer. GAO must continually concern itself with how the executive branch carries out congressional intent. The relationship of GAO to the President is essentially through his administrative agencies. GAO has to be able to carry out effective, objective analyses of the operations of the executive branch to provide the Congress information that it can use in its various legislative roles. In assessing the extent to which agencies carry out congressional intent GAO should also try to bring about improvements in the operations of the federal government. Thus, in its relations with the executive branch GAO must operate in an arms-length fashion to assure that it can be an objective, constructive critic. But, if GAO is to be successful in bringing about improvements in government, it must also be practical and relevant regarding the problems and issues faced by the executive branch.

It is essential that GAO officials have interaction with executive branch officials. While GAO has no responsibility to implement executive branch policies and programs, it must have an indepth understanding of the problems related to implementation of such matters so that it can be an effective mechanism for improving the operations of the government. A positive, constructive, yet arms-length relationship with the executive branch of government facilitates GAO's mission. For example, to be most effective, GAO's standards for accounting and auditing need to be developed in a spirit of partnership with the agencies that must use them. To help improve management in the government GAO needs to have good working relationships with OMB and to continue its support for such efforts as the Joint Financial Management Improvement Program.

GAO is an organization that reflects the checks and balances the founding fathers envisioned when they drafted the constitu-

tion. Yet, even with the necessary checks and balances among the three branches of government, we must keep in mind that we all work toward the common good. I believe the relationships that the GAO should have with executive branch should take place within that broad fundamental precept of our government.

I understand that GAO has a good, close working relationship with congressional committees and their staffs and I would continue to encourage GAO staff to maintain those relationships. Whether by request of a committee or Member, or pursuant to GAO's basic statutes, GAO should strive to meet the current and foreseeable needs of the Congress. Thus, it is fundamental that GAO cannot be an effective support agency of the Congress unless it is carrying out work that is directly related to the responsibilities provided it in its basic statutes and which is useful to the Congress.

My reading of GAO's basic legislation indicates that the Congress envisioned the GAO being able to provide it a wide range of legal, auditing, and evaluative services all related to enabling the Congress to more effectively carry out its legislative, appropriation, and oversight responsibility. The statutes also make clear that GAO is to be a non-partisan, objective reporter to the Congress. Thus, the GAO has a responsibility to the Congress to assure that its reports and analyses are well-reasoned and objective, and can be used by all parties to a debate on an issue to provide them useful information with which to reach decisions.

*Question 3.* What do you feel the most important accomplishments of GAO have been in the past several years

Answer. Not having been intimately involved with the General Accounting Office it is difficult for me to answer this question other than on the basis of my general knowledge of the GAO and its role in government. But, as an observer of the operations of government it has been clear to me that GAO has been an effective force in improving the operations of the government. It is also clear that as the Congress has become more sophisticated in its analyses of legislative matters, the GAO has played a more extensive role in assisting the Congress to effectively fulfill its responsibilities. GAO has also been an effective, constructive critic of government operations and appears to me to have played an important role in bringing about improvements in government operations by publicly reporting on issues and problems. Its ability to provide the Congress and the public extensive information on the way in which government programs have operated has, in no small part, been an effective catalyst to spur government officials to correct many inefficiencies that otherwise may not have even come to their attention.

*Question 4.* What do you feel the greatest shortcomings are in the record of the General Accounting Office?

Answer. Again, it is difficult for me to comment in depth about this matter because I have not been intimately involved with the operations of the GAO. But, as a former official in the Department of Defense and through other readings and contacts, I already know of two concerns that I intend to address. One is to provide the Congress better assurance that GAO effectively follows up on recommendations it makes to the executive branch. GAO should not view itself merely as a reporter of events. It should have a continuous concern to assure that its work results in more effective operations of the government.

GAO also needs to assure that its work is timed to key in closely to the decisionmaking timeframes of the Congress or indeed the executive branch officials who must act on GAO's work. I intend to give this matter great attention because GAO cannot be an effective force in government if the information it is developing is not presented to either the congressional or executive officials within the timeframes that are most useful to them.

*Question 5.* You have had extensive experience in the private sector. What do you feel the public can learn from non-government organizations?

Answer. Two key factors to success in the private sector are the efficient use of your resources and delivering a quality product on a timely basis. Timeliness and quality of the reports are two areas in which I intend to devote considerable time during my first few months as Comptroller General. I believe it is important that the General Accounting Office and all government agencies have as great a concern about productivity as the private sector. It is important that we use valuable resources, namely our people, on an efficient and effective basis. I hope to determine if we can prepare our reports in a more concise manner and in a format that would be more readable to the members of Congress and to the public.

I also plan to ask the staff to be alert to present government regulations and government operations that place an unduly burdensome cost on the private sector. Government regulation is certainly appropriate in certain areas of the private sector, but even when it is necessary, it should be done in a manner that requires the minimum cost to our private firms.

III. THE FUTURE OF GAO

*Question 1.* Do you, as the nominee for the position of Comptroller General, have any plans to reorganize the General Accounting Office? If yes, please explain.

Answer. I am not yet familiar enough with the organization or operations of the GAO to state whether or how I will reorganize the Office. I intend to carefully review the operations of the GAO before I implement any major changes.

*Question 2.* Congress relies extensively on the investigations of the General Accounting Office and its reviews of all programs and procedures of all government agencies. What do you feel can be done to make these investigations even more valuable?

Answer. It is critical to me that GAO's work be of value to the Congress. It must be timely, clearly written, and concise in terms of the actions it recommends. If the Members of the Committe have any other views or suggestions that they believe could make GAO's work more valuable to them I would welcome the opportunity to discuss them.

*Question 3.* There has been some problem in the past with fragmentation within the GAO. It seems at times that many people and many different departments have been looking into the same issue at the same time. Do you feel that this is a problem? What do you think could be done to help correct the problem?

Answer. It does appear that there have been some problems with the way GAO has addressed certain areas, and I am concerned with this problem. It is obvious that the issues and problems that the government deals with are very complex. It is not always possible to clearly distinguish whether a certain problem or issue clearly falls within the jurisdiction of a particular entity within an organization. For example, the government's concern about energy shortages involves not only the Energy Department policies but tax policies, land development policies, defense issues, and foreign policy issues, just to mention five. The Executive and Legislative branches both have problems focusing on the interrelationship. Some overlap is necessary to recognize and understand the interrelationships.

I will try to assure that GAO's efforts are effectively coordinated so that its resources are deployed in an efficient manner.

*Question 4.* Timeliness is, in fact, one of the biggest complaints heard about GAO. What do you plan to do to improve the response time of GAO to congressional requests?

Answer. As I said in a response to an earlier question, even on the basis of my general knowledge of the GAO, it is apparent that many people are concerned about its ability to respond to the information needs of the Congress in a timely manner. I intend to give this matter close attention. It is my understanding that GAO's most frequent form of communication with the Congress is informal briefings and meetings that its staff have with the staff of the Committees and Members. I strongly endorse the continued efforts to explore different ways by which GAO can communicate its findings to the appropriate congressional Committees and Members so that they can have the information when it is most useful to them.

The time it takes to do a job is secondary compared to delivery of information on time for decisionmaking. It often takes time to do high quality work that involves gathering and analyzing extensive empirical data. Such efforts have to be well planned so they are completed on time for the decisionmakers. I intend to examine closely how GAO carries out its work to see if there are actions that could be taken to streamline the policies and procedures of the GAO so that its work can be most responsive to the needs of the Congress.

*Question 5.* We have entered an era in which federal spending is likely to be reduced rather than expanded. If the demand for fiscal restraint continues, GAO's role must change from that it has had in previous years when federal program funding levels were continuously rising. What is GAO's role in this period of reduced federal funding levels?

Answer. GAO, pursuant to its basic statutes, will always have an important role to play in terms of advising the Congress how efficiently and effectively federal programs are being carried out, regardless of the level at which they are funded. The current debate about spending levels deals with how much the budget should be increased, not by how much it could actually be reduced. So GAO will continue to have an important role in assisting the Congress oversee the way the executive branch spends an increasing, absolute amount of tax dollars.

However, there will undoubtedly be a need for GAO to reassess its audit and evaluation approach if more federal funds are provided to states and local governments through the block, as opposed to categorical, grant method. GAO's primary responsibility should be to serve the Congress in its oversight role and to carry out audits that are consistent with the audit authority granted GAO in the statutes. I would expect the GAO staff to discuss with the appropriate congressional committees their concerns and information needs before undertaking work in programs that have undergone drastic changes either in terms of funding levels or in the way in which funds are provided.

I can assure you that GAO will not consider that it is business as usual when it undertakes audits and evaluations of any new block grant programs. GAO should be attentive to the changing relationships that may evolve between the federal and state and local governments. But GAO's concern that government be accountable to the public for the expenditure of their tax dollars should not change. What may well change is how that accountability is defined and the focus of responsibility for assuring that accountability. I look forward to working with the Congress to design accountability requirements tailored to accomplishing the goals

articulated by the statutes and the committees of the Senate and the House.

*Question 6.* GAO has an extensive clearance process for its reports to Congress. This enormous review process has two effects; it increases the time necessary for preparation of GAO reports and it encourages the development and release of possibly less critical reports. Is this matter a serious problem in your view and if so, what are your plans to change the process?

Answer. It is difficult to give a detailed answer to this question without having been involved in the operations of the General Accounting Office. However, I am concerned if GAO has a clearance process for its reports that adversely affects the presentation of timely information to the Congres and intend to give this matter close attention.

I am not aware that there has been any substantiation to concerns that GAO's review process results in reports that are less critical than they might have otherwise been. Indeed, I am aware that the Brooks Committee review of GAO in 1978 noted that in the cases the staff traced they found no instances where changes or deletion of material dictated by higher level or other review officials resulted in watering down GAO reports. The Committee did report instances in which supplementation or strengthening of findings resulted from input triggered by the review process.

My concern would be that any review process assure that the findings, conclusions, and recommendations are supported by the evidence brought to bear. GAO should say no more and no less than what it can support, and should have the minimum levels of review needed to produce quality, timely products. I can assure the Committee that these matters will be of continuing concern to me.

*Question 7.* There have been several studies which have described the potential conflicts between GAO, CRS, and other congressional support agencies. What do you see as GAO's role in comparison to CRS and OTA? How might coordination and potential conflict between these agencies be minimized?

Answer. The legislative branch support agencies, the Congressional Budget Office, Congressional Research Service, General Accounting Office, and Office of Technology Assessment, all perform different roles for the Congress. In general, GAO evaluates the effectiveness and efficiency of existing programs and agencies on the basis of information and evidence gathered at the site of delivery of programs, CBO analyzes alternative fiscal, budgetary, and programmatic policies, OTA provides assessments of the impact of technological applications, and CRS provides information, reference and research work on a broad range of issues. The other legislative support agencies usually respond exclusively to requests of Committees and Members. The Congress looks to GAO as the independent evaluator of the operations, programs, and management of the executive branch.

I understand that, in response to congressional concerns, the agencies have developed a series of processes to coordinate their respective efforts. The best way to assure that there is effective coordination is for there to be good communication among the staff of the four agencies working in the same general areas. I intend to meet soon with the heads of the other three agencies to obtain their views regarding the adequacy of coordination and cooperation to assure that potential conflicts are minimized.

*Question 8.* GAO has concentrated on assessing the efficiency of programs and ways to improve administrative process more than on evaluating results and the consequences of such findings. Do you think that this approach presents any problems? If so, how do you believe the problems should be approached?

Answer. It is relatively easier to identify and deal with problems of administrative efficiency and to recommend and achieve actions to correct them than it is to identify and correct problems uncovered when reviewing the results of programs. Problems related to program results tend to be more directly related to program goals and objectives, as well as to program designs—areas that are often difficult to change.

But GAO should do both types of jobs. The information the Congress needs at various times varies with the decisions it must make. During the appropriation process it is essential that GAO be able to provide the appropriate committees information on how program efficiencies can be realized so federal funds can be spent more effectively. During the program authorization and oversight process it is essential for GAO to be able to provide the appropriate congressional committees information concerning the results of programs and what alternatives may be available to the Congress to better realize legislative intent of the programs being reviewed.

I shall assess GAO's efforts to assure that the Office is capable of effectively meeting the diverse information needs of the Congress as it deals with the complex issues of today. I do not believe GAO should concentrate on any single type of effort. Rather, it must be able to meet whatever demands and responsibilities the Congress gives to it so the Congress can more effectively carry out its responsibilities.

*Question 9.* GAO has evolved from an agency with almost sole interest in accounting and bookkeeping to a much more diverse agency with an active role in overall good government. Do you expect this trend to continue, or do you feel that GAO should return its focus to its more basic accounting functions?

Answer. I believe it would be a mistake to turn the clock back and have GAO focus solely on its basic accounting functions. The nature of government and the issues that must be dealt with have changed greatly since the GAO was established in 1921. GAO's role, as defined in various statutes, has evolved along with the way the Congress deals with problems and issues. Were GAO to narrow its focus, the Congress would lose a valuable source of information and analysis to deal with the complex issues facing it. But, it is very important that GAO increase its efforts to bring about improved financial management in the executive agencies. I intend to pay special attention to GAO's efforts in this area.

IV. RELATIONS WITH CONGRESS

*Question 1.* As you well know, GAO is a part of the legislative branch of the government. Do you feel that there is any lack of independence from the Congress due to this close association? In the event that a Member of Congress were to make a request, and that particular person is known to have a special interest in the given area, do you feel that the substance of the report could be influenced, especially since GAO is dependent upon the Congress for its funding?

Answer. GAO initiates many jobs at the request of congressional committees or Members. Thus, it is appropriate that Members be able to influence the subjects GAO studies. But how GAO studies a subject and what it reports as its findings, conclusions, and recommendations, are dictated by GAO policies and procedures. To have it any other way would compromise the objective, nonpartisan nature of the GAO.

*Question 2.* As you know, this committee has oversight jurisdiction of the General Accounting Office and we intend to exercise this responsibility.

Do you agree without reservation to respond to any reasonable summons by this committee to provide such information as required and to appear and testify if you are confirmed?

Answer. Yes.

---

THE OFFICE OF THE COMPTROLLER GENERAL

The Comptroller General is the principal officer of the General Accounting Office, which was created as an arm or agent of the Congress. The Comptroller General is directly responsible to the Congress.

The Comptroller General is appointed by the President with the advice and consent of the Senate. The law provides that the Comptroller General shall hold office for 15 years, and shall be subject to removal only by joint resolution of the Congress for specified causes or by impeachment. The Comptroller General is not eligible for reappointment.

Pursuant to provisions of the General Accounting Office Act of 1980, a new procedure was initiated to nominate the sixth Comptroller General. A congressional commission recommended individuals to the President for appointment to the Office. The commission consists of the Speaker of the House of Representatives, President pro tempore of the Senate, majority and minority leaders of the House of Representatives and the Senate, and the chairman and ranking minority member of the Committee on Government Operations of the House of Representatives and of the Committee on Governmental Affairs of the Senate. The commission was required to submit to the President for consideration the names of not less than three persons.

THE GENERAL ACCOUNTING OFFICE

The General Accounting Office (GAO) headed by the Comptroller General of the United States, was created by the Budget and Accounting Act in 1921, independent of the executive departments, to assist the Congress in its legislative and oversight functions. GAO, on the basis of on-site evaluations of how government programs operate, provides the Congress information and recommendations to help it determine (1) the levels at which Federal programs should be funded, (2) how programs could be operated more efficiently and effectively, and (3) whether programs are achieving intended results. GAO's basic responsibilities have been modified by numerous statutes since 1921.

The more significant of these include the Corporation Control Act of 1945 (31 USC 841 et seq.), the Legislative Reorganization Act of 1946 (31 USC 60), the Federal Property and Administrative Services Act of 1949 (40 USC 486–487), the Accounting and Auditing Act of 1950 (31 USC 65 et seq.), the Legislative Reorganization Act of 1970 (31 USC 1151 et seq.), the Congressional Budget and Impoundment Control Act of 1974 (31 USC 1400 et seq.), and the General Accounting Office Act of 1980 (Pub. L. 96–226 amending 31 USC 42, 53, 54, 67).

PRINCIPAL FUNCTIONS

As a legislative branch agency, and pursuant to provisions of law, the General Accounting Office performs the following principal functions:

Audits and Evaluations of Programs, Activities, and Financial Operations of Federal Departments and Agencies and their Contractors and Grantees:

GAO is required by its basic statutes to review the operations of essentially all Government agencies. GAO is also required by statute to perform audits and evaluations at the request of Committee Chairmen. Thus, GAO has the dual role of directly assisting the Congress through requested efforts as

well as independently auditing and evaluating Federal agencies and programs to provide the Congress information on their economy, efficiency, and effectiveness.

GAO's audits and evaluations answer questions on how Federal resources are managed, controlled and accounted for; how economically programs are carried out; and whether they are meeting intended objectives.

Where practical, or appropriate, reports on GAO audits and evaluations include recommendations to the Congress and to executive branch agencies on how the economy, efficiency or effectiveness of Federal programs can be improved.

To carry out its audit and evaluation responsibilities, GAO representatives are authorized broad access to books, documents, papers and records. The General Accounting Office Act of 1980 strengthened GAO's authority to enforce its statutory right of access to records at both Federal agencies (through litigation authority) and private contractors (through subpoena authority) (Section 102 of Pub. L. 96–226 amending 31 USC 54).

Substantive Support to Congressional Appropriations, Authorization and Oversight:

Pursuant to law, GAO provides advice and assistance to congressional committees to assist them in fulfilling their legislative and oversight responsibilities. At the request of a Committee Chairman, the Comptroller General or other GAO representatives testify on proposed legislative actions, relevant GAO reports or other Office issuances, and provide program-related questions to ask of prospective witnesses.

On request, GAO provides committees with comments on proposed legislation or proposed changes in legislation and assists in developing statements of legislative objectives and goals. Having firsthand knowledge of agency programs and activities, GAO objectively advises how a program can be expected to work out, whether a better alternative exists to meet program goals, and how the attainment of goals can best be evaluated.

GAO's reports to the Congress include recommendations for corrective legislation where GAO audit and evaluation work discloses that program economy, efficiency or effectiveness would be improved by changes to legislation.

Pursuant to provisions of law, GAO works with committees and Members of Congress to identify their needs for fiscal, budgetary, and program related information. It works with the Congressional Budget Office, the Treasury and the Office of Management and Budget to standardize terminology, definitions and classifications so that executive agency information systems will more directly support Congress' information needs.

Prescribing Accounting Principles and Standards and Approving Federal Agencies' Accounting Systems:

The Comptroller General is required by law to prescribe principles, standards and related requirements for accounting by Federal agencies. The agencies are responsible for developing and maintaining their accounting systems but those systems are to conform with GAO prescribed principles, standards and related requirements.

The General Accounting Office cooperates with the agencies in the development of their accounting systems, reviews those systems for adherence to GAO requirements, and approves them when they are determined to be adequate.

Comptroller General Decisions and Legal Opinions:

The Comptroller General is required by law to render decisions as to the legality of expenditures of public funds to heads of executive departments or independent agencies, or disbursing or certifying officers, who are authorized to apply for a decision upon any question involving a payment to be made by or under them or pursuant to their certification. In addition, many legal questions arise in the audit and settlement work of the General Accounting Office which require determination.

Under certain circumstances, contracting officers may request advance decisions on questions involving the awarding of a contract. Also, any bidder may request a decision on the legality of a proposed or actual award of a contract adversely affecting him.

By law, the decisions of the Comptroller General are final and conclusive on the executive branch of the Government and establish the validity of the individual payment and in some instances, the legality of entire programs.

GAO also issues advisory opinions to committees and Members of Congress to assist Congress in its legislative and oversight functions.

Review of Rescissions and Deferrals:

The Budget and Impoundment Control Act of 1974 requires the Comptroller General to review and report to the Congress the facts surrounding rescissions or deferrals of budget authority by executive agencies. As part of this function, GAO reports impoundments which executive agencies fail to submit to the Congress or submit with an incorrect classification.

Settlement of Accounts of Accountable Officers:

The General Accounting Office is responsible for settling the accounts of disbursing and collecting offices who are accountable for public funds and for making settlements with certifying officers when payments have been improperly certified.

Claims Settlement and Debt Collection:

By provisions of law, GAO settles claims by and against the government when the departments and agencies have not been given specific authority to handle their own claims, and when they involve (1) doubtful questions of law or fact (2) appeals of agency actions or (3) waivers of certain erroneous payments for pay, etc. GAO also endeavors to collect certain debts owed the Government when executive agencies are unable to collect them.

SUMMARY OF GENERAL ACCOUNTING OFFICE ACTIVITIES

Following is a summary of the activities of the General Accounting Office as they appeared in GAO's most recent annual report, which covered the fiscal year ended September 30, 1980; with additional information for fiscal year 1981.

During fiscal year 1980 GAO issued 935 reports on audits or special studies. About 76 percent of these were submitted to the Congress or to its committees and members. In addition, copies of many of the 221 reports addressed to Federal agency officials were also provided to interested committees or members.

During the first ten months of fiscal year 1981, GAO issued 818 reports, of which 77 percent were to the Congress or its committees and members.

For fiscal year 1980, GAO identified an estimated savings of $3.7 billion attributable to its work. It should be noted, however, that these dollar accomplishments, while impressive, are not the total—or even the most important—of GAO's accomplishments. Many savings resulting from management improvements frequently cannot be measured, nor can improvements which make programs work better, but not cheaper. (For fiscal years 1977 through 1980, congressional and agency actions on GAO recommendations saved $14.5 billion, or $20 for each dollar appropriated to GAO.)

Although fiscal year 1981 analyses are not yet completed, GAO already has identified an estimated savings of $5 billion attributable to its work.

In fiscal year 1980, GAO operating divisions received 679 requests from committees and 665 requests from Members for specific work. Nearly every committee and subcommittee has requested GAO to furnish information and assistance. Many requests from committees and Members concern information needed in their legislative and oversight roles. Others involve controversial matters affecting congressional districts and States. GAO also responded to 589 Member requests concerning claims by and against the U.S. Government involving Government contracts, employee pay and allowances, and travel and transportation.

From October 1980 to August 1981, GAO received over 450 requests from committees and 629 requests from Members for specific work. GAO also responded to 218 Member requests concerning claims by and against the U.S. Government involving Government contracts, employee pay and allowances, and travel and transportation.

The Comptroller General and his principal assistants testified before congressional committees on 178 occasions during fiscal year 1980. This compares to 69 occasions, five years ago and only 45, ten years ago. Such an increase recognizes GAO's growing ability and capacity to serve the Congress on critical issues, investigations, and pending legislation.

From October 1980 to August 1981, the Comptroller General and his principal assistants testified before congressional committees on 145 occasions.

On request, 89 GAO staff members were assigned during the fiscal year 1980 to staff of 18 committees and subcommittees. On request, 72 GAO staff members were assigned between October 1980 and August 1981.

During fiscal year 1980, GAO provided 169 reports on pending bills—86 to the Senate, 77 to the House, and 6 to miscellaneous units. Between October 1980 and August 1981, GAO received 170 requests from Congress to comment on pending legislation.

During fiscal year 1980, GAO performed assignments in the United States, Puerto Rico, the Virgin Islands, American Samoa, Guam, Midway and 65 countries. At any time, GAO had about 1,300 assignments underway. During the first ten months of fiscal year 1981, GAO had about 730 jobs underway.

GAO's Special Task Force for the Prevention of Fraud and Abuse, created in 1979, continues to accept reports of alleged fraud and waste on its national hotline. GAO's regional offices also respond to calls of this nature. In fiscal year 1980, about 12,000 calls were received on the hotline. Of these, 2,979 were referred for appropriate action. About 27 percent of the cases referred fell into the category of mismanagement, while 73 percent involved intentional wrongdoing.

From October 1980 through July 1981, the hotline had received 8,100 calls, 1,100 of which were referred for appropriate action.

During fiscal year 1980, GAO's Office of the General Counsel disposed of 5,301 separate legal matters involving procurement law, personnel law, transportation law, general government matters, and special studies and analysis. For the first ten months of fiscal year 1981, the Office handled 4,560 legal matters.

During fiscal year 1980, GAO approved 5 statements of accounting principles and standards in 5 agencies. GAO also approved the designs of 9 systems in 9 agencies. At year's end 297 of the 301 systems subject to GAO approval were covered by approved principles and standards, and 193 of the 301 specific system designs had been approved.

As of September 1981, GAO had approved the designs of six additional complete systems and segments of two others. However, the unapproved systems include some of the most important systems, many of which are in DOD and HHS, which account for the expenditure of over half of the Federal budget.

In fiscal year 1930, GAO settled 6,805 claims for $443.1 million. During the same period GAO disposed of 16,314 debt claims and collected over $4.7 million and granted 1,334 full or partial waivers of repayment of erroneous pay and allowances, out of 1,978 requests—a total of $3.0 million out of $4.3 million. From October 1980 through July 1981, GAO settled 5,346 claims for $404.9 million; disposed of 7,380 debt claims and collected over $2.8 million; and granted 902 full or partial waivers of repayment of erroneous pay and allowances, out of 1,082 requests—a total of $1.8 million out of $2.2 million.

During 1980 GAO continued its participation in the international arena by sponsoring its second International Auditor Fellowship Program. Participants were from Costa Rica, Egypt, Indonesia, Malawi, Malaysia, Nepal, Nigeria, Philippines, Saudi Arabia, Thailand, and Trinidad/Tobago. Over 200 foreign visitors, including many Auditors General visited GAO during fiscal year 1980.

The fiscal year 1980 appropriation for GAO was $204.3 million. Total operating expenses for the period were $197.3 million. Personnel compensation and benefits and travel comprised about 87 percent of the budget.

GAO's fiscal year 1981 appropriation, including the pay raise supplemental, was $221.1 million. Total obligations as of June 30, 1981, were $159.7 million. About 85 percent of that amount was for personnel compensation and benefits and travel.

As of September 30, 1980, GAO had 5,193 employees, a slight increase over last year. Of these, 4,164 or 80 percent were members of its professional staff. Not too many years ago relatively few professional staff members had backgrounds other than accounting, auditing and law. Employees from other disciplines now make up about 52 percent of GAO's staff. As of June 1981 GAO had 5,159 employees, of whom about 81 percent were professionals.

GAO's equal opportunity employment profile continued to improve as it hired, trained, and promoted minorities and women, who comprised 40 percent of its total work force in fiscal year 1980. As of June 1981 about 44 percent of GAO's work force was women and minorities.

From time to time statutes establishing special commissions or councils have named the Comptroller General as a member. In fiscal year 1980 he served as a member of the Advisory Council for the Office of Technology Assessment, the President's Management Improvement Council and the Chrysler Corporation Loan Guarantee Board. During the year the Comptroller General also served as Chairman of the Cost Accounting Standards Board, which completed its activities on September 30, 1980. Public Law 97-35, the Northeast Rail Review Act, makes the Comptroller General a member of the United States Railway Association's Board of Directors.

## INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. SASSER (for himself, Mr. ROBERT C. BYRD, Mr. STENNIS, Mr. RANDOLPH, Mr. HART and Mr. COCHRAN):

S. 1649. A bill to improve the highway bridge replacement and rehabilitation program; to the Committee on Environment and Public Works.

## STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. SASSER (for himself, Mr. ROBERT C. BYRD, Mr. STENNIS, Mr. RANDOLPH, Mr. HART, and Mr. COCHRAN):

S. 1649. A bill to improve the highway bridge replacement and rehabilitation program; to the Committee on Environment and Public Works.

NATIONAL BRIDGE IMPROVEMENT ACT OF 1981

● Mr. SASSER. Mr. President, today I am introducing legislation, S. 1649, to improve the Federal program for bridge repair and replacement. My bill, the National Bridge Improvement Act of 1981, would improve the procedures by which Federal funds for repairing or replacing bridges are allocated. It would also improve information on the condition of our Nation's bridges. These two provisions will make the most of limited Federal dollars available for this effort.

Bridge repair is an enormous task. We now have over 200,000 deficient bridges in the Nation. Repairing or replacing these bridges may ultimately cost $42 billion.

Unsafe bridges cause traffic deaths, injuries, and property damage in the case of bridge collapse, and add to fuel consumption, air pollution, and the cost of goods and services in the case of bridges being posted or closed.

S. 1649 is based on a recently released study by the General Accounting Office which reviewed the national bridge inspection and highway bridge and rehabilitation programs for their effectiveness. The GAO report concludes that current information about bridge conditions is inadequate, and that current procedures and standards necessary to allocate funds to those bridges most in need of attention do not exist. The GAO report stressed the importance of bringing about full compliance with bridge inspection standards and timetables.

Let me proceed to describe the components of the legislation.

The problem of targeting starts with the age and inadequacy of bridge inspection information on the sufficiency of bridge conditions. This bill would require the Department of Transportation to review and encourage the compliance of all States and Federal agencies with current national bridge inspection standards. Moreover, the standards would be improved by the Department. The time lapse allowed between inspections would be decreased, and the methodology for rating the sufficiency of bridges would be more precisely defined.

The targeting of funds within each State, as well as within the national "special bridge" discretionary program, needs to be tightened up. This legislation would revise the criteria for assigning priorities for bridge rehabilitation and replacement. Using these criteria, the Secretary will establish administrative guidelines for the States distribution of apportioned funds—with provisions guarding State administrative flexibility—and establish formal procedures for selecting bridges for funding under the national "special bridge" discretionary program.

In sum, this legislation would revise the criteria, priorities and selection processes for funding allocation so as better to concentrate limited funding on bridges most in need of repair or replacement, in accordance with the original intent of Congress when the bridge repair program and the inspection program were begun in 1968.

There are other provisions which would amend section 144 of the highway portion of the United States Code.

The bill would establish procedures to insure the rapid completion of the national bridge inventory, particularly in the case of bridges maintained by the Federal Government.

The bill would provide for a public information program so that citizens may find out the current status of any bridge they care to know of. Too much time is spent, both in Congress and by concerned citizens, when trying to find out local problems and hazards.

Finally, the bill would provide for a report to Congress to be prepared by the Department of Transportation on the implementation of this legislation. This report shall offer recommendations for improving State distributions of funds, inspection standard compliance, and the allocation of funds to off-system bridges.

This last topic is very crucial to the future of bridge repair fund targeting. Off-system bridges account for about 50 percent of the bridges in the Nation's inventory, and these bridges are generally in worse condition than Federal aid bridges. Many more off-system bridges were posted and closed, and about four times as many had sufficiency ratings of 50 and below. The average sufficiency rating of all off-system bridges was 59 compared to 76 for Federal aid bridges, and these unsafe bridges can effectively isolate rural residents and their businesses. In some cases, schoolbuses, service vehicles including ambulances, and commercial trucks have to be rerouted to avoid inadequate structures.

I believe it is time to consider giving the States more flexibility in targeting bridge funds, once the States are fully informed of their own bridge needs.

I would like, at this time, to thank my colleagues Senator ROBERT C. BYRD, Senator STENNIS, Senator COCHRAN, Senator RANDOLPH, and Senator HART, who have joined me by cosponsoring this legislation. I hope that others will join me in supporting this legislation which will add no more to the budget, but which will help resolve one of our worst transportation problems today.

Mr. President. I ask unanimous consent that the bill and a summary of a GAO report be printed in the RECORD.

There being no objection, the bill and summary were ordered to be printed in the RECORD, as follows:

S. 1649

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That this

Act may be cited as the "National Bridge Improvement Act of 1981".

REFERENCES AND DEFINITIONS

SEC. 2. (a) Except as otherwise specifically provided, whenever in this Act a reference is expressed in terms of a section or other provision, the reference shall be considered to be made to a section or other provision, respectively, of title 23, United States Code.

(b) As used in this Act—

(1) the term "Secretary" means the Secretary of Transportation;

(2) the term "bridge" means a structure on which a highway crosses over waterways, other topographical barriers, other highways, and railroads;

(3) the term "highway" shall have the meaning provided in section 101(a);

(4) the term "Federal-aid system" shall have the meaning provided in section 101 (a);

(5) the term "improvement" includes replacement and rehabilitation;

(6) the term "deficient" means structurally deficient or functionally obsolete;

(7) the term "highway bridge replacement and rehabilitation program" means the highway bridge replacement and rehabilitation program established under section 144; and

(8) the term "national bridge inspection standards" means the national bridge inspection standards established under section 116(d).

FINDINGS AND PURPOSE

SEC. 3. (a) The Congress finds that—

(1) of the more than 515,000 bridges in the United States, almost four out of every ten are deficient;

(2) deficient bridges increase the potential for traffic deaths, injuries, and property damage, and add to fuel consumption, air pollution, and the cost of goods and services; and

(3) the total cost to replace and rehabilitate deficient bridges nationwide is rapidly approaching $42,000,000,000.

(b) The purpose of this Act is to make effective revisions of the highway bridge replacement and rehabilitation program in order to ensure the replacement and rehabilitation of the deficient bridges in the United States in a timely and efficient manner, the fair distribution of Federal funds within the various States for replacement and rehabilitation of bridges, and the compliance of the States with the national bridge inspection standards.

BRIDGE IMPROVEMENT PROGRAM

SEC. 4. The Secretary shall—

(1) revise, consistent with the provisions of section 144 (b) and (c), the criteria for assignment of priorities for bridge replacement and rehabilitation under such section to concentrate Federal funding on bridges most in need of replacement and rehabilitation;

(2) establish a formal procedure for the exercise of the Secretary's discretion in selecting highway bridge replacement and rehabilitation projects for the obligation of funds under section 144(g) to ensure consideration of the costs and benefits of each such project and the classification of the bridge under section 144 (b) and (c) in each such project;

(3) establish administrative guidelines for the distribution of highway bridge replacement and rehabilitation apportioned funds throughout each State under section 144(j) with provisions for flexibility with respect to State administration of the apportioned funds; and

(4) monitor the distribution of highway bridge replacement and rehabilitation program apportioned funds throughout each State under section 144(j).

NATIONAL BRIDGE INSPECTION STANDARDS

SEC. 5. (a) The Secretary shall—

(1) review each State's compliance with the national bridge inspection standards;

(2) revise such standards—

(A) to improve inspection requirements, including decreasing the maximum time lapse between inspections;

(B) to define precisely the factors to be considered and the methods used in rating the condition of bridges; and

(C) to establish a standard for timely processing data resulting from inspections under such standards;

(3) assess the need for greater State and local government authority for inspection of bridges;

(4) encourage the States to take the actions necessary fully to comply with the national bridge inspection standards relating to posting limits on bridges and closing bridges; and

(5) ensure that all Federal agencies maintaining bridges comply with the national bridge inspection standards.

(b)(1) No later than January 1, 1983, the Secretary shall prepare and, to the extent permitted by law, implement a plan of action designed to result in full compliance by the States and local governments with the national bridge inspection standards.

(2) In preparing the plan required by paragraph (1) of this subsection, the Secretary shall consider the imposition of penalties and other sanctions against the States and local governments not fully complying with such standards.

NATIONAL BRIDGE INVENTORY

SEC. 6. Not later than January 1, 1983, the Secretary shall—

(1) establish procedures to ensure the rapid completion of accurate inventories of bridges under section 144 (b) and (c); and

(2) inventory all bridges maintained by Federal agencies.

PUBLIC INFORMATION

SEC. 7. The Secretary shall prepare a plan for a public information program with respect to the weight limits, closings, and hazards, if any, of each bridge. The Secretary shall include in such plan provisions for administration of such program by the States.

REPORT TO CONGRESS

SEC. 8. The Secretary shall prepare and transmit to the Congress, not later than July 15, 1983, a report on the administrative actions taken under the provisions of this Act and the results of such actions. Such report shall include—

(1) recommendations for legislative action as the Secretary considers necessary to ensure that—

(A) the bridges most in need of replacement and rehabilitation are always selected for funding under the highway bridge replacement and rehabilitation program;

(B) there is a fair and equitable distribution of such funding throughout each State; and

(C) the States fully comply with the national bridge inspection standards, and

(2) the Secretary's recommendations with respect to whether the Congress should increase the maximum per centum of apportioned funds which may be expended under section 144(g) for projects to replace or rehabilitate highway bridges located on public roads, other than on a Federal-aid system.

---

COMPTROLLER GENERAL'S REPORT TO THE HONORABLE JAMES R. SASSER, U.S. SENATE

BETTER TARGETING OF FEDERAL FUNDS NEEDED TO ELIMINATE UNSAFE BRIDGES

The United States has more than 500,000 bridges and slightly over 200,000—or almost 4 out of every 10 bridges—are deficient. The Federal Highway Administration currently estimates that it will cost $41.1 billion to rehabilitate or replace these bridges.

National bridge inventory data shows that about 98,000 bridges are structurally weak or unsound and must be closed, restricted to lighter vehicles, or immediately rehabilitated to prevent further deterioration and collapse. The other 102,000 deficient bridges are functionally obsolete because they are narrow, have inadequate underclearances, have insufficient load-carrying capacity, or are poorly aligned with the roadway and can no longer safely service today's traffic. In total, it is reported that about 120,000 bridges are or should be posted for lower weight limits; over 3,700 bridges are reported as closed to all traffic.

The December 1967 collapse of the Silver Bridge over the Ohio River between West Virginia and Ohio killed 46 people and focused national attention on bridge conditions. Shortly thereafter, the Congress established two major bridge safety programs: a program of periodic inspections to identify bridge conditions, maintenance needs, and safety problems and a program to provide Federal funds to the States specifically to help replace unsafe bridges. (See p. 1.)

GAO reviewed these programs at the request of Senator James Sasser of Tennessee and found that limited Federal bridge program funds are not always used on bridges most in need of attention. GAO also found that Federal agencies, States, and local governments are not fully complying with national standards for bridge inspection.

BETTER TARGETING OF FEDERAL BRIDGE FUNDS NEEDED

The Federal Government has become the major source of funds—particularly through the Federal bridge program—to replace or rehabiiltate deficient bridges, and many State and local governments depend heavily on these funds. (See p. 25.) Bridge program funding authorizations have totaled $5 billion from the program's beginning in fiscal year 1972 through fiscal year 1982. Authorizations average about $120 million per year for the program's first 7 years and slightly over $1 billion for the last 4 years. (See p. 18.) Initially limited to bridges on the Federal-aid highway system, subsequent legislation in November 1978 expanded the programs to also include bridges off the Federal-aid system.

Under the bridge program, the Federal Government contributes up to 80 percent of replacement or rehabilitation costs, and State and/or local governments provide the rest. Some bridges are being replaced or rehabilitated under other Federal-aid programs and some are being replaced or rehabilitated solely with State and local funds. However, at current funding levels, it will take years to eliminate the deficient bridges already identified. Additional bridges will need replacing during this period, and continued inflation at the current rate would more than double the cost in 10 years.

In view of the size of the bridge problem and the limited amount of funds available it is essential that program funds be used for bridges most in need. However, GAO found that—

The Federal Highway Administration's project eligibility criteria do not concentrate on bridges in the worst condition and most in need;

Many worthy projects are funded, but bridges most in need are not always selected; and

Funds have been apportioned to the States based on incomplete and outdated needs data.

Most of the program funds are apportioned to the States. However, $200 million annually are to be used as discretionary funds by the Secretary of GAO who found that State and local governments have made progress since the program's start, but they are not fully complying with the standards. For example:

Some inspectors do not meet the minimum qualifications for training and experience.

Some State and local governments are not inspecting their bridges at least every 2 years

as required by the standards, and some local governments are not inspecting their bridges at all.

The initial inventory and inspection of bridges, particularly bridges of the Federal-aid highway system, has not been completed.

Structurally weak bridges are not always being properly closed or posted for lower weight limits to protect against bridge collapses. Even if bridges are properly posted or closed, the postings and closings are often ignored by the public. Bridge weight limit enforcement is limited, and fines for violations are small and ineffective.

Federal agencies, such as the Bureau of Land Management, the Forest Service, and the National Park Service, own about 14,000 bridges. These agencies are not required to comply with the National Bridge Inspection Standards for most of their bridges, but they do have inspection programs. However, the agencies were not always complying with their own requirements, and some of the programs did not conform to the national standards. GAO believes that the public should be able to expect the same degree of safety when traveling in national parks and on other Federal lands as the standards provide for on State and local government bridges.

RECOMMENDATIONS

GAO is recommending that the Secretary of Transportation direct the Administrator of the Federal Highway Administration to assess the States' and local governments' compliance with the National Bridge Inspection Standards and develop a strategy for bringing about full compliance.

GAO is also recommending that the Congress require Federal agencies that own bridges to comply with the National Bridge Inspection Standards.

AGENCY COMMENTS AND GAO'S EVALUATION

To expedite report issuance, Senator Sasser directed GAO to obtain only Federal Highway Administration's oral comments. Its officials told GAO that their comments do not necessarily represent those of the Secretary of Transportation.

Federal Highway Administration officials generally agreed with GAO's recommendation to use the latest needs data to allocate Federal bridge funds. The officials said that they will continue to encourage the States to select bridges in the lower range of sufficiency ratings. However, they also said that State and local officials need flexibility when selecting projects, and factors other than the sufficiency rating must be considered.

GAO also believes that selecting officials need flexibility. However, the bridges most in need of immediate attention are not always being selected. The bridge program, which is currently funded at slightly over $1 billion per year, cannot effectively be directed at all deficient bridges, which the Federal Highway Administration estimates would cost $41.1 billion.

Federal Highway Administration officials said that they have established an implementation plan and factors such as sufficiency ratings, costs, and benefits have been and will continue to be considered when selecting discretionary projects. They stated, however, that the program has received much congressional direction through the legislative history process.

The 1978 Surface Transportation Assistance Act gives the Secretary of Transportation broad discretion to select projects for discretionary funding. In GAO's opinion, it is the Secretary's responsibility to select the most worthy projects, and the current selection method does not ensure that this is done.

Federal Highway Administration officials did not indicate agreement or disagreement with GAO's recommendation concerning State and local government compliance with the National Bridge Inspection Standards. The officials commented on the items that GAO said should be considered during development of a strategy for bringing about full compliance. (See pp. 84, 85, and 98.)

Federal Highway Administration officials' comments on GAO's other recommendations are contained in the body of this report.●

## ADDITIONAL COSPONSORS

S. 306

At the request of Mr. MATSUNAGA, his name was added as a cosponsor of S. 306. a bill to authorize the Secretary of the Interior to construct, operate, and maintain hydroelectric powerplants at various existing water projects, and for other purposes.

S. 613

At the request of Mr. THURMOND, the Senator from Idaho (Mr. SYMMS) was added as a cosponsor of S. 613, a bill to amend section 1951 of the United States Code, and for other purposes.

S. 1131

At the request of Mr. DANFORTH, the Senator from Oregon (Mr. HATFIELD) was added as a cosponsor of S. 1131, a bill to require the Federal Government to pay interest on overdue payments and to take early payment discounts only when payment is timely made, and for other purposes.

S. 1215

At the request of Mr. PROXMIRE, the Senator from Colorado (Mr. ARMSTRONG), and the Senator from Nebraska (Mr. EXON) were added as cosponsors of S. 1215, a bill to clarify the circumstances under which territorial provisions in licenses to distribute and sell trademarked malt beverage products are lawful under the antitrust laws.

S. 1365

At the request of Mr. DOLE, the Senator from West Virginia (Mr. RANDOLPH), the Senator from Illinois (Mr. PERCY), and the Senator from Missouri (Mr. EAGLETON) were added as cosponsors of S. 1365, a bill to amend the Bankruptcy Act regarding farm produce storage facilities, and for other purposes.

SENATE JOINT RESOLUTION 107

At the request of Mr. ROBERT C. BYRD, the Senator from Nevada (Mr. CANNON), the Senator from Alabama (Mr. DENTON), the Senator from Minnesota (Mr. DURENBERGER), the Senator from Kentucky (Mr. FORD), the Senator from Hawaii (Mr. INOUYE), the Senator from Wisconsin (Mr. KASTEN), the Senator from Mississippi (Mr. STENNIS), the Senator from Delaware (Mr. ROTH), the Senator from Oklahoma (Mr. BOREN), the Senator from Missouri (Mr. EAGLETON), the Senator from Alabama (Mr. HEFLIN), the Senator from Arizona (Mr. GOLDWATER), and the Senator from North Dakota (Mr. ANDREWS) were added as cosponsors of Senate Joint Resolution 107, a joint resolution to designate the 7th day of October 1981 as "National Guard Day."

UP AMENDMENT NO. 368

At the request of Mr. DOLE, the Senator from Oklahoma (Mr. NICKLES), the Senator from Wyoming (Mr. WALLOP), the Senator from Iowa (Mr. GRASSLEY), the Senator from Washington (Mr. GORTON), and the Senator from Minnesota (Mr. DURENBERGER) were added as cosponsors of UP Amendment No. 368 proposed to S. 884, a bill to revise and extend programs to provide price support and production incentives for farmers to assure an abundance of food and fiber, and for other purposes.

## AMENDMENTS SUBMITTED FOR PRINTING

### DEPARTMENT OF JUSTICE AUTHORIZATION, 1982

AMENDMENT NO. 554

(Ordered printed and to lie on the table.)

Mr. HEFLIN submitted an amendment intended to be proposed by him to the bill (S. 951) to authorize appropriations for the purpose of carrying out the activities of the Department of Justice for fiscal year 1982, and for other purposes.

### INTERNATIONAL DEVELOPMENT AND SECURITY ASSISTANCE ACT OF 1981

AMENDMENT NO. 555

(Ordered to be printed and to lie on the table.)

Mr. CHILES submitted an amendment intended to be proposed by him to the bill (S. 1196) to amend the Foreign Assistance Act of 1961 and the Arms Export Control Act to authorize appropriations for development and security assistance programs for the fiscal year 1982, to authorize appropriations for the Peace Corps for the fiscal year 1982, to provide authorities for the Overseas Private Investment Corporation, and for other purposes.

AMENDMENT NO. 556

(Ordered to be printed and to lie on the table.)

Mr. HATCH submitted an amendment intended to be proposed by him to the bill S. 1193, supra.

## NOTICES OF HEARINGS

COMMITTEE ON THE BUDGET

Mr. DOMENICI. Mr. President, the Budget Committee will meet for hearings on Thursday, September 24, at 10 a.m., to consider matters relating to the second concurrent budget resolution. Witnesses will be Dr. Jerry Jordan, Council of Economic Advisers; Mr. Larry Kudlow, Office of Management and Budget; and Dr. Beryl Sprinkel, Treasury Department. The hearings will be held in room 6202 of the Dirksen Senate Office Building.

For further information, contact Lynn Pearson of the Budget Committee staff at 224-0544.

SUBCOMMITTEE ON LABOR

Mr. NICKLES. Mr. President, the Labor Subcommittee of the Labor and Human Resources Committee will hold a 1-day hearing October 5, on S. 182, the Longshoremen's and Harbor Workers' Compensation Act, to receive testimony from the administration. The hearing

will begin at 9:30 a.m. in room 4232 of the Dirksen Senate Office Building.

## ADDITIONAL STATEMENTS

### INFLATION AND HIGH INTEREST RATES

● Mr. EAST. Mr. President, like every other Member of this body, I have lately been subjected to a barrage of letters, telegrams, and phone calls pleading for an end to high interest rates. I appreciate how the high cost of borrowing is hurting certain elements of our economy, and I appreciate that many of these appeals are prompted by dire need. But I am profoundly disturbed at the number of people who think that this problem can be blamed on a convenient scapegoat, or that the resuscitation of their own particular enterprise should take precedence over restoring health to the economy as a whole.

I was therefore most gratified to receive a letter from the leadership of six of the most hard-pressed industries of the United States urging an intelligent, impartial, and courageous solution to the problem. The authors of this letter recognize, as I do, that until budget deficits are brought under control, there is no escaping the grim choice between high interest rates and high inflation.

Accordingly, they urge the President and Congress to make whatever additional spending cuts that may be necessary, even if that means further reductions in programs that affect their own members. They also pledge their continued support and assistance.

Mr. President, I commend the American Bankers Association, the Mortgage Bankers Association of America, the National Association of Homebuilders, the National Association of Mutual Savings Banks, the National Association of Realtors, and the United States League of Savings Associations for their clear-sighted analysis of this grave national problem, and the exemplary public spirit that characterizes their proposed solution. I ask that the complete text of this letter be printed in the RECORD.

The letter follows:

AMERICAN BANKERS ASSOCIATION, MORTGAGE BANKERS ASSOCIATION OF AMERICA, NATIONAL ASSOCIATION OF HOME BUILDERS, NATIONAL ASSOCIATION OF MUTUAL SAVINGS BANKS, NATIONAL ASSOCIATION OF REALTORS, UNITED STATES LEAGUE OF SAVINGS ASSOCIATIONS,
*September 11, 1981.*

DEAR SENATOR: We write to share with you our views on the need to change economic policy to bring down inflation and interest rates.

In a joint communication to the President last February 13, 1981, we urged that the tax cuts not exceed the budget reductions in order to cut the inflationary federal deficit and create an economic climate in which interest rates could decline. Since then, we have supported efforts to slow the growth of federal spending including the Budget Reconciliation Act. Many tens of thousands of our members have worked with their Senators and Representatives to bring budget legislation to a successful conclusion.

However, we must stress the need to restrain the budget even more to lower the inflationary federal deficit. In particular, we urge you to seek additional budget cuts to hold the federal deficit to less than $42.5 billion in fiscal 1982 and to balance the budget by fiscal 1984. We are concerned about anticipated budget overruns of $10-$20 billion or more in fiscal 1982, which, in turn, will require greater federal borrowing, thereby crowding private borrowers out of the capital markets and keeping interest rates at record levels.

We fully appreciate the fact that restraining spending requires all of us to support you and others in the Congress in taking the difficult actions. It will require deferrals and cuts in defense and non-defense expenditures, and, if necessary, further cuts in programs that affect our members. We urge you and others in the Congress to implement these additional cuts and deferrals on the pending appropriations bills, the Second Budget Resolution and the Continuing Appropriations bill.

High interest rates have been devastating to all sectors of our economy. Particularly hard hit have been housing sales, construction, small business, agriculture and consumers attempting to finance automobiles and other durable goods. In the case of housing, record high interest rates have made it impossible for more than 90 percent of first time home buyers to qualify to purchase today's average priced home.

We believe this solution to the problem of excessively high interest rates deserves your immediate attention and action by the Congress. We have similarly urged the President in a recent letter to take action on this problem. We pledge our support and assistance.

Respectfully,

LEE E. GUNDERSON,
*President, American Bankers Association.*
THOMAS T. SHEALY,
*President, Mortgage Bankers Association of America.*
HERMAN J. SMITH,
*President, National Association of Home Builders.*
ROBERT T. MASTERTON,
*Chairman, National Association of Mutual Savings Banks.*
JOHN R. WOOD,
*President, National Association of Realtors.*
ROLLIN D. BARNARD,
*President, U.S. League of Savings Associations.*●

### THE CONSEQUENCES OF DEFEAT

● Mr. TOWER. Mr. President, consideration of the Reagan administration's proposal to sell airborne warning and control system (AWACS) aircraft and F–15 enhancement equipment to Saudi Arabia represents one of the most difficult foreign policy decisions the Senate will have to make this year.

Much concern has been expresed regarding the consequences to the U.S. position and strategy in the Persian Gulf should Congress block these sales. In this regard, in the Washington Post of September 21, 1981, columnists Rowland Evans and Robert Novack have cogently and, I believe, accurately assessed the consequences of congressional disapproval of the sales.

Mr. President, I submit the text of the Evans and Novak column to be printed in the RECORD.

The column referred to is as follows:

THE CONSEQUENCES OF DEFEAT
(By Rowland Evans and Robert Novak)

The specter of defeat for his promised sale of AWACS radar planes to Saudi Arabia, raising damaging implications of presidential weakness, has compelled Ronald Reagan to order his Mideast strategists back to the drawing board to devise a new plan to defend that important region from Soviet penetration.

Reagan was struck by the prospect of defeat last Monday, when he made his first lobbying foray for the AWACS deal. Soft-selling the plan to a bipartisan group of 27 senators in the White House, he discoverd that Israeli Prime Minister Menachem Begin had done his own lobbying too well. Minds had been made up during Begin's 10-day visit. Reagan had ordered his own aides not to lobby for the AWACS sale while Begin was here, out of courtesy to him. The Israeli had been under no such restraint.

Immediately following the Monday session, an aroused and angry Reagan ordered Secretary of State Alexander Haig to fly to New York for one more talk with Begin. Haig's mission: tell Begin to cease and desist on the AWACS; warn him that the sale was the cornerstone of Reagan's whole Mideast plan to keep the Russians out.

Haig's aides say he talked tough to Begin, but at that late stage the seeds planted during Begin's 10 days in Washington and New York had already produced solid anti-AWACS votes. What was needed was a fallback position to save whatever could be saved from the devastating defeat of Reagan's first major foreign policy request to Congress.

The answer: not much could be saved. The president's national security chiefs, back at the drawing board, are trying to locate new defense lines against Soviet infiltration of the Middle East to substitute for the Saudi Arabian anchor—if, as now seems likely, the Senate blocks the AWACS sale. The prospect is dismal.

U.S. defense installations now being built at immense cost in Egypt, the Gulf state of Oman, Saudi Arabia itself and the Indian Ocean will be sacrificed.

Instead, lacking the secure position on the Persian Gulf that would be provided by an AWACS-armed Saudi Arabia, the new anti-Soviet lines would be redrawn with Turkey on the north and Pakistan on the east as its twin anchors. The Eastern Mediterranean would replace the Indian Ocean for large concentrations of U.S. naval power.

For the United States and its Western allies, withdrawal from the Persian Gulf region is ominous. Yet administration officials believe that if Reagan cannot deliver on his agreement with Saudi Arabia, no Persian Gulf state will accept any American military installations. Israel is too far removed to substitute for Saudi Arabia.

But for the Russians, the retreat of the major U.S. defense lines to relatively far-off Turkey and Pakisan would be a strategic 10-strike. The Soviets would no longer have to divide their southern land forces if the United States is unable to operate in Persian Gulf regions. Instead, the Russians could concentrate those forces further east, against Pakistan.

The president had not come to grips with any of these realities until that first confrontation with senators last week. Nor had Haig—until the last few days—showed much alarm. Instead, the president's most senior aides have proceeded on the will-o'-the-wisp theory that no president as popular as Ronald Reagan could lose such a crucial test in a Senate dominated by his own party.

Top Reaganites at the State and Defense departments and on the White House national security staff fear that it may be too late to transform their soft-sell lobbying campaign against senators into a hard sell. The astute Israeli prime minister now has 50 senators pledged to vote against the AWACS deal, with a half-dozen others claimed for reserve.

Yet Reagan himself, although urged by some senior aides, has not yet agreed to take his case for the AWACS sale to the country

in a personal appeal. Despite his immense stake in the outcome, the president seems reluctant to say the words publicly that Haig has privately been passing to anyone who would listen: the United States and its president will appear pitfully weak to the world when the leader of Israel shows more political clout in the U.S. Senate than the president himself.●

## THE 20TH ANNIVERSARY OF THE PEACE CORPS

● Mr. KENNEDY. Mr. President, 20 years ago, on this date, September 22, President Kennedy signed the Peace Corps Act, establishing an organization which has since touched the lives of millions of people throughout the world. As the Peace Corps celebrates its 20th anniversary today, let us all reflect on the goals and accomplishments of that special group of dedicated Americans who have contributed so much to international understanding and development.

Peace Corps volunteers have changed sometimes distorted images of the United States and conveyed a sense of what this country can be at its best—a nation of idealism, compassion, and cooperation. But what must be understood by all of us is that however much the thousands of volunteers have contributed to development in the slums and villages around the world, it is they, the volunteers, and through them, this Nation which has benefited many times over. Their understanding of other cultures, of other nations and of how others see us, has enriched our perspective and policies.

Peace Corps volunteers have returned from overseas to be counted among our Nation's most prominent Government and professional leaders. Former volunteers enrich the ranks of our Foreign Service, of Government agencies, and of private business and industry. Two of our Nation's Senators are former Peace Corps volunteers.

On this 20th anniversary, let us reaffirm our commitment to the ideals of the Peace Corps, to the goal of helping people help themselves, in the hope that the world will see an end to suffering and injustice. We, as Americans, know that our most valuable resource is our people, and we must continue to develop and use that resource for the benefit of the less fortunate in the world.●

## UNION VIOLENCE IN GALATIA, ILL.

● Mr. EAST. Mr. President, I am proud to be a cosponsor of S. 613, a bill to amend the Hobbs Act. This bill, introduced by my colleague, Senator THURMOND, is designed to overrule the Supreme Court's unfortunate Enmons decision in 1973, and make the act once again an effective means of preventing violence and extortion in labor disputes.

This reform is urgently needed. Labor unions have not yet abandoned threats and force to gain their ends. A recent editorial by nationally known columnist Anthony Harrigan eloquently attests to this fact. I ask that the text of Mr. Harrigan's editorial be reprinted in the RECORD.

The editorial follows:

UNION VIOLENCE IN GALATIA

(By Anthony Harrigan)

A thousand union miners converged on a non-union mine construction site in Illinois Aug. 18, tearing down fences, breaking windows in vehicles, burning at least one truck, flattening the car tires of reporters, and seizing the cameras of newsmen.

The Chicago Tribune properly featured these civil rights violations on its front page. The Washington Post, the principal journalistic voice of liberalism, found it worthy of only a four-paragraph item on page 8.

It's shocking that this type of union violence occurs in the United States. It is almost as shocking that the story of this violence is so often buried in the liberal media.

Imagine how the Post would have treated a thousand-man mob attack if the story had a minority conflict element. What one sees in the Post's non-coverage of a major story is a double standard on violence and civil rights violations.

The Kerr-McGee Co., which owns the mine, and the non-union workers it employs have the same civil rights as anyone else. Unfortunately, liberals see no evil, hear no evil when unions violate the civil rights of those who don't choose to join a union.

The smug, sanctimonious media liberals elect to downplay the union violence that takes place in communities across the land. They ignore the bombings, shootings, beatings, and general hoodlumism in labor disputes.

The outbreak of union violence in Galatia, Ill., brings to mind a recent comment by John Davenport, a former editor of Barron's and Fortune magazine.

In a letter to the New York Times, Mr. Davenport said that "From the passage of the Wagner Act forward, unions have been granted by government privileges that are given to no other private group."

The union assault in Galatia is an example of this. The country has allowed unions to act as though they owned jobs, as though they have the exclusive right to say who occupies certain jobs.

Union members certainly have the right to withdraw their services from an employer. As Mr. Davenport pointed out, however, the aim of a strike today "is not to allow men to resign but to shut down the employer's facilities and to prevent those who want to work from working."

The strike in this perspective, Mr. Davenport rightly noted, "is a form of industrial warfare."

Such warfare is intolerable. An organized group cannot be permitted to wage war on other citizens. That's precisely what happened in the union attack on the Kerr-McGee coal mine. The assault was so violent that the Illinois state police found it necessary to spray tear gas from helicopters in order to disperse the mob of union miners.

In a free society, no private group can be above the law. No private group can be permitted to coerce citizens. The type of behavior engaged in by the union miners in Illinois is contrary to the fundamental concepts of a democracy.●

## AT RISK RULES TO THE INVESTMENT TAX CREDIT CONTAINED IN H.R. 4242

● Mr. WALLOP. Mr. President, I submitted an amendment to section 211(f) of the bill regarding the application of the at risk rules to the investment tax credit. That amendment, which was passed by the Senate, was modified in conference. It is my understanding that, as modified in conference, the bill will treat a taxpayer as being "at risk" with respect to the acquisition of property utilizing nonresource financing, provided that, among other things, the taxpayer has at least a 20-percent "at risk" investment in the property, the lender is not related to the taxpayer, and the lender is not a person from which the taxpayer acquired the property.

It is my understanding that certain lenders make loans in the form of "conditional sales" under which they acquire property from the taxpayer or the manufacturer pursuant to binding commitments to contemporaneously resell the property to the taxpayer—or lease such property to the taxpayer on terms which, under present law, cause the transaction to be treated as a conditional sale or financing arrangement. It is my understanding that, so long as the other requirements of the bill are satisfied, the fact that the lender acts as nominal seller will not cause the taxpayer to lose the benefits afforded by the exception to the application of the at risk rules to the investment tax credit.

There is another issue relating to the at risk rule that should be clarified. Under this rule, investment credits are generally allowed to individuals and closely held corporations only on that portion of the basis of qualifying property for which the taxpayer is at risk. A taxpayer generally is at risk only to the extent that amounts invested in the property represent amounts the taxpayer has contributed to the purchase price and borrowed amounts upon which he has personal liability.

An exception to this general rule provides that the proceeds of loans made or guaranteed by Federal, State, or local governments and the proceeds of loans from certain qualified lenders are considered at risk even if these loans are nonrecourse. However, for this safe harbor rule to apply, the taxpayer must be at risk—determined without regard to the safe harbor rule—for an amount equal to at least 20 percent of the basis of property eligible for the credit. Similarly, a special safe harbor rule which applies for certain borrowings with respect to energy property requires that the taxpayer be at risk with respect to 25 percent of the basis of eligible property.

Where money is raised through equity and debt contributions to a project, such as construction and operation of a fuel alcohol plant, which involves expenditures for other items as well for the purchase of eligible property, it is not clear how these "20 percent at risk" and "25 percent at risk" rules should apply. It seems to me that, for purposes of determining whether these rules are satisfied, debt and equity contributions to a project should be allocated pro rata among the purchase of property and other uses of funds such as working capital and start-up expenses even though all of the debt is secured by the property.●

## FDA REGULATIONS

● Mr. EAST. Mr. President, I share with many Senators the concern with avoiding Government waste and excessive regulation. I am particularly troubled with a problem which was brought to my attention by a constituent who is involved in the sale of dental materials and equipment—products used by dentists in their professional practices. Under Public Law 94–295, Congress gave the Food and Drug Administration the authority to issue classification regulations which would determine how stringently a particular product should be regulated, depending upon the safety of the product and any risks to health which it poses.

In that legislation, Congress wisely recognized that FDA does not have thorough experience with the many thousands of different medical devices, and so Congress established advisory panels of clinical experts who were paid from appropriated funds to use their experience to develop a comprehensive set of recommendations to FDA on how each device should be classified.

After the panel, composed of some 20 dental experts, had conducted its study over 7 years, and made its recommendations—which study was conducted under FDA supervision—the FDA published proposed regulations to classify dental devices in December 1980. In its proposal, FDA disregarded the panel recommendations on 68 percent of the products, in every case choosing a more stringent level of regulation than had been deemed necessary by the expert dental professionals who have used these products on a daily basis. These are generally safe, effective, innocuous products, some of which have been used safely in treating dental patients for over 50 years, according to the experts.

Excessive regulation increases the cost of products to the detriment of American consumers. I hope that FDA will take a more realistic attitude and modify its regulations to reflect the recommendations of its expert panel of dentists.●

## NOTICE OF DETERMINATION BY THE SELECT COMMITTEE ON ETHICS

● Mr. WALLOP. Mr. President, it is required by paragraph 4 of rule 35 that I place in the CONGRESSIONAL RECORD this notice of Senate employees who propose to participate in a program, the principal objective of which is educational, sponsored by a foreign educational or charitable organization involving travel to a foreign country paid for by that foreign organization.

The Select Committee on Ethics has received a request for a determination under rule 35 which would permit Dr. James K. Galbraith of the Joint Economic Committee to participate in a program on "The Political Economy of the United States" organized by the Institut Auguste Comte pour l'Etude des Sciences de l'Action in Paris from September 10 to 12, 1981.

The committee has determined that Dr. Galbraith's participation in the program, with his travel expenses paid by the Institut, is in the interests of the Senate and the United States.●

## ORDER FOR RECESS

Mr. STEVENS. Mr. President, I ask unanimous consent, if there be no further business to come before the Senate with the exception of a statement to be made by the distinguished Senator from West Virginia (Mr. ROBERT C. BYRD), that following his statement the Senate stand in recess until that hour.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I thank the distinguished Senator from Alaska, my friend the acting Republican leader.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I will just take 30 seconds. I wish to thank the distinguished Senator from Alaska for making provision for me to have this time in which to continue my series of statements on The United States Senate. I am prepared to make my 46th statement in the series, which began on March 21, 1980.

But there is plenty of time to make that statement. Rather than keep the Senate in today, I think I shall just wait another day. I again express my appreciation to the acting Republican leader, and I yield the floor.

## RECESS UNTIL 11 A.M. TOMORROW

The PRESIDING OFFICER. Under the previous order, the Senate will stand in recess until 11 a.m. tomorrow.

Thereupon, at 5:16 p.m., the Senate recessed until Wednesday, September 23, 1981, at 11 a.m.

## NOMINATIONS

Executive nominations received by the Senate September 22, 1981:

DEPARTMENT OF JUSTICE

Joe D. Whitley, of Georgia, to be U.S. attorney for the middle district of Georgia for the term of 4 years, vice D. Lee Rampey, Jr., resigned.

Dan K. Webb, of Illinois, to be U.S. attorney for the northern district of Illinois for the term of 4 years, vice Thomas P. Sullivan, resigned.

Ronald E. Meredith, of Kentucky, to be U.S. attorney for the western district of Kentucky for the term of 4 years, vice J. Albert Jones, resigned.

Stanford O. Bardwell, Jr., of Louisiana, to be U.S. attorney for the middle district of Louisiana for the term of 4 years, vice Donald L. Beckner, term expired.

Leonard R. Gilman, of Michigan, to be U.S. attorney for the eastern district of Michigan for the term of 4 years, vice James K. Robinson, resigned.

Robert J. Wortham, of Texas, to be U.S. attorney for the eastern district of Texas for the term of 4 years, vice John H. Hannah, Jr., resigned.

79–059 O–85–34 (Pt. 16)

# HOUSE OF REPRESENTATIVES—*Tuesday, September 22, 1981*

The House met at 12 o'clock noon.

The Chaplain, Rev. James David Ford, D.D., offered the following prayer:

*So you will walk in the way of good men and keep to the paths of the righteous.*—Proverbs 2: 20.

O God, we thank You for all people who, through courage and selfless devotion, have carried the banner of righteousness before us and have pointed the way to the high ideals of human dignity that are the handiwork of Your creation. May Your blessing be upon men and women everywhere who risk themselves in the pursuits of freedom and may we ever be inspired in our lives to do what we can that all Your people will know peace in their hearts and in the world. Encourage us to serve those about us who are in need, for by so doing we serve You, our Lord and our Creator. Amen.

## THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

## CRUEL AND UNJUST ATTACK ON NATION'S ELDERLY AND DISABLED

(Mr. WEISS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WEISS. Mr. Speaker, the President's proposal to defer cost-of-living increases for social security beneficiaries is a cruel and unjust attack on our Nation's elderly and disabled.

Today, I am introducing a sense of the Congress resolution with 48 cosponsors, expressing opposition to this delay, which would indiscriminately cut needed benefits for 36 million Americans dependent on social security. The President's proposal makes a mockery of our commitment to protect the elderly and disabled from the devastating impact of inflation.

A delay in the cost-of-living increase would imperil the vital security that the program affords its beneficiaries. Even the current 1-year adjustment lags substantially behind price increases and leaves the elderly at a distinct disadvantage in their battle with inflation. A further delay would force many social security recipients to join the already swollen ranks of the elderly poor.

Strengthening the financial integrity of social security must be done in an equitable and humane way rather than by sacrificing the future of those entitled to the system's protection. I invite my colleagues to join me in opposing the President's recommendation as well as in assuring the American people that our promises to them will not be broken.

## PRESIDENT REAGAN: DON'T JEOPARDIZE ENERGY SECURITY TO INCREASE TAX REVENUES

(Mr. GLICKMAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GLICKMAN. Mr. Speaker, I understand the Treasury Department is floating a proposal that we need to make sure never gets off the ground and is outrageous. The proposal, designed to offset the revenue loss due to the just-enacted tax bill, would repeal tax incentives put into place over the last several years to spur energy conservation improvements by businesses and homeowners and production of alternative fuels, such as alcohol fuels. To repeal these tax incentives would simply sell our energy future short and is pure, plain nonsense.

Yes; we have a temporary glut of gasoline, but it is absolutely absurd to think for a minute that we do not still have a long-term energy problem. To repeal these incentives aimed at getting the private sector involved in developing alternatives to expensive OPEC oil—and improving the energy efficiency of their operations would be a big mistake—particularly in the aftermath of budget cuts which seriously weakened Government programs aimed at bringing alternative fuels on line quickly, would be perhaps the highlight of idiocy.

I think we can nip this idea in the bud if we act quickly, but to do so, I need the help of my colleagues. Yesterday I circulated a "Dear Colleague" inviting Members to join in a letter to the President urging him not to lend his administration's support to this idea. Since a decision is likely very shortly, I will be having the letter hand-delivered this afternoon. So I hope you will have your staff call my office right away so that your name will be added to the letter.

There is too much at stake to forfeit our energy future, certainly when the only purpose is to bring more tax dollars into the Federal Treasury.

## TRANSNATIONAL TERRORISM

(Mr. McDONALD asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. McDONALD. Mr. Speaker, last night's terrorist bombing in Schenectady, N.Y., at the offices of the Eastern Rugby Football Association, should strengthen our resolve not to give in to terrorist demands to cancel the U.S. tour of the South African Springbok rugby team, as called for in House Concurrent Resolution 183.

This bombing is an example of "transnational" terrorism—that is, a terrorist act carried out by a group in one country on behalf of their terrorist comrades in a second country. In this case, the beneficiary of the terrorism in America was the African National Congress (ANC), a South African terrorist group controlled by the Soviet Union and the South African Communist Party.

As we deliberated yesterday, a terrorist bombmaker prepared the device that exploded last night, clearly an attempt to intimidate this body into yielding to demands that we should condemn the visit of the Springbok rugby football team to America.

We must not vote for passage of the resolution, because to do so would be seen as a cowardly acquiescence to terrorist thuggery and a victory for anarchy, not only in South Africa but in our own country. Again, we must not support House Concurrent Resolution 183.

## SQUEEZE ON AMERICAN FARMER'S INCOME

(Mr. DE LA GARZA asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DE LA GARZA. Mr. Speaker, I noted on the news wires earlier this week an item reporting that, according to USDA officials, the Department will raise interest rates on its price support and storage facility loans October 1 if current regulations for setting these rates are continued. Under these regulations, USDA adjusts the interest charges each April 1 and October 1 on the basis of the cost of money to the Commodity Credit Corporation in the preceding month.

□ This symbol represents the time of day during the House proceedings, e.g., □ 1407 is 2:07 p.m.

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

The CCC paid 14.5 percent for its money in the month before the current 14.5-percent rate was set last spring, and USDA analysts reportedly say the cost of money this month will be 16.5 percent. This could mean another 2-percent increase in the interest farmers must pay on these loans for 6 months beginning October 1.

I do not intend to single this incident out especially, but it is a symptom of the brutal and tightening squeeze on the American farmer's income during a period in which farm prices are too low to be fair by any standard. Maybe another 2-percent increase in interest rates on crop support loans does not sound like much, but Mr. Speaker, we are in a situation in which every little bit hurts. When farmers are in the kind of economic situation they face today, every extra dollar in additional production costs of any kind is a painful kick in the teeth.

We all know how farm costs have escalated in recent years in almost every category. We know that fuel, machinery, and virtually everything else the farmer must buy in order to produce our food and fiber has gone up dramatically. And in this situation, the interest rates producers are paying for both mortgage and operating credit have become one of the most critical factors in today's crunch in agriculture.

Administration leaders have been telling us that interest rates are going to come down. I hope they turn out to be right before we reach the point at which farmers are forced out of business. In the case of some loan programs in which rates are revised only twice a year, like CCC support loans, the fact is that even if market rates began falling today, it would be next spring before farmers got any benefit. With net farm income down sharply last year, and showing little improvement this year—if any—we face many critical issues in agriculture. One of those critical issues is the fact that current interest rates are a serious threat to our farm economy.

## TRIBUTE TO MIKE MICHAELSON

(Mr. RHODES asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. RHODES. Mr. Speaker, it is a real privilege to take this opportunity to pay tribute to Mike Michaelson who is leaving his post in the House radio and TV gallery to go on to new challenges as the executive director of Cable Satellite Public Affairs Network. It has been a pleasure to work with Mike over the years. His professionalism and sense of fairness are top rate. During my years as minority leader, I had many an occasion to call upon Mike's services, and was consistently impressed by his smooth handling of each new challenge.

Probably no better incident demonstrates Mike's thorough-going approach to his responsibilities than the arrangements he made for the National Republican Unity Day—which was observed just 1 year ago this month. While the event was planned for a gathering of Republican candidates for public office on the west front of the Capitol—Washington's notoriously unpredictable weather necessitated alternate "rain" plans for an indoor gathering. Mike took care of all the details—arranging for radio and TV coverage both in front of the Capitol and in the Cannon caucus room in the event the elements drove the observance inside. Fortune smiled on the Republicans that day as they met in the sunshine on the west front of the Capitol. And I know my colleagues in the GOP share my wish that good fortune will smile on Mike Michaelson every day in his new career with C-SPAN. Good luck and best wishes, Mike.

## SUPPORT HOUSE CONCURRENT RESOLUTION 183 ON SOUTH AFRICA

(Mr. MITCHELL of Maryland asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MITCHELL of Maryland. Mr. Speaker, and my colleagues in the House: On yesterday we debated House Concurrent Resolution 183, the resolution which would express the sense of Congress that the national rugby team of South Africa should not play in the United States.

During the course of the debate, every Member of the House who participated stood up and said that he or she found the apartheid policies of the Union of South Africa to be racist and abhorrent. There is no doubt in my mind, and no doubt in the minds of most Americans, that this is the most racist regime that exists. It entered into the murder of a black South African leader, Steven Biko. It destroyed the squatters in Johannesburg. It has a pass-identity system that is abominable, which prevents blacks from moving freely around the country.

I would say to all of my colleagues who rose during the debate to speak out against apartheid that today they will have more than a chance just to speak out; they will have a chance to do something about it. By their action in voting for House Concurrent Resolution 183, they will be expressing their contempt and disdain for that apartheid system. By failing to do so, by failing to vote for the resolution, it will be but another indication that this Nation and the Reagan administration is tilting toward South Africa, contrary to every other posture that we have assumed toward that country in the past.

I would urge support for that resolution (H. Con. Res. 183), and I yield back the balance of my time.

## THE 1984 OLYMPICS IN JEOPARDY

(Mr. DYMALLY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DYMALLY. Mr. Speaker, yesterday, during the course of the debate on House Resolution 183, I yielded most of my time to the gentleman from Georgia and did not have an opportunity to give another reason why I think we should seriously consider the passage of the resolution today.

What we are talking about with reference to the Olympics is not Russia, it is not China, it is not communism. What we are talking about is jeopardizing the games for which so much has been given in Los Angeles in 1984. That, to me, is a central issue.

The past experience with rugby in New Zealand taught us a very, very painful lesson, and that was the boycotting of the Montreal Olympics. Those Members who come from Los Angeles, those of us who come from California, indeed, those of us who come from this country, should be very cognizant of the fact that Soviet-bloc nations, some of the African nations, are this day meeting to discuss the possibility of boycotting the 1984 Olympics.

Now, we are embarked on a new experiment in Los Angeles, and that is the private sector, not the Government, funding the Olympics. I hope that the Members would vote favorably on this resolution without dealing with the question of Russian communism. We are dealing with the question of saving the Olympics for 1984.

I thank the Speaker very much and I yield back the balance of my time.

## AN ILL-ADVISED INVITATION

(Mr. FASCELL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. FASCELL. Mr. Speaker, I rise in support of House Concurrent Resolution 183.

Last week, the South African Springbok National Rugby Team arrived in the United States and is now in the midst of what was originally scheduled to be a three-city tour. Much of that tour has been cancelled and games are being conducted in secret.

In my opinion, this invitation to visit the United States with the approval of the Reagan administration is ill-advised and regrettable. Such athletic

good will exchanges with a country that advocates a morally reprehensible policy of apartheid can too easily be construed as an endorsement of its legitimacy, as a betrayal of our allies in Africa and the Third World, and an insulting insensitivity to American blacks. Many of these Third World nations responded in good faith when we in the United States asked that they boycott the 1980 Olympics. We should not turn our backs on them now.

Moreover, we should not provide the Soviet Union with ammunition for its own sort of revenge concerning the 1984 Olympics. While it is ridiculous to equate the U.S. tour of Springbok with the Soviet invasion of Afghanistan, I have little doubt that the Soviets will attempt to make use out of just such an incident to ask that the 1984 Olympics be moved from Los Angeles. Already, as many as 50 countries have threatened to pull out of the 1984 games because of the visit.

As one who has a particular interest in human rights, and as an individual who abhors the policy of apartheid, I join in supporting this timely resolution.

## DOMESTIC SUGAR INDUSTRY ON BRINK OF COLLAPSE

(Mr. AKAKA asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. AKAKA. Mr. Speaker, there has been considerable misinformation circulated about the effect of the nonrecourse loan provision for sugar in the farm bill. Among other things, it has been alleged that enactment of a sugar loan program will be harmful to the interests of lesser developed countries (LDC's) which export sugar to the United States. Nothing could be further from the truth.

Because we operate under the generalized system of preferences in trading with other nations, LDC's actually receive a better price for their exports of sugar to the United States. For those not familiar with it, the generalized system of preferences allows LDC's to qualify for duty-free export of specified commodities to the United States. One such commodity is sugar. In 1980, 37.2 percent of our sugar imports from poorer nations such as Belize, Nicaragua, Malawi, Mozambique, and the Fiji Islands, entered our country duty free. Any change in duty affecting our major suppliers such as Australia and Brazil has a positive effect upon our trade with LDC's. Lesser developed countries will be the first to benefit from access to the U.S. market if the loan program for sugar is passed into law.

My point in addressing this issue is not to argue for a program for sugar based upon duties or fees. Since the demand for sugar is highly inelastic, a change in the duties on sugar imports will have little, if any, effect on our level of imports. Only the collapse of the domestic sugar industry would cause our imports to rise dramatically.

The reality is that the domestic sugar industry is on the brink of such a collapse. If the situation is allowed to worsen and if the domestic sugar industry is not given adequate protection from years when prices are at ruinous levels, the price consumers pay for sugar will be left to the mercy of foreign producers.

This process has already begun in the Northeast section of the United States, an area which has long been dominated by foreign sugar. The Department of Agriculture reports that the cost of sugar to consumers in the Northeast is 2.6 cents per pound higher than it is in the West and Midwest regions. Without the loan provision for sugar provided in the farm bill, consumers nationwide will be forced to pay high prices for foreign sugar during years when production shortfalls cause the price to climb dramatically.

I urge my colleagues to support the sugar provisions of the farm bill.

□ 1215

## H.R. 4528 INTRODUCED, TO DELAY EFFECTIVE DATE OF REVENUE RULING 81-216

(Mrs. SMITH of Nebraska asked and was given permission to address the House for 1 minute and to revise and extend her remarks and include extraneous matter.)

Mrs. SMITH of Nebraska. Mr. Speaker, without warning on August 24, 1981, the Internal Revenue Service issued a ruling that will have the effect of depriving small farmers and small businesses of much needed sources of capital for farmland, equipment, and plant facilities.

The ruling became effective the same day it was issued, without the benefit of a public hearing, and consequently jeopardizes hundreds of millions of dollars involved in loan programs across the country.

I have introduced H.R. 4528 to delay the effective date of Revenue Ruling 81-216, which denies tax exemptions for industrial and agriculture development bonds of $1 million or less that are pooled and issued as a single bond offering by States and localities.

This ruling will eliminate State ability to offer tax-exempt financing to farmers and small businesses at a time when interest rates are at record highs and other forms of Government aid for these groups is being cut. My bill will delay this ruling to give Congress needed time to examine the wisdom of this new tax policy.

## THE 20TH ANNIVERSARY OF THE PEACE CORPS

(Mr. COURTER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. COURTER. Mr. Speaker, today marks the 20th anniversary of one of our finest programs to improve our foreign relations and image abroad. I am referring to the Peace Corps, an organization which I at one time served in, working with the people of Venezuela, in the late 1960's.

As was the case 20 years ago, the Peace Corps continues to strive to provide technical, agricultural and health-care assistance to the world's poor and disadvantaged. The Peace Corps has a primary commitment to assist the world's poor, particularly in the Third World, to become self-sufficient in taking care of their hunger and medical needs, as well as to develop technical skills needed for survival and even small industry.

One other major goal and accomplishment is the people-to-people contact that is part and parcel of the Peace Corps program. Many people in the Third World are curious and sometimes hostile toward Americans. Much information about America is distorted or comes second hand. It is only when they meet and work with Americans, that the stereotypes disappear, and people look at each other as human beings, not as colonizer and colonized. The friendships that are made last many years after a tour is completed, and many people visit one another whenever they can. This aspect of the Peace Corps does much to dispel the myth of the ugly American.

Finally, the Peace Corps is a tremendous training ground and experience for those who served or currently do serve. One develops as an individual, while serving his or her Nation, while helping others to be self-sufficient and even having a good time. The Peace Corps continues to do the job on a shoestring budget, while at times its members are subject to the dangers of being in unstable areas.

I believe that our Nation owes a debt of gratitude to these ambassadors of good will and for their personal sacrifices on behalf of our Nation. I believe that under the stewardship of Loret Ruppe, the Peace Corps' tradition to excellence will continue.

## A GOOD SUGAR PROGRAM IS A STABILIZING INFLUENCE

(Mr. MORRISON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MORRISON. Mr. Speaker, Washington State used to produce 2.5 million tons of sugar beets per year.

No more. We still have the newest and largest sugar beet processing plant in the world. It is there silent and abandoned, a multimillion-dollar monument to the termination of the stabilizing influence of a sugar program. The story of the loss of thousands of jobs and millions of dollars worth of farm machinery you do not want to hear.

Now, many of those 97,000 acres are producing wheat because the farmer has no choice—and the Government stabilizes the price. It is a silly, expensive, and painful game that we are playing, and American consumers are the ultimate losers.

My district can reveal the impact on farm communities of losing the stabilizing influence of a sugar program. All of you, as Members of Congress, can cite the impact on consumers of wildly fluctuating prices and supplies of sugar. I combine these two impacts to conclude that we are all better off with a reasonable mechanism to guarantee that we continue to have a domestic sugar industry in the United States.

## HONORARY CITIZENSHIP OF RAOUL WALLENBERG

Mr. RODINO. Mr. Speaker, on behalf of the gentleman from Wisconsin (Mr. ZABLOCKI) and myself, I move to suspend the rules and to pass the joint resolution (H.J. Res 220) proclaiming Raoul Wallenberg to be an honorary citizen of the United States, and requesting the President to ascertain from the Soviet Union the whereabouts of Raoul Wallenberg and to secure his return to freedom, as amended.

The Clerk read the joint resolution as follows:

H.J. RES. 220

Whereas the United States has conferred honorary citizenship on only one occasion in its more than two hundred years, and honorary citizenship is and should remain an extraordinary honor not lightly conferred nor frequently granted;

Whereas during World War II the United States was at war with Hungary, and had no diplomatic relations with that country;

Whereas in 1944 the United States Government through Secretary of State Cordell Hull requested the cooperation of Sweden, as a neutral nation, in protecting the lives of Hungarian Jews facing extermination at the hands of the Nazis;

Whereas Raoul Wallenberg agreed to act at the behest of the United States in Hungary, and went to Hungary in the summer of 1944 as Secretary of the Swedish Legation;

Whereas Raoul Wallenberg, with extraordinary courage and with total disregard for the constant danger to himself, saved the lives of almost one hundred thousand innocent men, women and children;

Whereas Raoul Wallenberg, with funds and directives supplied by the United States, provided food, shelter, and medical care to those whom he had rescued;

Whereas the Soviet Union, in violation of Wallenberg's Swedish diplomatic immunity and of international law, seized him on January 17, 1945, with no explanation ever given for his detention and subsequent imprisonment;

Whereas Raoul Wallenberg has been a prisoner in the Soviet Union since 1945;

Whereas reports from former prisoners in the Soviet Union, as recent as January 1981, suggest that Raoul Wallenberg is alive;

Whereas history has revealed that heroic acts of salvation were tragically rare during the massacre of millions of innocent human beings during World War II; and

Whereas the significance of this symbol of man's concern for his fellow man has been tainted by the wall of silence that surrounds the fate of Wallenberg: Now, therefore, be it

*Resolved by the Senate and House of Representatives of the United States of America in Congress assembled,*

SECTION 1. Raoul Wallenberg is proclaimed to be an honorary citizen of the United States of America.

SEC. 2. The President is requested to take all possible steps to ascertain from the Soviet Union the whereabouts of Raoul Wallenberg and to secure his return to freedom.

The SPEAKER pro tempore (Mr. MOAKLEY). Is a second demanded?

Mr. FISH. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from New Jersey (Mr. RODINO) will be recognized for 20 minutes, and the gentleman from New York (Mr. FISH) will be recognized for 20 minutes.

The Chair recognizes the gentleman from New Jersey (Mr. RODINO).

Mr. RODINO. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, House Joint Resolution 220, a bill to grant Raoul Wallenberg honorary American citizenship, and to request the President to press the Soviet officials on his whereabouts so that he will be released, if he is still alive, was ordered reported favorably, as amended, by the Judiciary Committee on September 15, 1981. The joint resolution which has some 300 sponsors has also been favorably reported by the Foreign Affairs Committee.

I want to add my personal support for the resolution. Mr. Wallenberg's courageous actions to save the lives of tens of thousands of Hungarian Jews threatened with Nazi extermination are without parallel. A wealthy Swedish businessman, Mr. Wallenberg could have spent the war relaxing at his home. Instead, he voluntarily stepped forward, and at great risk to himself and with the support his own Government, took on a perilous mission in Budapest.

His efforts received moral and financial backing from the U.S. War Refugee Board, which was established by President Roosevelt in 1944 to try to save the lives of Jews threatened during the holocaust.

Mr. Wallenberg disappeared in 1945 into the hands of Soviet officials in Hungary, and to this day the Swedish Government has not received a satisfactory explanation of his whereabouts.

I am hopeful that passage of this joint resolution will spur the Soviets into a proper response to requests for information about Mr. Wallenberg.

Awarding honorary American citizenship to an individual is probably the highest honor this country can bestow. Honorary citizenship has been awarded only once previously, to Sir Winston Churchill in 1963. We in this country value our citizenship highly. We realize it is an honor that should be bestowed upon only the most exceptional individual for the most exceptional act. Passage of this joint resolution cannot in any way be seen as a precedent for other awards of honorary citizenship, any more than the resolution honoring Sir Winston was a precedent.

I should point out that honorary citizenship is a symbolic act. Passage of this joint resolution does not afford Mr. Wallenberg any legal rights in this country or in international law. The Soviet Union is still responsible for responding to the Government of Sweden about Mr. Wallenberg's whereabouts, for he remains a Swedish citizen.

In conclusion, I support this resolution which honors a truly great humanitarian and trust that it will act as a symbol of our everlasting gratitude to those countless others who risked their lives to save those victims of Nazi persecution.

Mr. FISH. Mr. Speaker, I yield myself so much time as I shall consume.

Mr. Speaker, I am proud to express my wholehearted support for the adoption of House Joint Resolution 220, proclaiming Raoul Wallenberg to be an honorary citizen of the United States, and requesting the President to ascertain from the Soviet Union the whereabouts of Raoul Wallenberg and to secure his return to freedom. Raoul Wallenberg's extraordinary record of saving the lives of countless thousands of Jews during the holocaust, at great personal risk and sacrifice, amply justifies this Nation conferring upon him its highest honor by proclaiming him an honorary citizen of the United States.

Mr. Wallenberg undertook his perilous mission at the behest of the United States and the American War Refugee Board. The passage of House Joint Resolution 220 will represent a ringing affirmation of America's commitment to the survival of the Jewish people and our tremendous esteem for someone who risked his own life to try to save so many Jewish lives from Nazi extermination.

A number of bills have been introduced over the years to confer honorary citizenship on various persons, but the only successful effort to date related to Sir Winston Churchill. The conferral of honorary citizenship on Raoul Wallenberg, however, will not establish a precedent for similar action on behalf of a number of other heroic figures. The fact that our action today will not serve as such a precedent is clear for a number of reasons:

Raoul Wallenberg's valiant efforts to save thousands of Jews from the holocaust provide an appropriate basis for distinguishing this bill from bills introduced on behalf of others. Conferral of honorary citizenship on Wallenberg, unlike any other honorary citizenship bill Congress has considered heretofore, will symbolize our commitment as a Nation to remember the holocaust and vigilantly guard against the possibility of any recurrence. Congressman LANTOS, who introduced this joint resolution, testified before the Subcommittee on Immigration, Refugees, and International Law that—

> We need to establish a clear record for posterity that America, through Wallenberg, did act to prevent the holocaust in its final days.

During the subcommittee hearings, I requested Congressman LANTOS to develop this idea further and place Mr. Wallenberg's actions in the context of other actions, or even inaction, by the United States to prevent the holocaust. Congressman LANTOS' answer, I believe, should be brought to the attention of the House, and for that reason, I will quote from it at some length:

> It is important to underscore that Wallenberg was not a diplomat. Wallenberg was a young man living in the comfort and safety and affluence of neutral Stockholm during the brutal closing days of World War II.
>
> He left behind a most promising career as the son of Sweden's most prominent family, the safety, the security, the comfort of Stockholm, to voluntarily assume the task of saving human lives. * * *
>
> So Raoul Wallenberg did not think of this mission himself. This was not an activity that stemmed from his own plans. It was a mission that he undertook at the specific request of the Secretary of State of the United States.
>
> The United States, therefore * * * bears a very heavy responsibility for the untold numbers of years that this young Swede spent under the nightmarish conditions of the Gulag Archipelago. Whether he died earlier or whether he is alive today, it is we, the United States, who are responsible for his tragedy and for his lost life. * * *
>
> * * * (A) great deal of criticism has emerged over the course of years concerning the failure of the Western Powers to act in decisive ways to stop the slaughter.
>
> Questions such as why weren't the railroads bombed? Why wasn't there an attempt to liberate the camps earlier?
>
> Here is a tangible demonstration that the United States officially acted and successfully acted to save approximately 100,000 people. Our record for World War II is a better record because of the actions of Raoul Wallenberg undertaken at our own behest.

Honorary citizenship is singularly appropriate in the Wallenberg case, not only because of the place the holocaust occupies in the history of human depravity and our national commitment to the survival of the Jewish people. The fact that Wallenberg acted at the behest of the United States and suffered untold misery as a result of it, establishes our interest as a Nation in giving this special recognition to him. The Soviet Union, in addition, never satisfactorily has accounted for what happened to Mr. Wallenberg. The conferral of honorary citizenship on him may give the United States added leverage with the Soviet Union in determining whether he is still alive and possibly in securing his release.

Honorary citizenship is exactly what its designation implies—namely, an "honor" that does not confer on either Mr. Wallenberg or any members of his family any rights or privileges under the Immigration and Nationality Act. The concept of honorary citizenship must be distinguished clearly from citizenship itself. No member of Mr. Wallenberg's family, as a result of our action today, can possibly claim any derivative rights under our laws. Even Mr. Wallenberg himself will not be recognized as an American citizen under United States domestic law or under international law if he is found to be still alive. Conferral of honorary citizenship in no way can be described as giving away anything tangible. The meaning and significance of our action today is entirely symbolic—but it is a critically important symbolic gesture in an age when many nations treat human life so cavalierly.

A few of the statements in the legislative record underscore the critical significance of the step we are about to take today. Secretary of State Alexander M. Haig, Jr., said that Mr. Wallenberg's "contribution during the dark days or World War II in Hungary stands out as a beacon to all those who respect human rights and dignity." He expressed his full support for this legislation. Assistant Secretary of State Richard Fairbanks informed the Judiciary Committee that—

> The conferral of honorary U.S. citizenship on Wallenberg would serve to underscore the seriousness with which the American government and people view Soviet behavior in the Wallenberg case. Conferral of honorary U.S. citizenship on Wallenberg would also serve to reaffirm to the Government of Sweden that the United States firmly supports the quest to resolve Wallenberg's fate.

Former Secretary of State Edmund Muskie informed two subcommittees of the House Committee on Foreign Affairs that—

> (T)he chronological record * * * of State Department and war refugee cables and communications * * * documents the U.S. Government's position of responsibility for the selection of Wallenberg, the directive and funding for his activities, the appreciation for his work, and the deep distress over his disappearance.

Mr. Muskie concluded that it is—

> The uniqueness, the extraordinary link between a man, Raoul Wallenberg, and our Nation's conscience that makes this action appropriate.

Mr. Muskie went on to say:

> Raoul Wallenberg's mission on behalf of the United States, behind Nazi lines in World War II, was without precedent. What he accomplished, on our behalf, risking his own life to save the lives of tens of thousands of people, is unparalleled in our history. The cost to him, the years of his life, can never be repaid.
>
> The action of bestowing honorary citizenship on Wallenberg, undertaken by the Congress of the United States, will recognize his humanitarian sacrifice under our direction. This is an important part of American history. This adoption of Raoul Wallenberg as our own citizen makes clear to our posterity that the American government did act to save lives threatened by the Holocaust.

I can add nothing further to the eloquent statements submitted by numerous witnesses before subcommittees of both the Committee on Foreign Affairs and the Committee on the Judiciary—witnesses who underscored the critical importance from both a national and international perspective of recognizing Raoul Wallenberg in this unique way for the unprecedented things he did at our request.

□ 1230

Mr. FISH. Mr. Speaker, I yield such time as he may consume to the ranking minority member of the Committee on Foreign Affairs, the gentleman from Michigan (Mr. BROOMFIELD).

Mr. BROOMFIELD. Mr. Speaker, in the course of deliberations in this august body, only occasionally do we encounter issues which cut to the core of our existence as human beings. Only occasionally do we touch upon a subject that truly reflects man's purpose in life and his obligations to his fellow man. House Joint Resolution 220, granting honorary citizenship to Raoul Wallenberg, is such a matter. It deserves our enthusiastic support.

I am sure that by now everyone here is familiar with the Raoul Wallenberg case. For many, especially the 100,000 Hungarian Jews whose lives were saved by Wallenberg's heroic acts, his case represents a sorrowful tragedy in our time. As a Swedish businessman and later as an attaché to the Swedish legation in Budapest during World War II, Wallenberg issued documentation, provided a safe haven, and otherwise assisted 100,000 Jews at great risk to his own life. His intervention with local government officials spared countless numbers of Jews from certain death in Nazi concentration camps.

The scale of Wallenberg's actions is perhaps unparalleled in history. I do not make such a statement lightly. In the heart of Nazi-occupied territory, under the eye of history's most monstrous regime, Wallenberg devoted himself to the liberation of those persecuted millions who were marked for extinction merely because of their religion. His success was beyond the limits of what was thought possible. But at the crowning moment of his accomplishment, at a time when liberation for all appeared within reach, Soviet troops seized Wallenberg in January 1945.

Despite Soviet statements that Wallenberg died in 1947, repeated reports have indicated that Wallenberg was alive over the years and is still believed to be languishing in a Soviet prison today. For such a fate to be inflicted upon a man who has given so much of himself is a tragedy beyond proportion. Only an inhumane system such as the Soviet Union's would commit such a heinous crime as holding Wallenberg over all of these years. I do not know or understand why the Soviets would keep Wallenberg imprisoned all this time, but the Soviets have never abided by Western standards of decency and continue today to commit further acts of atrocity among their own people and in Afghanistan.

We have before us a clear opportunity to send a strong message to the Soviet Union on the fate of a heroic individual. Wallenberg is not only a symbol of everything that is decent in mankind, but his spirit is embodied in thousands of Hungarian Jews who are still alive today because of his efforts.

I know of no better way of repaying mankind's debt to Wallenberg than to grant him honorary citizenship and demand that the Soviet Union account for his presence.

Mr. RODINO. Mr. Speaker, I yield 4 minutes to the distinguished chairman of the Committee on Foreign Affairs, the gentleman from Wisconsin (Mr. ZABLOCKI).

Mr. ZABLOCKI. Mr. Speaker, I rise in support of House Joint Resolution 220, proclaiming Raoul Wallenberg to be an honorary citizen of the United States, and requesting the President to ascertain from the Soviet Union the whereabouts of Raoul Wallenberg and to secure his return to freedom, as amended.

At the outset, I would like to heartily commend the Honorable TOM LANTOS, the initiator and chief sponsor of House Joint Resolution 220, for his persevering efforts on behalf of the resolution. Congressman LANTOS has worked very diligently on the measure which honors the Swedish diplomat, Raoul Wallenberg, with U.S. citizenship. Congressman LANTOS credits his life and that of his wife to the courageous efforts of Raoul Wallenberg.

The resolution before us, as amended, is identical to Senate Joint Resolution 65. In the House, House Joint Resolution 220 was co-referred to the Committee on the Judiciary, chaired by our distinguished colleague, the Honorable PETER W. RODINO, JR., and to the Committee on Foreign Affairs. Both committees considered the resolution and ordered it favorably reported. The Foreign Affairs Committee filed its report—97-152, part 1—on June 17, 1981. The Judiciary Committee reported a version identical to that passed by the Senate. The Committee on Foreign Affairs concurs with the amendment added by the Senate and the Judiciary Committee. That amendment makes it clear that the conferring of honorary citizenship on Raoul Wallenberg is an extraordinary measure, and is not to be regarded as setting a precedent.

During World War II, Raoul Wallenberg, who exhibited unparalleled bravery, was instrumental in saving the lives of an estimated 100,000 Hungarian Jews. In 1945, Wallenberg was imprisoned by the Soviets in violation of his Swedish diplomatic immunity and international law. There have recently been reports indicating that Raoul Wallenberg may still be alive.

The resolution recognizes the extraordinary heroism of Raoul Wallenberg and grants him honorary U.S. citizenship—an extremely unusual action. Further, the measure calls on the President to press the Soviets for a determination of Wallenberg's whereabouts, and to secure his return to freedom.

Mr. Speaker, I urge the adoption of House Joint Resolution 220, as amended.

Mr. FISH. Mr. Speaker, I yield 3 minutes to my colleague, the gentleman from New York (Mr. KEMP).

Mr. KEMP. Mr. Speaker, I appreciate my friend's yielding to me this time, and I wish to congratulate him, as well as the gentleman from Michigan (Mr. BROOMFIELD), Mr. RODINO, the distinguished chairman of the Committee on the Judiciary, and Mr. ZABLOCKI, the distinguished chairman of the Committee on Foreign Affairs.

I commend also our colleague, the gentleman from California (Mr. LANTOS) and his wife, Annette, whose tireless efforts for this cause have brought this moment to pass.

Mr. Speaker, in the New Testament of the Bible it says to "let your light so shine before men that they may see your good works and glorify the Father who art in Heaven." I really believe Raoul Wallenberg was such an individual. Today we can see better how to combat the darkness in the world because of the inspired life of Raoul Wallenberg.

Mr. Speaker, I had the honor of testifying on this joint resolution of which I'm a cosponsor as a representative of the Simon Wiesenthal Institute on the Holocaust in Los Angeles, Calif. It was the great efforts of the people at the Institute, Mr. Speaker, that helped alert many Members of Congress to the need in the world today to study and remember the Holocaust to assure the world, Jew and Christian alike, that there will never again be a time such as we experienced in this world during the 1930's and 1940's.

Raoul Wallenberg is one of those rare individuals whose light not only shone in terms of his ability to safeguard Jewish lives but whose light shines to all of us today as a humanitarian. I think he is alive and I happen to believe that the Soviet Union knows where he is and that this resolution will force open his case for all the world to see.

I want the world to know that there are Members of Congress on both sides of the aisle who testified during the hearings, as reflected today in this joint resolution, who not only cosponsored it but who would willingly vote for it. It will then be signed by the President, and I hope the President signs it with the type of ceremony that will send a signal that will shine across the world, right in the deepest and darkest places of the Gulag Archipelago and say to the Soviet Union that America and its people, Jew and Gentile alike, refuse to forget Raoul Wallenberg, and that we stand beside him and what he did, not only on behalf of Jews but for all people who suffer. I want this light to shine for other people unjustly imprisoned by the Soviets, who have no other hope for freedom than our intervention, like Anatoly Shcharansky, who has been languishing in a Soviet prison for over 4 years, and whose wife calls me from Israel to plead on his behalf, and for Ida Nudel and all others like them.

It is important to note that Raoul Wallenberg acted on behalf of the United States. It is through him that we can claim that we did intervene to help save the Jewish people from total annihilation, that we did not just stand aside and allow this to happen.

We do not bestow this honor lightly, that of honorary citizenship. This is an action we are taking to enable us to recognize one man who had the courage to take a stand in a German-occupied country, and singlehandedly save thousands of lives, acting in the name of the United States as well as his native Sweden. He should be justly rewarded for his efforts and I can think of no reward greater or more fitting than to acknowledge his actions for our country by giving him our citizenship.

And there is poetic justice in granting Raoul Wallenberg U.S. citizenship. One of his most successful tactics was to issue papers to the Hungarian Jews giving them Swedish citizenship and

protection. We are now doing for this one man what he did for 100,000. Honorary citizenship for Raoul Wallenberg will give us the diplomatic leverage we need to pursue this matter with the Soviets, and, Mr. Speaker, we must do this, tenaciously, with the same motivation and success with which Raoul Wallenberg acted so many years ago. We must not allow the Soviets to bury him or his memory, which is so very much alive to all of us today.

Raoul Wallenberg is a true hero. He has proven that the human spirit is capable of achieving great things, for no personal gain. It is by his act of courage, of sacrifice, of selflessness, that all of humanity is redeemed. He did more than save thousands of lives. He was, and continues to be, a symbol of hope to millions who suffer at the hands of tyrants. His very name is a ray of light illuminating the darkness and the depths of those who suffered at the hands of the Nazis in World War II, and who suffer now at the hands of the Soviet oppressors.

Raoul Wallenberg has symbolized all of this for the past 40 years. His contribution to civilization is immeasurable and, while we honor him with our citizenship, we too should be honored that he chose to act on our behalf.

I am pleased to be a part of this effort. I particularly appreciate the wonderful leadership of my friend, the gentleman from California (Mr. LANTOS), and I appreciate all the efforts of the distinguished Members on both sides of the aisle who cosponsored this joint resolution.

Mr. RODINO. Mr. Speaker, I yield 4 minutes to the distinguished chairman of the Subcommittee on Immigration, Refugees, and International Law, the gentleman from Kentucky (Mr. MAZZOLI).

Mr. MAZZOLI. Mr. Speaker, House Joint Resolution 220 proclaims Raoul Wallenberg to be an honorary U.S. citizen and requests the President of the United States to ascertain from the Soviet Union Mr. Wallenberg's whereabouts and to take any necessary steps to secure his freedom if he is found to be alive.

It was my pleasure to serve as the subcommittee chairman during hearings on this joint resolution, before which, of course, appeared the gentleman from California (Mr. LANTOS), who deserves the praises that have been heaped on him today. We held the hearings to hear the testimony directly of the heroic actions and ultimately the very courageous actions taken by Mr. Wallenberg to protect the lives of tens of thousands of Hungarian Jews.

Mr. Wallenberg took those actions in almost reckless disregard of his own safety. He took those steps because he was deeply moved by the plight that was exhibited by these people, and even though he was not an American citizen and had no direct contact with the American Government, the actions he did take were not only sanctioned by the Government but were, of course, in the highest tradition of free nations in trying to protect the lives of people who were then oppressed.

During the course of the hearings and markup, Mr. Speaker, the gentleman from Kentucky, the chairman of the subcommittee, did bring up some concerns that he had with respect to the nature of the tribute. There is no question about the need to memorialize this gentleman and to give some evidence of the highest regard that this Nation has for his heroic actions, but the gentleman from Kentucky was concerned then, and is concerned today, with the nature of the tribute.

The use of the bestowal of honorary American citizenship is one which has only been done once before in our history, and that was with respect to Winston Churchill whose mother, of course, was an American citizen.

The gentleman from Kentucky's concern was that this might then become a tribute or an honor which we would confer frequently and perhaps to people who may not have taken the kinds of actions which Mr. Wallenberg took.

At the same time, the gentleman from Kentucky feels that if honorary U.S. citizenship is to be awarded and if the House is to take this action (because of an amendment the gentleman from Kentucky was able to put in the resolution, at the full committee, this resolution is not to be considered as a precedential action). I do as chairman of the subcommittee feel that there is no person more worthy of this honor than this gentleman, Raoul Wallenberg.

And if he is alive—and we all hope he is—I believe the action the House will take could help locate him and, upon that fact, help to free him and to return him to his homeland.

Mr. Speaker, I support the resolution despite my reservations.

Mr. FISH. Mr. Speaker, I am very pleased to yield 3 minutes to the gentlewoman from New Jersey (Mrs. FENWICK).

Mrs. FENWICK. Mr. Speaker, I suppose that today we are taking one of those rare actions of which we can all be proud, one which will make it clear not only to this country but, as my colleagues have said, to many countries around the world, that we are prepared to take a stand and at least to speak for principles which we believe to be important, for those values for which so many sacrifices have been made in so many parts of the world.

This is an honor for a man whose determination and courage saved the lives of so many people. It is an honor for us also, as Americans, that he should join us in this honorary citizenship. He acted against one of the greatest threats to world peace and freedom, and he represents the highest ideals toward which we can hope to strive.

Many of us would like to believe that we have taken actions in our lives to help those less fortunate than ourselves and to speak for justice. But how many of us have sacrificed our own personal fortunes and endangered our lives in the defense of the persecuted? There are not many people who can say that they have done what this man has done. He left a comfortable life in his native home and endangered his life in order to save thousands of individuals. Those who worked with Raoul Wallenberg were instilled with the same fearlessness. We have among our Members of Congress the distinguished gentleman from California who also endangered his life in working with Mr. Wallenberg. I speak, of course, of our distinguished colleague, the gentleman from California, Mr. TOM LANTOS.

During those terrible war years, many people in this world did not object to the atrocities that were committed around them.

□ 1245

Only when their own religious, racial, or ethnic group was singled out for harm did they raise their voices in protest. Wallenberg did not wait for his own security to be threatened. He volunteered to act on behalf of mankind.

The great physicist Andrei Sakharov said last year, in discussing the plight of those in prison or psychiatric hospitals or exile in the Soviet Union, that—

> Our only protection is the spotlight of public attention on our fate by friends around the world.

The least that we can do for Raoul Wallenberg is to focus attention on his case. By making him an honorary American citizen, our State Department can pursue his case more aggressively.

I think we must insist that the Soviet Union tell us what has happened to this man. Raoul Wallenberg was a true hero, a hero in the classic mold, and this savage century has produced few to match him.

Mr. RODINO. Mr. Speaker, I yield such time as he may consume to the gentleman from Florida (Mr. LEHMAN).

Mr. LEHMAN. Mr. Speaker, I have joined with my distinguished colleague TOM LANTOS of California in introducing legislation to make Raoul Wallenberg an honorary American citizen, and I strongly urge my colleagues to support this legislation.

Its passage will increase the international pressure needed to have the So-

viets reopen the Wallenberg case. As an honorary American citizen, Raoul Wallenberg will receive the attention he deserves from our Government.

As most of my colleagues know, Raoul Wallenberg was a Swedish diplomat assigned to the Swedish Legation in Budapest, Hungary, at the request of the American Government. His work was secretly funded by the War Refugee Board. He was responsible for saving the lives of hundreds of thousands of Hungarian Jews between July 1944 and January 1945. On January 17, 1945, he was arrested by Soviet authorities and imprisoned. He has not been heard from since. Despite the announcement by Soviet authorities that Wallenberg had died in 1947, numerous reports from former prisoners have provided evidence that he was seen alive as recently as 1975.

Wallenberg's actions in Europe were a unique contribution to humanity during those dark days of the holocaust. Our efforts to determine the fate of Raoul Wallenberg and to honor him and offer him some solace if he is alive will be a modest gesture to this man and the humanitarian ideals for which he was willing to risk his life.

Mr. RODINO. Mr. Speaker, I yield 5 minutes to the distinguished gentleman from California (Mr. LANTOS) who has worked so tirelessly championing the cause of Raoul Wallenberg and who has expressed, indeed, those sentiments of gratitude that all of us here feel for the great work of Raoul Wallenberg. Mr. LANTOS has, indeed, been our conscience to do justice. I applaud him and his efforts.

Mr. LANTOS. Mr. Speaker, this is a rare moment in the history of the Congress of the United States. It is only the second time in our national life that we are going to honor a man with the highest tribute that this Nation can bestow, honorary citizenship. Only Winston Churchill has ever before received this honor, together with the gratitude and recognition of the American people and, indeed, people who are committed to freedom across this planet, for his inestimable contributions to the preservation of free and open societies.

I am delighted that my colleagues who preceded me repeatedly emphasized that this is a nonprecedential, extraordinary act, because what we are talking about is an unprecedented and extraordinary human being. We are talking about a wealthy, young Swede living in the comfort and luxury and security of neutral Stockholm, who at the request of the Secretary of State of the United States of America went to war-torn Hungary for the sole purpose of defending lives there, of putting his own frail body between the intended innocent victims and the Nazi war machine, and succeeded with a degree of creativity and heroism unprecedented in the annals of history in saving 100,000 human beings, only to be rewarded by the Soviet Union with arrest and imprisonment for three and one-half decades in the dungeons of the Soviet Union in the Gulag Archipelago where he probably is today as we are honoring him.

I would like to express my deepest appreciation, Mr. Speaker, to my friends and colleagues on both sides of the aisle. I have received incredible support from my Republican friends and colleagues, for which I am profoundly grateful. I have received unprecendented help and support from my fellow Democrats, both here in the House and in the other body. I want to publicly acknowledge my debt to one person in particular, my wife, Annette, who is the founder of the International Free Raoul Wallenberg Committee, without whose commitment and dedication and perseverance this could not have happened.

The Secretary of State, the President of the United States, as a matter of fact, all of us have come together on behalf of this legislation, which should be an indication to our enemies that, while occasionally we have our disagreements and disputes, when it comes to fundamental principles the American people stand as one. The Secretary of State and the President now have the obligation to raise with the Soviet Union at the highest level the case of Raoul Wallenberg and the Russians have an obligation, if he is alive, to let him go free, and, should he no longer be with us, to finally come clean and tell the truth of what, in fact, happened to this man who has made all of us proud to be members of the human race.

I would like to express my deepest appreciation to my colleagues.

Mr. WEISS. Mr. Speaker, will the gentleman yield?

Mr. LANTOS. I am happy to yield to my colleague from New York (Mr. WEISS).

Mr. WEISS. Mr. Speaker, I want to commend the gentleman in the well and his lovely and dedicated and committed wife, Annette, because the two of them together, long before the gentleman's arrival in these Halls, focused international attention on the achievements and the plight of Raoul Wallenberg. Their magnificent efforts are crowned today. Not only do we honor Raoul Wallenberg, we honor ourselves as well by adopting this resolution. Hopefully, too, perhaps our action will help to save his life.

Mr. Speaker, I wholeheartedly support House Joint Resolution 220, which bestows honorary citizenship on Raoul Wallenberg, who almost singlehandedly was responsible for saving 100,000 Hungarian Jews from Nazi death camps during World War II.

With the passage of this resolution, Raoul Wallenberg would join Winston Churchill as only the second foreign national to be so honored. As Churchill richly deserved his citizenship, so does Wallenberg deserve his. His name is not a household word, but his deeds show him to be the rarest kind of hero, one who, day in and day out, risked his life to save the lives of others he did not know and in whose country he had never lived. He is an international hero and an inspiration to all humanity.

Wallenberg did his work with the most uncertain of tools: His status as a neutral diplomat, and his personal courage. He used those tools as well as they could be used, almost beyond conception. In a frantic, wartime situation charged with prejudice and fear, he managed to convince hostile authorities to respect Swedish protective passports he distributed. At times, he even managed to intimidate those with power of life and death over him and over those he saved. He prevented the massacre of 70,000 residents of Budapest's Jewish ghetto by the Hungarian Nazis, the Arrow Cross, by threatening the German commander in the city with eventual hanging as a war criminal if he did not stop it. The German general did as Wallenberg requested.

We do not know Wallenberg's fate. Taken prisoner by the Russians in 1945, he may have died in a Soviet prison, or he may remain alive in one. The Soviets have claimed he died in 1947. Yet reports persist that he was alive much later, even in January of this year.

This resolution gives Wallenberg, if alive, no additional legal rights under U.S. or international law, according to the Committees on the Judiciary and Foreign Affairs. Yet I hope it can give the quest for accurate information about his fate even more urgency, and aid our continuing efforts to find him.

As sponsor of a resolution adopted last year to honor Wallenberg, I have long been familiar with his story. Now perhaps we can come closer to giving that story an ending.

Again, I commend the gentleman from California and his distinguished wife, Annette, for their unflagging leadership in this historically significant cause.

Mr. RODINO. Mr. Speaker, I yield such time as he may consume to the gentleman from New Jersey (Mr. HUGHES).

Mr. HUGHES. Mr. Speaker, I thank the gentleman from New Jersey (Mr. RODINO), chairman of the full Judiciary Committee, for yielding.

I rise in strong support of the resolution.

On rare occasions in human history, extraordinary circumstances have brought about unique acts of heroism by brave individuals. World War II was such an occasion. Hungary in 1944 provided the circumstances. And

Raoul Wallenberg, a young Swede, was the unique and courageous individual.

Wallenberg's heroic actions are credited with having delivered over 90,000 Jews from near certain death in the insane waning months of Nazi rule. Yet, instead of receiving the acclaim and honor due a person of such fantastic accomplishment, he was apparently imprisoned by Soviets when they took control of Budapest. According to Soviet accounts, the young Wallenberg died of a heart attack in a Soviet prison in 1947. Were this the end of the story, it would be a tragic and inexcusable end to the life of a man who had risked so much to preserve the lives of others.

But this was not the last to be heard of Raoul Wallenberg. Reports began to emerge that this almost legendary individual was not dead, but living in captivity in the Soviet Union's shameful Gulag. The Soviet Union complacently denies such accounts, yet provides no conclusive evidence to the contrary. Perhaps ashamed to admit their treatment of this fine man, or perhaps shamelessly flouting world opinion, Soviet leaders have maintained their account of his death, and provided nothing else.

We cannot allow the matter to rest as it is. We in the Congress must act now to the full extent of our power to seek a legal, diplomatic means to rescue Wallenberg if he is alive, just as he used every possible means to rescue Jews from Hungary. I urge my colleagues to approve this resolution, and persist in our efforts to save this savior of thousands.

Mr. RODINO. Mr. Speaker, I yield 1 minute to the gentleman from Massachusetts (Mr. FRANK).

Mr. FRANK. Mr. Speaker, I appreciate the gentleman yielding. I want to join in paying tribute to the very dedicated and inspiring work of Congressman LANTOS and of his wife, who really, I think, have given us all an opportunity to join in a moment of which the House can be proud.

By honoring Raoul Wallenberg we are doing two things. First of all, we are paying an unusual tribute to an extraordinary human being, a man who, as the gentleman from California described his work, performed an extraordinary feat on behalf of humanity. Second, we honor a man who was one of the genuine heroes of the holocaust, and we do a unique act today because we are dealing with a uniquely terrible act, the holocaust. It is appropriate, I think, that we take this extraordinary and unique action on behalf of this individual, both to honor him and, by so honoring him, to express our determination that that terrible event will never happen again. Finally, we put whatever pressure can then be put, hopefully, on the Soviet Union.

As the gentleman from California (Mr. LANTOS) said, they barbarously rewarded one of the great acts of compassion in human history with arrest, imprisonment, and with an attempt to make one of the heroes of our time a nonperson. Today, we do what we can to urge the Soviet Union to close its persecution of Raoul Wallenberg.

Mr. FISH. Mr. Speaker, I yield 5 minutes to my colleague, the gentleman from New York (Mr. GILMAN).

Mr. GILMAN. Mr. Speaker, I thank the gentleman for yielding and I rise to express my support for the passage of House Joint Resolution 220, which proclaims Raoul Wallenberg an honorary citizen of the United States and requests that the President ascertain his whereabouts and secure his freedom.

Mr. Speaker, I want to commend the distinguished chairman of our Foreign Affairs Committee, the gentleman from Wisconsin (Mr. ZABLOCKI); our ranking member, the gentleman from Michigan (Mr. BROOMFIELD); the chairman of the House Judiciary Committee, the gentleman from New Jersey (Mr. RODINO); and the chairman of the Subcommittee on Immigration and Refugees and International Law, the gentleman from Kentucky (Mr. MAZZOLI); and the ranking minority member on the committee, the gentleman from New York (Mr. FISH), for their efforts in bringing this resolution to the floor today.

We have long awaited the passage of legislation which would honor, and secure a commitment to locate and aid Raoul Wallenberg. During the 96th Congress, some of us were privileged to work for the passage of legislation honoring Mr. Wallenberg. We owe particular thanks to our colleague, the gentleman from California (Mr. LANTOS) and wife Annette for the outstanding work in securing the passage of House Joint Resolution 220, which is directed toward fulfilling the responsibility of the United States to aid humanitarians of the world.

Raoul Wallenberg has often been called "the lost hero of the holocaust." He succeeded in securing passports for some 30,000 Jews in Budapest in 1944, which permitted them to leave the country and escape death at the hands of the Nazis. It has been reported that more than 100,000 Jews were able to escape persecution largely due to the efforts of Raoul Wallenberg.

Wallenberg's mission in Budapest was due in part to a request from the American Refugee Board. Entering Hungary in July of 1944 as Sweden's First Secretary at the Legation in Budapest, he courageously worked to rescue thousands of Jews from the Nazis until his disappearance behind the Iron Curtain in January of 1945. Shortly thereafter, the Soviet Foreign Ministry reported that Wallenberg had been taken into "protective custody." Two years later, in 1947, the Soviets announced that Wallenberg "must have died" during the fighting in Budapest. During the years that followed, the Swedish Foreign Ministry received several reports from former prisoners of war who claimed to have seen or heard of Wallenberg while in prison in Moscow. The Soviet Government then revised its statement, saying that Wallenberg had suffered a heart attack and died in 1947.

The family of Raoul Wallenberg, along with many of us here in the Congress who have taken an interest in his case, do have reason to believe that Raoul Wallenberg might still be alive. If this is the case, then the Soviet Union has, by its lack of cooperation, violated the Helsinki accords, in which it agreed to protect the human rights of its citizens.

Raoul Wallenberg demonstrated over and over again his humanitarian concerns. Indeed, it is so widely acknowledged that Wallenberg acted out of a passion for humanity that in 1949 Albert Einstein recommended that Raoul Wallenberg be awarded the Nobel Peace Prize. Surely our Nation should recognize and reward these outstanding qualities, and further acknowledge Wallenberg by insisting that the Soviet Union provide us with information regarding his whereabouts, in the name of humanitarian concern.

Thirty-six years have passed since Raoul Wallenberg disappeared in Budapest. Let us wait no longer to honor and seek the freedom of this great humanitarian.

Accordingly, I urge my colleagues to support this resolution.

□ 1300

Mr. FISH. Mr. Speaker, I have no further requests for time, and I reserve the balance of my time.

Mr. RODINO. Mr. Speaker, I yield 1 minute to the gentleman from Washington (Mr. BONKER).

Mr. BONKER. Mr. Speaker, I am pleased to rise in support of House Joint Resolution 220, as amended, granting honorary U.S. citizenship to Raoul Wallenberg and requesting the President to ascertain from the Soviet Union Mr. Wallenberg's whereabouts and to take steps to secure his freedom.

The Subcommittee on Human Rights and International Organizations last session conducted a series of hearings on the problem of disappearances. At that time we identified the Raoul Wallenberg case as a human rights problem as it related to the phenomenon of disappeared persons. The subcommittee conducted several hearings, and the full committee had an opportunity to hear from the gentleman from California (Mr. LANTOS) and his wife. While they spoke eloquently for themselves and their own personal

experience under Nazi occupation in Hungary, I think they spoke for tens of thousands of Jewish people who experienced a different fate. But nonetheless, we have raised this case, this courageous, wonderful person's name, and to grant him honorary citizenship I think will give our Government an opportunity to renew its efforts to secure Raoul Wallenberg's identity and possible release from the Soviet Union.

The Subcommittee on Human Rights and International Organizations, which I chair, first raised the issue of Raoul Wallenberg in the 96th Congress. I asked then, Why is it a crime to have saved tens of thousands of lives? Wallenberg's disappearance in January 1945 after the Russians had captured Budapest is one of the oldest cases of the phenomenon of disappearances. The Soviets insist that he died in 1947, but over the ensuing 3 decades there have been reports that Wallenberg is alive and in a Soviet prison.

In response to a request from the American War Refugee Board and the World Jewish Congress, Swedish diplomat Raoul Wallenberg went to Budapest in 1944 after the Nazis began deporting Hungary's 700,000 Jews to extermination camps. Working personally for 7 months, Wallenberg is credited with saving about 100,000 Hungarian Jews from extermination.

During the 96th Congress, we passed House Concurrent Resolution 434, to honor Raoul Wallenberg, and to express the sense of the Congress that the U.S. delegation to the Madrid Conference on Security and Cooperation in Europe urge consideration of the case of Raoul Wallenberg at that meeting, and to request that the Department of State take all possible actions to obtain information concerning his present status and secure his release.

House Concurrent Resolution 434 passed the House on October 2, 1980, and the Senate on November 19, 1980.

Today, it is fitting that we pass House Joint Resolution 220 as amended. I want to specially commend our distinguished colleague, TOM LANTOS, for his work and sponsorship of this resolution. He and his wife, Annette, must be commended for their continuing efforts to find the whereabouts of our genuine hero of this generation.

● Mr. YATES. Mr. Speaker, it is with a deep sense of pride and honor that I join with my good friend, TOM LANTOS, in supporting and cosponsoring House Joint Resolution 220, bestowing honorary citizenship upon Raoul Wallenberg. It is an unprecedented moment in the history of the House that we give this recognition, the highest within our Nation's power for a noncitizen, to this distinguished citizen of Sweden and, truly, of the world.

The action we take today carries many meanings. It conveys the belated acknowledgment and gratitude of the United States for the heroic actions taken by Wallenberg at the request of then Secretary of State Cordell Hull, an association which may well have been the cause of his imprisonment. It recognizes the debt which all free people owe to one whose work saved the lives of over 100,000 innocent victims of totalitarianism. It sends a signal to the Soviet Union that the United States has not forgotten its historic commitment to human rights, a voice which seems to have been lost in the recent cacaphony of arms buildup and the new cold war. Finally, it represents the culmination of years of effort by TOM and Annette Lantos in raising the consciousness, and the conscience of the Congress and the American people to the work and the plight of Raoul Wallenberg.

The story of Raoul Wallenberg is one of courage, devotion, and supreme humanitarianism. While those such as he lie imprisoned, no one can be truly free.●

● Mr. FIELDS. Mr. Speaker, throughout history certain unique individuals have willingly sacrificed much to save their fellow man. In my judgment, Raoul Wallenberg is one such individual.

In the darkest hours of World War II, when much of the world attempted to ignore the Nazis' atrocities, this young Swedish diplomat came forth, at great personal risk, and sacrificed his freedom so that thousands of fellow human beings could be saved from extermination.

Like so many of his contemporaries, Raoul Wallenberg could have spent the war in comfort and safety. Instead, he choose to give up this safety by traveling to war torn Hungary, where he printed thousands of Swedish passports of his own design and began literally pulling Jews off the cattle trains bound for Auschwitz claiming them as Swedish citizens.

And, when confronted with threats to his own life, Wallenberg would respond, "Sure, it gets a little scary, sometimes. But for me there is no choice. I have taken on this assignment and I would never be able to go back to Stockholm without knowing inside myself I had done all a man could do to save as many Jews as possible."

Mr. Speaker, the world is now aware of Raoul Wallenberg's tireless efforts and ceaseless dedication. Unfortunately, however, even now, more than 30 years later, we are still waiting to thank him for his extraordinary accomplishments.

While the Russians would have us believe that he died many years ago, a number of people who have survived the horrors of Russian prison life in recent years, claim to know that Raoul Wallenberg lives.

I believe we have a responsibility to solve this mystery surrounding Raoul Wallenberg's fate, and I believe we must do whatever we can, even at this late hour, to determine what happened to this great humanitarian.

Had Raoul Wallenberg decided to safeguard only his own freedom, thousands of Hungarian Jews would not have survived the Nazi holocaust, as we all know, one of those survivors is with us here today—Congressman TOM LANTOS—and he is to be commended for his leadership and his dedication to this noble cause.

Mr. Speaker, Raoul Wallenberg is the lost hero of the holocaust. He remains a living legend for the Jews of Budapest. Few men have ever done so much to save so many, We must not let the world forget the horrors of the holocaust nor the accomplishments of this courageous man.

Let us hope that 1 day in the not too distant future we will have an opportunity to meet this rare human being.

I urge the immediate adoption of this legislation (H.J. Res. 220) which will not only honor this brave and humane man, but will reaffirm our own country's dedication to the principles for which Raoul Wallenberg sacrificed so much.●

● Mr. HOLLENBECK. Mr. Speaker, I rise to join my colleagues in urging the swift passage of House Joint Resolution 220 making the Swedish hero Raoul Wallenberg an honorary American citizen. I believe that our approving House Joint Resolution 220 this afternoon would send a very clear message to Soviet authorities who I accuse of deliberately withholding information relevant to Mr. Wallenberg's continued existence. It would relay to these officials that the U.S. Congress is unwilling to sit idly by while a great injustice is being perpetrated against an individual whose only crime should have made him a hero of epic stature. I know that a majority of my colleagues in this distinguished Chamber share my commitment to ascertaining the truth concerning Wallenberg's whereabouts and will not hesitate to approve the resolution before us and thereby provide the vehicle through which this country's investigation can proceed.●

● Mr. WAXMAN. Mr. Speaker, I wish to express my strong support for House Joint Resolution 220, which would grant honorary U.S. citizenship to Raoul Wallenberg. As many of us know, Raoul Wallenberg embarked on an effort to save the lives of Jews threatened by the Nazis in Hungary during the Second World War. He received support for his mission from President Roosevelt and the American War Refugee Board, and from his homeland of Sweden. He succeeded in helping 200,000 Jews escape the Nazi death camps.

Mr. Wallenberg was taken into custody by the Soviets in 1945, and has not been heard from since. In 1957, the Soviet authorities notified the Swedish Government that Mr. Wallenberg had died in prison in 1947. As late as last January, however, former prisoners have reported seeing Mr. Wallenberg in Soviet prisons.

Mr. Wallenberg is a true hero, to whom the world is indebted for an outstanding act of courage and sacrifice in a moment of great danger to Jews and to us all. The Soviets' reasons for imprisoning him are unfathomable. I hope that in granting citizenship to Mr. Wallenberg we will communicate to the Soviets the depth of our concern and increase our leverage in securing his release.

I also want to express my deepest appreciation to TOM LANTOS, who has been the conscience of this House, and of our country, on this issue. Because of his efforts, we are taking a step that should have been done a long time ago. Our vote today is a tribute to TOM and his wife, Annette, who have devoted themselves so tirelessly to ascertaining the fate of Raoul Wallenberg.

Mr. Speaker, I urge the unanimous adoption of this resolution.●

● Mr. BOLAND. Mr. Speaker, I strongly support House Joint Resolution 220, legislation which would bestow honorary U.S. citizenship on Raoul Wallenberg.

As my colleagues know, the capture and subsequent disappearance of Mr. Wallenberg was one of the great international tragedies of World War II. He arrived in Budapest, Hungary, in the summer of 1944 on a mission of mercy. While posted as First Secretary of the Swedish Legation, Wallenberg's purpose in being in Hungary was to direct efforts aimed at saving Jews from Nazi extermination camps. While precise figures are not obtainable, it is likely that Wallenberg gave direct protection to at least 20,000 Jews through the issuance of protective passports, and, through diplomatic means, saved 100,000 more. These efforts, which should have earned Wallenberg the thanks and praise of humanity, were instead rewarded with imprisonment and perhaps death in the Soviet Union.

For the last 36 years, various individuals, groups, and governments have attempted to ascertain the truth about what happened to Mr. Wallenberg after he presented himself to a Soviet street patrol in Budapest on January 13, 1945. These efforts have not been successful because the Soviet Union has chosen not to cooperate with them. Since Mr. Wallenberg undertook his mission in large part because of a request by the American War Refugee Board, I believe that the United States has a special obligation to demonstrate its concern to the Soviets over the handling of the Wallenberg case. For that reason, I cosponsored House Joint Resolution 220 and urge my colleagues to approve it. I commend the gentleman from California (Mr. LANTOS) for his leadership on this issue and the chairmen of the Foreign Affairs Committee and the Judiciary Committee for their efforts to ensure that the House had an opportunity to vote on this legislation. I hope that the passage of House Joint Resolution 220 will generate a level of international publicity sufficient to make it impossible for the Russians to continue to less than fully disclose the facts on the Wallenberg matter.●

● Mr. BIAGGI. Mr. Speaker, I rise in support of House Joint Resolution 220, which will grant honorary American citizenship to Raoul Wallenberg. Mr. Wallenberg, a Swedish diplomat, is responsible for saving thousands of Hungarian Jews from extermination in Nazi concentration camps. Soon after the Soviet occupation of Hungary in 1945, Mr. Wallenberg disappeared and he has not been seen nor heard from since that time.

It is my privilege to join Representative LANTOS as a cosponsor of this legislation. American citizenship will provide the United States with the authority to formally approach the Soviet Union for information on Mr. Wallenberg's fate. At this time, we do not know if Mr. Wallenberg is dead or alive even though the Soviet Government has claimed that Mr. Wallenberg died in prison in 1947. Several former inmates of Soviet prisons have claimed that they saw or heard of a Swedish prisoner by the name of Wallenberg—who is still alive.

I find the Soviet Government's arrest and detention of Mr. Wallenberg to be reprehensible. I find it even more distressing that the Soviet officials refuse to provide the free world with details of Mr. Wallenberg's fate.

I would like to commend the Swedish Government for its efforts to obtain information on Mr. Wallenberg. Their efforts have been consistent and untiring. However, the United States, as a world power can exert even greater influence on the Soviet Government once Wallenberg is an American citizen.

I want to take this opportunity to commend Judiciary Committee chairman, PETER RODINO, and his staff for promptly reporting this legislation to the full House. I also want to bring to my colleagues' attention the efforts of the Members of the Helsinki Commission, the U.S. State Department and representatives of the American Embassies in Sweden and the Soviet Union for their untiring efforts in appealing to the Soviet Government to release information about Wallenberg's fate.

I urge my colleagues to vote in favor of House Joint Resolution 220.●

● Mr. BINGHAM. Mr. Speaker, I rise in support of this resolution which would confer honorary citizenship on Raoul Wallenberg. Raoul Wallenberg is clearly one of the century's great heroes. During a time of unspeakable horror Raoul Wallenberg stepped forward and risked his life and his freedom to aid the imperiled Jews of Hungary. Raoul Wallenberg's courage was all too rare during the dark days of the holocaust but his example demonstrates that individual courageous acts, like Wallenberg's, could have saved countless Jewish lives. He, and he alone, was perhaps responsible for saving 100,000 Jews.

Wallenberg paid a heavy price for his courageous acts. He was arrested by Soviet occupation authorities at the conclusion of the war and whisked off to exile somewhere in the Soviet Union. Press reports now indicate that the Soviet officer who ordered the arrest of Wallenberg was none other than Leonid Brezhnev. We have yet to learn why Wallenberg was taken prisoner but there is reason to believe that it was because he told the Soviet authorities that his rescue work was done at the behest of President Franklin Roosevelt and the U.S. War Refugee Board. For whatever reasons, Wallenberg vanished into the Soviet gulag and has only been seen on a handful of occasions since.

There is reason to believe that Wallenberg may still be alive. Accordingly this resolution makes a great deal of sense. In bestowing honorary citizenship to Wallenberg we are telling the Soviet Government that we are deeply concerned with his fate. If he is alive, he must be allowed to go home. If he is dead, we must know the circumstances of his death and the reasons for his imprisonment. I am proud to support this resolution. In conferring citizenship on this great man, we not only honor Wallenberg, we also bring credit to our own country.●

● Mrs. HECKLER. Mr. Speaker, the holocaust in Europe was a time of horror that all of us pray will never recur—and yet it will never end, either. The memory of the atrocities that occurred, the images of a world seemingly gone mad, have been embedded in our national consciousness, never to be forgotten.

Neither will we forget the accounts of heroism and honor with which the victims of the holocaust, and those who sought to rescue them, defied the siege of terror.

We cannot afford to forget. The lessons of that horrible era are too vital—they strike too close to the essence of modern society—for us to let them fade with time.

The leaders of the Soviet Union want the world to forget. It is in their interest to obscure the memory of the Jewish persecution—and to obliterate

the record of valiant struggle waged by the Jews of Europe, and those who dared defend them, against the purveyors of genocide.

Raoul Wallenberg is an integral figure in the drama of the holocaust.

He was, in the purest sense of the word, a hero. The son of a wealthy Swedish family, he could have chosen to live a life of ease. Instead he chose to risk his life in defense of a people with whom he shared only the common bond of humanity.

Because of Raoul Wallenberg's determination and courage, as many as 100,000 Hungarian Jews were saved from extermination by the Nazis. He demonstrated that defense of human life and liberty—regardless of race or religion—is the noblest endeavor any person can undertake.

What Raoul Wallenberg did, as part of a program conceived by President Franklin Roosevelt, was to show that the love of freedom can transcend the powers of a totalitarian state—that individual courage and hope can defeat the marshaled forces of repression.

That is a dangerous message for the Soviet Union to admit. It flies in the face of that nation's own horrible repression of the Jews and other dissidents, and puts the lie to the myth of the monolithic worker state.

That is why the Soviets arrested Raoul Wallenberg in 1945, why they reported him dead in 1947, and why they have continually refused attempts to account for him.

The Soviets do not want Raoul Wallenberg's story to be told.

And that is why we must make sure that the world does not forget this man.

Today's resolution, to grant Raoul Wallenberg honorary American citizenship and to ask the President to press for the truth about his case, is an entirely appropriate tribute to a man whose life and actions exemplified the highest American ideals of freedom and courage. It honors his past actions—in the same way that the Congress honored Sir Winston Churchill for his heroism and leadership—and it also takes a very real step toward gaining his freedom in the future.

Granting honorary citizenship is, of course, an extraordinary step. We have taken it today to honor an extraordinary man. I believe our Nation's highest honor is the only fitting way to express our gratitude to a man who has lived according to its highest principles.●

Mr. RODINO. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from New Jersey (Mr. RODINO) that the House suspend the rules and pass the joint resolution (H.J. Res. 220) as amended.

The question was taken.

Mr. GORE. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. Pursuant to the provisions of clause 5, rule 1, the Chair announces that he will reduce to a minimum of 5 minutes the period of time within which a vote by electronic device may be taken on all the additional motions to suspend the rules on which the Chair has postponed further proceedings on Monday, September 21.

This will be a 15-minute vote.

The vote was taken by electronic device, and there were—yeas 396, nays 2, not voting 35, as follows:

[Roll No. 212]

□ 1315

The Clerk announced the following pairs:

On this vote:

Mr. Nichols and Mrs. Collins of Illinois for, with Mr. Danielson against.

Until further notice:

Mr. Garcia with Mr. Dornan of California.
Mr. Zeferetti with Mr. Edwards of Alabama.
Mr. Addabbo with Mr. Derwinski.
Mr. Chappell with Mrs. Holt.
Mr. Biaggi with Mr. Dougherty.
Mr. Crockett with Mr. Clausen.
Mr. Dellums with Mr. Latta.
Mr. Jones of Tennessee with Mr. Goldwater.
Mr. Wirth with Mr. Horton.
Mr. Savage with Mr. Petri.
Mr. Reuss with Mr. Pashayan.
Mr. Downey with Mr. John L. Burton.
Mr. Evans of Georgia with Mr. Blanchard.
Mr. Moffett with Mr. Ralph M. Hall.
Mr. Simon with Mr. Ford of Michigan.

So (two-thirds having voted in favor thereof) the rules were suspended and the joint resolution, as amended was passed.

A motion to reconsider was laid on the table.

## GENERAL LEAVE

Mr. MAZZOLI. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks and to include extraneous matter on the joint resolution just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Kentucky?

There was no objection.

Mr. MAZZOLI. Mr. Speaker, I ask unanimous consent to take from the Speaker's table a similar Senate joint resolution (S.J. Res. 65) proclaiming Raoul Wallenberg to be an honorary citizen of the United States, and requesting the President to ascertain from the Soviet Union the whereabouts of Raoul Wallenberg and to secure his return to freedom, and ask for its immediate considerations.

The Clerk read the title of the Senate joint resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Kentucky?

There was no objection.

S.J. RES. 65

Whereas the United States has conferred citizenship on only one occasion in its more than two hundred years, and honorary citizenship is and should remain an extraordinary honor not lightly conferred nor frequently granted;

Whereas during World War II the United States was at war with Hungary, and had no diplomatic relations with that country;

Whereas in 1944 the United States Government through Secretary of State Cordell Hull requested the cooperation of Sweden, as a neutral nation, in protecting the lives of Hungarian Jews facing extermination at the hands of the Nazis;

Whereas Raoul Wallenberg agreed to act at the behest of the United States in Hungary, and went to Hungary in the summer of 1944 as Secretary of the Swedish Legation;

Whereas Raoul Wallenberg, with extraordinary courage and with total disregard for the constant danger to himself, saved the lives of almost one hundred thousand innocent men, women, and children;

Whereas Raoul Wallenberg, with funds and directives supplied by the United States, provided food, shelter, and medical care to those whom he had rescued;

Whereas the Soviet Union, in violation of Wallenberg's Swedish diplomatic immunity and of international law, seized him on January 17, 1945, with no explanation ever given for his detention and subsequent imprisonment;

Whereas Rauol Wallenberg has been a prisoner in the Soviet Union since 1945;

Whereas reports from prisoners in the Soviet Union, as recent as January 1981, suggest that Raoul Wallenberg is alive;

Whereas history has revealed that heroic acts of salvation were tragically rare during the massacre of millions of innocent human beings during World War II; and

Whereas the significance of this symbol of man's concern for his fellow man has been tainted by the wall of silence that surrounds the fate of Wallenberg: Now, therefore, be it

*Resolved by the Senate and House of Representatives of the United States of America in Congress assembled,*

SECTION 1. Raoul Wallenberg is proclaimed to be an honorary citizen of the United States of America.

SEC. 2. The President is requested to take all possible steps to ascertain from the Soviet Union the whereabouts of Raoul Wallenberg and to secure his return to freedom.

The Clerk read the Senate joint resolution, as follows:

The Senate joint resolution was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

A similar House joint resolution (H.J. Res. 220) was laid on the table.

## ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. Pursuant to the provisions of clause 5, rule I, the Chair will now put the question on each motion to suspend the rules on which further proceedings were postponed on Monday, September 21, 1981, in the order in which that motion was considered.

Votes will be taken in the following order: House Concurrent Resolution 183, by the yeas and nays; H.R. 1953, de novo.

As previously announced by the Chair, pursuant to rule I, these votes will be reduced to 5 minutes.

## SENSE OF CONGRESS THAT THE NATIONAL RUGBY TEAM OF SOUTH AFRICA SHOULD NOT PLAY IN THE UNITED STATES

The SPEAKER pro tempore. The unfinished business is the question of suspending the rules and agreeing to the concurrent resolution, House Concurrent Resolution 183.

The Clerk read the title of the concurrent resolution.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Wisconsin (Mr. ZABLOCKI) that the House suspend the rules and agree to the concurrent resolution, House Concurrent Resolution 183, on which the yeas and nays are ordered.

The vote was taken by electronic device, and there were—yeas 200, nays 198, not voting 35, as follows:

□ 1330

The Clerk announced the following pairs:

On this vote:

Mrs. Collins of Illinois and Mr. Garcia for, with Mr. Nichols against.

Until further notice:

Mr. Addabbo with Mr. Derwinski.

Mr. Dingell with Mrs. Holt.

Mr. Jones of Tennessee with Mr. Pashayan.

Mr. Reuss with Mr. Petri.

Mr. Zeferetti with Mr. Dougherty.

Mr. Moffett with Mr. Edwards of Alabama.

Mr. McCurdy with Mr. Dornan of California.

Mr. Danielson with Mr. Horton.

Mr. Biaggi with Mr. Latta.

Mr. Crockett with Mr. Clausen.

Mr. Dellums with Mr. Savage.

Mr. John L. Burton with Mr. Simon.

Mr. Evans of Georgia with Mr. Wirth.

Mr. Blanchard with Mr. Downey.

Mr. Ford of Michigan with Mr. Ralph M. Hall.

Mr. CRAIG changed his vote from "yea" to "nay."

So (two-thirds not having voted in favor thereof) the motion was rejected.

The result of the vote was announced as above recorded.

## OFFICE OF ENVIRONMENTAL QUALITY REAUTHORIZATION

The SPEAKER. The unfinished business is the question of suspending the rules and passing the bill, H.R. 1953, as amended.

The Clerk read the title of the bill.

The SPEAKER. The question is on the motion offered by the gentleman from North Carolina (Mr. JONES) that the House suspend the rules and pass the bill, H.R. 1953, as amended.

The question was taken.

Mr. DANNEMEYER. Mr. Speaker, on that I demand a recorded vote.

A recorded vote was ordered.

The vote was taken electronic device, and there were—ayes 360, noes 42, not voting 31, as follows:

[Roll No. 214]

| Harkin | Nichols | Wirth |
| Holland | Pashayan | Zeferetti |
| Holt | Petri | |
| Horton | Pursell | |

Mr. DREIER changed his vote from "nay" to "yea."

The Clerk announced the following pairs:

On this vote:

Mr. Addabbo with Mr. Pashayan.
Mrs. Boggs with Mr. Derwinski.
Mr. Nichols with Mr. Dougherty.
Mr. Reuss with Mr. Petri.
Mr. Zeferetti with Mr. Nelligan.
Mrs. Collins of Illinois with Mr. Pursell.
Mr. Biaggi with Mr. Dornan of California.
Mr. Holland with Mr. Clausen.
Mr. Danielson with Mr. Horton.
Mr. Dellums with Mrs. Holt.
Mr. Jones of Tennessee with Mr. Harkin.
Mr. Ford of Michigan with Mr. Garcia.
Mr. Moffett with Mr. Savage.
Mr. Simon with Mr. Wirth.
Mr. Evans of Georgia with Mr. John L. Burton.

So (two-thirds having voted in favor thereof) the rules were suspended and the bill, as amended, was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

Mr. JONES of North Carolina. Mr. Speaker, I ask unanimous consent to take from the Speaker's table a similar Senate bill (S. 1210) amending the Environmental Quality Improvement Act of 1970, and ask for its immediate consideration.

The Clerk read the title of the Senate bill.

The SPEAKER. Is there objection to the request of the gentleman from North Carolina?

Mr. WALKER. Reserving the right to object, Mr. Speaker, I reserve the right to object because of the noise, I could not hear exactly what the subject matter of the bill was.

Mr. JONES of North Carolina. Mr. Speaker, if the gentleman will yield, I would say to the gentleman from Pennsylvania that this procedure is taking from the Speaker's desk subject to the approval of the House the Senate version and substituting the House version.

Mr. WALKER. Could the gentleman tell me which bill this is? When the Clerk was announcing the bill, I could not hear exactly which bill they were talking about.

Mr. JONES of North Carolina. It is the authorization for the Environmental Quality Council, 1982. It was a fixed sum and is providing for the same authorization as might be funded in 1983 and 1984.

Mr. WALKER. Mr. Speaker, I thank the gentleman, and I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from North Carolina?

There was no objection.

The Clerk read the Senate bill, as follows:

S. 1210

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That section 205 of the Environmental Quality Improvement Act of 1970 (40 U.S.C. 4374) is amended by striking out subsections (a) and (b) and inserting in lieu thereof the following:

"(a) $1,544,000 for the fiscal year ending September 30, 1982.".

MOTION OFFERED BY MR. JONES OF NORTH CAROLINA

Mr. JONES of North Carolina. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. JONES of North Carolina moves to strike out all after the enacting clause of the Senate bill, S. 1210, and to insert in lieu thereof the provisions of H.R. 1953, as passed by the House.

The motion was agreed to.

The Senate bill was ordered to be read a third time, was read the third time, and passed.

The title of the Senate bill was amended so as to read: "A bill to authorize appropriations for the operations of the Office of Environmental Quality and the Council on Environmental Quality during fiscal years 1982, 1983, and 1984."

A similar House bill (H.R. 1953) was laid on the table.

A motion to reconsider was laid on the table.

## PERMISSION FOR COMMITTEE ON APPROPRIATIONS TO FILE PRIVILEGED REPORT ON FOREIGN ASSISTANCE AND RELATED PROGRAMS APPROPRIATIONS BILL, FISCAL YEAR 1982

Mr. LONG of Maryland. Mr. Speaker, I ask unanimous consent that the Committee on Appropriations may have until midnight tonight to file a privileged report on a bill making appropriations for foreign assistance and related programs for the fiscal year ending September 30, 1982, and for other purposes.

Mr. KEMP reserved all points of order on the bill.

The SPEAKER. Is there objection to the request of the gentleman from Maryland?

There was no objection.

## DISTRICT OF COLUMBIA APPROPRIATIONS, 1982

Mr. DIXON. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 4522) making appropriations for the government of the District of Columbia and other activities chargeable in whole or in part against the revenues of said District for the fiscal year ending September 30, 1982, and for other purposes; and pending that motion, Mr. Speaker, I ask unanimous consent that general debate be limited to not to exceed 1 hour, the time to be equally divided and controlled by the gentleman from Pennsylvania (Mr. COUGHLIN) and myself.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

The SPEAKER. The question is on the motion offered by the gentleman from California (Mr. DIXON).

The motion was agreed to.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill, H.R. 4522, with Mr. RATCHFORD in the chair.

The Clerk read the title of the bill.

By unanimous consent, the first reading of the bill was dispensed with.

The CHAIRMAN. Under the unanimous consent agreement, the gentleman from California (Mr. DIXON) will be recognized for 30 minutes, and the gentleman from Pennsylvania (Mr. COUGHLIN) will be recognized for 30 minutes.

The Chair recognizes the gentleman from California (Mr. DIXON).

Mr. DIXON. Mr. Chairman, I yield myself such time as I may consume.

□ 1345

Mr. Chairman, I am pleased to bring to the House the District of Columbia appropriation bill for fiscal year 1982. This bill provides funding for the operation of the District of Columbia government during the coming fiscal year, and appropriates all of the local revenue collections as well as various Federal funds.

COMPARISON WITH BUDGET RESOLUTION AND PRESIDENT'S BUDGET

At the outset, let me point out that the bill is below the President's revised budget request by $49.6 million in both budget authority and outlays, and $50.4 million below the budget resolution in both budget authority and outlays. Let me point out that $36.6 million was recently authorized in this current session of Congress but the budget request was received too late for consideration by the committee. If this additional amount is subsequently included in the bill prior to final action by Congress, the bill will still be under the President's budget request and the budget resolution by $13 million.

FEDERAL FUNDS

The bill includes a Federal payment of $300 million to the District of Columbia government for fiscal year 1982. This is the same level as was appropriated in fiscal year 1981. Other Federal funds consisting of $52,070,000 as the Federal contribution to the

police, and fire, teachers, and judges pension system, $13.5 million for water and sewer services furnished to Federal facilities, and $155 million in Federal loans for the city's construction program, are also included in the bill. These loans are repaid to the Federal Treasury at the going rate of interest usually over a 30-year period.

All of these Federal funds, Mr. Chairman, total $520,570,000 for fiscal year 1982, and reflect an increase of $25,187,300 or 4.4 percent above the fiscal year 1981 level, but $49.6 million below the budget request for fiscal year 1982.

DISTRICT FUNDS

We recommend a total of $1,868,658,200 out of the District of Columbia treasury. Of this amount, $1,657,137,100 is for operating expenses and $211,521,100 is for capital outlay. The total amount of $1,868,658,200 reflects a net increase of $103,576,700 or 6 percent above the amount appropriated for fiscal year 1981.

EMPLOYMENT LEVEL

Much is said about the number of employees on the District's payroll. I am indeed pleased to report that the bill now before you includes 34,261 positions, a reduction of 5.4 percent or 1,943 positions below the fiscal year 1981 level. When compared with the fiscal year 1980 level of 39,105 positions, the 34,261 recommended in this year's bill is 4,844 or 12.4 percent below the level 2 years ago. This shows a true commitment on the part of District officials to use their ingenuity and creativity in providing essential services to all who live, work, and visit in our Nation's Capital while at the same time paring the payroll.

GOVERNMENTAL DIRECTION AND SUPPORT

Mr. Chairman, we recommend a total of $84.7 million for the various activities funded under this appropriation. An increase of $85,400 to offset inflationary cost increases is provided for the Council of the District of Columbia, the District's legislative body. Funds are included in the Corporation Counsel's budget to hire 14 additional employees to provide a higher level of representation for the District government and to improve the legal support capability of the office. We recommend the approval of $290,000 for the District's share of the federally funded low-income energy assistance program which will provide 20,000 low-income households with cash assistance for inflated home heating costs. This program will be operated through the Office of the City Administrator. For the Office of Financial Management, the committee recommends approval of $1.2 million to cover the costs of the annual citywide audit. The audits for fiscal years 1979, 1980, and 1981 were financed by the Temporary Commission on Financial Oversight whose funding authorization has been exhausted. An increase of $600,300 for 4 permanent and 10 temporary positions is recommended for the Department of Finance and Revenue to administer the newly enacted Unclaimed Property Act, District of Columbia law 3-160, which is expected to yield $14 million in revenues for fiscal year 1982. The committee recommends an increase of $373,400 and nine positions for the Office of Business and Economic Development. This office is responsible for stimulating new employment opportunities and promoting new investments in the establishment of new businesses in accordance with the city's comprehensive plan. The Board of Elections and Ethics will oversee two elections in fiscal year 1982 as compared to one in 1981, and an additional $257,300 is recommended to cover the costs of the additional election.

The District of Columbia Retirement Board was created by the District of Columbia Retirement Reform Act, Public Law 96-122, to control and manage the three retirement funds for police officers and firefighters, judges, and teachers. Section 121(f)(1) of that law requires the appropriation of all funds necessary for the operation of the Board. The bill includes language appropriating the total budget request of $1,348,300 for the operation of the Board during fiscal year 1982, and specifying that $312,700 will be provided from the general fund and $1,035,600 from investment income. To eliminate any confusion over what is included under the term "administrative expenses," the committee has included language in the bill making these funds available for all fees and expenses of the Board, including but not limited to management fees, legal fees, and investment advisory fees. It seems clear to the committee that through Public Law 96-122, the Congress intended for the Board to have a budget sufficient to allow it to pay for all expenses necessary in carrying out the responsibilities placed on it by the Congress, regardless of the source of funding, with the understanding that the Board's total budget would be provided through the appropriations process and thus, be subject to the same congressional scrutiny as the budgets of other departments and agencies as well as that of the local courts.

Mr. Chairman, the District of Columbia Tort Claims Settlement Authority Act gives the District of Columbia unlimited settlement authority, and consistent with the policy underlying that law, we recommend $3,366,300 for the settlement of claims and suits in fiscal year 1982. The bill also includes the requested $150,000 for startup costs to implement the District of Columbia statehood constitutional convention initiative approved by District voters on March 10, 1981.

ECONOMIC DEVELOPMENT AND REGULATION

The committee recommends a total of $28.1 million for the various departments and agencies funded through this appropriation. A total of $2.8 million is provided for the Office of Planning and Development. Mr. Chairman, this office is responsible for producing the District's comprehensive plan which was mandated by Public Law 93-198, the so-called Home Rule Charter, and the committee has included language in its report making it clear that ample funding has been provided for this purpose and the committee therefore expects District officials to perform whatever work is necessary to complete the comprehensive plan by the end of fiscal year 1982. Increases of $5.8 million are recommended for various programs aimed at providing housing opportunities to District residents at the low- and moderate-income levels. The committee has approved $1 million of the $2 million requested to cover various costs to enable the District of Columbia Housing Finance Agency to issue $100 million in single-family mortgage revenue bonds which will be used to make homeownership available to low- and moderate-income residents of the District. Proceeds from the sale of these tax-exempt bonds will provide mortgage funds for owner-occupied housing, including single-family dwellings, condominiums, and tenant sponsored cooperatives.

The bill includes the full request of $298,000 for the Washington Convention and Visitors Association which has been designated as the official sales organization for the city's new Washington Convention Center. The $98.7 million center is scheduled to open in the fall of 1982 and is expected to add 3,000 to 4,000 more jobs from additional convention business and increase the District's tax revenues by $15 million to $20 million annually. With the competition for conventions being what it is, District officials are requested to give appropriate consideration to the funding level of the association so that the center's full potential can be realized.

The committee has approved an increase of $24,000 for the District's Chamber of Commerce, and increases of $798,000 for the Public Service Commission and $109,200 for the Office of People's Counsel have also been approved. The People's Counsel is a law office that represents that ratepayers when a regulated company requests a rate increase, a change in service, or when a customer has problems. On the other hand, the Public Service Commission regulates the companies and is obligated under adjudicatory function to balance the interest of the ratepayer and the investors

but does not have the authority to represent the ratepayer.

Mr. Chairman, the committee does not recommend the $628,000 requested to establish the Lottery and Charitable Games Control Board. The committee was advised that the 1983 budget is predicated on $25 million in gambling revenues. In denying the request to fund the Board, the committee recognizes that revenues planned for fiscal year 1983 will not be forthcoming and therefore urges the authorizing committees to give serious consideration to increasing the Federal payment authorization above the present $336.6 million level so that District officials will be provided with a level of revenues to finance future budgets comparable to what would have been available through the gambling initiative.

PUBLIC SAFETY AND JUSTICE

Mr. Chairman, a total of $363.8 million is recommended for the District's public safety and justice activities. The committee's recommendation for the Metropolitan Police Department totals $114.7 million and reflects an increase of $4.5 million above the budget request to restore funding for 259 police officer positions. With the crime rate up 13 percent for the first 6 months of 1981 and a sharp 33-percent rise in the number of robberies, it is essential that the number of police officers be increased. The committee has received assurances from the Mayor that the city has been able to work through the technical problems related to the hiring of additional police officers, and that he now expects to hire 100 additional police as soon as possible and bring the strength of the force to over 3,800 sworn personnel by February 1, 1982. With this assurance, Mr. Chairman, we are confident that the police force will be increased in accordance with the committee's directives.

For the Fire Department, the committee has approved increases of $618,600 to fund an additional fire company to maintain the Department's 50 fire company program, and $948,000 and 39 positions for 3 additional emergency ambulance units required in order to reduce the current response time and manage the increase that is occurring in the number of emergency calls. The present response time now averages 8.6 minutes and the Department's goal is to meet the nationally recommended time frame of 4 to 6 minutes.

Increases have been approved for the courts to cover the judicial pay raise for local judges resulting from the recent Supreme Court decision, United States against Will. The committee has approved the requested increase of $3.6 million and 194 new positions which will allow the Department of Corrections to operate an additional correctional facility and thereby relieve overcrowding and provide for an expected increase in the incarcerated population. The correctional facilities now in use are presently overcrowded, and as a result, two court cases have been filed against the District government.

PUBLIC EDUCATION SYSTEM

The committee recommends a total of $365.7 million for the activities funded under the public education system. The public schools will receive an increase of $10,405,100 above the fiscal year 1981 level for a total of $256.2 million from District funds in fiscal year 1982. Included in these amounts is an increase of $2.4 million under the contingent services fund which will be made available to the schools upon the successful implementation of an agreement between the Mayor and the Board of Education. The agreement calls for the Board to provide office space in surplus school buildings for the Department of Human Services. The funding level recommended by the committee will provide a pupil-teacher ratio in fiscal year 1982 of 25 to 1 as compared to 26.6 to 1 in 1981.

For the Commission on the Arts and Humanities, the committee recommended $696,600 and seven positions for fiscal year 1982, a reduction of $112,900 and one position below the 1982 request but an increase of $145,500, or 24.6 percent, and one position above the 1981 level. The budget for the Commission has increased 333 percent over the past 3 years, from $160,900 in 1979 to $696,600 recommended in 1982, and 95 percent since 1980. Mr. Chairman, I am very supportive of the arts, as you can see from the increases that I just referred to, and in a year when many agencies are forced to either cut back or maintain the prior year's funding level the committee feels fortunate to be able to provide a 1-year increase of 24.6 percent for the Commission.

HUMAN SUPPORT SERVICES

We recommend a total of $394.3 million for the 11 agencies and activities funded under this account. A total of $11.4 million is recommended for the District's disability compensation program, an increase of $5.6 million above the 1981 level. District officials testified that this increase is attributed to several factors including the two cost-of-living increases per year mandated for disability compensation, skyrocketing medical costs which have increased 30 percent since 1980, and an increase in the number of claimants. Mr. Chairman, we recommend $3.8 million for 1982 for the programs administered by the Office of Aging for the District's estimated 105,000 senior citizens. The committee's recommendation reflects an increase of $1.3 million above the 1981 appropriation and will allow the Office to expand its long-term care service delivery system which has as its primary aim the postponement of institutionalizing senior citizens by providing in-house health and homemaker services, home-delivered meals, and transportation services.

The committee has approved the full request of $10.4 million to fund the four programs, including the summer youth jobs program, designed to provide employment opportunities to various categories of unemployed persons. Last year, the Congress approved the transfer of the responsibility for administering the workers' compensation program for private sector employees from the Federal Department of Labor to the District government. A total of $964,700 and 13 positions are for the operation of this program in 1982. The committee recommends a total of $493,600 and 20 positions for the operation of the disability compensation program for injured District employees. This program, like the private sector workers compensation program, was transferred from the Federal Department of Labor in 1981.

Mr. Chairman, we recommend the full budget request of $20.6 million and 820 positions for Forest Haven, the city's facility for the care and treatment of the mentally retarded and developmentally disabled. The District government is currently under a court order to move the residents of Forest Haven to community-based facilities and has deinstitutionalized 115 patients since the program began in 1980. Present plans are to transfer 101 residents in 1981 and an additional 100 in 1982. Even though the level of appropriations has increased from $15.5 million in 1979 to $20.6 million recommended for 1982, Forest Haven lost its medicaid accreditation certificate as of August 31, 1980, and as a result, is losing $400,000 a month in much-needed Federal assistance. Department officials testified that most of the deficiencies have been corrected and they expect Federal officials to reaccredit the facility by September 30, 1981. The committee has requested the Department to submit monthly progress reports.

Mr. Chairman, the committee continues to be concerned with the error rate in the public assistance program and the fact that the estimated $11 million that is being paid to ineligibles could better serve the truly needy families. District officials are again directed to maintain the Office of Eligibility Review at the level of 45 permanent positions with adequate clerical support, and to provide the committee with quarterly reports.

TRANSPORTATION SERVICES AND ASSISTANCE

Mr. Chairman, the bill includes $123.7 million for transportation services and assistance for 1982. This allowance is $16 million above the 1981 level and will provide the increases requested to cover the cost of electrical

energy and the District's share of the operating subsidies for metrobus and metrorail operations in fiscal year 1982. The total regionwide operating subsidy for both metrobus and metrorail operations is estimated at $190.7 million for 1982 with $134.9 million attributable to metrobus operations, of which the District's share is 48 percent, and $55.8 million is due to metrorail with the District's share being at approximately 45 percent. The 101-mile metrorail system is expected to be completed in 1989 with 86 stations at a total cost of $8.2 billion.

Mr. Chairman, I know many Members are interested in the city's right-turn-on-red program. District officials testified that 64 percent of intersections now permit right-turn-on-red either full-time or part-time compared with 21 percent a little over 1 year ago. At the District's request, the International Traffic Engineers Association is performing a peer review of the District government's right-turn-on-red standards to justify modifications to the standards for judging whether an intersection should allow right-turn-on-red. The committee has asked to be kept advised of the results of the association's review.

ENVIRONMENTAL SERVICES AND SUPPLY

For the Department of Environmental Services, we recommend a total of $100.4 million from both the general fund and the water and sewer enterprise fund. This allowance reflects a reduction of $13.6 million and 222 positions below the 1981 level.

PERSONAL SERVICES

Mr. Chairman, the bill includes $19.6 million for cost-of-living salary increases for District government employees in fiscal year 1982. This allowance is $2.8 million over the budget request due to actions by the committee in disallowing increases requested in other areas and transferring part of those increases to this appropriation. Even so, the amount recommended will only fund an overall 2 percent cost-of-living salary increase for District employees. Since the percentage rate of increase will be determined by collective bargaining, which is in various stages at this time, the District government has proposed, and the President has approved, the use of part of the additional $36.6 million Federal payment, which is not included in this bill, as a method of paying these costs. If it looks as though these funds will have to be added in conference, we would definitely hold a hearing before anything is done to determine the city's need for these additional funds.

REPAYMENT OF LOANS AND INTEREST

We recommend approval of the requested $126.1 million and the reestablishment of this central appropriation account for fiscal year 1982. These funds, Mr. Chairman, go the Federal Treasury as repayments of amounts borrowed to finance the city's construction program. This amount consists of $25.8 million in principal and $102.3 million in interest payments.

REPAYMENT OF GENERAL FUND DEFICIT

Mr. Chairman, we recommend approval of the request for $10 million as the first installment to be applied toward reducing the District's reported accumulated deficit of $388 million. In an effort to eliminate the deficit and assure potential investors who may be interested in purchasing local municipal bonds that the city is acting responsibly in managing its finances, District officials have decided to set aside funds from future budgets until the deficit is eliminated. The $10 million for 1982 represents current year revenues that will not be available for current year services. District officials have testified that as much as $30 million a year may be set aside in future years for this purpose.

CAPITAL IMPROVEMENTS

The bill includes $211.5 million for the city's fiscal year 1982 construction program. Mr. Chairman, we recommend approval of all 54 projects requested, and the amount we recommend to finance these projects is $10.1 million below the 1981 level. We recommend $29.8 million for the Department of Transportation which expects to receive $75.4 million in Federal funds and have a total capital program of $105.2 million in 1982. The Department plans a major bridge, street, and highway rehabilitation program in 1982, and the committee's action will provide the financing required to carry out that program. We recommend $4 million in matching funds to establish a job and tax development public works investment fund. This program will generate $6 million to $8 million in Federal public works funding for use in making infrastructure improvements and thereby encourage private economic development projects. We recommend $33.3 million for comprehensive improvements at public housing projects and the construction of infrastructure work involving street and public facilities at the Fort Lincoln New Town urban renewal project. For the fire department, the sum of $6 million is recommended to allow the equipment replacement and the construction of a new fire station at South Capitol and Atlantic Streets SE. A total of $9.7 million is included in the bill for major improvements and renovations for facilities located throughout the city, including those operated by the public schools, the University of the District of Columbia, the public library and the Department of Recreation. The bill includes $2.1 million for modernization and renovation work at the Cedar Knoll Institution, the District's facility for juvenile delinquents at Laurel, Md., and $1.8 million will be used to renovate offices and clinics as well as improvements to the city's Rehabilitation Center for Alcoholics. D.C. General Hospital will receive $15.6 million to construct a new ambulatory and critical care center which will result in improved services being provided to more patients with lower per patient operating costs. For the Metro system, we recommend $51 million as the District's share of the mass transit system's construction costs. These funds will provide for Metrorail construction as well as a new garage for buses and other maintenance facilities. For the Department of Environmental Services, we recommend $33 million for several continuing projects involving sewer and water service work. Included in this $33 million is $19.6 million to complete the crosstown water main which will carry filtered water to the Anacostia area.

WASHINGTON CONVENTION CENTER ENTERPRISE FUND

For the Washington Convention Center enterprise fund, we recommend the full request of $1.2 million for 1982. As I noted earlier, the center is expected to open in the fall of 1982 at a total cost of $98.7 million and is expected to accommodate more than 300,000 new out-of-town delegates a year.

GENERAL PROVISIONS

The committee has retained language under section 118 of the bill, identical to that in the 1980 and 1981 acts, prohibiting the use of Federal funds to perform abortions except to save the mother's life or in cases of rape or incest.

CONCLUSION

Mr. Chairman, these are the highlights of the bill. The committee report is available to all Members and explains the committee's action in much more detail.

Our committee has worked very hard in trying to bring to the floor a bill that protects the Federal interest while at the same time preserving the integrity of local home rule.

I want to thank the members of the subcommittee for the outstanding job they have done: Mr. NATCHER, of Kentucky; Mr. STOKES, of Ohio; Mr. WILSON, of Texas; Mr. LEHMAN, of Florida; Mr. COUGHLIN, of Pennsylvania, the ranking Republican member of our subcommittee; Mr. GREEN, of New York; and Mr. PORTER, of Illinois.

This is a good bill, Mr. Chairman, it provides the city with a Federal payment of $300 million, the same level as the city received in 1981; it provides a balanced budget in that obligational authority does not exceed anticipated revenues; it provides for a modest increase of 6 percent above the 1981 budget; and it is below the budget resolution and the President's revised budget request in both budget authority and outlays.

I recommend that the bill be adopted.

Mr. Chairman, I reserve the balance of my time.

Mr. COUGHLIN. Mr. Chairman, I want to say that the subcommittee chairman, JULIAN DIXON, has described the bill very well, and he has done a superb job of balancing the various competing interests which exist in this difficult bill. He runs a very good subcommittee.

I would like also to congratulate the other members. BILL GREEN, JOHN PORTER, BILL NATCHER, LOU STOKES, CHARLIE WILSON, and BILL LEHMAN have all contributed to the bill we have before us today.

Let me also thank the staff, Migo Miconi and Mary Porter for the majority, and Kenny Kraft for the minority.

Mr. Chairman, this is a bill that everybody can support. It is $50.4 million below the section 302 budget allocation in both budget authority and outlays. It is $13 million below the President's budget request in both budget authority and outlays.

Basically, the bill does two things. It provides a Federal payment of $300 million, which was the fully authorized amount when the committee marked up. A subsequent increase of $36 million was authorized. Any spending plan District officials submit for this additional money should be handled in a supplemental.

The bill also provides a budget for the District of Columbia of $1,868,658,200.

Now, many cities, including Washington, D.C., have troubles these days. Washington, D.C., is certainly no exception. There are all the problems inherent in any large city, and particularly ones found at the Nation's Capital.

The committee is always trying to balance the competing interests that occur in this Capital of our Nation. We want to give the District of Columbia as much independence as possible. There are certain areas where the District, of course, is involved in its position as the Nation's Capital. In two areas we did mandate action because we felt an overriding Federal interest existed. First, in the area of police, we required a strength of 3,880 uniformed officers. We were initially ignored by the Mayor, but finally got an agreement, only to learn that that agreement will be carried out by lottery rather than by hiring the best qualified. We will hear more about that later, I am sure.

Second, the subcommittee recommended that there be no money for gambling, for a Lottery and Charitable Games Control Board, even though a referendum had been approved to that effect. People object to gambling on many grounds, but at least in the judgment of this Member it is not appropriate in our Nation's Capital, and would be offensive to many of the people who come here from all over the country and regard this as their city, too.

The committee has expressed concern in a number of different areas. First, the committee is disturbed by the reported $388 million cumulative deficit through fiscal year 1980. This bill includes the first $10 million installment to be applied toward reducing the deficit, but there is a long way to go. The committee refused to grant approval of deficiency spending and officials responsible for unjustifiable overspending are subject to the penalty set forth in the Anti-Deficiency Act.

The committee is concerned over the District plan to implement further changes in the city's financial management system. The General Accounting Office approval is required before any further change is made.

The committee is concerned about the quality, costs, and management of the automatic data processes in the city. Missing or incorrect water and sewer bills are examples of ADP failures.

In short, the Congress does have rights and duties, as provided in article I, section 8, of the U.S. Constitution, toward the District of Columbia. We want the city to have "limited" home rule. However, where that impinges on the rights all Americans hold in this Federal City, the Congress is indeed required to act.

Mr. Chairman, I reserve the balance of my time.

Mr. DIXON. Mr. Chairman, I yield 5 minutes to the gentleman from the District of Columbia (Mr. FAUNTROY).

Mr. FAUNTROY. Mr. Chairman, I rise, of course, in reluctant support of the Appropriations Committee recommendation.

We recognize that the $300 million Federal payment level is the highest yet recommended to the House, but clearly, given the extent to which the Federal Government takes from the tax rolls of the Nation's Capital both in terms of taxable land and taxable income, the $300 million obviously is below that which we who are elected by the people of the District of Columbia feel is adequate. However, we are grateful to the committee for the careful consideration which they have given to all but one of the requests of the local elected government, with respect to the appropriations for items in our budget.

I will be speaking to the House later with respect to several amendments which have to my understanding developed overnight which will be offered to H.R. 4522, and will respectfully urge the Members of the House to endorse the well-considered judgment of the committee.

I yield back the balance of my time.

Mr. COUGHLIN. Mr. Chairman, I yield 5 minutes to the gentleman from Texas (Mr. COLLINS).

Mr. COLLINS of Texas. Mr. Chairman, in these days when we are talking about austerity and balancing the budget, we certainly look with cautious appraisal at this District of Columbia appropriation.

The District of Columbia sets a bad example for our country when it comes to fiscal integrity and general financial responsibility. The District is increasingly dependent on the Federal Government, requires more and more money to run less and less efficiently, and is currently running a $388 million deficit. I want my colleagues to look at some examples of irresponsible policies of the District and join with me in believing the time for fiscal self-discipline in the District of Columbia has come.

The District is subsidized by more efficient States that pay more in taxes than they get back from the Government. The District of Columbia pays about 32 cents for every dollar it receives from the Federal Government. My own State of Texas, in contrast, pays $1.40 for each dollar it receives from Washington. Federal payments to the District of Columbia have increased from $58 million in 1967 to $300 million next year. That is an increase of over five times the 1967 level. Total Federal funding for the District of Columbia is $520,570,000.

Despite this tremendous Federal aid, District of Columbia unemployment as of last April was over 8 percent as compared to 3.7 percent at the same time for Dallas. As Federal expenditures on the District of Columbia have increased, so has District unemployment. In 1971, when District of Columbia Federal appropriations were $131 million, 3.6 percent of the District work force was looking for a job; in 1981, when Federal appropriations had climbed to $300 million, District of Columbia unemployment has soared to 8.4 percent.

There are too many people on the public payroll in the District. The fact that the District of Columbia performs the functions of both State and local government does not account for the large number of people working for the District when compared with cities of comparable size. For example, Phoenix, Ariz. is a city of comparable size to Washington and employs 9,323 people. The District had 45,473 persons on the payroll last October.

Additionally, District employees are comparatively among the highest paid in the Nation. The average yearly salary for District of Columbia employees is $21,300 while public employees in Texas average $14,316 annually. The average District of Columbia employee is paid over $5,000 more than

the average public employee in the United States.

We need to carefully look at each of the operating categories in the District budget to see the contradictions present, but I will just use two as illustrations. First, District public education is characterized by continually declining pupil enrollments and high per pupil costs. Pupil membership has declined from over 145,000 in 1969 to about 94,000 this year. Yet the District spends $3,205 per student a year to produce academic results far below those attained, for example, by the Dallas school system which spends only $2,406 per student. Continuing high expenditures on fewer and fewer students to produce continually lower academic achievement does not make sense.

The history of public assistance programs in the District illustrates that problems indeed tend to get worse as money is thrown at them. First, there is a 13-percent error rate in District of Columbia welfare payments that results in about $11 million being paid to ineligible recipients. This does not account for wrongful payments in medicaid, food stamp, and social service programs. There is enough waste in the identifiable losses to pay for the education of 3,432 District school children for 1 year.

Second, as Federal aid to public assistance programs has gone up, so has the number of people on the public rolls. For example, in 1969, the Federal Government contributed over $12 million to the District of Columbia welfare programs. At that time there were about 38,447 monthly recipients. This year, when Federal aid has grown to $43.8 million, the number of average monthly recipients has ballooned to 90,919 people. In other words, about 14 percent of the District of Columbia population will receive public assistance this year.

I hope my colleagues will join with me in sending a call for self-discipline to the District government and those in Congress willing to indulge in excessive spending that must be financed by taxpayers. There is no justification for taxing our people back home to provide tax money to pay for higher salaries than workers receive in the other sections of America.

□ 1400

I mean, they are really well paid compared to what municipal employees make throughout the country. The average yearly salary for District of Columbia employees is $21,300. Public employees in Texas average $14,316 annually. Get that. They are paying them $21,000 here and they are getting $14,000 in Texas, and they are asking us to subsidize the District of Columbia. That does not sell in Peoria and it does not sell in Texas.

Mr. McDONALD. Mr. Chairman, will the gentleman yield?

Mr. COLLINS of Texas. I will be glad to yield.

Mr. McDONALD. Mr. Chairman, I appreciate the gentleman's remarks. I certainly want to associate myself with his remarks.

Did I understand the gentleman correctly when he said that the District of Columbia has five times greater employment of city personnel than, say, a comparable area of Phoenix, Ariz.?

Mr. COLLINS of Texas. I just took Phoenix, which is a hard-working, industrious city out west. Look at the salaries of the District of Columbia here, and you know why they have so many public employees.

Mr. McDONALD. That is an astounding comparison. What is the reason for the massive increase for the District of Columbia? Is there any justifiable reason, or is it just padding the payroll?

The CHAIRMAN. The time of the gentleman from Texas has expired.

Mr. COUGHLIN. Mr. Chairman, I yield 5 additional minutes to the gentleman from Texas.

Mr. COLLINS of Texas. I would like to say that apparently there is a very strong development program throughout the District of Columbia in trying to get on the District of Columbia payroll. When you think about the fact that the average salary in the District of Columbia is $21,000 and you realize that the average salary for all of the States in America on the public payroll is $16,000, you can realize that one really has a plum if one gets one of these District of Columbia jobs. So, apparently that is the main incentive in Washington, to get on the city payroll.

Mr. McDONALD. I would like to commend the gentleman from Texas for bringing these figures to our attention and I certainly hope that we will take some corrective steps on this problem.

Mr. COLLINS of Texas. I thank the gentleman very much. I would like to discuss something about other operating categories in the District budget. They have several contradictions, and I would like to give the Members two.

First, public education in the District. If we watch it closely, we have a continual decline, decline, decline. As an example, there were 145,000 students enrolled in the District of Columbia in 1969. Today, the latest figures I have seen, there were 94,000 students enrolled. They dropped from 145,000 to 94,000. Everybody is taking their children out of public school if they possibly can.

I want to tell the Members the cost in the District of Columbia is $3,205 per student per year to produce academic results of which the District of Columbia is among the lowest in the Nation. I compared that to my own school system, which is a very similar city, and we have all the costs of a big city and all of that, yet our average student cost is $2,406 per student. It costs $2,400 in Dallas; here in the District it costs $3,200.

Now, if you look at these figures, there is another thing that impresses one, and I must say that it is a negative impression. There is a 13-percent error rate in District of Columbia welfare payments. That results in about $11 million being paid to ineligible recipients. This does not include the wrongful payments that are made in medicaid and food stamps and social service programs. There is enough waste specifically to pay for the education of 3,432 students in town.

In 1969, the Federal Government contributed $12 million to the District of Columbia welfare program. At that time, there were 38,000 monthly recipients. Today, the monthly recipients have ballooned up to 90,000. It has gone from 38,000 to 90,000 just since 1969.

About 14 percent of the Washington, D.C., population will end up getting some public assistance this year. There is no justification for taxing our people back home to provide tax money to pay for higher salaries in the District of Columbia than the workers in other sections of America are receiving. There is no justification for paying for schools that are producing less in the way of quality education, but costing more. It is time that the District of Columbia faced up to the averages. If we are paying an average of $16,000 per public worker throughout the rest of America, we should not be paying $21,000 here in the District, with the rest of America subsidizing the District of Columbia to get this money.

Remember this: the District of Columbia only pays 32 cents in taxes for every dollar they get back from the Federal Government. If they want to receive more, they ought to pay more taxes for those benefits.

Mr. DIXON. Mr. Chairman, I have no requests for additional time, and I reserve the balance of my time.

Mr. COUGHLIN. Mr. Chairman, I yield 5 minutes to the gentleman from Illinois (Mr. PORTER).

Mr. PORTER. Mr. Chairman, I want to commend my colleague the gentleman from California, who in chairing the District of Columbia Subcommittee has been eminently fair in all matters and has been a strong and steadying influence toward thoughtful legislating. Likewise, the ranking minority member, the gentleman from Pennsylvania, has brought to bear on this process his considerable experience and expertise as well as a wealth of legislative insights, as he does in all of our House deliberations.

The product, however, this bill, is perhaps overly generous at a time of Federal budget stringencies and cutbacks. The District government receives the full 1982 budget request of $1.87 billion with a $300 million Federal payment, the full amount that was authorized at the time this bill was marked up. Since that time, the Congress has raised the authorization to $336.6 million, so that possibly either by Senate or conference action, we can expect an additional amount to be back before us some time in the future.

In any case, approval of the full budget request and full Federal payment must raise for the Congress the entire issue of how the District of Columbia is conducting its financial business. As I have said on this floor before: Not very well, with an accumulated budget deficit of nearly $400 million and no acceptable plan to address it.

As the economic problems of this Nation were not created by President Reagan, those of the District were not created by Mayor Barry. But they are his problems now and a plan to finance a past operating deficit by floating a revenue bond issue—a violation of basic precepts of municipal finance—will not only cost District taxpayers untold extra millions, something like $600 million over the long term, to pay for it, but on the District's first incursion into the bond markets, will lead it straight to the bottom of the financial ratings.

Furthermore, there has been a decided lack of cooperation between the District and the subcommittee on the vital issue of crime control at a time when violent crime, particularly drug-related crime in the District of Columbia, is heading off the graph. I am not yet sure that the District administration will carry out the mandate of the last Congress to hire the additional 221 policemen that were deemed essential. Certainly if the President cannot impound Federal funds, the Mayor ought not to be able to do so. Perhaps, in the absence of the fulfillment of this mandate, the Congress should explore the possibility of earmarking the Federal payment to insure that the relatively few requirements Congress makes are in fact accomplished.

I know that the Mayor and the District administration feel that Congress role—and of course that of our subcommittee—in all this is superfluous and as some have said smack of paternalistic politics. In the Mayor's position, I might feel the same way. But this is unlike any other city—it is a Federal city, to the extent of Federal Government facilities and their environs, at least—the city of all Americans. There are legitimate Federal interests and it is as much my job to protect them as it is the Mayor's to protect those he deems his. I believe in home rule for District residents, but I also see a proper Federal role. I suspect the adjustment of each interest will be a subject of perpetual debate.

As I said before, the budget request is fully granted and the Federal payment is at the $300 million level.

I support them. But before Federal funds should be added by the Congress, the District administration should present a realistic and strong plan to prevent future budget deficits, reduce and eliminate the present one, and bring order out of the general chaos that has characterized the Districts finances for too long a time.

Mr. LEHMAN. Mr. Chairman, I rise in support of H.R. 4522, District of Columbia appropriations for fiscal year 1982.

This is my first year on the District of Columbia Appropriations Subcommittee, and I have been most impressed by the way in which the chairman, Mr. DIXON, carries out his duties. I commend him for the excellent job he does chairing the subcommittee. It is quite often a very difficult task to balance the interests of the District government and the interests of the Federal Government.

Because of the District's unique role as the seat of our Nation's Capital, the Congress has the responsibility to review the District's budget and enact it into law. It is our job to make sure that the Federal interest is protected, and I believe we have done so in this legislation. In these tight budgetary times, it is particularly worth noting that the bill contains nearly $50 million less than the amount requested by the administration.

I strongly support the bill as it was reported from the Appropriations Committee, and I urge my colleagues to vote in favor of H.R. 4522.

The CHAIRMAN. Are there further requests for time? If not, the Clerk will read.

The Clerk proceeded to read the bill.

Mr. DIXON (during the reading). Mr. Chairman, I ask unanimous consent that the remainder of the bill be considered as read and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

There was no objection.

The CHAIRMAN. Are there any points of order against the bill? The Chair hears none.

Are there any amendments to be offered at this point?

AMENDMENT OFFERED BY MR. PARRIS

Mr. PARRIS. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. PARRIS: Page 20, after line 25, insert the following new section:

SEC. 122. None of the funds appropriated in this Act may be used for the implementation of a personnel lottery with respect to the hiring of firefighters or police officers.

Mr. PARRIS. Mr. Chairman, a few weeks ago, not far from this Capitol, a police officer named Louis Green attempted to arrest a robbery suspect. The suspect grabbed for Officer Green's revolver and the two men began to struggle in a dimly lit hallway on the 3rd floor of a building on 13th Street.

As the struggle began, Officer Green called for assistance. And then as he waited for the help he knew would come, he fought for his life with a man he did not know, a man who was trying to shoot him with his own gun.

In any city in this world, the call "officer in trouble" or "officer needs assistance," gets an immediate response. Those who are sworn to protect us must also protect themselves.

But in this city, the Nation's Capital, that is becoming increasingly difficult, because the District of Columbia government has begun implementing personnel policies that are systematically stripping the city of the qualified manpower needed to maintain adequate public safety.

It took 13 minutes to get help to Officer Louis Green. Thankfully, he was not injured and the robbery suspect he battled for almost a quarter of an hour was arrested.

Officer Green was fortunate. But the next police officer may not be. Or perhaps the next person in trouble will not be a police officer, but one of the millions of Americans who visit this city each year, a constituent of one of our colleagues visiting the Nation's Capital.

As a result of the personnel policies which now exist in the District of Columbia as they relate to the police and fire departments, the average response time for police assistance is 30 minutes.

As a result of personnel practices that are now imposed on the police and fire departments by the District of Columbia, the average time for an ambulance response in the Nation's Capital is twice the national average.

As a result of personnel policies mandated by the District of Columbia in connection with the hiring and training of firefighters, instruction of new recruits at the District of Columbia Fire Department Training Academy has been reduced from 11 weeks to 6 days.

As a result of personnel policies laid down by the District of Columbia in connection with the hiring and training of firefighters, a passing score on the District of Columbia Police Department employment test has been lowered to 35.

Public safety in the District of Columbia has been deteriorating for some time. The report by the Appropriations Committee which accompa-

nies the legislation we are now considering contains some of the most critical language in recent memory.

In hearings before the Appropriations Committee on this legislation, there were a number of heated exchanges in which committee members accused the District of Columbia government of ignoring the wishes of the Congress and ignoring public safety needs in the Nation's Capital. During those hearings, several of our colleagues warned District of Columbia officials that things had to improve.

I am here today as the ranking member of the Government Operations and Metropolitan Affairs Subcommittee of the House District of Columbia Committee to tell you that things are not improving. They cannot improve under the shortsighted and misguided personnel policies that are being imposed on the police and fire departments of this great city.

The latest and by far the most damaging personnel directive issued by the District of Columbia government calls for the implementation of a personnel lottery for the hiring of police officers. A similar directive calling for a personnel lottery for firefighters is being prepared.

The Firefighters Association, the Fraternal Order of Police and the Washington Post, among others, have correctly labeled the use of a personnel lottery in the Nation's Capital as an improper attempt to achieve arbitrary quotas which will destroy a public safety system that is already facing serious problems.

I agree. I believe the Post's William Raspberry said it very well when he commented:

The District of Columbia government's insistence of bending rules and requirements until they produce some arbitrary personnel quota is illegitimate, fundamentally unfair, and destructive of popular support for affirmative action.

My amendment is designed to correct that inequity by prohibiting the use of a personnel lottery in the District of Columbia as it relates to the hiring of police officers and firefighters. It will insure that individual merit and legitimate qualifications will continue to be the sole criteria for public employment.

I believe that if the District of Columbia is to maintain an adequate level of public safety it must be prohibited from the use of a personnel lottery in connection with the hiring of people in these very critical public safety areas. I hope that a majority of my colleagues share that belief and will support this amendment.

□ 1415

Mr. DIXON. Mr. Chairman, I rise in opposition to the amendment offered by the gentleman from Virginia (Mr. PARRIS).

The gentleman from Virginia sent to the Members a "Dear Colleague" letter that is very artfully drawn, and he read from that letter just a few moments ago. I would like to read from the same letter to demonstrate to the Members that what he talked about in the well has no relationship to the amendment.

He says in his letter, and he mentioned on the floor, that—

The instruction for new recruits at the D.C. Fire Department Training Academy, which included emergency medical training, has been reduced from 11 weeks to 6 days.

That is only half true. As a matter of fact, they did receive 6 days of training, but all applicants will receive full training academy requirements beginning October 1981, and must successfully complete these requirements.

So it was merely a temporary situation to get more people on the job in a short period of time. That is not uncommon in any jurisdiction.

The gentleman also quoted from a Bill Raspberry column that appeared recently in the Washington Post, and his quote was absolutely correct, except that the Raspberry column has nothing to do with this amendment. In fact, it talked about the Fire Department and its hiring procedures. And Mr. Raspberry, after discussing the issue of the Fire Department, said, and I quote:

It would have made more sense if Shelton had ordered the establishment of a cutoff score for success on the entrance exam, with selections to be made randomly from those who passed the exam, as Mayor Barry did in the case of the police department.

So what the gentleman from Virginia (Mr. PARRIS) has done is suggest that as the Raspberry column relates to his amendment, which goes to the police department, William Raspberry agrees with him. That is absolutely not the fact. In fact, if we were to use this column, we would find that Mr. Raspberry supports the random selection procedure and would be opposed to what the gentleman from Virginia (Mr. PARRIS) is doing.

But that really is not the issue here. It just goes to point out how one can take quotes from the newspaper and distort the facts in a "Dear Colleague" letter.

Now, what are the facts in this issue? The city has gone to a pass-fail system. That is certainly not unheard of in many jurisdictions for many kinds of job applications.

Why has the city gone to a pass-fail system? It is their opinion—and I do not know if it is correct or not—that the test is in violation of title 7 of the Civil Rights Act of 1964.

Now, what is the proper forum to determine if their procedure is in violation? Either an administrative body or ultimately the courts. Certainly not the Congress. So the remedy, if anyone thinks that the system of pass-fail is not appropriate, is to sue the courts.

Second, what does this have to do with the qualifications of the policeman who is brought on the force. I suggest to the Members that it has nothing whatsoever to do with whether or not the police officer will be a successful police officer. There is no empirical evidence that says the ultimate police officer who scores 100 and is brought onto the force will be better than the other officer who scored 70. There are many other ingredients, many other factors, besides the examination that go into the recruitment of police officers.

I have heard that this pass-fail system would allow people who are not otherwise qualified to obtain jobs on the police force. That is absolutely untrue. This pass-fail system merely sets up the priority of hiring, assuming they have all the other requirements which, by the way, have not been changed.

The CHAIRMAN. The time of the gentleman from California (Mr. DIXON) has expired.

(By unanimous consent, Mr. DIXON was allowed to proceed for 2 additional minutes.)

Mr. McDONALD. Mr. Chairman, will the gentleman yield?

Mr. DIXON. I will not yield at this point.

Mr. Chairman, if in fact one of those individuals who took the examination and who scored very high has lost his hand in the interim, he will not be hired. If in fact there are any individuals in the drawing who have a felony conviction, that in itself disbars them from being a member of the Police Department, and of course they will not be hired. If in fact there is a person who does not get through the academy, that person will not be hired.

Now, the practical effect of this amendment is to go against what we on the committee and in the House have consistently worked for—and this is what the gentleman from Illinois (Mr. PORTER) alluded to and stated in his opening comments—we have been systematically applying pressure to the District of Columbia to bring its police force up to a strength of 3,880 sworn personnel.

What will this amendment do as a practical matter? It will invite a lawsuit, because there are many people who think the test violates title VII of the Civil Rights Act of 1964. So we will be tied up in litigation for at least the next 18 months to 2 years while the courts decide whether or not this test is valid. The testimony at the hearing was that, in fact, there was strong suspicion that there was a violation of the Civil Rights Act.

In summary, Mr. Chairman, to adopt this amendment means that we will go against the Committee on Appropriations and the House in expediting the employment of 200 officers in the

Police Department, because as sure as we are standing here, someone is going to file a lawsuit, and it will be 18 months to 2 years before it is resolved.

So, Mr. Chairman, I say to the Members that this amendment really has no merit as to the quality of the Police Department, and it will impede what the committee and the House have systematically tried to do, and that is to get qualified people on the police force.

I would urge my colleagues to vote against the gentleman's amendment.

Mr. ASHBROOK. Mr. Chairman, I rise in strong support of the amendment offered by the distinguished gentleman from Virginia (Mr. PARRIS).

Mr. Chairman, the gentleman from Virginia (Mr. PARRIS) seeks a prohibition on the use of Federal funds for the implementation of a personnel lottery with respect to the hiring of firefighters and police officers in the District of Columbia. It is a timely amendment and, unfortunately, an absolutely necessary one.

New District of Columbia personnel policies, as explained by the gentleman, represent the concept of affirmative action at its very worst. In the past, we have learned of the countless headaches caused businessmen as a result of congressional action and Labor Department regulations in the area of job quotas. Today, we are not talking about bureaucratic harassment and redtape. We are talking about the safety of this city's inhabitants and the safety of the millions of Americans who annually travel to the Nation's Capital.

In an effort to promote increased minority representation on the District's Police Department, the Barry administration has added a new twist to the affirmative action debate. And it poses a very serious problem. The local government has decided to throw applicant testing results out the window in favor of a lottery system for the hiring of police officers. I do not know how my colleagues react to this plan but this Member is greatly concerned, indeed outraged.

Most people know that Washington, D.C., is the Nation's Capital. Unfortunately, more and more Americans are beginning to think of this city as a crime capital as well. The newspapers are full of stories about an undermanned and overworked police force and a dangerously high crime rate. In fact, this morning's Washington Post reports that four persons were stabbed to death just this last weekend. Add that to the growing problem of criminal-coddling judges who matter of factly return suspected, and sometimes convicted felons to the streets and you have a real problem.

Now, Mayor Barry and the District government would like to exacerbate the crime problem in the city by passing over qualified applicants for the District Police Department in favor of those who may not otherwise be qualified for service. All in the name of affirmative action. That is much too high a price to pay.

Mr. Chairman, I believe that the amendment offered by my good friend from Virginia is a sensible one and I believe that it should be adopted. I urge my colleagues to support the Parris amendment.

Mr. FAUNTROY. Mr. Chairman, I move to strike the last word, and I rise in opposition to the amendment.

Mr. Chairman, the distinguished chairman of the subcommittee has more than adequately outlined the compelling arguments for opposition to this amendment. This amendment, like others which have been noticed, is subject to the objection, of course, that it seeks to legislate on an appropriations matter.

Putting that aside, Mr. Chairman, I rise in opposition to this amendment. The District of Columbia government has designed a system modeled after systems which have been used in other jurisdictions—a system aimed at providing equal employment opportunity in hiring police and firefighters.

The system is fair in that it allows for the selection of individuals to fill these slots through the use of a lottery. Moreover, each of these individuals has been screened, based upon criteria and requirements which meet the demands of the job. Thus all candidates in the lottery are well qualified for the position.

Mr. Chairman, to accept this amendment would frustrate the letter and spirit of the Home Rule Act which provided for the establishment of a local personnel system independent of the Federal Government. It would also have a seriously dampening effect on the ability of the District of Columbia government to take corrective measures when it is faced with an unsatisfactory personnel matter.

It also should be noted that, of course, no other State or local government is limited in the use of its funds in the manner prescribed by the proposed amendment, and I respectfully urge the Members to vote no on the amendment in response to the arguments made both by the chairman of the subcommittee and myself.

Mr. PARRIS. Mr. Chairman, will the gentleman yield?

Mr. FAUNTROY. I am very pleased to yield to the gentleman from Virginia.

Mr. PARRIS. Mr. Chairman, I appreciate the gentleman's yielding, and I would ask him simply this:

As reported from the committee, the bill already currently contains provisions that bar expenditures for such things as installing meters in taxicabs, payment of overtime compensation, partisan political activities, implementation of a gambling lottery, lobbying for legislation before this Congress or any other State body, and funding of abortions. These limitations are already in the bill before us.

This limitation that is contained in my amendment would simply add to that list. Does the gentleman oppose the balance of those prohibitions?

Mr. FAUNTROY. I do oppose many of the limitations that are included in the bill.

Mr. PARRIS. But not all?

Mr. FAUNTROY. But not all. And I certainly oppose this and would hope that the House would follow the well-considered judgment of the full committee.

Mr. ASHBROOK. Mr. Chairman, will my colleague, the gentleman from the District of Columbia, yield?

Mr. FAUNTROY. I am happy to yield to the gentleman from Ohio as well.

Mr. ASHBROOK. Mr. Chairman, I thank my colleague for yielding, and I will say to him that while I sometimes disagree with him, I always listen to him on the District of Columbia because he is a hard-working Member and speaks honestly.

One thing I noticed as I listened both to the subcommittee chairman and to my friend, the gentleman from the District of Columbia (Mr. FAUNTROY), was that they were saying these applicants are all well qualified. Let me ask the gentleman a question about that.

I notice that the description has been carefully crafted, because the subcommittee chairman and the gentleman from the District of Columbia did not say they were highly qualified, they did not say they were greatly qualified, or they did not say they were equally qualified, adequately qualified, or superbly qualified—just well qualified.

If they are well qualified, what is wrong with taking the most qualified among the well-qualified applicants? That is what bothers many of us, because I do not care whether we are talking about our own applicants for Academy positions or any other applicants, most of my applicants are well qualified. They probably would not try if they were not. But when I see the test results and when I analyze them, I find that some are much more qualified, and if we take those who are more than just well qualified, we end up with the best qualified.

□ 1430

Are we not dropping a little bit when we just say well, they are all well qualified so any one of them would be all right? I raise that as an honest question and I would like my colleague to respond to it.

Mr. FAUNTROY. I will attempt to respond honestly. I think the chairman made it very clear that there cer-

tainly is no objective basis for determining that persons who score highest on exams are most qualified. There are a number of criteria which have to be taken into account, and the criteria taken into account under this system would assure that all persons who ultimately are hired meet all of the demands of the job.

I would add that in light of the statistics which were stated by the distinguished gentleman from Virginia, he might well have been arguing that we do something different. The duly elected officials of home rule government of the District of Columbia agree and, in this case, have acted to assure that our police force does indeed hire those best qualified to serve.

The CHAIRMAN. The time of the gentleman from the District of Columbia has expired.

(At the request of Mr. DIXON and by unanimous consent, Mr. FAUNTROY was allowed to proceed for 1 additional minute.)

Mr. DIXON. Mr. Chairman, will the gentleman yield?

Mr. FAUNTROY. I am delighted to yield to the gentleman from California.

Mr. DIXON. I think our colleague from Ohio (Mr. ASHBROOK) makes the point very well, but he may not want to accept it.

The only way that one can tell the best qualified person for a job is after that person has applied himself on the job for a reasonable length of time. That is exactly what we are saying. The physical examination will not tell who is the best qualified. The written examination will not tell who is the best qualified. Nor will the academy tell who is the best qualified. Only after some reasonable time on the job will one be able to identify the best qualified officers, assuming that all of them are qualified. So that is just the point we are making.

The CHAIRMAN. The time of the gentleman from the District of Columbia has again expired.

(At the request of Mr. ASHBROOK and by unanimous consent, Mr. FAUNTROY was allowed to proceed for 1 additional minute.)

Mr. ASHBROOK. Mr. Chairman, will the gentleman yield?

Mr. FAUNTROY. I yield to the gentleman from Ohio (Mr. ASHBROOK).

Mr. ASHBROOK. I thank my colleague. The chairman makes a very valid point. I would be honest to say in my years in the Congress some of the ones I have appointed that I felt were the most qualified washed out after 6 months. The gentleman is absolutely right.

Yet in my experience of working with the academies, and I think policemen and firemen are exactly the same, there is an almost absolute problematical percentage of how an applicant will fare over the 4 years based on the tests that they give. My colleague has seen those before. They can show that there is 1 chance in 50 that this person will continue in the academy for 4 years based on the test results.

Now, some test results have a pretty good track record, and I have watched the academies very carefully and they normally have a very good track record on the qualifications going in. I think it is exactly the same thing here.

That is why if we go to the lottery system we, in effect, throw all that we have learned and know about the tests out the window.

The CHAIRMAN. Time of the gentleman from the District of Columbia has again expired.

(At the request of Mr. DIXON and by unanimous consent Mr. FAUNTROY was allowed to proceed for 1 additional minute.)

Mr. DIXON. Mr. Chairman, will the gentleman yield?

Mr. FAUNTROY. I am happy to yield to the gentleman from California (Mr. DIXON).

Mr. DIXON. The gentleman from Ohio (Mr. ASHBROOK) makes a very valid point. I would totally agree as far as he takes the illustration.

Certainly the written score as it relates to the academy will project who is going to stay in the academy and have the best academic record. But it will not tell you who is going to be the best pilot or the best infantryman once that person leaves the academy and goes in the field. So as long as the individual is in that captured environment, the academy—yes, the gentleman makes a very valid point; there is a high correlation between entrance exam marks and how one will fare in the academy. But it does not tell you whether that person is going to be a good soldier.

Neither the written score nor the academy can do that. The only way success in the field can be determined is through spending a reasonable time on the job.

Mrs. FENWICK. Mr. Chairman, will the gentleman yield?

Mr. FAUNTROY. I am happy to yield to the distinguished gentlewoman from New Jersey (Mrs. FENWICK).

Mrs. FENWICK. I would ask for a minute because I really would like to speak on this point. I have not only been a member of the District of Columbia Committee, but I was director of consumer affairs in my own State. The finest mediator I had, the finest that I had in the whole division was a man who could not pass the civil service examination.

If that did not tell you that that examination was not constructed in such a way as to measure the abilities for that particular job, there is where the problem is. That man could not pass a civil service exam. But I will never forget, time after time, and one day I remember this, a woman wrote to me and said,

> I have never known anyone like Mr. Smith, when the man who had given me that phony icebox and was going to have to give me a brand new one, and he got up and he shook hands with Mr. Smith and said that he had never parted with $494 with more pleasure.

That is the kind of an inspector and mediator you want. But the examinations would not produce him. In fact, they barred him.

I said to the Governor, "I do not care about the Civil Service Commission. If he is fired, I am leaving," because that was the measure, the best was so far away from the measure of the abilities.

Now, I do think, and I will be honest, that this lottery business is madness. That is not the way to do it.

Mr. FAUNTROY. I would like to take my time back now.

Mrs. FENWICK. That is not the way to get my friend, the deacon from the church in Newark.

Mr. FAUNTROY. The gentlewoman was doing fine.

Mrs. FENWICK. He might not have won the lottery.

Mr. McDONALD. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendment.

Mr. Chairman, I rise in support of the amendment offered by my distinguished colleague from across the Potomac.

I find it appalling that the District of Columbia, our Nation's Capital, has abandoned the time-honored principle of choosing the best qualified candidates for available positions within the District of Columbia Police Department and the District of Columbia Fire Department. No longer are police officers and fire department personnel selected and rewarded on the basis of their merit, but now they are chosen by chance—by luck—in the form of a personnel lottery.

Without question, police and fire protection are the most important and vital services that a government entity can provide. These are exceptionally difficult occupations; occupations that require a tremendous amount of skill and training and a high degree of professionalism. Therefore, those selected for these occupations should not be selected haphazardly, but should be selected using high standards and because they are the best personnel available. To make the choice in any other manner is to reduce the efficiency and the competency of these very fine departments. The selection of these key personnel by chance will result in greater danger for the residents of the District, greater danger

for our constituents who are visiting the District, and much greater danger for their fellow police officers and firefighters who must risk their lives with less than the best support at their sides.

The personnel lottery is being advanced in the name of "equal opportunity." If there is bias in the method or standards by which candidates are selected, then let us erradicate the problem. Equal opportunity means that all have the same opportunity to compete on an equal basis for available positions, and not having it handed to you on the basis of pure chance.

The question becomes this: If you are faced with an emergency situation, would you want the person responding to your distress to be a person selected by merit and the basis of skill and ability or a person who happened to be lucky in a lottery?

For that reason, I support this amendment.

Mr. BLILEY. Mr. Chairman, I move to strike the requisite number of words and rise to speak in favor of the amendment.

I would like to follow up on what my colleague from Georgia has said. We talk about equal opportunity and that is, indeed, what we should have, for this city belongs not only to the citizens who live here but to the entire country. We should not condone a process in which not the best qualified are hired and a lottery leaves a lot open to chance.

I would like, if I could, to engage the patron of the amendment in a colloquy for a moment. I would ask the gentleman from Virginia (Mr. PARRIS) what is the passing score that they decided on after all?

Mr. PARRIS. Mr. Chairman, will the gentleman yield?

Mr. BLILEY. I yield to the gentleman from Virginia (Mr. PARRIS).

Mr. PARRIS. It is my understanding that the passing score is a level of 35 of the questions that are asked on the examination.

Mr. BLILEY. These are going to be, some of them, police officers?

Mr. PARRIS. In order to be placed on a list that is called qualified applicants one must have a passing score in this examination. It is designed to measure communicative ability, reasoning, that sort of thing.

I would like to take this opportunity to remind the gentleman and the chairman of the subcommittee, (Mr. DIXON) and the gentleman from the District of Columbia, for whom I have the highest possible regard, mentioned the question of the legality, if you will, of test 21. I would remind my colleagues that in a case in 1976 this test was taken to the Supreme Court of the United States against the then Mayor of this city, Walter Washington, in a case called Washington against Davis. The Supreme Court said as the result of the decision in that case that "The Constitution does not prevent the Government from seeking through test 21," which is the test we are talking about today, "modestly to upgrade the communicative abilities of its employees rather than to be satisfied with some lower level of competence, particularly where the job requires special abilities to communicate orally or in writing."

I submit to my colleagues that in police work, which is inherently violent, there is something bad about the presence of a police officer or he would not be there, in order to have a gentleman serving in that capacity, who in some instances cannot communicate, communicate with the people involved, will inevitably lead to more violence in that situation. I submit that I think that is part of the reasoning of the Supreme Court just 4 years ago when they said that this test which is being used for the testing of police officers and has been since 1948, 32 years now we have been determining the capacity of individuals in our society to serve as police officers through the use of this test.

Also, 5 or 6 years ago, in June 1976, the Supreme Court said this is a legitimate test of job performance.

All I am really trying to do here is make sure, as the gentleman from Ohio has indicated, that we get not just the qualified but the very best qualified people who apply for these positions of public employment.

Mr. BLILEY. I thank my colleague and yield back the balance of my time.

Mr. JOHNSTON. Mr. Chairman, I move to strike the requisite number of words and rise in support of the amendment.

We have an expression down where I come from, "If it ain't broken, don't fix it." We have a situation in the District of Columbia that is obviously broken.

As the distinguished gentleman from Texas so eloquently pointed out, the cost of running this city is exhorbitant, relative to running comparable sized cities throughout this country. Yet the fact remains, in spite of these millions and hundreds of millions of dollars that we have invested in this city, it is so unsafe that U.S. Senators walking three blocks from their office to their home can get mugged.

In spite of the fact that we supposedly have the most able group of people in the country, the Congress of the United States, overseeing the conduct of its municipal affairs, it is, in fact, a terribly unsafe, violent city.

I do not think the proponents of affirmative action or equal employment ever envisioned the pursuit of mediocrity as the purpose of these acts. Yet that is precisely what is now being done in the name of affirmative action. A 35-percent passing score, does anybody fail the test? Yet from a group of people no more selectively chosen than to achieve a 35-percent score, a lottery is drawn.

What is wrong with seeking the best and the brightest and the most able? What is wrong with the idea of going after winners, not just losers? Is this what America was founded on?

□ 1445

Is this the idea that built this country and caused it to grow great, that we pick the mediocre, the less able, in the name of affirmative action, in order to keep a few people happy?

This is precisely what is being voted on here today—whether achievement, whether talent, whether ability should triumph, or whether we leave it to blind chance.

This amendment warrants anyone's consideration on the basis of the principles that this country was built on. I do not see how we can stand up here and profess to believe in the American system, which is a system of winners and losers, and let the Capital of this country conduct its personnel selection on the basis of a lottery.

Mr. PARRIS. Mr. Chairman, will the gentleman yield?

Mr. JOHNSTON. I yield to my colleague, the gentleman from Virginia.

Mr. PARRIS. I just want to reiterate for the benefit of my colleagues one thing that should be self-evident.

There is, I think, some misinformation, perhaps, in the Halls and in the corridors of the Capitol.

My amendment does not affect in any way whatsoever the gambling lottery, which is also the subject of some attention by the subcommittee. I do not address that issue.

The lottery to which my amendment applies deals solely with the personnel lottery for individual applicants for public employment in the police and fire departments. It does not apply to anything other than in areas of public safety employment. It applies solely to police personnel and firefighters.

Mr. JOHNSTON. As I understand the gentleman's bill, it would require a merit type selection.

Mr. PARRIS. If the gentleman will yield, it would leave the selection of employees up to the District of Columbia governing authorities, just like it does now. The only thing it would do is prohibit them using these funds that are being appropriated for the purposes of a personnel lottery in the selection of their public safety employees.

Mr. JOHNSTON. As I understand it, the selection of a lottery is now the procedure being used; is that correct?

Mr. PARRIS. That is the procedure that has been stated by the Mayor and the appropriate authorities of this city and that is being used in the selection of these police officers. As I indicated in my earlier statement, it is our infor-

mation that a firefighters lottery on the same basis is now being prepared and will be implemented in the near future.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Virginia (Mr. PARRIS).

The question was taken; and the Chairman announced that the ayes appeared to have it.

RECORDED VOTE

Mr. DIXON. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 305, noes 96, answered "present" 1, not voting 31, as follows:

□ 1300

The Clerk announced the following pairs:

On this vote:

Mr. Fary for, with Mr. Moffett against.

Mr. Nichols for, with Mrs. Collins of Illinois against.

Mr. HERTEL and Mr. FITHIAN changed their vote from "aye" to "no."

Mr. HUGHES and Mr. LUJAN changed their vote from "no" to "aye."

So the amendment was agreed to.

The result of the vote was announced as above recorded.

AMENDMENT OFFERED BY MR. JAMES K. COYNE

Mr. JAMES K. COYNE. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. JAMES K. COYNE: Page 20, after line 25, insert the following new section:

SEC. 123. (a) None of the funds appropriated by this Act may be used to transport before December 1, 1981, any output of the municipal waste system of the District of Columbia for disposal at any public or private landfill located in any State, excepting currently utilized landfills in Maryland and Virginia.

Mr. DIXON. Mr. Chairman, will the gentleman yield?

Mr. JAMES K. COYNE. I yield to the gentleman from California.

Mr. DIXON. I thank the gentleman for yielding.

Mr. Chairman, I have reviewed this amendment and have no opposition to it.

Mr. COUGHLIN. Mr. Chairman, will the gentleman yield?

Mr. JAMES K. COYNE. I yield to the gentleman from Pennsylvania.

Mr. COUGHLIN. I thank the gentleman for yielding.

Mr. Chairman, I want to commend the gentleman on his amendment. I think the point is very well taken. There are a number of questions that need to be resolved before this particular proposal is put into effect, and I commend the gentleman for his diligence and certainly accept the amendment.

Mr. JAMES K. COYNE. Mr. Chairman, I am compelled to broach this unpleasant subject because the sewage disposal plan recently proposed by the District of Columbia may adversely affect my constituents.

Just 2 weeks ago, I was abruptly informed by a newspaper reporter that the District of Columbia had entered into a tentative agreement to transport some 500 tons of sludge every day to GROWS landfill in Falls Township, Pa.—a landfill that is situated in close proximity to the Delaware River, the main source of drinking water for millions of people in the greater Philadelphia area. This is the only operating landfill in the eighth Congressional District of Pennsylvania.

This proposal not only raises serious questions environmentally, it also raises questions of fiscal responsibility and threatens the public safety of the

people of Pennsylvania's Eighth Congressional District. And beyond that, this hasty proposal ultimately does not provide a meaningful answer to the questions facing the people of the District of Columbia.

Mr. Chairman, this proposal is, in my view, a classic example of short-sighted, last-minute decisionmaking. It provides a short-term solution for the District of Columbia but creates a long-term problem for the people of my District. That problem, with which the District of Columbia is only too familiar, is the regrettable fact that there is only so much landfill area to go around.

The reason the District of Columbia is in this current crisis is because it has exhausted the landfill sites that had previously been available to it. The Eighth Congressional District does not want to find itself facing a similar situation a few years down the road.

Currently, GROWS landfill handles somewhere between 100 and 150 tons of sludge per day from various sources primarily in suburban Philadelphia. The additional influx of sewage from the District of Columbia will triple—or perhaps quadruple—the amount of sludge being deposited into the GROWS landfill each day. Estimates vary as to the lifespan of the GROWS landfill. Even the most optimistic projection, however, predicts that the GROWS landfill will be exhausted withins 8 short years.

Mr. Chairman, perhaps a few statistics would help place this issue in perspective for my colleagues. The District of Columbia plans to truck 500 tions of sludge over the 15-month durartrict. That adds up to over 200,000 tons of slugde over the 15-month duration of the proposed contract with GROWS.

Shipping 500 tons of sludge on a 175-mile one-way trip is an expensive proposition. Mr. Chairman, it has been estimated that the transportation costs alone over the next 15 months will cost a staggering $25 a ton—or some $4.5 million over the next 15 months. A minimum of twenty to twenty-five 21-ton trucks will be required to haul this extraordinary amount of sludge, contributing to the congestion and deterioration of the local roads and highways.

Moreover, these wastes will be hauled every day through the cities of Washington, D.C., Baltimore, Wilmington, and Philadelphia—one of the most heavily populated corridors in the country. Surely a less expensive and hazardous method of disposal can be found.

Mr. Chairman, I would like to emphasize that I am not alone in my opposition to this extravagant proposal. In response to the public outcry, the supervisors of Falls Township have sent a telegram to the Department of Environmental Resources of the Commonwealth of Pennsylvania urging them to deny GROWS landfill permission to implement this plan, and requesting that a public forum be provided. I, too, have petitioned DER to reject the GROWS proposal until certain determinations have been made.

In response to the objections raised by myself and others, DER has requested that GROWS provide information on the environmental impact of this proposal, as well as a detailed analysis of the sludge content. Furthermore, DER has urged the District of Columbia to explore alternative methods of disposal.

Mr. Chairman, I sympathize with the plight of the District of Columbia. Yet, I do not believe that running roughshod over the citizens of the Eighth Congressional District provides an equitable solution for the problem of sewage disposal.

I believe that the taxpayers of this country should be assured that this is the most efficient and effective plan available.

For this reason, I request a 60-day delay in the implementation of this plan in order to give the organizations involved in the proposal time to adequately answer the questions that have been submitted by the Commonwealth of Pennsylvania and to give Pennsylvania time to effectively evaluate those answers and make an informed decision on the soundness of this proposal.

My amendment does not preclude the eventual use of these funds or the disposal of this sludge but it provides some assurance to the people of the Eighth Congressional District that they are not the victims of a capricious and hastily conceived scheme.

Mr. Chairman, as a freshman Congressman I had hoped to bring Washington closer to my constituency—but truckloads of sewage sludge was not what I had in mind.

Mr. Chairman, I thank the gentleman from California (Mr. DIXON) for his cooperation and I thank the ranking minority member, the gentleman from Pennsylvania (Mr. COUGHLIN).

The CHAIRMAN. The question is on the amendment offered by the gentleman from Pennsylvania (Mr. JAMES K. COYNE).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. BENNETT

Mr. BENNETT. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. BENNETT: Page 20, after line 25, insert the following new section:

SEC. 124. None of the funds appropriated in this Act may be used to grant a business license to any person who, after the date of enactment of this Act, offers drug paraphernalia (as defined in the Model Drug Paraphernalia Act drafted by the United States Department of Justice, August 1979) for sale in the course of the business for which such license is required.

Mr. DIXON. Mr. Chairman, I reserve a point of order on the amendment.

Mr. BENNETT. Mr. Chairman, I rise today to offer an amendment to H.R. 4522, to prohibit the use of Federal funds to license any establishment within the boundaries of our Nation's Capital that sells drug paraphernalia.

Narcotics abuse today, especially among young children, is growing at an alarming and an intolerable rate. Yet, we have allowed a paraphernalia industry which, in the words of former DEA Director Pete Besinger, "preys on the drug fantasies of our youth," to flourish.

This despicable industry of drug paraphernalia has developed into a multimillion-dollar business that not only facilitates, but glamorizes drug use. To allow its existence in our Nation's Capital is a national outrage.

Today in the District of Columbia, there are at least 15 wholesalers who market these devices which are designed primarily for the use of illegal drugs. They in turn stock the countless numbers of street vendors and so-called head shops which flourish even in the shadow of the Capitol. Many of these vendors blatantly distribute their paraphernalia on the sidewalk in the plain sight of even the youngest child.

It is no wonder that our young people are confused for they must contend with the paradox that while drugs are illegal, devices to administer them are not. It is no wonder the rest of the world questions our resolve to fight drugs when faced with the paradox of an America which asks them to destroy their marihuana and poppy crops, but allows the sale of drug paraphernalia to flourish in its own Capital City. This clearly a national problem which we must address.

My amendment will prohibit the use of Federal funds to grant a business license to any establishment in the District of Columbia which sells drug paraphernalia as defined by the Drug Enforcement Administration's model act that has now been passed by 23 States, over 200 local governments, and covers over half the population of our country.

Its constitutionality has been affirmed in court cases throughout the county.

I am pleased to note the endorsement of my amendment today by the National Federation of Parents for a Drug Free Youth which represents over 1,000 parent groups in all 50 States.

The thrust of this important amendment attacks the root of the narcotics problem: The tacit acceptance by society of the drug culture.

Mr. Chairman, if we are serious about eliminating illegal drugs from our society, then we must eliminate

those devices which facilitate their use. I urge the passage of this amendment which will be found on page 21471 of the September 21, CONGRESSIONAL RECORD, and Mr. Chairman, I have walked through the streets of the District of Columbia and observed myself in Georgetown and other areas where people are out on the streets with invitations to use these paraphernalia for the use of illegal drugs, clearly saying get high on these drugs, be head of the household, clearly appealing to the youngsters who walk the streets, particularly of Georgetown, but also elsewhere in the District of Columbia. This is a crime. It ought to be prohibited.

I would hope that the vast majority of the Members of Congress would agree with me. I realize it may have some point of order difficulties, but in view of the necessity of going forward and fighting drug traffic today in our country, I hope if there is anything wrong with this from the standpoint of parliamentary matters, it will not be raised because we are here dealing with something that is very serious with the welfare of our country and the welfare of our Nation.

So I hope it could be agreed to by the committee.

□ 1515

The CHAIRMAN. Does the gentleman from California (Mr. DIXON) insist upon his point of order?

Mr. DIXON. Yes, Mr. Chairman.

The CHAIRMAN. The Chair will hear the gentleman.

POINT OF ORDER

Mr. DIXON. Mr. Chairman, I make a point of order that the amendment of the gentleman violates clause 2 of rule XXI of the House in that it would impose additional duties on the District's licensing officials who have to either inspect all places that are doing business to determine whether they are selling such items; but probably more importantly, they would have to determine the intent for which such items would be used.

The CHAIRMAN. Does the gentleman from Florida wish to be heard on the point of order?

Mr. BENNETT. Well, Mr. Chairman, I have somewhat addressed it in a nonlegal way, a non-legal point, in the hope that something so important would not be thrust aside because of a technicality; but I would like to say that inherent in this amendment I have offered is the impossibility of amending it to meet the objection which arises, because this has been passed upon and the words that the gentleman referred to are words that the court feels are important, as I understand it, to the constitutionality of this act.

I would just hope that the point of order would not be sustained, because I do not feel it puts any heavy responsibility upon anyone.

As a matter of fact, there are already people in the District of Columbia who have to make a similar decision anyway.

A case in point on this matter is the fact that the amendment does not impose any additional duties, because the term drug paraphernalia is very specifically defined in the DEA's Model Act, which has been adopted already by 23 States and, of course, it would not create additional duties, because the District already employs license inspectors who routinely visit establishments of vendors who have such a license.

The CHAIRMAN. Does the gentleman from California wish to be heard further on the point of order?

If not, the Chair is prepared to rule.

The question is a difficult one, but after consultation with the Parliamentarian and in reviewing precedents, the Chair finds, and quotes directly from page 537 of the House Rules and Manual:

> Where an amendment to or language in a general appropriation bill implicitly places new duties on officers of the government or implicitly requires them to make investigations, compile evidence, or make judgments and determinations not otherwise required of them by law, such as to judge intent or motives, then it assumes the character of legislation and is subject to a point order.

The Model Act incorporated by reference in the amendment requires a determination that the drug equipment being sold be intended for use in connection with drug preparation or use.

The Chair, therefore, rules that the point of order is well taken and the point of order is sustained.

AMENDMENT OFFERED BY MR. COLLINS OF TEXAS

Mr. COLLINS of Texas. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. COLLINS of Texas: Page 20, immediately after line 25 insert the following new section:

"SEC. 124. None of the funds provided in this Act shall be available for the compensation of any full-time employee in an authorized position in the District of Columbia government during any month when the number of such employees is greater than 19,050."

Mr. COLLINS of Texas. Mr. Chairman, the purpose of my amendment is to give the District a limiting guideline as to what size employment they should have for the staff of the District of Columbia.

Now, there are many operations in municipalities throughout the country that operate on 2 percent of the total population to take over all the public sector jobs. Some, I think, operate on 1 percent.

All we are asking here is that we place a number, and I would rather use a percentage, but by the law you need to name numbers, so we named 19,050, which is a 3-percent figure, a 3-percent figure for them to use as a guideline.

Now, when you see San Jose out in California, when you see Milwaukee in Wisconsin, when you see Phoenix in Arizona, when you go all over the country and see municipalities that are run efficiently, you wonder why here in our Nation's Capital we have such an overstaffed municipality.

I want to quote some of the factors that are involved, because it is not a shortage of money. They are spending money so fast here; we keep talking about $300 million. Why, $300 million is less than one-third of what they get from the Federal Government. In other words, the total Federal funds is $1,068,471,000. How that is represented, it is discussed here as Federal payments of $300 million. That is what we are talking about, Federal payments of $300 million. That is only the start.

Congress contributes to their retirement fund. Congress does not contribute to the retirement fund of the firemen or policemen in your town, but Congress gives them $52 million.

Then we have $13 million in what you call payment in lieu of.

Then we have for capital outlays, $155 million.

Then there is $19 million of revenue sharing.

After this we get into some real large ones. The Federal grants—this is absolutely amazing—the Federal grants for the District of Columbia are $513 million.

SUMMARY OF FEDERAL GRANT ASSISTANCE TO THE DISTRICT OF COLUMBIA

| Agency | 1982 estimate [1] |
|---|---|
| Governmental Direction and Support: | |
| Office of the Inspector General | $487,900 |
| Office of the Corporation Counsel | 224,600 |
| Office of the City Administrator | 5,855,000 |
| Office of Personnel | 90,000 |
| Office of Business and Economic Development | 386,000 |
| Total, Governmental Direction and Support | 7,043,500 |
| Economic Development and Regulation: | |
| Department of Housing and Community Development | 47,015,600 |
| Public Service Commission | 80,000 |
| Total, Economic Development and Regulation | 47,095,600 |

SUMMARY OF FEDERAL GRANT ASSISTANCE TO THE DISTRICT OF COLUMBIA—Continued

| Agency | 1982 estimate [1] |
|---|---|
| Washington Metropolitan Area Transit Authority | 13,407,700 |
| Total, Transportation Services and Assistance | 15,897,400 |
| Environmental Services and Supply: Department of Environmental Services (General Fund) | 1,228,000 |
| Capital Outlay (General Fund) | 142,818,900 |
| Water and Sewer Enterprise Fund: Department of Environmental Services | 138,000 |
| Total | [1] 513,126,400 |

[1] Amounts as submitted in the budget for the District of Columbia Government for 1982 (H. Doc. 97-17).

The Federal reimbursement is $15 million.

The total is over $1 billion of Federal funds for the District of Columbia.

I want to commend the District Committee for the excellent appraisal and the very fair approach that they made in presenting the committee's report. Time and again in its report they refer to the fact that they have a management problem down there at city hall. They hired Arthur Andersen & Co., and they hired Lucas Tucker—these are management consultant firms, accounting firms—to make a management appraisal. I want to quote from their record:

A separate report providing greater detail on the weaknesses noted in the District's central systems and data processing activities. In addition to weaknesses in systems, these reports identified numerous weaknesses that were attributable to poor performance and non-performance by District personnel.

The Committee urges the District to respond to each of the items of weakness noted in the Andersen report as soon as possible and suggests that the managers responsible for the weaknesses be given extensive training in management and supervision techniques.

What I am suggesting is that we do not need to teach them management. We need to put them in another type of business. If they do not know how to run city hall, if they are big spenders; then they should be, they ought to be in another business, whatever it is, whether it is selling tires or whether it is working in a grocery store; but obviously, they do not know how to run city hall.

It is our responsibility when we realize how President Reagan has called on Congress day in and day out to balance the budget, to cut expenses, that right here in our hometown would be a good place to start.

Every time I think of what we do for the District, I am amazed. We provide them with the Capitol Hill Police. We provide them with the White House Police. We provide them with the Park Police. We have the FBI, all this does not go in their budget.

The biggest business in town is the convention business. The Capitol, the Government, is what stimulates the biggest business in town. There are so many services that we provide for them in addition to this billion dollars.

What I am asking in my amendment is to just have them work under a reasonable ceiling, just spend twice as much, just have twice as many people, as most cities have, but limit it to 19,000 in personnel for the District of Columbia.

FEDERAL FUNDS

| Item: | Amount |
|---|---|
| Federal payment | $300,000,000 |
| Federal contribution to police officers, firefighters, teachers, and judges retirement funds | 52,070,000 |
| Payment in lieu of reimbursement for water and sewer services to Federal facilities | 13,500,000 |
| Federal loans for capital outlay | 155,000,000 |
| Federal revenue sharing | 19,239,000 |
| Subtotal (Federal funds included in this bill) | 539,809,000 |
| Federal grants | 513,126,400 |
| Federal reimbursements | 15,535,700 |
| Total, Federal funds | 1,068,471,100 |

Mr. FAUNTROY. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, I rise in opposition to the chairman in somewhat amazement that the gentleman from Texas would question the well-considered judgment of the Subcommittee on Appropriations for the District of Columbia, which has addressed itself assiduously over recent years to improving the efficiency of the District government and reducing the number of District employees.

The gentleman, to our amazement, has suggested that we cut the level of District employment in 1 year by nearly 50 percent.

Surely the House will not agree to this clearly outrageous amendment.

In commending the committee for its careful attention to the efforts of the mayor and the city council to provide necessary city services that it has over the past 2 years alone eliminated some 4,800 District positions, a reduction of some 12 percent over a 2-year period.

The committee only this year has come in with an additional 1,943 jobs eliminated, or 5.4 percent of the level of employment which was maintained in District government during the fiscal year 1981.

I simply urge the Members to respect the fact that our committee has spent long hours examining the conduct of the District government, assessing its need for personnel and agreeing to recommend the level of 34,000 this year, a drop of nearly 2,000 over the level which was allowed the year previously.

Ms. FIEDLER. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I was wondering if I might inquire of the representative of the District several questions.

I wonder if the gentleman could tell me what kind of an attrition rate occurs in the District's employment each year.

Mr. FAUNTROY. Mr. Chairman, if the gentlewoman will yield, it is my understanding that the attrition rate is at a level of 3 to 5 percent.

Ms. FIEDLER. Three to five percent?

Mr. FAUNTROY. Yes.

Ms. FIEDLER. That would be, roughly, how many employees does the gentleman say—32,000?

Mr. FAUNTROY. As we indicated, 5 percent is roughly 1,900.

Ms. FIEDLER. What kind of a growth factor has there been in the employment rate of the city over, let us say, the past 3 to 5 years? Has it been going up or has it been declining?

Mr. FAUNTROY. As I indicated in my remarks, the employment level has been going down by 12 percent over the past 2 years.

Ms. FIEDLER. I thank the gentleman very much. I was just struck by the figures in terms of the overall expenditures. The city of Los Angeles has over 3½ million people and their budget is $1.1 billion approximately.

I was just trying to make some kind of an equation between the 750,000 population which exists in the District, as articulated by the gentleman from Texas, and the total expenditure, which seemed very high to me. I was just interested in the actual picture over a period of time, plus attrition. When you have a fairly high attrition rate, often simply by dealing with attrition you can begin substantially to reduce the amount of employment without having to remove people from their jobs and let that attrition help to reduce the overall employment level and save funds.

Mr. FAUNTROY. If the gentlewoman will yield further, as the gentlewoman participates in the discussions of District affairs from time to time, the gentlewoman will become aware of the fact that the District of Columbia government, unlike that of many municipalities, encompasses functions which are provided by both State, county, and municipal governments, in most of our communities.

Thereby, it cannot be compared to the burden of service delivery that is assumed by the average city in the country.

□ 1530

Ms. FIEDLER. I thank the gentleman.

Mr. COLLINS of Texas. Mr. Chairman, will the gentlewoman yield?

Ms. FIEDLER. I yield to the gentleman from Texas.

Mr. COLLINS of Texas. The gentlewoman has raised a most interesting question about attrition, which is amazingly low, but I would like to remind my colleague that the average salary in Washington, D.C., is $21,000

in the public sector, whereas, the average salary for public employees in America is $16,000. Having a public job in Washington, D.C., is like having a taxi medallion in New York City. You really do have something you grab hold of and hold onto for life.

I was amazed when the gentlewoman talked about the size of Los Angeles, but we have these tremendous grants that we give to the District of Columbia which we do not give to Los Angeles. We are giving $44 million for the Board of Education. We give $188 million for the Department of Human Services. We have $142 million in capital outlays.

The benevolence of the Congress in behalf of the District of Columbia is overwhelming. That is why I ask for some limit to the number of people on the public staff.

I thank the gentlewoman.

Ms. FIEDLER. I thank the gentleman for his contribution.

Mr. DIXON. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman and Members, for over 3 years the Subcommittee on District of Columbia Appropriations on a bipartisan basis, has systematically examined the employment level and hiring practices of the District government. I think they have done a good job. No doubt they could do better. But over the last 2 years, District officials have reduced their work force by more than 12 percent—12.4 percent. To just arbitrarily say at this time that there should be only 19,000 employees in a city where we have made speeches saying we are so proud of what they are doing, I think, is totally inconsistent.

Second, for most cities, with the exception of the District of Columbia, there are States and counties that provide moneys to supplement the activities and revenues of those cities. The District of Columbia does not enjoy that benefit. In that sense, the District does have additional responsibilities for which it must carry the financial burden.

Certainly no one would think that Federal grants have been preempted by the District of Columbia. Just as the cities, the counties, and the States receive Federal grants, so does the District of Columbia receive grants. The District of Columbia has no special window that it goes to for these grants.

Most importantly, and I think this is one of the areas where the committee has been very sensitive and has worked closely with the city, the District government is showing results by reducing the employment level by over 12 percent since 1980. Therefore, Mr. Chairman and Members, I would ask everyone to oppose the gentleman's amendment. It simply does not recognize the progress the District government had made and is continuing to make in reducing its employment base.

Mr. COUGHLIN. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

I am reluctant to oppose the amendment of my good friend, the gentleman from Texas, but the bill does presently limit the number of permanent authorized positions in the District of Columbia to 32,922. The number of personnel is something that the subcommittee does look at each year. But the most critical thing is, of course, to examine where we would take the kind of cuts of the magnitude that the gentleman is suggesting.

We have been trying to force the city, for example, and the Mayor, to hire additional employees. They have reluctantly agreed to do so, only with the prodding of the committee. So the first place I suspect they would look to to cut their employment would be in the very area in which we are trying to force them to employ more people.

The bulk of the employees of the city are in a limited number of areas—police, fire, teachers, corrections, sanitation workers. So we would have a difficult time finding where we would take cuts of that order of magnitude.

Mr. COLLINS of Texas. Mr. Chairman, will the gentleman yield?

Mr. COUGHLIN. I yield to the gentleman from Texas.

Mr. COLLINS of Texas. What figure did you suggest for police and fireman in the budget?

Mr. COUGHLIN. The police are pegged at 4,500, roughly; and fireman at 1,500.

Mr. COLLINS of Texas. In other words, 6,000 for police and fireman.

Mr. COUGHLIN. The gentleman is correct. And then if you add in the Department of Corrections, that is another 1,700, which ties in with that.

Mr. COLLINS of Texas. About 7,700. How many are in the Department of Education?

Mr. COUGHLIN. There are approximately 10,000.

Mr. COLLINS of Texas. Is that not a little overstaffed for a public school enrollment of 95,000 students?

Mr. COUGHLIN. Well, we have been examining that and resisting the attempts of the District of Columbia to increase that even further. In fact, it is lower than the requested figure for that department.

Mr. COLLINS of Texas. That gives them about 1 person in the administration to every 9½ students. Is that not about the highest record in America?

Mr. COUGHLIN. Well, this, of course, includes teachers and administration.

Mr. COLLINS of Texas. I understand that. Well, then, where does the rest of this preponderance come from? Is that handling the welfare?

Mr. COUGHLIN. It is a whole variety of departments. I do not have the details. I was taking some of the larger figures.

Mr. COLLINS of Texas. I thank the gentleman.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Texas (Mr. COLLINS).

The amendment was rejected.

AMENDMENT OFFERED BY MR. ERTEL

Mr. ERTEL. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. ERTEL: Page 20, after line 25, insert the following new sections:

SEC. 122. None of the Federal funds provided under this Act shall be obligated or expended to provide a personal cook, chauffeur or other personal servants to any officer or employee of the District of Columbia.

SEC. 123. None of the Federal funds provided in this Act shall be obligated or expended to procure passenger automobiles as defined in 15 U.S.C. 2001 with an EPA estimated miles per gallon average of less than 22 miles per gallon. This section shall not apply to security, emergency rescue or armored vehicles.

Mr. ERTEL. Mr. Chairman, it is my understanding that this will be accepted by the committee.

Mr. DIXON. Mr. Chairman, will the gentleman yield?

Mr. ERTEL. I would be happy to yield to the gentleman from California.

Mr. DIXON. Mr. Chairman, we on this side have examined the gentleman's amendment and we have no objections to it on our side.

Mr. COUGHLIN. Mr. Chairman, will the gentleman yield?

Mr. ERTEL. I yield to the gentleman from Pennsylvania.

Mr. COUGHLIN. Mr. Chairman, as I note, the amendment only applies to Federal funds, so I guess it would not be affected, and there is no objection to it on this side.

Mr. ERTEL. Just to respond, this only applies to Federal funds. What the city of Washington does with its funds and how it allocates them is a matter for the constituency of Washington to determine, not for the Federal Legislature. When we put funds forward, I think it is for us to decide. Therefore, that is why it is Federal funds.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Pennsylvania (Mr. ERTEL).

The amendment was agreed to.

The CHAIRMAN. Are there any further amendments?

Mr. DIXON. Mr. Chairman, I move that the Committee do now rise and report the bill back to the House with sundry amendments, with the recommendation that the amendments be

agreed to and that the bill, as amended, do pass.

The motion was agreed to.

Accordingly the Committee rose; and the Speaker pro tempore. (Mr. ROSTENKOWSKI) having assumed the chair, Mr. RATCHFORD, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 4522) making appropriations for the District of Columbia and other activities chargeable in whole or in part against the revenues of said District for the fiscal year ending September 30, 1982, and for other purposes, had directed him to report the bill back to the House with sundry amendments, with the recommendation that the amendments be agreed to and that the bill, as amended, do pass.

The SPEAKER pro tempore. Without objection, the previous question is ordered.

There was no objection.

The SPEAKER pro tempore. Is a separate vote demanded on any amendment? If not, the Chair will put them en gros.

The amendments were agreed to.

The SPEAKER pro tempore. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

The SPEAKER pro tempore. The question is on the passage of the bill.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. COLLINS of Texas. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 299, nays 105, not voting 29, as follows:

□ 1545

The Clerk announced the following pairs:

On this vote:

Mr. Fary for, with Mr. Nichols against.

Until further notice:

Mr. Addabbo with Mr. Pashayan.

Mr. Dingell with Mr. Derwinski.

Mr. Zeferetti with Mr. Dougherty.

Mr. Wirth with Mr. Clausen.

Mr. Moakley with Mr. Dornan of California.

Mr. Moffett with Mr. Horton.

Mr. Danielson with Mrs. Holt.

Mrs. Collins of Illinois with Mr. Walker.

Mr. Williams of Montana with Mr. Ford of Michigan.

Mr. Reuss with Mr. John L. Burton.

Mr. Evans of Georgia with Mr. Atkinson.

Messrs. RUSSO, RALPH M. HALL, and KRAMER changed their vote from "yea" to "nay."

Mr. SKELTON changed his vote from "nay" to "yea."

So the bill was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

## GENERAL LEAVE

Mr. DIXON. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks, and to include extraneous matter, on the bill just passed.

The SPEAKER pro tempore (Mr. BAILEY of Pennsylvania). Is there objection to the request of the gentleman from California?

There was no objection.

## OVERSEAS PRIVATE INVESTMENT CORPORATION AMENDMENTS ACT OF 1981

Mr. BINGHAM. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill (H.R. 3136) to amend the Foreign Assistance Act of 1961 with respect to the activities of the Overseas Private Investment Corporation.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from New York (Mr. BINGHAM).

The motion was agreed to.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill, H.R. 3136, with Mr. LEVITAS in the chair.

The Clerk read the title of the bill.

□ 1600

The CHAIRMAN. When the Committee of the Whole rose on Monday, September 21, 1981, all time for general debate had expired.

Pursuant to the rule, the Clerk will now read the substitute committee amendment recommended by the Committee on Foreign Affairs now printed in the reported bill for the purposes of amendment.

The Clerk read as follows:

H.R. 3136

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,*

SHORT TITLE

SECTION 1. This Act may be cited as the "Overseas Private Investment Corporation Act of 1981".

CREATION, PURPOSE, AND POLICY

SEC. 2. Section 231 of the Foreign Assistance Act of 1961 (22 U.S.C. 2191) is amended—

(1) in paragraph (2)—

(A) by striking out "$520 or less in 1975 United States dollars" and inserting in lieu thereof "$680 or less in 1979 United States dollars"; and

(B) by striking out "$1,000 or more in 1975 United States dollars" and inserting in lieu thereof "$2,950 or more in 1979 United States dollars"; and

(2) in subsection (i) by inserting immediately before the semicolon the following: ", and to seek to support those developmental projects having positive trade benefits for the United States".

ORGANIZATION AND MANAGEMENT

SEC. 3. (a) The first paragraph of section 233(b) of the Foreign Assistance Act of 1961 (22 U.S.C. 2193(b)) is amended—

(1) by striking out in the first sentence "eleven" and "six" and inserting in lieu thereof "fifteen" and "eight", respectively;

(2) by inserting after the second sentence the following: "The United States Trade Representative shall be the Vice Chairman of the Board, ex officio, except that the United States Trade Representative may designate the Deputy United States Trade Representative to serve as Vice Chairman of the Board in place of the United States Trade Representative.";

(3) by striking out "Six", "six", and "two" in the fourth, fifth, and seventh sentences of such section, as amended by paragraph (2), and inserting in lieu thereof "Eight", "eight", and "three", respectively;

(4) by striking out in the fifth sentence of such section, as amended by paragraph (2), "one" the first place it appears and inserting in lieu thereof "two"; and

(5) by striking out in the fourth sentence of such section, as amended by paragraph (2), "also serve as a Director" and inserting in lieu thereof "serve as a Director, ex officio".

(b) The second paragraph of such section is amended by inserting "including an official of the Department of Labor," after "United States,".

INVESTMENT INSURANCE AND OTHER PROGRAMS

SEC. 4. Section 234 of the Foreign Assistance Act of 1961 (22 U.S.C. 2194) is amended—

(1) in subsection (a)(1)(C), by striking out "or insurrection" and inserting in lieu thereof ", insurrection, or civil strife";

(2) in subsection (a)(2), by striking out "total" and "financing" at the end thereof;

(3) in subsection (a)(3), by striking out "authorized to issue under this subsection" and inserting in lieu thereof "permitted to have outstanding under section 235(a)(1)";

(4) in subsection (b), by striking out in the last proviso "authorized to issue under this subsection" and inserting in lieu thereof "permitted to have outstanding under section 235(a)(2)";

(5) in subsection (f)(1), by striking out "(A)" and by striking out ", and (B)" and all that follows through the end of the paragraph and inserting in lieu thereof a period; and

(6) in the last paragraph of subsection (f), by striking out in the second sentence "exceed $600,000,000 in any one year, and the amount of such reinsurance shall not".

ISSUING AUTHORITY, DIRECT INVESTMENT FUND AND RESERVES

SEC. 5. (a) Section 235(a) of the Foreign Assistance Act of 1961 (22 U.S.C. 2195(a)) is amended—

(1) in paragraph (2), by striking out ": Provided" and all that follows through the end of the paragraph and inserting in lieu thereof a period;

(2) by redesignating paragraph (3) and (4) as paragraphs (4) and (5), respectively; and

(3) by inserting the following after paragraph (2):

"(3) The Corporation shall not make any commitment to issue any guaranty which would result in a reserve less than 25 per centum of the maximum contingent liability then outstanding against guaranties issued or commitments made pursuant to section 234(b) or similar predecessor guaranty authority.".

(b) Section 235(a)(5) of such Act, as redesignated by subsection (a)(2) of this section, is amended by striking out "September 30, 1981" and inserting in lieu thereof "September 30, 1985".

(c) Section 235(b) of such Act is amended by adding at the end thereof the following: "Notwithstanding any other provision of law, the Corporation shall transfer to the Fund in the fiscal year 1982, and in each fiscal year thereafter—

"(1) at least 10 per centum of the net income of the Corporation for the preceding fiscal year, and

"(2) all amounts received by the Corporation during the preceding fiscal year as repayment of principal and interest on loans made under section 234(c), to the extent such amounts have not been expended or obligated before the effective date of the Overseas Private Investment Corporation Amendments Act of 1981,

and the Corporation shall use the funds so transferred to make loans under section 234(c) to the extent that there are eligible projects which meet the Corporation's criteria for funding.".

GENERAL PROVISIONS RELATING TO INSURANCE AND GUARANTY PROGRAM

SEC. 6. (a) Section 237(f) of the Foreign Assistance Act of 1961 (22 U.S.C. 2197(f)) is amended by amending the first sentence to read as follows: "Compensation for insurance, reinsurance, or guaranties issued under this title shall not exceed the dollar value, as of the date of the investment, of the investment made in the project with the approval of the Corporation plus interest, earnings, or profits actually accrued on said investment to the extent provided by such insurance, reinsurance, or guaranty, except that the Corporation may provide that (1) appropriate adjustments in the insured dollar value be made to reflect the replacement cost of project assets, and (2) compensation for a claim of loss under insurance of an equity investment may be computed on the basis of the net book value attributable to such equity investment on the date of loss.".

(b) Such section is further amended by striking out the last sentence.

DEFINITIONS

SEC. 7. Section 238(a) of the Foreign Assistance Act of 1961 (22 U.S.C. 2198(a)) is amended by inserting "or commitment" after "includes any contribution".

GENERAL PROVISIONS AND POWERS

SEC. 8. Section 239 of the Foreign Assistance Act of 1961 (22 U.S.C. 2199) is amended—

(1) in subsection (d), by inserting after the last semicolon the following: "to collect or compromise any obligations assigned to or held by the Corporation, including any legal or equitable rights accruing to the Corporation;";

(2) in subsection (e)—

(A) by striking out "Auditor-General" each place it appears and inserting in lieu thereof "Inspector General"; and

(B) by striking out in the first sentence "shall have the responsibility for planning and directing the execution of audits" and inserting in lieu thereof "may conduct"; and

(3) by striking out subsections (f), (j), and (k) and redesignating subsections (g), (h), (i), and (l) as subsections (f), (g), and (i), respectively.

REPORTS

SEC. 9. Section 240A of the Foreign Assistance Act of 1961 (22 U.S.C. 2200a) is amended—

(1) in subsection (a)—

(A) by striking out "(a)";

(B) in paragraph (1), by striking out "239(i)" and inserting in lieu thereof "239(h)"; and

(C) in paragraph (2)(A), by striking out "239(l)" and inserting in lieu thereof "239(i)"; and

(2) by striking out subsection (b).

Mr. BINGHAM (during the reading). Mr. Chairman, I ask unanimous consent that the committee amendment

in the nature of a substitute be considered as read, printed in the RECORD, and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

There was no objection.

AMENDMENT OFFERED BY MR. BINGHAM

Mr. BINGHAM. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. BINGHAM: Page 5, line 17, insert "(1)" after "(b)".

Page 5, after line 20, insert the following:

(2) The authority of the Overseas Private Investment Corporation to enter into contracts under section 234(a) of the Foreign Assistance Act of 1961 shall be effective for any fiscal year beginning after September 30, 1981, only to such extent or in such amounts as are provided in appropriations Acts.

Mr. BINGHAM. Mr. Chairman, the amendment the Clerk has read is to section 5(b) of the bill, and that is agreeable to me. This is one of the technical amendments that is offered to bring the bill into compliance with the Budget Act.

Under section 401(a) of the Budget Act, any bill which provides new contract authority must specify that such authority is effective only to the extent provided for in an appropriations act, and the authority to issue insurance is such contract authority. So this amendment takes care of that technicality.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New York (Mr. BINGHAM).

The amendment was agreed to.

Mr. McCLORY. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I rise in support of H.R. 3136, a bill to provide for the continuation of OPIC insurance and guarantees for an additional 4 years.

In creating the Overseas Private Investment Corporation, Congress declared the purpose of the Corporation to be mobilization and facilitation of the participation of U.S. private capital and skills in the economic and social development of less developed friendly countries and areas. The creating legislation specifically spelled out that the activities of OPIC were to complement the development assistance objectives of the United States.

Since the Congress last reviewed OPIC's operations, in 1977-78, the Corporation's revenues and net income have grown steadily in excess of 10 percent per year. Revenues totaled $76 million in fiscal 1980, with net income of $65 million. Since 1974, OPIC has paid all of its operating costs from its income from insurance premiums and other charges to user of its programs and has built up its capital and reserves to almost $700 million.

Mr. Chairman, the activities of the Overseas Private Investment Corporation help to further two of our primary national goals. First, they encourage and facilitate developmentally sound investment projects by providing insurance and other support for foreign investment, giving a boost to American firms engaged in exporting. As my colleague from Illinois, Mr. FINDLEY, has noted OPIC has been especially helpful in encouraging exports of American agricultural products. Certainly, strengthening the American export posture is one of our important national priorities.

Second, OPIC furthers the long-range goal of U.S. assistance to less developed countries, the so-called LDC's, with the aim of making them better partners in world trade, an important objective both economically and politically.

H.R. 3136 extends OPIC authority through fiscal 1985. The objective of the legislation is commendable, the track record of the Corporation has been shown to be impressive, and I believe it is in the best interests of the Nation for the activities of the Overseas Private Investment Corporation to be further extended. I urge passage of the bill.

AMENDMENT OFFERED BY MR. BINGHAM

Mr. BINGHAM. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. BINGHAM: Page 3, after line 25, add the following:

(c) The amendments made by this section shall take effect on October 1, 1981.

Mr. BINGHAM. Mr. Chairman, this is also a technical amendment to bring the bill into conformity with the Budget Act. All the amendment does is to say that the section of the bill expanding the Board of Directors shall not go into effect prior to October 1, 1981.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New York (Mr. BINGHAM).

The amendment was agreed to.

Mr. BINGHAM. Mr. Chairman, I move to strike the last word.

Mr. Chairman, my colleague, the gentleman from New York (Mr. SOLARZ), is attending a hearing. Had he been here, he would have addressed the following question to me as chairman of the subcommittee in charge of this bill: "Since the papers prepared for the new OPIC bill show that Taiwan now qualifies under the higher per capita income limits, can we take this to mean that the report language will show and the fact will be that investments in Taiwan can, as has always been the case, continue normally to receive OPIC guarantees?"

Mr. Chairman, in response to that question, my answer is in the affirmative, it does.

AMENDMENT OFFERED BY MR. AKAKA

Mr. AKAKA. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. AKAKA: Page 8, strike out lines 3 through 5 and insert in lieu thereof the following:

(3) by striking out subsections (f) and (j) and redesignating subsections (g), (h), (i), (j), (k), and (l) as subsections (f), (g), (h), (i), (j), and (k), respectively.

Page 8, line 15, strike out "239(i)" and insert in lieu thereof "239(k)".

Mr. AKAKA. Mr. Chairman, there is a sleeper in this bill which would, if adopted by the House today, effectively allow OPIC to subsidize the dumping of foreign sugar on our market.

Under the terms of this bill, specific categorical restrictions against OPIC support of projects involving copper, citrus, palm oil, and sugar would be lifted.

Mr. Chairman, I rise in strong opposition to lifting the restriction on OPIC investments in projects for the growing of sugar. Section 231 of the Foreign Assistance Act of 1961 requires OPIC to decline support for any project likely to reduce U.S. employment significantly in a particular industry.

How is OPIC to know when the domestic sugar industry is being hurt when we in this country still have no domestic sugar policy? Currently, there is no statement of U.S. sugar policy available for the simple fact that we do not have one. Given this fact, how is OPIC going to determine when a particular project in a lesser developed country is going to hurt our domestic sugar industry?

Sugar now contributes over $3 billion to our gross national product. The economies of 17 different States rely on sugar as a major part of their economic base.

The facts are simple: Sugar is a major United States crop. It ranks 10th in terms of acreage and 6th in terms of income of farmers during the 1980 sugar-producing year.

Nearly 100,000 Americans are directly dependent on the domestic sugar industry for their livelihoods; hundreds of thousands more rely on the domestic sugar industry for related work.

Our domestic sugar industry is a fragile industry. And, every time a foreign country dumps its sugar on the world market, our domestic industry suffers more.

To allow OPIC to fund the development of the sugar industry in foreign countries is to give OPIC carte blanche to further weaken our domestic sugar industry.

Judging from OPIC's past performance on agricultural projects, OPIC's level of expertise is woefully inadequate. This kind of decisionmaking power does not belong in the hands of OPIC.

If we do not amend this bill today, we will, in effect, be encouraging OPIC to help foreign countries develop a sugar surplus which they can then dump on the world market.

The U.S. Congress has no business allowing a private investment corporation to subsidize those foreign sugar markets with which we compete.

I ask that my colleagues join me in restoring the language of section 239 which prevents OPIC from supporting projects involving copper, citrus, palm oil, and sugar.

□ 1610

Mr. BINGHAM. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I fully appreciate the gentleman's (Mr. AKAKA) concern with the sugar problem, knowing of the importance of sugar to his State.

Let me say first that in omitting the provisions that appeared in the law the last time we extended it we followed the recommendations of the administration. The matter was discussed briefly in the committee and no amendment similar to the one offered by the gentleman from Hawaii (Mr. AKAKA) was offered in the committee.

The reason the committee went along with the administration, and the explanation for our position today, is that the amendment is unnecessary. OPIC has never insured the type projects the gentleman is worried about. OPIC has no intention of going into fields such as citrus or palm oil or sugar.

The general provisions in the bill, which require OPIC to avoid projects which might have an impact on the U.S. balance of payments or which might interfere with the U.S. exports or might encourage imports to the United States, those prohibitions and those principles are sufficient to prevent the kinds of projects being entered into that the gentleman from Hawaii is worried about.

So it seems to us that rather than clutter the bill with these specific provisions once again, we should rely on the general provisions and not reintroduce the prohibitions which appeared in the bill the last time around.

However, I have to say that since OPIC has no intention of going into these fields, by the same token the gentleman's amendment is unnecessary; it is probably also harmless. So while I am opposed to it, I am not opposed to it all that strongly. Since the gentleman feels very strongly about it, my vote on this will be a rather mild "No."

Mr. MOORE. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I want to join my colleague from Hawaii (Mr. AKAKA) in this amendment. I was the author of the amendment in 1978 that first inserted this language prohibiting OPIC making loans to finance the production of palm oil, citrus, and sugar enterprise loans.

While I agree with the chairman of the subcommittee that OPIC has not entered into, up to this point, these kinds of loans, the point is I do not see any harm in having the specific language in there that has now been in there for some 3 years prohibiting that. I have read very closely the language that exists in the bill, section 231, subsection L, which is the general protection the chairman of the subcommittee is referring to. While I think his interpretation of that subsection is correct, I feel a whole lot safer with the language which originally was put in there, and since it does not do any harm, I would urge it stay there for the simple reason that I do not want to give, by virtue of legislative history here, by taking this section out of the bill, we would not want to have somebody think we have reversed our position and OPIC is now able to make those sorts of guaranteed loans.

So I would urge passage of the amendment offered by the gentleman from Hawaii (Mr. AKAKA) leaving the language that is in the law now still in there.

Mr. LAGOMARSINO. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, the chairman of the subcommittee, the gentleman from New York (Mr. BINGHAM), has said that he is going to cast a weak "no" vote on this amendment. I guess it would be accurate to portray my position as being in the position of casting a weak "aye" vote. I think what the chairman says is entirely accurate. I think the bill as it comes before my colleagues does take care of the problem.

But, on the other hand, there are people in this country who are concerned about this and who are concerned about what they see as a change. Whether it has the effect they think it does or not is open to dispute. But, in any event, they see this as a change that could cause them some problems.

I think, on the other hand, it is certainly in the interest of no one, the U.S. Government, the developing countries, and particularly OPIC itself, to insure or finance projects which will increase the supply of a commodity beyond the projected level of demand. This would be contrary to OPIC's basic development mandate to support those projects which contribute to economic development.

Further, before any project is approved, OPIC undertakes a sectoral analysis designed to analyze the effects on the U.S. economy of the proposed overseas investment. OPIC will neither finance nor provide insurance for those projects, commodity-related or otherwise, which adversely affect U.S. economic interests.

So while I certainly understand and agree that the bill, even without this amendment, takes care of the problem, I see no harm really, I must admit, in adopting the amendment so that the concerns of people, whether those are justified or not, are met.

I yield back the balance of my time.

Mr. FRENZEL. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, the reason we have weak "ayes" and weak "noes" being promised in defense of this amendment is because the amendment has a very weak basis. I am sorry that the gentleman from Louisiana (Mr. MOORE) reminded us that he was the author of this pernicious piece of work because up until then I was content to blame it on the gentleman from Hawaii (Mr. AKAKA).

It is true, as the chairman and ranking member have suggested, that the law contains plenty of language to keep OPIC out of trouble; that is, to keep it from supporting operations abroad that would tend to reduce employment or economic activity within the United States.

In my judgment, that general direction is preferable to the specific local, perhaps selfish is too strong a word, chauvinistic yearnings of each of our Members, because after we have put in palm oil to satisfy the gentleman from Louisiana and sugar to satisfy the gentleman from Hawaii, we will have to put in widgets to satisfy somebody else, and anything anyone else has made around this country, and there will be eventually a prohibition that we no longer want to keep, but we will have cemented it into the law because of local considerations for people who must be perceived as defenders of some local industry.

We are far better off with the general restrictions that are in the law. I intend to make a very audible "no" when this amendment is called for a vote.

Mrs. FENWICK. Mr. Chairman, will the gentleman yield?

Mr. FRENZEL. I yield to the gentlewoman from New Jersey (Mrs. FENWICK).

Mrs. FENWICK. I would like to associate myself with these remarks. We have really got to play it straight, it seems to me.

The bill is clear and good and it does not need amendment. I think it is a mistake to put amendments in it.

Mr. FRENZEL. I thank the gentlewoman from New Jersey and yield back the balance of my time.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Hawaii (Mr. AKAKA).

The question was taken; and on a division (demanded by Mr. AKAKA) there were—ayes 9, noes 10.

Mr. AKAKA. Mr. Chairman, I demand a recorded vote.

A recorded vote was refused.

So the amendment was rejected.

□ 1620

Mr. MOORE. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I would like to enter into a colloquy with the distinguished chairman of the subcommittee, if I could.

Mr. Chairman, under section 231(1) of the Foreign Assistance Act of 1961, there is a provision, which I read in part:

To decline to issue any contract of insurance or reinsurance or any guarantee or to enter into any agreement to provide financing for an eligible investor's proposed investment, if the corporation determines that such investment is likely to cause a significant reduction in the number of the employees in the United States.

My question to the Chairman is: Does the number of employees mean the number of employees in a specific company or the number of employees in an entire industry, such as the sugar industry or the citrus industry or the oil bean industry?

Mr. BINGHAM. If the gentleman will yield, in that particular subsection, the reference is a general one to the industry, in my opinion.

Mr. MOORE. And, second, does the ban here that applies also cover producers under the term "employee"? In other words, many times you have a farmer, and maybe the only employee is he and his wife. Would it include the farmer-producer?

Mr. BINGHAM. I think in that situation, you come under the more general provisions with regard to the U.S. balance of payments and the economy. But certainly it is the intention of such provisions that that type of enterprise not be interfered with by any project that OPIC enters into.

Mr. MOORE. Mr. Chairman, further, I have been informed that OPIC has received but never approved loan requests for palm oil, citrus, or foreign sugar production, and we dispensed with the language in the statute that would prevent that.

It is my understanding, from the answers the gentleman just gave, from the administration and from the gentleman's committee, you delete this redundant language but not the protection that exists in section 231(1) that we have just gone over, or elsewhere in the act, to see to it that no such loan or guarantees would be made should there be a significant reduction in employees or a danger to the existing domestic industries. Is that correct?

Mr. BINGHAM. The gentleman is absolutely correct.

Let me say, further, that I cannot conceive of OPIC going into a project providing for assistance to the production of sugar when world prices are depressed and sugar is in oversupply. It would not make sense, from a business point of view. So I cannot conceive of OPIC going into it.

In addition, the answer to the gentleman's question is that he is absolutely right.

Mr. MOORE. I thank the subcommittee chairman.

Mr. IRELAND. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I would like to enter into an additional colloquy with my associate, the gentleman from New York.

The same dialog that we have just discussed concerning sugar, would this apply to citrus, as well?

Mr. BINGHAM. It most certainly would, I say to my friend.

Mr. IRELAND. The gentleman sees no instance where, in an industry that would have a long-term effect, such as something which requires 5 years to mature, that OPIC would be getting into this without some oversight by the Congress?

Mr. BINGHAM. Not only that, I cannot conceive of OPIC getting into this, if it means that the impact on U.S. exports is going to be negative. In the case that the gentleman is referring to, the citrus industry, the problem, I take it, is the fear that new citrus production in foreign countries would interfere with U.S. exports.

Mr. IRELAND. Absolutely.

Mr. BINGHAM. That is a little different from the problem of imports back into this country. But in either case, OPIC would be remiss to proceed with a project of that kind which would be damaging to American industry.

Mr. IRELAND. I thank the gentleman.

AMENDMENT OFFERED BY MR. HARKIN

Mr. HARKIN. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. HARKIN: Page 8, insert the following after line 17:

RETURN OF FUNDS TO TREASURY

SEC. 10. The Secretary of the Treasury shall, during the 4-year period beginning on October 1, 1981, transfer to the miscellaneous receipts of the Treasury $106,000,000 from the funds of the Overseas Private Investment Corporation, except that—

(1) funds from the Direct Investment Fund of the Corporation, and

(2) funds which are determined by the Secretary of the Treasury to be necessary for reserves and expenses of the Corporation or necessary to meet the requirements of section 240 of the Foreign Assistance Act of 1961,

may not be so transferred. If the Secretary of the Treasury determines that, taking into account the exception contained in the preceding sentence, $106,000,000 is not available to carry out the preceding sentence, the Secretary shall transfer the largest lesser amount that is so available.

Mr. HARKIN. Mr. Chairman, my amendment is simple. It requires that the Secretary of the Treasury transfer over a 4-year period of time $106 million from OPIC to the U.S. Treasury.

This will not do this in a way that would either interfere with the operations of OPIC or do injury to congressionally mandated efforts to encourage the participation of small businesses in OPIC programs.

If the Secretary of the Treasury determines that the $106 million will not be available because of necessary reserves or expenses, or the activities on behalf of small business, then he shall transfer the largest lesser amount that is available.

Now, why am I doing this? Because from 1969 until 1974, Congress appropriated $106 million for OPIC operations and reserves—appropriated taxpayers' dollars.

When President Nixon first offered OPIC legislation, he said that OPIC was "expected to break even or to show a small profit."

Well, last year OPIC had a net income of $65 million, and its reserves stood at $669 million at the end of fiscal year 1980.

We are an era of austerity and retrenchment. All kinds of vital programs are being forced to cut back. Small Business Administration, energy research assistance, the school lunch program, student loans, in short, almost every program area of the Federal budget, we are cutting back. But OPIC is not cutting back; it is expanding. The committee bill is expanding the insurance coverage to include civil strife and raising the per capita GNP ceiling to end restrictions on OPIC operations in 18 countries.

OPIC's income has been increased every year and will probably increase with this expansion.

Now, there is a provision in present law for OPIC to pay dividends to the Treasury from its earnings; but it never has.

The Export-Import Bank pays dividends every year, as does the Federal Reserve.

OPIC can expand its operations and still have excess funds.

All I am saying with this amendment is that part of OPIC's excess should be returned to the taxpayers of this country. The amount of $106 million from 1981 to 1984 is not the equivalent of the $106 million that OPIC was appropriated from 1969 to 1974. If we were to use constant dollars, the equivalent figure in July 1981 dollars would be roughly $229 million.

So OPIC is still making out quite well.

Again, all I am saying is that all of the money that we appropriated to OPIC from 1969 to 1974, $106 million, now be paid back to the U.S. Treasury over a 4-year period of time, and this will not severely damage OPIC. As I said, last year they had a net income of $65 million. Their reserves are at $669 million. So over a 4-year period of time the payback is $106 million, roughly $25 million a year. They can

do it out of their net income that they are making a year.

□ 1630

I think it is a small thing to ask of OPIC. We set them up. We funded them with taxpayers dollars. Now that they are making a profit how about paying back to the U.S. Treasury the money that we initially appropriated.

I believe that OPIC can contribute its share to reducing our deficit, to helping us retrench, as we are in Federal programs, and they can do it without any damage to its functions.

I urge the adoption of my amendment.

AMENDMENT OFFERED BY MR. BINGHAM AS A SUBSTITUTE FOR THE AMENDMENT OFFERED BY MR. HARKIN

Mr. BINGHAM. Mr. Chairman, I offer an amendment as a substitute for the amendment.

The Clerk read as follows:

Amendment offered by Mr. BINGHAM as a substitute for the amendment offered by Mr. HARKIN:

Page 8, insert the following after line 17:

RETURN OF APPROPRIATED FUNDS

SEC. 10. Title IV of chapter 2 of part I of the Foreign Assistance Act of 1961 is amended by adding at the end thereof the following new section:

"SEC. 240B. RETURN OF APPROPRIATED FUNDS.—The Corporation shall return to the general fund of the Treasury, in a manner consistent with the objectives set forth in section 231, amounts equal to the total amounts which were appropriated to the Corporation before January 1, 1975, pursuant to section 235(f). In order to carry out the preceding sentence, the Corporation shall, in each fiscal year, pay to the Treasury an amount equal to 25 percent of the net income of the Corporation for the preceding fiscal year, after making suitable provisions for transfers to reserves and capital, until the aggregate amount of such payments equals the amounts required to be returned to the Treasury by the preceding sentence.".

Mr. BINGHAM (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. BINGHAM. Mr. Chairman, I think the gentleman from Iowa has offered a constructive amendment. It probably is necessary to prod OPIC to do what it has not done to date, which is to start repaying some of the funds that were advanced to it prior to 1975. The substitute I have offered would do the same thing, but it has some differences from the amendment offered by the gentleman from Iowa.

It preserves essentially a greater degree of independence from the bureaucracy that OPIC has enjoyed up to now. It would not give to the Secretary of the Treasury the directive to transfer the amounts. Indeed, I am not sure that is appropriate because the amounts are OPIC's to transfer and it should be left to OPIC to determine the amount that it could pay over and above the necessary amounts set aside for the preservation and building up of necessary reserves.

It also would not impose a 4-year deadline on OPIC to achieve this objective.

So, it recognizes the wisdom of the objective that the gentleman from Iowa (Mr. HARKIN) has in mind. But it leaves implementation in the hands of OPIC as a semi-independent agency consistent with the directives of the Congress.

Mr. FRENZEL. Mr. Chairman, will the gentleman yield?

Mr. BINGHAM. I yield to the gentleman from Minnesota.

Mr. FRENZEL. I thank the gentleman for yielding.

Like the gentleman from New York, I think the amendment of the gentleman from Iowa is overenthusiastic.

Does the gentleman from New York believe that under his amendment OPIC will be able to carry out its charge under the bill and to accept some of its new responsibilities with respect to trade expansion, which the gentleman and his colleagues have put into the bill?

Mr. BINGHAM. Yes, I believe so, because the substitute that I have offered directs the corporation to pay to the Treasury in each fiscal year an amount equal to 25 percent of the net income of the corporation after making suitable provisions for transfers to reserves and capital.

I think it puts the Congress on record that OPIC better bear in mind that it was advanced these funds. It boasts of being a self-sustaining operation, and the sooner it repays to the Treasury the moneys that it was given to start up with, the better. But it gives a degree of flexibility to accomplish that end that the Harkin version——

Mr. FRENZEL. If the gentleman will yield further, I thank the gentleman for his explanation. I think he and his colleagues on the subcommittee have done a splendid job and have given us a good bill and certainly I am going to follow his suggestion on the amendment.

Mr. BINGHAM. I thank the gentleman.

Mr. LAGOMARSINO. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I think what we have to consider here is that after a brush with insolvency some years ago OPIC has recently been a beneficiary of two things; low levels of claims and high interest earnings on its reserves.

Hopefully the second will not obtain in the future. Hopefully interest rates will go down and while that will be perhaps to the good of the country and many individuals, it will change the situation with regard to the earnings of OPIC.

Also, as I mentioned, the claims have been low. Hopefully that will continue, but there is certainly no guarantee.

We are all aware of unrest throughout the world. In fact, one of the very purposes of OPIC is to guarantee investments in the kind of countries where that is in fact a danger and a threat, otherwise we are not doing our job.

Certainly it could happen, as it has in the past, that there could be a high level of claims.

I would mention one other thing. The bill amends the law to provide that OPIC can also now insure against civil strife, and while we have a pretty good idea what that means, I must add that we do not know exactly what that will result in, how many claims might arise because of that.

So, I think that it would be the wise and right thing for the committee to accept the substitute. We can see how that works in effect and to reject the Harkin amendment.

I would ask the committee to accept the substitute.

Mr. HARKIN. Mr. Chairman, I move to strike the requisite number of words.

I would like to ask the distinguished chairman of the subcommittee a question or two.

I am just curious if the gentleman has any idea about what figures we might be looking at here over the next 4 years?

As I understand, there is no time limit in the gentleman's amendment as to when they have to pay this back in the aggregate amount, but they have to pay back an amount equal to 25 percent of the net income each preceding fiscal year.

Does the gentleman have any idea what this might be over the next 4 years? Is there any way of anticipating that?

Mr. BINGHAM. Mr. Chairman, will the gentleman yield?

Mr. HARKIN. I yield to the gentleman from New York.

Mr. BINGHAM. I thank the gentleman for yielding.

I think it is difficult to say exactly. I would point out that in his amendment the gentleman has a figure that is 25 percent of $106 million to be paid each year. That, however, is subject to a condition precisely the same as my amendment, that the funds to be repaid are to be over and above what is deemed to be necessary for reserves and expenses. And it is impossible to know exactly how much that will be.

Now, in his amendment the gentleman leaves that to the Secretary of the Treasury to determine. In the case of the substitute it is left up to OPIC to determine; but in neither case is

there a fixed amount to be transferred.

Mr. HARKIN. The gentleman anticipated my second question. I was wondering why leave it up to OPIC to determine? Why not leave it up to the Secretary of the Treasury to determine after OPIC submits its final report as to what its necessary income is, what its reserve requirements are? Why not let the Secretary of the Treasury determine that?

Mr. BINGHAM. As I suggested in my original remarks on the substitute, OPIC has established a record of responsibility in its operations of carrying out the directives of the Congress. I think it should not be subjected to decisions made essentially by a separate agency.

OPIC has been established by Congress as a semi-independent agency. It has performed well, and I think we should give it the vote of confidence that it will carry out the will of Congress in this respect.

Mr. HARKIN. I thank the gentleman for his answers, and while I would have preferred to hold OPIC's feet to the fire over a shorter period of time, and to mandate that they pay back the money within that set period of time, I believe the gentleman's substitute will accomplish that same purpose over a longer period of time, and certainly the next time when this legislation comes up again, we will have to look at what OPIC has done in terms of paying back this money.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New York (Mr. BINGHAM) as a substitute for the amendment offered by the gentleman from Iowa (Mr. HARKIN).

The amendment offered as a substitute for the amendment was agreed to.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Iowa (Mr. HARKIN), as amended.

The amendment, as amended, was agreed to.

□ 1640

AMENDMENT OFFERED BY MR. BINGHAM

Mr. BINGHAM. Mr. Chairman, I offer a technical amendment.

The Clerk read as follows:

Amendment offered by Mr. BINGHAM: Page 8, line 5, insert "(h)," immediately after "(g),".

Mr. BINGHAM. Mr. Chairman, this amendment simply corrects a typographical error in the bill.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New York (Mr. BINGHAM).

The amendment was agreed to.

Mr. HARKIN. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, again I wonder if I could engage the distinguished gentleman, the chairman of the subcommittee, in a colloquy.

I am concerned about some OPIC activity that may be coming up in Guatemala, a country whose government is widely recognized as one of the worst violators of human rights in the Western Hemisphere.

OPIC has recently made public its pending approval of at least one project in Guatemala. The name of the company cannot be disclosed until the fiscal year begins, but some details are known. OPIC plans to provide political risk insurance to a firm expanding its manufacturing operations in Guatemala. The insurance policy will cover up to $135 million in losses.

Now, consider the wording of the OPIC title. Section 239(1) states that the Corporation "shall take into account in the conduct of its programs in a country all available information about observance of and respect for human rights and fundamental freedoms in such country."

My question is, Was this done in consideration of the approved project again which is pending approval by OPIC in Guatemala?

Mr. BINGHAM. Mr. Chairman, will the gentleman yield?

Mr. HARKIN. I yield.

Mr. BINGHAM. I cannot answer the gentleman's specific question about the alleged project in Guatemala. I do know that nothing has been done in Guatemala in the past year by OPIC.

I would certainly expect that Guatemala's human rights record would be very definitely taken into account by the agency in making a decision on any such project.

Mr. HARKIN. I thank the gentleman. I know of the gentleman's strong feeling in this area. I just have one last question then.

Section 239(1) also states that the provisions of section 116 of the Foreign Assistance Act, "shall apply to any insurance, reinsurance, guarantee or loan issued by the Corporation."

Section 116 prohibits foreign assistance to governments "which engage in a consistent pattern of gross violation of internationally recognized human rights."

In light of Guatemala's miserable human rights record, in light of Amnesty International's finding that the Guatemalan Government is engaged in "a program of political murder," and in light of the explicit wording of sections 239 and 116, would the gentleman consider that the prospective OPIC project in Guatemala be a violation of U.S. law?

Mr. BINGHAM. This gentleman is reluctant to make a judgment on that without knowing precisely what the proposed project is and to what extent the Guatemalan Government might benefit from it. But in general, I certainly agree that the criteria of section 116 should apply to OPIC's operations.

As I say, in this particular case that the gentleman raises, I would be very much surprised and very concerned if there were the intention of proceeding with a project in Guatemala.

Mr. HARKIN. I thank the gentleman. As I said, I know of the gentleman's feelings in this area. I did not want to put the gentleman on the spot without knowledge of this particular instance.

I just wanted to raise the issue in light of the pending approval of this project. I trust that the gentleman and the subcommittee will take a look at that project when it comes up.

Mr. BINGHAM. If the gentleman will yield further, we surely will do that. I appreciate the gentleman bringing it to my attention and once again salute the gentleman for all his outstanding work in developing section 116 in its various ramifications.

Mr. HARKIN. I thank the gentleman.

● Mr. LEACH of Iowa. Mr. Chairman, I want to indicate my strong support for H.R. 3136, a bill to reauthorize the Overseas Private Investment Corporation (OPIC).

OPIC is one of the few U.S. development assistance organizations that works hand-in-hand with private enterprise to assist the development of friendly developing countries—and manages to do so at a profit. It is also well-known that OPIC, through its unique ability to marshal private capital and technology, encourages development on a free market basis.

Perhaps what is less well-known is the extent to which U.S. business, manufacturers, and farmers alike, benefit from OPIC programs. In the debate on OPIC's renewal back in 1978 a question was posed by a Member from a farm State as to what benefit U.S. farmers could possibly enjoy as a result of OPIC's programs. In answer, our former colleague, Mr. Cavanaugh from Nebraska, stated that U.S. farmers benefit in two principal ways. First, an increased standard of living among the less developed countries of the world increases their consumptive capacity thereby providing an outlet for U.S. agricultural surplus. Second, a great many agricultural projects overseas produce products we are not able to produce here in this country, but which utilize other goods and services that we do produce.

In retrospect, and attesting to the wisdom of my friend from Nebraska, Mr. Cavanaugh, since 1978 OPIC has encouraged 50 agricultural or agribusiness projects in 25 less developed countries. During the first 5 years of operation, these projects will purchase more than $470 million of U.S. farm commodities and manufactured products. Major U.S. farm exports will be corn, wheat, soybeans, milo, and poultry breeding stock. Other OPIC-sup-

ported projects have included animal feed and flour mills, powdered milk reconstitution plants, poultry farms, and bulk storage facilities which will create important and continuing export markets for U.S. farm products and farm equipment manufacturers. I should also note that other OPIC projects, such as mining and energy development projects, indirectly stimulate U.S. farm exports by strengthening developing country economies and earning or saving the foreign exchange necessary for the less developed countries to increase their imports.

Following are some examples of OPIC projects that increase U.S. farm exports:

An animal and poultry feed plant on Taiwan. Annual U.S. exports will total 500,000 tons of corn and feed grains;

A flour mill in Grenada involving annual exports of $2.9 million worth of U.S. wheat;

A poultry breeding and broiler operation in the Dominican Republic, requiring annual American exports of $1 million worth of soybeans and other grains and $350,000 of chicken breeding stock;

A bulk grain storage and handling facility in Korea which will import more than 2 million metric tons of U.S. wheat, milo, barley, and corn annually;

Expansion of a flour mill in Nigeria. Additional American exports will total 5.75 million bushels of wheat and 1.85 million bushels of corn annually;

A soybean processing facility in Jamaica. U.S. soybean exports will total $18 million annually.

I will only add that OPIC does not encourage foreign agricultural projects which compete with American farmers or farm exports. OPIC does not provide assistance to projects which will export to the United States such products as palm oil, sugar, citrus fruit, or products which are in surplus in this country. The agricultural production projects which OPIC does encourage either grow tropical products, such as tea, coffee, or natural rubber; raise poultry or other animals for local sale; or, in a very few cases, produce off-season crops for processing and export to Europe or this country.

In sum, OPIC is a developing agency that merits our support. It represents limited cost development which both assists some of the poorer developing countries improve their agricultural situations and, at the same time, helps the American farmer to market his product more effectively.●

● Mr. BONKER. Mr. Chairman, I am pleased that my distinguished colleagues voted to amend and reauthorize the operating authority of the Overseas Private Investment Corporation, as detailed in H.R. 3136. As chairman of the House Export Task Force, I am keenly interested in seeing legislation passed that will assist the American exporter and provide the new-to-export, small- and medium-sized firms with incentives to export. H.R. 3136 will work to achieve those objectives.

The Overseas Private Investment Corporation (OPIC) was created by Congress in 1971 as a self-sustaining U.S. Government agency to foster economic development in less developed countries by encouraging long-term U.S. capital investment. OPIC is key in the effort to enlist private business in foreign assistance programs in order to reduce Government spending and to reinforce private enterprise in the developing world.

Investment in less developed countries may involve unusual political risks not normally faced in other countries. To overcome some of these disincentives, OPIC provides political risk insurance to U.S. investors against loss due to expropriation, war or revolution, and the inability to convert currency into U.S. dollars. In addition, OPIC provides limited amounts of loan guarantees and direct loans to help finance U.S.-sponsored projects when long-term financing is not available. Consequently, OPIC's financing can fill critical gaps that otherwise would preclude smaller or particularly pioneering ventures from getting underway.

The Overseas Private Investment Corporation encourages the participation of small businesses in its programs. In addition, it screens proposed investments and projects to insure they do not adversely affect the U.S. economy or compete with U.S. jobs, and it screens the environmental effect of ventures it sponsors. OPIC operates on a profitmaking, self-sustaining basis.

The reauthorization of OPIC comes at a critical time when we are attempting to combat inflation and revitalize the U.S. economy. OPIC projects open and expand markets for U.S. goods and services, thus creating additional jobs for American workers and improving our balance of trade. I commend my colleagues for their support of this important piece of legislation. It serves to reaffirm our commitment to promoting exports and expanding our role in international trade.●

The CHAIRMAN. Are there further amendments? If not, the question is on the committee amendment in the nature of a substitute, as amended.

The committee amendment in the nature of a substitute, as amended, was agreed to.

The CHAIRMAN. Under the rule, the Committee rises.

Accordingly the Committee rose; and the Speaker pro tempore (Mr. MURTHA) having assumed the chair, Mr. LEVITAS, Chairman of the Committee of the Whole House on the State of the Union, reported that the Committee, having had under consideration the bill (H.R. 3136) to amend the Foreign Assistance Act of 1961 with respect to the activities of the Overseas Private Investment Corporation, pursuant to House Resolution 216, he reported the bill back to the House with an amendment adopted by the Committee of the Whole.

The SPEAKER pro tempore. Under the rule, the previous question is ordered.

Is a separate vote demanded on any amendment to the committee amendment in the nature of a substitute adopted by the Committee of the Whole? If not, the question is on the amendment.

The amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

## GENERAL LEAVE

Mr. BINGHAM. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

## MESSAGE FROM THE PRESIDENT

A message in writing from the President of the United States was communicated to the House by Mr. Saunders, one of his secretaries.

## REPORT CONCERNING DECLARATION OF NATIONAL EMERGENCY WITH RESPECT TO IRAN—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES (H. DOC. NO. 97-92)

The SPEAKER pro tempore laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, without objection, referred to the Committee on Foreign Affairs, and ordered to be printed:

(For message, see proceedings of the Senate of today, September 22, 1981.)

## NEW YORK'S ACTION ON RUGBY TEAM OUTRAGEOUS

(Mr. ASHBROOK asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ASHBROOK. Mr. Speaker, the action taken by the Governor of New York to prevent the visiting Springboks rugby team from playing an exhibition game in his State is an example of the hypocritical double standard

applied by so-called liberals in their approach to constitutional rights.

For the Governor of one of the country's largest States to buckle under to the threat of mob action directed against a team of foreign visitors to this country is a disgraceful abdication of executive responsibility. It gives the unruly, the rioters, the agitators veto over public policy.

It is all the more outrageous when you consider that the standard being applied to South African athletes by New York State is not equally applied to visiting athletes from Communist countries with repressive regimes which deny human rights to their citizens.

If athletes from Soviet Union, Hungary, East Germany, and other repressive communistic states can come to the United States and be given the protection due foreign visitors, the same protection is due the athletes of South Africa. To inject these issues into sports is reprehensible.

The question of whether and under what circumstances politics should affect international sports is open to debate. But if political standards are to be applied, as they obviously are in the State of New York, I think those standards should be consistent under our country's constitutional principles.

I also think that New Yorkers, who have over the years enjoyed the benefits of serving as hosts to international events, including the Winter Olympics of 1980, have an obligation to assess the actions taken by their public officials regarding the banning of the Springboks team, and to ask themselves whether those actions serve the best interests of their State and Nation.

As an Ohioan, I am certain that the Springboks rugby team, were it to schedule a game in Ohio, would be given the full protection of the law. In fact, even if the team is denied the right to play in New York State, I would welcome their coming to my native State of Ohio for an exhibition, if only to demonstrate to the world that there are areas of the United States where the threat of mob violence does not deter public officials from carrying out their constitutional duties fairly and consistently. I know our Governor, Jim Rhodes, would not take such a disgraceful action.

## U.S. RAILWAY ASSOCIATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Indiana (Mr. BENJAMIN) is recognized for 5 minutes.

● Mr. BENJAMIN. Mr. Speaker, the initial months of this 97th Congress will certainly be remembered for our efforts to improve the Nation's economic prospects by reducing Federal expenditures. I think it important to recognize and pay tribute to those individuals who already feel the impact of our fiscal restraint, namely the Federal employees whose jobs are being eliminated following the enactment of the Omnibus Budget Reconciliation Act of 1981.

The U.S. Railway Association is the Federal corporation established by the Regional Rail Reorganization Act of 1973 to perform two vital tasks. First, USRA is the Federal banker for Conrail, the northeastern railroad which replaced the Penn Central and several other rail carriers that went bankrupt during the early 1970's. Second, USRA represents the Federal Government in the complex litigation to determine the value of the properties transferred by the bankrupt carriers to create the Conrail system.

The recent settlement of portions of the valuation litigation and a legislative redefinition of USRA's responsibilities as Conrail's banker, coupled with our comprehensive efforts to reduce Federal outlays, has led to a substantial reduction in the scope of activity at USRA. The fiscal year 1982 appropriations measure for the Department of Transportation and related agencies approved by the House of Representatives on September 10 cuts USRA's annual budget to $13 million, compared with $29 million for the current fiscal year.

USRA has always been viewed as an agency with a finite lifespan. Its employees, many of them experts from the railroad and legal communities, do not enjoy civil service status. Thus, the Chairman of the Association, Stephen Berger, informs me that the reduction in USRA's budget and work force came as no real surprise for the members of his staff. But the lack of surprise does not compensate for the fact that this is a very difficult time to be looking for a job in most parts of the country, certainly including Washington, D.C.

As the chairman of the Appropriations Subcommittee on Transportation, I am familiar with USRA's work and I wish to express my deepest appreciation to the employees of the Association for a job well done. Approximately 100 of USRA's present 300-person work force will be leaving their jobs by October 1. To these individuals, I extend special thanks for their valuable contribution to a satisfactory solution to the northeastern rail problem. I wish them every success in their new endeavors.●

## LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. CLAUSEN (at the request of Mr. MICHEL), for today, on account of attending a funeral.

Mr. ADDABBO (at the request of Mr. WEISS), for today, on account of official business in district.

## SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. BLILEY) to revise and extend their remarks and include extraneous material:)

Mrs. HECKLER, for 10 minutes, today.

Mr. ASHBROOK, for 30 minutes, today.

Mr. WAMPLER, for 5 minutes, on September 23.

(The following Members (at the request of Mr. LOWRY of Washington) to revise and extend their remarks and include extraneous matter:)

Mr. GONZALEZ, for 15 minutes, today.

Mr. ANNUNZIO, for 5 minutes, today.

Mr. OBERSTAR, for 5 minutes, today.

Mr. BENJAMIN, for 5 minutes, today.

Mr. ANNUNZIO, for 10 minutes, on September 23.

## EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. LEHMAN, during general debate on H.R. 4522, in the Committee of the Whole, today.

(The following Members (at the request of Mr. BLILEY) and to include extraneous matter:)

Mr. BROOMFIELD.
Mr. GOODLING.
Mr. LEBOUTILLIER in two instances.
Mr. MARLENEE.
Mr. YOUNG of Alaska.
Mr. SOLOMON.
Ms. FIEDLER in two instances.
Mr. RUDD.
Mr. WEBER of Ohio.
Mr. LEACH of Iowa in two instances.
Mr. PETRI.
Mr. WALKER.
Mr. FIELDS.
Mr. MCCLOSKEY.
Mr. ROBERTS of South Dakota.

(The following Members (at the request of Mr. LOWRY of Washington) and to include extraneous matter:)

Mr. BARNES in two instances.
Mr. LUKEN.
Mr. ASPIN.
Mr. STOKES in two instances.
Mr. HALL of Ohio.
Mr. FAZIO in two instances.
Mr. MOFFETT.
Mr. MOTTL.
Mr. FAUNTROY.
Mr. STARK.
Mr. SCHUMER.
Mr. RODINO.
Mr. YATRON.
Mr. KILDEE.
Mr. YOUNG of Missouri.
Mr. SHELBY in two instances.
Mr. RICHMOND.
Mr. ROE.
Mr. EDGAR.

Mr. SIMON.
Mr. GUARINI
Mr. SOLARZ.
Mr. BEDELL.
Mr. CONYERS.

## ADJOURNMENT

Mr. LOWRY of Washington. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 4 o'clock and 50 minutes p.m.) the House adjourned until tomorrow, Wednesday, September 23, 1981, at 10 a.m.

## EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

2225. A letter from the Secretaries of Transportation, Commerce, and Housing and Urban Development, transmitting a report on the methods by which Federal funds from the Departments are being coordinated to assist and encourage public and private redevelopment in the vicinity of urban rail stations on the Northeast corridor, pursuant to section 704(c)(2) of the Railroad Revitalization and Regulatory Reform Act of 1976, as amended; to the Committee on Energy and Commerce.

2226. A letter from the Secretary of Health and Human Services, transmitting the fourth annual report of the National Center for the Prevention and Control of Rape, covering fiscal year 1980, pursuant to section 231(b)(1)(B) of the Community Mental Health Centers Act, as amended (89 Stat. 328); to the Committee on Energy and Commerce.

2227. A letter from the Administrator, Energy Information Administration, transmitting reports covering the month of May 1981 on petroleum market shares of refined petroleum products and retail gasoline, pursuant to section 4(c)(2)(A) of the Emergency Petroleum Allocation Act of 1973; to the Committee on Energy and Commerce.

2228. A letter from the Assistant Secretary of State for Congressional Relations, transmitting notice of the proposed issuance of a license for the export of certain defense equipment sold commercially Malaysia (Transmittal No. MC-23-81), pursuant to section 36(c) of the Arms Export Control Act; to the Committee on Foreign Affairs.

2229. A letter from the Deputy Administrator of General Services, transmitting a draft of proposed legislation to amend the act of May 3, 1945 (40 U.S.C. 293) by adding a provision authorizing the expenditure of moneys through the existing working capital fund operating within the General Services Administration for such additional purposes as internal mail processing, library facilities, and other centralized services; to the Committee on Government Operations.

2230. A letter from the Chairman, U.S. Nuclear Regulatory Commission, transmitting a report on abnormal occurrences at licensed nuclear facilities, covering the first quarter of calendar year 1981, pursuant to section 208 of Public Law 93-438; jointly to the Committees on Energy and Commerce and Interior and Insular Affairs.

## REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. DANIELSON: Committee on the Judiciary. H.R. 1026. A bill to transfer responsibility for furnishing certified copies of Miller Act payment bonds from the Comptroller General to the officer that awarded the contract for which the bond was given (Rept. No. 97-236). Referred to the House Calendar.

Mr. DANIELSON: Committee on the Judiciary. H.R. 1029. A bill to amend section 1 of the Act of June 5, 1920, as amended, to authorize the Secretary of Commerce to settle claims for damages of less than $2,500 arising by reason of acts for which the National Oceanic and Atmospheric Administration shall be found to be responsible; with amendment (Rept. No. 97-237). Referred to the Committee of the Whole House on the State of the Union.

Mr. MOORHEAD: Committee on the Judiciary. H.R. 2896. A bill granting the consent of Congress to the agreement between the States of North Carolina and South Carolina establishing their lateral seaward boundary (Rept. No. 97-238). Referred to the House Calendar.

Mr. MOORHEAD: Committee on the Judiciary. H.R. 4048. A bill granting the consent of Congress to the agreement between the States of Kansas and Missouri establishing their mutual boundary in the vicinity of the French Bottoms near St. Joseph, Mo., and Elwood, Kans. (Rept. No. 97-239). Referred to the House Calendar.

Mr. DINGELL: Committee on Energy and Commerce. H.R. 4437. A bill to promote energy conservation by providing for daylight saving time on an expanded basis and for other purposes (Rept. No. 97-243). Referred to the Committee of the Whole House on the State of the Union.

Mr. LONG of Maryland: Committee on Appropriations. H.R. 4559. A bill making appropriations for Foreign Assistance and related programs for the fiscal year ending September 30, 1982, and for other purposes (Rept. No. 97-245). Referred to the Committee of the Whole House on the State of the Union.

## REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. DANIELSON: Committee on the Judiciary. H.R. 1608. A bill for the relief of Mrs. Frieda Simonson (Rept. No. 97-240). Referred to the Committee of the Whole House.

Mr. DANIELSON: Committee on the Judiciary. H.R. 1635. A bill for the relief of the Jefferson County Mental Health Center, Incorporated, and of certain current and former employees thereof (Rept. No. 97-241). Referred to the Committee of the Whole House.

Mr. DANIELSON: Committee on the Judiciary. H.R. 3127. A bill for the relief of Staff Sergeant Anne M. Fisher, United States Army Reserve (Rept. No. 97-242). Referred to the Committee of the Whole House.

Mr. DANIELSON: Committee on the Judiciary. H.R. 1231. A bill for the relief of the Washington Post, the Washington Star, the Dispatch (Lexington, North Carolina), the Brooklyn Times, Equity Advertising Agency, Incorporated, the Seattle Post-Intelligencer, and the News Tribune (Rept. No. 97-244). Referred to the Committee of the Whole House.

## PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. WRIGHT:

H.R. 4541. A bill to amend title 5, United States Code, to provide survivor annuities to subsequent spouses of certain additional classes of deceased annuitants who died after making available survivor annuities for previous spouses at time of retirement, and for other purposes; to the Committee on Post Office and Civil Service.

By Mr. MOAKLEY:

H.R. 4542. A bill to amend title 5, United States Code, to provide that National Guard Technicians who are found to be physically disabled for duty as members of the National Guard under the provisions of the National Guard Technicians Act shall be considered disabled and suffering a disability within the meaning of chapter 83 of title 5, United States Code; to the Committee on Post Office and Civil Service.

By Mr. BRINKLEY:

H.R. 4543. A bill to amend title 10, United States Code, to provide for the sharing with State and local governments of amounts received by the United States from the sale of timber produced on military installations; to the Committee on Armed Services.

By Mr. BROWN of California:

H.R. 4544. A bill to amend the Domestic Volunteer Service Act of 1973 to eliminate the chronological age requirement with respect to foster grandparent services provided for mentally retarded individuals; to the Committee on Education and Labor.

By Mr. MATSUI (for himself, Mr. ROUSSELOT, Mr. FAZIO, Mr. COELHO, Mr. GIBBONS, Mr. FORD of Tennessee, Mr. DUNCAN, Mr. GEPHARDT, Mr. HEFTEL, Mr. SCHULZE, Mr. SHANNON, and Mr. BAILEY of Pennsylvania):

H.R. 4545. A bill to amend the Internal Revenue Code of 1954 to provide uniform periods for returns and payments of certain excise taxes; to the Committee on Ways and Means.

By Mr. DICKS:

H.R. 4546. A bill to reinstate U.S. oil and gas lease numbered OR-13713; to the Committee on Interior and Insular Affairs.

By Mr. GEJDENSON:

H.R. 4547. A bill to provide that certain trusts shall not be treated as private foundations; to the Committee on Ways and Means.

By Mr. GINGRICH:

H.R. 4548. A bill to amend title 5 of the United States Code to insure that civil service retirees do not receive annuities which are in excess of the salaries received by individuals working in the positions from which the retirees were retired; to the Committee on Post Office and Civil Service.

By Mr. SAM B. HALL, JR.:

H.R. 4549. A bill to require that imported meat and meat food products made in whole

or in part of imported meat be subjected to certain tests and that such meat or products be identified as having been imported; to require that the cost of conducting such tests, inspection, and identification procedures on imported meat and meat food products be borne by the exporters of such articles, and for other purposes; to the Committee on Agriculture.

By Mr. LEACH of Iowa:

H.R. 4550. A bill to repeal certain provisions of the Economic Recovery Tax Act of 1981 which reduce the crude oil windfall profit tax, to establish a trust fund which is financed from revenues from the windfall profit tax and which is used as a reserve for the Social Security Trust Fund, and for other purposes; to the Committee on Ways and Means.

By Mr. MICA:

H.R. 4551. A bill to promote the development of the Haitian people and provide for orderly emigration from Haiti; to the Committee on Foreign Affairs.

By Mr. RANGEL:

H.R. 4552. A bill to prohibit all U.S. assistance and exports (except for food and medicine) to, and all imports of articles from, any country which produces and exports opium or its illicit derivatives, jointly; to the Committees on Foreign Affairs and Ways and Means.

By Mr. SHARP (for himself and Mr. BROWN of Ohio):

H.R. 4553 A bill to amend the Energy Policy and Conservation Act to extend certain authorities relating to the international energy program; to the Committee on Energy and Commerce.

By Mr. SHELBY (for himself, Mr. GRAMM, Mr. MADIGAN, Mr. BLILEY, Mr. BONER of Tennessee, Mr. HUBBARD, Mr. SNYDER, Mr. LEBOUTILLIER, Mr. PASHAYAN, and Mr. BADHAM):

H.R. 4554. A bill to repeal titles XV (relating to health planning) and XVI (relating to health resources development) of the Public Health Service Act; to the Committee on Energy and Commerce.

By Mrs. SNOWE (for herself and Mr. TAUKE):

H.R. 4555. A bill to revoke the application of Revenue Ruling 81-216; to the Committee on Ways and Means.

By Mr. LONG of Maryland:

H.R. 4559. A bill making appropriations for foreign assistance and related programs for the fiscal year ending September 30, 1982, and for other purposes.

By Mr. FAUNTROY:

H. Con. Res. 186. Concurrent resolution expressing the sense of the Congress that September 23, 1981, should be designated and considered as the "Nation's Capital Salute to Sugar Ray Leonard Day"; to the Committee on Post Office and Civil Service.

By Mr. GEJDENSON:

H. Con. Res. 187. Concurrent resolution expressing the sense of the Congress that Secretary of State Haig should, in his upcoming discussions with Soviet Foreign Minister Gromyko, raise the issue of the basic rights of Soviet citizens, particularly freedom of immigration and of religion; to the Committee on Foreign Affairs.

By Mr. LEBOUTILLIER:

H. Con. Res. 188. Concurrent resolution expressing the sense of the Congress that the National Hockey League, the American Hockey League, the National Collegiate Athletic Association, and the Amateur Athletic Union should bar all teams from the United States from participating in any sports event involving the Soviet Union; to the Committee on Foreign Affairs.

By Mr. WEISS (for himself, Mr. ROSENTHAL, Mr. RICHMOND, Mr. KILDEE, Mr. SMITH of Pennsylvania, Mr. ROE, Mr. HOWARD, Mr. FORD of Tennessee, Mr. APPLEGATE, Mr. HAWKINS, Mr. JONES of North Carolina, Mr. ALBOSTA, Mr. DIXON, Mr. BEILENSON, Mr. BINGHAM, Mrs. CHISHOLM, Mr. DELLUMS, Mr. DICKS, Mr. DYMALLY, Mr. EDWARDS of California, Mr. LELAND, Mr. JOHN L. BURTON, Mr. DOWNEY, Mr. WAXMAN, Mr. CROCKETT, Mr. PEPPER, Mr. VENTO, Mr. BONKER, Mr. COELHO, Mr. WOLPE, Mrs. COLLINS of Illinois, Mr. RANGEL, Mr. UDALL, Mr. ADDABBO, Mr. KASTENMEIER, Mr. FRANK, Mr. BARNES, Mr. RODINO, Mr. FORD of Michigan, Mr. SCHUMER, Mr. ST GERMAIN, Mr. YOUNG of Missouri, Mr. PERKINS, Ms. FERRARO, Mr. MATSUI, Mr. DOWDY, Mr. BROWN of California, Mr. EDGAR, Mr. TRAXLER, Mr. CORRADA, Mr. MCHUGH, Mr. OTTINGER, Mr. SOLARZ, Mr. LEHMAN, Mr. DASCHLE, Mr. LONG of Maryland, Mr. HOYER, Mr. PATTERSON, Mr. MARKS, Mr. DE LA GARZA, Mr. RATCHFORD, and Mr. WYDEN):

H. Con. Res. 189. Concurrent resolution expressing the sense of the Congress that the schedule of cost-of-living increases in benefits under title II of the Social Security Act should be maintained as currently in effect; to the Committee on Ways and Means.

By Mr. RANGEL:

H. Res. 229. Resolution to express the sense of the House of Representatives with respect to economic and military assistance to nations that are involved in heroin production; to the Committee on Foreign Affairs.

## MEMORIALS

Under clause 4 of rule XXII,

186. The SPEAKER presented a memorial of the Legislature of the State of Arizona, relative to the central Arizona project and the Tucson Aqueduct; to the Committee on Interior and Insular Affairs.

## PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. BADHAM:

H.R. 4556. A bill for the relief of Samuel C. Willett; to the Committee on the Judiciary.

By Mr. BROOMFIELD:

H.R. 4557. A bill for the relief of Maria and Timofei Chmykhalov, and for Lilia, Peter, Liubov, Lidia, and Augustina Vashchenko; to the Committee on the Judiciary.

By Mr. GOODLING:

H.R. 4558. A bill for the relief of Miss Refugio (Cuqui) Martha; to the Committee on the Judiciary.

## ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

H.R. 27: Mr. ARCHER, Mr. BIAGGI, Mr. BOLAND, Mr. BONER of Tennessee, Mr. BROYHILL, Mr. CLAUSEN, Mr. CONTE, Mr. DE LA GARZA, Mr. HOLLAND, Mr. HYDE, Mr. JEFFORDS, Mr. JEFFRIES, Mr. LATTA, Mr. LEATH of Texas, Mr. LOTT, Mr. MCCLORY, Mr. MATSUI, Mr. NELSON, Mr. NICHOLS, Mr. PEYSER, Mr. SHUMWAY, Mr. SMITH of Pennsylvania, Mr. WINN, and Mr. WORTLEY.

H.R. 52: Mr. ARCHER, Mr. BONER of Tennessee, Mr. CARMAN, Mr. GILMAN, Mr. MCEWEN, Mr. MINISH, Mr. NEAL, Mr. NOWAK, and Mr. STUMP.

H.R. 65: Mr. CHENEY, Mr. MICA, Mr. ANDREWS, Mr. SKELTON, Mrs. SNOWE, Mr. DINGELL, Mr. KEMP, Mr. CARNEY, Mr. PATTERSON, Mr. EDWARDS of Oklahoma, and Mr. MCCOLLUM.

H.R. 116: Mr. FRANK and Mr. KRAMER.

H.R. 845: Mr. DERWINSKI.

H.R. 1127: Mr. PASHAYAN.

H.R. 1918: Mr. BENJAMIN, Mr. CARMAN, and Mr. DYSON.

H.R. 2036: Mrs. ROUKEMA, Mr. THOMAS, Mr. ROE, Mrs. SCHNEIDER, Mr. COLLINS of Texas, Mr. COELHO, Mr. ROTH, Mr. MORRISON, Mr. BONER of Tennessee, Mr. STENHOLM, Mr. DORGAN of North Dakota, Mr. VANDER JAGT, Mr. LIVINGSTON, Mr. ROBINSON, Mr. BETHUNE, Mrs. BYRON, and Mr. MOORHEAD.

H.R. 2239: Mr. JEFFORDS.

H.R. 2251: Mr. HARKIN, Mr. SCHUMER, Mr. HUTTO, Mr. GLICKMAN, Mrs. BOUQUARD, Mr. WOLPE, and Mr. HANSEN of Utah.

H.R. 2347: Mr. HUTTO and Mr. TRIBLE.

H.R. 2439: Mr. JEFFORDS.

H.R. 2488: Mr. GINGRICH.

H.R. 2832: Mr. SAWYER.

H.R. 2936: Mr. WATKINS.

H.R. 3108: Mr. DERRICK, Mr. MITCHELL of Maryland, Mr. FORSYTHE, Mr. EVANS of Georgia, Mr. MINETA, Mr. KRAMER, and Mr. SOLOMON.

H.R. 3139: Mr. JEFFRIES.

H.R. 3191: Mr. OBERSTAR, Mr. DWYER, and Mr. PEPPER.

H.R. 3475: Mr. TAUKE.

H.R. 3636: Mr. SPENCE, Mr. WHITE, Mr. STENHOLM, Mr. STANTON of Ohio, Mr. SHUMWAY, Mr. MADIGAN, Mr. CRAIG, Mr. JEFFRIES, Mr. LEATH of Texas, Mr. FOLEY, Mr. BAFALIS, Mr. LAGOMARSINO, Mr. WAMPLER, Mr. FRENZEL, Mr. GLICKMAN, Mr. BUTLER, Mr. PETRI, Mr. BROYHILL, Mr. ROBINSON, Mr. ROBERT W. DANIEL, JR., Mr. GOLDWATER, Mr. WHITEHURST, Mr. MORRISON, Mr. FAZIO, Mr. BLILEY, Mr. RAILSBACK, Mr. DAN DANIEL, and Mr. ASHBROOK.

H.R. 3637: Mr. OTTINGER.

H.R. 3774: Mr. DANIEL B. CRANE and Mr. NEAL.

H.R. 3820: Mr. SIMON.

H.R. 3883: Mr. FORSYTHE, Mr. MINISH, Mr. COLLINS of Texas, Mr. BAFALIS, Mr. MCDONALD, Mr. PEPPER, Mr. LAGOMARSINO, Mr. SHUMWAY, Mr. MURPHY, Mr. PETRI, Mr. WHITEHURST, Mr. MCCOLLUM, Mr. ZEFERETTI, Mr. BARNARD, Mr. SHAW, Mr. SAWYER, Mr. DERWINSKI, Mr. PORTER, Mr. FRENZEL, Mr. DORNAN of California, Mr. BEVILL, Mr. CARNEY, Mr. SIMON, Mr. TRIBLE, Mr. DOUGHERTY, Mr. STENHOLM, Mr. COELHO, Mr. WATKINS, Mr. SMITH of Pennsylvania, Mr. MCCLORY, and Mr. NAPIER.

H.R. 4250: Mr. MURPHY and Mr. SIMON.

H.R. 4374: Mr. PRITCHARD.

H.R. 4390: Mr. WHITEHURST.

H.R. 4461: Mr. NELLIGAN and Mr. BEVILL.

H.R. 4467: Mr. WOLF, Mr. PARRIS, Mr. WEISS, Mr. SANTINI, and Mr. SCHUMER.

H.R. 4504: Mr. RODINO, Mr. HAWKINS, Mr. FORD of Michigan, Mr. BRODHEAD, Mr. BONKER, and Mr. MOFFETT.

H.J. Res. 72: Mr. ERTEL, Mr. ROBERTS of Kansas, Mr. WHITEHURST, Mr. MONTGOMERY, Mr. SKEEN, Mrs. BOUQUARD, Mr. WOLF, Ms. MIKULSKI, and Mr. DWYER.

H.J. Res. 145: Mr. BROWN of Ohio, Mr. MARKEY, Mr. DYMALLY, Mr. SUNIA, Mr. BOLAND, Mr. LUNGREN, Mr. FAUNTROY, Mr. BROYHILL, and Mr. CLAY.

H.J. Res. 197: Mr. ANDERSON, Mrs. FENWICK, and Mr. JENKINS.

H.J. Res. 243: Mr. WEBER of Minnesota, Mr. HOLLENBECK, Mr. BARNARD, Mr. BINGHAM, Mr. JOHN L. BURTON, Mr. DIXON, Mr. DONNELLY, Mr. ERDAHL, Mr. FASCELL, Mr. GONZALEZ, Mr. HOWARD, Mr. CORRADA, Mr. SCHUMER, Mr. CARNEY, Mr. CORCORAN, Mr. JAMES K. COYNE, Mr. LENT, Mr. RITTER, Mr. BROOMFIELD, Mr. SAVAGE, Mr. FOWLER, Mr. DOUGHERTY, Mr. FROST, Mr. LELAND, Mr. WASHINGTON, Mrs. COLLINS of Illinois, Mr. PRICE, Mr. MAZZOLI, Mr. EDWARDS of Alabama, Mr. TAUKE, Mr. TAYLOR, Mrs. SNOWE, Mr. LEBOUTILLIER, Mr. ROUSSELOT, Mrs. SCHNEIDER, Mr. ROUKEMA, and Mr. HUGHES.

H.J. Res. 254: Mr. SMITH of Alabama and Mr. HYDE.

H.J. Res. 260: Mr. MOORHEAD, Mr. MCGRATH, and Mr. RUDD.

H.J. Res. 273: Mr. HOWARD, Mr. WATKINS, Mr. GOLDWATER, and Mr. MAZZOLI.

H. Con. Res. 103: Mr. ROSENTHAL, Mr. FAUNTROY, Mr. MATSUI, Mr. LAGOMARSINO, Mr. YATRON, Mr. HANSEN of Idaho, Mr. BARNARD, Mr. PEPPER, Mr. DUNCAN, Mr. BREAUX, Mr. BENJAMIN, Mr. MCDONALD, Mr. DANIEL B. CRANE, Mr. BAILEY of Pennsylvania, Mr. ROBERT W. DANIEL, JR., Mr. FORSYTHE, Mr. BEARD, Mr. CORRADA, Mr. GINGRICH, Mr. DORNAN of California, Mr. ERTEL, Mrs. SCHNEIDER, Mr. LANTOS, and Mr. OXLEY.

H. Con. Res. 151: Mr. SIMON and Mr. MCHUGH.

H. Con Res. 159: Mr. MCDONALD, Mr. JEFFRIES, Mr. EMERY, Mr. RAHALL, Mr. DUNN, Mr. FORSYTHE, Mr. ATKINSON, Mr. KRAMER, Mr. BLILEY, Mr. LENT, Mr. BEARD, and Mr. RUDD.

H. Con. Res. 175: Mr. BLILEY, Mr. WON PAT, Mr. MCCLORY, Mr. TRIBLE, Mr. MAVROULES, Mr. HORTON, Mr. ROE, Mr. OTTINGER, Mr. ROSENTHAL, Mr. MARTIN OF NEW YORK, Mr. RICHMOND, Mrs. FENWICK, Mrs. BOGGS, Mr. DOUGHERTY, Mr. SMITH OF PENNSYLVANIA, Mr. MCCLOSKEY, Mr. FORSYTHE, Mr. GINGRICH, Mr. WORTLEY, Mr. ROBINSON, Mr. PEYSER, Mr. DWYER, Mr. WHITEHURST, Mr. CLAUSEN, Mr. ROTH, Mr. DE LA GARZA, Mr. HANSEN OF IDAHO, Mr. WAMPLER, Mr. WEBER OF OHIO, Mr. LAGOMARSINO, Mr. NAPIER, AND Mr. GUARINI.

H. Con. Res. 178: Mr. BLILEY, Mr. SENSENBRENNER, Mr. WINN, Mr. PARRIS, Mr. MARLENEE, Mr. GUNDERSON, Mr. KRAMER, Mr. RHODES, Mr. ASHBROOK, Mr. FORSYTHE, Mr. WYLIE, Ms. FIEDLER, Mr. MYERS, Mr. KINDNESS, Mr. BADHAM, Mr. SYNAR, Mr. CRAIG, Mr. HOPKINS, Mr. DANIEL B. CRANE, Mr. MCCURDY, Mr. WOLF, Mr. STUMP, Mr. DORNAN of California, Mr. CHENEY, Mr. MATSUI, Mr. HEFTEL, Mr. SOLOMON, Mr. LUNGREN, Mr. SMITH of Oregon, Mr. FIELDS, Mr. YOUNG of Missouri, Mr. CAMPBELL, Mr. BONER of Tennessee, Mr. RUDD, Mr. STATON of West Virginia, Mr. ROBERTS of Kansas, Mr. SKELTON, Mr. BENEDICT, Mr. VENTO, Mr. WHITTAKER, Mr. DASCHLE, Mr. HAGEDORN, Mr. MOLLOHAN, Mr. MCEWEN, Mr. GRAMM, Mr. BARNARD, Mr. DAUB, Mr. EVANS of Georgia, Mr. CHAPPELL, Mr. EDWARDS of Oklahoma, Mr. DORGAN of North Dakota, Mr. HOLLAND, Mr. BAILEY of Missouri, Mr. DOWDY, Mr. RAHALL, Mr. WATKINS, Mr. WAMPLER, Mr. ROBERT W. DANIEL, JR., Mrs. BOUQUARD, Mr. ROBINSON, Mr. MARRIOTT, Mr. ENGLISH, Mr. HANSEN of Utah, Mr. HAMMERSCHMIDT, Mr. COLLINS of Texas, Mr. SKEEN, Mr. EVANS of Iowa, Mr. JEFFRIES, Mr. MORRISON, Mr. HUBBARD, Mr. ALEXANDER, Mr. JOHNSTON, Mr. MCDONALD, Mr. VOLKMER, Mr. WEBER of Minnesota, Mr. BETHUNE, Mr. GREGG, Mr. MOORHEAD, Mr. EMERSON, and Mr. KOGOVSEK.

H. Res. 208: Mr. STATON of West Virginia, Mr. WEBER of Minnesota, Mr. RUDD, and Mr. DANIEL B. CRANE.

H.Res. 211: Mr. NICHOLS and Mr. GUNDERSON.

## PETITIONS, ETC.

Under clause 1 of rule XXII,

204. The SPEAKER presented a petition of the annual meeting of the National Association of Attorneys General, Jackson Hole, Wyo., relative to nuclear waste disposal; which was referred jointly to the Committees on Energy and Commerce and Interior and Insular Affairs.

## AMENDMENTS

Under clause 6 of rule XXIII, proposed amendments were submitted as follows:

### H.R. 4

By Mr. ASHBROOK:

—Page 3, strike out lines 11 through 21 and insert in lieu thereof the following:

(c) Whoever, in the course of a pattern of activities intended to identify and expose covert agents and with reason to believe that such activities would impair or impede the foreign intelligence activities of the United States, discloses any information that identifies an individual as a covert agent to any individual not authorized to receive classified information, knowing that the information disclosed so identifies such individual and that the United States is taking affirmative measures to conceal such individual's classified intelligence relationship to the United States, shall be fined not more than $15,000 or imprisoned not more than three years, or both.

—Page 3, lines 13-14 strike out "but the fact of such identification or exposure."

Page 4, lines 14-15, strike out "by the fact of such identification or exposure."

—Page 3, after line 21 insert the following new subsection:

(d) Whoever intentionally discloses to any individual not authorized to receive classified information any information that purports to identify a U.S. official overseas as a covert agent, under circumstances that place a person in imminent danger of death or serious bodily injury, shall be fined not more than $25,000 or imprisoned not more than 5 years or both.

—Page 7 line 10, strike "and".

Page 7, strike lines 11-13.

—Page 7, strike lines 17-18, add "who is or was an agent of or informant."

Strike line 21 and "acting" on line 22, add "acts or has acted".

—Page 8 after line 15 add:

"A source of operational assistance is any individual who aids in the activities of an intelligence agency or who cooperates with an intelligence agency in the course of a confidential relationship protecting the identity of such individual from public disclosure."

Adjust numbers that follow.

By Mr. PEASE:

—Page 3, line 13, insert "legal" before "foreign intelligence".

By Mr. SOLOMON:

—Page 7, strike out lines 4 through 25 and insert in lieu thereof the following:

"(4) The term 'covert agent' means—

"(A) a present or former officer or employee of an intelligence agency, or a present or former member of the Armed Forces who is or was assigned to duty with an intelligence agency—

"(i) whose past or present identity as such an officer, employee, or member is classified information, and

"(ii) who is serving outside the United States or has within the last five years served outside the United States;

"(B) a United States citizen whose past or present intelligence relationship to the United States is classified information and—

"(i) who resides and acts outside the United States (or who resided and acted outside the United States) as an agent of, or informant or source of operational assistance to, an intelligence agency, or

"(ii) who at the time of the disclosure is or was at any time acting as an agent of, or informant to, the foreign counterintelligence or foreign counterterrorism components of the Federal Bureau fo Investigation; or"

By Mr. WEISS:

—Page 3, strike out lines 11 through 21, inclusive.

Page 3, on line 15 after "any" and continuing on line 16, strike "information" and insert in lieu the following: "properly classified information not previously in the public domain,".

Page 4, after line 21, insert the following new section:

SEC. 602. (d) It shall not be an offense under section 601 to transmit or disclose information previously available from public sources or unclassified materials.

Page 6, on line 8 after "material" insert "properly".

### H.R. 3210

By Mr. STARK:

—Page 11, after line 10, insert the following:

SEC. 16. The State of California shall not restrict or require the restriction of the use of any lane on any Federal-aid highway in the unincorporated areas of Alameda County, California, to high occupancy vehicles, exclusive of approaches to toll roads or bridges.

Page 11, line 11, strike out "SEC. 16." and insert in lieu thereof "SEC. 17.".

±

# EXTENSIONS OF REMARKS

## THE REAGAN ADMINISTRATION'S SPENDING HABITS VERSUS ITS BUDGET PLAN

HON. LOUIS STOKES
OF OHIO
IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 22, 1981*

● Mr. STOKES. Mr. Speaker, I would like to take this opportunity to bring to the attention of my colleagues a disturbing article which appeared in the New York Times on the flamboyant lifestyle of the President, his staff, members of the Cabinet and his close friends.

Mr. Speaker, I am in no way bringing this article to the attention of my colleagues to imply that there should be no pomp or ceremony associated with the Office of the President. Similarly, I am not advocating restricting Government officials' use of their own money.

However, it seems to me that the merrymaking, frivolity and lifestyles of many key officials have gone too far. My candid assessment of the situation is that the administration, at best, can be categorized as going overboard and, at worst, as being insensitive and hypocritical about the dire economic situation that plagues Americans.

Mr. Speaker, on one hand, we have the President telling the country how bad off we are economically and how all of us will have to tighten our belts. He then unleashed David Stockman and his budget ax on minorities, the poor and disadvantaged of our Nation.

Then, on the other hand, we have the President, key staffers and some Cabinet members living in lavish homes. They give and attend extravagant parties complete with all the status symbols of the elite in our society while still tooting the horn of fiscal conservatism. It is the classic "do as I say but not as I do" scenario.

Mr. Speaker, what is even more ludicrous and totally abominable is the fact that one of the President's "kitchen cabinet" members is quoted in the New York Times article as saying that he believes Americans enjoy viewing the luxurious Washington way of life of the Reagan administration. Mr. Speaker, I for one, do not. I know that my constituents, many of those who will be dropped from the food stamp program in the next few days, do not either.

I cannot believe that this individual is as politically naive as his statement suggests. I believe, rather, that he and other administration officials who continue in this excessive merrymaking while the poor and working classes struggle to survive under the budget cuts are callous hypocrites. For them, the rhetoric about concern for the poor and that invisible safety net are nothing more than cocktail chit-chat.

Mr. Speaker, as we and the poor of this Nation brace for another round of budget cuts from the President, I think we should keep in mind the budget cutting rhetoric of the Reagan administration versus the lifestyle they embrace. No where is it more evident that the poor have become passe and the rich the "in crowd" than in the Reagan administration.

At this time, I would like to ask my colleagues to read an article which appeared in the New York Times entitled, "Reagan Aides Show Capital Luxury Style" written by Lynn Rosellini.

[From the New York Times, Aug. 16, 1981]

REAGAN AIDES SHOW CAPITAL LUXURY STYLE

(By Lynn Rosellini)

WASHINGTON, Aug. 15.—William French Smith tied on his black tie, stepped into a chauffered sedan and went to a party one night not long ago.

The evening was marked by strolling musicians, silver candelabra, trees strung with Christmas lights and a dinner for 250 under a green-and-white-striped tent on the Mall. In addition to the Attorney General, there were lots of other Cabinet members, White House officials and important Republicans, which is not surprising.

SPENDING THEIR OWN MONEY

In Ronald Reagan's Washington, many Republicans go to parties six nights a week. They also ride about town in chauffeured limousines. They live in the most expensive sections of town and have vacation homes in California and Maine.

As officials, advisers and friends of President Reagan, they endorse austerity in Federal spending, but in their personal lives many of the most visible Administration players have shown a fondness for conspicuous spending of their own money in their first six months in Washington.

When they arrived here last January, the Reagan Republicans, many of them successful in business and industry, brought with them their accustomed way of life, one that emphasizes good living and the use of social occasions to smooth professional relations.

Signs of the new luxury are everywhere: in the jewelry, clothes, cars, homes and restaurants favored by the newcomers.

James A. Baker 3d, White House chief of staff, lives in a $715,000 house. Caspar W. Weinberger, Secretary of Defense, has a $707,000 house with a swimming pool. Treasury Secretary Donald T. Regan attended 28 social functions in one 30-day period recently. Nancy Reagan and her friend Betsy Bloomingdale wear designer gowns and elaborate jewelry.

"This is a fun Administration," says Robert K. Gray, co-chairman of the 1981 Presidential Inaugural Committee. "This President enjoys his position, and so do those around him. They work hard during the day and they like to have a good time at night."

And that, in part, makes them different not only from the recently departed members of the Carter Administration but also from other Republicans who have come to Washington. In the past, Republican Presidents often found it difficult to lure fellow party members to take Government jobs. But the Reagan Republicans seem to enjoy Washington whirl more than their predecessors.

And if members of the new Administration feel any conflict between their personal luxuries and public sector's belt-tightening, no one is apologizing.

"The preponderance of these people are self-made," said Charles Z. Wick, a member of Mr. Reagan's "kitchen cabinet" and director of the International Communications Agency. "They followed the American dream."

AMERICANS SAID TO ENJOY WATCHING

Mr. Wick said he thought that economically pinched Americans of today enjoyed viewing the luxurious Washington way of life of the Reagan Administration members, much as Americans who suffered in the Depression enjoyed watching Hollywood stars in the movies.

"During the Depression," said Mr. Wick, "when people were selling apples and factories were still and guys were jumping out windows because they lost everything, people would go to the movies. They loved those glamour pictures showing people driving beautiful cars and women in beautiful gowns, showing that people were living the glamorous good life."

That many members of the Reagan team live the good life is reflected almost daily in the social pages of local newspapers. Although July is normally a slow period in Washington's social calendar, the last month included an array of entertainments:

The black-tie dinner on the Mall was held in honor of Senator Paul Laxalt of Nevada, who ran the Reagan campaign. Mr. Gray, the host, served cold tenderloin of beef and provided fans powered by an electric generator to cool his guests.

A lawn party, a Western-style barbecue for 300 at the $765,265 home of Raymond J. Donovan, Secretary of Labor, was marked by two bands, a mechanical bull, open pits of sizzling beef and pork and guests in cowboy hats. Vice President Bush and David A. Stockman, the budget director, were there.

A birthday party for Mrs. Reagan was thrown by her old California friends. They rented a Virginia plantation, chartered a bus, hired a country music band and flew in food from Chasen's restaurant in Beverly Hills. Drinks were served on the bus by Frank Sinatra.

The gifts presented at such occasions are elaborate and sometimes public spirited, too. Mrs. Reagan's friends chipped in $3,900 to repair a local swimming pool for the handicapped as a birthday present. Senator Laxalt received a $1,000 check to help pay for an elephant to be given to the National Zoo.

---

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

Setting the tone for the Administration are the President and his wife. In Mr. Reagan's White House, their mark is seen in the return of white-tie formality at diplomatic receptions, in the color guard that precedes the Reagans and their guests of honor at state dinners, in the elaborate menus and the growing fleet of White House limousines.

After initial published reports on the new Reagan style, the White House has attempted to play down the Reagans' free-spending image. For example, a proposal to buy a new Presidential yacht was scuttled a few months ago after it was deemed symbolically inappropriate. But if the Reagans themselves are sensitive about their image, others connected with the Administration are not.

"I've never noticed anybody in past Administrations divesting themselves of their assets and giving them to the poor," observed Jean Smith, wife of the Attorney General. "I don't think it's any different from any other Administration."

In some ways, Mrs. Smith is correct. Even the Carter Administration, known for its homespun style, included wealthy men such as Bert Lance, the budget director, and Harold M. Williams, chairman of the Securities and Exchange Commission.

EXPENSIVE HOMES

Yet the predominant impression made by the newcomers remains one of wealth. Many of them, for instance, bought homes in the area's most expensive neighborhoods. Peter McCoy, Mrs. Reagan's chief of staff, paid $460,000 for his home in Spring Valley, a section of the capital. Secretary of State Alexander M. Haig, Jr. paid $415,000 for a house just over the District of Columbia line in Maryland.

Others have more than one house, Donald Regan has homes in Virginia, New Jersey, and Florida, Lee Annenberg, the chief of protocol, and her husband, Walter, have a suite at the Watergate Hotel, which they share with a maid and a butler, plus a mansion on Philadelphia's Main Line, a chalet in Sun Valley, Idaho, and a 250-acre desert estate in Palm Springs, Calif.

Many of the Reagans' wealthy California friends—the Justin Darts, Alfred Bloomingdales, Armand Deutsches, Earle Jorgensens and William Wilsons—either maintain apartments or rent hotel suites at the Watergate complex for their frequent visits.

In fashion, the tone is set by Mrs. Reagan and Mrs. Bloomingdale. Mrs. Reagan arrived here last January with a $25,000 inaugural wardrobe that included a $10,000 dress and a $1,650 handbag. Since then, such luxuries have become the First Lady's signature.

Her Los Angeles manicurist, Jessica Vartoughian, has visited the White House to do her nails, and her hairdresser, Julius Bengtssen, has traveled abroad with her to do her hair.

When Mrs. Reagan attended the wedding of Prince Charles in London recently her entourage included Mr. Bengtssen and a nurse, and her baggage included hundreds of thousands of dollars worth of jewelry borrowed from Bulgari, the international jewelers, four hatboxes and about 20 dresses, including eight ball gowns.

Many Reagan Republicans will spend part of August in California or in Northeastern coastal resorts. When they return in September, one of the first events on their social schedules will be a frontier extravaganza planned by Mr. Gray. The dance will be held outdoors on a square overlooking the C. & O. Canal in Georgetown.

"I'm going to have Western music and bales of hay," said Mr. Gray the other day. "It's terribly important., if you're going to have a party, that you do something besides feed people."●

## BRIDGING THE GAP FOR SURVIVAL

### HON. PETER W. RODINO, JR.

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 22, 1981*

● Mr. RODINO. Mr. Speaker, hundreds of people in my home city of Newark will join in a day of workshops this Friday on surviving under the Reagan administration budget cuts.

The day-long conference, entitled "Bridging the Gap for Survival," is a citywide effort of over 65 social service and community agencies to inform the young, the elderly, and the low-income residents of Newark about how the Federal budget reductions will directly affect their lives.

In a city that faces a disturbing crime rate, double-digit unemployment and a shortage of decent, affordable housing, the Reagan administration's extreme cutbacks in social programs are having an extremely cruel effect. But the citizens of Newark, through this conference, are proving that even the Reagan administration's callous attitude toward the cities of America will not dampen their spirit.

This conference is a grassroots response to the policies that have brought us the following:

There are 7.6 million people in America who cannot find jobs. This is an unemployment rate of 7.2 percent at a time when the Reagan budget eliminated 300,000 CETA jobs and trimmed job training programs.

Joblessness among black Americans has reached 15 percent, and among black teenagers it is an unbelievable 50 percent.

The 3 million Americans who receive minimum social security benefits each month will have to get along without them, as it now stands. While some will be able to survive, at least 500,000—mostly elderly women living alone—will find it almost impossible to exist.

College will become an impossible dream for over 1 million high school students of middle-income families denied guaranteed student loans.

About 100,000 families in need of decent housing will have to wait indefinitely for the public housing that they were promised by the Federal Government.

About 1 million Americans living on the edge of poverty will no longer be eligible for food stamps because of budget cutbacks.

Roughly 3 million schoolchildren may have to drop out of school lunch programs because the Federal Government will reduce its support by $1.6 billion.

The conference will try to counteract these cutbacks by having social service agencies and groups work more closely together to close the gaps in the services they offer. It also will try to close the generation gap to encourage our younger citizens to learn from the wisdom of our senior citizens.

The conference workshops will focus on seven chief areas of concern: Crime prevention; health maintenance; social services to help individuals and families obtain food, clothing, and shelter; educational opportunities; employment training; income maintenance; and tenant rights and responsibilities. The underlying theme throughout all of the workshops will be improving conditions where people live, specifically in public housing. The motivation behind this extremely important conference is the Newark Day Center, New Jersey's oldest social service agency which has been a vital force for helping disadvantaged people since 1803. The Newark Day Center's Executive Director Trish Morris has worked with the conference chairpersons Virginia Scott and George Branch to reach out to all people in Newark who are concerned about the city's survival. The conference is the fourth step in a five-stop plan initiated by the Newark Day Center last spring to inform people about how they can fight back against the threat of poverty and feelings of despair.

For my part, I pledge to continue to oppose cruel and unnecessary cutbacks in essential human services because when we stop investing in people, our cities and our Nation will have no future at all. I am proud to have been asked to be honorary chairperson at Friday's conference because I am very proud of the people associated with it. I believe they will serve as an example to other cities in these most difficult times.●

## AMENDMENT TO PROTECT FORMER AGENTS

### HON. GERALD B. H. SOLOMON

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 22, 1981*

● Mr. SOLOMON. Mr. Speaker, during consideration of H.R. 4 I will offer an amendment to protect the identities of former intelligence agents and operatives from unauthorized disclosures. By protecting former agents, my amendment will strengthen this legislation in three vital ways: First, it will protect former agents from possible harm as a result of the disclosure of their true identities; second, it will protect active operatives who may have assumed the former agent's posi-

tion; and third, it will protect the entire intelligence network which may have been established by a former agent and passed on to the former agent's successor.●

## EXCISE TAX REFORM ACT

### HON. VIC FAZIO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 22, 1981*

● Mr. FAZIO. Mr. Speaker, I am especially pleased to join with my colleagues BOB MATSUI and JOHN ROUSSELOT in the introduction today of legislation to correct a glaring inequity in our system of collecting excise taxes. This bill, H.R. 4545, is the product of over 2 years of development, and shifts the focus of legislative activity from the Appropriations Committee on which I serve to the Ways and Means Committee where it must ultimately be resolved.

Excise taxes are collected by the Federal Government on a variety of manufactured goods, such as motor vehicles, tires, coal, sporting goods, firearms, distilled spirits, and tobacco products. We collect approximately $11 billion of our revenues from the producers of certain commodities. These taxes are imposed on the products from the time of shipment from the place of production. Those subject to this type of tax must report bimonthly on shipments and consequent tax liability and are required to make their tax payment within a relatively short time thereafter, ranging from 3 to 25 days, depending upon the type of commodity which is being taxed. The producer normally pays the tax before receiving revenue from the purchase of the product. This system imposes a harsh burden, particularly on small business; particularly in times of high interest rates; particularly in times of recession.

The genesis of this bill was a proposal by the Treasury Department 2 years ago to require the payment of the excise taxes for tobacco and liquor industries by an electronic funds transfer system further decreasing the amount of time between production of the goods and the payment of the taxes. The initiative by the Treasury Department galvanized the first coalition of taxpayers interested in the reform of the excise tax collection system. The support from a range of interests affected by the excise taxes and the cooperation among my colleagues on the Appropriations Committee enabled us to successfully block the Treasury proposal on the funding bill. Unfortunately, this has become an annual—occasionally semiannual—effort by all the affected industries. Our success in the appropriations process, however, encouraged us to develop a permanent change in the excise tax collection system which will make the collection period uniform for all products subject to an excise tax, and to extend the time of collection so as to conform more nearly to the period of time which is normally associated with the receipt of payments by the manufacturers.

As introduced, the Excise Tax Reform Act seeks to free taxpayers from the burden of prepayment of this tax, which often necessitates borrowing funds and seeks also to reduce the volume of costly paperwork involved. It would cut paperwork in half by requiring only 12 reports annually in place of the 24 now required. It would also, when fully in effect, grant excise taxpayers 90 days from the end of each month to pay the tax on that month's shipments.

Clearly, a tax bill of this nature will have an impact on the collection of Federal revenues, but the only money which will be lost to the Government will be the interest costs which the Government will have to pay on funds borrowed in order to cover the interruption of revenues required by this bill. The same amount of taxes will be collected, and the bill does not take effect until fiscal year 1983 when there are prospects for an improved fiscal picture. Once the transition period is over, Federal revenues from the excise taxes will be equal to the amount now collected. Indeed, there are persuasive arguments to suggest, as in the arguments for supply side tax cuts, that the effect of this bill would be to actually increase revenues. Furthermore, I believe that the elimination of a system that requires certain businesses to pay a tax on their products before they have had a reasonable opportunity to receive revenue from sales would have beneficial effects on investment, employment, and price levels.

I am pleased that my colleagues BOB MATSUI and JOHN ROUSSELOT will be taking the lead on this issue in the Ways and Means Committee. Few members of the committee are more respected for their ability than my friends from California. They are committed to a fair system of taxation, one that does not seek to collect taxes before the business has made any money from its products. It is time for this issue to be resolved, and in a manner which reduces the burden upon our businesses. I urge you to support the work of BOB and JOHN in the committee so that this bill receives an early hearing and favorable consideration. I also urge you to join with us in sponsoring this legislation, H.R. 4545.●

## PHOTOVOLTAICS—ARE THE JAPANESE GETTING AHEAD AGAIN?

### HON. GEORGE E. BROWN, JR.

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 22, 1981*

● Mr. BROWN of California. Mr. Speaker, with talk of more budget cuts by the administration and the elimination of the Department of Energy, I found the article below on U.S. cutbacks in photovoltaic research appearing in the Christian Science Monitor particularly timely.

We are amazed at the leaps and bounds taken by the Japanese since World War II in the quality and competitiveness of their products, particularly in the area of electronics. And yet the current administration proposes to phase out the photovoltaics research and development efforts underway in this country, an area in which we have traditionally excelled and in which the Japanese are rapidly overtaking us.

Will we ask the Japanese to voluntarily curtail their trade with the United States while espousing free market ideology in the area of photovoltaics as we did with the automobile industry? I hope we do not ask the American public to accept mediocre and expensive energy alternatives simply because we have not chosen to support them. The Government can play an effective role in our energy future by providing flexibility and a range of options for further research and development by the private sector; I hope it will.

I hope my colleagues take a few minutes to consider the ramifications of actions which may appear to be straightforward budget cutting, but which have much greater implications for future U.S. trade and available energy options.

The article follows:

[From the Christian Science Monitor, Aug. 20, 1981]

U.S. CUTS IN SOLAR CELL FUNDING MAY LET JAPAN TAKE THE LEAD

(By David F. Salisbury)

DENVER.—When solar cells, perhaps the most revolutionary energy source under development in the laboratories of the world, come of age, will they be stamped "Made in USA" or "Japan Inc."?

This is the biggest question raised by the Reagan administration's cutbacks in the federal solar cell (photovoltaics, or PV) program. The administration has pushed for an overall reduction in this program of more than 60 percent, down to $63 million in 1982. Congress has restored $30 million to the program, but the White House is expected to try to return the budget to the lower level. And, according to Department of Energy (DOE) sources, the budgetary ax will cut even deeper in 1983.

"By 1984 we're looking at a $10 million per year program of university research,"

predicts one DOE solar official gloomily. He could talk only off the record because he and his colleagues have been ordered not to discuss their programs with the press.

Many experts consider photovoltaics the most revolutionary of the solar technologies. They have several reasons. Solar cells are second cousins to the transistor. They convert light into electricity without any moving parts, or pollution.

Like the transistor, if the technical problems can be solved, it should be possible to produce the cells quite inexpensively. Since the Arab oil embargo, the price of electricity produced by solar cells has fallen from $1,000 per peak watt to $10 a watt. And if the cost can be cut to $2 a watt, PV will be economically competitive with conventional electric power. Further cost reductions, if possible to less than $1 a watt, would make electricity from the sun a real energy bargain.

Testament to PV's potential is the fact that, in the United States, the big oil companies have moved aggressively into the field. Overseas, the Japanese government has made it a major element in their national energy program, and Saudi Arabia also has an extremely ambitious effort under way.

Until now, the US has held a clear lead in solar cell development. They are an American invention, having been developed as part of the space program. Following the Arab oil embargo, the US government initiated a major program to adapt this space age technology to terrestrial use.

Many materials have been found that convert light into electricity, and the US has been exploring a dozen different approaches simultaneously. Federal purchases of photovoltaic arrays helped fledgling companies start up production lines and reduce the cost of these cells.

Japan, starting from behind, adopted a different strategy. "The Japanese have undemocratically chosen what—in their best judgment—are the most promising processes," explains Steven Strong, president of Solar Design Associates. As a result, they have caught up and passed the US on one promising new approach, amorphous silicon.

With the current US cutbacks, Japan, for the first time, will "have the advantage of spending a higher total number of government and business dollars (on PV research than the US)," observes Jack Stone, a photovoltaics expert at the Solar Energy Research Institute.

As a result, "the Japanese will blow over us like a typhoon," predicts Mr. Strong, who has designed several photovoltaic homes. This view is shared by Rodale Press, publisher of the Organic Gardening magazine and a booster of alternative energy sources.

Not all experts in the field agree with so dire an assessment, however. "The Japanese are probably not as far ahead as we think. We get a lot of press reports and rumors which are probably exaggerated," says one DOE official.

At the same time, there is a feeling that, while the devastation of the federal program will significantly slow the pace of development of photovoltaics in the US, the private PV industry is healthy enough to go it alone. Several years ago, the amount of private investment in PV surpassed federal spending here. The administration's rationale for the massive federal cutbacks is that private enterprise can do the job better.

There is at least an element of truth in this assessment. "I have been very pleased with the private sector response to the cutbacks. Several new corporations are getting in. It's still looking good from that point of view," reports Paul Maycock, who recently resigned as head of the DOE photovoltaics program.

Despite the cutbacks, Mr. Maycock foresees a very competitive world market, with the leadership alternating between the US, Japan, and, perhaps, other countries. "American firms currently have 90 percent world market while the Japanese have close to 0. This is a considerable advantage to overcome," he points out.

"We have the technological edge. We should have more confidence in American enterprise," says the director of one large privately funded laboratory. However, he admits they have hedged their investment by entering into a joint venture with a Japanese company, something several large US firms involved in this technology have done.

Most of the heads of private PV efforts, while praising much of the federal program, feel that certain aspects, particularly those involving "commercialization," now can be gradually phased out. However, a number are not enthusiastic about the manner in which the current cutbacks are being made.

"From what I hear through the grapevine, the cuts are not being made with enough selectivity," says one laboratory director. Too much basic research and development is being cut and too many commercialization programs are being redefined and kept, he objects. As a result, the reduction in what he considers the most useful and appropriate federal efforts are greater than he would like.

Until now, the US has been taking a low-risk approach to solar cell development. By funding research into a large number of approaches in parallel, when any given approach does not pan out, the overall rate of progress is not slowed substantially.

As result of the cutbacks, the range of federally funded research is being cut back radically. The result is greater risk of failure. If the cutbacks had come two years ago the government would have dropped work on amorphous silicon, the approach which now, because of an unexpected breakthrough, looks so promising that the Japanese have focused almost exclusively on it, points out one researcher.

In addition, as many as one-third of the researchers in the field are being forced to look for funding from private sources or turn to another area, experts say. Many, perhaps two-thirds of these, will be able to continue their work if they wish to.

However, research teams are being broken up and valuable experience splintered. Furthermore, uncertainty over the future will adversely affect those who continue to work on government grants.

"It's irritating to be in this country, working on a technology where overseas everyone envies us our leadership but which your own government fails completely to recognize," observes Joseph Lindmayer, head of Solarex.

He objects to the manner in which the cutbacks have been made as much or more than their substance. "The cuts are too much, too fast. And, at the same time, the administration is making negative statements about PV, and I have already lost one contract as a result," he complains.

He and a number of other photovoltaic entrepreneurs fear that this cutback will be viewed by U.S. investors and by foreign nations as a vote of no confidence in the technology.●

## STATE DEPARTMENT IS RIGHT IN DENYING CUBAN VISAS

HON. JOHN LeBOUTILLIER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 22, 1981*

● Mr. LEBOUTILLIER. Mr. Speaker, after 22 years, it is a national disgrace that Fidel Castro still controls a country only 90 miles from America's shores and is able to project military power with impunity throughout Africa, and Central and South America. In 1975, Castro dispatched nearly 20,000 troops to assist pro-Marxist forces assume control in Angola. Shortly thereafter, Castro mounted a campaign in Ethiopia with an additional 20,000 troops. Within the past 6 years, and in 17 countries throughout Africa and the Middle East, Castro's 50,000-man Afrika Korps has conducted a Communist crusade of terror while the United States stood by idly, appearing impotent to meet the challenge.

Closer to home, Cuban anti-American activity ranges throughout the Caribbean Basin. Cuba itself has been transformed into a Soviet base servicing Soviet reconaissance aircraft, electronic intelligence, and a sophisticated electronic listening post monitoring U.S. military communications. The Soviet naval presence in Cuba, the 3,000-man Soviet combat brigade, Soviet pilots flying Cuban aircraft, and the KGB's direct control of Cuban intelligence are further evidence of Soviet dominance of Cuba and the danger the regime represents to the United States.

On the mainland of the Americas, Castro has aided the Sandinistas in Nicaragua and is actively assisting the overthrow of pro-Western governments in El Salvador, Honduras, and Guatemala.

In spite of a clear pattern of aggression, the U.S. Government has attempted to normalize relations with Cuba throughout this period. In fact, one of the first foreign policy initiatives of the Carter administration was the promotion of normalization. Influential Members of both the House and the Senate gave their support to this process and many traveled to Havana as symbolic gestures of renewed relations.

Recent actions by the State Department, however, indicate that the Reagan administration does not intend to proceed in the same direction.

On September 16, the State Department announced that visa applications by four members of the Cuban Ministry of Foreign Affairs, including Ricardo Alarcon, Vice Minister of Foreign Affairs, were denied. The four were to participate in the Center for Cuban

Studies symposium, "The U.S. and Cuba: Prospects for Dialogue," to be held this week in House and Senate Office Buildings. The purpose of the symposium was to promote the normalization of relations with Cuba.

The visas were denied under section 212827 of the Immigration and Naturalization Act, which authorizes such action on foreign policy grounds. A spokesman for the State Department said that the visas were rejected "to reflect opposition to Cuban intervention and promotion of armed violence in Central America, Africa, and elsewhere."

Mr. Speaker, I applaud these actions. The time for talking normalization with Cuba is over. Now is the time to begin a policy reflecting the fact that the Cuban people can and should be set free from Castro's dictatorship. Let us hope that the administration's recent action is only the beginning of a series of steps designed to achieve that end.●

## NATIONAL GUARD TECHNICIANS DISABILITY REFORM ACT OF 1981

### HON. JOE MOAKLEY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 22, 1981*

● Mr. MOAKLEY. Mr. Speaker, I am today introducing the National Guard Technicians Disability Reform Act of 1981 (H.R. 4542) which is designed to correct a grave injustice in existing Federal retirement laws.

National Guard technicians are civilian employees of the Defense Department who provide the continuing core of specialized professional and skilled services needed to maintain equipment and other support at readiness levels. As a condition of employment, these technicians must also be members of their National Guard components on the same basis as other guardsmen.

If a technician is unable to meet the full requirements of the annual military physical, he automatically loses his civilian employment. But, because the disqualification is not made based on his or her civilian employment, the technician is ineligible for any benefits although both civilian and military coworkers would be eligible for some form of disability benefits in similar situations.

My proposed legislation would remedy this inequity. Mr. Speaker, I recognize that there are several approaches that the Committee on Post Office and Civil Service could recommend to Congress to deal with this unfair situation but I believe that this bill represents a reasonable approach and hope it can serve as a basis for a careful inquiry by that distinguished committee.●

## THE CONCANNON VINEYARD

### HON. FORTNEY H. (PETE) STARK

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 22, 1981*

● Mr. STARK. Mr. Speaker, the other day I took a few moments to talk about a family in my district that grows grapes which are made into wine. In an area rich with wineries, like the Livermore Valley, we have many beautiful vineyards, and charming wineries. One of those is the Concannon Vineyard, which will celebrate its 100th anniversary in just 2 years.

The Concannon Vineyards have been in the family for three generations. James Concannon; his son, Joseph; and his grandsons, Joseph, Jr. and James have all contributed to the family tradition.

Many wine critics have expressed their pleasure at the wines of the Concannon Vineyards. The vineyard has always been innovative in its winemaking, and has introduced superior wines from grapes that had never before been grown in this country.

I am including an article on the Concannon Vineyards, and want to personally commend this institution for its continued dedication to the tradition of fine California wines.

CONCANNON NEARS CENTURY MARK

In two years, in 1983, Livermore's Concannon Vineyard will be one century old.

In that time, three generations of Concannons have run the winery. First there was James, born in Ireland in 1847. A self-educated immigrant, he got into winemaking through friendship with San Francisco's first archbishop, producing sacramental wines originally, then expanding into the premium table wine field. His son Joseph carried on, followed by Joseph's sons Joseph Jr. and James.

"It should be no surprise that wines often reflect the character of the people producing them," wrote wine columnist Richard Paul Hinkle in a September 1979 edition of the San Francisco Examiner, thus beginning a column about the Concannon Vineyard.

He characterized the Concannons as people of "defined character" who produce wines "of definition." Speaking of the wines being made today, Hinkle observed, "Jim Concannon is a man of moderation. His wines reflect his low-key, hardworking, tasteful approach to life. You'll not see the splash of expensive advertising from the Concannons. There will be no trumpets to announce the arrival of a Concannon wine."

The winery has been a highly innovative one ("quietly so," observed Hinkle). In 1970, it bought cuttings of the Russian grape Rkatsiteli (pronounced rah-kot-suh-tel'ee) from the University of California at Davis and planted an experimental one-acre plot, which began bearing in 1973. The wine produced that year was the first American wine of this grape. According to Hinkle, Concannon's first Rkatsitelis "did not display a defined character," but such character has emerged since, with the maturation of the vines.

Of special pride to Concannon has been Petite Sirah. Concannon was the first winery in the United States to produce a varietal wine from this grape, releasing it in 1964. Besides being a big success for Concannon, the wine made people rethink a long-held attitude about Livermore Valley vineyards in general, that they were capable of producing premium white wines but not red wines of similar quality.

Hinkle wrote that Concannon's Petite Sirah showed a defined character right from the start. "While many Petite Sirahs reflect the supposedly coarse nature of the grape, the Concannon Petite Sirahs have been broad, soft wines of superb flavor. . . .

"A clue to the character of the Concannon Petite Sirahs lies in the fact that at the core of the wines are grapes from head-pruned vines planted on their own roots in 1911. Those vines have thrived in the rocky ground nearly as long as the Concannons, and continue to produce fine wines, without fanfare but not without distinction. In that respect, they are much like the Concannons themselves."

Following the death of Joseph Jr. in 1978, James found it necessary to seek additional financial and managerial resources. He established a partnership with Agustin Huneeus, a well-known wine producer. James has continued as president of the vineyard. The partnership has provided opportunity for expansion. Contracts have been signed with vineyards in several areas that produce grapes comparable to those grown in the 200-acre Concannon Vineyard on Tesla Road. The winery plans to closely supervise the growing of these grapes.

Recently, Sergio Traverso was named vice-president and winemaker. Traverso, holder of a doctorate from the University of California at Davis, was winemaker at Domaine Chandon in Yountville during the mid 1970's, followed by employment as oenologist-winemaker at Sterling Vineyards in Calistoga.

Speaking of Concannon Vineyard's future direction, a brochure put out by the winery says Concannon and Huneeus both place great emphasis on wines being identified with a sense of place and of origin. "They feel certain that the nationwide interest in wine will continue to grow and that consumers will more and more frequently associate the quality of a wine with the region in which its grapes are grown. Mr. Concannon and Mr. Huneeus intend to expand on Concannon Vineyard's reputation as the premier winery of the Livermore Valley."●

## PROTESTERS GIVE VOICE TO THEIR ANGER AND FEARS

### HON. CHARLES E. SCHUMER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 22, 1981*

● Mr. SCHUMER. Mr. Speaker, on September 19, 1981, 250,000 people gathered at the steps of the Capitol to protest Reagan's economic program and to assert demands for economic and social justice. Challenging the President's assertion that his economic program is based on a "mandate" that he received from the American people, senior citizens, factory workers, municipal employees and others of all ages and races denounced the cuts in education and social programs, and

defended agencies under attack, such as OSHA. The fears and concerns of several of the demonstrators were printed in the following Washington Post article, of September 20, entitled "Protesters Give Voice to Their Anger and Fears":

PROTESTERS GIVE VOICE TO THEIR ANGER AND FEARS

(By Judith Valente and Tom Sherwood)

Ron Wellman, 56, Army veteran, diehard Republican and Pennsylvania maintenance worker, stood near the Washington Monument yesterday, getting ready for the Solidarity Day rally, his Western-style string tie flying in the breeze, and a plaid polyester jacket on his back.

Wellman was a long way from home, home being near Erie, Pa., just outside Edinboro State College where he shovels snow in winter and cleans up the school grounds in summer to feed his family.

When America picked a president last year, Wellman voted for Ronald Reagan because he was "100 percent" for a stronger national defense. Wellman said he wanted to see the Russians put in their place and lazy Americans taken off welfare. But now Wellman says he is perplexed.

All he says he sees coming from the Reagan administration is that "the poor people, the little people, are getting ripped off, and this administration is favoring the rich."

Just this complaint brought Wellman and thousands like him to Washington yesterday—people who work on assembly lines, sew clothes, pick crops, transport food and clean streets and government buildings—to tell Reagan that the little people still form the backbone of this nation and that they are being hurt.

Even from those who had once enthusiastically supported Reagan, from burly steelworkers and young Hispanic busboys to elderly ladies who place the union label on thousands of garments each year, the message was clear.

"We got sold out," said Thomas Ramsey, a sugar hauler who had traveled all night Friday by bus from South Bay, Fla., with 46 fellow sugar industry workers to participate in the Solidarity Day protest.

Ramsey says he remembers vividly the television ads during the presidential campaign last year that highlighted Reagan's years as a union organizer for the Screen Actors' Guild, and now he says he resents the fact that most of the benefits of Reagan's tax package will go to the wealthy.

"He's taking bread out of the mouths of the American people," said Ramsey, who has a wife and two children. " ... If they want to cut the budget and fix everything up in the economy, why don't they start with the politicians. Some of them are making $80,000, $90,000 a year and they ain't doin' anything. Me, I work seven days a week, 12 hours a day in our busy season from October to March, and I'm makin' $17,000 a year."

Though Ramsey is only 30 and far from retirement age, he wore a red, white and blue sign that said, "Organized Labor is Opposed to Social Security Cuts."

But bricklayer Ernest DiFranco, 61, of Pittsburgh, is close to retirement and doesn't like Reagan's proposal to cut benefits sharply for people retiring in the future at 62 instead of 65.

"I've been picking up bricks every day of my life for 40 years," said the silver-haired DiFranco, son of Italian immigrants. "I don't want to work until I'm 68 or 70. I might not make it. I might be six feet under by the time I get to receive my benefits. My back is broke now," he added as he joined a crowd of miners and state and municipal employes boarding a Metro train at RFK Stadium.

"I paid into Social Security for 40 years; it's mine, not his," said 68-year-old Woodrow Wellington, a retired maintenance man from Newark, Del., as he sat in the shade by the Washington Monument in a ten-gallon hat and cashmere jacket. Wellington, who carries his AFL-CIO lifetime membership card in his pocket and calls himself a "hardline Democrat," said it irks him that Reagan often played up his past as a union organizer during the presidential campaign.

"He made out like he was this big labor person. But I don't think he ever done much work but play with that toy pistol on Death Valley Days," Wellington drawled.

Many other protesters yesterday voiced concern about Reagan's various deregulation proposals, especially those that they say would severely weaken the occupational safety standards.

For evidence, Bill Haynes, a Long Island, N.Y., painter, shows his wrists. They have been burned red and are peeling from constant contact with paint removing chemicals, he says.

"A lot of us [In the International Brotherhood of Painters and Tradesmen] work in painting where we have to go on scaffolding, in sandblasting and handling toxic materials," said Haynes, who, like other painters, marched along Constitution Avenue wearing a hard hat. "Without OSHA [Occupational Safety and Health Administration] behind us, our jobs could become even more dangerous."

Many in the crowd, especially young blacks and Hispanics, said they had benefited from federal job training and other government-funded programs, such as national defense student loans, and had provided community service in return.

John Richardson, 30, had a Comprehensive Employment and Training Act job cleaning up trash from back yards and vacant lots and exterminating rats in tenements in New York City's Harlem. But this year, several of those jobs, including his, were abolished, he said, even though health problems in Harlem remain as severe as ever.

"You can't imagine how many cases there are of rats crawling into cribs and biting babies. . . . We were really needed," he said of the CETA workers. Many of them had been in the program as long as five years and some even got married thinking they would have a steady income. "But there's no security now," Richardson said.

As the afternoon wore on and the signs and banners were discarded and the crowd began to dwindle, many of those who had arrived in the morning full of enthusiasm, ended the day with mixed feelings about how effective their message had been.

"We should have been here during the week to shut down Washington," said Ron Weissen, president of a steelworkers' local in Homestead, Pa. "We came to show union support, but it's not going to change a thing, really."

But said John Patterson of Local 1842 of the Machinists union in Pittsburgh, "If this march doesn't work, we'll be back again."●

## TRIBUTE TO THE MEMORY OF PAUL F. BURNUM

### HON. RICHARD C. SHELBY

OF ALABAMA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 22, 1981*

● Mr. SHELBY. Mr. Speaker, Tuscaloosa County, in Alabama's Seventh Congressional District, suffered a great loss recently with the death of Paul F. Burnum, 79, of Tuscaloosa. It is my privilege today to offer a tribute to the memory of this wonderful man.

Not many people achieve the measure of admiration and respect that Paul F. Burnum enjoyed. He earned that admiration and respect because he genuinely cared about people and about the welfare of his community.

He was a rarity—a man who had the vitality and know-how to be extremely effective in getting things done, yet warmth and sensitivity that made him a beloved leader.

Burnum, a native of Cullman, graduated from the University of Alabama in 1923 and was the first football coach at Barbour County High School. He also coached at Tuscaloosa High School, leading the football team to a 42-0-1 record from 1925 through 1929. He also was a pioneer in women's athletics, coaching the girls' basketball team during his tenure at Tuscaloosa High.

After coaching high school sports, Burnum served 13 years as an assistant coach at the University of Alabama, where he tutored a soon-to-be famous end, Paul "Bear" Bryant, whom he helped recruit out of Arkansas.

"We as a community and a school lost a dear friend, an outstanding human being," said Coach Bryant when told of Burnum's death. Continuing on he added, "Personally, I will miss Coach Burnum in many, many ways. He was very loyal to me and to Alabama and helpful to both of us for many years."

Paul F. Burnum will be remembered for many outstanding achievements and accomplishments. He built the first lighted football field in Alabama, organized the first Quarterback Club in Tuscaloosa, serving as president of it for 2 years and director for 3.

He served as president of the Exchange Club for 2 years, was a member of the board of directors of the Tuscaloosa Chamber of Commerce 2 years, and a member of the A-Club at the university.

Continuing on in his vein of always helping others, Burnum served as chairman of the Advance Drive for the Red Cross 1 year, chairman for the YMCA fund drive 1 year, and organized the "Back the Bear" Club that rasied funds for lighting Bryant-Denny Stadium in Tuscaloosa.

I am pleased to know that this year Coach Burnum has been nominated for induction into the Alabama Sports Hall of Fame. I can think of no other individual who is worthy and deserving of this honor and recognition.

Surviving are his wife, Mrs. Susie Burnum, Tuscaloosa; a son, Dr. John Burnum, Tuscaloosa; a daughter, Mrs. Paula Sue Burnum Hayes, Tuscaloosa; three grandsons, Paul Hayes, Andrew Wilson Hayes and John Moseley Hayes, all of Tuscaloosa; four granddaughters, Susan Burnum, Birmingham. Lessie Burnum, Tuscaloosa, Fran Burnum Griffin, Birmingham, and Susanna B. Hayes, Tuscaloosa; three sisters, Mrs. Alma Oswald, Haverton, Pa. Mrs. T. A. Smith, Cullman, and Mrs. Thelma Roberts, Bessemer; and a number of nieces and nephews.

Paul F. Burnum's life should serve as a memorial to him for all time in Tuscaloosa, Tuscaloosa County, and the State of Alabama, for he truly devoted it to serving the people that he loved and cared for. He left many fond memories and I am sure that this fine, outstanding gentleman will never be forgotten.

Mr. Speaker, it is indeed an honor for me to share this tribute with my colleagues in the House of Representatives. He will be deeply missed by me and all others who were touched by his wonderful life.●

## ROY WILKINS; 1901-81

### HON. WILLIAM J. HUGHES

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 15, 1981*

● Mr. HUGHES. Mr. Speaker, the individuals who have made our country great were those who perceived our people's ideals and worked in unique ways to achieve in our society a more perfect realization of these ideals. Roy Wilkins was such a man.

Grandson of a man who had suffered the worst perversion of our Nation's goals—slavery—Roy Wilkins became the leader of an organization which sought to rid our society of all vestiges of this terrible institution. Wilkins fought lynching, segregation, and discrimination in order to improve a society born of the ideals of equality and democracy for all citizens. From 1957 until 1977, he led the NAACP in combating racism in its many manifestations, in his own dignified and compelling manner.

Roy Wilkins lived to see great strides for blacks and for our society as a whole. He saw an end to formal condonation of separate treatment of the races, through Brown against Board of Education and the civil rights acts of the sixties, events which he was instrumental in bringing to pass.

Throughout his career, he faced frustration, derision, and dissension, but he maintained his support for the system within which he worked. Possessed with a remarkable faith and optimism, he rejected violent and separatist approaches to the problems of blacks, and set a sterling example of what can be accomplished within the established political and legal system to improve our imperfect society.

All of us are the beneficiaries of the more equal society which Roy Wilkins helped to create. Thus all of us must help to bear the responsibility which such benefits carry—to assure that we continue to work toward perfecting our Nation, and to guarantee that minorities are provided equal opportunities to live, vote, work, and enjoy freedom in our society. We must regretfully bury Roy Wilkins, but let us forever preserve his memory and pursue his enduring ideals.●

## HALSEY UNITED METHODIST CHURCH CELEBRATES ITS 150TH ANNIVERSARY

### HON. DALE E. KILDEE

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 22, 1981*

● Mr. KILDEE. Mr. Speaker, it is with great satisfaction and pride that I bring to the attention of the Congress the 150th anniversary of the Halsey United Methodist Church near Grand Blanc, Mich.

The membership at Halsey United Methodist Church, located at Baldwin and Halsey Roads in Grand Blanc Township, Mich., is very much aware of the early pioneers and ministers who made it possible for people to enjoy worship there. To walk into the building is to become aware of the work and worship of people of years gone by. It is a history of involvement by a community as they seek to worship God.

Like many churches, Halsey started out as a stop on a circuit. The first minister to preach in Grand Blanc was Reverend Gilruth, a Methodist circuit rider. He preached his first sermon there in 1831. Services and meetings were held in log houses or barns as the occasion required. Later meetings were held in the Smith, Butler, and Halsey schoolhouses. Some walked to church, others rode in wagons drawn by oxen. The pioneer community believed that unless the Sabbath was respected, the settlement would not prosper.

In 1837 a log cabin school was built, the first Halsey school. This was a one-room building with two windows in the south side and one window in the east, and was built in the woods a short distance from the present church site. Services were held here for 11 years, until 1848, when a new schoolhouse was built on the site of what is now known as Halsey Park. Union church services and Sunday school were held in this building for 37 years. We owe so much to these early pioneer Christian men and women who worshiped together for 54 years, first in their homes, then in the log schoolhouse, and later in the frame schoolhouse which many of our present-day members attended in their youth.

Mr. and Mrs. Charles Case, who were early pioneers and leaders of the religious and school life of the community, lived on what is now known as the Arthur Somers farm, corner of the Baldwin and Halsey Roads. They deeded land for a new church to the Methodist Society on June 22, 1885. The society purchased the unused Congregational Church, located at the corner of South Saginaw and Holly Roads, for the sum of $100. The men of the Halsey community helped to take down the church, move it several miles to its present site, and rebuild it, using the old lumber and furnishing additional new material where it was needed to build the church steeple. Church sheds were built behind the church to shelter the horses, buggies and wagons which brought the worshipers to church. Each family furnished the lumber for their own shed. The church was finished and dedicated in 1886.

For nearly 10 years union services were held in the church, Methodist one Sunday and Congregational on the next, with the services finally taken over by the Methodists. In 1906 the remaining Congregational members transferred their membership to the church in Newark, located nearly 3 miles south, just off Holly Road.

For many years the church was part of a three- and then two-church ministry, and was the center of the religious and social life of the community. Improvements in the building have been made at various intervals. In 1926 a kitchen was added, in 1941 a basement and dining room. A woodshed had been added to the church to hold the cord of wood used to build fires in the two stoves used to heat the sanctuary. The woodshed became a cloakroom when the oil furnace was installed. A major building effort took place in 1957, when, through the combined work of all the people in the church, a parsonage was built. Like the early reassembling and adding on to the church building itself, this required the participation of many people.

Halsey United Methodist Church remains as a community church, just beyond the edge of greater Flint and its suburbs. It serves an increasingly suburban, yet still rural area between Grand Blanc and Holly. It is known for its community events, for ice cream socials and dinners. Yet it serves the community in other ways. It was one of the early churches in the midfifties to support the UNICEF col-

lection drives. It has contributed to area projects such as the Dort-Oak Park project in Flint, and been involved in supporting the United Methodist retirement homes. Members have a pardonable pride in the knowledge that their church is one of the pioneer churches in Genesee County, as well as the State of Michigan.

Plans are now being made for a special celebration in observance of the 150th anniversary. Heritage Sunday was held on September 20, when old photographs, historical data, and memorabilia were exhibited. Homecoming Sunday will be September 27 when former pastors and former church members and friends are invited to return for a worship service and dinner. On October 4 the congregation will celebrate Futures Sunday as church members look forward to challenges and opportunities in the future.●

## DESEGREGATION PLAINTIFF NOW AGAINST BUSING

### HON. RONALD M. MOTTL

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 22, 1981*

● Mr. MOTTL. Mr. Speaker, I would like to bring to the attention of my colleagues a recent newspaper column by Dick Feagler of the Cleveland Press that should be of great interest. The article describes how Robert Anthony Reed III, the student who was the plaintiff in the Cleveland school desegregation case, has decided he is against court-ordered busing. He has seen firsthand the harmful effects that forced busing has wrought upon the once proud Cleveland public school system.

His decision is also noteworthy because the House Judiciary Committee is currently holding hearings on the impact of court-ordered busing. I hope that the committee and other Members take note of the article which follows:

[From the Cleveland Press, September 21, 1981]

DESEGREGATION PLAINTIFF NOW AGAINST BUSING

(By Dick Feagler)

Robert Anthony Reed III, the student who was the plaintiff in the Cleveland school desegregation case, has decided he is against forced busing. He telephoned me to say he wanted to meet and talk about it.

"Maybe it's a story for you," he said. "I'm even thinking about supporting Rep. Ron Mottl's anti-busing amendment. I wanted to tell you about it because you interviewed me before."

In 1976 I had interviewed Reed when the NAACP won its desegregation case against the school system.

In 1973 Reed was named the first plaintiff in the suit. Fourteen other persons, including his brother Darryl and mother, Wyona Reed Willis, were also named to represent all black people similarly affected.

At that time, the family lived in a single-family home in a modest, working-class, well-tended area of Garfield Heights but within the Cleveland school district.

Previously the Reeds lived in the Glenville area of Cleveland, where Robert attended Iowa-Maple and Hazeldell Elementary Schools.

When the suit was filed, Reed was attending Robert H. Jamison Junior High School, which was 99.6% black. He asked to be transferred to A. B. Hart Junior High School because it was integrated and he believed it was a better school.

However, the school district's attendance bureau turned down the transfer request. In a furor, Mrs. Willis marched into the NAACP office to file a complaint.

When Federal Judge Frank J. Battisti found the schools guilty of segregation in 1976, Reed said, "I feel good that they won the case. The lawyers did all the work but I feel good about it."

The changes that the lawsuit caused did not affect Reed. He was graduated from John Adams High School and has worked at a succession of part-time jobs while trying to decide what to do with his life.

He is 22 years old now and is saving money from his part-time job at a downtown fast-food restaurant to take more courses in computer programming. He divides his time between his parents' house in Bedford Heights and a bachelor apartment in Cleveland.

"I've watched the busing going on and I don't think it's the right answer," he told me.

"I don't think it's good for kids of any color to leave their neighborhoods and go to strange schools. It's tough enough being a kid without that kind of pressure.

"I'd support an anti-busing amendment as long as it wasn't racist. I think there's a better way to right past wrongs besides busing.

"For instance, suppose they took all this money wasted on busing and used it to build fine schools and other institutions in the black community. That would help make up for the fact that the community had been deprived," he said.

"Then they could open those schools to all. White kids would know they were the finest places in the city and would be free to enroll," he said.

"That makes more sense to me than busing. Especially now that the kids are riding RTA. Listen, it's hard enough for adults like me to ride RTA," he said.

Reflecting on his role in the desegregation case, Reed said, "Philosophically speaking, if a person is responsible for starting a situation (that turns) out bad, he should rectify it, if able.

"I feel I am able to assist in helping solve some of the problems happening in the schools."

Reed said he has tried to talk about his ideas with area congressmen.

"They are all in Washington so all I got to talk to was their aides," he said.

He says he also discussed his views with NAACP lawyers.

"They just listened to me," he said. "But they didn't say much."●

## CONDEMNATION OF UNESCO'S NEW WORLD INFORMATION ORDER

### HON. WILLIAM F. GOODLING

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 22, 1981*

● Mr. GOODLING. Mr. Speaker, it is with disappointment that I note that House Resolution 142 sponsored by Congressman SHAMANSKY and Congresswoman FENWICK, was deleted from the list of bills to be considered yesterday. As you know, the resolution expressed the House's objection to UNESCO's proposed New World Information Order which could stop the free flow of information that is so necessary to the survival of freedom and democracy. It is true that the Beard amendment to the State Department appropriations bill had already put down the House's firm objections to the New World Information Order, but that particular bill was not passed as a whole, and hence I feel it necessary to reiterate our objections on this particular issue: we must make sure that UNESCO has not the least shadow of a doubt about our attitude to this latest assault on the free world.

The Beard amendment to the State Department appropriations bill is of fundamental importance, and must be included when appropriations to the State Department are finally made. The New World Information Order makes a travesty of human rights. Freedom of thought and expression is a fundamental human right, the curtailment of which would be the first step toward the eradication of all human rights. The United States has, since its birth, been a beacon of human rights in an otherwise desolate world. Thus we cannot condone, much less be a party to, UNESCO's sinister designs on the freedom of the world press.

UNESCO has long been the seat of such mischiefmaking: were we to withhold funding from UNESCO, it would not be without precedent. The United States withheld funding from UNESCO in 1975 and 1976 because of the blatantly leftist course that organization was then taking. Now it wants to tell us what we may or may not think, say, or read. Enough of this nonsense. Let us answer the New World Information Order with a loud and resounding, "No!"

We know what forces are behind UNESCO's latest suggestion—and it is but a subtle extension of the never-ending war they are waging against us. The Soviets are of the opinion that we Americans will sell them the rope which they will use to hang us with. In recent years there has been a grim sense of truthfulness to this remark: we have continually looked the other

way when something threatening was done; we have tried to explain and excuse actions that are inexplicable and inexcusable, and all the time we have treated with them as if they were our moral equals. Well, no more of this! Until such time as Representative BEARD'S amendment is incorporated into a bill passed by Congress, we must continue to reaffirm our opposition to the New World Information Order in every way possible. In so doing we will disprove the aforementioned Soviet opinion of us, and show the world that we are prepared to stand up and defend that which is right.●

## UNESCO: BLAME ENOUGH FOR ALL

**HON. GEORGE E. BROWN, JR.**
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 22, 1981*

● Mr. BROWN of California. Mr. Speaker, last week during consideration of H.R. 3518, the Department of State authorizations, we considered amendments dealing with the New World Information Order and the role of the United Nations Educational, Scientific, and Cultural Organization (UNESCO) in this area. The amendment sought to block the U.S. contribution to UNESCO if that organization acted to restrict the freedom of the international press or sought to enforce a code of journalistic ethics. I voted against that amendment, and would like to explain why.

Freedom of speech, a free press, the free and open exchange of ideas and information are the basis of a just society. These concepts are the cornerstone of our Nation and are the elements of freedom that we seek for all of mankind. Where these elements are absent, mischief and evil have occurred and humanity's potential is lost.

Censorship is the extreme form of the abrogation of these rights and is unfortunately practiced in many countries today. As was pointed out in the debate last week, the Communist bloc countries are especially guilty of censorship and the denial of a host of other basic human rights. I join my colleagues in the condemnation of these practices. But it is not a Communist-inspired move toward censorship that, by itself, has led to our current policy problems.

Flows of information are the currents of political, economic, and social power. Many developing countries have felt denied information vital to their development needs while being flooded with other information which is extraneous and even detrimental to the accomplishment of these needs. From the perspective of these countries, the developed world is insensitive to their needs and goals.

It is, in many instances, easier for a developing country to obtain reruns of "I Love Lucy" in their language than it is to obtain educational programing. Resource development companies in developed countries have more complete satellite remote sensing data than is available to the developing country being surveyed. And the news sources for the developing countries are not found in the developing world, but are developed-country sources such as UPI, BBC, Reuters, and the rest.

This last element is the key to the problems that we have been encountering over the last 5 years. Just as people in this country complain about our overemphasis on negative news—fires, disasters, and so forth—many developing countries object to a seeming emphasis on the negative. Floods, famines, revolutions, and the failings of incompetent leaders are reported more often than success stories; at least this is the position of many developing nations.

What these countries want is more positive reporting, called by some development journalism, akin to the reporting in the metropolitan and features sections of our newspapers. But without their own news agency and the money and equipment to make it work, the developing world remains dependent again on the developed countries.

In 1976, the issue came to a head at the UNESCO meeting in Nairobi. The Communist countries and totalitarian nations in the world began to formally press for conditions to be placed on information entering and leaving a country. Many nonalined countries, long frustrated with what they saw as an imbalance in global information flows, joined this effort. The United States was certain to lose a democratic vote, test vote, and successfully had the issue tabled by promising to take steps to aid developing countries in their information and communications efforts.

By the time of the next UNESCO meeting in 1978, little had been done and the information issues were raised again. The U.S. position became inflexible as we dug in our heels to thwart what we had cast as a Soviet move toward global censorship. Lost were legitimate grievances of imbalances of information flows. Lost was the ability to exploit the differences of opinions and policies that run through the nonalined movement. Again promises were made and a disastrous policy setback was avoided.

In 1979, the World Administrative Radio Conference (WARC) was held to divide the broadcast spectrum among different uses and different countries. The developed countries had much at stake since the allocations resulting from this Conference remain in effect for 20 years. After some initial rancor, we managed to again gain a consensus and avoided another potential setback, although many of the issues have yet to be resolved at a series of regional meetings.

Then we have the latest UNESCO meeting at which the New World Information Order and a journalistic code were presented again. This time the debate heated up, fueled by the impatience of the nonalined countries and the mischief of the Soviets. We dusted off our old policies and our old newspaper editorials and avoided disaster again. And we once again avoided a great opportunity.

Since 1977, I have been pressing for a different U.S. position on this issue. I have proposed that we make our information and communications technologies available to developing countries to assist their development efforts and gain their good will so that we are able to accomplish something more than avoiding disasters at international meetings. I firmly believe that if we had made a genuine and visible effort following the 1976 UNESCO meeting, we would not be having to debate the issues we are taking up today.

We could have linked developing country centers of knowledge, via satellite, with our centers. We could have trained developing country workers in remote sensing data interpretation on a larger scale and made the imagery available to them. We could have helped meet developing country broadcast spectrum needs by doing a better job of helping them aggregate users and develop time-sharing arrangements. We have done much to dispel the mixture of envy and suspicion with which these countries view the developed world's domination in this field, envy and suspicion which strengthen the Soviet position.

We would also have gained an economic advantage. Sixty percent of the world's population lives in the developing world. This market will be seeking increasingly sophisticated goods and technologies, such as communications technologies, in the coming decades. A sensitivity to the needs of these countries and a record as a reliable supplier of goods and training will reap tremendous economic rewards in the near future. The Japanese have noted this and recently gave a telephone transmission facility to Sri Lanka, a key nonalined country, both politically and geographically.

Instead of seizing this opportunity to do good by doing right, we are continuing to adhere to a policy that presents us with increasing headaches. Instead of aggressively seeking to deny the Soviets a support base in the nonalined movement, we debate policies that will provide them with a propaganda victory to be used amongst those countries. Instead of finding

new ways of fighting this threat to our cherished values of free speech and a free press, we are working within boundaries set by our aggressors.

Much of the cause of our current dilemma originates from our own insensitivity and lack of imaginative policy. I am reminded of a passage from an essay by Paul Valery, "The Greatness and Decline of Europe," written in 1927:

> More than one nation is deeply convinced that, in and of itself, it is pre-eminent, the elect of the endless future, the only nation capable of aspiring . . . to the supreme development of whatever potentialities it arrogates to itself. Each finds an argument in the past or the possible. None likes to regard its troubles as its legitimate offspring.

Until this country begins to recognize the need for new policies in the area of international communications, we will be stuck with our present narrow range of options. And the real threat to our basic freedoms will grow.●

## THE PEACE CORPS AT 20

### HON. WILLIAM LEHMAN

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 22, 1981*

● Mr. LEHMAN. Mr. Speaker, 20 years ago today, President John F. Kennedy signed the Peace Corps Act into law. I would like to take a few moments to congratulate the Peace Corps' thousands of current and former volunteers and staff. They have given the world 20 years of selfless service, and have improved the lives of millions, both directly and through the people they have lived with, worked with, and taught.

As a member of the Appropriations Subcommittee on Foreign Operations, which provides funding for the Peace Corps, I have had several opportunities to visit Peace Corps volunteers and staff in the field, in Africa, Asia, and Central and South America. I have been very favorably impressed by the abilities and dedication of these people, and by their willingness to give up comfortable Western lives to go live in the villages of the Third World and try to make a difference in the ways the world's poorest people survive.

It seems to me that there is no more cost-effective way to help people to better their daily lives than working with them at the local level in the critical areas of health, nutrition, agriculture, and education. And this work cannot be done without a knowledge of the languages, cultures, and conditions within which changes and improvements must take place. Indeed, in my experience, Peace Corps people are the only official U.S. representatives abroad who speak the languages and dialects and live in the cultures and conditions of the people our development assistance programs are meant to help.

And, Mr. Speaker, having had this very special experience, Peace Corps people come home, bringing their new knowledge of and sensitivity to the real problems and needs of the developing world to share with the rest of us. They are a unique national resource, helping to broaden our awareness of an increasingly interdependent world.

I would again like to congratulate the Peace Corps for its 20 years' service, and I wish it 20 years more, or however long it takes to finish the job.●

## SELF-HELP AND SELF-RELIANCE

### HON. SHIRLEY CHISHOLM

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 22, 1981*

● Mrs. CHISHOLM. Mr. Speaker, the drastic reduction in Federal support for social programs indicates dismal days ahead for many Americans who depended on these programs. Alternatives must be sought as we attempt to cope with the effects of the Federal budget reductions. To accomplish this, new modes of promoting social change will have to be explored. One of the modes that may not be new but perhaps has not been developed as productively as it should is the church.

Churches are becoming more concerned about their communities. They are sponsoring day care facilities, senior citizen centers, after school tutorial programs, job referral/placement services, and housing programs.

This view of the church as an instrument for social change can be seen with crystal clarity when we look at the St. Paul's Community Baptist Church and the pastor, Rev. Johnny R. Youngblood. A New York Times article which appeared on September 5, 1981, highlights the work of Reverend Youngblood and his church in the east New York section of Brooklyn, N.Y. This article is being submitted for my colleagues' attention.

IN POVERTY, A CHURCH IS THRIVING

(By Kenneth A. Briggs)

Although he had injured his right leg the day before in a touch-football game and was limping noticeably in his office, the Rev. Johnny R. Youngblood had shown no sign of difficulty moving about during the service at St. Paul's Community Baptist Church in Brooklyn. It is part of his self-image as someone who must lead by example.

"In black religion, the element of contagion must be considered," he said, his shirt still damp with perspiration from the energy expended during the 45-minute sermon. "I don't want people to see me hopping to the pulpit. If I'm seen in need, they're in need. If I'm seen healthy, they're healthy."

Articulate, energetic and strong-willed, Mr. Youngblood is still maturing professionally, reaching for the top of his form. He stands in the tradition of the black preacher, the figure W. E. B. DuBois, the educator, called the most original character in the centuries of American Black history.

Seven years ago, at the early ministerial age of 26, Mr. Youngblood was unanimously elected by the 72 church members as the pastor of St. Paul's. At the time, the struggling church, founded in 1927, was meeting in a brownstone on Prospect Place in the Brownsville section of Brooklyn.

WORD FROM THE LORD

"We had our backs to the wall," said William Brandon, president of the church deacons, recalling the depths to which the congregation had fallen, "so we decided to just turn him loose and see what happened."

A lot happened. Today the church has 1,200 members, more than half of whom tithe, donating a tenth of their income. Two years ago it moved into a spacious former synagogue on Hendrix Street in the East New York section. Even with two services and seating capacity for nearly 600, overflow crowds are frequent. They come to hear the choir and to see each other, but mostly to hear Mr. Youngblood.

"There is no substitute for preaching," he said. "I don't care what else a preacher does in the community or what causes he promotes, the people want to know on Sunday morning whether there's a word from the Lord."

A RENEWED RESPECT

St. Paul's has plans for ambitious social projects, including a private junior high school, a meeting place for tenant groups and a center for the elderly. Like many black churches, it is feeling a new sense of urgency, spurred by expectations that the Reagan Administration's cuts in social programs will bring new hardship and scarcity into their neighborhoods.

"Mr. Reagan will do a lot to fill the churches," Mr. Youngblood said wryly. "In the black church, we really preach for survival. When folks have no other resources, God is always there."

Though social activists have criticized some black preachers for counseling passivity and spirtiual escapism in the face of racial oppression, the leadership of the Rev. Dr. Martin Luther King Jr. and hundreds of other black ministers in the civil-rights movement helped bring the church renewed respect. And after the social progams of the Great Society had mostly come and gone, many blacks noted that the church was still there—65,000 places of worship in the United States—as a bulwark of black community life.

Mr. Youngblood stated the case in his own terms. "Dr. King," he said, "helped us to see that there is much more to our work than preaching and praying."

His success has brought him to a new challenge in his ministry. He is at the helm of a growing, vibrant institution in the midst of a neighborhood of poverty, drug abuse and street crime. Against the tide, the church has prospered both in numbers and income; each month's expenditures exceed $25,000, and its buildings are fully paid for.

He is increasingly regarded as a leader on a broader scale. One sign is his enlarged role in the East Brooklyn Churches, a coalition of 29 churches organized by the Industrial Areas Foundation, a group formed by the late social activist Saul Alinsky. Recently, 425 people from the churches met at St.

Paul's and the host pastor gave the keynote address.

"It provides the tools to implement Christian theory," Mr. Youngblood said of the coalition. "We talk about love, power and Christian confrontation."

"He is a key pastor," said Mike Gecan, the professional staff member for the organization. "The church's long-term survival depends on what happens to the neighborhood. There are many churches in Brooklyn sitting in the midst of devastation."

"We came into the community to help," Mr. Youngblood remarked during a stroll through a building that the church is renovating as its junior high school. "We are right at home in the graveyard."

He foresees the school as a place where Christian values can permeate a sound educational program, where children will be subject to discipline and inculcated with manners. Mr. Youngblood, who holds an undergraduate degree from Dillard University in New Orleans and a Master of Divinity degree from Colgate Rochester Divinity School in Rochester, places great emphasis on education as a chief means to combat poverty.

Each September, at the start of the school year, he takes time during the services to underscore the benefits of schooling. Youngsters are encouraged to bring their report cards to church after each grading period. The minister reads grades aloud and, he noted with delight, "I'm even getting some of the bad ones now."

The church also has its own scholarship fund, which a growing number of members are using to help finance college education.

Recognition is a staple of life in the congregation. The church is a place to be somebody, a haven of dignity where to be a deacon or deaconess is a position of honor. Mr. Youngblood presides over the creation of a community of people who he believes can be helped to feel worthy and important in the midst of everyday stresses.

He acknowledges the academic achievers, and in the next breath speaks in the language of less-educated people, sprinkling his messages with the "y'alls" and "ain'ts" of street talk. "The trick," he said, "is to push education without saying that God only likes folks who have one."

Mr. Youngblood said he believed he must guard against complacency and egotism after having done so much, so soon. "If I have the power people say I have," he said, "then I don't want to know about it."

He believes that dark days are ahead, particularly for poor people. "My first responsibility to people is to let them know someone genuinely cares for them," he said ruefully, "and then to be willing to create alternative ways of helping."

"Washington will hear from the black church," he said. "We've got to teach and preach something in the meantime. It's not the first time we've been under this kind of a regime. We know how to survive in a storm."●

## MARKED MEN

### HON. DON YOUNG

OF ALASKA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 22, 1981*

● Mr. YOUNG of Alaska. Mr. Speaker, ever since he took office, Secretary of the Interior Watt has been the victim of hysterical and unjustified criticism from special interest groups. The critics have accused the Secretary of all sorts of diabolical crimes against the environment without showing any evidence of the supposed destruction.

However, the time may be at hand when many "environmentalists" are willing to step back from their nonstop rhetoric and examine the facts. I do not believe that anyone would mistake the New Republic for a conservative, prodevelopment publication. Yet, its publisher's comments on Mr. Watt's performance stand in stark contrast to the vast majority of ranting about the Secretary, as evidenced in the following column from the September 9, 1981, issue of the New Republic. I would urge some of my colleagues who have themselves been involved in the rhetoric to investigate Mr. Peretz' remarks for a more balanced view of Mr. Watt from a well-known liberal individual's views.

The column follows:

MARKED MEN

Even though Secretary of the Interior James Watt believes the end of the world is near he moved last week to guarantee that the extinction of the humpback whale does not happen first. This has won Watt the favor of environmentalists, something he has not had before. Many of these same folk were pleasantly surprised to note that he'd also come down hard on the commercial water users of the Wetlands Water District in California, insisting that they at least pay the costs of what they use. This is something they don't want to do, and have taken Watt to court in order not to. The Environmental Defense Fund has entered the case on his behalf. In many other places, however, the fund is plaintiff against the secretary—in one instance representing 12 grizzlies whom his policies are alleged to endanger. I'm just back from a riding and rafting expedition in Wyoming, the fifth-largest state, with a population that barely entitles it to its single seat in the House of Representatives; and it wasn't until this trip that I fully understood the incredulity a Dutch journalist friend recently expresses at the common worry of liberals that the U.S. is being used up. And he'd only traveled through the south Atlantic states. What would he think of this hysteria about the exhaustion of unspoiled America if he'd seen the empty vastness of Wyoming or Idaho or Montana or Arizona, or, for that matter, upstate New York? In six days and 60 miles of far and wide as the eye can wander we saw two backpackers, one herd of sheep, and one shepherd. No more than others do I want the physical patrimony of America despoiled. But there are difficult trade-offs between benefit and beauty, need and nature. Some of the more strenuous partisans of the pristine come from the places like Los Angeles and Washington, and, indeed, it is nice to have huge stretches of the country preserved pure for the ten days every two or three years one likes to play Lewis and Clark. But this can mean hardship and restrictions on the locals. Watt has tried to address some grievances of these people. He is also and most controversially in favor of the exploitation of oil and minerals in selected wilderness areas. Rigs in the Badger National Park won't look pretty, but no one contemplates more than a few. Moreover, it may be that, as with other instances of abundance, we'd care more for our wilderness if we had less.●

## ON SOLIDARITY DAY

### HON. JOHN LeBOUTILLIER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 22, 1981*

● Mr. LeBOUTILLIER. Mr. Speaker, on Saturday, thousands of laborers convened in Washington for a day of protests and speeches against the latest attempts to roll back bloated Federal budgets. Their convocation was a worthy exercise in participatory democracy, but it was led by leaders who presume to understand what the working citizen of America is concerned about.

I suggest that this is not true.

Every year, the percentage of laborers who belong to a union declines. Between 1978 and 1980, union membership dropped by 652,000. Compared to the total U.S. labor force of 106.8 million, union membership constitutes only 20.8 percent of the work force.

It should also be pointed out that the two biggest unions promoting Saturday's solidarity day activities, the Machinists and Aerospace Workers and the United Auto Workers, suffered the greatest membership declines. The Machinists lost 19.1 percent of their membership, while the UAW declined by 9.5 percent in 2 years. All of this, by the way, happened before Ronald Reagan had even been sworn in as President.

One must wonder. If union leadership were doing such a great job of providing for their members, why have so many union members chosen to leave?

Additionally, as any good political scientist can tell you, the percentage of rank-and-file union members who vote for the candidates endorsed by their centralized leaders is declining.

All of which leads one to solidly suspect that the union membership is not being very adequately represented by their leadership.

Organized labor serves a definite and constructive purpose through the many functions it performs. Unionism is one of the most sacrosanct ways that people can assure themselves of human and political rights. Unfortunately, American union leadership acts as a lobby group without the ideological support of its contributing constituents.

No one seems to know, or at least no one seems to want to state for the record, how much money was spent by the AFL-CIO on Saturday. We do know, however, that all of the hundreds of thousands of dollars were financed through the mandatory contributions of the average union member,

who wishes only to provide a living for his family and to see himself prosper and advance.

These are the same union members who, in a poll financed by the Committee on Political Education (COPE), declared a 65-percent preference for a constitutional amendment to balance the budget. By a 3-to-1 margin, these workers blamed Government for the economy's malaise. Even Lane Kirkland, the most stalwart old-line liberal in the labor movement, concedes that he received a great deal of mail from members who said that they supported President Reagan last November.

If the AFL-CIO wishes to lobby, why do they not lobby in favor of a balanced budget amendment, which is what their own membership desires?

And now, in Saturday's Washington Post, we find that union leadership is once again thumbing their collective noses at the union member.

The unions in America are expected to contribute $1 million to the Democratic National Committee's annual budget this year. Thus far, the drive has produced $445,000 in contributions and commitments, and no one seems to have any doubt that the $1 million goal will be achieved.

Each union president is expected to kick in $15,000 in "hard money" and $100,000 in "soft" money to the DNC. "Hard" money is defined as money which can be utilized for Federal candidates, while "soft" money is defined as that used for operating expenses, voter registration drives, and other activities not aimed specifically at the election of a particular candidate. It is thoroughly legal under Federal election law.

But one has to wonder what the average laborer thinks of it all, and whether this is the way he really wants to see his money spent. After all, this $1 million will be financed through the mandatory "contributions" of union members—Republican and Democrat alike.

Mr. Speaker, I have met a great many working men and women, members of unions. They are good and decent people. Some are conservative and some are liberal. Some are Democrats and some are Republicans.

The point is that organized labor is not one homogeneous group, monolithically dedicated to opposing President Reagan's economic recovery program. Only the leadership is, but the rank and file is forced to contribute to these activities.

Mr. Speaker, we appreciate the concerns of the working men and women of this country. They are tired of enduring a sluggish economy, persistent inflation and high interest rates. They want only to achieve that most common of American dreams—to leave their children more than they themselves started out in life with.

The economic factors we face are consequences of 40 years of untarnished and unchecked Government growth.

Despite the fact that Ronald Reagan has been in office for less than 10 months; despite the fact that his economic program does not even begin until next month, we are asked to believe that he is the one who shoulders the blame for this economic morass.

Those who organized Saturday's solidarity demonstration must believe the American people to be fools. A truly cognizant union leadership marches with its membership, not against it.

America's labor force is unrepresented by those who organized Saturday's demonstration, and they are solid in their determination to see President Reagan's economic recovery program succeed.●

## CONGRESSMAN LABELS EASTERN SHORE MIGRANT CAMPS "TRAVESTY"

### HON. WALTER E. FAUNTROY

OF THE DISTRICT OF COLUMBIA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 22, 1981*

● Mr. FAUNTROY. Mr. Speaker, on Saturday, September 19, 1981, the Subcommittee on Housing and Community Development, chaired by our very able colleague and my close friend, HENRY GONZALEZ, held a series of field hearings and tours of migrant farmworker camps that are located within a few hours of this Capitol Building.

What they found is appalling beyond belief in this day and age. Unheated corrugated metal barracks supplied with water labeled as unsafe for drinking because it was nitrate-poisoned, and communal kitchens that featured stopped up sinks and squadrons of buzzing flies surely deserve to be labeled a "travesty," as indeed they were by Congressman GONZALEZ.

These conditions are only slightly short of slavery. I commend Congressman GONZALEZ for leading us to this blot on the American way of life. I commend him for the rightness and justice of his efforts to end such misery. I also commend him for the personal risk that I believe he and the staff of the subcommittee undertook in uncovering for all Americans this "travesty."

Ward Sinclair of the Washington Post has written an article about what Congressman GONZALEZ saw. The words themselves are vivid and convey a most disgusting and abominable situation that we must correct. They merely scratch the surface for as terrible as the events conveyed by this story might be, the stark reality is that he could have told more. He has spared our sensitivities but he has not spared us the intellectual terror that we must all experience in knowing that camps like these still exist to prey upon the poor, the downtrodden, the weak and the newcomer to our shores. Those who have fled terror elsewhere should not, in this land of freedom and liberty, hope and justice, be forced to endure such degradation and inhumanities.

I have attached the story Ward Sinclair has written. I urge each Member to read and reflect upon it.

EASTERN SHORE FARM CAMPS DISTURB TEXAS CONGRESSMAN

(By Ward Sinclair)

WESTOVER, MD.—Representative Henry B. Gonzalez (D-Tex.) was disturbed by the condemned water, the ramshackle housing, the lack of cooking and sanitary facilities he'd been seeing all day, but it took the case of the Catholic nun to tell the whole story.

As Gonzalez toured the controversial Westover migrant farm worker camp in Somerset County as part of a day-long investigative tour of farm labor housing on the Delmarva Peninsula, Sister Jane Houtman was outside looking in—labeled an "agitator" by the camp's owners and blocked from entering.

The Texas congressman came to the Eastern Shore of Maryland and Virginia Saturday on the first leg of what he intends to be a full-scale national study aimed at pushing farmers and the federal government toward quick improvement in housing for migrant farm laborers.

The incident involving Sister Jane, a nurse to migrants on the shore for seven years who has been critical of the growers, capsulized what Gonzalez heard all day long from workers and others—that housing problems are only one facet of a constant grappling between labor and management, a constant clashing of wills over what is right for the migrants.

Sister Jane and other nurses from the Daughters of the Holy Spirit have wrangled with farmers for months over conditions in the camp. Finally, the 12 owners of Westover decided that she and the other nurses will not be allowed on the camp next season because of their "agitation" among migrants.

For all that, there was at least one new development. Gonzalez and staffers from the House Banking, Finance and Urban Affairs Committee heard farmers on the Delmarva Peninsula, where more than 6,000 migrants worked in vegetable fields this summer, admit for the first time that the housing they provide is inadequate.

The Somerset farmers and Philip McCaleb, a Belle Haven, Va., grower and chairman of the Virginia Migrant and Seasonal Farm Worker Commission, conceded they have problems, but urged Gonzalez and his housing and community development subcommittee to ease their quandary over federal regulations.

"Housing is a major problem," said McCaleb, "and it contributes as much as anything to other problems, such as health . . . Farmers don't pay enough attention to housing. They don't see housing as a productive investment."

He and Somerset farmers Edwin Long and Dennett Butler complained—and Gonzalez readily agreed—that requirements of the Farmers Home Administration are so complex and unrealistic that few farmers are

willing to take advantage of the long-term loans available at 1 per cent interest for migrant housing.

But they hardly needed to concede there was a problem, after what Gonzalez had found in his day of visiting labor camps and taking testimony at a hearing in Melfa, Va. At one point, after visiting Haitian refugees in a desolate Maryland camp, the congressman shook his head and lamented "the unbelievable travesty."

That was at the Wanex and Groton camp near Hurlock, in Dorchester County. A typewritten notice, taped to a wall by the county health department, warned in three languages that under no condition should babies drink the nitrate-poisoned water. All water used for drinking must be boiled. Clean bottled water is available to workers willing to pay, the notice said.

At the John N. Wright Jr. Canning Co. labor camp at Federalsburg, Md., a crew of Mexican-American cucumber harvesters told Gonzalez that the early fall coolness has made living difficult in their unheated corrugated metal barracks. The congressman was visibly touched after a woman from Texas recognized him and pleaded for help.

"God is watching you," she told him in Spanish as her six young children milled about. She complained about heat in the summer, cold in the fall and no sunlight in the one-story metal buildings. "You need to do something," she said. "People want to work, but they need help—these conditions are not good."

At the nearby Washington Cemetery Road camp, Haitians played a spirited game of dominoes in the yard as fellow workers crowded around. Women were cooking beans and hot chocolate in an open-air communal kitchen, featuring a stopped-up sink and squadrons of buzzing flies.

At Westover, Gonzalez and aides negotiated with camp manager Bill Webster for more than 30 minutes before being allowed to see some of the two dozen buildings, once part of a holding pen for German prisoners during World War II.

At the Farmex camp at Tasley, Va., he found more of the same—workers and children huddling in unheated, unlighted rooms; pools of water dotting the common yard; filthy latrines and rustic cooking facilities.

At Melfa, Gonzalez took testimony from farmers, from workers representing Mexican-American, Haitian and American black migrants, a Catholic priest, and nurses from the Delmarva Rural Ministries, who provide health care for migrant and seasonal workers on the peninsula.

Sister Jane and Linda K. Miller, nursing coordinator for the ministries, stressed that it is impossible to separate housing from overall migrant problems of health and safety. "As much as 30 percent of our nursing encounters document illness and trauma that are directly related to camp conditions," Miller said.

The nun, however, laid it on the line. As overwhelming as the problems seem, Sister Jane said, "people tolerate their situation because they want to work." She said better housing would quickly alleviate some other migrant woes.

But, she added, the problem of caring for the migrant is everyone's and "basic attitudes" won't change until people begin to speak out. For her part, the nun said, "I cannot remain silent." The audience, including grower McCaleb, broke into applause.●

## FEDERAL HEALTH PLANNING SYSTEM

### HON. RICHARD C. SHELBY

OF ALABAMA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 22, 1981*

● Mr. SHELBY. Mr. Speaker, I, along with several of my colleagues, have introduced a bill today that would bring an end to the Federal role in health planning. The bill would repeal titles XV and XVI of the Public Health Service Act effective September 30, 1982.

As a member of the Energy and Commerce Health Subcommittee with jurisdiction over the Federal health planning program, I have had the opportunity to study it carefully, and I have been disturbed at what I have found. The 7 years that have passed since the creation of the program in Public Law 93-641 have made it clear that the program has failed, and the law should be repealed. The result of the law has not been planning, but regulation. The predominant activity is the certificate-of-need process, which is not a planning tool, but a means to control the health care system.

The 93d Congress envisioned a community based planning system with decisionmaking and control at the local and State level. Instead, the current system is dominated by the Federal Government. Federal funds finance the program. Federal regulations and standards control every aspect of the State and local agencies' activities. All decisions are ultimately made by the Federal Government. This is national, not local, planning, and regulation. The State and local agencies exist only to carry out Federal mandates.

The focus in health planning has been cost containment, but there is no reliable evidence to show that any money has been saved. In fact, other studies indicate that the CON process actually increases health care costs. One study found that, over a 2-year period, delays in the CON process added $25 million to the cost of projects under review. Another study showed that applying for a CON was also expensive, and added ultimately to the cost of the project.

Cost problems are further aggravated because health planning is anticompetitive. Its emphasis is on constricting the health care system, not expanding the number of participants. In effect, it is a franchising system that favors and protects existing entities by making it difficult for new providers to enter the market.

The law sets out goals of improving the accessibility and availability of health care; however, the current system has failed in this also. The emphasis has been entirely on reducing the number of beds, services, and hospitals. Cutting back resources does not improve accessibility and availability.

Another reason for the failure of the system is that it has tried to provide a single Federal solution to diverse health care needs and problems. In a State like Alabama, the health problems of a large city are very different from those of a rural area. Only a flexible, community based planning program, the antithesis of Public Law 93-641, could accommodate these legitimate differences.

Finally, health planning has been an expensive program. In the first 6 years of its existence from 1975 up through 1980, the program cost the taxpayers almost $729 million, including $157.7 million in 1980 alone. And this does not include the hidden cost of higher insurance and medical bills caused when providers have to recoup the dollars the CON program has cost them.

Apparently a majority of our colleagues both in the House and Senate agree that, at a minimum, curbs must be placed on this program. Provisions of the recently enacted Omnibus Budget Reconciliation Act reflect a loss of faith in the ability of the health planning system to achieve the goals Congress had in mind when the program was created. However, although I am pleased that role of Federal health planning has been somewhat circumscribed, I see no justification in retaining the program even at a reduced level.

For the general reasons I stated earlier, along with several stories related to me concerning specific incidents of bureaucratic bungling, I believe repeal of this program must be pursued. We know it is not working, so why prolong the agony?●

## MICHAEL V. DISALLE

### HON. ED WEBER

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 22, 1981*

● Mr. WEBER of Ohio. Mr. Speaker, on September 15, our Nation lost one of its most devoted public servants, Michael Vincent DiSalle.

From his humble birth, the son of immigrant parents, "Mike"—as he was always known—grew up to be the only Toledoan ever to be elected Governor of the State of Ohio.

My first and most lasting recollection of Mike DiSalle comes from a time when he was mayor of the city of Toledo. As part of my high school civics course, I attended a meeting of the city council at which he presided. I can recall the polite, good humored, yet forceful way in which he managed that meeting.

In addition, to his years of service to the people of Toledo and later the

State of Ohio, Mike DiSalle also served the Nation as Director of the Office of Price Stabilization during the administration of President Harry Truman. He earned the respect of all those who knew him.

Mr. Speaker, as Representative of the Ninth Congressional District, and on behalf of my constituents, I join the numerous personal and political friends of Michael Vincent DiSalle in this recognition of his public service and express our sympathy to Mrs. DiSalle and the members of his family.●

## RESOLUTION OF THE BOARD OF SUPERVISORS OF THE COUNTY OF SACRAMENTO RELATIVE TO H.R. 3215

### HON. VIC FAZIO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 22, 1981*

● Mr. FAZIO. Mr. Speaker, in April of this year I introduced H.R. 3215, a bill to amend the Internal Revenue Code of 1954 to permit the 10-year averaging of lump-sum distributions from deferred compensation plans of State and local governments. The need for this legislation was first brought to my attention by Mr. Abe Goldman of Sacramento, Calif. At this time, I would like to draw the attention of my colleagues to a resolution adopted by the Board of Supervisors of the county of Sacramento in support of this measure.

The resolution follows:

RESOLUTION 81-937

WHEREAS Congressman Vic Fazio has introduced into the Congress H.R. 3215 to amend the Internal Revenue Code of 1954 to permit the ten-year averaging of lump-sum distribution plans of State and local governments; and

WHEREAS the bill applies to those deferred compensation plans established under section 457, Internal Revenue Code; and

WHEREAS such plans are available to State and local governmental employees throughout the country; and

WHEREAS because section 457 plans are not classified as "trusts" in the legal sense, members currently are denied the use of ten-year averaging for lump-sum distribution; and

WHEREAS the use of ten-year averaging is available to private sector qualified pension, profit-sharing, or stock bonus plans; and

WHEREAS this proposal simply seeks to equalize the treatment for public sector plans to use ten-year averaging in an identical manner to private sector plans: Now, therefore, be it

*Resolved,* That the Board of Supervisors is in support of this legislation; be it further

*Resolved and ordered,* That the Clerk of the Board of Supervisors tramsmit a suitably prepared copy of this resolution to Congressman Fazio and members of the Congressional delegation representing Sacramento County.

On a motion by Supervisor Bryan, seconded by Supervisor Johnson, the foregoing resolution was passed and adopted by the BOARD OF SUPERVISORS of the County of Sacramento, State of California, this 11th day of August, 1981.●

## ARIZONA LEGISLATURE URGES COMPLETION OF CAP

### HON. ELDON RUDD

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 22, 1981*

● Mr. RUDD. Mr. Speaker, I am pleased to submit to the House a recently approved memorial by the Arizona State Legislature urging the commitment of the Secretary of the Interior to the completion of the central Arizona project.

Last week I had the pleasure of meeting with Secretary Watt in Arizona to discuss the future of this vital program. During 3 days of discussions and hearings, the Secretary continually expressed his support for both the Tucson Aqueduct and the completion of CAP. I hope that the Congress will show the same interest and concern for the long-term objectives of our growing State.

THE SECRETARY OF STATE,
PHOENIX, ARIZ.,
*September 16, 1981.*

HON. ELDON RUDD
U.S. REPRESENTATIVE IN CONGRESS,
STATE OF ARIZONA,
WASHINGTON, D.C.

DEAR ELDON: The Arizona State Thirty-fifth Legislature, First Special Session, 1981, unanimously adopted House Concurrent Memorial 2001, urging the Secretary of the Interior to support the Central Arizona Project and approve and expedite the construction of the Tucson Aqueduct.

The members of the Arizona State Legislature have asked me to transmit the enclosed copy of this Memorial to you for your consideration.

Sincerely,

ROSE MOFFORD,
*Secretary of State.*

Enclosure.

STATE OF ARIZONA,
DEPARTMENT OF STATE.

I, Rose Mofford, Secretary of State, State of Arizona, do hereby certify that the annexed document is a true, correct, and complete copy of House Concurrent Memorial 2001, Arizona State Legislature, Thirty-fifth Legislature, First Special Session, 1981, urging the Secretary of the Interior to support the Central Arizona project and approve and expedite the construction of the Tucson Aqueduct; that I am the official of the State of Arizona in custody and control of the original of said document and the legal keeper thereof.

In witness whereof, I have hereunto set my hand and affixed the great seal of the State of Arizona. Done at Phoenix, the Capital, this 16th day of September, 1981.

ROSE MOFFORD,
*Secretary of State.*

HOUSE CONCURRENT MEMORIAL 2001

A CONCURRENT MEMORIAL URGING THE SECRETARY OF THE INTERIOR TO SUPPORT THE CENTRAL ARIZONA PROJECT AND APPROVE AND EXPEDITE THE CONSTRUCTION OF THE TUCSON AQUEDUCT

To the Secretary of the Interior of the United States, the Honorable James Watt:

Your memorialist respectfully represents:

Whereas, it is of the greatest importance to the citizens of the State of Arizona that the Central Arizona Project be completed with as few delays as possible; and

Whereas, the resolution of the groundwater overdraft problem in southern Arizona depends to a significant extent upon the provision of Central Arizona Project water to the area; and

Whereas, this delivery of water cannot occur until the Tucson Aqueduct phase has been completed; and

Whereas, it is therefore essential that construction of the facilities needed to bring Central Arizona Project water to the Tucson metropolitan area be completed as soon as possible; and

Whereas, completion of the facilities needed to bring Central Arizona Project water to the Tucson metropolitan area cannot be accomplished until the size and the location of the terminus of the Tucson Aqueduct have been determined; and

Whereas, completion of the Tucson Aqueduct is contingent upon continued federal funding of the Central Arizona Project. Wherefore, your memorialist, the House of Representatives of the State of Arizona, the Senate concurring, prays:

1. That the Secretary of the Interior of the United States continue his support of the Central Arizona Project.

2. That he direct the United States Bureau of Reclamation to determine the size and the location of the terminus of the Tucson Aqueduct.

3. That construction of the Tucson Aqueduct be completed at the earliest possible time.

4. That the Secretary of State of the State of Arizona transmit a copy of this Memorial to the Secretary of the Interior of the United States and to each Member of the Arizona Congressional Delegation.

Unanimously adopted by the house September 3, 1981.

Unanimously adopted by the senate September 4, 1981.

Filed in the Office of the Secretary of State September 4, 1981.●

## MRS. ERMA SHEARER, DEDICATED PUBLIC SERVANT

### HON. GUS YATRON

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 22, 1981*

● Mr. YATRON. Mr. Speaker, I wish to take this opportunity to share with my colleagues the occasion of a milestone which I believe to be of significance. I refer to the 50th anniversary in public service of my constituent, Erma Shearer.

Mrs. Shearer began her service as an employee of Berks County, Pa., in May 1930. Discounting a short period during a maternity leave, she has continuously served the people of Berks

County, and served them exceedingly well, since that date. September 30, 1981, will mark Mrs. Shearer's golden anniversary of service to the county and I am sure the Members of the House will want to join with me in noting this achievement and in both congratulating and commending Mrs. Shearer.

We live in a era when public service is often deprecated. However, Mrs. Shearer's career is testimony to the fact that there are many fine, conscientious men and women whose lives are dedicated to improving the welfare of our society and the operations of our governments. Mrs. Shearer's record is unprecedented in the history of Berks County, Pa., and perhaps, in that of the Nation.

I hope the Members of the House will join with me in saluting Mrs. Erma Shearer not only on her longevity as a public servant but also on a job well done. It seems to me that Mrs. Shearer's career should serve as an example for all of us in public service. I commend her on her devotion to the public welfare and extend to her congratulations and all good wishes.●

## FOOD PROGRAM'S ADVOCATES FEAR CUTBACKS WILL WIPE OUT GAINS IN NUTRITION

### HON. FREDERICK W. RICHMOND

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 22, 1981*

● Mr. RICHMOND. Mr. Speaker, much of the gains in the Nation's fight against hunger and malnutrition, which was uncovered in shocking amounts during the late 1960's, may soon be lost. It is unfortunate with the new wave of fiscal austerity and regulatory reform that many Americans, especially young children from poor families will be shortchanged. The long-term health consequences of shortchanging Americans on nutrition will no doubt show up in increased health care costs years later.

The demise of the food assistance programs in the United States may be rooted in the misperceptions harbored by many people in this country. Critics of these programs cite the fraud and abuse as justification for reducing Federal funding in this area. In the past few years, Congress has made significant progress in reducing the waste, fraud, and abuse in the food stamp program. This effort to root out any real fraud or perception that fraud may be occurring will continue. At the same time, Congress must not jeopardize the health of Americans who must depend on Federal assistance for their very survival for what can only be short-term savings.

I share with my colleagues this critical review of the food programs in the United States by Gregory Jaynes.

The article follows:

[The New York Times, Sept. 18, 1981]

FOOD PROGRAM'S ADVOCATES FEAR CUTBACKS WILL WIPE OUT GAINS IN NUTRITION

(By Gregory Jaynes)

ATLANTA.—In 1967, six pediatricians were dispatched to the South on a search for hunger, and they found it in appalling quantity. Ten years later a second medical team came here for a look and concluded that although the diet of America's poor would still displease nutritionists, there was food in the icebox. The doctors agreed that in the decade that had passed, the corner would not have been turned without huge increases in the budget for Federal food aid programs.

Since 1967, the budget for such programs has risen about 3,000 percent, from $585.5 million to about $16 billion. However, in the fiscal year that begins Oct. 1, the programs will be cut by $3 billion, a move that would, among other things, disqualify one million of the 23 million Americans now receiving food stamps and reduce the amount of food stamps for the remaining recipients by about 10 percent.

The cuts were proposed by President Reagan and approved by Congress as part of their effort to hold down Federal spending with an eye to improving the national economy and, by extension, the lot of all Americans. But critics contend that the result will be increased hunger and malnutrition.

FRUSTRATION AND FURY

"We are frustrated, furious, frantic, disbelieving that people would cut back on these programs," said Nancy Amidei, director of the Food Research and Action Center, a law firm and advocacy center in Washington that specializes in Federal food programs. "God knows there are a lot of people who still go without food, who still go hungry, but God knows it's a whole lot better than it was 13 years ago."

Just how much better has not been solidly documented, however. In 1969 the Harvard University psychiatrist Robert Coles could write a book called "Still Hungry in America," published on the heels of an extensive national survey on nutrition, but today no comprehensive picture of the state of America's bellies exists. Advocates of food programs say the United States Government, which at present has an overseas food aid program that amounts to $1.6 billion, knows more about hunger in the Third World than it knows about empty iceboxes here.

For its part, the Reagan Administration says "safety nets" built into the systems will catch acute needs for food and other social services. Administration officials argue that families who will lose their food stamps altogether earn as much as $14,000 a year and are well able to get by without Government help, and that those who will have their benefits reduced will still receive enough assistance so that they will not go hungry.

Since there has been no systematic examination in recent years of hunger in America and the ability of Federal programs to relieve the problem, the effect of the budget cuts cannot be known until after they take effect.

Widescale hunger, apparently, was of little concern to any administration until the beginning of World War II, when thousands of young men too malnourished to be drafted came under the stethoscopes of military service physicians. A committee on nutrition for national defense was established. Nutritional standards were worked out, and for a short while there was a fledgling and not all that successful food stamp program. In 1946, a school lunch act was passed as a measure of national security.

Over the years, the Agriculture Department had a commodities program that relied on national surpluses and county bureaucrats to get food to the poor. Sometimes it worked, and sometimes it did not. Its effectiveness was never extensively measured. But all the while, the authority to do something about hunger and malnutrition in America lay on the books, as a measure of national security, and it was this authority that President Kennedy, after having seen the distended bellies of West Virginia while campaigning in 1960, seized to set up the food stamp program in 1961. It was 1967, however, before the issue touched a national nerve.

That was when the Field Foundation, a nonprofit research organization based in New York, sent the first team of pediatricians here. The doctors examined several thousand children across the South.

"Wherever we went and wherever we looked," they reported back to Congress, "we saw children in significant numbers who were hungry and sick, children for whom hunger is a daily fact of life, and sickness in many forms, an inevitability. The children we saw were more than just malnourished. They were hungry, weak, apathetic.

FINDINGS ON NUTRITION

That Congressional testimony led to the establishment of the Senate Select Committee on Nutrition and Human Needs. Its mandate was to determine the amount of hunger and malnutrition in the United States. In 1968, the most extensive survey this country has ever conducted on nutrition was begun by the Department of Health, Education and Welfare. About 47,000 people were examined. The findings, along with some independent surveys of the time, were that millions—some estimates went as high as 35 million—of Americans suffered from serious vitamin deficiencies.

Some researchers read the data and determined that as many as 10 million Americans were hungry, and others said the estimate was high. The only thing everyone agreed upon was that malnutrition and little or no income were related. Every year thereafter substantially more funds were found to feed and shore up the incomes of the poor, and country and western singers began warbling about people on welfare driving Cadillacs.

When the Field Foundation sent its second medical team here for a survey in 1977, along with teams to Appalachian Kentucky, the Bronx, Mexican-American ghettos of Texas, migrant work camps in Central Florida and coastal South Carolina the overall conclusion was encouraging.

"Our first and overwhelming impression is that there are far fewer grossly malnourished people in this country today than there were 10 years ago," the teams reported. "Malnutrition has become a subtler problem. In the Mississippi Delta, in the coal fields of Appalachia and in coastal South Carolina, where visitors 10 years ago could quickly see large numbes of stunted, apathetic children with swollen stomachs and the dull eyes and poorly healing wounds characteristic of malnutrition, such children are not now to be seen in such numbers. Even in areas which did not command national attention 10 years ago, many poor people now have food and look better off."

"In fact, the facts of life for Americans living in poverty remain as dark or darker than they were 10 years ago. But in the area of food there is a difference. The food stamp program, the nutritional component of Head Start, school lunch and breakfast programs, and, to a lesser extent, the women-infant-children feeding programs, have made the difference."

A CRITICAL IMPERATIVE

In 1979, the foundation said, "While only the barest subsistence needs are being met by Federal food programs, those programs are proving a critical imperative to the nation's health." The organization also lamented that "the nation continues to be plagued with a lack of sophisticated data about its nutritional well-being." According to health officials in Washington, there has not been another Federal survey the scope of the one conducted in the late 1960's because of the enormous cost, and because there has not been enough political or popular pressure to justify mounting another one.

Food program advocacy groups these days monitor two continuing studies, one by the national Center for Disease Control here and the other by the National Center for Health Statistics in Washington, both of which in the last decade have indicated continuing improvement in nutrition across the country.

The Atlanta center says its studies lately have caused more concern for anemia and obesity than for hunger.

MORE FOUND OVERWEIGHT

In the second quarter of 1980, the period for which the most recent statistics are available, the center determined that of 58,000 records from public clinics in 25 states, 14.8 percent of people of all ages had symptoms of anemia, and that of 61,000 records from the same sources, 3.4 percent of the people were significantly underweight, and 9.7 percent were significantly overweight. Since the records come from public clinics, most of the patients examined tend to be from low-income families.

The surveys by the National Center for Health Statistics, which do not deal specifically with the poor, have, according to Director Robert Murphy, "found virtually no one with classical signs of starvation." Results from the center's 1980 survey will not be available until later this year, but he said there was some indication that the population was becoming more anemic.

Elsewhere, independent researchers report that while cases of starvation are isolated and rare, households where the head of the family is poor and poorly educated are where much of the anemia, obesity and vitamin deficiency occur in the United States.

AREAS WITH WORST DIETS

Some of the worst diets in the nation, according to researchers, exist in the American Indian populations of the South and the Southwest, the migrant labor camps of central Florida and rural black communities from Texas across the Southeast to the Atlantic.

Nonetheless, in interviews here and elsewhere in the country, social workers and advocates of food programs said that bad diets were better than none, and they expressed bitterness about a national conservatism that would move against the impoverished.

Here in Atlanta, the executive director of the Georgia Coalition Against Hunger, Sandra Robertson, said, "In a sorry economy, people need to blame somebody, and what this Administration did was clearly see that poor people are the problem."

In Georgia, Mrs. Robertson said, 25,000 recipients will be "knocked off food stamps immediately," and 30,000 recipients of Aid to Families with Dependent Children will come off the rolls Oct 1. "Another 10,000 will get drastically reduced benefits," she said.

"Malnutrition and hunger still affects a lot of people and a lot of families," Steve Suitts, director of the Southern Regional Council, an organization with deep roots in the civil rights movement, was saying in his Atlanta office the other day. "But it just doesn't grip the national conscience anymore.

"South of this town, south of Montgomery, you see and hear people who'll tell you when they last ate and they'll show you there's not much in the pie safe. We just gave the folks the proverbial half a loaf."

Mr. Suitts said he felt that "we saved some lives with the infant feeding programs; we gave some hope with school lunches." He added, "But we didn't have the national resolve to keep it up. I don't think I'm exaggerating too much to think we've abandoned it in the name of the national good. I read they're going to cut another $40-to-$60-billion, and it doesn't take Solomon's wisdom to figure out where they'll start."

A DIFFERENT VIEW

Critics of this country's welfare system in general, and the food stamp program in particular, take a view far different from Mr. Suitts'.

The most prominent, Ronald Reagan, said earlier this year that the program was begun to "insure adequate nutrition for America's needy families" and that it went on to function as "a generalized income transfer program" unrelated to nutritional needs.

Less prominent critics argue, with reason, that the program has been a breeding ground for fraud and abuse, and polls earlier this year showed that food stamps were rated the most umpopular welfare program by a wide margin.

But south of Montgomery, just as Mr. Suitts said, there are people who will open their refrigerators and show what little is there to social workers, and who will explain that the refrigerator would contain nothing if not for food stamps. Lowndes County, Alabama, one of the 20 poorest of the 3,142 counties in the country, is just such a place, and Mattie Lee Moorer, a volunteer for Vista, and Sadie Wallace, who lives in a tumbledown shack with five children aged 4 to 19, carried out just such an exercise the other day.

A BARE KITCHEN

Mrs. Wallace, who receives $225 in food stamps each month, feeds her family on that, and on what she can grow, and on what her neighbors give her. Mrs. Moorer happened to visit toward the end of the month, four days before Mrs. Wallace's food stamps were due, and so the kitchen was pretty bare. Mrs. Moorer found two pounds of bologna, about two pounds of frozen peas, half a loaf of bread, two packs of Kool-Aid and about two cups of sugar.

Both women seemed to think that what Mrs. Wallace had on hand, plus a little bit of credit down at the country grocery, would feed a family of six over the next four days. Mrs. Moorer told Mrs. Wallace that harder times were coming, though, and told her to plant her fall garden early.

"You can get your turnips, your collard greens and your snap beans in," said Mrs. Moorer, "and that's things you won't have to buy. A lot of things we ain't been doing, we better start to do. I see more bad diets coming. I see folk not able to get the foods they should eat. One or two foods ain't enough. But one or two might be all, wintertime that is."●

## THE UNITED PRESBYTERIAN CHURCH, U.S.A. RESOLUTION ON THE EMERGING PATTERN OF NATIONAL POLICY

### HON. LOUIS STOKES

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 22, 1981*

● Mr. STOKES. Mr. Speaker, what we have come to call Reaganomics and the impact of the administration's conservatism on the future of our citizens are key conversation topics today in the House of Representatives. As the budget cuts become more of a reality, the President's austere economic plan and new conservative public policy also have become the subjects of increasing concern and action by the poor and working class citizens.

Recently, Rev. Robert I. Miller of the Eliza Bryant Center in Cleveland brought to my attention a resolution drafted by the General Assembly of the United Presbyterian Church, U.S.A. The resolution is characteristic of the kind of comments many of us are hearing increasingly on the President's economic plan.

Mr. Speaker, the United Presbyterian Church, U.S.A. resolution is an accurate barometer of the mood of the poor and working class in this Nation on Reaganomics. Additionally, it analyzes and projects the effects of this administration's policies on the vital needs of this large but seemingly forgotten sector of our population.

This inclusive document touches on such pertinent issues as public lands policies, human services budget cuts, energy, and military escalation. It is my opinion that the voices of the people who are the victims of the budget and the shift in governmental priorities are becoming more audible. We need to listen to them.

At this time, Mr. Speaker, I would like to insert the General Assembly resolution of the United Presbyterian Church, U.S.A. entitled, "The Emerging Pattern of National Policy" in the RECORD.

[From the Presbyterian Layman, June/July 1981]

GENERAL ASSEMBLY RESOLUTION ON "THE EMERGING PATTERN OF NATIONAL POLICY"

The Advisory Council on Church and Society submitted the following resolution on "The Emerging Patterns of National Policy." It was approved by the General Assembly with revisions as recommended by the Assembly Committee on Social Justice and Human Rights of Persons.

Whereas the 192nd General Assembly (1980) expressed its commitment "to the inalienable right of every person of basic access to food and sustaining nutrition" and urged Congress "to maintain at least the existing level of support of the domestic programs in nutrition, housing, education, welfare, social security and employment"; and

Whereas the 191st General Asembly (1979) in its action on "Tax Cutting and U.S. Budget Priorities" urged "the subordination of narrow, short-sighted, self-serving considerations to an insistence upon society's responsibility for conditions whereby such basic needs of all citizens as jobs, housing, education, and health care can be satisfactorily met"; and

Whereas the 191st General Assembly (1979) further urged in budgeting decisions "priority consideration to the employment, health, welfare, education and other needs of the poor, the aged, children and the disabled"; and

Whereas the 188th General Assembly (1976) commended for study, "Economic Justice Within Environmental Limits" and emphasized the importance of church dialogue on economic policies in the United States, with special attention to ethical questions; and

Whereas the changes in national policy proposed by the President and his administration clearly violate the criteria adopted by previous General Assemblies cited above; and

Whereas the Governing Board of the National Council of Churches has prepared and adopted a paper entitled, "The Re-Making of America? A Message to the Churches," which analyzes the reversal of economic policies and the gravity of its implications, therefore, the 193rd General Assembly (1981):

1. Receive and commit for study the Message to the Churches prepared by the Governing Board of the National Council of Churches entitled: "The Re-Making of America?" (appended);

2. Calls upon the Program Agency to make copies of the above Message available to congregations and to provide resources for utilization by congregations in their consideration of various points of view of the significant changes in national policy proposed by the current administration;

3. Requests the Advisory Council on Church and Society and the Program Agency to continue to analyze the development of national policy in the light of concerns expressed by the General Assembly; and to prepare program resources, studies, and policy recommendations as appropriate in order to assist judicatories, churches and church members to understand and respond effectively to the issues of justice in the life of the nation and the world.

THE RE-MAKING OF AMERICA?

A Message To the Churches from the Governing Board of the National Council of the Churches of Christ in the U.S.A.

In thousands of news stories and editorials the public record of the dramatic changes in national policy proposed by President Ronald Reagan and his administration has been written in the past few months. The Governing Board of the National Council of Churches, on the basis of that record, calls to the attention of member communions that these proposals "to get America back on track" represent not merely a shift of emphasis—a little less here or a little more there. They are, rather, a reversal of direction for this country as a whole, and threaten the vision of America as the model and embodiment of a just and humane society.

*I.*

Consider the following evidences of that reversal:

A. The new Administration asks us to annul an understanding of America's government as responsible in a fundamental way "to promote the general welfare."

Since the havoc of the Great Depression, administrations of both parties have recognized an ultimate responsibility in the federal government to promote the conditions in which all members of this society have enough to eat, a decent place to live, a basic education, and the necessities of a minimum standard of living, not as a matter of charity but of entitlement.

That goal has never been attained, but for half a century the nation has been moving toward it—until now. The policy of the new administration is not just to cut back on human services, but to deny that people are entitled to them. By its budget recommendations, which eliminate many human service programs and sharply curtail others, it seeks not to slow the nation's progress toward the goal but to reverse its commitment. When inflation has rendered the current "poverty level" obsolete, to cut back even farther to a so-called "safety net" for the "truly needy" is to abandon the working poor to hopelessness and destitution, particularly in a time of limited economic growth. It is a turn backward from the effort to build an economic floor for the whole society to a former time when America was officially indifferent to the suffering of those whose best efforts were not enough.

B. The new administration asks us to turn back from an understanding of America's public lands as held primarily for public enjoyment.

Since at least the presidency of Theodore Roosevelt, the policy of the nation has been to build and hold a public possession of national parks and forests, of clean air and pure waters, for current enjoyment and as a legacy for future generations. The new administration would turn back from that goal to a bygone era when the continent and its riches were seen as the rightful booty of those who were able to exploit them for their private gain.

Giving away the public inheritance to private entrepreneurs is more than an about-face. It is an offering to "the sheer, naked, untrammeled greed that once made this country great." And no future change of heart can reverse the destruction of this legacy. In a similar approach to the common riches of the sea, the new administration abruptly withdrew from participation in the final consideration of the international Law of the Sea Treaty, seven years in the making, in order "to improve assured access for private industry to mine the deep sea bed"—an access already assured. These examples of administration solicitude for the "truly greedy" stand in stark contrast to its lack of solicitude for the poor, as expressed in the doctrine of "no entitlement to human services."

C. The new administration asks us to slow America's movement toward a safe, efficient and renewable energy future.

Faced with sharply increasing costs and the need to shape an energy future not dependent on oil, the nation has been moving slowly but certainly toward policies and programs to promote conservation, more efficient use of energy, and the development of alternative sources that will be renewable or reliable over a long period. That movement is to be reversed. The new administration's budget virtually eliminates residential weatherization programs and the Solar Energy Conservation Bank, and substantially reduces energy assistance programs for the poor. Energy Secretary Edwards has announced, with regard to fossil fuels, "The voters have sent a clear message to us in Washington: Produce, produce, produce." Pushing aside concern over the possible perils of nuclear energy generation and the problem of nuclear waste disposal, the administration seeks to reduce support for renewable energy technologies and expand support for nuclear energy. Ignoring the specter of excess capacity now clouding the future of the nation's utilities, Secretary Edwards resolutely asserts that "we need to get the nuclear power industry back on track."

D. The new administration asks us to mute America's advocacy for the rights of all human beings everywhere.

Concern for human freedom and inalienable rights has been a constant theme of the United States. Particularly since the organization of the United Nations in 1945, America has been one of the leading exponents of concern for human rights everywhere in the world, even though its own actions were not always what they should have been. The previous administration attempted to make human rights a primary operative foundation of the nation's foreign policy, but now that effort is to be abandoned.

It is not simply that America will relinquish its leadership in championing human rights—imperfect as it may have been. It is not simply that this nation will relax its efforts and subside to a common level of low concern. Rather, in a significant reversal, the new administration asks the nation to lead the retreat from international commitment to the realization and protection of human rights, and to abandon the nations and peoples that have shared America's commitment and hoped in America's constancy.

Among other consequences of this reversal, the United States would shore up repressive regimes around the world by military assistance; recede from arms sanctions against South Africa, and repeal the Clark Amendment banning covert aid to guerrilla forces inside Angola.

The positive concern for human rights has been replaced by a selective preoccupation with "terrorism." When concern about terrorism—admittedly a serious problem—becomes the rationale for supporting repression in other nations, many Americans can only feel anxious about their own nation, remembering the hysteria of the McCarthy era when "national security" was invoked to justify the repression of dissidents in the United States.

E. The new administration asks us to turn from America's search for peace through negotiation in order to seek it through military predominance.

Since the end of World War II and the concurrent beginning of the nuclear age, this nation has attempted to seek and maintain peace through diplomatic rather than military means, through multilateral more than unilateral channels, through negotiation rather than coercion (the exception of Vietnam notwithstanding). It has relied on the concept of "mutual assured destruction" to provide an uneasy umbrella for this fragile enterprise in the world—the assurance that the consequences of nuclear exchange

are too devastatingly costly for any nation to risk it. Now all that is to be reversed. Nuclear superiority and the capacity to project overwhelming military power anywhere in the world are proposed as basic national policies. Resources that previously contributed, however inadequately, to efforts to improve life are now to be diverted to produce more weapons of death, increasing inflation and accelerating the international arms race. The United States and the Soviet Union both have more than enough strategic nuclear warheads to kill the earth's people several times over, yet further weapons escalation is proposed.

Reversing an increasing willingness to see the world in its real diversity and pluralism, the new administration is determined to turn away from the uneasy detente of the past decade and revive the distorted vision of the bi-polar Cold War world, in which all adverse occurrences, at home or abroad, are attributed to the machinations of a single force—Communism. Turning from the growing satisfaction of being one of a world-wide community of nations, this administration proposes to make America "Number One" in the world. Not number one in literacy, life expectancy, or assistance to less developed nations. Not number one in freedom from infant mortality, drug addiction, crime or suicide. But rather number one in military dominance, in the ability to impose our will on others or to kill multitudes in the attempt.

There are real dangers in the world, and the behavior of other nations sometimes threatens peace and justice—witness Afghanistan. Those dangers are not lessened by this nation's turning from the path of patient strength.

*II.*

There have been numerous criticisms of the particular elements in these and other changes of direction proposed by the new administration, pointing out the specific pain and peril each imposes. But the overriding moral and political issue for the nation is not so much in the specific proposals as the pattern that they pose, in the vision of America and its values that lies behind them. Congressman Michel is correct: "The issue is not one of figures but philosophy . . . who we are and where we're going." In the new Administration's philosophy, the nation confronts a cross-roads choice between alternative visions of the meaning and purpose of America.

The alternative vision of who we are as a nation held out by the new Administration has been embedded in a budget, distracting many from its true dimensions. Its sweeping changes are proposed to meet an economic emergency purportedly created by runaway government spending and unbearable tax burdens—in this wealthiest of nations that now collects a smaller portion of its wealth in taxes and spends a smaller percentage of it for public purposes than any European democracy! To remedy this alleged condition, however, the Reagan philosophy requires not a cut in government spending so much as a massive transfer of public money from people assistance to military procurement—the most massive such shift in peacetime history. It further proposes not so much a reduction in taxes as a use of the tax system to effect a substantial redistribution of wealth to those already wealthy. Together, these two changes quite simply mean the use of the nation's government to serve the interests of those who least need help at the expense of those who need it most.

All of this is offered in the name of an economic theory not so much untested as repudiated. It was once called the "trickle down" system. It is not a radically new and imaginative solution to America's social and economic problems, but, with the other elements of the administration's philosophy, a replay of an old and seductive vision of what America is all about, a vision that has been present from the beginning and still competes tenaciously for the nation's soul.

What are the elements of this vision? From the first, there were those who saw America as a rich treasure waiting to be exploited for the benefit of those daring enough and strong enough to take it. They came first for gold, for spices, for furs, for tobacco; then for land and iron and silver and copper and trees. In this vision of America, the fittest survive and prosper, and there is little room for public purpose since it interferes with private gain. Compassion is a weakness in the competitive struggle of each against all, and charity is the voluntary option of individuals. Government is at best a necessary evil which must be strong enough to protect privilege from assault but kept weak to impose public responsiblity on private prerogative. In this vision, America is seen principally as Empire—"Manifest Destiny," "54-40 or Fight," "Remember the Maine"—with a mission to extend its power and commerce throughout the continent, the hemisphere, the world.

But another vision of America has been present from the beginning also. This second alternative vision has deep roots in religious faith and biblical images of divine intent and human possibility. The precious possession of Pilgrims and padres, it was a vision of creating in the New World a new model of human community—the New Jerusalem—free from the oppression and misery that entrenched power and privilege perpetuated in the Old World they had fled.

In this America, it was envisioned, government would promote the common welfare and secure the blessings of liberty for all. The dignity and worth of each person would be respected and protected as a matter of policy as well as piety and each person's potential would be developed to the fullest. Justice and compassion would reign in alabaster cities that stretched from sea to shinning sea, and the bountiful resources of a favored land would be thankfully received and gladly shared with the whole human family, as the nurturing providence of the Creator meant them to be. This America would be known in the world for its compassion, its deep desire for peace and justice, its commitment to human rights and human decency. It would stand as a beacon and a model, a city set on a hill, its power stemming from the irresistible example of a just, caring and peaceful people sharing life and treasure generously with all the people of earth.

This vision of America has never been fully realized, but it has never been abandoned. It has been of immense significance to the rest of the world, where echoes and adaptations of it are seen in the revolutions and the constitutions of many nations. It has been a constant magnet in this nation's domestic life, drawing it away from slavery and sweatshops, chain-gangs, and lynch mobs toward broader opportunity, deeper compassion, fuller equality and greater justice for all.

*III.*

These alternative visions of America have vied for supremacy throughout the nation's history. Both have been given religious sanction in different ways and at different times by America's churches. Both are still deeply rooted in the heart of America and the hearts of Americans. Yet even in those past times when the first vision—America as private opportunity and empire—dominated American practice, the second vision—America as public responsibility and compassionate neighbor—maintained its foothold in the deepest recesses of the nation's soul. Glimmering in the founding documents and echoing in inaugural addresses and Fourth of July speeches down the years, it is acknowledged by nearly all Americans as the vision that best expresses who we truly long to be and where we truly wish to go.

Now the new Administration seeks emphatically and forthrightly to reverse the record of half a century and shape the nation decisively to the first vision once again. It claims a mandate from the people to do so; and indeed it would not have the opportunity to try if that vision were not still so strong in so many of us. Nevertheless, as the real intent and scope of the administration's philosophy become clearer and clearer, the American people will themselves decide whether they conferred a mandate for such a vision of the nation.

The Executive Committee of the NCCC, on February 20, 1981 stated its "fundamental disagreement with the proposal to increase our death-dealing capacity while cutting back on life supports for our citizens," noting that "The budget cuts proposed by the Administration demand intolerable sacrifice from the nation's needy and place a disproportionate burden on minority groups, the elderly, and families headed by women." The Governing Board of the NCCC reaffirms that fundamental disagreement with the new Administration's vision of "who we are and where we are going," and expresses deep concern about the probable consequences of its implementation. We do so not in the service of "special interests," as the President refers to those who question his approach, but in the sure conviction that the vision of America the nation is now asked to espouse is not in the common interest of Americans or the world.

When Christians have lived most fully according to the Gospel they have urged the nation toward care and compassion, not away from them. The Scriptures call us to a vision that supersedes all social visions, to a vision of a "good and broad land," a new earth and a new heaven. Jesus of Nazareth launched this new age, as Mary envisioned it in the Magnificat:

"He has shown strength with his arm, He has scattered the proud in the imagination of their hearts, He has put down the mighty from thrones, and exalted those of low degree; he has filled the hungry with good things, and the rich he has sent empty away."

—LUKE 1:51-53.

And as he proclaimed it in his own first public message, quoting Isaiah:

"The spirit of the Lord is upon me, because he has annointed me to preach good news to the poor.

"He has sent me to proclaim release to the captives and recovering of sight to the blind, to set at liberty those who are oppressed, to proclaim the acceptable year of the Lord."

—LUKE 4:18-19.

The Christian Church has not always served this vision-above-all-visions well, often more concerned for its own institutional success or survival than for the plight of the poor. In these days, when economic anxiety lures fundamental fears and selfish-

ness to the surface of human motivation and the nation is tempted to make them the basis of policy, we must never forget that "judgment begins with the household of God." The Governing Board calls upon the units of the National Council of Churches and its constituent communions to give serious study and continuing attention to the development of resources and programs that will assist churches and church members to understand and respond effectively to the issues of justice in the life of the nation and the world as they participate in the public debate over national purpose and goals.

Let us pray for the wisdom, courage, and strength to serve God and nation faithfully in the days that lie ahead.●

## THE 20TH ANNIVERSARY OF THE PEACE CORPS

### HON. THOMAS E. PETRI

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 22, 1981*

● Mr. PETRI. Mr. Speaker, as a former Peace Corps volunteer in Somalia during the 1960's, I join with many others in marking the 20th anniversary of the Peace Corps.

Much has been said and written about the Peace Corps, and I have seen firsthand that a well conceived and well run Peace Corps program can have a positive impact on the education and development of a country.

The strength of the Peace Corps is that it is people to people, rather than government to government or elite to elite.

Morever, Peace Corps programs have benefited our country. It gives Americans a greater understanding of how our society compares to other people in the world. The Peace Corps helps others understand our country and values. It helps to counter negative propaganda about the United States.

Operating on a relatively inexpensive budget, the Peace Corps has provided an important way of demonstrating American interest and support of the development of other nations.

On a small Federal investment, the return has been impressive.

I salute the Peace Corps as it celebrates today its 20th anniversary.●

## MILITARY MANPOWER

### HON. PAUL N. McCLOSKEY, JR.

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 22, 1981*

● Mr. McCLOSKEY. Mr. Speaker, this past week, 34 individuals of varied backgrounds and viewpoints met at Mount Kisco, N.Y., under the auspices of the American Assembly of Columbia University and under the direction of Lt. Gen. Brent Scrowcroft, former National Security Adviser to President Ford. Participants included high-ranking people from the White House, Defense Department, leaders from the armed services, manpower experts, Congressman LES ASPIN, and myself.

The subject for discussion was military service in the United States and current policy options relating to the All-Volunteer Force, the draft, and a national youth service.

The findings of the group may be summarized as follows:

1. Current manning of U.S. Armed Forces is inadequate to meet our national needs.

2. The All-Volunteer Force has failed to meet necessary quality standards.

3. The Reserve and National Guard are wholly inadequate to current needs.

4. Universal military service is not an appropriate response; compulsory military service at this time is neither desirable nor necessary.

5. A high quality military force is essential; a new targeted educational incentive program would be most effective in promptly increasing the supply of high-quality recruits.

Excerpts from the conclusions reached at Mount Kisco follow:

FINAL REPORT OF THE 60TH AMERICAN ASSEMBLY

At the close of their discussions, the participants in the Sixtieth American Assembly on "Military Service in the United States," at Seven Springs Center, Mt. Kisco, New York, September 17-20, 1981, reviewed as a group the following statement. This statement represents general agreement; however, it should not be assumed that every participant subscribes to every recommendation.

Current manning of the military forces in the United States is inadequate to our national needs. The problems involved in manning the armed forces of the United States are complex, have developed over a substantial period of time, and cannot be ascribed solely to the all-volunteer force (AVF). Nonetheless, manpower in adequate numbers and quality is so central to our security needs that this issue demands our priority attention. We face a fundamental national decision to determine whether we will attempt to deal with this problem through purely voluntary measures, through a return to some form of compulsory service, or through some combination of measures involving elements both of inducement and compulsion.

FORCE REQUIREMENTS

The international environment of the decade of the 1980s is likely to be more turbulent and more unstable than was that of the decade just past. Potential demands on U.S. military forces, as a consequence, can be expected to increase. In the past, force structure and size have been based in theory on a political determination of the number, scale, and duration of the contingencies U.S. military forces should be prepared to meet simultaneously. The present military force structure, for example, was based upon the need to be able to fight simultaneously one major and one minor conflict. There are two important factors to consider when analyzing a force posture constructed on the basis of such a concept.

The first is that there is an element of arbitrariness about the determination of the number of simultaneous contingencies; that is, they often do not represent the full range of the actual "threat" against which the U.S. government may in the event perceive that military force should be employed. The other factor is that not for some time if ever have U.S. military forces been adequate to meet the requirement even of the "defined threat."

Therefore, rather than start with an analysis of the forces required to meet an actual threat or one specified for force planning purposes, it is more realistic to use as a point of departure the current force posture. This includes both active duty and reserve component forces. The current active force size is not adequate, nor was it so designed, for conflicts of more than brief duration or for major conflicts such as a war in Europe; for such contingencies a pretrained combat reserve force and a responsive system of mobilization are also essential.

Since the need for military forces in the coming years is anticipated to be greater than in the past, there should be no thought of reducing the force structure below its current level. On the other hand, while force increases would be desirable in the future, the first priority should be to correct the serious inadequacies in the current force.

The AVF, which in 1973 replaced the draft, has, in general, met the quantitative goals which have been set for the active force over the coming decade, however, it is clear that a decline in cohort size will occur. This will magnify the problems of the AVF, and, especially if it is accompanied by a decision to increase significantly the active force size, the ability of the AVF to meet force goals could be in considerable doubt.

Even more serious are questions such as quality of the force under the AVF and various apparent societal consequences. Indeed, in meeting the quantitative goals of the active AVF, there continues to be a shortage of recruits from the higher mental categories, particularly in the Army.

It was the unanimous view of the participants that the Army reserve and national guard forces are wholly inadequate to current need. In many anticipated deployment scenarios, the reserve components, especially in the Army, could not be expected to perform their assigned missions adequately.

Concern was expressed that, in the event of a conflict, overrepresentation of blacks in the Army would result in a black casualty rate sharply higher than the proportion of blacks in the general population. This could stimulate serious charges of inequity at a critical or sensitive time.

As a final point on this issue, it was agreed that social representativeness, except as it might contribute to the fighting effectiveness of the force, should not be an objective of high priority.

It was the unanimous view of the participants that military effectiveness should be the principal, if not exclusive, goal of military manpower policy. To the extent that manpower policies are designed to assist in the achievement of other societal goals they should not detract from military effectiveness.

The quality of the Army's active military force is not adequate, and the Army reserve forces require improvements in both quantity and quality.

PROPOSALS CONSIDERED

Systems of universal military service (UMS) were dismissed because they require a force structure substantially larger than current needs, and result in costs beyond reason.

Some participants believed that a return to compulsory service could satisfactorily cure the ills of the present AVF. A small minority thought that only such a move could deal adequately with the problem. One possible concept was to register all males, encourage volunteers, and draft by lottery to two years of service, either in the active or reserve forces. Educational benefits would be provided for the career force and volunteers; in addition, the career force would receive increased pay. Pay for recruits would be cut from current levels, and no educational benefits would be provided for draftees. A "skill bank" would be created from the registered cohort to facilitate mobilization in an emergency.

A substantial majority, however, was of the opinion that a return to compulsory service at this time was neither necessary nor desirable in order to correct the deficiencies in the AVF. With requirements for additonal manpower being very small relative to the size of the present cohort, this majority felt that the perceived inequities, even of the lottery draft, would make such a system politically infeasible. Of greater significance, improving the quality of the recruit force by more than a marginal amount would require substantial reductions in the volunteer component. In addition, the problems created by those compelled to serve would more than offset the military advantages.

Of this majority, there were several who believed that a return to compulsory service at some point in the future had a probability sufficiently high to make prudent a careful examination now of the circumstances likely to require such a move and the optimum characteristics of such a draft. Among the issues deserving of study are appropriate triggering events, political reactions associated with a return to the draft, adequacy of the current standby draft system and plans for its activation, characteristics of those to be drafted and exempted, terms and types of service, compensation, postservice obligations and benefits, and the relationship between volunteers and draftees.

Most believed that remedies other than compulsion existed that could sustain the AVF in some amended form for the present, at least in the absence of a significant increase in required force size. There was a variety of opinions as to how much of an inducement would be required, the kind of measures which would produce the most desirable results, and the extent to which any solution should focus on or differentiate between the active and reserve forces. There was, however, a general consensus that an improved educational benefit program should be enacted for both the active and reserve forces, directed toward obtaining high quality recruits for areas of demonstrated need, such as the combat arms. The program should include the right to use the benefit while in service and on reenlistment and could include the right to "cash in" the benefit or possibly to transfer it to dependents. Any such benefit would have to be substantially in excess of those presently available to college students. There was as well a discussion of terminating federally sponsored educational benefits for all but those volunteering for service in lieu of adding an increment above current benefits for those who volunteer for military service. Others felt that future budget cuts were likely to produce those same results and separate prior action in that direction was, therefore, unnecessary and undesirable. No conclusions on this latter issue were reached.

A number of options based on various combinations of voluntarism and compulsion were discussed. They generally addressed four separate components. The first component would provide substantially new educational grants for two-year volunteers in areas of special military need. Their pay would be lower than present enlistment standards, and they would assume a substantial reserve commitment. A second choice would offer lesser educational benefits for those volunteering for a six-month period of active duty training and an extensive reserve commitment. A third component, requiring substantial study, would be the provision of educational benefits along the lines now available through federally sponsored programs for those volunteering for approved national civilian service. An element of compulsion would be added to this conceptual scheme by automatic placement of nonvolunteers in a realistic standby draft pool.

CONCLUSIONS

The participants unanimously stressed the need to assure a high quality, professional career force. There must be continued emphasis upon sufficient compensation and amenities to attract and keep trained people.

A significant majority of the participants agreed that a new, targeted educational incentive program would be most effective in promptly increasing the supply of highly qualified recruits.

There was general agreement among the participants that while some reserve and national guard units are extremely good, some serious overall shortcomings in the reserve components demand special attention. Many believed that substantial restructuring was essential in order to provide the necessary pretrained forces. This may include selected relocation of reserve units. However, even if restructuring proves infeasible, there are actions that can and should be taken to improve the readiness and morale of the reserve components. Increased support must, in fact, be accorded to the reserve components by the active establishment. Increased funding for equipment and training must be provided, but so too must energy and imagination be expended to ensure that service in the reserve components is more relevant to the primary mission and more challenging. If necessary to ensure higher readiness, larger numbers of active duty cadre should be assigned to Army reserve component units, similar to the practice of the Marine Corps. Closer relationships should be established between reserve component forces and the active duty units they support or with which they affiliate.

It is the judgment of the majority of this group, however, that the proper course of action at this time is to dedicate ourselves to the determined application of remedies, such as those here examined, within the overall framework of a volunteer force.

PARTICIPANTS—THE 60TH AMERICAN ASSEMBLY, MT. KISCO, N.Y., SEPTEMBER 17-20, 1981

Les Aspin, Representative from Wisconsin, United States Congress, Washington, D.C.

Doug Bandow, Special Assistant to the President for Policy Development, The White House, Washington, D.C.

Jayne Gilbert Benz, Harriman Scholar, Middlebury College, Middlebury, Vt.

Sue E. Berrymann, Social Scientist, The Rand Corp., Santa Monica, Calif.

Antonia Handler Chayes, Csaplar & Bok, Boston, Mass.

Cheryl A. Cook, Director, Manpower, Mobilization & Readiness Program, The Rand Corp., Santa Monica, Calif.

Richard V. L. Cooper, Partner, Coopers & Lybrand, Washington, D.C.

Bernhard Fleckenstein, Planning Staff, Ministry of Defense, Federal Republic of Germany, Bonn, West Germany.

Janet C. Fleishhacker, Trustee, The American Assembly, San Francisco, Calif.

Richard A. Gabriel, Professor, Department of Political Science, Saint Anselm College, Manchester, N.H.

Lt. Gen. Robert G. Gard, Jr., USA (ret.), (formerly President National Defense University), Paris, France.

Adm. James R. Hogg, USN, Director, Military Pesonnel Policy, United States Navy, Washington, D.C.

James R. Hosek, Associate Director, Manpower Mobilization & Readiness Program, The Rand Corp., Santa Monica, Calif.

Michael Howard, Regius Professor of Modern History, Oxford University, Oxford, United Kingdom.

Richard W. Hunter, Assistant Director, Compensation Program Development, U.S. Office of Personnel Management, Washington, D.C.

Lawrence Korb, Assistant Secretary of Defense for Manpower, Reserve Affairs & Logistics, U.S. Department of Defense, Washington, D.C.

## IN TRIBUTE TO THE LATE HONORABLE FRANK J. BECKER

### HON. DAN ROSTENKOWSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 17, 1981*

● Mr. ROSTENKOWSKI. Mr. Speaker, it is with a sense of great loss and sorrow that I now pay tribute to the late Honorable Frank J. Becker.

Having served 8 years in the New York State Legislature prior to coming to Washington, Frank was a man who dedicated his life to public service. He was a diligent, hardworking Representative for the people of New York. And in his years of service to this Chamber he was a consistent advocate of a strong national defense.

I would like to make special mention that Frank and I were neighbors on the seventh floor of the Longworth Building. There I had a chance to realize that Frank Becker was not only a helpful but also a genuinely kind individual.

Frank J. Becker, a dedicated public servant, a man of integrity, a dear friend, will long be missed by this Member of Congress.●

## ACCESSIBILITY FOR THE HANDICAPPED

### HON. MICHAEL D. BARNES

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 22, 1981*

● Mr. BARNES. Mr. Speaker, today, September 22, 1981, the Architectural and Transportation Barriers Compliance Board will meet to consider elimination of the Board's minimum guidelines and requirements for accessible design which were created to insure that federally funded and constructed facilities are usable by physically handicapped citizens. These guidelines have fallen victim to the administration's regulatory review efforts, and are viewed as an example of unnecessary Government regulation and expenditure.

The following is a letter which I recently sent to the Board's General Counsel, expressing my strong concern regarding the lack of adequate public information or opportunity for discussion which preceded this action. It is both irresponsible and counterproductive to deny handicapped citizens the right to participate as working and contributing members of society. I hope that the Members will join me in protesting the elimination of these minimum accessibility guidelines.

The letter follows:

CONGRESS OF THE UNITED STATES,
HOUSE OF REPRESENTATIVES,
*Washington, D.C., September 17, 1981.*

Mr. CHARLES D. GOLDMAN,
*General Counsel, Architectural and Transportation Barriers Compliance Board, Washington, D.C.*

DEAR MR. GOLDMAN: I wish to register my strong opposition to the proposal by the Architectural and Transportation Barriers Compliance Board to rescind its Minimum Guidelines and Requirements. The Compliance Board should not act precipitously in the name of undisclosed cost factors, particularly in this the International Year of Disabled Persons.

The Board in its Notice of Proposed Rulemaking has set forth a single question, a referendum on the continuation of its rule. The Board is proposing to eliminate, after a 45-day comment period, a rule which took a year to develop. Such a comment period is simply not adequate public notice, particularly where the Board has noted, but not disclosed major concerns over the cost of its regulations.

I am very disturbed that the Board did not disclose the cost information which has prompted its action. Such information is essential for the public to have a basis on which to comment. I also find distressing the complete lack of mention of the benefit of eliminating or preventing architectural barriers. An accessible environment makes disabled persons taxpayers, not tax users, and benefits all of society, including the very young and the elderly.

It is my view that the Compliance Board should refrain from taking any action until it conducts public hearings on the cost of its regulation. As a former public service commissioner and as Representative to the U.S. Congress from Montgomery County, Maryland where active citizen participation is common practice, I know well the benefits of public hearings. Only by having such hearings and carefully weighing their results can the Board issue a realistic regulation.

The ATBCB meeting on September 22 should be an occasion to undertake plans for opening fully the rulemaking process. It must not rescind its rule.

Sincerely,

MICHAEL D. BARNES.●

## LOS ANGELES: STARTING A THIRD CENTURY

### HON. LEON E. PANETTA

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 22, 1981*

● Mr. PANETTA. Mr. Speaker, I would like to join my colleagues in paying tribute to the city of Los Angeles as it celebrates its 200th anniversary. Over the past 200 years, the city of Los Angeles has grown to become the third largest city in the United States. This great city attracts millions of tourists and visitors each year who seek to experience the magnificent features this area has to offer. From Hollywood to Watts, from Westwood to El Monte, the city of Angels has become a melting pot rich in cultural diversity. Recognized around the world as a major international entertainment center, Los Angeles and its founding fathers should be proud of its development since its inception as a tiny Spanish pueblo. The ingenuity of the people of Los Angeles is well known, and has made Los Angeles and the United States a leader in the fields of communications, entertainment, electronics, and energy. The city of Los Angeles has contributed much to the development of our Nation, and I am pleased to share in this celebration as Los Angeles enters its third century.●

## RETIREMENT OF MIKE MICHAELSON

### HON. RICHARD BOLLING

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 22, 1981*

● Mr. BOLLING. Mr. Speaker, we will all miss Mike Michaelson who is retiring on October 1 as superintendent of the House Radio and TV Gallery. Mike is a kind and helpful human being, a thoughtful and conscientious public servant and a skillful and pleasant manager of a difficult and pressure-filled assignment. I want to add my best wishes to those of many others to Mike in his new job as executive vice president of the Cable Satellite Public Affairs Network (C-SPAN).●

## DISTRICT OF COLUMBIA FIRE DEPARTMENT'S RACIAL HIRING POLICIES

### HON. ROBERT S. WALKER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 22, 1981*

● Mr. WALKER. Mr. Speaker, I would like to enclose in the RECORD the following editorial by William Raspberry, who accurately describes the District of Columbia Fire Department's racial hiring policies: "Fundamentally unfair and destructive of popular support for affirmative action." The article illustrates what happens when the concept of merit is abandoned, standards are ignored and the rules of the game changed, and race is substituted as the decisive factor in the apportionment of jobs. Although even the District of Columbia's black administrators and Human Rights Department have not suggested that discrimination has occurred in the Fire Department, District of Columbia officials press ahead with their plan to guarantee a racial proportionality in the work force which satisfies their own specifications. The American people are sophisticated enough to know the difference between fairness to minorities in hiring practices and brazen discrimination against nonminorities. I believe

the Fire Department's policies will be identified as the latter, and will lead to the unfortunate consequences of increased racial prejudice, defeatism among workers, and a loss of respect for legitimate affirmative action programs.

RACE, MERIT AND JOBS

(By William Raspberry)

Back in 1972, a federal judge ordered the Alabama Department of Public Safety to hire one black highway patrolman for every new white trooper until the overall force was 25 percent black.

I thought the order made sense.

In 1981, the D.C. Office of Human Rights ordered the District fire department to fill 60 of its 70 vacancies with minority applicants and, after that, to give preference to minorities until the racial makeup of the department approximates the racial makeup of the city.

I don't know whether that one makes sense or not, and neither, so far as I can tell, does human rights director Anita Shelton, who issued the order.

In the Alabama case, the problem was clear-cut racial discrimination. There were some 600 state troopers, and all of them were white. A federal judge found evidence of overt discrimination and was upheld on appeal.

There has been no similar finding of discrimination against minorities by the local fire department. The principal evidence—so far as I can tell, the only evidence—of bias is the fact that in a city whose population is some 70 percent black, 63 percent of the fire-fighters are white.

And on the basis of that evidence, Shelton ordered the department to fill 60 of its 70 vacancies with minority applicants, even though most of those who made the top scores on the entrance exam were white.

She has now been ordered by the city administrator's office to hold public hearings to determine whether the skewed racial makeup of the department is the result of racial discrimination. It's something that might have occurred to Shelton without prodding from Veronica Pace, the aide who issued the order.

While there are superficial similarities between the 1972 situation in Alabama and the 1981 situation in the District, there are also important differences. All the relevant officials involved in the Alabama case were white. White people ran the state and were quite obviously determined to run it for the benefit of white people.

In the District, the key officials—the mayor, the city administrator, the fire chief—are black. It takes a good deal of imagining to suppose that these officials are guilty of discriminating in favor of white firefighter applicants.

Indeed, Shelton has not made such a charge. Her contention is that the discriminatory instrument is the entrance exam, on which white applicants tend to score higher than blacks. But for this fact to translate into discrimination, there ought to be some showing—in public hearings or otherwise—that the test is biased in favor of whites in ways that have nothing to do with competency in firefighting or in training for the job.

It would have made more sense if Shelton had ordered the establishment of a cutoff score for success on the entrance exam, with selections to be made randomly from those who passed the exam, as Mayor Barry did in the case of the police department.

The unspoken issue is whether jobs and other privileges are to be awarded on the basis of merit, however, determined, or on the basis of racial proportion. A case can be made either way.

You can establish criteria and make appointments based on how well applicants meet those criteria, without regard to race or other considerations. Or you can make the appointments reflect the racial makeup of the city, without regard to test scores or other measures of merit. You can even combine the two, ordering in effect, the establishment of two lists, one white, one black, with 30 percent of the appointments to be made from the top of the white list, 70 percent from the highest-scoring blacks. The same choices hold for promotions to supervisory ranks. One of the two assistant chief positions could be reserved for blacks; two of the five deputy chiefs would be white. The chief would automatically be black, since more than half the population is black.

My suspicion is that those who support Anita Shelton's order would want no part of such a two-track personnel system. If the five best-qualified applicants for the deputy jobs were black, they would insist that the five blacks be appointed.

In other words: merit, where merit works to the advantage of blacks; proportional appointment where merit favors whites.

Isn't it about time we opted for simple fairness? It's legitimate to debate the qualities (intelligence, reliability, physical condition and so on) we want in fire-fighters; it's legitimate to argue about how best to measure these qualities.

What strikes me as illegitimate, fundamentally unfair and destructive of popular support for affirmative action is to insist on bending the rules and requirements until they produce some arbitrary racial proportion.●

## SEPTEMBER 21, BELIZE'S INDEPENDENCE DAY

### HON. MICHAEL D. BARNES

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 22, 1981*

● Mr. BARNES. Mr. Speaker, yesterday, September 21, Belize celebrated its independence from Great Britain. It is a pleasure to welcome this new nation to the family of American states. I hope that our Government will actively express our support of the newly gained sovereignty of Belize. But more than that, I trust that our country will help this new nation with the serious problems it faces: constraints on economic development, the creation and preservation of a democratic society, and the safekeeping of its national autonomy.

Unfortunately, there are dark clouds threatening this nation. I am referring to the Guatemalan Government's refusal to recognize the independence of Belize. For many years the Guatemalans have been claiming jurisdiction over this territory, which was previously known as British Honduras. In addition to the Government's declarations, the ultrarightist Movement of National Liberation, headed by Mario Sandoval Alarcon, declared the month of September to be "black September," symbolizing the loss of the Guatemalan "Province of Belize." A committee, "Belize Now," has also been created to oppose the independence of Belize. An indication of the degree of the perceived threat is the fact that Great Britain is leaving 1,600 troops in Belize at the request of Premier George Price.

Although there is ample disagreement among Members of Congress on what U.S. policy toward Guatemala should be, I am certain that all of us here in Congress strongly believe in the inalienable sovereignty of nations. I trust that the administration will be able to convey this message loudly enough to our friends in Central America. In times when the whole region is confronting economic dislocations, political turmoil, and military conflicts, we should be glad to see a nation gaining its independence, fulfilling its ambitions, achieving its rights to participate fully in the international community of nations, and assuming the responsibilities of a self-governing state.●

## IN SUPPORT OF THE PRESIDENT'S VETO

### HON. ALBERT LEE SMITH, JR.

OF ALABAMA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 22, 1981*

● Mr. SMITH of Alabama. Mr. Speaker, yesterday, Representative SCHULZE and I presented a letter signed by 154 Republican Representatives to President Reagan, pledging to support any veto the President may choose to exercise to carry out his economic recovery program.

The text of the letter was as follows:

We are very concerned about the economic direction of our Nation. We feel your plan for economic recovery heads us in the right direction and is a necessary departure from business as usual.

Accordingly, we urge you to stand firm by your public resolve and to veto any economic package which damages your program in the aggregate. Further, to assure you of our commitment, we hereby pledge to support any veto you may exercise to achieve your budgetary aggregate.

The delivery of this letter was timed to coincide with the current deliberations on appropriation bills. These funding measures will be the real test of congressional resolve. It is essential Congress stand firm on the budget cut decisions reached with bipartisan support earlier this year in the first budget resolution.

The letter we presented to President Reagan affirms that he can veto with confidence any fiscal year 1982 appropriation which exceeds the maximum

spending targets already set. The letter is not intended to pledge the signers with regard to future budget decisions, but it certainly does demonstrate we are united in our desire to bring Government spending under control and to hold firm with regard to the present appropriation legislation.

At this point I am submitting the names of those Republican Members who joined with me and signed this letter to President Reagan:

MEMBERS OF CONGRESS SIGNING LETTER TO SUSTAIN VETO

Bill Archer (R-Tex.), John M. Ashbrook (R-Ohio), Robert E. Badham (R-Calif.), L.A. "Skip" Bafalis (R-Fla.), Wendell Bailey (R-Mo.), Robin L. Beard (R-Tenn.), Cleve Benedict (R-W. Va.), Douglas K. Bereuter (R-Nebr.), Ed Bethune (R-Ark.), Tom Bliley (R-Va.), William S. Broomfield (R-Mich.), Hank Brown (R-Colo.), James T. Broyhill (R-N.C.), Clair W. Burgener (R-Calif.), M. Caldwell Butler (R-Va.).

Carroll A. Campbell, Jr. (R-S.C.), Greg Carman (R-N.Y.), William Carney (R-N.Y.), Gene Chappie (R-Calif.), Richard Bruce Cheney (R-Wyo.), Don H. Clausen (R-Calif.), William F. Clinger, Jr. (R-Pa.), Daniel R. Coats (R-Ind.), E. Thomas Coleman (R-Mo.), James M. Collins (R-Tex.), Barber B. Conable, Jr. (R-N.Y.), Tom Corcoran (R-Ill.), Lawrence Coughlin (R-Pa.), James A. Courter (R-N.J.), James K. Coyne (R-Pa.).

## TRIBUTE TO MIKE MICHAELSON

### HON. WM. S. BROOMFIELD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 22, 1981*

● Mr. BROOMFIELD. Mr. Speaker, I rise to pay tribute to Mike Michaelson, superintendent of the Radio and Television Gallery and one of the most valued employees of the House, who will retire on October 1.

For 30 years, Mike has devoted himself to the problems and needs of the Members of this body in a friendly and accommodating manner. He deserves our thanks for the special effort and extra consideration he has never failed to display.

His career paralleled the expansion of television news, and he has grown with the industry.

When he came to work in the Radio and Television Gallery in 1951, its membership was small, and television was just beginning to come of age.

By the time Mike became superintendent in 1974, television news had become a major force in American journalism. Today, his gallery is one of the largest, with 1,300 members.

Always friendly and willing to please, he earned the respect of five Speakers of the House for whom he worked, countless Members of this body, and of the media.

Fortunately, he will not really be leaving the House when he retires. He is just moving across the street.

As executive vice president of the Cable Satellite Public Affairs Network (C-SPAN), he will be involved in the day-to-day televised coverage of House proceedings.

He will enter the cable television industry at a time when it is expanding its horizons in much the same way as television news was 30 years ago.

No one knows the House better than Mike, and few are better equipped to pioneer cable television's expanded coverage of its sessions.

All of us who have worked with him for so many years will miss his warm personality and professional manner in the gallery.

I know his many friends in the House and in the media join in wishing him well in his new career.●

## GREEN BERETS STEP UP HONDURAS ROLE

### HON. BOB EDGAR

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 22, 1981*

● Mr. EDGAR. Mr. Speaker, I would like to call to the attention of the House the following New York Times article which reveals American military activity in Honduras. I visited the refugee camps in La Virtud, Honduras last January; however, there was no American military activity there at that time. As is explained in the article, La Virtud is in the border area of Honduras and El Salvador. With the help of American advisers, Honduran troops are now patrolling this area because of suspected guerrilla activity in this area. It has also been reported that Salvadoran troops have crossed the border and engaged in operations in the La Virtud area.

Mr. Speaker, I saw no evidence of guerrilla activity when I visited La Virtud. I did listen to the stories of Salvadoran refugees who had been driven from their homes by the Salvadoran authorities. Charles Bazoche, the representative of the U.N. High Commission on Refugees who guided my voyage into the Honduran border country, says there is no proof that any international relief for the refugees is going to the guerrillas.

In light of the tremendous concern and controversy surrounding U.S. involvement in the current Salvadoran conflict, I am greatly disturbed about reports of American military activity in Honduras. I think that the administration has a responsibility to explain the purpose and scope of this activity. Very little has been made known to Congress and the public about what American Green Berets are doing patrolling the Honduras-El Salvador border.

The article follows:

[From the New York Times, Aug. 9, 1981]

GREEN BERETS STEP UP HONDURAS ROLE

(By Raymond Bonner)

LA VIRTUD, HONDURAS.—This village's isolated mountain valley, as oppressively muggy by day as it is bleak by night, is nonetheless attracting its share of visitors. They include peasant refugees fleeing from neighboring El Salvador, Salvadoran Government troops and American military advisers.

"This dump is the center of the world now," a United States Army officer said when he was here for three days at the end of July. The officer, Capt. Michael Sheehan, is a member of the Army's elite Special Forces, known popularly as the Green Berets.

Captain Sheehan was accompanied by two senior enlisted men with extensive experience in Vietnam. All three wore camouflage jungle uniforms and carried M-16 automatic rifles.

They said they were from a Special Forces battalion based in Panama and that they and five other American soldiers from the same unit had been assigned to help the Honduran Army patrol the border. Their primary objective, they said, was to control the Salvadoran refugees streaming in to escape the upheaval in their country.

AID MAY BE REACHING GUERRILLAS

But there is a special dimension to this duty: The American advisers in La Virtud say that many of the refugees are from the families of leftist guerrillas and guerrilla sympathizers and that at night some of them sneak out of the Honduran refugee camps carrying food and other supplies through the rugged mountain gorges to the rebels in El Salvador.

While the United States has long supplied Honduras with a limited number of military advisers, their presence along the Salvadoran border is believed to represent the first time they have been engaged in a mission connected with the conflict in El Salvador.

Captain Sheehan said that the National Security Council had approved the use of Special Forces units in Honduras in support of the military effort against Salvadoran guerrillas. A Special Forces unit would soon be based in La Virtud, he said.

The Reagan Administration has requested an increase in United States military aid from $5.4 million this year to $10.7 million next year. In April, four military advisers were on temporary assignment in the country.

SALVADORANS LAND IN AREA

Early in July, an American-trained battalion of the Salvadoran Army landed in this area then crossed back into El Salvador in an operation to squeeze the guerrillas out of the mountains on the Salvadoran side of the border.

The day after the landing, the Mayo of Vallodolid, a small village up the deeply rutted mountain road from here told local reporters that she had seen American soldiers in the area a few days before the landing.

According to an official in the San José office of the United Nations High Commissioner for Refugees, 70,000 Salvadoran refugees have entered Honduras out of about 305,000 who have fled El Salvador in the last year.

REFUGEES LIVE UNDER TARPS

On the bank of a river, in an area slightly larger than a football field, more than 60 incandescent green and orange tarpaulin sheets, normally used to cover truck cargos, provide shelter for several hundred Salvadoran families. The soil here is cement-like, but astonishingly a few cornstalks, surrounded by crude stick fences, stretch more than 10 feet high.

Several international relief groups, including Caritas Honduras, part of the Roman Catholic relief organization, have set up tin-roofed schools and a medical clinic. All of the work is being coordinated by the Evangelical Committee for Development and National Emergencies, which is known as Ceden, its initials in Spanish. It is affiliated with the World Council of Churches.

The effort has not been without controversy. The United States Embassy in Honduras has been embroiled in a dispute growing out of charges that international aid intended for the refugees has been reaching Salvadoran leftist guerrillas.

REPORTS DIFFER ON GUERRILLA AID

In June, the country's major newspapers reported that Ambassador Jack Binns had said that 50 percent of the international aid intended for the refugees was going to the guerrillas.

In letters to the directors of Ceden and Caritas, Ambassador Binns said he had not been the source of the reports. But he said that there was "circumstantial evidence" that "small quantities" of the aid was reaching the guerrillas.

"There is no proof that any of the international aid for the refugees is going to the guerrillas," Charles-Henry Bazoche, director of the Honduras office of the United Nations High Commission on Refugees, said in a recent interview. "We have established tight controls."

Militarily, it would be easy to control the refugees, the American advisers here said, but there would be an international outcry about human rights if more military control were exercised. Mr. Bazoche has protested to the Honduran Government that the Honduran Army is treating the refugees brutally.

THREE RUFUGEES REPORTED KILLED

Mr. Bazoche said that in March three refugees were killed after being taken from a camp by the Honduran Army and turned over to Salvadoran soldiers. He said that army incursions into the camps have "somewhat lessened, but it remains a serious concern of ours."

A major problem now, he said, is that refugees are being turned back at the border by the Honduran Army. Refugees reaching Honduras say that hundreds of others are unable to leave El Salvador becausc the Salvadoran Air Force bombs the fleeing columns of peasants.

In La Virtud, naked children, older boys playing soccer and grunting black pigs share the weed-infested, garbage-littered central area surrounded on four equal sides by crumbling adobe buildings. Widespread hepatitis and malaria have disabled even the foreign doctors working here.

A DINNER SHARED WITH AMERICANS

One evening, in a ramshackle adobe building where torrential rains easily penetrate the gaps in the red tile roof, four American and Honduran soldiers shared a kerosene lamp-lighted dinner with the French, West German and Honduran doctors that are part of the relief effort in La Virtud.

When the discussion turned to the refugees, Captain Sheehan, a 1977 graduate of the United States Military Academy at West Point said, "They have no human rights." He said they have a "right to food and a roof." And medicine, he added, realizing he was among medical people.

Captain Sheehan told the international doctors that a Special Forces medical team and other military personnel were being sent to La Virtud. International volunteers were solemn and angry, and they verbally sniped at Captain Sheehan, who again came to dinner, this night uninvited.

La Virtud has survived the poverty of underdevelopment for generations, they said. A medical team from the Special Forces is coming more for military than humanitarian reasons, they said.●

## RESOLUTION TO OPPOSE REDUCTION IN SOCIAL SECURITY COST-OF-LIVING ADJUSTMENTS

### HON. TED WEISS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 22, 1981*

● Mr. WEISS. Mr. Speaker, the resolution I introduce today expresses congressional opposition to proposals to reduce cost-of-living adjustments for social security beneficiaries.

The social security cost-of-living adjustment mechanism became effective in 1975. It protects the purchasing power of older Americans, disabled persons, survivors and their families.

This measure was the result of bipartisan action from Democrats and Republicans alike. The cost-of-living adjustment mechanism still enjoys solid bipartisan support because it has helped to remove politics in determining the amount and timing of social security increases.

However, President Reagan has recommended that the 1982 social security automatic adjustment will be delayed by 3 months.

The administration's proposal strikes at the very heart of cost-of-living protection principle. At a time when the elderly need all the help they can muster to cope with inflation, the President would arbitrarily push back the social security increase due to them by law.

Social security beneficiaries now receive cost-of-living increases each July, provided the inflation rate is at least 3 percent. The adjustment is computed by determining the rise in prices from the first quarter in the previous year—January, February, and March—to the first quarter in the current year. For example, the 11.2-percent increase this past July was based upon the inflation rate from the first quarter in 1980 to the first quarter in 1981.

The cost-of-living adjustment mechanism provides valuable protection for older Americans and other social security beneficiaries, but it still only enables them to play a catch-up game with inflation. The span of time from the first month for measuring the inflation rate for the adjustment and

the actual receipt of the check is 18 months.

President Reagan wants to make elderly and other social security beneficiaries wait an additional 3 months. This multibillion dollar cut strikes at those Americans who are least able to defend themselves in the current economic crisis. Older Americans have been paying higher prices for food, fuel, electricity, and other necessities. and now, they will be asked to shoulder perhaps the greatest burden of any group in our Nation.

It is high time that the administration stop trying to balance the budget on the backs of the sick, the disabled, and the elderly.

Nearly 600,000 persons 65 or older were added to the poverty rolls during the past 2 years, from 3.3 million in 1978 to 3.9 million in 1980. This represents the sharpest increase since poverty statistics were first tabulated more than two decades ago.

Poverty is a bare bones existence: Less than $3,941 a year for a single aged person and $4,954 for an older couple.

If the Reagan proposal to postpone the cost-of-living adjustment and other administration cutbacks is adopted, many more older Americans will be added to the poverty rolls.

Congress has already enacted substantial social security reductions—cuts which I strongly opposed—in the Omnibus Budget Reconciliation Act.

Social security's financial integrity can be maintained for the immediate future through the use of interfund borrowing among the social security trust funds under Congressional Budget Office assumptions.

My proposal would also protect others whose benefit increases are pegged to the social security cost-of-living adjustments. These individuals would include supplemental security income recipients, railroad retirement annuitants, and veterans receiving non-service-connected disability pensions.

My resolution would make it clear that Congress will not be a partner in reducing the purchasing power of people who are hardest hit by inflation.

For these reasons, I urge prompt and favorable action on my resolution.

This proposal for the cost-of-living adjustment delay is not needed. It is unfair. And, it deserves to be soundly rejected.

H. CON. RES. 189

Concurrent resolution expressing the sense of the Congress that the schedule of cost-of-living increases in benefits under title II of the Social Security Act should be maintained as currently in effect

Whereas the social security system is the major source of financial protection for most of our Nation's elderly and disabled;

Whereas many of the 36,000,000 social security benefit recipients depend on benefits under the social security system to shield them from the devastating impact of inflation;

Whereas the proposal of the President to delay cost-of-living increases in social security benefits would erode this vital protection and jeopardize the economic security of countless older or disabled Americans; and

Whereas the Congress intends to keep its long-standing promise to the American people who have labored to build the social security system: Now, therefore, be it

*Resolved by the House of Representatives (the Senate concurring)*, That it is the sense of the Congress that the schedule of cost-of-living benefit increases under title II of the Social Security Act as in effect on the date of the adoption of this resolution should be maintained.●

## CONGRESSIONAL SALUTE TO THE HONORABLE RAYMOND V. ARNOLD, GRAND EXALTED RULER OF THE BENEVOLENT AND PROTECTIVE ORDER OF ELKS, UPON THE COMMEMORATIVE TRIBUTE OF WAYNE LODGE 2181

HON. ROBERT A. ROE

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 22, 1981*

● Mr. ROE. Mr. Speaker, I am pleased to call your attention to a special testimonial and commemorative program that is taking place in my hometown of Wayne in tribute to the grand exalted ruler of the Benevolent and Protective Order of Elks (B.P.O.E.), the Honorable Raymond V. Arnold of Michigan, under the sponsorship and leadership of Wayne Lodge 2181 of B.P.O.E. and its esteemed officers:

The Honorable Alfred Greig, exalted ruler; Ronald Del Balso, leading knight; Thomas Wolke, loyal knight; Raymond Favocci, lecturing knight; Harry Avogardo, secretary; Bernard Brozowski, treasurer; Herb Deeths, tiler; Norman Gilman, esq.; James Randazzo, chaplain; Harold Morganfruh, inner guard; William Tylka, organist; Anthony Fiorello, justice of the subordinate forum; Leon Noorigan, trustee; Joseph Buckley, trustee; John Stefanacci, trustee; Charles Werkley, trustee; John Riccardi, trustee; Louis V. Messercola, past exalted ruler and banquet chairman; together with two outstanding dignitaries of the Elks: The Honorable Edward Van Vooren, State president of the New Jersey Elks Association; and William Jay Jernick, past grand exalted ruler.

Mr. Speaker, on Tuesday, September 29, the residents of Wayne, our Eighth Congressional District, and State of New Jersey will join with these exemplary leaders of the Wayne, State, and national Elks in testimony to the lifetime of good works of a distinguished citizen, outstanding community leader, and good friend, the Honorable Raymond V. Arnold, whose standards of excellence in the principles of charity, justice, brotherly love, fidelity, and American patriotism under the auspices of the B.P.O.E. have earned him the highest office and most respected national title of grand exalted ruler—the chief officer—of the Elks. I know that you and our colleagues here in the Congress will want to join with me in extending our warmest greetings and felicitations to Raymond Arnold and share the pride of his good wife, Eleanor, and their family in this milestone of achievements in their family endeavors.

Mr. Speaker, we are all aware of the charitable and benevolent activities of the Elks which span the needs and concerns of all of our people—young and adults alike—and especially their generous contributions to God's special children who are physically handicapped. The Elks have provided assistance to needy and unfortunate individuals. It has helped victims of the Chicago fire, given to flood relief, contributed to the work of the Red Cross, aided Scout work, supported hospitalized veterans, and provided scholarships for the education of our young people—to name but a few of their vast endeavors of benevolence. They are particularly identified with their devotion to Americanism and have brought an added quality of life and way of life to the people of our Nation.

It is fitting and appropriate that we take this opportunity to commend and express our heartiest congratulations to the grand exalted ruler of elkdom, the Honorable Raymond V. Arnold, who has recently been elected the chief officer to serve the membership of this most prestigious fraternal organization nationwide during the current fiscal year 1981–82.

Mr. Speaker, insert at this point in our historic Journal of Congress a profile of Ray Arnold as prepared by the Jackson, Mich., Lodge No. 113 upon presenting his as their candidate for the office of grand exalted ruler with confidence that his experience, quality of leadership, and devotion to the B.P.O.E. would eminently qualify him as an outstanding candidate for this most esteemed and highest office of the B.P.O.E. His résumé reads, as follows:

Raymone V. Arnold is a member of Jackson, Michigan Lodge No. 113, located in the gently rolling farmland hills of South Central Michigan with an economic base closely tied to the auto industry of Detroit.

Brother Arnold was born in Erie, Michigan, on September 27, 1925, to parents who had immigrated to the United States from Europe. He attended the Trinity Lutheran Grade School in Monroe, Michigan, and moved to Toledo, Ohio, then to Addison, Michigan, where he attended high school, taking some extra courses in his senior year in order to graduate mid-year to enlist in the United States Army Air Force which he did in March of 1944 becoming a pilot cadet in the Air Force program. With the ending of the war he moved to Jackson, building

tires at the Goodyear Tire & Rubber Company, and at the same time being a full time student at Jackson Junior College. He was able to enter the combined curriculum program at the University of Michigan Law School and graduated in 1952 after six years rather than the normal seven years, with a degree of Juris Doctor.

He was associated in the practice of law with C. E. Bigg, and also in the operation of Central Adjusting Bureau specializing in tort law and basically doing defense work for insurance companies. Upon Mr. Bigg's retirement in 1960, he was a sole practitioner until 1965 when he became associated with Felix F. Best, forming a partnership in 1966 and then a professional corporation now operating under the name of Best, Arnold, Gleeson & Best, P.C., and still specializing in negligence defense work, and in which he is now one of six full time attorneys.

Over the years he has held memberships in the American Bar Association, Michigan Bar Association and Jackson County Bar Association, and is admitted to practice in the State of Michigan and before the Federal Court. He is also an arbitrator for the American Arbitration Association.

Brother Arnold has been deeply interested in sports and is a member of several sports organizations including archery, horseshoes, golf and bowling. In bowling he has been associated with the American Bowling Congress since 1965, first as a director, then Vice President since 1972, and in 1980 as President of this sports organization of 5,000,000 members. He was inducted into the Jackson Bowling Association Hall of Fame in June of 1980.

Initiated in the Jackson Elks Lodge No. 113 on June 7, 1954, he immediately became active and several weeks later was appointed Chaplain, and in 1955 to the office of Esquire, and then progressed through the chairs becoming Exalted Ruler in the year 1959-60. He became a member of the Past Exalted Rulers Association of his home lodge, being a past secretary and past president of that organization. He was twice elected as trustee of his home Lodge and served on all of the Lodge committees over the years. In recognition of his distinguished service to Elkdom and to the community of Jackson, the Jackson Lodge voted him an honorary life membership in 1960.

Brother Arnold was appointed to the Michigan State Elks Law Committee in 1963, and he has been on that committee each year since that date being its chairman for 15 years. In 1970 he was District Deputy Grand Exalted Ruler to Honorable Glenn L. Miller. He was on the Grand Lodge Judiciary Committee from 1972 to 1980, being its chairman for the last two years.

At the annual convention of the Michigan Elks Association on May 16, 1980, he was honored by the Past Presidents of that association and the delegates in session who elected him as an Honorary Past State President.

Brother Arnold and the former Eleanor McQuillin were married on June 15, 1946, and were blessed with two fine boys, Thomas, age 33, and Robert, age 27. They now have two granddaughters, Kim and Kris, ages 14 and 12, and one grandson, Joshua, age 1½.

Mr. Speaker, I am pleased to join with our Wayne Lodge 2181, B.P.O.E., in this testimony to the grand exalted ruler of the B.P.O.E. and seek this national recognition of Raymond Arnold for his outstanding contribution to the American way of life and the American dream. He has labored in the vineyard with other community leaders and our veterans in many, many social, civic, and charitable endeavors. His standards of excellence and exemplary service have truly enriched our Nation. We do indeed salute a most distinguished citizen, community leader, and great American—the Honorable Raymond V. Arnold, the grand exalted ruler of the Benevolent and Protective Order of the Elks.●

## TRIBUTE TO RILEY "B. B." KING

### HON. JOHN CONYERS, JR.

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 22, 1981*

● Mr. CONYERS. Mr. Speaker, "B. B." King, a great artist and talented entertainer, just passed a significant milestone. He has just completed his 40th benefit concert for prison inmates. The achievement is even more remarkable, given the fact that it was accomplished in a little over 9 years.

In 1972, B. B. King and trial attorney F. Lee Bailey founded the Foundation for the Advancement of Inmate Rehabilitation and Recreation (FAIRR). FAIRR is a nonprofit organization dedicated to improving the morale and rehabilitation efforts of prisons through cultural exposure to entertainers, writers, musicians, and public figures, and better quality libraries and available music, films, and literature. B. B. King's efforts toward prisoners and prison rehabilitation through FAIRR have been remarkable and the value of his help, immeasurable.

In a sense, it is puzzling that a man who has never been convicted or imprisoned can be so compassionate about such forlorned and forgotten people, but one only has to listen to B. B. King's music to understand. B. B. King sings the "blues," the expressions of joy and sorrow of the black experience in the rural South. Many prison inmates share roots with B. B. and his blues and he is sensitive to this. In fact, B. B. King's early life is probably indistinguishable from many of the inmates he recently performed for at Parchman Prison in Mississippi. He left school after the 10th grade to earn a living by picking cotton on a plantation in the Mississippi Delta. Fortunately for music lovers the world over, he took up the guitar in late adolescence and began playing the blues, one of the few occupations open to black people in the delta, at that time, that promised deliverance from a lifetime of manual labor. He moved to Memphis and eventually landed a job with WDIA, the first black operated radio station in the country. His real name is Riley, but a local disc jockey nicknamed him the "Beale Street Blues Boy" and it stuck. Later the nickname was shorten to "B. B." and the rest is history.

Thankfully, B. B. King, in his illustrious career, has never forgotten his heritage, nor the deep compassion such an experience can produce. He constantly reaffirms this compassion through his music and his humanitarian works.●

## BRASS BICUSPID AWARD

### HON. LES ASPIN

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 22, 1981*

● Mr. ASPIN. Mr. Speaker, perhaps we should award the Navy a "Brass Bicuspid Award" for running such an inefficient executive dining room that it costs more than $31 to serve a simple lunch based around a western omelette.

I do not mean to be entirely tongue-in-cheek when I suggest the overall efficiency of the services can be judged by the way they run their exclusive, members' only dining rooms for their top brass.

The cost of lunches ranges from $12 in the Air Force's private dining nest, to $15 in the Army's and $31 in the Navy's. Once again the Navy—home of the $2 billion aircraft carrier—comes in with the most expensive approach imaginable.

The costs really would not matter if the generals and the admirals were picking up the tab. But no admiral no matter how flush is about to lay out $31 for his broiled filet of sole. No; he asks the taxpayer to cough up $26.98 while he pays an average of only $4.05.

It has been said you can tell a man by what he eats. I think you can also tell the brass by what they spend to eat. The spendthrift attitude that prevails in the closed-door dining rooms carries over after lunch.

I want to make clear that the pricey meals don't mean the admirals are lunching on pheasant under glass every day. The problem is the regal style in which the 125 admirals choose to dine with staff galore to look after their needs. The Navy's executive dining room had a staff of 22 to serve 13,500 meals last year while its Air Force counterpart had a staff of 20 to serve 28,000 meals, more than twice as many. That indicates an egregious case of overstaffing in the Navy and is a key reason the taxpayer is subsidizing the admirals' tuna especialle served with fruit sections and cottage cheese to the tune of $26.98.

But it does not mean the Air Force is terribly efficient. The charbroiled Delmonico steak topped with onion rings, which sells for $1.75, is subsidized by the taxpayer to the tune of $10.12 in

the Air Force executive dining room—not exactly a bargain meal for the Treasury—although the $2.22 the generals pay on average is a bargain meal for them.

There are two other executive dining rooms in the Pentagon, one for the officials of the Office of the Secretary of Defense and one for the principal staff working for the Chairman of the Joint Chiefs of Staff. All are heavily overstaffed, with a ratio of only 4.2 meals per employee served each day. All are heavily subsidized with appropriated funds, with the total subsidy for the five dining rooms coming to $1,438,322 in fiscal year 1980, or an average of $14.28 per meal.

PENTAGON EXECUTIVE DINING ROOMS—FISCAL 1980 COST DATA

| | Income from meals | Appropriated funds | Total |
|---|---|---|---|
| OSD—26,004 meals served; 19 staff: | | | |
| Total | $74,739.00 | $313,588.00 | $388,325.00 |
| Per meal | 2.87 | 12.06 | 14.93 |
| CJCS—11,068 meals served; 12 staff: | | | |
| Total | 32,298.00 | 187,462.00 | 219,760.00 |
| Per meal | 2.92 | 16.94 | 19.86 |
| Army—21,876 meals served; 18 staff: | | | |
| Total | 42,240.00 | 286,389.00 | 328,629.00 |
| Per meal | 1.93 | 13.09 | 15.02 |
| Navy—13,505 meals served; 22 staff: | | | |
| Total | 54,737.00 | 364,414.00 | 419,151.00 |
| Per meal | 4.05 | 26.98 | 31.03 |
| USAF—28,297 meals served; 20 staff: | | | |
| Total | 62,768.00 | 286,469.00 | 349,237.00 |
| Per meal | 2.22 | 10.12 | 12.34 |
| Total—100,750; 91 staff: | | | |
| Total | 266,782.00 | 1,438,322.00 | 1,705,104.00 |
| Per meal | 2.64 | 14.28 | 16.92 |

I am frequently asked, "What about the dining room for Members of Congress?" So let me note here that according to the auditors' report for fiscal year 1980, the same time period covered by my data for the Pentagon, the House of Representatives Members' dining room lost a total of $42,010, just looking at food sales. While I do not have a figure on the number of meals served, that works out at a loss averaging $95.69 per member for the entire year. That compares with a loss at the Pentagon averaging $1,832.26 for each of the 785 members of the private dining rooms at the Pentagon.

The entire House restaurant system, incidentally, showed a profit of almost $11,000 last year, largely due to the highly profitable tobacco sales. This is not a defense of the Members' dining room loss. I believe that as a matter of principle it should not be subsidized even to the tune of a penny a meal. But I think it speaks volumes to see that the House, which has never been criticized for ignoring perks, enjoys a meal subsidy totaling at best 5 percent of that found in the austere Pentagon.●

## SMALL BUSINESS INNOVATION LEGISLATION

### HON. BERKLEY BEDELL

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 22, 1981*

● Mr. BEDELL. Mr. Speaker, I am pleased to note the addition of another two dozen cosponsors of H.R. 4373, the proposed Small Business Innovation Research Act of 1981. This brings to 83 the number of Representatives who are cosponsors of this bill, which was introduced on August 4 by Mr. McDADE and myself.

A similar measure in the Senate is cosponsored by 82 Members of that body. I am happy to report that the Senate Small Business Committee today voted unanimously to report that legislation.

Here in the House, Congressman LAFALCE last week held hearings on innovation in his Small Business Subcommittee on Oversight. In addition to the Bedell-McDade bill, the hearing considered other innovation proposals, including those put forward by NEAL SMITH, PARREN MITCHELL, JERRY LEWIS, and JOHN LAFALCE. All of the bills are quite similar in concept and effect, and the small business community strongly supports this sort of legislation.

Mr. Speaker, the need for this legislation is obvious to all who have studied the issue. The small business community is by far the most productive and innovative segment of our economy. Yet it receives the smallest portion of the Federal Government's expenditures in support of research and development. This is wasteful and counterproductive.

H.R. 4373 and similar bills simply require that a portion of Government R. & D. outlays go to small businesses. The shame of it is that we even need to consider legislation to force the bureaucracy to do what is so obviously sensible.

Based on the Senate committee's enthusiastic action this morning and the strong support this legislation enjoys here in the House, I am hopeful that small business innovation research legislation can be enacted before the year's end. That would be something we all could be proud of.●

# SENATE—*Wednesday, September 23, 1981*

*(Legislative day of Wednesday, September 9, 1981)*

The Senate met at 11 a.m., on the expiration of the recess, and was called to order by the President pro tempore (Mr. THURMOND).

PRAYER

The Chaplain, the Reverend Richard C. Halverson, LL.D., D.D., offered the following prayer:

Let us pray.

Blessed God who art all powerful, we humans find it very difficult to exercise power without being corrupted by it. Sometimes, O Lord, those of us who have little power with little prestige are most impressed with ourselves and flaunt our petty position. Give us the wisdom of all people to take ourselves least seriously.

In this unique body, which wields such enormous power, protect us from its seductive, destructive influence. Inoculate us against the virile infection of self-importance. As we drink the heady wine of power, may we humble ourselves in the presence of the One in whom dwells all power and authority, remembering that those who rule do so at His pleasure.

May we realize that the mark of human insubordination is to lord it over others and the mark of greatness is to be everybody's servant. Temper our awareness of privilege in this place with humility and love toward each other and especially toward our spouses and children. We pray this in the name of Him who was servant of all. Amen.

## RECOGNITION OF THE MAJORITY LEADER

The PRESIDENT pro tempore. The majority leader is recognized.

## THE JOURNAL

Mr. BAKER. Mr. President, I ask unanimous consent that the Journal of the proceedings be approved to date.

The PRESIDENT pro tempore. Without objection, it is so ordered.

## ORDER FOR TRANSACTION OF ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, I ask unanimous consent that, following the time allocated to the two leaders following the standing order and the special orders heretofore entered for this day in favor of the Senator from Wyoming (Mr. WALLOP), the Senator from Arkansas (Mr. BUMPERS), the Senator from Tennessee (Mr. BAKER), and the Senator from Illinois (Mr. PERCY), there be a period for the transaction of routine morning business not to extend beyond the hour of 1 p.m. today, in which Senators may be permitted to speak for not more than 5 minutes each.

The PRESIDENT pro tempore. Without objection, it is so ordered.

## ORDER FOR CONSIDERATION OF S. 1196 AT 1 P.M. TODAY

Mr. BAKER. Mr. President, I have advised and consulted with the distinguished minority leader on this matter and, indeed, spoke to this subject yesterday so Senators may have maximum notice.

I ask unanimous consent, Mr. President, that at 1 p.m., in accordance with the authority of the order previously entered, the Senate proceed to the consideration of S. 1196, the foreign assistance bill.

The PRESIDENT pro tempore. Without objection, it is so ordered.

## ORDER FOR RECESS UNTIL 9:30 A.M. TOMORROW

Mr. BAKER. Mr. President, I ask unanimous consent that, when the Senate completes its business today, it stand in recess until the hour of 9:30 a.m. on tomorrow.

The PRESIDENT pro tempore. Without objection, it is so ordered.

## LEGISLATIVE SCHEDULE

Mr. BAKER. Mr. President, at 1 p.m. today, after the recognition of the two leaders, four Senators on special orders, and the transaction of routine morning business, the Senate will proceed to the consideration of the foreign assistance bill, S. 1196. The leadership expects that the Senate will be asked to remain in session until approximately 6 p.m. today, our normal and more or less regular time to conclude the business of the Senate on days other than Thursdays.

It is my hope that, tomorrow, the Senate can temporarily lay aside S. 1196 under the order previously entered and proceed to the consideration of House Joint Resolution 325, the continuing resolution, if that resolution is available and on the calendar of legislative business. That will be Thursday, Mr. President, and Senators are on notice and should be reminded that Thursdays can be expected to be late evenings if a late session is necessary in the course of a regular week. I cannot now estimate how late the Senate will be in session tomorrow, but well past the dinner hour would be my expectation.

Mr. President, if, indeed, the Senate does proceed to the consideration of the continuing resolution tomorrow, I hope that passage of that measure will occur either on tomorrow—most likely late in the evening—or on Friday if necessary. I am sure I need not remind Senators that it is urgently important that we complete action on the continuing resolution, since the regular appropriations bills have not been passed and since, at midnight on September 30, our fiscal year ends. Without the continuing resolution, substantial parts of the Government would not be in a position to function.

I also call to the attention of Members the letter from former Attorney General Benjamin Civiletti to the effect that, absent appropriations by regular appropriations bills or continuing resolutions approved by both Houses of Congress and signed by the President, it is not possible for the Government to function except in a custodial capacity. That opinion was confirmed in a letter by the present Attorney General, William French Smith, this year. Therefore, I repeat, Mr. President, it is urgently important that we complete our deliberations on the continuing resolution before the end of this fiscal year.

In addition to that, Mr. President, we have, as well, the companion issue of the debt limit extension, which must also be passed as a practical matter before the end of this fiscal year.

So, I hope that we can finish the continuing resolution tomorrow or, if necessary, on Friday; then, on Friday, that the Senate can proceed to the consideration of the House Joint Resolution 265, which is on the calendar.

If we can reach the debt limit extension on Friday, I hope, then, that we can finish it on Monday or at the latest on Tuesday. I do not believe there is a Member in this Chamber who enjoys less the business of trying to legislate on an emergency, panic basis, hours before or sometimes hours after the stroke of midnight at the end of the fiscal year. So I urge Members to consider that we should pass both the continuing resolution and the debt limit, not on Wednesday at midnight, which is the 30th of September, but well in advance of that, perhaps by Tuesday.

LATE SESSIONS NEXT WEEK

I do not expect a Saturday session this week. If there is to be a Saturday session because of unforeseen circumstances of an emergency nature, I shall consult with the minority leader and I shall try to give Senators as much notice as possible. But Senators should be on notice that, because of the exigencies of the time that I have just described, the Senate may be in session late on Monday, Tuesday, and Wednesday of next week, if that is necessary to complete action on both the continuing resolution and the debt limit.

I regret to make that statement, Mr. President, because I wish to abide by the informal policy of having late sessions only on Thursdays, but I am sure each Member will understand the necessity for the announcement in view of the necessity to deal promptly with the debt limit and continuing resolution.

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

After the debt limit and continuing resolution are disposed of, the foreign assistance bill will recur as the pending business.

## SCHEDULING OF VOTES DURING ROSH HASHANAH

Mr. BAKER. Mr. President, there is only one other matter I should address at this time in terms of the schedule and activities of the Senate.

Prior Senate practice has established the precedent that no votes would occur between sundown Monday and sundown Tuesday during the observance of the Jewish holiday, Rosh Hashanah. While the Senate will be in session on Monday and Tuesday during that period, it would be the intention of the leadership to ask unanimous consent to stack any rollcall votes that might be ordered during that time until after sundown on Tuesday, the 29th of September.

Mr. President, I yield to the Senator from Alaska.

## LOSSES OF YOUNG EXECUTIVES TO THE PAY CAP

Mr. STEVENS. Mr. President, I again wish to address some of the negative effects of the executive pay cap. I have generally listed the losses of some of our executive corps including specific individuals and positions. Those listed have generally been at the Senior Executive Service level. Most have left Federal service by retiring. As important as these may be, the greatest loss to us may be those young managers who are the pool of potential executives for our Senior Executive Service. We must recognize that these individuals who rise to this pre-SES level at a young age are the cream of the management corps. These are the very high achievers whom we must compete for with private industry if we are to improve Government service and efficiency.

I would like to quote several instances where this effect is being seen in agencies. The best Government-wide indication of these types of losses is supplied by the OPM figure of 363 career executive resignations from the Federal Government over the last 2 years. These individuals were obviously not old enough for retirement yet received lucrative offers from private employers. The Nuclear Regulatory Commission lost six senior executives and 13 GS–15's through resignations over the last year or two. The Department of Housing and Urban Development lost 18 executives since 1978 through resignation. The National Labor Relations Board has lost one-third—11—of their regional directors through resignation in the last 2 years, several of whom were in their thirties and early forties.

The Department of Defense is replete with similar instances of executive losses at nonretirement ages to private industry. Mr. President, I shall present for the RECORD the letter I received from the Department of Defense in which they describe these losses.

Similar to resignations, another indicator of the adverse impact of this pay cap on our younger managers is the less than enthusiastic interest in applying for Senior Executive Service developmental programs and positions. Again DOD offers several examples, such as:

Only 1 of 8 senior GS–15- employees applied for a Senior Executive Service position which was recently advertised at the Air Force Accounting and Finance Center.

Only 196—21 percent—of 935 Air Force employees at the GS–15 level applied last year for the SES candidate development program. None of those who applied were considered the best qualified for entry into the SES.

The Department of Commerce recently posted an SES vacancy, only 15 GS–15 employees applied. When the pay cap was continued in the continuing resolution, 11 of those 15 applicants withdrew their applications.

These examples demonstrate that we cannot persuade individuals to assume positions of higher level responsibilities without a corresponding increase in compensation. Moreover, we cannot afford to train and develop young managers, usually our most talented people, at great time and expense only to lose the benefits of this developed talent to private industry. We must pay our executives what they are worth.

Mr. President, I ask unanimous consent that the letter from the Assistant Secretary of Defense may be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

ASSISTANT SECRETARY OF DEFENSE,
*Washington, D.C., September 4, 1981.*

Hon. TED STEVENS,
*Chairman, Subcommittee on Civil Service, Post Office and General Service, Committee on Governmental Affairs, U.S. Senate, Washington, D.C.*

DEAR MR. CHAIRMAN: This is in further reply to your letter of July 31, 1981, to the Secretary of Defense in which you requested information regarding problems of recruiting and retaining senior executives.

Recruitment and retention of senior executives are matters of major concern throughout the Department of Defense. As both executive salaries in the private sector and the cost of living continue to rise, while salaries for our senior executives remain unchanged, the situation becomes worse. As an illustration, since 1969, the Consumer Price Index has increased 141% and the Hourly Earnings Index has increased 132%, yet our senior executives have received pay increases of only 43%. Since March of 1977, the pay limitation imposed on our senior executives by 5 U.S.C. 5308 has increased only 5½%, while the cost of living has increased over 47%. As a result, we are now losing senior executives through retirements and resignations at an abnormally high rate and are finding it extremely difficult to attract quality replacements.

As requested in your letter, we are providing in the attachment examples of recruitment and retention problems. These examples are indicative of the types of problems being encountered and represent only a portion of the volume of such cases. We have also attached a copy of a letter which was sent to the Office of Personnel Management last year in connection with the quadrennial review of executive salaries; we believe its observations are still valid.

Your interest in this matter and the opportunity to provide you with this information are appreciated.

Sincerely,

LAWRENCE J. KORB,
*Assistant Secretary of Defense,*
*(Manpower, Reserve Affairs and Logistics).*

EXAMPLES OF SENIOR EXECUTIVE RECRUITMENT AND RETENTION PROBLEMS

OFFICE OF THE SECRETARY OF DEFENSE AND DEFENSE AGENCIES

1. Separations from the Senior Executive Service during calendar year 1981 have been at an annual rate of 18.85 percent. During calendar year 1980, the annual rate was approximately 20 percent.

2. Since the inception of the Senior Executive Service, separating individuals have cited on official documents a financial motivation for leaving, as follows:

A 47-year-old career executive who worked for the Deputy Under Secretary of Defense for Policy cited "need money to put children through college" as a reason for leaving.

A promising 42-year-old scientist manager cited "financial limitation (pay cap)."

Another scientist manager in his forties stated that he was leaving for the "opportunity to . . . make more money."

A promising 39-year-old official left to accept a position in industry at "substantially increased pay."

A 43-year-old scientist cited "a substantial salary increase that is not possible within the Senior Executive Service" as his reason.

3. In addition to those who have stated in writing their reasons for leaving, the servicing civilian personnel office is also aware of the following separations for compensation reasons:

A high level official in the critical area of undersea surveillance has announced that the reason for his acceptance of a position with industry was the significant loss of real income that he has suffered over the last few years as a federal employee. He stated that his reasons for leaving "are strictly financial."

Significantly more money was also informally reported as the reason two high level advanced research managers left DOD for employment wtih TRW and COMSAT, that eight officials moved to private industry, and that two officials went into private practice of law.

4. The following are examples of recent recruiting problems:

A selectee for the position of Assistant to the Secretary of Defense (Atomic Energy)/Chairman, Military Liaison Committee was interviewed and declined the offer because of the pay cap.

A selectee for the position of Deputy Under Secretary of Defense (International Programs and Technology) declined because of the pay cap.

A selectee for the position of Deputy Under Secretary of Defense (AM) declined because of the pay cap.

The position of Staff Specialist for Propulsion in the Office of Engineering Technology had to be advertised a second time because there were no qualified applicants the first time.

DEPARTMENT OF THE ARMY

1. The following are examples of declinations and resignations directly related to pay:

The selection for the position of Assistant Director for Maintenance Management, Office of the Deputy Chief of Staff for Logistics, Washington, D.C., was made on 12 March 1980. The selectee's qualifications were approved by an Office of Personnel Management

(OPM) Qualifications Review Board (QRB) on 13 March 1980. The selectee subsequently notified the selecting official that due to the high cost of housing in the Washington metropolitan area, he was declining the position.

The selection for the position of Director, Study Management Program, Office of the Chief of Staff, Army, Washington, D.C., was made on 12 May 1980. OPM's QRB approved the selectee's qualifications on 18 June 1980. On 23 June 1980, the selectee declined, to accept a position in private industry with better pay.

The selection for the position of Army Spectrum Manager, Office of Assistant Chief of Staff for Automation and Communication, Washington, D.C., was made on 8 January 1981. The selectee's managerial qualifications were approved by OPM on 26 March 1981. On 3 April 1981, the selectee notified the servicing personnel office of his declination for a combination of reasons including the Congressional continuation of the pay cap and a stronger counter offer from his present employer which made it financially impossible to accept the offer.

The Director, Data Processing Directorate, Ballistic Missile Defense Advance Technology Center, Huntsville, Alabama, resigned on 27 February 1981 to accept employment in the private sector. He stated telephonically that he was offered an initial salary increase of 30 percent and much better incentives. He also stated that raising the pay cap and imposing fewer restrictions on incentives would have had a definite bearing on his decision to remain with the Federal Government.

2. In efforts to fill vacant scientific and engineering senior executive positions, numerous companies in the private sector were contacted to solicit applications from interested employees. Attached are samples of the typical letters of response from those companies.

DEPARTMENT OF THE NAVY

1. Prior to July of 1979, the Department of the Navy had an average annual attrition rate of 7 percent at the senior executive level. Since July of 1979, the attrition rate at this level has been approximately 20 percent.

2. Four SES positions were filled at Office of Naval Research headquarters during 1980. Recruiting costs for these positions totalled just over $80,000. Of the 28 applicants who were considered best qualified, only 6 were from outside government.

3. A GS–15 position at the Naval Ocean Research and Development Agency was advertised in 1976, and there were approximately 100 qualified applicants, one-third of whom were from outside government. The same position was recently advertised again. There were only 9 qualified applicants, with only one of these from outside government.

4. The Navy Secretariat recently lost a top attorney to the private sector for nearly twice the salary he was earning as a member of the Senior Executive Service.

5. The Deputy Comptroller of the Navy recently was unable to attract his first choice for a top financial job when he could not match the pay increase offered by the candidate's current employer.

DEPARTMENT OF THE AIR FORCE

1. At the Air Force Accounting and Finance Center, only one of eight senior GS–15 employees applied for a Senior Executive Service position which was recently advertised.

2. The Principal Deputy Assistant Secretary of the Air Force for Research, Development and Logistics recently resigned after only about one year in the job, to work for ITEK Corporation at a substantially higher salary.

3. A recent selectee for the position of Deputy Assistant Secretary for Systems declined the position because the personal cost of relocating from California to Washington was anticipated to be too great in light of almost no possibility of a pay increase in the foreseeable future.

4. A Deputy Assistant Secretary in the research and development area resigned and is now working for Sperry Corporation at about twice his Air Force salary. The position has remained vacant because a suitable replacement cannot be found.

5. Last year, a candidate development program for the Senior Executive Service was announced. Of 935 Air Force employees at the GS–15 level, only 196 (21%) applied for the program. Those who applied generally were not considered by the top functional managers the best qualified for entry into the Senior Executive Service.

## ORDER OF PROCEDURE

Mr. BAKER. Mr. President, I ask unanimous consent that I may transfer the control of the time allocated to me under the special order to the distinguished Senator from Illinois, for his control and disposition.

The PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. BAKER. Mr. President, if I have any time remaining under the standing order, which I doubt, I am prepared to yield it back or to yield it to the control of the distinguished minority leader.

Mr. ROBERT C. BYRD. I thank the distinguished majority leader.

## RECOGNITION OF THE MINORITY LEADER

The PRESIDING OFFICER (Mr. DURENBERGER). The Chair recognizes the minority leader.

## GETTING THE COAL ON THE ROAD

Mr. ROBERT C. BYRD. Mr. President, high interest rates, proposals to cut social security, and budget deficits are dominating the minds of policymakers at present. However, the obvious importance of these issues should not totally obscure another crucial area—the need to maintain a balanced national energy policy.

The first 9 months of this administration's tenure have been spent in dismantling and undercutting the development of several different types of alternatives to imported oil. Research in fossil fuels has already been cut by two-thirds. Further cuts in fossil fuel research are likely to be proposed. Energy conservation and solar power programs are targets for additional deep cuts. One scenario reportedly required of the Energy Department by the Office of Management and Budget would shut down all fossil, solar, and conservation research programs.

It is clear that the administration has not been paying attention to the energy developments of our recent past. Oil gluts have appeared and disappeared over the past 7 years at irregular intervals. International politics has as often as not been the cause of wild fluctuations in the price and supply of foreign oil. It is extremely unwise and shortsighted to be complacent about our oil supply situation.

The United States is not alone in its substantial dependence on imported oil. Our European allies import even larger portions of their total energy supply than we do. Their interest in developing a natural gas pipeline to deliver supplies from the Soviet Union is an indication of European dependence on outside fuel supplies.

Coal produced in America can and should make a contribution to lessening our own dependence on foreign oil. American coal exported to Europe and Japan can alleviate some of the economic and political burdens borne by those countries as part of the price of oil.

One traditional supplier of coal to Europe has been Poland. Poland's coal production is currently 20-percent lower than last year, and European customers for Polish coal have had to look elsewhere for fuel supplies.

In short, the world energy supply situation should not be regarded as fixed. We have seen the effects of unexpected shifts in world energy supplies: inflation, unemployment, and fuel shortages. The Western countries must continue to cooperate in long-term energy planning, and must seek to develop a variety of alternative supplies to fuel our economies.

The vast American storehouse of coal cannot be overlooked in this effort. To insure that this energy ace-in-the-hole is used will require a strong commitment on the part of this administration.

American coal development also requires that a serious effort be made to remedy coal transportation problems. The state of our ports, handling facilities, railways, and waterways is far from adequate. It is ironic that the world's most economically advanced nation has a crumbling transportation system for the world's largest coal reserves. Former ambassador Henry Owen, who was involved with the economic summit meetings of the Western nations and Japan from 1977 until 1980, has written an aritcle in The New York Times of September 20 that addresses the question of coal exports from the United States. I commend the article to the attention of my colleagues, as it explores a key aspect of a balanced American energy policy.

I ask unanimous consent that the article, entitled "Getting the Coal on the Road," be printed in the RECORD at this point.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

GETTING THE COAL ON THE ROAD

(By Henry Owen)

If the dredging of channels in a few United States ports is not begun in the next several years, American efforts to beat stagflation will be significantly hampered. To say that this connection is not widely appreciated would be a vast understatement. But the connection is there, and unless we take account of it, we will suffer.

The 1970's showed that sharply rising oil prices meant more inflation and less economic growth in the industrial countries. Oil prices are no longer rising steeply, in part because these countries have reacted to higher prices by reducing their oil consumption and increasing their use of alternative energy sources.

The most important of these alternatives is coal. When the leaders of the seven main industrial countries met at the 1980 economic summit conference in Venice, they pledged their countries to double coal trade in the coming decade. Whether this pledge is fulfilled will do much to determine whether the present relative stability of oil prices continues, or fades away as the current recession wanes and unforeseen interruptions in oil supply occur.

The obstacle to doubling coal trade is not lack of supply in the main exporting countries: The United States, Australia, Poland, and South Africa have sufficient reserves to increase enormously their production of coal for sale abroad.

Nor is the obstacle any lag in demand: Conversion of oil-burning facilities to coal and creation of new coal burning facilities is proceeding so rapidly in Western Europe and Japan that demand for coal imports by these regions is expected to increase fourfold from 1979 to 1980. Despite present softness of the coal spot market in Europe, a very substantial long-term increase in demand remains likely.

The obstacle to increased coal trade lies in artificial restraints in the coal exporting nations: Unstable conditions in Poland, which have reduced its coal output; fear of interracial strife in the future and an equivocal government policy in the past, which have made importers reluctant to rely unduly on South Africa; periodic labor difficulties in Australia, reflected in last year's strike, and inadequate port facilities in the United States, which have provoked bitter complaints from our trading partners.

The problems in Poland, South Africa, and Australia are not susceptible to rapid resolution. So the United States will remain a key residual supplier—the more so since most coal importers are anxious to diversify their sources of supply in order to reduce their vulnerability to untoward events in other countries. The United States role is so large as to make it unlikely that world coal trade will be doubled unless restraints on that role created by inadequate ports are overcome.

There is a good deal of misunderstanding about these restraints. Three separate problems need to be distinguished from each other:

There are the short-term problems of adjustment that caused large numbers of European ships to wait long periods to load coal at United States East Coast ports last spring. These problems have been eased not only by the end of the Australian strike but also by innovative procedures that have made it possible to schedule waiting ships at our East Coast ports more efficiently and by increased coal exports from our Gulf Coast ports.

There is the medium-term problem of structural change: United States coal loading and storage port facilities were designed for lesser amounts than must now be moved, and were designed primarily for metallurgical coal, rather than the steam coal that is now in growing demand abroad. So these facilities must be expanded and modernized. The private companies that own the piers and the relevant port authorities are taking effective steps to these ends.

There is the longer-term problem of channel depths. Even if the improvements in coal loading and storage facilities described above are achieved, United States coal ports will remain inadequate, because European and Japanese coal importers want to shift some of their coal commerce from the present Panamax 60,000-ton ships to larger ships (100,000 tons and over), which can transport coal more economically. Present water depths in most world coal ports are too shallow to take these ships. Steps are being taken to remedy this condition in some European, Australian, and South African ports, but not in the United States.

The United States lag is due to a legislative problem: The Administration has concluded that dredging should not and cannot, in present budgetary circumstances, be financed by the Federal Government. This means that a bill will have to be passed by the Congress defining how this function is to be transferred to the states and local authorities. And it has proved damnably difficult to get Congressional agreement on such a bill. Many coastal states are involved, and their immediate interests and financial capabilities differ.

Until it is clear that a few United States coal ports will be dredged, some European and Japanese coal importers will be reluctant to sign long-term contracts to buy greatly increased amounts of American coal. In the absence of such contracts, some American companies will be reluctant to make the long-term investments needed to fulfill United States coal export potential. This will not only limit world coal trade but also hurt those Americans who make their living producing and transporting coal.

The Administration is cutting red tape on dredging. Legislative action in the next 12 months is also needed, and is feasible. But this will require that two things occur:

That the Administration take the lead in seeking legislative consensus.

That public demand for port dredging be felt, making it easier for the members of Congress principally concerned to compromise.

Failing this, the great United States export coal boom that people talk about for the 1980's will turn out like the great United States domestic coal boom that people used to talk about for the 1970's—a dazzling vision that is only partially reflected in expanded sales of the hard black stuff that substitutes for oil.

Without a United States coal export boom, the link between oil consumption and economic growth in the industrial world will not be broken—a link that condemns us to recurring inflation and low growth, whenever the balance between oil demand and supply tilts, as it may periodically, against the oil importing nations.

There is an excellent chance of solving our coal port problem. But only if a lot more public attention is paid to it than is now the case.

## ORDER OF PROCEDURE

Mr. ROBERT C. BYRD. Mr. President, I will be glad to yield my remaining time to the Senator from Wyoming, if he wishes additional time.

Mr. WALLOP. Mr. President, I thank the minority leader. He is always considerate in accommodating Senators and the time of the Senate.

Mr. ROBERT C. BYRD. If the Senator from Wyoming does not wish any additional time, does the Senator from Arkansas (Mr. BUMPERS) need any additional time?

Mr. BUMPERS. Mr. President, I have a special order for 15 minutes. I should like to increase that to 20, if I may.

Mr. ROBERT C. BYRD. Mr. President, how much time do I have remaining?

The PRESIDING OFFICER. Six minutes and thirty-four seconds.

Mr. ROBERT C. BYRD. I ask unanimous consent that I may transfer that 6 minutes to the control of Mr. BUMPERS, at such time as he executes his special order.

Mr. BUMPERS. I thank the Senator.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Wyoming.

Mr. WALLOP. I thank the minority leader.

## REVIEW OF TAPES AND RECORDINGS IN THE MATTER OF SENATOR WILLIAMS

Mr. WALLOP. Mr. President, I rise again today, as I have each morning this week, and will for the remainder of this week, to urge Senators to take advantage of the special showings of the taped material and the audio material in the matter of Senator WILLIAMS, and to urge Senators, as well, to study carefully the report of special counsel and the report and response of the counsel to Senator WILLIAMS.

As of this morning, only 18 Senators have availed themselves of the opportunity of viewing those tapes and listening to those recordings. That leaves some 80 of us who have not seen this material and who will come to the floor at some moment to make a judgment on the reputation of not only a colleague but also the Senate itself, with less than adequate knowledge.

Some Senators have said to me, "I really would like to see those, if only I had the time." I am here today to urge my colleagues to consider that there is no more valuable time that a Senator can spend than in fulfilling the constitutional role that is required of us to judge the fitness of the Members of this body.

This recommendation of the committee is the collective recommendation of a group of people who sat throughout the hearings and who have been familiar with the material, but it is not the judgment of the Senate. It is a recommendation to the Senate, and it cannot be used as a crutch by individual Senators to accommodate the judgments that ultimately each of us will have to make.

I believe it is fair to say that any one of us can judge the arguments of the committee's counsel, Dean Griswold, or the counsel to Senator WILLIAMS on the basis of their logic. But consider how much better it would be to judge it on the basis of your own logic, your own familiarity with the data and material that have been gathered and presented to you.

I am not here urging the Senate to do one thing or another thing with regard to its ultimate judgment. I am urging it to inform itself so that that judgment when it is made can be made on the basis of an informed mind troubled by the matter that has been brought in front of it.

It is not the reputation of Senator WILLIAMS alone that hangs in the bal-

ance. The public perception of every sitting Senator will hang on the judgment the Senate makes and Senators will be fairly asked by that same public to defend that judgment, whatever it is, that is made.

So, too, will be affected in the public's mind the reputation of every Senator who has ever held that title. Historically, it will go back in time.

The Senate has not expelled one of its Members except for treason and it has not expelled one of its Members since the Civil War.

This is no lighthearted recommendation that your Committee on Ethics brings to you. This is a matter of the utmost gravity and it is the public's faith and perception of this institution, whatever judgment it makes, that will hang as well in the balance as the individual reputations of the people involved.

The public has a right to feel that we have taken this matter seriously. The public has a right to feel that the judgment has been made fairly. Senator WILLIAMS' counsel has continued to praise the committee's performance as extraordinarily fair. I think that it would be wise of the Senate to have Senator WILLIAMS' counsel appraise the performance of the Senate as extraordinarily fair, and it is my judgment that it cannot be fair without the personal information and personal involvement of each and every Senator as we reach that judgment.

I do not mean to stand and preach every morning. I am simply trying to bring to my colleagues' attention the gravity of the matter that is in front of us, the seriousness of the recommendation, and the historic nature of it.

Your friend and colleague has a stake in this matter which requires that we judge him fairly. Your public, your constituencies, and all America has a stake in this matter which requires that we judge fairly.

Again I urge my colleagues to take advantage of the showings which remain yet, one more this afternoon and two more on Friday. Time schedules of the viewings are in your offices in the "Dear Colleague" letter.

I rest again until tomorrow when I shall again urge my colleagues to take advantage of the showings remaining on Friday.

I yield the floor.

The PRESIDING OFFICER. The Chair thanks the Senator from Wyoming for that bit of advice.

## RECOGNITION OF SENATOR BUMPERS

The PRESIDING OFFICER. Under the previous order the Senator from Arkansas (Mr. BUMPERS) is recognized for 21 minutes and 19 seconds.

Mr. BUMPERS. Thank you, Mr. President.

## A POSITIVE APPROACH TO DEFENSE SPENDING

Mr. BUMPERS. Mr. President, I wish to speak on the subject of defense, and I wish to take a considerably more positive approach than many have recently taken on that subject.

The Reagan administration has finally and mercifully begun to factor economic reality into its proposed rearmament of America. Most senior officials now recognize that the ability of the Department of Defense to absorb funds in order to prepare for every possible military contingency is almost infinite, and that the only way to avoid national economic chaos is to make some tough choices and establish priorities among competing military demands. These are positive steps because, for the first time since at least the beginning of the 1980 Presidential campaign, we now may be in a position to jettison the rhetoric that has so inhibited serious debate of this subject. As the administration and Congress begin to wrestle with the dilemma of how and where to trim the $1.5 to $1.7 trillion, 5-year Reagan defense plan, it will be useful for us to consider some basic themes which could help in the development of a positive, bipartisan consensus on defense spending issues.

First. The United States is in a better military position and condition than some are arguing. The problems in our military force structure are not all attributable to President Carter, and the sooner we quit beating that horse, the better off we will all be. At the same time, I wish to say that nothing in this speech should be considered an apologia for the previous administration. I simply wish to state some observable facts. Our current military problems are a result of a disaffection of a substantial portion of the American people caused by the Vietnam war, and the precipitous decline in defense spending that occurred between 1969 and 1976. But between fiscal years 1976 and 1981, DOD total obligational authority rose from $96 billion to $178 billion in current dollars, includes fiscal year 1981 supplemental, an increase of 86 percent in current dollars, and almost 20 percent in constant fiscal year 1982 dollars. The result has been a steady improvement in our conventional forces. Since 1975, the number of active Army maneuver battalions has increased by more than 10 percent; the modernization of our Navy has begun, with average displacement and ship-for-ship capabilities of new vessels increasing steadily. We will add over 50 capital ships to our Navy between now and 1984. The Senate must bear in mind that the average shipbuilding time is around 5 years now.

The point should be made again and again that our Navy is almost twice the size of the Soviet Union in terms of tonnage, and this is the result of a conscious choice on our part. Major strides have also been made in the modernization of our tactical aircraft. From 1975 to 1980, the total number of tactical aircraft in our inventory increased from 1,958 to 2,606. Much more capable F–16's, F–15's, and F–14's are replacing older, technologically outmoded aircraft, and soon F–18's and AV–8B VSTOL aircraft will be entering Navy and Marine Corps inventories. Because of the enormous lags in the production of military equipment, particularly aircraft and ships, we are just now beginning to see the payoffs from military investment decisions made during the 1977–80 period.

The final defense budget submitted by Secretary Brown called for a steady increase of about 5 percent annual real growth through 1986. Total expenditures under that budget would have reached about $1.3 trillion in current dollars—$1.1 trillion in constant dollars—hardly a trivial sum. On the other hand, the Reagan plan, prior to his call for a $16 billion cut over the next 3 years, calls for a 14.6-percent real increase in fiscal year 1982, and about 7 percent annual growth from fiscal year 1983 to fiscal year 1986. That works out to about $1.5 trillion during the fiscal year 1982–86 period, or about $200 billion more than President Carter had recommended.

I believe this administration would do well to go back and look at the Brown defense budget more closely. They would find that it was carefully crafted to generate sustained military growth without producing huge budget deficits. It also recognized and sought to correct the shortage of raw materials and the weakened state of our industrial base, particularly at the subcontractor level and that is where the bottlenecks and unacceptable leadtimes in military production have caused us unnecessary problems. However, it probably did not go far enough in terms of management reform. The new administration has tackled this persistent and difficult problem head on, and Deputy Secretary Carlucci's 31-point reform package, especially multiyear contracting on mature systems, should receive bipartisan endorsement and support. But if the President should propose to stretch out procurement of F–15's, M–1 tanks, and guided missile frigates for example, it would be pennywise and pound foolish.

Also, the administration should use more realistic inflation projections in its defense budget proposals. Otherwise, all the management and procurement planning reforms will fall victim to the stretchouts and cancellations required to adjust to the shortfalls created when actual inflation exceeds overly optimistic projections.

Second. Defense expenditures should be targeted at improving existing forces and not, at this stage, be used to expand our force structure. While significant progress in force modernization has been made in recent years, we still have a long way to go before much of our existing force will be combat ready. Improvements in force readiness will occur only if DOD makes a sustained commitment to fully fund readiness programs required for existing and newly acquired weapons systems, and to correct the serious manpower problems afflicting the services. Attempts to expand our forces before correcting existing deficiencies would not result in increased military capabilities.

On the contrary, they would stretch personnel resources even thinner, put the operations and maintenance budget in direct competition with money for new procurement, and create tremendous

pressure for reinstitution of the draft. While we may want to consider bringing back the draft, such a decision should result only from a conscious decision on the part of Congress and not be forced upon us as a result of a sudden need to man the ships and fill the new divisions created by an expanded force structure.

The three major manpower problems are the quality of the recruits, retention of skilled personnel, and the decreasing difference in pay between ranks—so-called pay compression. The Jepsen-Exon targeted pay bill, which passed the Senate last week by a vote of 81 to 0, addresses the retention and pay compression issues, and a new GI bill may help attract better recruits.

Until the numerical strength and quality of our military personnel have improved, the Army should shelve its plan to add 2 more divisions, which would cost about $14 billion over the next 5 years, and the Navy should defer increasing the number of carrier battle groups to 15. And instead of creating a specially designated rapid deployment force, DOD should reconsider whether existing forces, particularly the Marine Corps, could fill the role at considerably less expense and organizational complexity.

Third. Procurement of conventional weapons should be guided by the need to create a high-low force mix for each service. I agree with the notion that our most sophisticated, high-technology weapons do provide us with force multipliers which partially offset the numerical advantages enjoyed by the Soviet Union and the Warsaw Pact. But if current trends continue, the pact will soon have such numerical superiority that Western defenses will simply be overwhelmed.

For example, according to a recent DIA report, the Soviet Union produced about 3,000 tanks, 5,500 other armored vehicles, and 1,300 fighter planes in each year of the past 5 years. The United States, on the other hand, produced about one-fourth as many tanks, one-third as many armored vehicles, and about one-half the number of fighters as the Soviet Union in 1980.

There is nothing magical about the Soviet economy or the reasons why the Soviet Union has gained this disturbing production advantage. In contrast to the United States, which has emphasized revolutionary changes in weaponry requiring long leadtimes, significant research and development funding, and high unit production costs, the Soviets have mass produced proven weapon designs, with incremental improvements made only when there is a clear military need.

They have financed this system, not with any recent massive jump or surge in defense spending, as is constantly suggested, but by an unwavering commitment that has allowed them to increase their defense budget in real terms by about 3 to 4 percent every year for the last two decades.

Mr. President, as an illustration of my point that the Soviets and the Warsaw Pact have not engaged in any big surge, I ask unanimous consent that a comparative table showing NATO against Warsaw Pact expenditures, be inserted in the RECORD at this point.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

NATO VERSUS WARSAW PACT MILITARY SPENDING 1970–79

[Billions of 1979 dollars]

| Year | NATO | Warsaw Pact | NATO advantage over Warsaw Pact |
|---|---|---|---|
| 1970 | 201.8 | 149.5 | 52.3 |
| 1971 | 192.8 | 153.7 | 39.1 |
| 1972 | 195.6 | 159.4 | 36.2 |
| 1973 | 190.9 | 166.7 | 24.2 |
| 1974 | 193.9 | 173.4 | 20.5 |
| 1975 | 190.5 | 178.6 | 11.9 |
| 1976 | 186.6 | 186.2 | .4 |
| 1977 | 193.5 | 186.8 | 6.7 |
| 1978 | 195.4 | 190.7 | 4.7 |
| 1979 | 205.6 | 194.6 | 11.0 |

Sources: Figures for 1970–78 are from "World Military Expenditures and Arms Transfers 1963–78," U.S. Arms Control and Disarmament Agency. ACDA relies on CIA estimates of Soviet military spending. 1979 figures are from "Department of Defense Annual Report, Fiscal Year 1982."

Mr. BUMPERS. In contrast, our procurement has been hampered by wide fluctuations in the defense budget. However, our basic problem has been that we have been replacing large numbers of older, less sophisticated equipment with fewer numbers of extraordinarily expensive, state-of-the-art systems. A–4 and A–7 aircraft are to be replaced by F–18's, and AV–8B's costing $30 million each; M–48 and M60–A1 tanks are being replaced by M–1 tanks that cost $3 million each; F–105's and F–4's are being replaced by F–15's at $20 million each and F–16's at $10 million each.

New destroyers now cost upward of $800 million a piece, and a new carrier costs $3 billion, not including the aircraft that it carries. With these unit costs, we will never be able to match Soviet inventories, nor should we try to achieve a numerical balance. But we should significantly ease the strain by supplementing these weapons at the high end of the technology and cost spectrum with larger numbers of simpler weapons at the lower end of that scale.

For example, the Air Force should consider procuring the F–5G, which is more than a match for all but the Mig–25's and some versions of the Mig–27's, and costs less than $8 million; and the Navy should consider supplementing its high-cost ships with surface-effect ships and diesel-electric submarines in its effort to increase the numerical size of the active fleet.

Fourth. With regard to nuclear weapons, we should establish a clear doctrine and tailor procurement to fit our strategic objectives rather than letting the acquisition of nuclear weapons determine our strategy. A few programs, such as improvements in the command, control, and communication (C3) system, are adaptable to a number of nuclear strategies.

The value of most strategic modernization proposals, however, is dependent on the role envisioned for the various components of the nuclear force. Before proceeding with programs that will cost hundreds of billions of dollars, we need to address some fundamental questions, such as: Exactly how vulnerable is the land-based ICBM force? What role would a manned bomber play in a nuclear exchange? What is the basic strategy that would underlie the use of air, ground, and sea-launched cruise missiles? What would be the strategic implications if the Soviets deployed an ABM system in response to a U.S. decision to do so?

Only when we have answers to these questions will we be in a position to evaluate all the force modernization proposals currently before us on the basis of their strategic merits.

Fifth. The strategic and economic advantages of arms control negotiations and agreements must be recognized, and talks should start immediately. It is wishful thinking of the highest order to assume that the Soviet Union will sit back and wait until the United States regains strategic superiority. Yet, this is precisely what the administration has laid down as a precondition for the resumption of substantive arms control talks. The longer SALT II languishes, the more likely we are to find ourselves in an all-out nuclear arms race, a race that would produce the combined results of a disastrous economy and a greatly enhanced probability of nuclear war.

We should look at all arms control negotiations—strategic, theater nuclear forces, ABM, and regional nuclear or conventional arms limitations discussions—as opportunities for devising means to constrain the Soviets, reduce the economic burden of military spending, and increase mutual understanding.

The Reagan administration has now been in office for 9 months, and if there was one area where we expected the team to "hit the ground running," it was defense. However, Congress and the American people are still waiting to be told where and how much the administration proposes to spend on defense. We need decisions, action and more information out of the administration if we are to develop and maintain a strong bipartisan consensus with regard to defense issues. For example:

Some indication of what the administration proposes to do concerning the MX missile,

Decisions on the B–1 and Stealth bombers,

An announcement concerning whether the administration is proposing moving from a one and one-half war to a two or two and one-half war strategy,

A 5-year shipbuilding plan, and

Dates for the initiation of both theater and strategic nuclear weapons arms control discussions.

Mr. President, I am hopeful that we can have a bipartisan approach on defense, but Congress must be given the answers to these questions and more if we are to achieve such bipartisanship. As

the old adage goes, if we try to be strong everywhere, we will almost surely wind up being weak everywhere, a result we all want to avoid.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. DURENBERGER). The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. PERCY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. STEVENS). Without objection, it is so ordered.

## SUPPORT OF A FREE AND DEMOCRATIC GREECE

Mr. PERCY. Mr. President, I would like to express today support of our country's foreign policy toward the nation of Greece, and my strong support of a free and democratic Greece. Given its crucial geopolitical location and our mutual security interests, Greece's continued close relationship in the NATO context with the United States is of vital importance.

Greece and the United States are deeply intertwined nations. Many of America's leading citizens are of Greek lineage. The essence of our political cultures are the same. America's system of government is descended from that of Greece, the cradle of democracy.

Over 500 years before Christ was born, the Greek city-state of Athens adopted a constitution that set the parameters for the conduct of government, much as ours does today. Their government was of a representative nature, the citizenry entrusting much of the government's decisionmaking authority to its chosen representatives. As many citizens as possible were permitted to take an active part in government, with no discrimination because of rank or wealth.

Greece's great contributions to political thought helped make America what it is today. A continued and even closer relationship of cooperation and understanding between the Greek and American people and our respective governments is the best guarantee for the maintenance of Western democracy.

Mr. President, if I could comment also from a very personal standpoint, at the bottom of the Depression our family lived in Chicago, Ill. My father had lost his position as a banker and had been out of work for some time, one of 17 million Americans who just simply, after highly productive lives, because of economic conditions could not get a job. We at that time lived in a two-flat building in Chicago. The owners of the building, a Greek family, occupied one of the apartments and we the other. It became apparent that we were not going to be able to pay our rent.

I can remember my father approaching our Greek neighbors, explaining the circumstances, indicating that he would do everything he possibly could to pay the rent but that we were not able to make the payment that month and possibly not for several months until he got back on his feet somehow.

He made it clear that at any time they felt we had to be evicted, we could be evicted. He would not protest at all. Our landlord could not have been more understanding.

But over a period of time the situation changed. We were in a better position. But I will never forget as long as I live the generosity, the friendship, the sympathy of that Greek family.

Through them, through the years, we learned a great deal about Greek-Americans. Our landlord owned a restaurant on Bryn Mawr Avenue. With them and their friends we engaged in many of the ceremonies, such as at the beginning of the year with a loaf of bread in which the coins were placed, and we saw the affection and love they had for one another and the pride that they had in their traditions.

So when my wife and I decided—just before we came to the Senate—to take our children on a trip, we chose Greece and took a boat from Greece on a tour called the tour of antiquity. Just as the Greeks fanned out from Athens, then we went to various places in Africa where Greeks had settled, to see the Greek ruins and study them.

On the ship there was an historian who discussed the history of Greek civilization and its growth through the years. I thought that was a good way to have our children better understand the cradle of democracy and the great civilization from which the ideas of a free people had come, to take that kind of a trip and see through their own eyes how the Greeks had taken their culture, their architecture, and their ideas to other countries.

It is with a sense of personal emotion, as well as a personal relationship that I have had with the Greek-American community in Chicago through the years, that I speak today. They have, as a people, contributed immensely to the strength of American life.

They are industrious, hard working, and resourceful. They are wonderful Americans.

But the great beauty of this country is, as the symbol says on our coin, "E Pluribus Unum," "Out of Many, One." Of many peoples, cultures, background, languages, we are, when we are in the United States of America, one people. But we never forget our heritages, nor would we want to, because they contribute to the greatness of this country.

That is the strength of this Nation and it is why we can be and should be a tremendous symbol to the world.

So as Greece engages in its struggles, as we look at the problems it has faced in Cyprus, and other problems, we value their contribution to our common defense. We value their contribution to NATO. Greece is an area vital to the security and peace of the free world.

Today we pay tribute to Greece and to its people, and to the support that we in the United States of America maintain toward a free and democratic Greece.

Mr. LUGAR. Mr. President, as chairman of the European Affairs Subcommittee of the Senate Committee on Foreign Relations and as a friend of Greece, I join with my colleagues today in reaffirming the U.S. support for Greek democracy and for the warm and friendly relationship between the American and Greek peoples.

Greece and the United States share many values, ideals, and aspirations. We also face common challenges and dangers. Through even closer cooperation and understanding, we can meet these challenges and dangers together successfully.

Mr. President, the North Atlantic Treaty Organization provides the best framework for both the United States and Greece in harmony with our other allies to safeguard and maintain the ideals of democracy formulated for the first time in ancient Greece.

The relationship between the United States and Greece is of benefit to both our countries and both our peoples.

Mr. PERCY. Mr. President, I am very happy to yield to my distinguished colleague from Maryland (Mr. SARBANES), who can speak with even greater wisdom than the Senator from Illinois can about Greek democracy.

The PRESIDING OFFICER (Mr. HUMPHREY). The Senator from Maryland is recognized.

Mr. SARBANES. Mr. President, I thank the distinguished Senator from Illinois, the chairman of the Senate Foreign Relations Committee for yielding. I commend him, and the Senator from Indiana (Mr. LUGAR) for their thoughtful and perceptive statements about Greek democracy and about the close ties which have existed between the United States and Greece from the very early years of our Republic.

As the distinguished Senators pointed out, Greece and our own country share a common political tradition. Greece is truly the cradle of democracy. The very principle and premises upon which our own democracy rests is derived from the Greek political system, which was evolved so many years ago and which was the first to place such great emphasis on the importance of the individual, his responsibility for self-governance, and the ability of the individual to determine his own future.

Mr. President, the United States-Greek ties have grown stronger and matured over the past two centuries. There are literally millions of Americans of Greek heritage who while deeply committed to this Nation and to building the strength of America, at the same time recall with pride and remain close to their Hellenic heritage and traditions. Greek-Americans in this country have prospered and, in the course of prospering, have worked to contribute to the strength of the United States and to

deepen the values upon which this Republic is based.

This is especially true where education is concerned. It is interesting to note that according to U.S. Census data, in the early years of Greek immigration into this country, Greeks ranked 18th out of 24 nationalities in median educational attainments. Yet in one generation, through the tremendous emphasis placed upon education by Greek-American families and the response of the children of those families, they have moved to the point of now being No. 1 amongst American ethnic groups where median educational achievement is concerned. This sharpening of skills and abilities redounds to the benefit of the United States, and the results are evident in the enormous contribution which Greek-Americans have made to science, to the arts, to the professions and to business, to the academic world and to government and, indeed, to all walks of our life.

Mr. President, the deep friendship and respect between the United States and Greece, of course, has been reflected particularly in congressional attitudes over the years toward Greece and toward independence and freedom in that country. Among the first Members of Congress to speak out in support of the ideals of the 1821 Greek revolution, by which Greece first won its independence, was Daniel Webster, a Member of this august body. That close tie has continued into our own time. Greece, suffering under a brutal wartime occupation, remained a steadfast ally.

Subsequent to World War II, President Truman proposed and Congress adopted a broad program of economic and military assistance to Greece at a time when Greece was faced with very severe threats to its freedom. Congress was very strongly supportive of that program.

In recent years, Congress has again emphasized the importance of democratic freedoms and civil liberties in Greece, and has sought to maintain a close working alliance and relationship with that country. Congressional spokesmen expressed strong opposition to the denial of freedom by the colonel's junta. Most recently Congress has sought peace and justice on Cyprus following the Turkish aggression in the summer of 1974.

Mr. President, Greece has been of enormous strategic importance to the United States, a close ally in both world wars. It occupies a unique strategic geographic position in the world. The United States-Greek relationship is based both on mutual strategic interests and on a shared respect for the Western values that we hold so important—indeed Greece is the source of so much of Western values. This is a friendship resting upon shared history, shared values, and shared interests.

I am very pleased to join my colleagues today in stressing the warmth and strength of the friendship between the two countries, underscoring particularly the importance of shared democratic values to that friendship, and commending the Greek people for making democracy work in the land which even today is known throughout the world as the cradle of democracy.

I thank the chairman of the Committee on Foreign Relations (Mr. PERCY) for his very thoughtful and perceptive remarks and for initiating the discussion on a very important topic.

Mr. PERCY. Mr. President, I thank my distinguished colleague.

● Mr. NUNN. Mr. President, as we approach consideration of the International Security and Development Cooperation Act of 1981, it is appropriate to review the traditionally close ties between the peoples of Greece and the United States.

Events in Greece have always had a special significance for Americans and Western Europeans because the legacy of Greece has transcended national boundaries and given life to Western civilization for more than 2,000 years. Ancient Greece produced a people as gifted and innovative as any in history. As the originators of political democracy, the Greeks gave the world an institution that has inspired enlightened governments for centuries. Indeed in every area of human accomplishment—science, philosophy, art, architecture, medicine, literature—we find our heritage in the Golden Age of Greece. Much of what is best in modern society had its origins in Greece. In that sense, we are all heirs to the Greek tradition.

Americans have long recognized our debt and close ties to the people of Greece. When the Greeks rose up against the Ottoman Empire in 1821, Americans, fresh from their victorious struggle for independence, also rose up in sympathy for the gallant freedom fighters.

Ministers and politicians delivered sermons and speeches, legislatures passed resolutions of solidarity with the Greek people, money was raised to support the Greek cause, and many Americans even left their homes to cross the Atlantic and join the Greek patriots.

Since achieving their independence, the Greek people have faced powerful threats to their freedom and sovereignty. In just the last 40 years, they have endured two invasions, 4 years of harsh military occupation, a bitter civil war supported by Soviet-backed regimes outside Greek borders, and 7 years of dictatorship.

Each time, the democratic impulse and fierce independence of the Greek people have reasserted themselves, and the challenge has been met successfully.

Throughout the past 160 years, the strong bonds of friendship forged between the people of Greece and America during the Greek war for independence have grown steadily stronger. Our two nations fought side by side as allies during World War II and the Korean war and became permanent partners when Greece joined NATO in 1951. Marshall plan aid helped Greece rebuild its war-torn economy, and the Truman doctrine assisted the Greek people in turning back a determined Communist threat.

Just as this American aid has been important to Greece, the contributions of Greeks in the United States have enriched American life. Greeks have played a key role in American history since the early European explorations.

Greeks in America have compiled distinguished records in the arts, politics, business, and the professions. Many groups have come to America in search of economic opportunity, but none has exceeded the achievements of the innovative, resourceful Greek-Americans. Greeks helped to build modern, industrial America, and Greek workers and businessmen continue to be prominent in our Nation's economic life. Greek institutions—churches, newspapers, fraternal and community organizations—have strengthened the Greek-American community and helped to preserve the values of Greek culture.

Today, Greece occupies a position of critical importance to Western security. Increasing adventurism by the Soviet Union and its proxies combined with the Soviet naval buildup in the Mediterranean and instability in the Middle East have dramatically increased the importance of NATO's southern flank in recent years.

Located strategically along the shores of the eastern Mediterranean, Greece guards the lifeline over which Middle Eastern oil flows to Western Europe. Greece also blocks the land route between the Warsaw Pact countries and the Mediterranean.

Together with Turkey, Greece stands as the Western outpost closest to a Soviet strike against the oilfields of the Persian Gulf. At a time when U.S. naval force reductions have significantly affected the balance of power in the Mediterranean, NATO strategic planning must take into account the new realities along its southern flank as well as the Alliance's expanded requirements in the Middle East.

Greece must play a key role in the security posture of the West. As Adm. William J. Crowe, Commander in Chief of Allied Forces in Southern Europe asserted earlier this year, NATO "must bear in mind that the loss to the Soviets of even a portion of the Mediterranean could be a fatal blow to the Alliance."

For these reasons, Greece's agreement to resume full military partnership in NATO and Greek entry into the European Economic Community are among the most positive developments of recent months.

Just as importantly, Greece and Turkey have begun to reach agreements on some of the issues concerning rights in the Aegean Sea. The continuing rivalry between these two NATO allies remains a cause for serious concern, but we should all be encouraged by the accords that have already been reached and the promise of future progress. At a time when greater efforts are required of all members of NATO, it is imperative that both Greece and Turkey participate as full, cooperating partners in the Alliance.

All of these developments—entry into the Common Market, reintegration into

the NATO military organization, negotiations with Turkey—together with the restoration and maintenance of democracy and improved relations with the United States strengthen the Western Alliance and demonstrate the huge strides taken by Greece in recent years.

In the coming months, new challenges must be faced, and close cooperation between Greece and the United States will continue to be vital. I am pleased that the foreign assistance bill that we will consider shortly includes substantial military assistance for Greece. This assistance will strengthen the partnership between Greece and the United States and enhance Greece's critical role in NATO.●

THE IMPORTANCE OF UNITED STATES-GREECE RELATIONS

Mr. CHAFEE. Mr. President, it is fitting that today we acknowledge the importance of our ties to Greece and to the Greek people. I am sure that no Member of the Senate needs to be reminded of the impressive contributions made by people of Greek heritage to the development of the American cultural tradition and, indeed, to the development of Western civilization itself.

Today, however, Mr. President, I would like to focus not on the past contributions of Greece and her people to our way of life, but rather to emphasize the bright future for relations between our two countries.

It gives me great pleasure to observe that Greece is now fully reintegrated into the NATO military command structure. The strategic importance of Greece to the Western Alliance can hardly be overstated. Our close relations and our mutual efforts to enhance Greek security extend back over 35 years, and predate the formation of the NATO Alliance itself. I believe it is most noteworthy that all existing agreements and arrangements between the United States and Greece, some dating to as far back as 1953, are still in force and are serving both countries well.

We have recently been involved in negotiations concerning the future status of U.S. bases in Greece. These bases serve important U.S. and NATO interests, and their existence reemphasizes the importance of Greece to the strategic framework of the Alliance. These negotiations are currently suspended, and when they resume I am confident that the remaining outstanding issues will be resolved. I am certain that an agreement which respects Greek sovereignty fully and which fosters further cooperation in defense matters can be reached.

We will undoubtedly face a number of additional critical issues in the coming years, issues affecting the immediate region of the Mediterranean and Europe as a whole. I am certain that all of us who value the contributions made by Greece to Western security and who hope for even closer relations in the future will work hard to insure that U.S. policy contributes to that objective. Similarly, I am confident that the long tradition of cooperation between Greece and the United States will enable us to overcome any minor difficulties and to work together to build a peaceful and stable future.

UNITED STATES RELATIONS WITH GREECE: FRIENDSHIP AND COOPERATION

Mr. PELL. Mr. President, I am delighted to join my colleagues in paying tribute to our country's longstanding friendship with Greece. For many years, the United States and Greece have enjoyed a relationship characterized by warmth, friendship, mutual cooperation and support. Our people share a common devotion to democratic ideals and individual freedoms. Indeed, America's democratic system of government is descended from that of the Greeks.

American citizens of Greek ancestry have made and continue to make important contributions to our cultural, economic, and political development. The close ties between the people of Greece and the Greek-American community help to strengthen the bonds between our two nations.

On many occasions, Greece has proven itself to be a loyal and reliable ally of the United States. Greece has fought with distinction at the side of the United States in World War I and World War II. Greece's contribution to the Allied Powers in World War II was enormous both in human terms—9 percent of the entire Greek population sacrificed their lives during the war—and in its impact on the Allied effort.

Greece's defeat of Mussolini provided the Allied forces with their first victory. The extraordinary German paratrooper losses suffered at the hands of the citizens on the island of Crete caused Hitler to eliminate massive airdrops from his war strategy. Many experts credit Greece's interruption of Hitler's timetable as the reason that his troops moved into the Soviet Union in the winter. This move contributed to the ultimate defeat of the Nazis. During the Korean war, Greece contributed nearly 1,000 troops to the United Nations effort on behalf of freedom and defeat of Communist aggression.

Over the years, the United States has demonstrated its support for Greece as well. In 1946, the United States began to send economic aid to help rebuild Greece after World War II. Under the Truman doctrine, vital military assistance to Greece began. American economic and military assistance enabled Greece to effectively prevent the expansion of Communist influence and to maintain Greece as the cradle of democracy.

The American people and their representatives in Congress supported the continuation of economic and military aid to Greece until the military junta usurped the democratically elected government of Greece in 1967. At that time and until civilian government and democratic processes were restored in Greece in 1974, Members of Congress stood in support of the rights and liberties of the Greek people and in opposition to the undemocratic policies of the junta.

During the 7 years of the military regime in Greece, I vigorously opposed the junta and called for a return to constitutional government. I also urged the U.S. Government to embark upon a review of American policy, to end its unquestioned support of the military regime, and to support the democratic elements in Greece. The restoration of a democratic form of government in Greece in 1974 was a development welcomed by the American people and Members of Congress, myself among them.

With the Turkish invasion of Cyprus, the U.S. Congress demonstrated its support for Cypriot Greeks by imposing an embargo on arms to Turkey. I vigorously opposed lifting that embargo and supported the many efforts to resolve the conflict between our two NATO allies, Greece and Turkey, over the Cyprus issue and the Greek-Turkish dispute in the Aegean Sea.

The United States also provided, at my urging, assistance to Greek Cypriot refugees. The close relationship between the United States and Greece is further demonstrated by the successful negotiation of an agreement which accommodates U.S. and Greek interests in the operation of American military bases on Greek territory.

By joining NATO and the European Community, Greece has demonstrated its commitment to Western defense and democratic values. Geographically, Greece plays an important role in NATO strategy for the defense of the Mediterranean and in insuring the integrity of NATO's southeastern flank. By virtue of its position and facilities, the island of Crete provides effective control of East-West air-and-sea communications to Israel, Egypt, and the Middle East. Politically, Greece, today, stands as a symbol of freedom and democracy for those members of the Soviet bloc which are positioned on its borders.

Mr. President, the contributions which Greece has made and continues to make to the defense of freedom and democratic values must not go unnoticed. The mutual ties and interests between the United States and Greece are many and far reaching. In the past, we have been able to build upon these bonds to develop a strong and mutually beneficial relationship. It is my fondest hope that the dedication to cooperation and spirit of friendship characteristic of United States relations with Greece will continue as we move through the decade of the 1980's and beyond.

A STRONG U.S.-GREEK RELATIONSHIP

Mr. KENNEDY. Mr. President, I am proud to join my colleagues in expressing deep support for strong United States relations with Greece. Greece has been a strong and true ally of the United States, and has made major contributions to America and the West through its civilization, through its tradition of democracy, and through new generations of Greek Americans.

By successfully reforming the immigration laws of 1965, we were able to raise the annual number of eligible Greek immigrants from 308 to 20,000. I

take pride in this achievement. Greek Americans helped to make this country great in the past, and will help to make it great in the future.

We care deeply about the future of Greece and the Greek people, and we should support both their democratic institutions and their aspirations of social and economic justice. Our national interest, and the international interest in the stability of the eastern Mediterranean, demand a more active American role in settling conflicts between Greece and Turkey over the Aegean Sea and over Cyprus.

What is needed is a lasting political settlement based on the legitimate rights of both the Turkish minority and the Greek majority in Cyprus, a solution that addresses both the constitutional issues and the territorial disputes in a just and viable manner. Such a solution is long overdue. I call on the administration to play an active role, without delay, to help bring lasting peace to the island of Cyprus.

In addition, America welcomes Greece's renewed participation in NATO, which strengthens our collective stability and security by bolstering the alliance's southern flank against the Warsaw Pact. The United States should strongly support continued, full Greek participation in NATO and should maintain a balance in our aid to Greece and Turkey.

Mr. President, I care deeply about the people of Greece and about the continued friendly relations between our two nations. It is in our mutual interests to build upon the friendship which characterizes our relationship today, and which holds so much promise for the future.

UNITED STATES-GREEK RELATIONSHIP: A COMMON HERITAGE AND STAUNCH ALLIES

Mr. ROBERT C. BYRD. Mr. President, I take this opportunity to commend the distinguished chairman of the Senate Foreign Relations Committee (Mr. PERCY) for organizing this colloquy on the importance we attach to Greece, both as a strategic ally and as an historic friend.

As the Senator who led the fight to lift the arms embargo against Turkey, imposed in the aftermath of the last Cyprus crisis, I welcome this opportunity to discuss the importance I attach to Greece as a friend and ally.

We, as Americans, should never lose sight of the influence Greek political thought played in the establishment of our own democracy. More than 500 years before the birth of Christ the city state of Athens formulated, and adopted, a constitution which laid out the parameters for the conduct of government. A representative democracy was established whereby much of the government's decisionmaking authority was entrusted by its citizenry to chosen representatives.

In 390 B.C., Aristophanes first exercised the political right that Americans cherish so much today—the right of dissent, or to publicly criticize governmental policies. Our Founding Fathers turned to ancient Greece, studied its democratic political thought, analyzed it, debated it, and determined that our basic constitutional principles should be based upon a foundation of representative government. Therefore, we owe much to Greece as the cradle of modern day democratic political thought.

To a certain extent, it is somewhat tragic that America did not have the benefit of major waves of Greek immigration until 1900. We had adopted and refined ancient Greek political thought to fit our needs for representational government. Yet it was not until 1900 that the first wave of Greeks came to this country, enriching our already diverse culture. These new citizens, ambitious and hardworking, moved quickly up the ladder in this country. Through their extraordinary drive and adaptability, Greek-Americans fast became very successful in this Nation.

According to our own Bureau of Census data, the first Greeks who became U.S. citizens ranked 18th among 24 nationalities in their median educational attainment. However, their children have accomplished one of the most impressive feats of any group of people in the world. They quickly rose to the top and now rank at the top among American ethnic nationalities in median educational attainment. Today, there are literally thousands of Greek-Americans throughout this Nation playing major roles in their communities, cities, and States.

The interrelationship among the people of Greece and those of the United States is crucial to an understanding of the remarkable support each nation has provided for the other during their times of need. It behooves our countries to continue this critical relationship.

But the history of friendship between the United States and Greece goes beyond our common democratic heritage and the cultural enrichment that Greek immigrants have brought to this country. Greece is also very strategically important to the United States. Lying on the southern tip of the Balkan Peninsula, the land mass and isles of Greece constitute the geographical link between Italy to the West and Turkey to the East. It is also a bridge between the continents of Europe, Asia, and Africa.

Thus, Greece is pivotal to the defense of both Turkey and Italy. Whoever controls Greece can isolate Turkey and outflank Italy. Greece insures the strategic integrity of NATO's southeastern flank and provides early warning and air defense coverage for allied naval forces operating in the Mediterranean. In addition, the Greek islands dotting the Aegean form successive defense lines against an attack from the North, effectively denying Mediterranean access to a hostile force.

By virtue of its central position, its splendid natural harbor of Suda Bay, and its military airport facilities, the Island of Crete can effectively control East-West air and sea communications to Israel, Egypt, and the oil rich Middle East.

There are numerous considerations in looking at the strategic assets Greece brings to the NATO alliance and I shall not go into every one in detail here. However, I do want to take this opportunity to go to the crux of my remarks. I am disappointed that no agreement has been achieved on the future of U.S. bases in Greece. These bases serve both United States and Greek interests.

I urge that we move expeditiously to resolve the impasse in these negotiations and conclude the agreement just as soon as possible. America's foreign policy toward Greece should be as supportive as possible. Greece has been an unswerving ally in all major international confrontations, and we should recognize the sacrifices we have made together. It is now time to cement that relationship once again with a base agreement.

Mr. PERCY. Mr. President, I thank the distinguished minority leader for his statement. I know of no Senator who has a greater reverence for the Constitution of his own country and the democratic process, who practices it as an art and a science more diligently, and who contributes, year after year, more to the working of this process in our country to pay tribute, as he has, with others of our colleagues, to the cradle of democracy, Greece, and the strength of the Greek people, particularly as they approach another election in their country. I know we all very much appreciate the words expressed so eloquently by our distinguished minority leader, Senator ROBERT C. BYRD, of the great State of West Virginia.

Mr. ROBERT C. BYRD. Mr. President, I thank the distinguished chairman of the Committee on Foreign Relations for his very generous remarks.

GREEK-AMERICAN FRIENDSHIP

Mr. ROTH. Mr. President, I rise today to offer a few remarks on the enduring friendship between the United States and Greece. As a nation, we trace our history back 4,000 years to the city-states of Greece where the idea of democracy was born. The word itself comes from the Greek language, meaning "rule of the people."

But perhaps even more important than this rich cultural and philosophical heritage is the rich contribution to American life and society that has been made by the millions of Americans who are of Greek ancestry. At the beginning of this century, desperate conditions in Greece coupled with the opportunities available in the United States brought thousands of Greeks to our shores. During these early years, nearly one in four Greek males between the ages of 15 and 45 left Greece for America.

Although those first Greek immigrants by and large had very low educational levels—in fact, opportunities for education was one of the major incentives for leaving their homeland—they brought with them skills, energy and a zest for life that enabled them to quickly improve the condition of life for themselves and their children.

Today many of our most prominent citizens are of Greek ancestry. William Tavoulareas, president of Mobil Oil, and John Brademas, an eight-term Congressman who is now president of New

York University are just two among the thousands of Greek-Americans making outstanding contributions to our national life.

Yet even third generation Greek-Americans have not forgotten their ancestral origins. The ties between the Greek-American communities in this country and the people of Greece remain extraordinarily strong. Despite ups and downs in the political fortunes of Greece, the peoples of both our countries have remained true to the common values that we have both inherited from ancient Greece.

Greece and the United States fought side by side in both world wars. Over 60,000 Greeks died fighting in World War II. In a nation of only 7 million, that equates to fully 9 percent of the population.

After World War II, Greece stood up to and defeated the Soviet-backed Communist efforts to take over the country. The valor of the Greek patriots was such as to prompt President Truman to reverse the drift of U.S. policy and make a firm stand against the advance of Soviet power into the strategic Middle East.

In the Korean war, the valor of the Greek troops was legendary.

Today Greece still guards the southern flank of NATO by spending about 32 percent of its national budget and nearly 6 percent of its GNP on defense. Nothing could show more clearly the determination of the people of Greece to defend the values we hold in common.

Every effort should be made to assure the continuation of a close and ccoperative relationship between our two countries. In addition to the bonds of friendship rooted in cultural and historical affinities, Greece has great strategic importance to the Western security system. In addition to its geographical location, the great shipping resources of Greece which are the third largest in the world, would be critical to the allied effort in an emergency.

This is why we must not let misunderstandings or technical disputes stand in the way of strengthening our ties. I would, hope, for example, that our two countries could soon resolve our differences over new U.S. bases agreement. And I would hope that the U.S. Government could continue its strong economic support for Greece.

Regardless of the issue of the day, however, I know that solidarity between the people of Greece and America will persist in their unbreakable bonds of friendship.

GREECE AND AMERICA

Mr. TSONGAS. Mr. President, I would like to speak today in support of the foreign aid package to Greece. Being of Greek descent myself, I can appreciate the close bonds shared by Greece and America in many aspects of our societies.

Greek American political traditions are closely bonded by shared democracies. The interrelationships of the Greek and American people runs very deep. The essence of a nation is in its people and many of our historic and cultural ties with Greece reflect common democratic ideals.

In 1900, the United States welcomed many Greek immigrants in what was Greece's major exodus. One in every four Greek males between the ages of 15 and 45 departed for the United States. These immigrants became intermingled in U.S. society as shoemakers, drycleaners, and restaurateurs. My grandfather was one of these pioneers searching for a new life in America.

Greek families retained the tradition of the strong nuclear family, with close ties to their relatives in Greece.

Education has always been important to the Greek family as evidenced by U.S. Census Bureau figures this year ranking the children of Greeks first in median educational attainment among ethnic groups.

Greece and the United States have mutual defense and security interests. We cannot underestimate the strategic importance of Greece as a member of NATO, as a location for U.S. military bases, and as a power in the Aegean. This year, Greece allocated 32 percent of its national budget and 6 percent of its GNP to defense.

From 1946 to 1976, the United States appropriated over $4 billion in military and economic aid to Greece. From 1977 to the present we have allocated an additional $825.3 million in military grants, credits, and guarantees to Greece. For fiscal year 1982 I offered an amendment in the Foreign Relations Committee to add $20 million to the administration's military aid request of $260 million. I will strongly support the foreign aid increases that have been added to the administration's request in the House and Senate.

I also strongly urge the administration to recognize Greek concerns regarding American bases in Greece so that an agreement can be signed as soon as possible. In my view, America's foreign policy toward Greece should be as supportive as possible.

● Mr. HUMPHREY. Mr. President, it is with great pleasure that I express support and appreciation for years of positive Greek-American relationships. Greek traditions are democratic and have served as a cornerstone of American democratic ideals.

In matters of mutual security interest, the United States and Greece have worked together to encourage European nations to act within a collective framework both militarily and economically. The United States continues to support Greek participation in NATO and the European Economic Community (EEC). It is my opinion that Greece participation in NATO and EEC has helped to foster democracy in that country. In addition, the U.S. bases in Greece have served as a deterrent to any potential aggressor.

I cannot stress enough the contribution of Greek people in this country. Their mark can be found in every area of American life.

In conclusion, I salute the Greek people and will continue to support those efforts that foster a close relationship.●

## ROUTINE MORNING BUSINESS

The PRESIDING OFFICER. Under the previous order, there will now be a period for the transaction of routine morning business not to extend beyond the hour of 1 p.m., during which Senators may speak for 5 minutes each.

## AWACS

Mr. DIXON. Mr. President, foreign policy decisions, like all decisions, are seldom clear-cut choices between right and wrong. However, the administration's insistence on selling AWACS and F–15 enhancements to Saudi Arabia has caused more division among informed observers than similar debates of the recent past.

Advocates and opponents of the proposed sale have molded their views into tight frameworks since early this year, when details of the sale were first made known.

Members of Congress have had 6 months to contemplate the purported benefits of this sale. Now, they are asked to ponder the matter a while longer, as the administration presents its case. The deadline, however, is approaching, and the fine print of the sale cannot change the overall picture.

Therefore, I reiterate my firm opposition to the $8.5 billion package, and note I am a cosponsor of the resolution of disapproval introduced by Senator PACKWOOD.

The sale has strategic, military and diplomatic ramifications that do not serve America's best interests.

It is argued that AWACS and F–15 add-ons lay the groundwork for a "strategic consensus" against Soviet or Soviet-sponsored incursions into the Persian Gulf. Yet, I am convinced that the proposed sale would increase tension and escalate violence in the Mideast.

The administration says the Saudis have acknowledged the "strategic consensus" theory, but it is not beyond reason to think they may have their own notions about an Arab "strategic consensus" that is diametrically opposed to American Mideast policy.

Saudi Arabia has undermined repeatedly U.S. efforts to achieve a lasting peace in the area. It has actively opposed the Camp David peace treaty, financed the Palestine Liberation Organization and threatened holy war against Israel.

Most recently Saudi Arabia joined an Arab condemnation of the United States after American fighters returned the fire of two Libyan jets over international seas. We were denounced for an act of "international piracy." In return, the Congress is asked to approve a sale of weaponry that the United States does not entrust to our NATO allies without the assurance of joint American command.

I share the concern voiced by many of my colleagues that internal problems in Saudi Arabia further add to the risk of selling it this advanced weaponry.

AWACS, in particular, are on the cutting edge of American technological sophistication—so far ahead of any system currently operated by the Soviet Union that our loss would be Russia's quantum leap of military advancement.

I will not debate the issue of Saudi stability. Whether the Government will survive for 2 years, two decades, or two centuries is not the point: Without guarantees of democratic stability from one ruler to the next, and acknowledging the possibility of internal uprisings, I am not prepared to support this sale of staggeringly advanced military hardware.

These are admittedly disturbing conclusions to arrive at, in light of the President's decision and the possible diplomatic fallout between Saudi Arabia and the United States. However, if there is to be a downward spiral in relations, the Congress cannot be blamed for an exercise of its duty to oversee transactions of this nature, as enunciated in the Arms Export Control Act.

A promise was not the President's to give. Only the Congress can consent to the President's decision.

We must continue to attempt to solve the burning issues of the Mideast, but not by renewing an arms race, or threatening the groundwork already laid. We must pursue strengthened relations with the Saudis, but in a clear-headed manner, wary of their intentions.

I am deeply concerned that the administration has started down the wrong road. It is my great hope that, we, as a nation, can correct these missteps before the Mideast again explodes.

The first order of business is to say no to the $8.5 billion arms sale to Saudi Arabia.

## THE MANPOWER PROBLEM

Mr. GOLDWATER. Mr. President, in recent years, the manpower problems of our military services have gotten increased attention from those who care about our national defense. This I regard as a healthy sign since the care and feeding of our troops has a definite bearing on their morale. Too often we have become wrapped up in the weapons systems and not enough attention has been paid to the people who must operate them. As a result, we have seen young men and women either retire as soon as possible or leave the services prior to retirement because their training and expertise allows them to obtain better jobs in the civilian world. In order to keep these highly trained and highly motivated people, we must get serious about giving them better pay and better working conditions. This very problem has been addressed in one of the periodic reports issued by the Association of the United States Army.

I ask unanimous consent that the text of this report be printed in the RECORD for the benefit of my colleagues and to show that there are manageable answers to the manpower problem.

There being no objection the article was ordered to be printed in the RECORD, as follows:

LONGER MILITARY CAREERS—WHAT MUST WE DO TO MAKE THEM ATTRACTIVE AND PRODUCTIVE?

In a recent letter to The Washington Post, Rep. Les Aspin (D–Wis.) decried the fact that so many members of our armed forces voluntarily end their careers after 20 years of service and pointed with special alarm to the fact that last year 1,744 servicemen and women retired at the age of 37. Mr. Aspin called upon the President and the secretaries of the armed services to exercise their statutory authority to keep people on active service longer.

Whether he realized it or not, Rep. Aspin was pointing out two very real needs for efficient military manpower management. First requirement is to make a military career more bearable. If we can eliminate the kinds of negative features like frequent moves and extended family separations; if we can make sure that a service member who moves in response to reassignment orders need not incur a personal debt; if we provide comparable pay and if we can assure both married and single service members a decent place to live—then we will have eliminated the largest drives toward early retirement. If a soldier does not find himself asking his wife to "hang on for just a few more years" of discomfort and deprivation, early retirement will lose much of its allure. The elimination of all these negatives is clearly within the constitutional purview of Congress.

Second, and just as important, Mr. Aspin was calling renewed attention to the need for modernizing the retirement system. The present system has evolved over the years as a result of many stop-gap actions. It is poorly understood by the Congress that oversees it and even by the military people who are its beneficiaries. It has been studied in depth by the Defense Manpower Commission during 1974–1976 and by the President's Commission on Military Compensation in 1977–1978, but none of the maze of resulting recommendations was ever given a close look by Congress.

Needless to say, there are ways to encourage longer service and, at the same time, to equitably compensate those careerists whose service must be foreshortened in order to keep a healthy mix of fighters, technicians and administrators. Armed with those equitable means, the service secretaries would be better motivated to manage their personnel more in accord with the needs of the service and less out of deference to individual choice.

## MORTGAGE REVENUE BONDS: THE FUTURE OF HOUSING IS NOW

Mr. SASSER. Mr. President, the Mortgage Subsidy Bond Tax Act of 1980, which was passed as an amendment to the Omnibus Reconciliation Act, contained a number of provisions which inadvertently made it impossible for State and local governments to issue tax-exempt mortgage revenue bonds. These provisions created some technical problems that still require remedy, since these problems were unresolved in the regulations published by the Internal Revenue Service on July 1 of this year.

The legislation I have introduced to correct this situation, S. 1348, now has 25 cosponsors. I am glad to see the broad bipartisan support this legislation is drawing from every region in the country. The mortgage bond program is a good approach for providing desperately needed affordable mortgages for first-time homebuyers, and it should be allowed to work. I should also note that the Joint Committee on Taxation has assessed the bill as incurring no cost to the Treasury, a key factor in any legislation up for consideration in this Congress.

The Mortgage Subsidy Bond Tax Act of 1980 did place some significant limitations on the nature and scope of the mortgage bond program. Among the principal limitations to be preserved under S. 1348 are the State ceilings on overall bond volume. The State ceiling for any calendar year is 9 percent of the average annual aggregate principal amount of mortgages executed during the immediately preceding 3-calendar years for single-family owner-occupied residences in the State, or $200,000,000, whichever is greater.

The IRS, using data prepared by the Department of Housing and Urban Development and the Federal Home Loan Bank Board, has issued a revenue procedure setting out mortgage bond safe harbor estimates of average single-family nonfarm residence purchase prices for certain areas. Under the 1980 act, and S. 1348, the maximum purchase price is 90 percent of the average area purchase price (AAPP) in nontargeted areas and 110 percent of the AAPP in targeted areas. Revenue procedure 81–36 also includes computations of State ceilings.

I have attached tables showing the ceilings for each State, as well as the HUD/FHLBB/IRS designations of the highest and lowest cost housing in each State. Since these figures are subject to variation within each State, and qualified home buyers (income less than 80 percent of area median) would not be eligible to purchase the higher priced homes, the precise number of units cannot be determined with pinpoint accuracy. But these tables will show a broad estimate of the potential gains for home buyers and homebuilders on a State-by-State basis.

Mr. President, the average mortgage rate nationwide has hit 17 percent. Ninety-five percent of the home-buying public has been frozen out of the market. Even if rates do subside by a point or two in the foreseeable future—and that is a big if—it will be only the wealthiest buyers who can stay in the market, and practically no first-time buyers. The statistics of devastation in the construction industry are well known: Unemployment climbing toward 20 percent, over a third of this country's contractors out of the homebuilding business, and the situation is deteriorating. The mortgage bond program will not solve these problems overnight. But it will allow State and local governments and local lending institutions to help make it possible for significant numbers of first-time home buyers to own their first home. As the

attached table shows, between 200,000 and 285,000 potential first-time home buyers would be able to finance new or existing homes if S. 1348 became law. Passage of S. 1348 is a necessary step toward once again making homeownership an affordable dream for thousands of American families.

Mr. President, I ask that a table indicating the number of new or existing housing units and corresponding average area purchase price data for all 50 States as these are affected by S. 1348 be printed in the RECORD.

The table follows:

| State (ceiling) | New | | Existing | |
|---|---|---|---|---|
| | AAPP [1] | Units [2] | AAPP [1] | Units [2] |
| Alabama ($200,000,000) | $64,700 | 3,091 | $56,100 | 3,565 |
| Alaska ($200,000,000) | 107,700 | 1,987 | 82,900 | 2,411 |
| Arizona ($203,500,000): | | | | |
| High | 89,100 | 2,284 | 79,800 | 2,550 |
| Low | 76,300 | 2,667 | 61,400 | 3,314 |
| Arkansas ($200,000,000): | | | | |
| High | 64,400 | 3,106 | 61,400 | 3,257 |
| Low | 62,100 | 3,221 | 58,500 | 3,419 |
| California ($2,217,600,000): | | | | |
| High | 132,800 | 16,699 | 144,800 | 15,400 |
| Low | 66,700 | 33,247 | 57,800 | 38,367 |
| Colorado ($308,800,000): | | | | |
| High | 80,000 | 3,860 | 70,200 | 4,399 |
| Low | 78,500 | 3,394 | 54,900 | 5,625 |
| Connecticut ($200,000,000): | | | | |
| High | 142,000 | 1,408 | 142,600 | 1,403 |
| Low | 73,700 | 2,714 | 59,800 | 3,344 |
| Delaware ($200,000,000) | 75,200 | 2,660 | 58,100 | 3,442 |
| District of Columbia ($200,000,000) | 100,100 | 1,998 | 93,200 | 2,146 |
| Florida ($614,900,000): | | | | |
| High | 80,300 | 7,658 | 70,300 | 8,747 |
| Low | 55,500 | 11,079 | 38,400 | 16,013 |
| Georgia ($201,500,000): | | | | |
| High | 88,100 | 2,287 | 67,000 | 3,007 |
| Low | 59,300 | 3,398 | 46,900 | 4,296 |
| Hawaii ($200,000,000): | | | | |
| High | 152,200 | 1,314 | 112,800 | 1,773 |
| Low | 117,000 | 1,709 | 109,900 | 1,820 |
| Idaho ($200,000,000) | 78,500 | 2,548 | 67,100 | 2,981 |
| Illinois ($632,200,000): | | | | |
| High | 82,100 | 7,700 | 71,300 | 8,867 |
| Low | 73,400 | 8,613 | 43,400 | 14,567 |
| Indiana ($221,200,000): | | | | |
| High | 85,600 | 2,584 | 49,900 | 4,433 |
| Low | 56,500 | 3,915 | 46,100 | 4,798 |
| Iowa ($200,000,000) | 70,900 | 2,821 | 51,600 | 4,287 |
| Kansas ($200,000,000): | | | | |
| High | 71,900 | 2,821 | 51,600 | 4,287 |
| Low | 54,400 | 3,676 | 41,600 | 4,808 |
| Kentucky ($200,000,000): | | | | |
| High | 72,100 | 2,774 | 50,200 | 3,984 |
| Low | 58,400 | 3,425 | 44,300 | 4,515 |
| Louisiana ($200,000,000): | | | | |
| High | 93,000 | 2,151 | 74,800 | 2,674 |
| Low | 76,900 | 2,601 | 56,200 | 3,559 |
| Maine ($200,000,000) | 73,500 | 2,721 | 58,200 | 3,436 |
| Maryland ($240,400,000): | | | | |
| High | 84,500 | 2,845 | 58,700 | 4,095 |
| Low | 55,100 | 4,363 | 56,500 | 4,225 |
| Michigan ($362,700,000): | | | | |
| High | 99,300 | 3,653 | 56,200 | 6,454 |
| Low | 77,500 | 4,680 | 45,000 | 8,060 |
| Minnesota ($239,800,000): | | | | |

| Wisconsin ($200,000,000) | 70,300 | 2,845 | 55,200 | 3,623 |
| Wyoming ($200,000,000) | 79,300 | 2,522 | 62,300 | 3,210 |

[1] AAPP = Average area purchasing price.

[2] Units = Number of units that can be financed at indicated average area purchasing price under State mortgage bond ceiling limitation.

## REPORT ON THE ACTIVITIES OF THE INTELLIGENCE COMMITTEE

Mr. GOLDWATER. Mr. President, I send to the desk a report required by Senate Resolution 400 on the activities of the intelligence committee and ask unanimous consent that 1,000 copies be printed.

The PRESIDING OFFICER. Without objection, it is so ordered.

## OBSERVANCE BY THE RICHMOND COUNTY BICENTENNIAL COMMISSION OF VICTORY AT YORKTOWN

Mr. HARRY F. BYRD, JR. Mr. President, as we celebrate the 200th anniversary of the Battle of Yorktown, I think it is important that we remember those lesser-known figures and events which nonetheless contributed materially to the American victory.

Therefore, I commend the Richmond County, Va. Bicentennial Commission, which on September 19, 1981 commemorated the role of Richmond and neighboring counties on Virginia's historic Northern Neck in the Yorktown victory.

I am indebted to Mr. Charles H. Ryland of Warsaw for casting interesting sidelights on the battle in an excellent address given during that commemoration.

He told of how Northern Neck residents provided the allied American-French forces under George Washington with supplies at a critical moment in the struggle, and he recounts how the Northern Neck militia held Gloucester Point, thus sealing the only possible escape route to the hard-pressed British forces.

I ask unanimous consent that Mr. Ryland's address be printed in the RECORD.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

ADDRESS DELIVERED BY CHARLES H. RYLAND

I was highly honored when the Committee invited me to present a Historical Address here at Mt. Airy on the occasion of the celebration of "Victory at Yorktown."

It was my pleasure to speak here in 1967 on the history of our County in connection with its 275th birthday. It was also my privilege to speak here in 1976 at our County's celebration of the Bicentennial of our Nation.

This occasion, our third here at Mt. Airy, may well be our last for some years and, as the Senior Senator Byrd remarked at the dedication of the new Downing Bridge, when

it was suggested that the time had come for the group to leave—"Let's take our time and savor this occasion, for it will not happen again in our lifetime."

Many of us here will recall the celebration fifty years ago at Yorktown—the French Warships, and the refreshments served on board, the arrival of President Hoover, and the festive occasion which marked the sesquicentennial of the victory at Yorktown. Today all of us are fortunate that we can take part in honoring the events of two centuries ago.

The key note of this celebration should be Victory Bought at a Price.

Shakespeare, in his Julius Caesar, epitomized this event in the oft-quoted speech of Brutus when he said:

"There is a tide in the affairs of men,
Which, taken at the flood, leads on to fortune;
Omitted, all the voyage of their life is bound in shallows and in miseries."

What took place in the Town of York on the 19th of October, 1781, is a landmark in our history, for without it this western world would have been quite different. If Yorktown had not occurred, we might well have today a Commonwealth status with Great Britain and many of the milestones in our history of the last two centuries would not have occurred.

We all know of the elements that combined together so fortunately in so short a time—and how the movement of Washington's Army—the support of Lafayette and of the Virginia militia—the arrival of the French Fleet—all conspired to bring about the resulting surrender of the British Forces under Lord Cornwallis. The odds against this happening were tremendous—and into the making of this victory went the sacrifices of many unsung heroes.

For a few moments this morning, I want to talk about an aspect of Yorktown that few histories record.

Surrounded on the South side of the river and bottled up in the Town of York, Cornwallis prudently fortified Gloucester Point, under the command of the notorious General Banastre Tarlton, for Gloucester Point was his back door, which he was saving as an escape route.

Realizing this, Washington directed Brig. General George Weedon, of Fredericksburg, to gather militia from the surrounding counties and march to Gloucester to keep that back door closed. Militia from the four lower Northern Neck Counties of Richmond, Westmoreland, Lancaster and Northumberland were ordered into active duty for three months. They were later joined by the French Legion of some 600 troops under the command of Duke de Lauzun, and 800 French marines furnished by Admiral DeGrasse. The stage was set and General Weedon waited for Cornwallis to make his move.

But another factor appeared, which almost proved fatal—the continuing necessity of furnishing supplies to these troops in Gloucester and to the French fleet—Gloucester and Mathews Counties having been thoroughly stripped by the British and allied forces of available food and supplies.

When the tide of war had come to Virginia in 1780, Thomas Jefferson, then Governor, in June of that year, appointed in each of the eastern counties a Commissary under what was then known as the "Provision Law," to obtain—by impressment if necessary—supplies for the Army. Robert Hill was the Commissary appointed for King and Queen County. So General Weedon turned to the adjoining County of King and Queen and on September 27th, only three weeks before the surrender, wrote a letter to Robert Hill. The letter is quite remarkable. It was altogether in Weedon's own handwriting; it was written from his headquarters at Gloucester Courthouse undoubtedly by candlelight. It was sent by Sgt. Hawkins on a fast horse and the letter stated in most positive terms—and I quote:

"A warrant for immediately impressing cattle, sheep, flour, meal, waggons, horses and vessels for the use of the allied Army under his Excellency Genl. Washington will be delivered to you by Sgt. Hawkins claiming your utmost aide in the execution thereof. The present position of our affairs require the most extraordinary exertions. A Fleet & Army greatly exceeding calculation we had formed of assistance from our Great & Good Ally is now to be Fed and Supported. I have therefore to require you with the utmost activity to draw from your County the several articles specified in the above mentioned warrant and to take means in conjunction with the Sergeant for their immediate transportation."

Acting promptly, Robert Hill produced the "Extraordinary Exertions" requested in Weedon's letter, and the transportation of supplies began immediately—and perhaps only just in time, for Cornwallis on the night of October 16th made his move to escape Yorktown through his back door at Gloucester Point.

A principal part of the British Troops were transported across the York River but a "violent storm" prevented the remaining troops from crossing. Weedon's command stood firm. The next day Cornwallis called for a 24 hour truce and both sides met at the Moore House just outside of the Town of York. We know about the surrender by Cornwallis of his troops on Surrender Field, just outside of Yorktown. We know about Lord Cornwallis' indisposition and the parts played by Generals Lincoln and O'Hara.

Little is known, however, of the surrender at Gloucester Point. At 1:00 P.M. on October 19th, one hour before the capitulation at Yorktown began, two of the British Redoubts at Gloucester Point surrendered and at 3:00 P.M., to the sound of trumpets and drums playing a march, the British infantry, with shouldered arms, and the Cavalry with swords drawn, marched between two columns of the allied forces and LAID DOWN THEIR ARMS.

We recall from our history the short reign of Richard the III of England, and how on Bosworth Field, King Richard's forces were soundly defeated by an Army under the Earl of Richmond. Richard was killed. The Earl of Richmond became King Henry the VII.

From the folklore of that battle has come to us the story of the Horseshoe Nail—

"For want of a nail, a shoe was lost,
For want of a shoe, a horse was lost,
For want of a horse, a rider was lost,
For want of a rider, a message was lost,
For want of a message, a battle was lost,
For failure of battle, the kingdom was lost;—
And all for the want of a Horseshoe Nail."

Many horseshoe nails could have been lost on the road to Yorktown.

If George Weedon, a native of Westmoreland County, had not been available; IF the militia from the Northern Neck had not marched to the defense of Gloucester; IF the French Legion had been ordered elsewhere; IF Admiral DeGrasse had not ordered the French marines ashore; IF General Weedon had not waited for Cornwallis' attempt to open his back door and saved his forces for that stormy night; IF Robert Hill had not acted promptly and impressed the supplies needed—(and we can be sure it did not increase his popularity among his own people)—and IF the supplies had not reached Gloucester in time—

These events that did occur—and many hundreds of others like them—are the slender threads which supported the Victory at Yorktown—the horseshoe nails which enable us today to celebrate the bicentennial of our victory.

Today, we are the inheritors of those who sacrificed and lost their lives and fortunes to bring freedom to this western world.

Many, many, many centuries ago, someone far wiser than we are, put these thoughts together as we read from the Book of Deuteronomy:

And it shall be, when the Lord Thy God shall have brought Thee into the land which he swore unto Thy Fathers, to Abraham, to Isaac, and to Jacob, to give Thee great and goodly cities, which thou didst not build, and houses full of all good things, which thou didst not fill, and cisterns hewn out, which thou didst not hew, and vineyards and olive trees, which thou didst not plant, and when thou shalt have eaten and be full—then take heed lest thou forget the Lord, who brought Thee forth out of the land of Egypt, and out of the house of bondage. . .

## HIGH INTEREST RATES

Mr. BOREN. Mr. President, during the course of the past several days, I have had the opportunity to crisscross the United States to fulfill some speaking obligations and at the same time to continue my assessment of the mood of Americans regarding the economy in general and persistent high interest rates in particular.

To say that I found a great deal of uncertainty and alarm would be an understatement. The only consistent thread that ran through the many conversations I have had was that interest rates were too high and that if some action were not taken soon the economic chaos that has marked many segments of our economy would deteriorate even further and result in the collapse of industries such as housing, small business, the automobile industry, and large segments of agriculture.

If it is proper to say that confusion can be a constant, then it is, when applied to the numerous newspaper articles, private reports, television, and radio newscasts, and other means of mass communication that have deluged the American people with every conceivable theory of what causes high interest rates and how they can be cured.

It is small wonder, Mr. President, that people lack confidence in the ability to effectuate needed reforms when every idea is met with a cacophony of pronouncements detailing why it will not work. These precursors of doom usually follow their demolition of someone else's idea with a mandate that the President and the Congress and the country must accept their plan, because it is, after all, the only reasonable method to solve the dilemma in which we find ourselves.

Thus, we are told that interest rates will remain high until we return to the gold standard, or until we actually balance the budget, or until we persuade the Federal Reserve Board to open the

money spigots full blast, or until we persuade Wall Street that the Congress is serious about reducing the Federal deficit, or until we prevent corporate mergers that soak up needed capital from the money market, or until we increase productivity, or until we do any one of a hundred other things.

Mr. President, I do not mean to imply that people who advocate these sorts of remedies are necessarily wrong. In fact, I have and I continue to support some of these ideas myself. I do mean to say that the American public is greatly confused by the profusion of these ideas, and alarmed by the thought that if no one can agree on a solution, there will be no solution. In addition, these theories all seem to come separately, rather than as a part of an overall strategy designed to attack on several fronts what is a highly complex economic problem.

All of these suggestions, in other words, seem to imply that the only way to overwhelm the high interest rate castle is a single frontal assault with one super weapon. Instead, I believe that it will take a wide variety of weapons and cooperation among many different people and segments of our society to overwhelm that castle.

The first step in achieving a kind of broad assault on interest rates that I feel is absolutely necessary, Mr. President, is to gather together the varying elements charged with dealing with this problem and giving them a mandate to come up with a workable scenario. The only person who can call such an economic conference is the President of the United States. At the same time, I believe the President should direct members of his administration such as Secretary Regan and Chairman Volcker and others to stop making inflammatory remarks and issuing statements that either cannot logically be believed or are in conflict with statements made by others in his own administration.

What do I mean by that, Mr. President? I would invite the attention of my colleagues to an insertion made in the CONGRESSIONAL RECORD yesterday by the distinguished minority leader of the Senate, Senator BYRD of West Virginia. That insertion contained statements made by members of the administration over a period of time which they had to know were not, and were unlikely to ever, be accurate. For example, the Chairman of the Council of Economic Advisers saying in March of this year "the turnaround that we have forecast in interest rates is already a reality."

The record is repleted with statements made by administration officials which within days were either contradicted, clarified, or modified by other members of the administration or, in some cases, by the very person who made the original statement.

This sort of thing does nothing but sow the seeds of confusion and uncertainty at a time when we must be promoting a sense of stability, purpose, and direction.

It also does very little good, Mr. President, for the Chairman of the Federal Reserve Board to appear before a Senate committee and say that the only solution to high interest rates is for the Congress to slash even deeper into the budget than we have done so far. That sort of inflamatory rhetoric does nothing to enhance the possibilities of cooperation necessary to achieving the broad-based solutions needed.

Certainly, it is true that further spending cuts now and in future fiscal years will be required to reduce the Federal deficit and achieve a balanced budget. No one disputes the desirability of removing the Federal Government from the credit market.

One only has to realize that during the last quarter of this year the Government will have to borrow $33 billion in order to meet its obligations, to understand the depths to which the Federal Government is involved in the money markets. This is the largest single dip into the credit pool that the Government has ever made. Mr. President, one-half of all savings, other than that needed just to replace worn-out plants and equipment, goes to finance the Government's deficits.

But to contend that further budget cutting is absolutely the only solution to this problem is untrue and misleads the American public.

The policies of the Federal Reserve Board itself have an immense impact on the economy. The manipulation of the money supply, the so-called "tight money" policy that the Board has had in place since October 1979, has had as much to do with producing high interest rates as has the failure of the Congress to balance the budget.

Just as I believe that the entire blame for and the solution for high interest rates does not rest on Capitol Hill, I also do not suggest that a complete reversal of the Federal Reserve Board's policies is in order. However, Congress can help the situation by budgetary actions, and the Federal Reserve Board can assist by moderating its policy.

To a very limited extent, they have already done so, and I note with interest that some in the administration have suggested that they could do some more.

I understand the argument that to greatly increase the money supply could lead to an increase in inflation, which mercifully has been declining recently and that the anticipation of a new inflationary spiral could produce higher interest rates rather than lowering them.

However, that does not mean that no increase in the money supply can be achieved. I believe that a moderate increase by the Fed in conjunction with other actions in other segments of the public and private sector, would be an acceptable component of an overall plan of action.

At the same time, the Congress must recognize its own responsibilities as another component in that over-all plan. We must approach the possibility of additional spending cuts with an open mind. That does not mean that we must automatically endorse deeper slashes in programs without assessing their impact. It does mean that we should consider all possibilities open to us. No section of the budget, including defense and entitlement programs, should be absolutely sacrosanct.

If, as I have been saying for many weeks, and many of my colleagues have proclaimed, the economic crisis we face is a matter of survival for the Nation, then we should not and cannot afford to play political games or to ignore any possible solution.

Now, lest I be misunderstood, Mr. President, let me make it very clear that in the areas of social security and defense, I am not advocating wholesale slaughter. No one in this body or in this Congress or in this Nation feels more strongly than I do about the absolute need for a solid, viable national security program. However, it would be less than candid if I did not admit that out of a one trillion dollar budget over the next 5 years, some savings are not possible.

In the same vein, I yield to no person in my dedication to protect the rights and the health of those people in our society who depend upon social security and similar assistance programs to maintain themselves in the latter years of their lives with the dignity to which they are entitled.

But, again, it is not a favor to social security recipients, or to the Nation as as whole, to allow the economy of the country to reach such a point that collapse is imminent—a collapse that would mean that payments of this type could be jeopardized even further or completely.

Returning to my theme that the solution to the interest rate problem lies in a broad base assault by all segments of our Nation, Mr. President, I say that the private sector must also do its part.

To fail to achieve a solution because the private sector is unwilling to believe that a solution could be found, would be a great tragedy. It is frustrating for those of us in the Congress to go through the soul-searching exercise of voting for spending cuts in needed and justified programs, to then be told that we are not serious.

In many respects, the successful completion of a project rests on the faith of those involved that it can be completed. In many instances, Mr. President, if you enter a contest believing you will fail, you will, in fact, fail. History, and I might say American history, is filled with examples of battles won against tremendous odds because people believed they could be won.

Financial markets and the people of the United States who invest in them must be willing to take the risk of believing that budget deficits can be reduced and a balanced budget can be achieved and that interest rates can come down.

Perhaps this is the most difficult component of this battle—to define and to articulately set forth. It is psychological and elusive and at the same time very important to achieve.

There is no doubt that problems abound. I have pointed out before the statistical evidence of the devastating effect of high interest rates. The scarcity

of mortgage money has so depressed housing activity that starts for new homes fell in August to a seasonally adjusted annual rate of 937,000 units, the lowest level in 5 years. The figure for single family houses was 591,000, a record low. Mortgage interest rates are 17 percent or more, and no turnaround is in sight.

As a recent article in the Washington Post noted, interest rates have similarly stymied businesses, long-term borrowing plans and have limited the prospect of increased investment in new plants and equipment next year.

Similarly, gloom pervades the world forecasts for economic activity. I am certain that when finance ministers and world bankers come to Washington for the annual meeting of the World Bank and International Monetary Fund, you will be able to cut the gloom with a knife.

At the same time, each small molecule of good news is immediately dashed on the rocks of dire prediction. For example, the prime rate dropped one-half of 1 percent recently and was immediately followed by a front page story in the Wall Street Journal headlined "Many Analysts Grow Gloomier on Outlook of Interest Rates."

The article says that analysts remain pessimistic, despite the drop in the prime rate. The conventional wisdom is that it is temporary only and that heavy Treasury and corporate borrowing later this year will put renewed upward pressure on interest rates.

Such outlooks form at least part of the basis for the reason that despite the decline in the inflation rate, interest rates remain high, thus running contrary to the historic condition that interest rates normally run only 2 to 3 percent above the inflation rate. In this instance, we find interest rates running 7 and 8 percent or more above the inflation rate. Gloomy forecasts which cause investors to believe that the Federal Reserve will not maintain a reasonable control of the money supply or that the Congress and the President will not be able to reduce deficits and balance the budget cause interest rates to remain at record levels as a hedge against the perceived coming failure.

So what are we to do? I return to my original premise, Mr. President, that viewed singly, the gold standard, tight money, reducing the deficit, balancing the budget, creating faith in Wall Street, are not answers. Taken in combination, perhaps they are. But, it will take the cooperation and the understanding and the faith of all the apostles of these various theories to find an achievable solution. I call again on the President to bring these elements together and make a sustained effort to devise an emergency broad-based plan.

Mr. CHAFEE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. PELL. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. ARMSTRONG). Without objection, it is so ordered.

## CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. The period for the transaction of routine morning business has expired..

## INTERNATIONAL SECURITY AND DEVELOPMENT COOPERATION ACT OF 1981

The PRESIDING OFFICER. The Chair advises the Senate that, under the previous order, the time for morning business having expired, the Senate will now proceed to the consideration of S. 1196, which the clerk will state.

The legislative clerk read as follows:

A bill (S. 1196) to amend the Foreign Assistance Act of 1961 and the Arms Export Control Act to authorize appropriations for development and security assistance programs for the fiscal year 1982, to authorize appropriations for the Peace Corps for the fiscal year 1982, to provide authorities for the Overseas Private Investment Corporation, and for other purposes.

The Senate proceeded to consider the bill.

The PRESIDING OFFICER. The Senator from Illinois.

Mr. PERCY. Mr. President, today the Senate will consider the International Security and Development Cooperation Act of 1981. The funds this bill authorizes are intended to assist developing countries provide for their security and improve their economic welfare. By doing so, the security and economic interests of the United States will be substantially enhanced.

The provisions of this bill also set important foreign policy directives for the United States. It is for this reason that the President of the United States places a very high priority on passage of this legislation.

Consideration of the foreign assistance bill is never an easy task, Mr. President. It is particularly difficult to address these programs now, when we are in the midst of another painful process of cutting back many domestic programs in order to produce an austere Federal budget.

Taking all of this into account, Mr. President, and certainly, the President of the United States is in the best position to take that into account, I should like now to read a letter dated September 22, 1981, from President Ronald Reagan:

DEAR MR. CHAIRMAN: As the Senate begins its deliberation of the foreign assistance authorization bill, I want to emphasize the importance of this legislation to my entire agenda for foreign affairs.

America today faces some of its most serious challenges abroad from the adventurism of the Soviet Union and its proxies in such areas as Southwest Asia, the Carribean, and Africa. This legislation, which I have requested, will provide vital tools to assist us in meeting these challenges and promote and protect America's interests abroad. The reduction of these assistance programs would have serious repercussions on our foreign policy and would endanger our national security objectives.

As you are aware, well over half the authorization request is allocated to security assistance. These funds are designed to help our friends develop the means to deter regional threats, and the funds therefore promote our vital interests. I have also taken steps to ensure that this legislation contains the necessary resources to help less developed countries make progress in coping with their serious economic problems.

I appreciate your assistance and leadership in guiding this crucial bill through the Senate.

Sincerely,

RON.

Mr. President, all of us on the Committee on Foreign Relations were fully aware of the need for budget austerity as we deliberated on this year's bill. We were determined to produce legislation which was as lean as possible. When the new administration came into office, they reviewed the Carter budget for the programs in this bill and reduced the development programs by $570 million, while increasing the security programs by $1 billion. Overall, while engaged in an extraordinary effort to cut the Federal budget, the new administration nonetheless deemed it necessary to increase the request for these programs by over $400 million.

We on the committee took a hard look at each program and produced a package which reduced the Reagan budget by $900 million. This reduction makes the proposed fiscal year 1982 foreign aid program fully consistent with the first concurrent budget resolution and the reconciliation legislation as passed by Congress.

The reductions made by the committee included large cuts in both security and development aid programs; for example, the proposal cuts an additional $105 million from development programs over and above the $570 million already cut by the Reagan administration.

Many of us on the committee were not happy about those cuts, any more than we were about the reductions we have made on many domestic programs. But we believed it was necessary to make these reductions and still maintain a core program which would allow the administration to pursue a dynamic foreign policy.

While we recognized the need to reduce the Federal budget, we were also aware of the need for the United States to have a full array of foreign policy instruments at its disposal to protect our interests in the international arena.

The committee strongly believes that any further budget reductions for these programs would be quite detrimental to our national interest.

At the same time, the managers of the bill believe that increases that may be proposed to this bill should be kept to an absolute minimum. I would hope that any proposals to increase programs would be accompanied by an offsetting proposal for an equal reduction elsewhere in the bill. By the same token I hope my colleagues will recognize the large cuts we have already made and, therefore, will not propose additional cuts here.

The American public, the administration, and the Congress will agree that

our relative defense capabilities have deteriorated over the past years.

Thus, even during a general period of budget cutting, there is a consensus that the defense budget should be increased significantly from last year's level.

We dedicate those resources to defense not because of an obsession with new weaponry for its own sake, but because we believe the United States must have the capacity to defend itself in an increasingly complex world, to discourage others from taking steps which would be detrimental to our own security, and to provide a better overall base to carry out an effective foreign policy.

The programs in the bill we are considering today address some of the same issues. Our defense expenditures are made primarily in the hope that our military forces will not have to be used in battle.

It is, therefore, important to help friendly countries build the military capacity they need to defend themselves and provide also for the common defense. Such strength will lessen the attractiveness for neighbors or other powers to take actions which would threaten their stability or territorial integrity.

Such assistance should reduce the possibility that American men and equipment would be directly engaged in conflicts. Of equal importance, economic and development assistance can help friendly nations provide the economic growth and improved standards of life for their citizens which over the long run will build more stable, Western-oriented societies.

We are currently engaged in evaluating what kind of relationship we should have with the world's other superpower. That is appropriate, and the Committee on Foreign Relations will expend considerable time on that subject.

But we must not lose sight of the fact that our relationships with the developing countries is also of great importance. Indeed, much of the East-West conflict which is now the center of our attention is played out in the South—in the developing world.

We might note that of the tens of thousands of American lives and hundreds of billions in American dollars lost to conflict since World War II, all have been expended in conflicts in the developing countries.

Mr. President, the developing world is also particularly important to the United States because it is the source of many critical raw materials and it provides a market for roughly 40 percent of our exports. The fastest growing markets for our food and manufactured goods are in the Third World.

Finally, I should not neglect to note that in spite of all our domestic problems, the United States still represents nearly one-fifth of the world's wealth, with only 4 percent of the world's population. I think most Americans agree that we have some moral obligation to help those whose needs are desperate as compared to ours.

The millions of Americans who support private voluntary activities to assist people in the developing world attest to that belief.

The bill we are addressing today is thus not a giveaway program. but an investment in America's future. The United States, with our democratic form of government and market-oriented economy, is well suited to live in a world of diversity and change.

We want to promote an international political and economic system where diversity and change are respected, and we want to promote social and economic development in individual countries which also increases respect for such diversity and change.

It is in that kind of world, and with those kind of societies, that the United States will best be able to pursue its own interests and live at peace in the future. These programs will help bring about that kind of world.

Let me briefly summarize the main provisions of the bill, Mr. President.

The bill authorizes a foreign military loan program of $4.1 billion, of which $990 million would be forgiven by the President. The major beneficiaries of this program would include Israel, Egypt, Turkey, Greece, South Korea, Spain, and the Sudan.

In addition. $31 million is authorized for grant military assistance and $42 million for international military education and training.

Also in the military field, the bill establishes a new special defense acquisition fund financed primarily from FMS receipts. The fund would reduce the lead-time needed to deliver military equipment to U.S. allies. The commercial arms sales ceiling is repealed in the bill, while increased congressional control and new regulations for defense articles leasing authority is also included.

Finally, the bill increases emergency military assistance authorities by $50 million and defense article stockpiling by $100 million.

The bill authorizes $2.5 billion in economic support fund programs for fiscal year 1982, including $806 million for Israel, $771 million for Egypt, $300 million for Turkey, $100 million for Pakistan, $50 million for the Philippines, $50 million for the Sudan, $40 million for El Salvador, and $40 million for Jamaica.

In the development assistance area, authority is provided for appropriations of $1.6 billion for AID's programs in fields such as agriculture, population planning, health, education, and energy, plus AID operating expenses.

Additional authorizations of $102 million is provided for the Sahel development program, $27 million for international disaster assistance, $7 million for trade and development program, and $12 million to support American schools and hospitals overseas.

The bill also attempts to improve the efficiency with which foreign assistance is provided. The International Development Cooperation Agency is abolished, as the committee believes IDCA is an unnecessary bureaucratic layer. Dozens of reporting requirements are consolidated and several outdated provisions of the Foreign Assistance Act of 1961 are repealed.

Appropriations of $105 million are authorized for the Peace Corps, and the Peace Corps is separated from ACTION. This latter provision has already been passed by the Senate as an amendment to the State authorization bill.

The authority for the Overseas Private Investment Corporation is extended until September, 1985, and several current restrictions on OPIC's operations are liberalized, including raising the annual per capita income ceiling on countries in which OPIC can operate.

The authority for the housing guaranty program is also extended until September 30, 1983, and the program is allowed to deposit fees and other income in interest-bearing U.S. obligations.

An authorization of $38 million is provided for the international narcotics control programs in fiscal year 1982. In addition, the ban on using U.S. funds to support the spraying of marihuana with paraquat and other herbicides is repealed.

Restrictions on programs in several countries are also modified. The prohibition on foreign assistance for Argentina is repealed, if the President determines that substantial progress has been made in the human rights situation in that country.

The Clark amendment on covert assistance to forces in Angola is repealed, but the President is required to make certain determinations if such assistance is contemplated. A national security waiver to section 669 of the Foreign Assistance Act—the Symington amendment on nuclear programs—is granted for military and economic assistance to Pakistan.

Finally, the President is required to make certain certifications to the Congress on conditions in El Salvador if he wishes to provide assistance to that country.

Mr. President, I firmly believe that the Committee on Foreign Relations has produced a bill which is supportive of the President's programs, while holding expenditures to an absolute minimum.

I would like to thank my colleagues on the committee for the time they have spent in developing reasoned positions on many difficult issues related to this bill.

I would especially like to thank the Senator from Rhode Island, Senator PELL, for his leadership role and cooperation in the development of this bipartisan bill.

Passage of this bill will clearly signal to our friends overseas that the United States continues to have a strong and sincere interest in their security and economic welfare. I strongly commend S. 1196 to my colleagues in the Senate.

Mr. President, S. 1196 includes as Title V provisions concerning the Overseas Private Investment Corporation (OPIC). OPIC is a U.S. Government corporation created in 1969 to insure U.S. private investments in developing countries against political risks. OPIC is backed by the full faith and credit of the United States of America.

OPIC's purpose is: "To mobilize and facilitate the participation of U.S. private capital and skills in the economic

and social development of less developed countries and areas, thereby complementing the development assistance objectives of the United States."

With the intention of increasing OPIC's ability to realize its developmental purposes, the Foreign Relations Committee has reported favorably a number of statutory changes. I will take time to mention a few of the major changes, but refer my colleagues to the committee's report for a more thorough description of the recommended changes in law.

The legislation would extend OPIC's operating authority for 4 years, through September 30, 1985; 4 years is the customary period of extension of OPIC authority, and was requested by the administration.

The current statutory restriction on OPIC support for investments in countries with average annual per capita incomes of $1,000 or more in 1975 U.S. dollars would be raised to a level of $2,950 or more in 1979 U.S. dollars. The restriction is not a prohibition, and has not been regarded as such by OPIC. The committee report includes a lengthy list of exceptions used by OPIC to justify support for investments in high-income developing countries despite the statutory restriction.

OPIC has also used a case-by-case exception where the general exceptions did not apply. I assume OPIC will continue to use the case-by-case exception as well as the general exceptions in the same manner and as conservatively as they have in the past.

OPIC has agreed to report to the Foreign Relations Committee regularly on the justification for case-by-case exception. With these policies and understandings, I believe OPIC will have sufficient operating flexibility, but the purpose of the statutory restriction on support in high-income countries can be retained.

The committee report also mentions that OPIC is expected: "To scrutinize closely all proposals for insurance or other OPIC assistance for projects in higher income developing countries,***"

I wish to state for the record that the committee did not intend in its comments to imply that OPIC does not currently give sufficient scrutiny to proposals which come before it, nor to establish any tests or standards not contained in nor reasonably inferred from statutory provisions.

The committee expects OPIC to scrutinize closely all proposals, regardless of the income level of the country in which the investment is to be made.

The legislation would also add a provision requiring OPIC, when deciding whether to insure projects, to "seek to support those developmental projects having positive trade benefits for the United States." OPIC has repeatedly assured me that this new provision, "will in no way denigrate OPIC's prime developmental purpose." I understand that OPIC will continue to evaluate thoroughly the development impact of proposed investments, and will not lower by a single millimeter the threshold of acceptable development impact it applies.

Mr. President, the purpose of the new provision is not to encourage OPIC to support investments which do not have an acceptable level of development benefits just because there would be positive trade benefits for the United States.

The purpose of the amendment is to emphasize OPIC's positive contribution to U.S. trade.

OPIC supports only investments which are expected to have positive net trade benefits for the United States, and where OPIC's financial ability to support investments is limited, OPIC will give priority to supporting those investments meeting its development impact standards which have the highest net positive trade benefits for the United States.

The legislation also authorizes OPIC to begin offering insurance against civil strife risks to U.S. investments in developing countries. OPIC would be required to report to the Foreign Relations Committee in detail on its plans for such insurance coverage before actually offering such insurance.

The bill also adds two new members to the OPIC Board of Directors: A representative of the Department of Labor and an additional small business sector representative.

These additional members should assist OPIC in carrying out the intent of Congress and the recommendations contained in the report of the General Accounting Office dated February 27, 1981.

The bill also adds a provision requiring OPIC when deciding whether or not to support investments in developing countries to consider whether the investment is likely to be made without OPIC support. I recognize that there may be instances in which OPIC might come to the conclusion that there was very little likelihood of additionality, but OPIC might support an investment for reasons of U.S. national interest. I would consider such action consistent with the overall statutory framework in which OPIC operates.

The bill also contains a provision intended to address the growing detrimental impact on U.S. trade arising from the application by foreign governments of performance requirements to U.S. investments.

Such requirements include local content and reexport requirements which tend to distort trade flows to the disadvantage of the United States. The provision would require OPIC to refuse to support any investment subject to incentives or performance requirements which would tend to reduce significantly the positive U.S. trade benefits which would otherwise arise from the investment.

OPIC and a number of users of OPIC have expressed concern that this provision could discourage U.S. investors. The provision leaves considerable discretionary judgment to OPIC, however, including the assessment of the impact of the performance requirements and the magnitude of the reduction in trade benefits sufficient to preclude OPIC support for an investment.

In any case, OPIC does not support investments which do not have net positive trade benefits to the United States, and there would be few cases in which the positive trade benefits were significantly reduced without becoming negative and therefore precluding OPIC support. Foreign governments should not, in any case, be led to expect the United States to subsidize investments through Government insurance, when those foreign governments apply measures which impose significant trade losses on the United States.

Mr. President, to the best of my knowledge, outside of a possibility of a contingency fund request from the administration, despite a $900 million cutback in the so-called Percy-Pell amendment, I do not believe that the administration will request a restoration of funds. It was almost as if my distinguished colleague, the ranking minority member of the committee, and our distinguished staffs, who worked so hard on this measure, were prophetic about the fact that the very day we are introducing this legislation—which calls for a budget reduction of $900 million in the Reagan administration budget—with some foresight, we might have known that we would be going through another budget crunch and that the President would be digging every place to find domestic programs that can be cut back, and that recommendations along these lines would be offered by the congressional leadership.

So that at this time, when this program is before the Senate, I believe that, on behalf of my colleague, Senator PELL, myself, and other members of the Committee on Foreign Relations, we can certify and testify to the fact that this is a lean, hard, tough budget.

As the President aptly said in his letter, cuts below this would seriously endanger our security assistance programs, which are an integral part of our national security effort and our defense effort and would undercut the stability of the world. Certainly, this Nation's well-being depends upon that stability.

This is particularly so when we take into account that in the developing parts of the world where we have assistance programs, we are finding that those countries are the largest markets, and increasingly large markets, for our own products—services, agricultural products, and manufactured goods.

Forty percent of our manufactured goods that are exported go to developing countries. They are increasing in sales at the rate of 20 percent compounded each year. That is far faster than markets are developing in developed parts of the world and certainly faster than our own domestic markets, which are a long way from compounding in growth at the rate of 20 percent a year.

When we take into account that virtually 80 percent of all the raw materials used in our factories across the country, which provide employment to our people, come from abroad, we can recognize that the stability of the world and its well-being are in the interests of the people of the United States of America.

As I go around, I hear aspersions cast against foreign aid, and I have never hesitated to comment that when we cut

budgets this year in Congress, we have cut foreign aid and foreign assistance along with other budgets.

Every President and every Congress has recognized the necessity of maintaining assistance programs abroad, not only security assistance to buttress and strengthen our own security efforts but also the necessity of assisting countries in volatile parts of the world where, without that assistance, whether it is through multinational sources of bilateral sources, we would have less stability, we might have turmoil and chaos, we would lose raw materials vital to this country, and we would lose markets that are important to the future generations of our Nation.

Mr. President, after the distinguished Senator from Rhode Island (Mr. PELL) completes his remarks, I urge Members of the Senate to come forward with amendments at the earliest possible time, because this measure will be set aside tomorrow. We cannot get back on it again until next week. We would like to finish up as much as we can today.

Mr. PELL. Mr. President, I am pleased to join the distinguished chairman of the Senate Committee on Foreign Relations in recommending to the Senate, S. 1196, the International Security and Development Cooperation Act of 1981.

The Committee on Foreign Relations unanimously approved a favorable report on S. 1196 after 19 days of hearings and 4 days of markup on the administration's fiscal 1982 foreign assistance legislation. During our consideration of this legislation, the committee reduced the President's request by a total of $900.1 million, or 14 percent.

Among the reductions approved by the committee are the following: $95.6 million in development assistance; $208 million in the proposed contingency fund for economic support fund programs; and $590.9 million in military assistance, including elimination of a proposed $100 million contingency fund for the military assistance program (MAP) and $496 million in a new direct credit foreign military sales program.

The committee undertook these reductions cognizant of its responsibility to maintain economic and security assistance programs at a reasonable level, while also mindful of its fiscal responsibility to keep these programs lean. Consequently, the committee adopted most of the increased security assistance requested by the Reagan administration, while actually authorizing less funds for development assistance than were approved for fiscal 1981.

Mr. President, the United States faces some of the gravest foreign policy challenges in the post-World War II era. The continuing Soviet occupation of Afghanistan, chaos in Iran, the festering conflict between Iran and Iraq, political and military conflict in southern Africa, potential threats to the vital Persian Gulf, and the need to insure continued progress in the Middle East peace process, and the increasing turmoil throughout Central America and the Caribbean, are all notable examples of the challenges which confront our Nation at this time.

Mr. President, these challenges underscore the need for the United States to strengthen its existing alliances and friendships abroad. It is in this context of international challenge that the Committee on Foreign Relations also sought to provide the President and the Secretary of State with greater flexibility in order to respond to an ever changing international climate fraught with danger, but also presenting opportunities to advance U.S. interests.

This year, as in 1980, the Committee on Foreign Relations considered security and development as one single piece of legislation. This is because both of these efforts are inextricably linked to the national security interests of the United States. For fiscal 1982, $6.68 billion has been proposed for security assistance and related programs, only $3.123 billion of which will require actual appropriations by the Congress. Almost 65 percent of this security assistance is destined for the Middle East, with Israel designated to receive 33 percent and Egypt 25 percent of the total security assistance provided in fiscal 1982 recommendations.

Having reduced the President's request by an additional $95.6 million, the committee recommends an authorization of $2.145 billion for development assistance efforts. This amount actually represents a $21 million reduction from the fiscal 1981 authorization level, approved last year. In supporting this reduced level of development assistance, the committee reasserts its firm conviction that U.S. security interests abroad must be bolstered by a strong commitment to meeting the basic human needs within the developing nations of Africa, Asia, and Latin America.

The committee report on S. 1196 has made mention of the important confluence of interests between development and security assistance. This confluence of interest will continue to grow in importance, directly affecting the U.S. economy and security over the next 20 years. Over 1 million American jobs are presently dependent on U.S. exports to the developing nations. Nearly one-third of the U.S. wheat, rice, and cotton crops is purchased by these same nations. And while our exports have expanded to the developing nations, we have become increasingly dependent on them for imports of strategic minerals and other raw materials. The United States imports 75 percent of its cobalt, 90 percent of its bauxite, 100 percent of its tin and natural rubber, and 56 percent of its mercury from the developing countries.

Mr. President, certainly these statistics remind us that the United States has a vital stake in the present and future economic and political stability of these countries. I would submit to my colleagues in the Senate that our development assistance program is a primary resource with which the United States can assist these societies in building a solid economic and political structure.

Mr. President, if we are, as Abraham Lincoln once said of the United States, "the last best hope of earth," then we must proceed to approve this essential legislation for President Reagan as he attempts to fashion his foreign policy at this challenging juncture of history. The Committee on Foreign Relations has provided the President with strong bipartisan support in this endeavor, and I join with Chairman PERCY and the full Senate Committee on Foreign Relations in recommending that the Senate approve the International Security and Development Corporation Act of 1981.

UP AMENDMENT NO. 409

Mr. PERCY. Mr. President, the first amendments to be offered are technical amendments.

During the committee markup, Senators KASSEBAUM and LUGAR offered amendments which consolidated several reporting requirements in current law. This was a very useful amendment designed to clean up the Foreign Assistance Act and Arms Export Control Act.

Several technical amendments are required to conform their effort to current law and other provisions in the bill. It was clear during the markup that neither Senator KASSEBAUM nor LUGAR intended to make policy changes with their amendment.

Technical amendments one to seven make changes related to the Kassebaum-Lugar amendment.

Technical amendment eight makes clear the intention of the committee that funds for Costa Rica be earmarked in the bill.

I send the amendment to the desk.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Illinois (Mr. PERCY) proposes an unprinted amendment numbered 409.

Mr. PERCY. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

(1) On page 3, line 3, delete the period and add a comma in lieu thereof, followed by quotation marks and a semicolon.

(2) On page 9, delete lines 10 through 13.

On page 18, delete lines 11 through 17.

(3) On page 67, between lines 7 and 8, insert the following and renumber the paragraphs accordingly.

"(5) the aggregate dollar value and quantity of defense articles and defense services, and of military education and training, furnished by the United States to each foreign country and international organization, by category, specifying whether they were furnished by grant under chapter 2 of the Arms Export Control Act, by commercial sale licensed under section 38 of that Act, or by other authority."

(4) On page 72, line 4, add the following sentence: "This report shall include—"

(5) On page 76, strike lines 10 through 23 and, in lieu thereof, insert the following:

(12) (A) a full and complete description of the practices regarding the observance of and respect for internationally recognized human rights (within the meaning of sections 116(a) and 502B of this Act) in each country proposed as a recipient of foreign assistance and in all other countries which are members of the United Nations, with consideration being given to (i) relevant findings of appropriate international organi-

zations, including nongovernmental organizations such as the International Committee of the Red Cross, and (ii) the extent of cooperation by the government of the country in permitting an unimpeded investigation by any such organization of alleged violations of internationally recognized human rights; and

(B) a description of the steps the Administrator of the agency primarily responsible for administering part I of this Act has taken to alter United States programs under such part in any country because of human rights considerations;"

(6) On page 79, line 10, strike "502B(b)" and on line 12, after the number "668," insert the following: "the first sentence and the words 'report or' in the second sentence of section 502B(b),"

(7) On page 79, between lines 3 and 4, add a new subsection (b) as follows:

"(b) Section 624(f)(2)(B) of the Foreign Assistance Act of 1961 is amended by inserting 'and section 634(a)(12)' immediately after 'section 502B.'"

(8) On page 23 between lines 4 and 5 insert the following:

"(d) Of the funds authorized to be appropriated to carry out this chapter for the fiscal year 1982, $2,500,000 shall be available only for Costa Rica in order for that nation to meet its international obligations, and its increasing debt burdens."

Mr. PERCY. Mr. President, I point out that the need for the amendment was originally pointed out to me in a letter dated September 14, 1981, from Senator CLAIBORNE PELL, the ranking minority member, and I express appreciation to Senator PELL for pointing out the necessity for the technical amendments which are under consideration now, which have been agreed to by Senator KASSEBAUM and Senator LUGAR.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (UP No. 409) was agreed to.

AMENDMENT NO. 525

(Purpose: To provide that funds may be made available for the Special Defense Acquisition Fund only to such extent or in such amounts as are provided in advance in appropriation Acts)

Mr. PERCY. Mr. President, I call up amendment No. 525.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Illinois (Mr. PERCY) proposes an amendment numbered 525.

Mr. PERCY. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 11, line 19, before the period at the end of the line, insert the following: "except that in any fiscal year such funds shall be available only to such extent or in such amounts as are provided in advance in appropriation Acts".

Mr. PERCY. Mr. President, this amendment is consistent with other provisions of law relating to similar funds.

Senators KASTEN, HATFIELD, DOMENICI, INOUYE, PROXMIRE, and HOLLINGS have submitted an amendment to limit the special defense acquisition fund to the extent provided for in appropriation acts. The majority manager of the bill accepts this amendment; and if it is acceptable to my distinguished colleague, we can move along.

● Mr. KASTEN. Mr. President, this amendment is offered on behalf of myself; the chairman of the Appropriations Committee (Mr. HATFIELD); the chairman of the Budget Committee (Mr. DOMENICI; Senator INOUYE, the ranking minority member of the Foreign Operations Appropriations Subcommittee, which I chair; and the ranking members of the Appropriations and Budget Committees (Messrs. PROXMIRE and HOLLINGS).

Mr. President, I will not take much time explaining this amendment inasmuch as it is a very straightforward one, and it is my understanding that the managers of the bill have no objection to it.

The Senate Foreign Relations Committee has reported out a provision which creates a special defense acquisition fund, in its original form a revolving fund, which would be used to procure military equipment in advance of actual need. The problems this addresses are the many instances where our foreign friends need military equipment on an urgent basis which, therefore, must be taken directly from U.S. forces. Perhaps the best example of this was in 1973 when our own supply of ammunition became dangerously low as a result of the provision of ammunition to Israel. This fund is desired to procure equipment in advance so that such situations do not occur again.

I strongly support the creation of this fund, although I and the cosponsors have one housekeeping problem which the amendment I am offering seeks to remedy. The problem basically is that this provision creates new spending which under the Budget Act must be provided through the appropriations process. Without this technical change, I understand that the Budget Committee would make a point of order against this provision, and I, speaking for myself, would have to likewise object on the same basis. Therefore, we are offering the amendment.

I want to emphasize that the amendment uses the word "provided," and not "appropriated," and as the chairman of the Foreign Operations Appropriations Subcommittee, it would be my intention to provide a limitation and not an appropriation, the latter being likely to create problems.●

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Illinois.

The amendment (No. 525) was agreed to.

Mr. PERCY. Mr. President, we have a number of amendments that we know will be proposed by Members. Because the managers of the bill have no further amendments to be proposed at this time, we urge our colleagues to come to the Chamber and to propose the amendments that they might have to this bill.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. PERCY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. PRESSLER). Without objection, it is so ordered.

## GERMAN PARLIAMENTARIANS VISIT SENATE

Mr. PERCY. Mr. President, I announce to our colleagues that we have the great distinction and honor of hosting a coffee at 3 p.m. for a group of German Parliamentarians in the Senate Foreign Parlations Room, S. 116, with Senator LARRY PRESSLER as the host of that group. The German Parliamentarians are here on official business and I know that as many of our colleagues as possible would want to pay their respects. If they cannot stay for the full coffee, they can stop by to introduce themselves and be introduced to our foreign relations counterparts in the German Parliament.

Mr. President, I suggest the absence of a quorum.

## INTERNATIONAL SECURITY AND DEVELOPMENT COOPERATION ACT OF 1981

The Senate continued with consideration of the bill.

AMENDMENT NO. 555

(Purpose: To make available funds under the Foreign Assistance Act of 1961 for Haiti only if the President determines that the Government of Haiti has cooperated with the United States in halting illegal emigration from Haiti, and for other purposes)

Mr. CHILES. Mr. President, I call up my amendment No. 555 and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will state the amendment.

The assistant legislative clerk read as follows:

The Senator from Florida (Mr. CHILES) proposes an amendment numbered 555:

On page 84, between lines 2 and 3, insert the following:

"SEC. 716. (a)(1) It is the sense of the Congress that funds made available under chapter 1 of part I or chapter 2 or chapter 5 of part II of the Foreign Assistance Act of 1961 should be used for programs in Haiti which would ameliorate the conditions of poverty and underdevelopment which contribute to the emigration of Haitian citizens and which would assist Haiti to deal with the problem of illegal emigration.

"(2) To the maximum extent practicable, assistance for Haiti for the fiscal year 1982 under chapter 1 of part I of the Foreign Assistance Act of 1961 should be provided through private and voluntary organizations.

"(b) Funds available for the fiscal year 1982 to carry out chapter 1 of part I or chapter 2 or chapter 5 of part II of the Foreign Assistance Act of 1961 may be expanded for Haiti, and credits and guarantees extended for the fiscal year 1982 under the Arms Export Control Act may be approved for use for Haiti only if the President determines that the Government of Haiti—

"(1) is cooperating with the United States in halting illegal emigration from Haiti;

"(2) is not aiding, abetting, or otherwise supporting illegal emigration from Haiti;

"(3) has provided assurances that it will cooperate fully in implementing United States development assistance programs in Haiti (including programs for prior fiscal year); and

"(4) is not engaged in a consistent pattern of gross violation of internationally recognized human rights.

"(c) Six months after the date of enactment of this Act, the President shall prepare and transmit to the Congress a report on the extent to which the actions of the Government of Haiti are consistent with paragraphs (1), (2), (3), and (4) of subsection (b) of this section.

"(d) Notwithstanding the limitations of section 660 of the Foreign Assistance Act of 1961, funds made available under such Act for the fiscal year 1982 may be used for programs with Haiti if such funds are used to assist in halting significant illegal emigration from Haiti to the United States.".

On page 84, line 4, strike out "SEC. 716." and insert in lieu thereof "SEC. 717.".

Mr. CHILES. Mr. President, all of us are vitally concerned with the massive influx of illegal immigrants into this country, a situation which has strained our social service network to the limit and made a mockery of our immigration laws. It is a crisis which demands a prompt and firm response. Part of that response must be the development of a workable immigration policy which will limit and control the flow of refugees into the United States. Another aspect of that response must be an immediate effort to use all of our potential resources to stem the flow of illegal immigration. The amendment I am proposing today seeks to insure that we will use one of these resources, namely foreign assistance, to deal with the continued stream of refugees from Haiti.

The Haitian problem was aptly described in the opening paragraph of a recent Tampa Tribune editorial:

Two boats carrying 175 Haitians glided ashore at the usual spot on Miami's beaches yesterday, following a ferry route Floridians can almost set their watches by.

Each week that goes by brings more Haitian refugees to Florida's shores, aggravating an already overwhelming problem. The burden of these refugees has fallen directly on the State of Florida and the people of south Florida. The ability of local government to cope is past the breaking point. An inhumane and dangerous situation exists at the Krome North facility in Dade County where over 1,000 Haitian refugees are housed under appalling conditions.

For most Americans, Mr. President, immigration is an abstract problem that does not affect their daily lives. The people of south Florida have to live with this problem every day. They are worried and frustrated and they should be. The handling of the Haitian refugee problem by the Federal Government, or perhaps I should say "mishandling," is a monument to Government at its worst.

Our task now must be to redress that situation as soon as we can. South Florida cannot wait while the wheels of Congress and the administration turn slowly to develop a new immigration statute. They need action now to stop the flow of illegal aliens. One step we can take is to seek and in fact insist upon the cooperation of Haiti in restraining illegal immigration. That is the purpose of this amendment.

This amendment addresses the two factors that are causing the flow of illegal immigrants to the United States; the difficult economic conditions in Haiti and the question of human rights.

It provides that funds made available to Haiti will be used to address the conditions of poverty and underdevelopment that contribute to immigration from Haiti and to assist with programs to deal with the problem of illegal immigration.

It provides that to the maximum extent possible assistance to Haiti should be provided through private and voluntary organizations. It further stipulates that military or development assistance funds will be approved for use in Haiti only if the President makes a determination that the Government of Haiti—

First, is cooperating with the United States in halting illegal immigration from Haiti;

Second is not aiding, abetting, or otherwise supporting illegal immigration from Haiti;

Third, has provided assurances that it will cooperate fully in implementing U.S. development assistance programs in Haiti; and

Fourth, is not engaged in a consistent pattern of gross violations of internationally recognized human rights.

The Government of Haiti cannot be allowed to either encourage illegal immigration as a means of solving its internal problems or to fail to cooperate with the United States in resolving this dilemma. The administration has indicated it recognizes that the causes of illegal immigration are international in scope and will require an international solution. Negotiations are being pursued with Haiti. Making the provision of both military and development assistance conditional on full-fledged cooperation by the Government of Haiti will provide the leverage to insure that such cooperation is forthcoming.

Mr. President, this amendment represents a sensible and prudent action we can take right now to alleviate the critical problem of Haitian immigration. Whatever the ultimate U.S. policy for stemming the flow of refugees, it cannot succeed if the Government of Haiti does not enforce its own immigration laws. I believe approval of this amendment by the Congress will help to staunch the flow of illegal immigrants and I urge its adoption.

Mr. PERCY. Mr. President, I commend my distinguished colleague, Senator CHILES, for this amendment.

I can well remember earlier this year, when I was visiting my brother in his home in Palm Beach, that a ship came in with Haitians and hit the beach. They headed for parts unknown, and they were just absorbed into the population, ending up on welfare rolls or payrolls or whatever; but there was no due process of immigration whatsoever.

The problem is a very grave one, and it is a problem for my own native State of Florida and a concern of the distinguished Senator from Florida.

In my judgment, this amendment is a constructive effort to deal with this extremely difficult problem.

Basically, this amendment urges that we continue programs in Haiti to alleviate poverty and help stem the flow of illegal immigrants to the United States if the Haitian Government provides us with adequate evidence that we can work with it with some hope of success. The amendment requires that the President report to the Congress on the degree to which the character and actions of the Haitian Government are consistent with continued United States assistance. The administration has indicated it can accept this position.

I point out that our colleagues in the House have recently looked over the Haitian situation, and the GAO is also beginning a study of our programs there. I believe our committee will also take a close look at our activities in Haiti later this year. These actions, plus this amendment, should assure that our programs will do the job or be terminated.

The amendment also provides a 1-year exemption to allow some assistance to Haiti to help stem the flow of illegal immigrants to the United States. This is part of a larger question of assistance to law enforcement agencies. It is a particular problem in the Caribbean region, which is beset by problems of drug trafficking and illegal emigrant flows, which are often the responsibility of police forces in countries with small or nonexistent military structures. We may have to take a look at the adequacy of current legislation to deal with these problems. This amendment in no way prejudges the conclusion of such a review, and it is clearly limited to an exemption for a single purpose in a single fiscal year for a single country.

On behalf of the majority side, we are willing to accept this amendment; and I turn to my distinguished colleague, the ranking minority member of the Foreign Relations Committee, for his reaction and comments.

Mr. PELL. Mr. President, this amendment has been worked out with the staff on both sides of the aisle and the staff of the Senator from Florida. It seems to be an excellent amendment, and I recommend its acceptance.

Mr. CHILES. I thank the distinguished ranking minority member and the distinguished chairman, and I urge adoption of the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 555) was agreed to.

UP AMENDMENT NO. 410

Mr. DODD. Mr. President, I have an amendment that I send to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Connecticut (Mr. DODD) for himself, Mr. DURENBERGER, Mr. HELMS, and Mr. ZORINSKY proposes an unprinted amendment numbered 410.

On page 23 between lines 4 and 5 strike subsection (d) which was added as a technical amendment and insert in lieu thereof the following new subsection (d):

"(d) Of the funds authorized to be appropriated to carry out this chapter for the fiscal year 1982, $15,000,000 shall be available only for Costa Rica for the purposes of economic assistance."

The PRESIDING OFFICER. Let me interrupt the Senator from Connecticut.

The Parliamentarian has raised a point which is that the amendment is not in order at this time and it requires unanimous consent for the amendment to be considered.

Mr. DODD. Mr. President, I ask the Chair for the basis of that.

The PRESIDING OFFICER. It amends a previously agreed to amendment. The Senator will have to seek unanimous consent for the amendment to be in order.

Mr. DODD. Mr. President, I so make that unanimous-consent request.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DODD. Mr. President, I ask unanimous consent that the distinguished Senator from Minnesota (Mr. DURENBERGER) be listed as an original cosponsor of this amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DODD. Mr. President, this amendment would earmark an additional $12.5 million in economic support funds for Costa Rica.

The Foreign Relations Committee has already earmarked some $2.5 million for Costa Rica in the bill.

I would stress that this amendment is not an add on. We are not asking the Senate to fund additional moneys for Costa Rica but rather to take from the existing funds of some $2.4 billion the $12.5 million that I am adding onto the $2.5 million already in the bill to provide needed economic assistance for Costa Rica.

Most Members here, of course, are fully aware that Costa Rica among the Central American nations has been a bastion of democracy and a free market economy over the years in what would otherwise be one of the most troubled spots in the world. In a region beset by civil strife, military rule, and guerrilla warfare, Costa Rica has managed to maintain a unique democratic government since 1948.

In a region where military solutions to problems are often preferred Costa Rica has no standing army. They do not have a military. They have a national police force which numbers 1,000 which is in fact fewer than the number of police who protect this very building in the Capitol Police Force.

Costa Rica has been traditionally an ally of the United States and yet because of its economic plight Costa Rica now needs our help desperately.

Costa Rica is now experiencing its most severe economic crisis in decades.

Huge increases in the price of oil and a depressed coffee market have drained Costa Rica's foreign reserves. Its external debt has grown to $3 billion, an increase of over 50 percent in 18 months, and inflation is expected to reach 60 to 70 percent this year. National unemployment has doubled between November 1979 and July 1980.

The Government, I quickly add, has taken some serious steps on its own to get the economy under control. Its currency was devalued by 100 percent in 1981 in an effort to control imports.

In May 1981, the Government negotiated a 3-year economic stabilization program with the International Monetary Fund. While this program may have to be renegotiated it is evident that Costa Rica will accept a long period of austerity and economic discipline in order to stabilize its economy.

Mr. President, to conclude, I think it is noteworthy that Costa Rica's efforts to stabilize its economy is based on controlling public spending and strengthening the private sector. The current economic crisis has precipitated instances of violence in recent emonths. Costa Rica is not as stable as it was only a few short months ago.

A relatively modest increase in funds for Costa Rica could help bolster an allied, democratic government to help forestall the possibility of leftist exploitation of Costa Rica's current economic difficulties.

Such assistance I believe is an investment in our own future.

Mr. President, the House of Representatives, I might add, has earmarked some $25 million for Costa Rica. My amendment would total $15 million, and I stress again this is not an add-on but rather comes out of the funds that have been authorized presently in the bill.

Mr. President, I ask unanimous consent to add as cosponsors the Senator from North Carolina (Mr. HELMS) and the Senator from Nebraska (Mr. ZORINSKY).

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DODD. Mr. President, I ask for adoption of this amendment and yield back my time.

Mr. ZORINSKY. Mr. President, I enthusiastically support Senator DODD's amendment to increase economic assistance to Costa Rica. We would have to search far and wide for a case that is more deserving than Costa Rica of this special consideration.

Tiny Costa Rica has been the bulwark of democracy in Latin America ever since 1948 when the nation's leaders transformed the political, economic, and social system into one of the most successful governmental systems in the world. Costa Rica's democratic governments have been very close friends of the United States and could always be counted on to support our international positions. Now the time has come to show Costa Rica that we appreciate this support by increasing the economic assistance funding by a relatively modest amount.

Today Costa Rica is beset by economic and political problems to which that nation is unaccustomed. A depressed coffee market plus a high bill for imported oil has contributed to a very real economic crisis in Costa Rica. Costa Rica's external debt has risen to $3 billion. Inflation is at about 70 percent this year. Unemployment has doubled in less than a year.

Costa Rica is trying. That is the Costa Rican way. The government has taken drastic steps to control the economy such as the 100-percent currency devaluation. An economic stabilization program is being worked out with the IMF which will mean austere times for the good people of that country.

Aside from the important reasons that I have just discussed, I think it is especially significant to note to the American people that the earmarking of the $15 million for Costa Rica is not an add-on. No additional funding is required. It comes out of the economic support fund total.

It is important for my colleagues to vote their approval of this amendment so that Costa Rica can maintain its time-honored tradition of being a stable, democratic nation in a sea of turmoil in Central America.

Mr. DURENBERGER. Mr. President, I have a long-standing interest in Central America as my colleagues are aware, and I have traveled to Costa Rica on many occasions. During the past 3 months, I have had the opportunity to speak with Mr. Bernd Niehaus, the Costa Rican Foreign Minister, and with such other notable Costa Ricans as Francisco Sotto Harrison, former Ambassador to the Court of Saint James and a prominent attorney.

From these conversations, one point has emerged with absolute clarity. The Costa Rican economy is in trouble, largely because the world prices for Costa Rican exports have fallen dramatically. This in turn has created inflation, and the value of the colon has fallen against the dollar. The result is the added punishment of decreased foreign investment.

I am satisfied that the Costa Rican Government is taking firm measures to bring its economy under control. But it needs assistance if it is to do so. And this assistance is clearly in our own national interest. With the increased and overdue attention to Central America by all Americans, it should be self-evident that Costa Rica plays a crucial role in the stability of the region. Costa Rica is a stable democracy which is so peaceful that it is able to boast that it has no army. But, like any democracy, it cannot long withstand the erosion of confidence created by continued inflation.

I am therefore very happy that Senator DODD has introduced his amendment, and wish to commend him for addressing an urgent problem.

Mr. PELL. Mr. President, I think this amendment has a great deal of merit. As has been pointed out, it does not add a nickel to the bill. It merely identifies where some money should be spent. It earmarks funds for a particularly sensitive part of the Americans, and I hope, very much indeed, that it will be accepted by our colleagues.

Mr. PERCY. Mr. President, I commend my distinguished colleague from Connecticut for his amendment.

Costa Rica has been a staunch ally of the United States and has the oldest surviving democracy in Latin America. The House Foreign Affairs Committee has provided $25 million in ESF for Costa Rica.

This amendment would not add money to this bill. It would simply increase the existing earmark from $2.5 to $15 million.

Costa Rica's economic plight has deteriorated sharply over the past 2 years. Interest rates jumped from 18 percent to 23 percent over the past year, while re-

tail prices rose 17.8 percent and wholesale prices soared a whopping 22 percent.

Costa Rica is a traditional ally of the United States, amidst a turbulent sea of civil strife, military coups and guerrilla warfare in the region, and boasts a unique, democratic government which has been in place since 1948. It has no standing army and maintains a national police force of 1,000 men, less than the Capitol Hill Police Force here in Washington.

On behalf the majority, as manager of the bill, I accept the amendment.

I think we are ready for a vote on the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Connecticut.

The amendment (UP No. 410) was agreed to.

The PRESIDING OFFICER. The bill is open to further amendment.

UP AMENDMENT NO. 411

(Subsequently numbered amendment No. 562).

Mr. LUGAR. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The bill clerk read as follows:

The Senator from Indiana (Mr. LUGAR) proposes an unprinted amendment numbered 411:

S. 1196

On page 59, line 17, strike out "(a) Funds" and all that follows through page 62, line 18 and insert in lieu thereof the following:

"SEC. 707(a). The Congress finds that peaceful and democratic development in Central America is in the interest of the United States and of the community of American States generally, that the recent civil strife in El Salvador has caused great human sufferings and disruption to the economy of that country, and that substantial external assistance to El Salvador is necessary to help alleviate that suffering and to promote economic recovery within a peaceful and democratic process.

"(b) It is the sense of the Congress that assistance furnished to the Government of El Salvador, both economic and military, should be used to encourage—

"(1) the realization of the U.S. policy objective of achieving a peaceful and democratic resolution to the strife in El Salvador;

"(2) full observance of internationally recognized human rights in accordance with sections 116 and 502B of the Foreign Assistance Act of 1961;

"(3) full respect for all other fundamental human rights, including the right of freedom of speech and of the press, the right to organize and operate free labor unions, and the right to freedom of religion;

"(4) continued progress in implementing essential economic and political reforms, including land reform and support for the private sector;

"(5) a complete and timely investigation of the deaths of all United States citizens killed in El Salvador since October 1979;

"(6) an end to extremist violence and the establishment of a unified command and control of all government security forces in this effort;

"(7) free, fair an open elections at the earliest date, the modalities of which should be negotiated between all groups which renounce and refrain from further military or paramilitary opposition activity in pursuit of an equitable political resolution of the conflict;

"(8) increased professional capability of the Salvadoran Armed Forces in order to establish a peaceful and secure environment in which economic development and reform and the democratic process can be fully implemented, thereby permitting a phased withdrawal of United States military training and advisory personnel at the earliest possible date.

"(c) Within six months after the date of enactment of this section, the President shall report to the Congress concerning the status of his efforts in implementing the U.S. policy objective of a peaceful and democratic resolution to the strife in El Salvador and shall identify any remaining obstacles to achieving that objective."

Mr. LUGAR. Mr. President, I ask for the yeas and nays on my amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. LUGAR. Mr. President, the amendment which I have just offered is a sense of the Senate resolution dealing with the questions about aid to El Salvador which arose during markup of that portion of the Foreign Assistance Act dealing with El Salvador.

I rise to offer this amendment to section 707 of the bill and in place of the language in the bill I propose to substitute language which expresses the goals of American assistance to El Salvador.

I do this deliberately because during the excellent conversation which the Committee on Foreign Relations enjoyed with President Napoleon Duarte yesterday the point made by President Duarte again and again was that he very much supports the goals, and he emphasized that word "goals," which goals are expressed in the original committee language and in the language which I have presented in the form of an amendment today.

The point I shall make repeatedly is that there is a profound difference between goals and conditions. President Duarte made the point that for a great power such as the United States to impose conditions on a sovereignty such as El Salvador is not an acceptable situation. He would have felt on the face of it that it was unacceptable, given the relationship we have, and he went over the language that has just been made a part of this amendment word by word, agreeing explicitly with the goals that are represented, as do I and, as I suspect, do all of our colleagues.

But, Mr. President, the gist of the language that came forth from the Committee on Foreign Relations and became a part of the bill we are considering today imposes very stringent conditions, and those conditions, after original certification and then once every 6 months, could bring an end to all of our aid to El Salvador.

I offer this amendment for several reasons: In recent months many Americans have become deeply aware of the violence which has torn apart El Salvador. Americans have seen and heard of the murders, abductions, disappearances, and other acts of senseless violence which occur in El Salvador each day. El Salvador experiences tragedy and violence which is almost beyond comprehension.

We all deplore this. No one defends it. The question is, however: What are we to do about it? Our revulsion toward brutality is by itself no policy at all. Our deep feelings of compassion for the people of El Salvador cannot and will not substitute for hard thinking about our responsibilities.

Some in our country would just as soon wash their hands of the entire matter. They would say, "Withdraw all military assistance to El Salvador and let the people of El Salvador solve things themselves." But if we withdraw our support for the one force which is committed to free elections, the people of El Salvador will not solve things themselves. A small group of guerrillas, supported by outside assistance, will seize power and establish a repressive dictatorship. It is very fine to speak of self-determination; the fact is that there will be no self-determination in El Salvador without continuing and unwavering American assistance to the democratic forces in that country.

Let us consider the alternatives before us today. The language in the bill places restrictions and certifications upon the President's conduct of policy toward El Salvador. Indeed, the language of the bill contains the most restrictive language to be imposed on the Presidential conduct of foreign affairs in years.

And I stress that point, Mr. President, because this is not a set of mild-mannered conditions. This is the most restrictive net placed upon any relationship that our State Department, in the hands of either party, has seen in years.

First, it requires a Presidential certification that five separate conditions are being met prior to each and every provision of military assistance, provision of military trainers, and provision of credits or loans. What the bill requires is a lengthy Presidential certification every time one single bullet is provided to El Salvador; every time a military trainer is rotated to El Salvador, and every time one penny of credit or loan is offered. Whatever one may think of affairs in El Salvador, this is surely not the way to make good law.

Second, it requires a similar—and redundant—certification by the President every 6 months.

Third, before any of these certifications can proceed, the bill requires a prior certification regarding the investigation into the murders of the six American citizens in El Salvador.

Fourth, the bill requires an immediate cutoff of assistance if at any time a Presidential certification is not able to be made.

Mr. President, this is not good law; this is not good constitutional precedent for the relations between the legislative and executive branches of Government; and it is not good foreign policy.

In place of this I am offering a different, more positive approach. I do not propose a simple repeal of the language in the bill. Rather, I believe that the language of the bill represents a very real attempt to give expression to the concern which all of us share about the violence in El Salvador. My amendment gives expression to the deep concern of Members

of this body about the importance of human rights in El Salvador and about the necessity of American policy to support free and democratic government in that country.

But it does so in a realistic and constructive way. It does not impose conditions only upon the Government of El Salvador. It will not send to the guerrilla groups and their supporters the message that the Congress can be counted upon sooner or later to undermine the administration's support for the Government of El Salvador. We cannot and we should not give partial control of our decisions to guerrilla groups which can and will frustrate our best intentions.

What we are being asked to do in the language of the bill is to cast continuing doubt upon our support for the genuinely democratic forces in El Salvador. And who does this help?

Does it help the political parties which are now struggling to organize themselves in the face of systematic terrorism?

Does it help the Government of El Salvador which is committed to elections next March?

Does it help President Duarte?

President Duarte met with the Foreign Relations Committee yesterday afternoon, as I have said. He said that conditions imposed upon our aid would not help him or his government. He said that he supports the goals—and he stressed the word "goals"—of free, democratic government, an end to random violence, and the participation of all people who renounce violence as a means of taking governmental power.

The fact is that conditions imposed upon American assistance will help only those who hope to see the end to American support for El Salvador. For these reasons, the administration opposes the language now contained in the bill. Secretary Haig has written to the committee about this provision. In a letter dated May 11, Secretary Haig said:

> Our opposition is not to the bill's objectives. Indeed, the specific conditions cited in the amendment parallel many of the elements of our policy or the objectives of the Government of El Salvador itself.

And in another quote, he said:

> Our concern, however, is that the bill is not likely to lead to those objectives that we share. Its effect could well be the opposite for the following reasons:
>
> El Salvador's rightist terrorists or the Marxist guerrillas and their foreign communist supporters will conclude the legislation that they can force an end to U.S. assistance to the established government by stepping up their violence to the point where it blocks further progress on the reforms or undermines the election process.
>
> The measure could work to delay the peaceful solution that we all seek by encouraging extremists of the left and right to persist in their internal attacks and their external propaganda in the belief that their persistence would ultimately be rewarded with a Congressional curtailment of U.S. support for the Salvadoran Government.

That is why our Ambassador to El Salvador, the U.S. Ambassador to El Salvador, Deane Hinton, also opposes the original language of the bill.

I urge my colleagues to support the provision which I have introduced which preserves the worthy objectives of the language of the bill, but removes the harmful effects. The substitute language which I have presented is, I believe, a constructive step forward.

Now, Mr. President, it will be argued that it is perfectly proper for the Congress of the United States to impose whatever conditions it wishes to upon executive activity. It will be argued in a constitutional sense that, indeed, the President does have certain authority under the Constitution to move foreign affairs in behalf of this country, but that a checks and balance system persists and that clearly the checks aspect is at work in the Foreign Relations Committee work.

Mr. President, as I pointed out, this is an extreme form of checks and balances. It comes, I suspect, from the very real concerns that many Americans feel that the United States might become bogged down in El Salvador in a seemingly interminable and seemingly unwinnable situation. I respect those sentiments. There is a legitimate debate in this country as to whether the United States should be invloved in El Salvador at all. Clearly, it is not the scope of our debate today to recite the doleful history of that small country.

But the fact is that El Salvador has been a battlefield, it has been an area of unhappiness, an area of dire poverty, and an area in which millions of citizens now and in the past have cried out for liberty and for better conditions of life. It is ripe for change. And indeed, the drama of the visitor yesterday, President Duarte, is very pointed if one considers that President Duarte was a candidate for national office in El Salvador in 1972 and apparently had won the election only to see it set aside by military rulers in that country at the time. President Duarte was imprisoned, was tortured, and went in exile for 7 years. Now this man, Napoleon Duarte, with whom we visited in our midst yesterday, is not a repressive ruler and someone attempting to hold down reforms. Quite to the contrary, President Napoleon Duarte has attempted to institute, under very tough conditions, land reform, banking changes, changes with regard to foreign trade, and a very, very wide-sweeping program trying to open up ownership and opportunity to his fellow citizens.

It has been a remarkable program.

The problem of our intervention in this situation comes because most Americans say, "Why not support El Salvador in an economic way? Why not try to bring about reform through our money, through our expertise, through humanitarian missionaries of all sorts in this country?"

I think there is no argument. Why not? We should. We have.

But, Mr. President, I would simply point out that our citizens who attempt to help in a humanitarian way are not safe in doing so if, in fact, anarchy and chaos prevail in El Salvador.

It is all too clear that, in a sense, both the left and the right of the political spectrum on this issue come together, and on the left persons throughout the world would argue, "Let the guerrillas have a go at it." They would argue that history is on the side of the leftist, revolutionary, guerrilla groups, who inevitably wear down the patience if not the strength of whatever the prevailing power might be, and eventually come into their own. There is that point of view in this country on occasion, or widespread throughout the world.

There is the point of view on the right that the United States ought to stay out of it altogether, too, because, some would argue, the ruling group that was there might still be there if we were not involved, if the United States of America was not trying to help a centerist regime, if we were not there attempting to encourage elections, providing money for land reform, doing a number of things that are a radical change from the regime that has been deposed.

Indeed, extremists of the right and the left could very well say to the United States, "Get out and stay out, because we believe either we will have to repress the dictatorship of the right or the left and we are not interested, when it comes down to it, in the niceties of democratic elections, in trying to get a middle-class market enterprise situation going, trying to spread genuine ownership and equity in land."

Mr. President, I see very little in the program of either the Marxist guerrillas or the far right, many of whom are now exiled in Miami, Fla., from El Salvador that points to very much promise of economic reform, of the ordinary person in El Salvador progressing to much exercise of political liberty.

Here comes the United States in this situation. We are saying in the finest of humanitarian traditions, "We believe that El Salvador is a close neighbor. We believe that we ought to help. We resent interference from outside this hemisphere, whether it be encouragement by the Soviet Union, encouragement by Cuba, encouragement by anyone, for that matter, who might, with the network operatives of the Soviet Union and the Cuban surrogates, attempt to foment difficulty. At the same time, we resent attempts by deposed El Salvadoran leaders, operating wherever they are, to try to take back control from the Duarte government, to try to seize back the initiative before elections can be held."

This is why the debate we are having in a sense is unfortunate, Mr. President, because our Secretary of State in very explicit terms in his letter of May 11, 1981, which I have quoted to the Senate today, said that the language adopted by the Foreign Relations Committee in its markup, is an open invitation to obstruction. The difficulty with the language in the bill is simply that a group of either the left or the right can create enough unhappy conditions because of the certification which is demanded at the outset and every 6 months, and on every occasion of a single piece of military equipment or a troop or any sort of economic

aid. Every time a certification occurs it is an open invitation simply for the United States to be unable, under the law, to provide assistance to El Salvador.

This number of certifications, this degree of overbureaucracy, this number of subjective judgment calls, in my judgment, is unprecedented and unwarranted.

The purpose of the original language was, in fact, simply to make certain we get out of El Salvador, those who want to see the United States withdraw now and for good. That purpose is accomplished with great strength. It would not take great skill, Mr. President, for someone who did not share the idealism of any of the members of the Foreign Relations Committee, the President of the United States, or the Secretary of State to use the language of this original bill and make very well sure we were out of El Salvador within a 6-month period of time. I think Senators need to see that point.

I have great respect for my colleague from the State of Connecticut, Senator DODD, who has worked diligently within the committee and subsequently to think through the implications of this language. I know that he will want to respond with his own thoughts, which are important ones, based upon personal experience, personal visitations with many of the parties involved.

I would submit that at least one of the arguments that I have heard the distinguished Senator from Connecticut propose is that the language in this bill provides to President Duarte a club to use against the military or against other forces within his country that do not favor his sense of reform; in essence, that we, in our legislation, are propping up President Duarte, or we are giving him an argument so that he can go to El Salvadoran officials and say, "Here, I have the Senate bill, and if we do not comply with these things the aid is gone and, therefore, we have to comply." It is an interesting argument and I think one worthy of attention.

But, Mr. President, the facts of life are that others, quite apart from President Duarte, or people with whom he is visiting in El Salvador, or members of the Foreign Relations Committee who had a debate on this at one point may all be in one camp in interpreting this law, but others, as I read it, who have not followed this thing that closely, or with not so much concern for the evolution of affairs in El Salvador, will simply pick up the language in this committee bill and point out that as best they can see affairs are not proceeding along the lines of the goals of President Duarte or ourselves and, for that reason, the United States ought to cut off aid and do so immediately.

That I think would be unfortunate.

Mr. President, attempts have been made to try to find a combination in this area and they have been unsuccessful. I will say that candidly. That is the reason that I offer this as a sense of the Senate resolution, that type of language as opposed to a set of conditions. It is a deliberate attempt to break this thing open, and to give our foreign policy a chance to rise in the process. I think it is an important option for our Secretary of State to have in this embattled condition that he finds himself in this particular issue.

Furthermore, it seems to me it is an affirmative step we might take to indicate our support of Napoleon Duarte, our good friend who has been with us, and in whom we share a great deal of confidence because he is the best thing we find, those who have compassion for the people of El Salvador.

Mr. President, let me add one further point. It will be suggested that when this language came before the Foreign Relations Committee, the vote on the amendment presented by the distinguished Senator from Connecticut, Senator DODD, was passed by a vote of either 12 or 13 to 1. The number escapes me, but the one vote against the motion at that time was, in fact, myself. Why would I do such a thing like that? Well, of course, I was holding the letter of the Secretary of State in hand. The Secretary of State wrote to us before the vote.

I think we really have to give some attention on occasion to our Secretary of State, who has appealed to us on this issue before.

Let me also point out in fairness, Mr. President, that I was not present at the time my vote was cast. It was a proxy vote. I and a great number of other members, unfortunately, of the Foreign Relations Committee were engaged on that very day in another one of the farm bill markups.

Senators will recall mention throughout last week of the 24 days, or some such, of markup. That occupied us right through the debate on El Salvador. So we really were not up to speed, I think, as a committee. The chairman did his best to get members there and was diligent throughout this in trying to excite our attention, but the distinguished Senator from North Carolina, the chairman of the Committee on Agriculture, was involved with the farm bill, understandably. So were Senator BOSCHWITZ, as I recall, and Senator ZORINSKY was over there a good bit in those days. I was there. A number of us were preoccupied with that. Once we began to rivet our attention on this question, we felt it was important to bring the situation to the attention of the Senate as a whole.

Mr. President, I see the distinguished chairman of the very committee I have just mentioned that was involved in all of these markups at the time the discussion on El Salvador was going on. I am pleased to yield to the Senator from North Carolina for a comment if he has one.

Mr. HELMS. Mr. President, I ask unanimous consent that the Senator may yield without losing his right to the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HELMS. Mr. President, I have listened with great interest to the able Senator from Indiana. He is exactly right. Members of the Committee on Foreign Relations know that we met informally with President Duarte. He is an exceedingly impressive man and, I think, an absolutely genuine person. He has problems in that country which we cannot even imagine in our own land. To load him down with all sorts of restrictions and limitations and requirements is simply going to play into the hands of those who have no friendship for the United States. The least that we can do is give President Duarte a fair shot at getting his country straightened out. That is why the amendment of the distinguished Senator from Indiana is so essential at this time.

Mr. President, we talked yesterday about his crops. There has been an increase in cane production if he can keep the terrorists from burning it up. There has been an increase in cotton if he can keep the terrorists from destroying it. To hamstring this man, who has come to this country, making clear his friendship, is the wrong course of action. I simply do not think that we ought to tie his hands behind his back to any degree whatsoever.

Mr. President, we are not talking about central Asia; we are not talking about central Africa; we are talking about Central America, our own front yard. We are talking about this hemisphere. Anybody who even takes a casual glance at the news is bound to understand that the Soviet Union, through its surrogates, is doing everything possible to destroy freedom in this hemisphere and we had better help our friends now, because we may not have any friends left to help.

Mr. President, I commend the distinguished Senator from Indiana for his amendment and I certainly hope the Senate will support it.

Mr. LUGAR. Mr. President, I thank the Senator from North Carolina for his support and the cogency of his argument. Very clearly, Mr. President, the foreign policy of the United States has many objectives, but one of the most important must be friendship, prosperity, and movement within our own hemisphere.

The exciting reason we are involved in El Salvador is that we and others in the Western Hemisphere believe that conditions of land reform, the growth of new businesses, the political participation of citizens party to free elections are very important objectives. We likewise see the dire circumstances by which all of these are likely to be precluded in El Salvador without our vigorous participation.

Mr. President, the purpose of my amendment is simply to make certain that the world knows that we shall be constant, that Congress is not about to pull the rug out from under our President and the Secretary of State under the pretext of 6-months certifications, of endless hassles, of bureaucratic snafus; that, in fact, having said that we are going to help, for the goals that we have stated and for those reasons, we shall be constant in that fight.

Mr. President, I yield the floor.

Mr. CRANSTON. I am an original cosponsor of S. 869, the El Salvador Assistance Act, which was reported out of the Foreign Relations Committee. I believe

it is important for Congress to establish some specific limits on the use of U.S. military aid and personnel in the war in El Salvador.

The situation in El Salvador has not improved. There continue to be reports of killings and terrorist activities in that country. We must make certain that U.S. taxpayer dollars and personnel to El Salvador are being used in ways that promote goals which we can fully support.

Conditional U.S. military and economic assistance to El Salvadoran authorities insures that the government we are supporting is prepared to make certain political, social, and economic changes. These reforms are essential to drying up the limited popular support for leftist opponents of the current government.

The American people will not support military aid to El Salvador unless it is clear that our involvement is helping to resolve the current civil war and establish enduring peace for the El Salvadoran people. We must be responsive to U.S. taxpayers as well as to the people of El Salvador. That is why I urge support of the bipartisan compromise language adopted by the Senate Foreign Relations Committee under the sponsorship of Senator DODD.

The minority has been once more accommodating on the floor on this matter to take into account the views of the chairman of the committee and others on the majority side. I think Senators on the majority side will respond in a reciprocal way.

UP AMENDMENT NO. 412

(Subsequently numbered amendment No. 563)

Mr. HELMS. Mr. President, I send an amendment to the desk and ask that it be stated.

The PRESIDING OFFICER (Mr. JEPSEN). The clerk will state the amendment.

The legislative clerk read as follows:

The Senator from North Carolina (Mr. HELMS) proposes an unprinted amendment numbered 412 to amendment numbered 411.

Mr. HELMS. I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

In lieu of the language proposed by Mr. LUGAR, substitute the following:

"SEC. 707. (a) The Congress finds that peaceful and democratic development in Central America is in the interest of the United States and of the community of American States generally, that the recent civil strife in El Salvador has caused great human sufferings and disruption to the economy of that country, and that substantial external assistance to El Salvador is necessary to help alleviate that suffering and to promote economic recovery within a peaceful and democratic process.

"(b) It is the sense of the Congress that assistance furnished to the Government of El Salvador, both economic and military, should be used to encourage—

"(1) the realization of the U.S. policy objective of achieving a peaceful and democratic resolution to the strife in El Salvador;

"(2) full observance of internationally recognized human rights in accordance with sections 116 and 502B of the Foreign Assistance Act of 1961;

"(3) full respect for all other fundamental human rights, including the right of freedom of speech and of the press, the right to organize and operate free labor unions, and the right to freedom of religion;

"(4) continued progress in implementing essential economic and political reforms, and support for the private sector;

"(5) a complete and timely investigation of the deaths of all United States citizens killed in El Salvador since October 1979;

"(6) an end to extremist violence and the establishment of a unified command and control of all government security forces in this effort;

"(7) free, fair and open elections at the earliest date, the modalities of which should be negotiated between all groups which renounce and refrain from further military or paramilitary opposition activity in pursuit of an equitable political resolution of the conflict;

"(8) increased professional capability of the Salvadorean Armed Forces in order to establish a peaceful and secure environment in which economic development and reform and the democratic process can be fully implemented, thereby permitting a phased withdrawal of United States military training and advisory personnel at the earliest possible date.

"(c) Within six months after the date of enactment of this section, the President shall report to the Congress concerning the status of his efforts in implementing the U.S. policy objective of a peaceful and democratic resolution to the strife in El Salvador and shall identify any remaining obstacles to achieving that objective."

Mr. HELMS. Mr. President, this amendment modifies the Lugar amendment in only one sense. That is to strike the reference to land reform, because that is covered elsewhere in the bill.

I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. PERCY. Will the distinguished Senator yield?

Mr. HELMS. I am happy to yield, Mr. President.

Mr. PERCY. Mr. President, Senator WEICKER is on his way from New York and will be here at 4 p.m. May I ask if it is the feeling of the distinguished Senator from North Carolina that we may withhold voting on this amendment until the Senator from Connecticut may be here?

Mr. HELMS. Mr. President, I certainly want to accommodate Senator WEICKER and any other Senator.

Mr. PERCY. I thank the Chair.

UP AMENDMENT NO. 413

Mr. PELL. Mr. President, I send to the desk a perfecting amendment to the bill that makes two changes to the basic provisions of the bill. It provides that the certifications will occur just three times a year, not four times a year plus other times, as in the bill today. Also, it modifies some of the language of the original bill in paragraphs 1 and 4. It somewhat weakens them, maybe, but makes them more acceptable, I hope, to the majority of my colleagues.

The PRESIDING OFFICER. The Chair advises the distinguished Senator that the amendment he sent to the desk was a substitute amendment and therefore is not in order. A perfecting amendment would be in order but not a substitute.

Mr. PELL. Could the Chair repeat what he said? I could not hear.

The PRESIDING OFFICER. Yes; the Chair advises the Senator that the amendment he sent to the desk is a substitute amendment and therefore is not in order. A perfecting amendment would be, but not a substitute amendment.

Mr. PELL. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. PELL. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

Mr. HELMS. Mr. President, for the moment, I object.

The PRESIDING OFFICER. Objection is heard.

The clerk will continue the call of the roll.

The legislative clerk continued the call of the roll.

Mr. HELMS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. PELL. I thank my colleague from North Carolina.

Mr. President, I send to the desk a perfecting amendment that would remove all the language in the Lugar amendment on pages 2 and 3 and would substitute for it the language I am sending to the desk.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Rhode Island (Mr. PELL) proposes an unprinted amendment numbered 413.

Mr. PELL. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 2, line 1, strike out through the end of the amendment and insert in lieu thereof the following:

"SEC. 701. (a) In fiscal years 1982 and 1983 funds may be obligated for assistance for El Salvador under chapter 2 or 5 of part II of the Foreign Assistance Act of 1961, letters of offer may be issued and credits and guaranties may be extended for El Salvador under the Arms Export Control Act, and members of the Armed Forces may be assigned or detailed to El Salvador to carry out functions under the Foreign Assistance Act of 1961 or the Arms Export Control Act, only if every 120 days after enactment of this act, the President makes a certification in accordance with subsection (c).

"(b) If the President does not make such a certification, then the President shall immediately—

"(1) suspend all expenditures of funds and other deliveries of assistance for El Salvador which were obligated under chapters 2 and 5 of part II of the Foreign Assistance Act of 1961 after the date of enactment of this Act;

"(2) withhold all approvals for use of credits and guarantees for El Salvador which were extended under the Arms Export Control Act after the date of enactment of this Act;

"(3) suspend all deliveries of defense

articles, defense services, and design and construction services to El Salvador which were sold under the Arms Export Control Act after the date of enactment of this Act; and

"(4) order the prompt withdrawal from El Salvador of all members of the Armed Forces performing defense services, conducting international military education and training activities, or performing management functions under section 515 of the Foreign Assistance Act of 1961.

Any suspension of assistance pursuant to paragraphs (1) through (4) of this subsection shall remain in effect during fiscal year 1982 until such time as the President makes a certification in accordance with subsection (c).

The certification required by subsections (a) and (b) is a certification by the President to the Speaker of the House of Representatives and to the chairman of the Committee on Foreign Relations of the Senate of a determination that the Government of El Salvador, to the extent not precluded by forces outside its control—

(1) is making a concerted and significant effort to control gross violations of internationally recognized human rights;

(2) is moving to achieve control over all elements of its own armed forces, so as to bring to an end the indiscriminate torture and murder of Salvadoran citizens by these forces;

(3) is making continued progress in implementing essential economic and political reforms, including the land reform program;

(4) is committed to the holding of free elections at an early date and to that end has demonstrated its willingness to negotiate an equitable political resolution of the conflict with any group which renounces and refrains from further military or paramilitary opposition activity.

Each such certification shall discuss fully and completely the justification for making each of the determinations required by paragraphs (1) through (4).

(d) On making the first certification under subsection (a) of this section, the President shall also certify to the Speaker of the House of Representatives and the chairman of the Committee on Foreign Relations of the Senate that he has determined that the Government of El Salvador has made good faith efforts both to investigate the murders of the six United States citizens in El Salvador in December 1980 and January 1981 and to bring to justice those responsible for those murders.

Mr. PELL. Mr. President, this amendment provides that the certification will occur each 120 days, or three times a year. This seems a good compromise between the almost infinite number proposed in the original bill and the single certification that the administration desired.

It also softens some of the langugage on page 2 of the bill, discussing the questions of a concerted and significant effort to control gross violations of internationally recognized human rights and the language in paragraph 2 which says that the Government of El Salvador is moving to achieve control over all elements of its owned armed forces, so as to bring to an end indiscriminate torture and murder of Salvadoran citizens by these forces.

This amendment seems a reasonable compromise between both views, and I hope it will secure the acceptance of this body.

Mr. DODD. Mr. President, will the Senator yield?

Mr. PELL. I yield to the Senator from Connecticut.

Mr. DODD. Mr. President, I support the language offered by the distinguished Senator from Rhode Island (Mr. PELL). As the author of the original language in the bill, I believe this language is reasonable.

I had preferred the language contained in the committee bill. However, I recognize that, with respect to those who are somewhat uneasy about the certification process, requiring it once every 120 days is not an unreasonable request. Therefore, I will support this language as a modification of the language presently in the committee bill.

Mr. President, I take this opportunity to try to put this entire issue in perspective.

This is the first opportunity in this Congress that we have had an opportunity to debate the issues of El Salvador, despite the fact that the events in that war-torn nation have dominated the headlines and news reports for the last 6 or 7 months.

So I welcome the opportunity to raise the issues that surround the events in El Salvador and our commitment to the government of Napoleon Duarte and a chance to discuss the importance of a certification process in placing some sort of conditions or, if you will, to use the language of President Duarte yesterday, some mutually agreed-upon goals in El Salvador.

Mr. President, daily, as I mentioned, the grim reality of El Salvador is there for all of us to see. It is there on the front page of our morning newspaper. And it is there again on the evening television news. More and more it is a media event, and slowly but surely it has become a part of the national consciousness. Not surprisingly, I suppose, the grotesque nature of this human tragedy has taken on something of a surrealistic quality, despite the fact that the story behind it is all too familiar, all too common. Indeed, it is a story which for all practical purposes dates back to the dawn of time.

But as ancient as the story may be, each generation needs, or so it seems, some reminder of the horrors of war; some reminder of the revulsion that comes from civil strife, human suffering and more bloodshed; some reminder of the utter brutality of armed conflict. El Salvador has it all. And unfortunately, it helps to provide such a reminder for this generation and for our time. For in that tragic and unhappy land, those who would be king have, as Shakespeare wrote, "Let slip the dogs of war."

The burden of political power, the abuse and corruption of it and the consequences that flow from such abuse and corruption are as much a part of the recent political history of El Salvador as they are a part of so many Shakespearian tragedies. The tragedy of King Richard the Second—in setting the stage for Civil War in England, a less than popular King Richard, still determined to hold on to the political reigns of the kingdom, lashes out—in wanton disregard of the consequences of his action—"cry woe, destruction, ruin and decay: the worst is death and death will have his day." The drama, the calamity of civil conflict. Shakespeare said it well.

Today, the drama has become the reality—the deadly drama, the deadly reality—of El Salvador. This is a nation at war with itself. A nation engulfed in the flames of civil violence. The origin of the violence can easily be traced to the abuse of political power, to the repeated disregard for that abuse and to the eventual corruption of it. The price of that corruption, and the price of the evil which it has spawned, mounts with each passing day. No segment of Salvadoran society has escaped or been spared the agony and the grief that now wracks that war-torn nation—a nation which otherwise would largely go unnoticed; a nation of coffee trees, cotton and rice; but a nation caught between the feudal structure of the old order and the political imperatives of the new. And the clash between old and new has taken a heavy toll.

Thousands of ordinary people lay silent: nuns and priests, labor leaders—the rank and file, businessmen and professionals, educators and students, politicians and government officials, landlords and compesinos, the haves and the have-nots. All elements of society in El Salvador, from the very top of the social ladder to the very bottom, have been victimized by the mindless and seemingly perpetual violence that now grips the Salvadoran psyche like some curse or plague from the distant past.

The death toll for this past year alone is estimated at somewhere between 10,000 to 15,000 people.

The fact that we were not even able to say whether it is 10,000 or 15,000 people should speak more loudly than any other words than I could utter and at this juncture most observers, regardless of their political persuasion, agree there is no end in sight for the violence in El Salvador. Yes, at this point, as the foreign policy wags are accustomed to saying, "if there is a light at the end of the Salvadoran tunnel, it is only the glow from the headlamp of the oncoming train."

How did it all happen? What's the political prognosis? Where do we go from here? The questions seem relatively simple. The answers, at least by comparison, are more complex and complicated. But regardless of how complex and complicated they are, they are urgently needed and with this purpose in mind, I want to bring to the attention of my colleagues three recent articles which serve to analyze the Salvadoran political situation and our Government's role in it.

The first article is from the summer, 1981 issue of International Security. It is entitled, "A Splendid Little War: Drawing the Line in El Salvador" by Prof. William Leogrande. Professor Leogrande serves as director of political science in the School of Government and Public Administration at the American University, here in Washington, D.C. The second article, "Death as a Way of

Life" comes from Mr. Christopher Dickey, a reporter and writer for a local newspaper, the Washington Post here in this city, who has lived and been in charge of the Mexico City bureau for some years. The third and final article is the work of Mr. Loren Jenkins, who also serves as a foreign correspondent for the Washington Post and whose article "El Salvador: From Conquistadores to Communists, Why the Killing Will Never End," can be found in the August 16, 1981 issue of the Sunday Washington Post magazine.

Each of these articles, I believe, makes a substantial contribution to better understanding the Salvadoran civil war. And each, in its own way, raises serious questions about the nature of the Salvadoran Government, particularly the military and security forces component of it, and about the nature of our commitment to it. These are the key questions. These are the key issues. And I strongly urge my colleagues and the public at large to give very careful consideration to the views and comments contained in these articles, which I ask unanimous consent to have printed in the RECORD at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. DODD. Mr. President, like many other observers, including the ones noted above, I do not know whether the government of President Napoleon Duarte can survive or not.

As I said to him yesterday at a closed-door briefing in the presence of my colleagues on the Foreign Relations Committee, I do not take a back seat to anyone in my continued support and admiration for Jose Napoleon Durate.

The record that he has established as a politician in that country has gone unchallenged, and he is someone who has been a victim of torture, been incarcerated and understands political exile, having had to live in Venezuela for some 7 years. He is certainly a man to be admired and his efforts to bring about reform in that country should be supported by all of us who believe in economic justice and certainly the democratic process.

The backing of the U.S. Government to this particular government and to this particular individual is absolutely necessary if the centrist reform-minded Duarte is to survive at all. But our support will not be decisive, or the critical factor in whether or not the Duarte government succeeds or not any more than Cuban or Soviet support will be the decisive or the critical factor for the insurgence in that country, and I suspect that President Duarte would agree with that conclusion himself.

What will be decisive, in my opinion and in the opinion of many others, including President Duarte, is the extent to which his government is able effectively and expeditiously to implement the kind of social, political, and economic reforms which El Salvador so desperately needs. If the Duarte government can make significant progress in the reform effort and if it can do so while reducing the level of violence and repression, then it has some chance of success.

If it succeeds, then we all also will succeed and so will be the democratic forces throughout the hemisphere.

Similarly, if it fails, then it is our failure too and a real setback for the forces of political moderation elsewhere in the region will be felt.

The stakes are high and the chances for success are, I believe, even money at best. The fact is the Duarte government's record to date is less than encouraging despite their good intentions. And in all honesty, the outlook is not promising. This suggests, in my opinion, that it is all the more incumbent upon the United States to do everything it can to help strengthen President Duarte's hand within his own government. Plain and simple, he needs all the help he can get. He needs it because of the disunity, the marked divisions within his government, the divisions between the civilians and the military, the divisions between the reformist and the antireformist elements even within his own government.

These divisions must be overcome and they must be overcome decisively. There can be no "ifs," "ands," or "buts." They must be overcome—period. They must be overcome so that the reform program can go forward, so that it can deliver on the promises it has made, so that it can undermine the appeal of the armed insurgents and finally, so that it can instill a measure of hope in those who believe they have less and less to lose, namely, the great bulk of the people of El Salvador.

This is a very tall order. Whether Duarte and company can fill it remains to be seen. I certainly have my doubts, as I expressed earlier, but I do believe and I am certain that the United States can help. It can help strengthen President Duarte's hand. We can help move the reform program along. We can help overcome the divisions and the disunity within the Salvadoran Government. We can do all of this, we can provide this help if we have the wisdom and the courage to insist on certain fundamental conditions before sending additional military equipment and advisers to the government in San Salvador.

If we do this, if we insist, then, we will provide President Duarte with the kind of political tool, the kind of political weapon that he can use effectively against the more recalcitrant, if not more repressive elements within his own governmental circle. If we do not give him this kind of weapon, if we deny him, then, we will have turned our back on the reform effort and left it and Napoleon Duarte and a lot of other decent people "to twist slowly in the wind."

Make no mistake about it. If we continue to provide military aid, sales, and advisers to El Salvador on unconditional terms, we will, for all intents and purposes, have sealed the fate of President Duarte and of the moderate elements in his government. That is all there is to it.

Mr. President, because of the strong convictions I hold on this issue, convictions based on several years of first-hand experience in the Latin America region, I introduced earlier this year S. 869, the El Salvador Assistsance Act of 1981.

Very briefly, this measure would require President Reagan to certify that five conditions have been met before additional U.S. equipment and advisers could be sent to El Salvador.

I said at the outset that I support the modifications being offered by the Senator from Rhode Island which would require that certification be given once every 120 days rather than as could be interpreted by the original language at the time, before every single soldier or every jeep or piece of military equipment that were to go to that country, and I will accept that modification. But the principle of certification is absolutely necessary.

These conditions include certification that the Salvadoran government is not engaged in a consistent pattern of gross violations of internationally recognized human rights; that it has achieved substantial control over its own security forces; that it is making continued progress in implementing essential economic and political reforms, including land reform; that it is committed to holding free elections at an early date; and that it has demonstrated its willingness to negotiate an equitable political solution to the conflict.

In addition, the measure would require the President to certify that the "government of El Salvador has made good faith efforts both to investigate the murders of the six U.S. citizens in El Salvador in December 1980, and January 1981, and to bring to justice those responsible for those murders."

This proposal, in a slightly revised form, has been adopted by vote of 12 to 1 by the Committee on Foreign Relations and it is now part of the proposed International Security and Development Assistance Act of 1981, S. 1196, with the new proposal by the Senator from Rhode Island's modification.

The committee's report accompanying the bill spells out clearly the reason for its virtually unanimous decision:

> This section represents the committee's bipartisan view concerning El Salvador. The committee believes that the amendment would strengthen President Duarte's ability to undertake the basic reforms necessary to bring peace to his nation.

I ask unanimous consent that the text of the El Salvador provision as approved by the committee, together with the full explanation of it from the committee's report, be inserted at the appropriate point in the RECORD following the conclusion of these remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 2.)

Mr. DODD. I also want to point out that the House Foreign Affairs Committee by vote of 26 to 7 has adopted a similar measure. This vote, as well as the vote in the Foreign Relations Committee, is a pretty solid expression, I think, of how Congress and the public view the issue of future military aid to the Government of El Salvador and of how determined

they are not to provide it with yet another blank check.

Finally, Mr. President, I fully subscribe to the general rule that one should always be leary or skeptical of simple explanations and descriptions in assessing or making a judgment about the political affairs of other nations. As we know from bitter experience, such explanations, such descriptions fall, all too often, way short of the mark. Vietnam and Iran come readily to mind. But, by the same token, I also recognize that we cannot be a prisoner to the past.

Accordingly, and at some risk to violating the rule laid down above, I want to conclude with an observation made many years ago by a poet, W. H. Auden. It is a brief observation, but one which I believe can add immeasureably to our understanding of and appreciation for the political nightmare in El Salvador. In 1939, Auden wrote:

> I and the public know
> What all schoolchildren learn
> Those to whom evil is done
> Do evil in return.

In a nutshell, these few lines from the poet's pen come as close as possible, I believe, to explaining the cycle of violence and counterviolence that is currently sweeping El Salvador. That cycle must be broken. And the United States can make a contribution to it by terminating unconditional military assistance to the Salvadoran Armed Forces.

Mr. President, I fully respect the intentions of my distinguished colleague from Indiana and the purpose behind his proposal to have a sense of the Congress. Many of the provisions which he has included in his resolution are, in fact, views which I hold, which we share together, which are, in effect, included in my own original amendment to the committee bill.

But I would like to stress our fundamental difference is not to the common goal stated in his resolution nor the goals stated in my amendment for, in fact, yesterday President Duarte went over the very provisions that were included in the committee bill, he laboriously went over them one by one, and explained to the committee how he fully endorsed the goals as stated in every single one of the provisions included in that bill, and was candid enough to say he would not take a position on the certification issue, for that is indeed a domestic consideration in this country, but that he embraces and that he endorses the goals included in that bill, which is something that I think is worth noting.

So the issue is not over whether or not we ought to have the protection of human rights and agrarian or land reform in that country or whether or not there ought to be control of the armed services in trying to restrain the level of violence that goes on or that we ought to proceed to investigate the murders of Americans in that country. We all agree on that. The administration agrees, President Duarte agrees, those of us in this body agree as well.

The issue is whether or not we ought to require the administration to certify that those things are occurring before we are willing to send down additional military assistance.

As I mentioned earlier, I accept the modification of 120 days. That is designed specifically to say to those within the Duarte government, "If you have any intentions of taking action which can undermine the Duarte government in any one of the areas mentioned here, then the consequence of that action would be that we would terminate military assistance."

That is what we want as a message to go there, that we want them to understand that the success of Duarte, the success of this reform movement, depends upon those conditions being met.

Unless human rights are recognized, unless the reform movement, democratic process, and social justice, are the center piece of this effort, then Duarte and his government will fail. Of that much I am sure, and I think the majority of my colleagues on both sides of the aisle would agree with that.

This amendment, this language, with the modifications as suggested will do that. It will shore up his government, it will give them the opportunity to face those who would do otherwise and say, "We will not accept that."

So, Mr. President, I want to urge my colleagues to support the modification being offered by the distinguished Senator from Rhode Island. With all due respect to the efforts by my colleague from Indiana, the distinguished Senator from North Carolina who, I believe, as well endorses these goals and concepts, this is a better way to go. This is a way in which we can guarantee the kind of outcome we all want to have in El Salvador, that is, an end to the violence, an end to the bloodshed, a restoration of the democratic process and social justice in that country.

I yield back to my distinguished colleague from Rhode Island.

EXHIBIT 1

A SPLENDID LITTLE WAR—DRAWING THE LINE IN EL SALVADOR

(By William M. LeoGrande)

In the midst of the presidential campaign, a skeptical reporter asked one of Ronald Reagan's foreign policy advisers whether he and his candidate really believed their own rhetoric about the communist menace in El Salvador. "El Salvador itself doesn't really matter," the adviser replied, "we have to establish credibility because we're in very serious trouble."

The Reagan Administration has moved quickly to establish that credibility by "drawing the line" against "communist aggression" in El Salvador.[1] During his first two months in the Oval Office, President Reagan fired the Carter Administration's reformist Ambassador to that country; launched a major political offensive in Europe, Latin America, and on Capitol Hill to convince anyone who would listen that the insurgency in El Salvador is "a textbook case of indirect armed aggression by the communist powers"; and moved to more than double both economic and military assistance to the beleaguered Salvadoran government.[2]

A nation of virtually no inherent strategic or economic interest to the United States, El Salvador has suddenly become a symbol—a vehicle through which the Reagan Administration hopes to set the tone, by dint of example, for its whole foreign policy. Because the war in El Salvador looks like an easy victory, it provides a perfect opportunity for the new administration to demonstrate its willingness to use force in foreign affairs, its intent to de-emphasize human rights, and its resolve to contain the Soviet Union. In short, the conflict in El Salvador is a splendid little war, made to order for an administration determined to repudiate much of its predecessor's foreign policy.

There is no doubt that Ronald Reagan intends to vanquish the incipient regionalism of the Carter Administration's international outlook and restore globalism to its traditional place of pre-eminence in America's strategic thinking. Whether reality will be so amenable is less clear.

HUMAN RIGHTS IN CENTRAL AMERICA: THE REFORMIST INTERLUDE

Jimmy Carter's decision to make the promotion of human rights a major objective of U.S. foreign policy was at once the most celebrated and excoriated of his international initiatives. From the outset, the policy was presented in moral terms—it was an approach to the world as good and decent as the American people themselves.

It was also intended to distance the United States from the brutal excesses of decaying autocracies, rather than wager the prestige and interests of the nation on their doubtful survival. It made more sense, according to Carter's analysts, to adapt U.S. policy to the currents of history than to try vainly to stem the tide. They argued that right-wing dictatorships bent on preserving anachronistic social orders make bad security risks; that the more they rely upon brute force to sustain themselves, the more rapidly they mobilize and radicalize their opponents. For the United States to enlist wholeheartedly in support of right-wing dictatorships would actually endanger national security; ultimately, such regimes would collapse, and an angry populace would bitterly recall—as it did in Iran—that the United States has sided with the tyrants. The Carter Administration believed that the best strategy for preserving national security was to help create pluralist democracies with relatively egalitarian social structures. Such states would tend to be cul- When crucial allies were involved (e.g., South Korea, the Philippines, the Shah's Iran), the turally and philosophically closer to the United States than to the Soviet Union and, moreover, would be politically stable.[3]

Despite the complaints of Carter's conservative critics,[4] human rights were never allowed to overshadow immediate national security concerns of a more traditional kind. issue of human rights was always muted. But in Latin America, where there appeared to be no immediate security threats in 1977, the human rights policy was applied full force. This was especially true in Central America, where the four nations of the northern tier (Nicaragua, Honduras, El Salvador, and Guatemala) were all ruled by military dictatorships notorious for their systematic repression. By reducing or terminating economic and military assistance to these regimes Washington sought to force them to improve their human rights practices.

The revolution in Nicaragua threw the Carter Administration's human rights policy into crisis. As stability slipped away in Nicaragua after the assassination of opposition leader Pedro Joaquin Chamorro, the objective of promoting human rights was forced once again to compete with the desire to preserve order. Washington could not bring itself to break completely with Somoza, but was equally unwilling to re-enlist wholeheartedly on the side of his increasingly brutal National Guard.[5] During the last eight months of the Nicaraguan insurrection, the unambiguous objective of U.S. policy was to prevent a Sandinista victory. Only the means for achieving this were at issue: should Somoza be forced out in favor of a government

Footnotes at end of article.

of moderates or should he be given the military wherewithal to defend himself, whatever the cost in bloodshed? The failure of policy in Nicaragua was the failure to actually select one strategy or the other. For nearly a year, leaders of Nicaragua's moderate opposition waited in vain for Washington to call for Somoza's resignation, while the Carter Administration persisted in the naive hope that it could somehow conjure up a reformed Somoza to reign over a stable Nicaragua.

The Sandinista victory in Nicaragua set in motion a full-scale review of U.S. policy toward Central America—a review aimed at devising a more effective strategy for preventing similar leftist victories in El Salvador, Guatemala, and Honduras. At issue was the question that had not been adequately addressed during the Nicaraguan crisis: how could the Administration reconcile its commitment to human rights with its desire to preserve political stability? Hardliners within the government argued that these objectives were inherently contradictory, and that stability ought to take precedence even at the expense of human rights. They argued for restoring military aid to the region's anti-communists—in essence, a return to the Kissingerian policy of supporting dictators so long as they were "friendly" ones.

Defenders of the human rights policy replied that military aid could not buy stability in the region and that Washington should instead press for progressive social and political reforms. As in the Alliance for Progress, evolutionary change was prescribed as the antidote to revolutionary upheaval. This option won the bureaucratic battle in Washington, and was put into effect almost immediately in an effort to avert the approaching civil war in El Salvador.

CARTER AND THE SEARCH FOR ORDER IN EL SALVADOR

For generations, the government of El Salvador served as the guardian of the landed oligarchy, suppressing by force of arms any challenge to the nation's rigid social order. The army seized power in 1932 in order to crush a peasant rebellion, which it did successfully at the cost of 30,000 lives. The military's monopoly on political power was retained for the next half century through alternating periods of modernization and retrenchment. But throughout these five decades, two political characteristics held constant: the policies of the regime never threatened the socio-economic foundations of oligarchic power and the military never allowed the political system to become so open that reformist civilians might actually win control of the government.[6]

The process of political polirization in El Salvador began to accelerate in 1972 when the Christian Democrats (PDC) led by Napoleon Duarte won the presidential election, but were cheated out of victory by the military's fraudulent counting of the ballots. In the wake of this electoral fiasco, the armed forces unleashed a wave of repression against the PDC which drove most of its leaders into exile. Despairing of the prospects for peaceful change, many rank and file Christian Democrats began looking to the radical left as the only viable opposition. The mid-1970s witnessed the rapid growth of both the guerrilla left and the "popular organizations"—grass roots community groups of urban and rural poor who enforced their demands for economic reforms by mass demonstrations and civil disobedience.

The rising tide of popular opposition prompted the military government of General Humberto Romero to enact, in 1977, the Public Order Law—a legal license to terrorize the population into silence. The Public Order Law instituted full press censorship, outlawed stikes, banned public meetings, and suspended normal judicial proceedings. Its effect was to demolish the remnants of the centrist political parties, further polarizing the political situation. The clandestine guerrilla organizations proved to be beyond the reach of the security apparatus; the repression served only to bring them new recruits. The oligarchy and its extremist allies within the armed forces were terrified by the growing strength of the left and the government's inability to contain it. They undertook a private solution—the formation of the death squads, which proceeded to wage a campaign of assassination against priests, students, and trade union leaders.

By the summer of 1977, political order in El Salvador was decaying rapidly. Washington, armed with its new reformist strategy for the region, began pressuring General Romero to ease the strictures of his military rule and to initiate social and economic reforms to stem the growing strength of the revolutionary opposition. Romero refused and in October was ousted by progressive military officers who promised the sorts of changes he had resisted. The new junta quickly incorporated civilian leaders from the centrist opposition parties and even suggested its willingness to reach some sort of accord with elements of the radical left. The regime promised to create democratic institutions and to enact social reforms that would break the socio-economic dominance of the landed oligarchy. This government was a seemingly perfect vehicle for Washington's new regional policy of reformism; the Carter Administration quickly pledged to support it.

Unfortunately, the October junta proved to be incapable of carrying out its promises—a failure due largely to the internal politics of the Salvadoran armed forces and to the reticence of the United States to carry its support for reformism to its logical conclusion. While the Salvadoran military had traditionally governed in ways congenial to the oligarchy, it also had a tradition of allowing progressive officers to initiate modernizing reforms as long as they did not threaten the basic structure of the existing social order. The October coup was very much in this tradition, but the reforms it promised were more radical than those of the past. Whenever the progressive officers and their civilian allies proposed reforms of any significance, rightists within the armed forces blocked them as being too extreme. The result was paralysis of the government which could only have been overcome if the progressive officers had been willing to break with their rightist brethren and take full control of the ideologically divided military.

This they were unwilling to do—partly because of institutional loyalty and partly because the United States was unwilling to stand behind them. Though Washington favored social reform, it balked at the October junta's willingness to bring elements of the radical left into partnership with the government. The Carter Administration's strategy was to isolate the radical left politically, not to allow it to share power.

The October junta's paralysis demolished any hope of accord with the radical left, which proceeded to escalate its insurrectionary activities. The mere suggestion of real socio-economic change terrified the oligarchy, which in turn escalated its paramilitary terrorism. Amidst this spiral of political violence, the moderate civilians within the government sought a showdown with the officers, demanding that reforms be implemented and that the rightist Defense Minister, General Jose Guilermo Garcia, be removed. The military refused, the civilians resigned, and the government moved sharply to the right. At this critical juncture, the United States did nothing to preserve the moderate reformist character of the government. In fact, despite this fundamental shift in the balance of political forces within the government, U.S. policy changed not at all. The Carter Administration continued to provide both economic and military aid to the regime, justifying its policy with claims that it was supporting a moderate centrist government under attack from extremists on both the left and the right.

REFORM WITH REPRESSION: LAND REFORM AND THE RIGHTWARD SHIFT OF THE JUNTA

Since January 1980, the moderation of the Salvadoran government has been more chimerical than real. The key difference between the junta formed in January and its predecessor lies in their strategy for resolving the nation's political crisis. While the October junta sought to create a political opening to the left, the January government has sought to defeat the left militarily. At the insistence of the United States, the government grudgingly undertook some social reforms, the most touted of which has been the agrarian program, but this strategy of "reform with repression," as Archbishop Oscar Romero characterized it, has been considerably more repressive than reformist.

Under the stewardship of Ambassador Robert White, the U.S. pursued four interrelated objectives during 1980:

To pressure the government into implementing real social reforms designed to undercut the left's popular support;

To urge the government to reduce the level of official terrorism by reining in its own security forces, even if that required the removal of some rightist officers;

To protect the government from a coup by the extreme right; and

To entice the moderate left away from its alliance with the guerrillas, thus opening the way for a negotiated settlement that would leave the radicals isolated on the political periphery.

By year's end, it was apparent that this reformist strategy had failed. The agrarian program, the cornerstone of an otherwise modest package of reforms, was at a standstill. The level of official violence had risen dramatically rather than subsiding, and there was no evidence whatsoever that the government was making any serious effort to curtail it or to bring its perpetrators to justice. The extreme right had not overthrown the government, but the government itself had moved so far to the right that its extremist opposition was quiescent.

The agrarian reform program had come to symbolize the moderacy of the Salvadoran government, but its progress offers a microcosm of the political dynamics blocking real social reform. Phase One of the program, promulgated on March 6, 1980, expropriated large landed estates (those in excess of 1,250 acres) and transferred them to the resident peasants to be run as cooperatives. This reform affected only 14.7 percent of the arable land, and many of these estates encompassed the least fertile farm acreage in the country. The implementation of Phase One was accompanied by a state of siege and carried out by the security forces who, with or without the consent of higher authorities, used it as an opportunity to conduct military operations against the peasants in regions with a history of leftist sympathies. Statistics compiled by the Salvadoran Catholic Church show that the flow of refugees and the number of peasants killed by security forces in 1980 were highest in those areas affected by Phase One of the reform.[7] An evaluation of the program prepared by AID notes that this violence has produced "an oppressive atmosphere of uncertainly, insecurity, and fear among the people on intervened farms throughout the country."[8]

Phase Two of the reform would nationalize estates between 250 and 1,250 acres, and distribute the land in the form of family farms. This phase would affect approximately one-third of the coffee fincas, which occupy

Footnotes at end of article.

the most productive acreage and have long been one of the principal sources of agricultural wealth. There are no plans to implement Phase Two in the foreseeable future, and U.S. officials concede that is unlikely it will ever be carried out.

Phase Three of the reform was enacted by Decree 207 on April 28, 1980. It gives all renters ownership of the land they work and has been optimistically described by its promoters as "self-implementing." [9] Designed by Dr. Roy Prosterman, Phase Three is named "Land to the Tiller," after Prosterman's earlier effort in South Vietnam, which served as a model for the Salavadoran reform. The AFL–CIO's American Institute for Free Labor Development (AIFLD) has been deeply involved in the implementation of Decree 207, and internal evaluations conducted for both AIFLD and AID indicate that the program is in shambles. Titles to the land have only just begun to be distributed and landlords have been evicting renters so they cannot claim titles. According to the AID report, forcible eviction by "private guards or national security forces" has been "widespread." Moreover, the reform is opposed and often actively obstructed by both the Ministry of Agriculture and the Institute for Agrarian Transformation (ISTA)—the two agencies charged with carrying it out. In May 1980, for example, the Minister of Agriculture suggested that Decree 207 be restricted to peasants who held written rental agreements—a condition which would have rendered over 80 percent of the renters ineligible. This proposal was not adopted, but such resistance to the reform from within the government prompted ISTA Director Rodolfo Viera to threaten to resign last year and lead his Salvadoran Peasants Union into opposition.[10] Shortly thereafter, Viera and two AIFLD advisors were assassinated.

Both the AID and AIFLD evaluations report that Decree 207 has had little effect. An AIFLD survey of beneficiaries of the reform found that 93.4 percent thought they were still renters rather than owners. While most respondents claimed to have heard of the decree, 89.6 percent did not think it had altered the ownership of the land they were renting, and 68.4 percent could not say when it would. By the terms of the decree, all these people now own the land they work, though almost none of them are aware of it. According to the AID report, rental arrangements continue "as if the law had never been announced." [11]

Though the Salvadoran land reform has not significantly altered the socioeconomic condition of the nation's 2.5 million peasants, it has nevertheless been, in a perverse sense, a success. From the outset, the principal objectives of the reform package were political rather than socio-economic. For the Salvadoran government, it was a way of satisfying U.S. demands for reform without alienating rightist officers like Defense Minister Garcia who hold the real reins of power For the United States, it was tangible "proof" —indeed, the only proof—that the government of El Salvador was truly as moderate and reformist as the Administration portrayed it. For if the agrarian reform is a sham or a failure, it is difficult to imagine on what grounds the Salvadoran government might qualify as either moderate or reformist. Certainly not in the political sphere. Ambassador White's hope of consolidating the position of the moderates within the government had even less success than the agrarian reform.

### THE LOOSENING GRIP OF THE MODERATES

The pivotal political issue over the past year has been whether the Christian Democratic civilians and the progressive military officers within the government could muster the influence to win control of the security forces away from the right. Such control would have allowed the moderates to remove extremists officers from command positions, punish those guilty of political murders, crack down on the death squads, and thereby curb the repression which took the lives of some 10,000, 80 percent of which were civilian deaths ascribed to state security forces.[12]

Not only were the moderates unable to restrain the security forces; they were unable even to maintain what little influence they had. The right-wing coup which Ambassador White labored so diligently to prevent occurred slowly, by degrees, not in the streets but in the high councils of the officers corps. As the rightist officers lost patience with reform, they slipped quietly into agreement with their more extremist compatriots, becoming convinced that the only way to meet the challenge of the left is with violence—however much violence that might take.

Over the past year, the rightist officers—the same officers who blocked the reforms of the October 1979 government—have consolidated their hold on power by reducing the Christian Democrats and the progressive officers to impotence. The steady stream of resignations by Christian Democrats over the last twelve months stands as testimony of the rightist character of the regime. Almost without exception, each letter of resignation has cited the intransigence of the rightists and the inability of the moderates to circumvent them.[13]

The progressive officers within the government have fared worse than the Christian Democrats. In mid-summer of 1980, the rightist officers began a campaign to systematically strip the progressives of their command positions, demoting or reassigning them to diplomatic posts.[14] Shortly thereafter, several of the most prominent progressives were assassinated by death squads, and in November their leader, Colonel Adolfo Majano, was finally removed from the five-member governing junta. Majano was later arrested and sent into exile. The progressive faction within the officers crops, which was powerful enough in 1979 to overthrow Romero's government, has now ceased to be a significant political force.

Without allies in the armed forces, the Christian Democrats serve at the pleasure of the rightist officers. The appointment last November of Christian Democratic leader Napoleon Durate as president should not be mistaken for a significant realignment of political forces. The leadership shuffle that placed Durate in the presidency left the senior military command basically intact, leading one diplomat to describe Durate as an "adornment." [15]

Durate may have his own agenda, but he does not have the political power to carry it out. This is apparently by his inability to act in his own interests: for example, Durate can neither proceed with the agrarian program nor can he dismiss his military opponents. Like the agrarian reform, the restructuring of the government came at the insistence of the United States. The Carter Administration needed it to preserve the centrist image of its client in the wake of the murders of four North American religious women, and the Salvadoran officers acquiesced to it in order to mollify the State Department. But the reorganization has not altered the structure of political power in El Salvador one iota. The government was and remains a rightist military regime with a civilian facade.

Nothing demonstrates this more clearly than the practices of the government itself. The violence of the security forces accelerated in 1980; despite the pleas and promises of the Christian Democrats, the reign of official terror was much worse than under the openly reactionary government of General Humberto Romero. So too, the atrocities committed by the death squads.

Not one person has been arrested for the hundreds of murders of Salvadorans for which the extreme right took "credit" in 1980.[16] Officers on the extreme right who have been caught plotting against the government have not even been punished. Major David D'Aubuisson, who led a coup attempt last May, was arrested and then released after the officers corps voted not to place him on trial. The Vice-Minister of Defense, also implicated in the plot, was not even removed from his post.[17]

### THE OPPOSITION OF THE LEFT

Despite U.S. efforts to portray the Salvadoran regime as a centrist government beset by both the left and the right, there are really only two sides to the conflict in El Salvador: the rightist government and its leftist opposition, which is no more a "Pol Pot" left than the government is "centrist." The opposition includes a broad, politically heterogeneous array of groups organized under the political rubric of the Revolutionary Democratic Front (FDR), and the military command of the Farabundo Martí Front for National Liberation (FMLN). The FDR unites middle class social democrats, Christian Democrats who have split from Duarte, professional associations, trade unions, and the popular organizations whose ideology is best described as a homegrown amalgam of Marxism and liberation theology. The FDR's President, Guillermo Ungo, was Napolean Duarte's vice-presidential running mate in the election of 1972.

The FMLN unites the various guerrilla armies which span the ideological spectrum of Marxism from Trotskyist to Castroist to orthodox Marxist-Leninist. Since early 1980, the FDR and the FMLN have pursued a coordinated political, diplomatic, and military strategy to defeat the rightist government. This collaboration has resulted in a moderation of the guerrillas' socialist political program and the joint adoption of a social democratic platform for a revolutionary government modeled on the Nicaraguan example. The platform calls for radically redistributive socio-economic reforms, but promises an economic role for the private sector, the preservation of political pluralism, and a foreign policy of nonalignment.[18] The viability of such a program is by no means certain, but would depend, as in the Nicaraguan case, upon a host of internal and external circumstances.

The left clearly failed to create an irreversible military situation before Ronald Reagan entered the Oval Office, but the January 1981 offensive was hardly a great victory for government forces either. Though the guerrillas were unable to defend any of their initial territorial gains, they demonstrated their ability to launch coordinated assaults throughout the country and to operate with impunity in many rural areas. Never before had the various guerrilla groups demonstrated such a capacity for coordinated action. Indeed, the threat posed by the January offensive was severe enough to prompt the Carter Administration to radically reverse its own policy. Lethal military aid had been withheld from El Salvador since 1977 on human rights grounds, and $5.7 million in "nonlethal" [19] aid was suspended in November pending the outcome of the investigation into the murders of the North American missionaries. On the very eve of leaving office, the Administration restored the "nonlethal" aid and rushed an addition $5 million in lethal material to the Salvadoran armed forces, though the offensive was thwarted before the aid arrived.

Ironically, the Carter Administration's decision to restore military aid came on the same day as Carter's Farewell Address in which he offered a stirring rhetorical defense of his human rights policy. Nothing could have better symbolized the contradictions of Carter's policy in Central America. Ulti-

Footnotes at end of article.

mately, the Administration's commitment to social and political reform could not compete with Washington's traditional fear of leftist governments.

The current military situation appears to be one of stalemate; the left does not yet have the capacity to defeat the armed forces, but neither do the armed forces have the capacity to exterminate the guerrillas. The January offensive was by no means the final battle of El Salvador's civil war—more likely, it was only the opening shot fired. The future course of the war could well depend as much upon external actors as upon the domestic principals, and a great deal more than the tranquility of El Salvador may be at stake.

REGIONAL/INTERNATIONAL ALINEMENTS

The conflict in El Salvador has never been a purely domestic affair. The long succession of rightist regimes there have always relied upon Washington's military and political support to help cow their opponents. As political strife escalated in 1980, so too did the level of international involvement, and no external actor was more prominent than the United States. In addition to providing nearly $100 million aid, Washington was intimately involved in the internal politics of both the Salvadoran government and its armed forces.

The United States has not been the only patron of the Salvadoran government; support from Venezuela and Costa Rica have been crucial for maintaining the regional legitimacy of U.S. policy. Venezuelan President Herrera Campins has lobbied hard within the international Christian Democratic movement to gain acceptance for Duarte's government, and Venezuela has provided considerable economic assistance to San Salvador. Venezuelan opposition leaders accuse their government of covertly shipping arms to the Salvadoran security forces, but Herrera Campins denies the charges. Costa Rica's Christian Democratic president, Roddigo Carazo has also been supportive of U.S. policy and maintains cordial relations with Duarte's government, though Costa Rica does not have the resources to make any major material contribution to the conflict.[20]

Guatemala and Honduras are allies of the Salvadoran regime, a fact which the U.S. government has been less than eager to spotlight. Both nations are ruled by right-wing military governments which perceive the possibility of a leftist victory in El Salvador as a threat to their own internal security. Over the past year, both have sought closer ties with the rightist officers in the Salvadoran armed forces rather than with the government *per se*. During the left's January 1981 offensive in El Salvador, Honduran and Guatemalan forces were mobilized along the border, ostensibly to prevent the fighting from spilling across the frontiers. In effect, however, they were providing an anvil against which the Salvadoran military hoped to pound guerrillas. There were numerous reports, though unconfirmed, that some Honduran and Guatemalan units crossed the frontier to operate jointly with their Salvadoran allies.

Whether or not such reports are accurate, there is little doubt that the Guatemalans are predisposed to intervene in El Salvador if the left appears to be gaining militarily. The Guatemalan armed forces have a history of coming to the aid of the Salvadoran right in times of crisis (in 1932 and again in 1972), and the Guatemalan government has spoken openly of the need to halt the "communist tide" before it reaches Guatemalan shores. Finally, U.S. intelligence reports reveal that both the Guatemalan and Honduran governments are assisting in the creation of paramilitary groups within their territories, groups composed of former Nicaraguan National Guardsmen and anti-Castro Cubans whose objective is to wage war against communism on a regional scale.[21]

The left, too, has its international allies, among whom Mexico, Nicaragua, and Cuba have been the most vocal. Though Mexico has not formally broken relations with El Salvador, the Mexican government and ruling Institutional Revolutionary Party (PRI) are firm supporters of Salvadoran leftists. Mexico City is the principal base of operations for the FDR's efforts to build diplomatic support.

Mexico and the United States are father apart on the issue of El Salvador than on any other. Within hours of Reagan's election, President José López Portillo publicly warned the incoming Administration against intervention in Central America. Mexican protests escalated in January when the Carter Administration restored military aid to El Salvador; Foreign Minister Jorge Cástaneda warned the United States to let the Salvadorans "solve their own problems," and PRI President Gustavo Carvajal promised that the party would support any people that "fights for its freedom." That same week, 25,000 Mexicans marched against U.S. intervention in El Salvador—the largest such demonstration in recent years.[22] In February, when General Vernon Walters travelled to Mexico City to present Washington's evidence of Cuban involvement in El Salvador, he was denied an audience with President Portillo. Portillo then followed Walters' visit with a speech in which he went out of his way to stress Mexico's close relations with Cuba, calling it the Latin American state "most dear" to Mexico.[23]

Mexican policy is based upon an assessment of Central American reality not so different from that of the Carter Administration. The Mexicans are convinced that the military governments of El Salvador, Guatemala, and Honduras cannot long survive the growing demands of the poor for social change. Stability in the region therefore requires that these narrowly-based dictatorial regimes be replaced with popular governments willing to dismantle the oligarchic land-owning systems and distribute the benefits of development to a broader crosssection of the populace. While the Mexicans have no desire to see pro-Soviet Marxist-Leninist regimes predominate in Central America, they see fundamental change as inevitable and believe that strong international support for social democratic opposition elements offers the best hope for long-term stability. The Mexicans, unlike the Carter Administration, have not been afraid to carry this policy through to its logical conclusion, i.e., supporting the revolutionary oppositions in El Salvador and Guatemala. Based upon their experience of peaceful coexistence with Cuba, the Mexicans are confident that they can live cordially with whatever form of revolutionary government emerges.[24]

Mexico's view is widely shared within the Socialist International, which has provided finanical assistance and diplomatic support to the FDR. A number of key European Democratic parties, including those in Germany, Sweden, Holland, and Norway, are on record as supporting the FDR and opposing any deeper U.S. military involvement in El Salvador. Sweden's support for the left has been so vocal that the Reagan Administration was moved to lodge a formal protest in February—the first such protest made to a West European nation since the war in Vietnam.

The breadth of the FDR's European support prompted Washington to launch a major diplomatic offensive on the continent in an effort to counter it. Assistant Secretary of State for European Affairs Lawrence Eagleburger was dispatched to Germany, France, Belgium, the Netherlands, and the United Kingdom to convince the allies that Cuban and Soviet arms shipments to the Salvadoran left constituted a "textbook case of indirect armed aggression" requiring a coordinated allied response.[25] He did not meet with stirring success. Most of the Europeans were unwilling to enter in the Administration's crusade against communism in El Salvador until the Administration provided more detail on how it proposed to respond. None of the Europeans were anxious to see the United States escalate its military involvement; all expressed support for a negotiated political settlement rather than a military solution.[26]

The role of socialist and radical states, especially Cuba and Nicaragua, has received great attention because of the State Department's report on "communist interference" in El Salvador. Up until the last few months of 1980, Cuban and Nicaraguan aid to the left was more political than military. Both states had openly endorsed the Salvadoran opposition and were routinely providing it with advice. Managua, like Mexico City, served as an important center of diplomatic and political activity for the FDR and FMLN, but U.S. intelligence could discern only a trickle of arms from Nicaragua to El Salvador. As late as September, 1980, Washington certified that the Nicaraguan government was not materially promoting the revolution in El Salvador and was therefore in compliance with the Congressionally-imposed condition for the release of $75 million in economic aid.

THE TIDE TURNS: PRESIDENTIAL TRANSITION AND COMMUNIST INVOLVEMENT

In the midst of the guerrillas' January offensive, the Carter Administration reversed itself, claiming that it had "compelling evidence" that Cuba, Vietnam, and the Soviet Union had begun channelling massive arms shipments into El Salvador via Nicaragua.[27] This sudden flood of arms, along with the exigency of the guerrilla offensive itself, were cited as justifications for the resumption of U.S. military aid to the Salvadoran armed forces. At the same time, economic aid to Nicaragua was suspended in an effort to force the Nicaraguans to close the arms conduit.

In February, the Reagan Administration released a White Paper documenting the charges initially levelled by Carter. Compiled from a variety of intelligence sources, the report argued that Cuba and the Soviet Union orchestrated the shipment to El Salvador of 200 tons of arms supplied by a number of socialist and radical Arab states.[28] Most of these arms were said to have been shipped through Nicaragua. While the report left little doubt that sizable quantities of arms were in fact provided to the Salvadoran left by the socialist camp, the report was virtually silent about other supply channels, merely acknowledging in passing that they exist.

Whatever its accuracy, the White Paper is a quintessentially political document in that it was designed not so much to clarify the international dimensions of the Salvadoran civil war as to provide a justification for the Reagan Administration's determination to cast the issue of El Salvador in East-West terms.[29] This effort would have been seriously compromised had the Administration detailed the FDR's contacts with foreign social democrats as meticulously as it documented the FDR's travels within the socialist bloc, or if the report had explored the extent of arms shipments to the left from Panama and Mexico as well as from Cuba and Nicaragua. Even if every allegation in the White Paper is accurate, it still provides only a partial view of the complexity of international involvements in the Salvadoran civil war.

The White Paper serves effectively as a justification for the Reagan Administration's decision to escalate U.S. military involvement in El Salvador. Armed with the report, briefing teams were dispatched to Europe, Latin America, and Capitol Hill in a well-orchestrated effort to build domestic and international support for a change in U.S.

Footnotes at end of article.

policy. But the basic thrust of this new policy was determined long before the arms build-up described in the White Paper. Early in the presidential campaign, Reagan and his foreign policy advisors targeted Carter's human rights policy, especially as applied in Central America, as a major focus of attack. The insurgency in El Salvador was portrayed as resulting primarily from Cuban and Soviet subversion rather than domestic social and political conditions,[30] and Carter's strategy for achieving stability through reform was denounced as idealistic and foolish, merely aiding the cause of international communism.[31]

The Administration's new policy for El Salvador is one of keeping the left from coming to power, whatever the cost. Within days of assuming office, Reagan increased economic aid by 63 percent and began a full review of policy toward the Salvadoran government. Shortly thereafter, Ambassador White, who was closely identified with the Carter Administration's effort (albeit unsuccessful) to promote reform, was fired. He was replaced by Chargé d'Affairs Frederic Chapin, reassigned from the Defense Department where he had been preparing contingency plans for a major increase in U.S. military aid to the Salvadoran armed forces. Secretary of State Alexander Haig's pledge to shift the focus of U.S. policy away from human rights toward the battle against "international terrorism" was quickly followed by an announcement that U.S. aid to El Salvador would no longer be contingent upon either reforms or human rights.[32] The next day, Department of State's William Dyess tried to dispel the impression that the Reagan Administration was indifferent to reforms in El Salvador, but the afterthought served only to reinforce the obviously tertiary nature of the concern.

The likelihood that this new policy will have the effect of curtailing social reform and encouraging the terrorism of the security forces seems beside the point for the Reagan Administration. The parallels between El Salvador and Vietnam are not merely the constructs of the Administration's liberal critics. Reagan himself seems to see the light of victory in Vietnam at the end of the Salvadoran tunnel. The Administration appears to be less interested in El Salvador per se than in creating a symbol of U.S. resolve to use military force abroad and to get tough with the Soviet Union.[33] El Salvador provides what appears to be a geopolitically safe testing ground on which the United States can probe the depths of Soviet commitment to national liberation struggles, assess the cooperativeness of the allies, and begin to purge the national psyche of the "Vietnam syndrome" that Reagan has so denounced.

EL SALVADOR AND THE LESSONS OF VIETNAM

The parallels between El Salvador and Vietnam apply not so much to the military circumstances of the two cases, which are quite different, but to the way in which U.S. policy is unfolding. El Salvador, like Vietnam before it, is being transformed from an internal war into an international test of will between East and West. The domino analogy has been resurrected to characterize the nations of Central America, falling in chain reaction from El Salvador north to Guatemala and Mexico, south to Costa Rica and Panama. As candidate Reagan warned, "We are the last domino." [34]

Claims of an East-West confrontation distort reality in two ways—by making it sound as if the Salvadoran revolution is a Cuban creation, and as if it is a purely military struggle that can be won merely by countering the flow of arms from abroad. The revolution in El Salvador began long before the first Cuban arms shipments and it will not fade away if those shipments are halted. By failing to focus on the socio-economic causes of political turmoil, the Reagan Administration betrays a narrowly military conception of national security and a preference for using military means to manage political problems. Revolutions spring from deep social and political fissures in the very foundations of a society—problems that cannot be solved by simply throwing guns at them. Though massive fire-power failed to bring about victory in Vietnam, Administration policies reflect a considerable faith in the efficacy of arms.

By declaring El Salvador to be a test of will with international communism, the Reagan Administration is wagering U.S. prestige and credibility on the survival of one of the weakest, most brutal, and least popular governments in the hemisphere. A nation of virtually no inherent strategic or economic interest to the United States is thus cast, like Vietnam before it, onto the world's centerstage, and the success or failure of U.S. policy takes on implications it would never have otherwise. Once begun, the process of investing blood and treasure in this exemplary case provides its own rationale for incremental escalation.

Policymakers in Washington have already been seduced by the view that just a little more aid, a few more advisors, or one additional reorganization of the government will somehow produce success. Since January 1980, the United States has been drawn almost imperceptibly into a position so totally identified with the Salvadoran government that to disassociate from it would be viewed as a radical change in policy.

American aid has not produced a strong, stable government; it has only fostered dependency. The Salvadoran economy is already comatose, surviving solely on the life support system of U.S. largesse. With the munificence of the United States as a crutch, the rightist military regime has no incentive to make the kinds of political concessions and compromises necessary to achieve a lasting peace. Large-scale military aid to the Salvadoran armed forces will not strengthen them; it will only allow them to continue to ignore political reality. The Reagan Administration promises that it will never send American troops to fight in El Salvador. But if, a year from now, the Salvadoran government is on the verge of collapse, as Saigon was in 1965, how will this Administration respond?

One of the clearest parallels between El Salvador and Vietnam is the way in which the Reagan Administration, and the Carter Administration before it, have waged the public relations war at home. The selling of the war began, as in Vietnam, with a natural effort to put the best possible face on U.S. policy. The Salvadoran government was described as "centrist" even as it engaged in repression worse than its "rightist" predecessor; the opposition was labelled a "Pol Pot left," even though it bore closer resemblance to the Sandinistas than to the Cambodians.

In mid-1980, the Carter Administration evolved a conscious policy of attempting to manage U.S. public opinion on El Salvador by encouraging media coverage favorable to the government. The objective, according to a dissent document purportedly prepared by foreign policy analysts within the Administration, was to prevent the creation of a positive image for the Salvadoran left of the sort enjoyed by the Sandinistas.[35] It was then that truth became hostage to policy; the Carter Administration began making public pronouncements sharply at variance with internal reports—on the effectiveness of the agrarian reform, for example.

The Reagan Administration has continued in this vein. Throughout 1980, Carter's State Department acknowledged that the right in El Salvador was responsible for the overwhelming majority of political murders. One official called the mortality statistics gathered by the Salvadoran Catholic Church "the best data we have." Reagan's State Department now claims that the guerrillas have been committing most of the atrocities, and the same official who acknowledged the veracity of the church's data in January now solemnly contends that the church's figures are unreliable because it sympathizes with the communists. Truth has indeed become the first casualty.

Despite strenuous efforts, the Reagan Administration's public relations campaign to justify American involvement in the Salvadoran conflict has not met with overwhelming success. Domestic opposition to the war is mounting and is already greater than was opposition to Vietnam at a comparable stage of the war. On May 3, 1981, some 25,000 people marched in Washington in an anti-war demonstration reminiscent of the 1960s. The Reagan Administration appears to recognize that it cannot sustain U.S. military involvement in El Salvador without the support of the U.S. public. What the Administration appears not to recognize is that public support cannot be manufactured by good public relations; it is inextricably tied to the nature of the conflict itself. A massive counterinsurgency effort against a popular insurgency inevitably requires widespread brutality against the civilian populace if it is to succeed. The lesson of Vietnam at home is that the people of the United States will not long tolerate a policy that necessitates such brutality.

The Reagan Administration's narrow military view of the domestic political situation in El Salvador is matched by its narrow geopolitical view of the conflict's international context and the implications of committing massive economic and military resources there. The Administration seems to believe it can confront the Soviet Union in Central America with relatively little risk—that the Soviets will retreat rather than try to match U.S. escalation in a region far from the areas vital to Soviet national interest. All this is true enough, but it by no means follows that a major U.S. economic and military commitment in El Salvador bears no serious cost. On the contrary, its cost is potentially immense.

THE U.S.-LATIN AMERICAN RELATIONS ANGLE

Reagan's policy places the United States on a collision course with Mexico at the very time that Mexico is unveiling a more activist foreign policy that seeks to extend Mexican influence throughout its "area of concern"—Central America and the Caribbean. While Mexico wants to maintain good relations with the United States, President López Portillo has repeatedly warned against the very policy Washington now seems intent on pursuing. A direct American intervention in El Salvador would demolish relations with Mexico just when it has emerged as the most important Latin American nation for the United States.

Even Venezuela and Costa Rica, two principal regional supporters of the United States on the issue of El Salvador, could not suffer U.S. intervention in silence. In both countries, the social democratic oppositions have harshly criticized their ruling Christian Democratic parties for supporting the Salvadoran government. Deeper U.S. involvement will intensify that opposition and could easily lead those governments to begin distancing themselves from American policy. A direct U.S. intervention could cause their support to evaporate immediately. Indeed, the Organization of American States would probably condemn such an intervention with only a few nations dissenting.

American relations with Nicaragua would

Footnotes at end of article.

probably not survive a major escalation of U.S. involvement in El Salvador. The insurrection there has already become the principal flash point in bilateral relations, with the Reagan Administration charging that Nicaragua has served as a conduit for arms shipments to the FMLN, and threatening to cut off economic aid to Nicaragua in reprisal. Virtually all observers agree that a cutoff of aid would provoke a severe deterioration of U.S.-Nicaraguan relations, a rapid radicalization of domestic Nicaraguan politics, an unavoidable economic dependence on the Soviet Union, and an increased Nicaraguan role in El Salvador.

DIPLOMATIC COSTS OF INVOLVEMENT: EUROPE AND THE THIRD WORLD

The repercussions beyond the hemisphere of escalating U.S. involvement in El Salvador would be no less damaging. The cool reception encountered by emissaries sent to brief the allies on the Cuban and Soviet role in El Salvador suggests that Reagan will find little support for his policy in Europe. Most of the Western European states would probably be content to leave El Salvador to the United States, but if Washington continues to insist that events in El Salvador will determine whether the United States enters into arms limitation talks with the Soviet Union, the issue will cease to be one which the allies can afford to ignore.[36] Given the strength of European social democracy and its support for the Salvadoran opposition, Reagan may well find that his policy exacerbates tensions within the North Atlantic Community rather than forging a new unity and resolve to resist "communist aggression" in the third world.

In the third world, Reagan's policy of deepening U.S. involvement in El Salvador will undo most of the diplomatic gains accruing from Carter's human rights policy. Third world suspicions, focused in recent years upon the Soviet Union because of its interventions in Ethiopia and Afghanistan, would shift back to the United States if Reagan were to intervene directly in El Salvador. The Soviets have had the good sense not to stake their prestige or credibility on the Salvadoran left, so its defeat would damage the Soviet Union not at all. But the sort of commitment by the United States required to defeat the left (if that is possible at all) would damage U.S. relations with the rest of the hemisphere, strain the Western Alliance, erode U.S. prestige in the third world, and prompt a new wave of domestic recriminations in the United States itself. Not incidentally, it would hand the Soviet Union a custom-made sphere of influence argument to justify its policy in Afghanistan and Poland.

THE COSTS OF MILITARY INVOLVEMENT: TUMBLING INTO WAR

The military implications of Reagan's policy are even more sobering than the diplomatic ones. By siding with the right in El Salvador and justifying a deeper U.S. military involvement with claims of Cuban intervention, the United States, intentionally or not, lowers the barriers against direct intervention by Honduras and Guatemala. If massive U.S. aid can be justified as merely a necessary response to Cuban subversion, cannot Guatemalan or Honduran intervention be similarly justified? The Guatemalan government is faced with a major guerrilla insurgency of its own, and the Guatemalan left would surely respond to Guatemalan intervention in El Salvador by escalating its activities and extending its cooperation with the Salvadoran left. The Salvadoran war would thus become a transnational war of left against right in which national boundaries would cease to have any practical meaning.

The danger in Honduras is somewhat different since guerrilla forces there still number only a handful. But Honduras borders Nicaragua, and relations between the two states are strained because of attacks launched on Nicaraguan border areas by former National Guardsmen based in Honduras, and clashes between Honduran and Nicaraguan border guards. Guatemalan or Honduran intervention in El Salvador would be viewed by Nicaragua as a clear and present threat to its own internal security. In such an atmosphere, the former Guardsmen might well try to provoke a conflict between Nicaragua and Honduras by launching a major border attack. If they should succeed, the whole northern tier of Central America would be engulfed by war.

Unfortunately, the danger does not end there. Nicaragua at war would be forced to turn to Cuba and the Soviet Union for major infusions of military aid. If the war were to go badly and Nicaragua were to call for Cuban troops to help defend Nicaraguan territory, Cuba would probably provide them, for the scenario would fit exactly the circumstances under which Cuba has in the past deployed combat troops abroad—at the request of a friendly government threatened by external attack. The arrival of Cuban troops amidst war in Central America would surely call forth a response by the United States—most probably a naval blockade. The stage might then be set for a re-enactment of the Cuban Missile crisis, but without the 3 to 1 U.S. nuclear superiority that is thought to have determined the outcome in 1962.[37]

IS THERE NO EXIT? PURSUING THE "ZIMBABWE SOLUTION"

Ironically, all the actors in the Salvadoran drama profess to recognize the need for a political rather than military solution to the civil war. Thus far, the obstacle to negotiations between the government and opposition has been the conviction of each party that the other lacks sincerity. Such suspicions produce negotiating proposals which are so clearly unacceptable that they must be understood as propaganda ploys rather than as serious initiatives. Yet even these spurious overtures serve to place the combatants on record favoring some sort of negotiations, thereby opening the possibility, however remote, that an appropriate coalition of international actors might be able to devise a workable negotiating formula.

There is little doubt that most of the international supporters on both sides in the civil war truly desire a political solution, and several have been actively pursuing a way to get the process started. Social Democrats in Western Europe, led by the Germans and Swedes, have attempted to cast themselves and their Christian Democratic counterparts in Germany and Italy as intermediaries between the Salvadoran government and opposition, thus far to no effect. In Latin America, Mexico, Venezuela, Brazil, Costa Rica, and even Nicaragua are also searching for an acceptable mechanism to initiate a dialogue.

Since there is no measure of trust whatsoever between the Salvadoran government and opposition, three necessary conditions must be met before negotiations can begin: (1) each side must be convinced that it has no hope of winning a military victory in the near term; (2) each must be certain that its opponent will not be able to gain military advantage during the negotiations themselves; and (3) each much be assured that the other will have to abide by the outcome of whatever political process emerges from a peace conference. Even then substantial political pressure will probably have to be exerted by the international allies of both sides to bring them to the bargaining table.

The military stalemate that currently exists in El Salvador provides what may be the last opportunity for arranging a political solution, but it is fleeting. As the Reagan Administration begins to provide massive amounts of economic and military aid to the Salvadoran government, the armed forces there become increasingly convinced that their drive for military victory will be underwritten by Washington. By announcing that aid will no longer be tied to reforms or human rights practices, the Administration is sending the Salvadoran security forces the message, whether intended or not, that the United States will tolerate and abet whatever level of violence pacification requires. Instead of providing unconditional military support of the Salvadoran government, the Reagan Administration ought to be cooperating with European and Latin American efforts to convene a peace conference modelled loosely on the Lancaster House negotiations which produced peace in Zimbabwe.

Indeed, the role of the United States is crucial to meeting all the conditions necessary to launch such a conference. As the premier foreign source of material aid to the Salvadoran government, only the United States has the ability to restrain the Salvadoran Army's quest for military victory, to bring the Salvadoran government to the negotiation table, and to assure that it will abide by any agreements reached (on pain of a cutoff of aid). Germany, Mexico, and Nicaragua can probably bring the FDR–FMLN to the bargaining table, just as the "front line states" brought the Patriotic Front to the Lancaster House conference; only the United States can play the role of Britain by assuring the participation of the Salvadoran government.

Unfortunately, the Reagan Administration's determination to make El Salvador a global example of U.S. resolve probably makes negotiations impossible. Indeed, for Washington, they are counterproductive. It would hardly do to "draw the line" against communism in El Salvador and then fail to win a clear victory. The Reagan Administration gives every indication of believing it can "win" in El Salvador, even if it has to destroy the country in order to save it. As Washington maps this initial gambit in its game of global chess with the Soviet Union, it is Salvadoran pawns that stand in the front rank, about to be sacrificed.

FOOTNOTES

[1] The phrase "drawing the line" was first used by Secretary of State Alexander Haig when he briefed the Congressional leadership on the State Department's White Paper, *Communist Interference in El Salvador*, Special Report Number 80, February 23, 1981 (reported in *The New York Times*, February 18, 1981).

[19] The designation "non-lethal" must be understood in a technical sense rather than literally; it includes transportation and communications equipment essential for counter-insurgency warfare.

[20] *The Washington Post*, January 17, 1981.

[21] This report, entitled "Dissent Paper on El Salvador and Central America," was circulated in Washington, D.C. during November 1980. For a synopsis, see *The Boston Globe*, November 28, 1980. The report has a rather mysterious history. The State Department denies that it was an official dissent channel document, but several Department officials have told the author that the paper cites existing intelligence reports accurately. This suggests it was either written by analysts within the government or by someone with access to classified material.

[22] *The Washington Post*, January 25, 1981.

[23] *The New York Times*, February 21, 1981.

[24] For an excellent report on the Mexican position, see the interview in *The New York Times*, January 4, 1981.

[25] This phrase is from the State Department White Paper, "Communist Interference in El Salvador," *op. cit.*

[26] *The New York Times*, February 2, 1981.

[27] *The New York Times*, January 1, 1981.

[28] Department of State, "Communist Interference in El Salvador," *op cit.*

[29] In describing the imolications of the White Paper, Acting Assistant Secretary of State for Latin American Affairs John Bushnell was explicit: "This outside interference dramatically changes the nature of the struggle in El Salvador from a national one to an international one with East-West dimensions." U.S. Congress, House of Representatives, Statement before the Subcommittee on Foreign Operations, House Committee on Appropriations, February 25, 1981.

[30] National Security Advisor Richard Allen, for example, promised that a Reagan Administration would undertake "quick action against Fidel Castro's Soviet directed, armed, and financed marauders in Central America, specifically Nicaragua, El Salvador, and Guatemala," Latin America *Weekly Report*, November 14, 1980.

[31] See, for example, Jeane Kirkpatrick, "Dictatorship and Double Standards," *op cit.*

[32] The delinking of aid from reform issues was announced shortly thereafter by State Department Spokesman William Dyess, quoted in news reports of *The New York Times*, February 18, 1981. Alexander Haig's statement of this shift came in his press conference of January 28, reported in *The New York Times*, January 29, 1981.

[33] *The New York Times* and *The Washington Post*, February 14, 1981.

[34] NBC News, White Paper, *The Castro Connection*, aired in October, 1980.

[35] See *supra* note 21.

[36] President Reagan said in February that the Soviet "invasion" of El Salvador would have to be "straightened out" before a resumption of arms control talks would be possible. See *The New York Times* coverage of February 28, 1981.

[37] Indeed, there is even a possibility that the Administration itself might seek to provoke such a superpower confrontation. Several Administration officials have suggested that the United States might act directly against the "source" of subversion in El Salvador, i.e. Cuba. See, for example, White House Chief of Staff Edwin Meese's comments reprinted in *The New York Times*, February 23, 1981.

[From the Playboy Magazine, October 1981]

DEATH AS A WAY OF LIFE

(By Christopher Dickey)

October 15, 1979. The general expected the call, but when it came, he wasn't ready.

For two years, he had been the president of El Salvador, the last in a 50-year line of carefully selected dictators. He had been picked by the general who preceded him because he was tough, and he had set out to show that his reputation was justified. His government would suffer no dissent from Communists who wanted to restructure the society of his little country. They would be taken care of as they were always taken care of. They could leave the country, or they could disappear, or they could die.

But now everything seemed to be going wrong. Everywhere the general turned, more Communists were springing up. They seized factories, government buildings, churches, embassies. In the countryside, they somehow managed to train 30,000 peasants workers and students. They brought them into the city and marched them through the streets and nothing seemed to stop them. What was the point of having 80,000 paramilitary men in Orden if they let that kind of thing happen?

Three months earlier, Nicaragua had fallen to the Communists and everything pointed to El Salvador as their next target. Mother of Jesus, if Somoza could fall, anything could happen. Thousands of Somoza's national guardsmen had been rounded up and thrown into jail. Some had escaped to El Salvador to tell stories of defeat and chaos, and the general's soldiers had listened to them. Horrified.

Now his troops were getting restless and disillusioned. He could see it. There were Communists in their ranks and constant reports that they were plotting a coup. The troops were saying they had never had a voice in picking him for the job, but why should they? Nonetheless, they resented him. He paid them, applauded them, and they hated him still.

In August, the general had called several of the most obvious conspirators to the Casa Presidential. Of course, they denied everything. Where could he turn? Washington was no help. The Yankees were always throwing their weight around, but they were never there when you needed them. Now they were full of this human-rights talk. Human rights was nothing but Communist propaganda, but Mr. Carter up in the White House played right along. The general would have no part of it. He refused to take a single Yankee gun for his troops rather than listen to such nonsense.

Besides, today there was a more immediate problem. All morning long, the general's aides had been calling the cuartels and no one was answering. Now there was a phone call for the general from one of those colonels—Jaime Abdul Gutirrez—who had denied everything in August.

This was too soon. It was the wrong time of day. Coups always came at midnight on a weekend in El Salvador, and this was a Monday morning. Outside the breeze-blown palace, beyond the scar-faced guardsmen with their machetes and machine guns under the trees, traffic was moving normally. The city seemed peaceful, more peaceful than usual.

"Señor Presidente," said the voice, "the armed forces of El Salvador have decided to remove you from the presidency of the republic. We have declared ourselves in rebellion."

Within five hours, General Carlos Humberto Romero was on an airplane bound for Guatemala. His key ministers and his high command were with him.

Two young colonels, Gutiérrez and Adolfo Arnoldo Majano, were now in command—vowing economic reforms, respect for human rights and the beginning of a new democracy.

On the other side of the city, behind the reinforced concrete and the bullet-proof glass of the American Embassy, there was palpable relief. "We weren't promoting a coup," an American policymaker said coyly. "We were just promoting things that the general's government wasn't doing."

U.S. officials knew what the young officers were up to weeks before they finally made their move. And October 15 was not a moment too soon as far as the State Department was concerned. A bloodless coup averts a bloody insurrection. For once, reform had a chance to beat out revolution. The left would be co-opted, its banners removed. El Salvador would not be another Nicaragua.

Maybe the Salvadorans didn't understand all the ramifications and maybe their culture, their history and society gave them no preparation for such a more. But now they would learn to do things with American guidance. The basic principles were easy enough to understand.

Washington, winter 1979. A cold drizzle was freezing on 36th Street in Georgetown, but the air inside F. Scott's bar was thick with warm congeniality. Jean-Pierre told three stories that night. One was about the murdered husband, one about the Nazi funeral and one about artillery on the mansion's lawn. Jean-Pierre's English was not good and his memory may have been tinged by the champagne. And probably they were not stories he told often, because so few people had heard of El Salvador and so few cared.

This was before the troubles there became the war and before the White House drew a thick red line around the country warning world communism to keep out. It was before Ronald Reagan was President, before advisors and helicopters and secret slaughter on a massive scale. America was watching Iran for the hostages to be released, for the United States to bomb Tehran in vengeance, for something to restore the nation's crippled pride. Ted Kennedy was on the campaign trail. Carter was in the Rose Garden. Reagan was waiting to make his move. There had been a brief flurry of interest in the Nicaraguan war, but now that it was over, Central America had slipped back to the cliched recesses of America's mind. Picturesque peasants, comic-opera dictators, bearded revolutionaries, Bananas.

The occasion was a goodbye dinner for one of Jean-Pierre's friends at a back table amid F. Scott's art-deco flash. The friend was a reporter, a novice correspondent about to leave for Central America on his first foreign assignment, and Jean-Pierre had lived in El Salvador with his first wife in the early Sixties. As the champagne flowed, he started talking about his ex-wife and Los Catorce, the Fourteen Families. His wife was one of them and he had traveled among them, a Frenchman among Francophiles. Rich Latins seem always to be Francophiles or Anglo-

philes or Italophiles; they want so desperately to be European, something other than what they are. Even the idea of Fourteen Families, a journalist's fancy in the Fifties, became a cult among the Salvadorans. Really, there were perhaps 100 families that controlled the wealth of the country, but every one of them tried to prove it was one of the Fourteen.

They told Jean-Pierre all sorts of stories, but there were these three incidents he could not forget.

A young woman of the Fourteen married an American. They lived part of the year on the family's finca—a sprawling estate, a hacienda, a world of its own, where the couple were absolute rulers. The American developed a taste for peasant women. Often he returned to his own bed only late at night.

His wife was proud and beautiful, like so many daughters of the Salvadoran rich. She knew too well what the gringo was doing, and one night, as he returned to her side, she ordered him to make love. He apologized: He was tired. She ordered. He demurred and she pulled a revolver from the drawer next to the bed and put it to his side and again demanded love. There was none. Of course, there couldn't be. And she shot him through the liver. It took him three months to die. Then his body was shipped back to the States with no questions asked. None would ever be.

Jean-Pierre smiled and shook his head. "They are that way," he said. "They could always do whatever they wanted. It is like another universe."

It is a universe that accepts brutality and loves the trappings of power. During World War Two, its leaders were quietly sympathetic to the Nazis, breaking relations with Germany only under heavy pressure from the United States. Afterward, a certain kind of German found El Salvador—like the feudal Paraguay and Guatemala—a comfortable place to settle.

The final solution held little horror for the Salvadoran powers that were. Although some of the supposed Fourteen were Jews, they understood the need to rid the country of its dangerous socialist refuse. In 1932, some Communists led by Farabundo Marti ignited a peasant revolt. The military government slaughtered at least 17,000 peasants—maybe 30,000; there was no one really interested in counting. To the Fourteen, it was a satisfactory final solution.

Jean-Pierre knew all that. Still, he was surprised when he saw the honor guard in full Nazi regalia escorting a funeral cortege in San Salvador more than 15 years after the fall of Berlin.

Yet he had grown comfortable in Salvadoran society. It was full of comfortable people—articulate, well educated, self-confident and competent in the management of their often vast holdings. Even the decadence had a certain appeal. It is fascinating to be rich in a country where the rich are supremely different from everyone else.

But the dinner party changed all that for Jean-Pierre. It made the comfort and the difference seem despicable. The house was one of the most spectacular in San Salvador. Looking back on it, Jean-Pierre smiled. It seemed incredible. The table was set with the finest silver and cyrstal, of course, but what stuck in the mind was the floor, made of glass, above an aquarium full of exotic fish.

The families gathered there that night would have gone on dining in their accustomed opulence and obliviousness if the troops had not arrived. The soldiers asked at the door and the owner permitted them to come around the side of the house to set up their light guns on the lawn beneath the terrace overlooking the city.

There was trouble below, a student demonstration to be crushed. Champagne was brought out to the terrace, along with such binoculars as could be found, and the ladies in their evening dresses and the men with their cigars flinched a little and called out "Good shot" when the guns went off.

An artillery captain, informed that Jean-Pierre had been in the French artillery, gallantly offered to let him fire a few rounds.

"I shouted at him," said Jean-Pierre, "I couldn't believe it. I went inside. I couldn't watch anymore."

A few months later, he went home to France.

Almost 20 years afterward, as the fledgling correspondent heard the stories, they seemed wicked fairy tales. Over the next year in El Salvador, he looked for the house with the glass floor. Behind the high walls and menacing guards of the rich, he never found it. But killing, guns and that same savage disregard for life were everywhere.

The old Communist was 50, but his face was heavily lined. Salvador Cayetano Carpio had once been a seminary student, then the leader of the breadmakers' union in San Salvador. He gradually rose to be secretary general of the Communist Party. He was arrested and tortured many times. For a while, he lived in Mexico. There were also trips to Havana.

He talked of "guerra popular prolongada," a long war leading like Fidel's from the mountains to the cities. He called himself Marcial. Years later, left-wing Latin journalists would call him the Ho Chi Minh of the Americas.

But 1970 was a bad year for Marcial, and 1971 was worse. In those first two years of the decade, El Salvador was moving toward democratic government. Guerrillas seemed superfluous.

The Christian Democratic Party was steadily building a popular base as a fresh alternative to the military regimes of the past. The Christian Democratic leader, José Napoleón Duarte, had been elected to three successive terms as mayor of San Salvador. In 1972, Duarte was running for president and his party had allied itself with every liberal and leftist opposition group in the country. There seemed no way the coalition could lose. All but the oligarchs and the army were behind Duarte, and even they were letting him run. He had to win.

After he did, the army moved in. The elections were voided. There were guns in the streets. The university was shut down and Durate was jailed, beaten, threatened with execution, forced into exile. Suddenly, in the eyes of so many defeated liberals, students, priests and peasants, Marcial's way appeared, as he had always said, the only way. With new confidence, Marcial gave his group a name: the Farabundo Marti National Liberation Forces. Like all political groups in El Salvador, it came to be known by its initials: the F.M.L.N.

Within a few months, another group was formed as well. Its members were looking for a strategy that was not so prolonged, that would fight not just for the hills but, right away, for the cities. Those guerrillas were younger and brasher and their Popular Revolutionary Army—the E.R.P.—went in for direct fund-raising activities. One after another, leading oligarchs and foreign businessmen were snatched from the streets and ransomed for millions of gun-buying dollars.

The soul of the E.R.P. was a student poet named Roque Dalton. He shared leadership with Ernesto Jovel, his closest friend, and with Ferman Cienfuegos and Joaquin Villalobos.

At first, all were caught up in the excitement of their revolutionary commitment to social justice and democracy. But as one, two, three years passed, Dalton began to have doubts about their tactics. He saw his group becoming a collection of freebooting renegades—saw that for all its rigorous militarism, it had garnered no great popular following. For hours on end, he would debate with Villalobos and others, who began to suspect that Dalton's ideals—and, worse, his ideology—were tainted.

The end came suddenly for Dalton. In 1975, he was given a "people's trial" and summarily executed.

Jovel and Cienfuegos were furious. They broke away and formed their own guerrilla group, the F.A.R.N. Following Dalton's thinking, they believed that organization must be the key to insurrection. The masses must be mobilized.

The F.A.R.N. spawned F.A.P.U. The F.P.L. created the Bloque. The E.R.P. finally created the LP–28. The strength of the left instantly started to grow as unions and peasant groups were pulled together into those new "popular organizations."

By the late Seventies, although guerrillas continued their kidnappings and small-scale assaults on the military, the popular organizations were the new vanguard. New leaders emerged. They were bitter, charismatic young men like Juan Chacón of the Bloque, whose peasant parents were slaughtered by the security forces. Chacón led fights for basic issues such as the price of food. People flocked to him.

From their poster-covered offices in obscure corners of the university—in back of the law school stage, in a little room behind the student-union offices—these lords of the streets could virtually paralyze the country at will. And when they were arrested or tortured, their friends would seize an embassy or call a strike and set them free once again.

Yet they were taken by surprise the day General Romero was ousted. The young colonels who were now in command announced that they were bringing all the popular organizations' intellectual allies, even the avowed Communists and socialists, into the government.

Should a truce be called? Chacón briefly thought so. But to call a truce was to abandon the fight for ultimate power when it seemed almost ready for the taking.

Then, too, the security forces seemed uninterested in the colonels' promises. They denied having any political prisoners. They said they just couldn't seem to find any. And while the generals and scores of other officers were dismissed, many whom the left believed were guilty of countless crimes remained in powerful positions. The killing was increasing, not subsiding.

There was no truce.

The reporter packed up his desk in the vast Washington newsroom, sorted files, made an occasional phone call, getting ready to head south. He needed to know more about the new Ambassador the Carter Administration was sending to El Salvador.

It seemed this Robert White would have a tough time with conservatives at his confirmation hearings. He was Ambassador to Paraguay and blasted the corrupt old dictatorship there for human-rights abuses every chance he got. Now Senators who thought dictatorship was a useful ally against international communism would get a shot at him.

The Carter people at State thought White was just what they needed in El Salvador. He was tough, outspoken, direct, a perfect point man for the Administration's plan. The reporter called one of his friends, a liberal Senator's aide. They talked about how hopeless the Salvadoran situation seemed, how relentlessly bloody and confused.

"White has a lot of enemies already," said the aide. "I don't know what to make of it, but, you know, there are some people saying he's being sent down there to end his career."

Soldiers who heard the tape recording laughed like children who overhear an adult's obscenity. La Puteada, they called it, a kind of "——— you song" the military high command used to force out all the civilians

in the government ten weeks after bringing them in.

It was never a comfortable union. The civilians blamed the military for continuing violence and repression. Especially they blamed the minister of defense, Colonel José Guillermo Garcia, and his tight-knit clique in the high command.

Garcia was a short round-faced, quick-smiling man with a large, unsightly mole on his chin. He was about as physically unimposing as anyone who wore a uniform. But he was part of the old order. At one point, before General Romero edged him out, Garcia seemed to be in line for the job of president-dictator. Moderate leftists both inside and outside the government believed he still wanted the job. They wanted him out and they wanted all the armed forces restructured.

With tacit backing from Colonel Majano, the civilians tried to foster a kind of democratic council of young and low-ranking liberal officers to which everyone in the armed forces would be accountable.

It was a bad move. It gave Garcia all the excuse he needed.

The Salvadoran army has a fixation about its integrity. Many of the soldiers who supported the ouster of the generals were lukewarm on the reforms supposed to follow. But they saw that the corruption of the high command was damaging their beloved institution. They also saw that the civilians in the government were getting nothing done and now those same civilians were openly attacking the entire foundation of the army.

The showdown came at the end of December. The cabinet and the junta were meeting when suddenly commanders from all over the country marched in and seated themselves around the room.

The commander of the Guardia Nacional, Eugenio Vides Casanova, stood up and told the civilians that they were sons of whores, unfit to govern anything. The military, he announced, would not listen to them, would not follow them, and gave its entire allegiance to Garcia.

The civilians were shocked. Some were terrified. What did the armed forces want them to do? For days after the confrontation, they went around asking the question. But the army didn't want them to do anything except get out. It was already negotiating with the Christian Democrats to replace them.

Afterward, White would say that the civilians in the first government were the best people El Salvador had to offer. But by then, most of them were on the side of the guerrillas.

The Pentagon had an idea. Zbigniew Brzezinski on the National Security Council liked it. The Central Intelligence Agency thought it seemed logical and was putting together information that made it seem more so.

A Deputy Secretary of Defense told Congress there was "evidence of Cuban efforts to orchestrate Communist movements in Central America." He didn't say what the evidence was. "There are also indications that the Cubans currently appear to be involved in the situation in El Salvador." He didn't say what the indications were, but he had begun laying the groundwork for the new idea.

It was quite simple—send American advisors down to show the Salvadoran army how to fight guerrillas while, of course, respecting human rights. Send them transportation and communication equipment to help them fight more effectively. (They already had plenty of guns.) Generally, shore them up, then let them go out and clobber the agents of international communism.

White was livid. Not yet Ambassador, his confirmation stalled by Senator Jesse Helms of North Carolina, he already found himself in the middle of a policy showdown.

"The Pentagon has this driving need to get in there and show they can win a guerrilla war," he fumed in private.

The Salvadoran armed forces were butchering people in wholesale lots. They had destroyed the best chance for a political solution by ousting the civilians from the first coalition. The Christian Democrats were already dividing in the second junta because their paper agreement with the colonels proved, within weeks, to be nothing more than that.

And now the Pentagon, with information that some of the guerrillas had been trained in Cuba—ignoring the fact that they were ill-armed and their support among the people, their real strength, would only grow if the United States endorsed the bloody excess of the military—wanted to give the military everything its chiefs desired.

White was supposed to oversee this lunacy?

"If we are prepared to back a government this shaky," he told a friend, "we have to look at what our options are down the road. I believe that 75 percent of this is political within the United States—a fear by the Administration that it will be accused of 'losing' something else like it 'lost' Iran, Nicaragua and the Panama Canal."

Six American advisors had secretly been sent to El Salvador for a few weeks in November. Now there might be 36. That, White and his allies in the State Department were convinced, would be only the beginning of a new quagmire in Central America. There would inevitably have to be more and more advisors.

If any U.S. troops went in, White made it clear, he would not.

The El Salvador international airport was completed in the last few months of General Romero's rule. It stands gleaming white and modern on the costal plain, surrounded by the tidy plots of farmland. San Salvador, the capital, is 40 miles away, but the beaches are right at hand. The airport was intended to service international tourists flocking to the wide expanses of gray Pacific sand.

But on the day the young reporter arrived in mid-February, the airport was all but deserted. The only crowd was at the ticket counter for outgoing planes. Anyone who had enough money to get out was leaving El Salvador and, if they were smart and could afford it, they took everything they had with them. Well-groomed men in dark business suits stood waiting, while their bodyguards—square-built thugs wearing dark glasses and carrying briefcases—watched over them. At the boarding area, a sign advised passengers that they would be searched lest they carry guns on board "by accident."

The superhighway leading from the airport to San Salvador dissolves in dirt after about ten miles and taxis must take a seemingly endless, twisted road to complete the trip. The reporter thought about ambushes all the way to the hotel. By the time he got there, he wanted a drink.

At the bar, a pudgy, pig-eyed man with small hands and an obscene voice sat down on the stool beside him. The man laid a wrist wallet showing the butt of a .38 Colt on the bar.

"You always carry that?"

"I am a wealthy man. I take precautions. In my car, I have an UZI. You know the gun?"

The reporter looked down into his drink and the man started telling anyone who would listen what whoresons the members of the government were.

"Well," said the reporter cautiously, "where would you say you are on the political spectrum here?"

The man stared. He would have seem ludicrous if it weren't for the pistol. "I am not capitalist. I am not Communist," he said in his whiny voice. "I am National Socialist. You know—a Nazi."

The reporter cut the conversation off as quickly as he could. It was too much. El Salvador was not a nation of Nazis. Nothing was as simple as that. But already he was being confronted by the mad bitterness, the striving after simple, final solutions. "We must kill all the snakes," said the man.

Old money was more tactful than that. The Fourteen were more secretive and more subtle in their schemes, even if the end were the same. But this was a self-made man, the kind who couldn't get out to Miami as the Fourteen could. He was a madman trapped in a madhouse—believing that murder was the only way out.

Hundreds of people—most of them poor, some in rags—came to listen to the soft, humble voice of the archbishop. There were also some in the crowd who carried notebooks and tape recorders, and at the beginning of his homily, the gray-haired little pastor made what seemed a joke about people who thought "our Masses were more political rallies and that people came out of political curiosity." But this was a serious matter.

"What I intend is in no way to make policy," said the archbishop. "If because of the need of the moment I am illuminating the politics of my homeland, it is as a pastor reading from the Gospel."

Archbishop Oscar A. Romero made that statement in various ways countless times. But there was little doubt that his was the most powerful political voice in the country.

Few priests have ever been so intensely loved or hated. To many of the poor, he seemed a saint. Visiting the shacks that smothered the ravines in the capital, the hovels made of sticks in the countryside, Romero brought the people hope. To the radical left, he was not only an ally but an authority, a figure of international standing—and also a moderating force they found nowhere within their own ranks. To the right and much of the military, he was a Communist demagog.

His platform was the pulpit of the Metropolitan Cathedral, perhaps one of the ugliest buildings in the world. He left it unfinished because he felt the money was better spent on the poor. Its concrete-and-brick had faded, and rusting iron reinforcing rods protruded from its spires. Where stained glass might be, there was only corrugated fiberglass, its only design the random points of light left by bullet holes.

On this Sunday, the archbishop had heard that the United States might be sending men and military equipment to the Salvadoran government. He had written a letter to President Carter and he read it to his people. The aid would only make things worse, he said. The Salvadoran military was already killing more people than under any previous regime. If the equipment being sent was, indeed, designed to make the soldiers more efficient, whether the equipment itself was lethal or not, then they would only be able to kill more people with more impunity.

"I hope that your religious sentiments and your sensibility for the defense of human rights will move you to accept my decision," Romero wrote to Carter, "thereby avoiding a greater spilling of blood in this suffering country."

To the extent that he could, the reporter ignored the burst of gunfire outside the hotel. He sat on his bed, watching El Salvador's newest television star—a slight, muscular man, a young-looking 40 with thick black hair, who sat behind a studio desk asking his countrymen why so many Communists were still in the government.

Before the October coup, Major Roberto D'Aubuisson was chief of intelligence for the Salvadoran Guardia National. He was reputed to have a rather rough way of ques-

tioning people, and some of the officers who seized the government from the generals thought D'Aubuisson might have been planning his own right-wing coup at the time, so they discharged him along with the old high command.

Instead of retiring, however, the major went straight into politics. Taking advantage of the new freedom of speech, his backers bought him television time every few nights to blast the liberals in the government and identify the Reds.

D'Aubuisson was well trained to track down Communists. He had studied at the International Police Academy in Washington, D.C., before the Congress found out torture was on the curriculum and shut it down. He went on to refine his antiterrorist techniques with the police in Uruguay and Taiwan, then briefly did a stint with the U.S. Green Berets in Panama during the early Seventies.

Few people would have guessed that he would be so charismatic on the screen. His appearance and his opinion quickly made him the darling of the conservative Salvadoran middle class. After years of living in the shadow of the oligarchy and struggling their way up through any opening in their country of limited opportunity, the burghers of San Salvador had finally found a voice. The left never took them into account—the guerrillas wanted their war to be a class war and the bourgeoisie was the incarnation of evil. The middle class was small, but it had grown in the past decade as El Salvador began to industrialize; and now that most of the Fourteen had abandoned the country, it was up to the middle class to save it. They were being kidnaped and killed, and as far as they were concerned, they were at war. D'Aubuisson might get money and guns from the Fourteen in Miami, but he had the hearts of middle class.

Tonight he was talking about the Communist reforms the junta was getting ready to announce and he was focusing attention on the Christian Democrats in particular. This man, Mario Zamora Rivas, was a Communist. Why was he allowed to serve as a minister of the government, as the "attorney general for the poor"? Why do the great Salvadoran people endure a travesty?

Children climbed trees to look over the crowd and down through the shattered windshield of the car. The reporter squeezed among the cluster of spectators. Through their sweat came the butchershop smell of the corpses.

Two women had already been taken to the hospital. There was no rush for the men. One in the back seat of the little Toyota was slumped over on his side. Puckered, dime-size holes showed through the torn fabric of his shirt. The man sitting in front of him in the driver's seat was apparently the main target. There was nothing left of his face. An eyeball hung in the vicinity of what was once his cheek. There were some teeth visible in that general area. But so many heavy-caliber bullets had been pumped into his head that it had collapsed like a melon rotted in the field.

The reporter wanted to find some way of putting meaning to what he saw. That was why he had come out here. The only dead he had ever seen before were relatives in funeral homes, the embalmers' wax replicas of people he had known. He wanted to see death as the Salvadorans saw it.

But death, presented like this, on a street full of the curious in a quiet suburban section of the city, without mourners, without even the trappings of officialdom—there were no policemen, no medics—seemed meaningless. The reporter found himself thinking, like the children around him, could he look at it again? He could. He could have looked at it all day, if there had been any point in that. There was not even a story in these deaths. Murder on the streets was a commonplace, not news at all, in El Salvador. But the reporter began asking questions of the bystanders.

It seemed a pickup truck had pulled in front of the little car and slammed on its brakes. Two men riding in the bed stood up with automatic rifles, G-3s, the kind the army used, and started shooting.

The killers had lingered a bit at the scene. One had drawn a large skull on the wall beside the car and another had taken a glob of the driver's brain and lobbed it into the middle of the drawing—a little message from the Union of White Warriors.

But why were these men killed? An old woman said they had worked for the attorney general of the poor. One of them, the driver, may have looked a little like Mario Zamora. "But they were just clerks on their lunch hour," said the old woman. "They never got involved in politics."

Apparently, the message had gone to the wrong man.

The party was still going on at one in the morning. Most of the Christian Democratic leaders were there telling political jokes and stories while Zamora or his wife kept their glasses filled with Scotch. It took a while for everyone to relax, but they had protection—their bodyguards were stationed near the door.

The death squad came in through the skylight. There were perhaps a half-dozen men in all, but nobody remembers very clearly. Everybody was ordered face down on the floor. One by one, the partygoers were asked their names.

"We don't want to make any mistake," said a gunman. "What's your name?"

"Mario Zamora Rivas."

"Get up. Come on."

No one heard any shots. The gunmen left. When Zamora's body was found in the bathroom, he had more than a dozen bullets in his head.

The Christian Democrats flatly blamed D'Aubuisson for the murder, and privately they said his tactic was obvious. He was trying to intimidate or eliminate anyone who might be a bridge to the moderate left, who might be able to begin negotiations for a peaceful settlement. If he could force them out of the government altogether, he would succeed.

Already the Christian Democrats were badly split. Zamora's death was the final blow for some members. Héctor Dada Hirezi, one of the two Christian Democrats on the junta, resigned from the government and the party and left the country. He was replaced by Duarte.

The military promised a thorough investigation of Zamora's death. No suspect was ever found. There was, in fact, no investigation.

The rhythm of killing was approaching some kind of climax, but it was impossible to say what that would be. The left had slowly pulled its ranks together. All the guerrilla factions except the E.R.P. had joined a coordinating directorate. The leading civilians from the first junta formed the Democratic Revolutionary Front to lobby for world-wide support of the rebels.

Although the Salvadoran government finally began its reform program in March 1980—after nearly six months of unfulfilled promises—the archbishop was edging ever closer to endorsing insurrection and he continued to blast the government at every opportunity. The reforms were good, he said, but they had to be taken in "the context of the dead and the annihilation."

Something was going to happen, but the reporter was sick and would not wait for it. After only a few days, he returned to the apartment he kept in Mexico. He telephoned the woman in the United States he had been seeing—or trying to see—for more than a year and, on impulse, they decided to get married immediately, before some new horror show dragged him back to El Salvador. It would take just four days in Philadelphia for the blood tests to clear and the papers processed.

He didn't tell the office where he was going, just that he would be gone. When he saw his bride-to-be at the Philadelphia airport—how strange and quiet and peaceful even that crime-ridden city now seemed to him—he told her that nothing could stop them from marrying now except . . .

"They're going to kill Romero. I don't know when, but soon. If it happens this weekend, I'll have to go back down. That's all there is to it."

It seemed, in Philadelphia, so melodramatic to say that. It was just a feeling, after all.

D'Aubuisson's failure to carry off a February coup against the Christian Democrats was a setback, but hardly a defeat. His people reorganized and now, as the Presidential race in the United States was fully under way and Reagan took the lead, they were regaining confidence. Some of them already had contacts among Reagan's entourage who recognized the danger of letting communism sweep over El Salvador and saw what quasi-Communists the Carter Administration had put in power.

Men in the Senate like Helms and his staffers understood the danger and could be talked to. This was a time of phone calls and meetings, a time to build a base of political backing in what D'Aubuisson and his people were sure would be the new administration.

But there were other things to be done as well, and to be done right now, before the chaos worsened and the left had the guns to mount a full-scale insurrection. Notes made by D'Aubuisson and his friends at the time refer to something called Operation Pineapple. A gun was bought—a .22-caliber rifle with a telescopic sight. Money was deposited in a Miami bank account.

There is a hospital for the incurable in San Salvador. The archbishop lived there and often said evening Mass in the adjoining chapel.

This night there was a special service, a memorial Mass for the mother of one of the few leftist publishers still in the country. It was a pleasant evening, with the doors of the chapel open, as always, to let the cool night breeze circulate.

In his Sunday homily the day before, the archbishop had denounced the violence of both the left and the government, but, as so often happened—because there were so many more examples of government violence to cite—he had seemed to be attacking only the regime. More boldly than ever before, he had made an appeal—a demand—for the violence to end. He had directed his words to the troops: "I ask you, I pray you, in the name of God, I order you to stop the repression!"

But this evening his words were quieter. He talked of the need for any Christian to involve himself in the world, despite the risks. "He who wants to withdraw from danger will lose his life," said the archbishop. But the person who gives himself to the service of others will be like a grain of wheat that falls to the ground and dies—but only apparently dies, for by its death, its wasting away in the ground, a new harvest is made.

The archbishop prepared the Eucharist and raised the chalice to God.

He never saw the gunman just inside the chapel doors.

An awkward calm settled over San Salvador in the days following the archbishop's death. Everyone was waiting for the funeral on Sunday, but the violence did not increase.

Chacón warned his people that they were

being tempted into a trap. Stay quiet, he said, the government is trying to produce an insurrection before we are ready. The spontaneous uprising never came, but the tension remained, a palpable bitterness and despair settling over the barrios.

Conservatives openly gloated. Of course, they didn't approve of murdering priests, they said, but one had to admit that Romero got what he deserved. When you put yourself in politics in this country, you have to expect this kind of thing.

Ambassador White had been in El Salvador for three weeks. A personally conservative and religious man, a New England Irish Catholic whose faith was somehow strengthened by decades in Foreign Service posts where suffering was always visible. White was appalled at what he saw in El Salvador.

"When we have cuerpos de seguridad who commit more crimes than they solve, it is a very sad situation," he said. There was no applause that week when he appeared before a chamber-of-commerce luncheon. It was not a friendly audience and White was not friendly to it.

"The violence in the countryside continues," he said. "The excesses of the security forces continue," causing disaffected workers and peasants to join the ranks of the militant left. "They are being killed and tortured and I have talked to them and I know who is doing it."

White looked around the room grown arctic with silence. Reporters at the rear began furiously taking notes.

The series of right-wing assassinations was an abomination, White continued. What was gained by the killing of Mario Zarmora? By the murder of the archbishop? By the killing, just today, of Juan Chacon—

Several reports dashed out of the room to telephones.

Chacon dead? They began checking furiously. He was not dead. He was at the university, as surprised as anyone at White's remarks.

The import of White's speech that day was lost in embarrassment and backtracking. He had been assured at least twice that morning his military and intelligence people that Chacon had been killed. They had either lied to him or been lied to by their Salvadoran contacts. Either their information was grossly erroneous or someone was setting White up for a fall.

Palm fronds waved above the heads of the crowd. It was Palm Sunday. The reporter had forgotten.

People were everywhere, filling the cathedral square and spilling over into the side streets. Many, perhaps most, were women and children—50,000 mourners for the archbishop. A folk choir sat around the coffin on the cathedral steps, singing, "You are the God of the poor." No troops, no guns were in sight. The only people in uniforms were boy scouts manning the ropes that kept the crowd off the sidewalk in front of the high steel gate at the bottom of the steps. The morning sun was hot, and near the rope, where the crowd was most tightly packed, women were fainting.

The funeral oration was begun. A Mexican cardinal delivered a long, droning message of Christ that carefully sidestepped all the volatile issues once addressed by the man now lying in the heavy casket. Above the coffin sat the archbishop's chair, symbolic and empty.

The reporter listened awhile from the shade of trees at the corner of the cathedral, then moved out onto the sidewalk in front of the fence.

A cheer went up from the crowd. The muchachos—"the boys"—of the popular organizations had arrived after marching through the city. The crowd somehow managed to pull apart to let them through. Many of the boys and girls wore kerchiefs over their faces, and some carried banners. Many others carried the plastic bags and satchels and the long, thin boxes that the reporter knew from experience held Molotovs, pistols and rifles. At the sides of the crowd, two embassy officials observing the funeral decided to return to their offices.

The cardinal kept speaking. A wreath of plastic flowers in the yellow-and-red colors of the Bloque was passed forward above the crowd and placed on the coffin. Another cheer went up. The muchachos raised their fists in salute and chanted a revolutionary slogan. The cardinal paused a moment, then went on.

An explosion.

Everyone turned to see where it came from—somewhere near the closest corner of the National Palace diagonally across the plaza, leaflets were floating through the air. The muchachos often used little bombs to launch their propaganda above the heads of a crowd, but this——

Another explosion. Another. A quick burst of shots.

The only place for the reporter to go was over the fence and he surprised himself with his speed as he vaulted it. He shouldered his way up the stairs through the crowd of clerics, but at the top, the priests blocked his way.

Panic had swept the crowd. Shots were going off everywhere now and people were running, most of them toward the cathedral steps.

The priests seemed oblivious to what was happening. "Calm down. Calm down," they said to the wailing masses. "There's nothing to worry about."

Automobiles exploded at each corner of the plaza, sending liquid flame spreading out across the pavement. The barrier rope had disappeared and now hundreds, thousands of people were pressing against the fence. It was still locked. Some were making it over, but many were not. Old women were being crushed to death, their faces squeezed between the bars.

The screams, the shooting, the bombs were deafening, and the priests—their cries for calm now altogether lost—fell back into the cathedral, stumbling, knocking over the archbishop's chair, some of them trying to drag the coffin with them. The reporter made his way to the stairs leading into the choir loft and spires, but they were already blocked by masked muchachos, pistols drawn.

The gates were forced open and people poured into the cathedral. Desperately, they sought out friends, relatives, some touch of safety. Within minutes the cathedral was so crowded that is was impossible to move. Men who stripped off their shirts and twirled them above their heads to keep the air circulating found themselves so tightly pressed they couldn't get their hands back down to their sides. Childen were lifted onto shoulders.

Behind the reporter, an old man was expiring. The people around him were shouting for room. The old man was naked from the waist up, his chest deformed, his eyes staring at nothing. For 30 minutes he was wrestled through 20 feet of crowd toward one of the areas in the church more exposed to bullets but with more air to breathe.

On his hands and knees, the reporter worked his way up the stairs past women and children and old men who were praying amid the rattle of machine guns and the blast of Molotov cocktails pushing in at them from outside. Finally, in a choir loft, he could begin to study the situation. Most of the shots were outgoing. The muchachos were blasting away from all three entrances to the cathedral and from high in the spires. Others were prone in the street, firing at any sound or movement. Some were children, perhaps ten years old, almost overwhelmed by the pistols in their hands.

Everyone's immediate fear was that the military would appear and start firing into the building or even invade it to clear out the snipers. But the army, the police, the Guardia were nowhere to be seen.

The shooting died out slowly in the cathedral square and slowly, very slowly, people began to trickle outside. Smoke from burning cars still hung heavy on the scene. The reporter looked at the shoes piled near the fence where their panicked owners had lost them, at the leaflets with Romero's face on them, at the bodies. Volunteer rescue teams had appeared. They were loading unconscious mothers and grandmothers, old men and boys—the possibly alive—into trucks and ambulances to be taken away.

Off to one side of the cathedral was a muchacho who had seen a photographer taking his picture when the shooting started. He had struck a revolutionary pose with his Molotov and it had blown up in his hands. Now he lay on the sidewalk, the bones showing at the stumps of his arms, a hole under his chin where a bit of shrapnel had entered, the back of his head gone and the brain spilling where it had exited.

Perhaps he had spun around as he fell or perhaps somebody had come along later and done it. The boy's body was wrapped in a banner of the popular organizations.

The debate about who, how, what had started the massacre would go on for months and never be resolved; but in the end, the question was irrelevant. Anyone could have started the madness and the panic that day. It was the culmination of so many months and years of fear and hatred and hopelessness, and it ultimately made the hopelessness worse. These were the boys who were asking for the people's faith, who were preparing to lead them in a glorious revolution, and the boys had panicked with everybody else. They had kept firing long after there was anything to fire at—if, indeed, there had ever been—and more than 30, perhaps more than 40 people lay dead for nothing.

A goal of the terrorism all along had been to make the people cry out, "Basta ya!"—Enough!—bring us peace, no matter what you have to do. The guerrillas thought "the masses" would believe, as they did, that insurrection was the only answer. The rightists were certain that the great people of El Salvador would support a ruthless crackdown on the troublemaking Communists. But no side looked as if it could win quickly or would deliver what it promised if it did. The people turned inward and with resounding apathy said to their would-be saviors, "To hell with you all."

But the patterns of power-grabbing competition within the government, the embassy and the left continued. They were well established by April 1980 and over the next eight months, the militarists would be strengthened on all sides. Within the government, the pre-eminence of Garcia and Gutiérrez would continue to grow. At the embassy, the Pentagon would find ways to work around White and, in deference to President Carter, put a human-rights veneer on its initiatives. On the left, the popular organizations would steadily lose their power to mobilize the masses, but the guerrillas themselves would begin to get the guns they had wanted and needed for so long.

This was a waiting time, the period of "the phony war," as one disillusioned Marxist called it. The casualties were real enough, but there was a growing consciousness on all sides that each little maneuver, each little skirmish, might be used to influence world opinion.

Delegations of civilians who had once served in the government and now sided with the guerrillas traveled all over the world to establish links with Social Democratic parties and convince potential Western friends that the regime the insurgents

wanted would be a democratic paradigm, not a Marxist dictatorship. Duarte and his party lobbied the Christian Democrats of Europe and South America, looking for allies to join the United States in its support of their regime. They were embattled moderates, they said, caught between the extremes of a Neanderthal right and a Pol Pot left, but the reforms were winning them more support every day and their troops had the country under control. D'Aubuisson and his followers traveled mainly to Miami and Washington, with occasional side trips to the sympathetic regimes of Guatemala, Honduras and the southern cone. All they wanted was a real democracy like the one described in the U.S. Constitution, where free men could work and thrive in a truly capitalist economy.

The left was easily taken care of, they said—it didn't have the support of the people. It might be necessary to use some severe measures against the subversives and their sympathizers for a while, but that was the price you had to pay for freedom.

The hotel was as empty as it had ever been, and after five days in El Salvador, the reporter was glad to be getting out. It was Thanksgiving Day. He tried not to think about it, just listened to the radio as he packed his bags.

"We have it confirmed," came the voice breaking into the music, "Enrique Alvarez, Juan Chacon and four other leaders of the Revolutionary Democratic Front have been arrested."

Jesus, there was no getting out of here.

The reporter called everyone he could think of—Church officials and Garcia, White and the commander of the embassy military group. It was the usual culpability merry-go-round.

The Church claimed that the Democratic Front leaders were getting ready to hold a press conference when men in civilian clothes backed up by uniformed troops broke in and dragged them away. White and Duarte said it must have been right-wing extremists trying to destablize the regime—but they didn't rule out the chance that some of the security forces helped. Garcia said he had no knowledge of any arrests and had no information on the incident, which had taken place at a Catholic boys' school in the center of the capital. Later in the afternoon, after calling around to all the cuartels, he would refine his statement to say there had definitely not been any arrests and the military had had nothing to do with the affair.

There were no clear answers, but the consequences were extreme. In the next few hours, the bodies of the revolutionaries, strangled and shot, were found littered outside the city.

Already the Christmas Muzak drifted through the hotel bar as the reporter sat talking with Jean Donovan and Dorothy Kazel the day before the funeral. The left was trying to explain away the expected small turnout—people were going to show up but not really in force, because you know what happens under this genocidal government and there is no point in having your people slaughtered needlessly. Dorothy and Jean, who spent most of their days with the peasants around La Libertad, were skeptical of the relationship, but they were in constant contact with the fear.

Dorothy was a nun, but the kind of nun one meets so often in Central America. More frequently than a habit, she wore blue jeans and a checked shirt. Jean was younger, a lay worker who looked like a nun. It wasn't their clothes that made them so obviously religious women, it was their manner, their smiles and their thinking—their seemingly boundless concern about other people's suffering.

"Things have changed so much in the past year," said Dorothy. "There's such hatred everywhere."

The reporter called it an atmosphere of vendetta. Everyone was looking for some kind of revenge. Often, he said, the clergy were vulnerable targets.

"We're OK," said Jean. "The safest person in El Salvador has to be a blonde, blue-eyed gringa."

The reporter was called to the phone and Dorothy and Jean decided to leave. They waved goodbye as they went out the door.

"Let's stay in touch. . . ."

"I'll call you in a few days," said Dorothy.

Robert White knew what he was going to see and he dreaded it. The black bulletproof Cadillac and its two chase cars drove on and on through the parched dry-season countryside. For a while, they seemed headed for the airport along the winding, rough-surfaced little road. Another time, White might have been concerned about the possibility of an ambush laid out from the high banks on either side of the narrow pavement. But he hardly thought of such things anymore. It wasn't worth it. The security men would worry about that. So far, no attempts against him had come even close. He had luck or Providence to thank for that, he supposed. Sometimes it occurred to him that he had been taking up an inordinate amount of God's time since he arrived in El Salvador.

He wanted to get there. That was all he cared about. Get there and see who the gringas were in the shallow grave, hoping—— But there was no hope. He knew who they were. He and everybody at the embassy had been calling everywhere for more than a day. The military had said it had no information. Finally, the Church had gotten a tip.

Two of the women had stayed in White's house just two nights before. They had come over for dinner with the priest they worked with and they had stayed up too late to drive all the way back to La Libertad. So White and his wife had asked them to stay.

It was just the next night that they had gone to the airport to pick up Sisters Ita Ford and Maura Clarke, and then they had just disappeared.

The Cadillac turned off the airport road and headed east toward—what was the name of the little town?—San Juan Nonualco. There were other little villages on the way. Peaceful. Ordinary. As if nothing had

The violence was widespread but so viciously selective. Graham Greene had written about such things. "Cruelty swept through the country like a spotlight." The Ambassador had been reading and rereading Greene. The books seemed to say a lot about White himself, about his God, about these people—"the torturable class." It had once seemed that certain people were immune to the viciousness, but now anybody, everybody was eligible. Torture had become a great equalizer.

The Cadillac stopped among the reporters' cars plastered with signs telling the world they were PRESS, as if that would do any good. They were clustered around a mound of dirt in a little patch of land like all the other little patches of land, dry and dusty, with a few trees and bushes.

The grave was opened and there were a couple of Guardia standing around, watching nothing in particular, and an officious little justice of the peace who had to oversee such things and the reporters and photographers wondering whether or not to look—not knowing not to. The smell of the dead ran like a poisonous current through the still air.

One by one, the bodies were pulled out. Jean. It must be Jean, but her face had been exploded by a bullet in the back of the head. Her pants were half unzipped. Her underwear somehow hung from her ankle. Now Dorothy, Sisters Ita and Maura, being dragged like sides of meat from the pit.

Reporters were talking to White, but he didn't hear. He turned and stared at the Guardia, the little judge, the camera crews, stared all around, trying to control himself.

One day after the nuns' bodies were discovered, all United States aid to El Salvador was temporarily suspended. A special commission was appointed in Washington to go down and investigate what appeared to be a cover-up of the killings. Every bit of the evidence that existed, and there was not much, pointed to members of the security forces—most probably the national guard—as the murderers. They had set up a roadblock where the nuns might have been stopped, and it was clear that the military in the area knew where the nuns were buried but had said nothing about it in answer to the embassy's inquiries.

"They've got an old-boy network," said White. "They know damn well who did it, but they're not saying."

More than moral indignation was at work here. There was also coldly observed political opportunity for the Christian Democrats to gain the upper hand in forging an agreement with the army. They would have the full backing of the United States and they might at last force the military to clean its ranks from the bottom to the top.

The right saw an opportunity as well. D'Aubuisson returned from Guatemala. Reagan was already President-elect of the United States. If D'Aubuisson's friends in the military could just hold out a little longer, another six weeks, then the Reagan Administration would take office and the pressure would be off.

All the powers in the country were moving to take advantage of the regime's confusion in the wake of the killings. Some changes were bound to take place and some officials were going to lose out.

The first to go was Adolfo Majano.

He had dithered and plotted for too long and, in his frustration at steadily losing power, he had begun to make thinly veiled criticisms of the high command. Majano was a chess player, one of the best in El Salvador, and he played politics like he played the game—full of infinite calculation and subtle maneuvering. But in Garcia and Gutiérrez he was up against a pair of linebackers who simply threw over the board. At a secret meeting of the military's commanders—to which Majano was not invited—a vote was taken and by an overwhelming majority, they voted to remove the colonel from the junta. He was assigned to an insignificant diplomatic post, the usual exile, the kind so many of his former backers had gone to. Instead, he went into hiding.

White was calling on all his powers to resolve the crisis in the Christian Democrats' favor. But his powers were waning. Word had leaked in Washington of a Reagan transition-team "hit list" that named White as one Ambassador sure to be sacked. He appeared a lame-duck envoy of a lame-duck Administration and El Salvador's conservatives saw less reason than ever to listen to him.

White sent a steady barrage of cables to Washington, asking for public support from Reagan's people. For a while, he seemed to get it. Reagan foreign-policy advisor Richard Allen said on national television that the Reagan Administration would continue to support a moderate, reformist regime in El Salvador.

But, at the same time, Cleto DiGiovanni had come to town. He was not exactly a member of Reagan's team, but close to it. A former CIA man, D'Giovanni had contacts with Reagan's advisors on Latin America

as well as with D'Aubuisson's people in El Salvador. White was not sure what DiGiovanni was telling those people, but he suspected—and many of the D'Aubuisson crowd believed—that the hidden message he brought was exactly what they wanted to hear: "Do what you want and need to do. The Reagan Administration will back your play."

One by one, the officers walked into the Casa Presidencial with their pistols drawn. The reporter standing in the doorway of the waiting room got a little nervous. He walked down to the guard post to see what was happening and, to his relief, saw a long table piled hight with pearl-handled .45s and customized .357 Magnums, UZ's, nine-millimeter automatics with extra-long clips. Good idea to leave them down here, he thought. Somebody might get angry.

Upstairs on the balconies above the tropical courtyard, the final decision on the new structure of government was being made. Majano was now officially out. The four other junta members would remain in place, but Duarte would get the title of president. Real power would remain, however, with Gutiérrez, now the vice-president and commander in chief, and with García, still ensconced as defense minister. All that would be made public later in the day. There was another, secret agreement—the price the Christian Democrats demanded for staying in the government.

Certain key members of the military would have to be removed from their commands. Most prominent on the list was deputy minister of defense Nicolas Carranza. A year before, he had voted against bringing the Christian Democrats into the junta. He wanted a military regime with technocrats handling day-to-day administration. That was close to the D'Aubuisson scheme of things and the Christian Democrats suspected Carranza of being their most dangerous opponent within the army. He would have to go in January.

At the same time, a couple of other commanders would be relieved of their posts, and by the beginning of February, the chief of the treasury police was also supposed to go.

It was not an agreement the soldiers liked, but it would do for the moment. And, some considered, it could always be amended.

They picked up their guns and left.

"Let the Yankee Pentagon make no mistake. If it attacks the Salvadoran people, it will have another thorn in its side."

The Havana auditorium erupted in long, enthusiastic applause, and Salvador Cayetano Carpio stood back and soaked up the adulation. After so many years underground, the 60-year-old guerrilla leader was at the peak of his power, speaking before his socialist brothers at the second party congress of Cuba. Representatives were there from all over the Communist world, and he wanted to thank them for the help that was going to make his revolution possible at last.

For months now, arms bound for El Salvador from Vietnam, Ethiopia, Cuba, Eastern Europe and the Soviet Union had been flowing into Nicaragua—so many that bottlenecks were forming. They couldn't be moved fast enough. But they were on their way nonetheless and the Salvadoran guerrillas—with all the people behind them, they said—were going to present Reagan with an "irreversible military situation" by the time he took office on January 21.

"Revolution or death!" shouted Carpio.

"Viva Salvador," screamed the crowd. "Viva!"

But later, when the first shots of the long-awaited "final offensive" came, they missed pretty badly. A guerrilla squad attacked Ilopango, the military air base just outside San Salvador, with some newly arrived American-made, Cuban-supplied recoilless rifles. Every round they fired soared over the barracks, over the planes and helicopters they were trying to hit and over the long, broad runway to land harmlessly in a weed patch on the other side.

It was not an auspicious beginning for the guerrillas and things would get worse. The government army was supposed to split. Except for a few minor incidents, it stayed united. The people were supposed to rise up en masse, as they had in the Nicaraguan revolution, to build barricades and hit the soldiers hard wherever they appeared. But the people did not rise up. Attacks were mounted on cuartels throughout the country and the guerrillas demonstrated a level of coordination they had never shown before. But not a single cuartel was taken.

After those first few days in January 1981, the guerrillas declared that the final offensive was actually a general offensive. It really wasn't supposed to be final at all, just a beginning.

It was that. The phony war came to an end with the attack on Ilopango airport. In San Francisco Gotera, where some of the heaviest fighting took place, bodies lay rotting on the streets for days. They were burned to help kill the stench and disease until there was nothing left but charred meat on sets of ribs and femurs with perhaps a recognizable foot attached. The same scenes were repeated in Zacatecoluca, in Suchitoto. Soon the countryside would be nothing but deserted fields and clusters of buildings become bullet-riddled ghost towns.

The reporter was sick of it. The bloodshed, the venal idiocy of it all. It meant so little, finally. At least 13,000 people had died in El Salvador since his arrival there almost a year before. One could play games with a statistic like that, could say that proportionate to its population, the United States would have to lose 500,000 people to political violence in order to sense the same social and human cost.

But, of course, death isn't measured that way. Numbers of corpses don't count until you know one, or two, or a dozen of them, or, at least, until you can see them as some part of yourself—as an American or as a journalist or as a nun. There are cynical axioms in the newspaper business to cover such things. One dead hometown boy is worth ten dead Englishmen is worth 50 Australians is worth 200 dead Chinese or Indians on Salvadorans or. . . .

But even the Salvadorans came to look at the numbers of the dead with a numb, sometimes vicious detachment. In their less discreet moments, some of the more extreme rightists would talk of the need to kill 200,000 leftists in order to clean up the country. No one was immune anymore. Everyone was somebody else's Communist or imperialist. No place was safe.

The war had become so much bigger than El Salvador. It was a symbol of the new battle between East and West, and individuals get lost in symbols. After the United States voted in November 1980 to make America tough and strong once again, to bring back its respect, no politician in Washington wanted to be remembered as "the man who lost El Salvador" in the face of the Kremlin's maneuvering.

Robert White tried in his sometimes clumsy, sometimes belligerent and excessive way to keep perspective. In his mind, the issue should have been whether anyone in Washington wanted to be remembered as a supporter of a "genocidal, nun-killing regime." But even White finally rolled with the tide.

When four or five oversize dugout canoes full of armed men landed on a Salvadoran beach just across the Gulf of Fonseca from Nicaragua, White all but called it an invasion. Nobody else, not even Duarte, went that far; but White had just signed off on a complete renewal of "nonlethal" U.S. military aid to the Salvadoran government, and this was an opportunity to make the point that it was justified.

The intelligence reports about massive deliveries of guns to the guerrillas had persuaded White that the U.S. aid was necessary. The memory of the nuns stayed with him. He was bitter at what he saw as a non-investigation of their deaths. But the size of the threat, the hundreds of tons of arms supposedly going to the Communists, forced him to go along with the Pentagon at least that far.

Within days, the resupply was extended to include, for the first time since 1977, lethal weapons—$5,000,000 worth of M-16 rifles, grenade launchers, recoilless rifles and four Huey helicopters. Accompanying them would be U.S. advisors. Just for mechanical training. No combat personnel. Again, White went along with the decision. He hadn't wanted to escalate the war. But the Communists had already done it and the United States could not just sit back and watch. The Salvadoran troops had held off the final offensive "without a single cartridge" from the United States, but now they had started to run out.

There were worries, though. While White was playing them down, at least in public, his aides were despondent. They could see the door opening for the next Administration. Reagan was not even President yet, but Carter, old human-rights Carter, was setting up a Statue of Liberty play, handing him the ball and letting him sprint toward the goal. Carter had only a week left in office, but he was taking responsibility for endorsing the Salvadoran military with gifts of bullets and bombs and American soldiers. Reagan could put in more bullets, more bombs, more Americans, and they would be only increments, not the crucial first step.

Yet even that was not enough for the Pentagon. On the eve of Reagan's Inauguration, Colonel Eldon Cummings, head of the embassy's military group, the U.S. Army's main man in El Salvador, went to White and asked him to sign off on 75 more U.S. advisors Cummings said the Salvadorans had requested.

White exploded. This finally was too much. Let Reagan make the decision tomorrow; White was sure as hell not going to do it. A year ago, he had seen the quagmire coming, had seen the potential for the Vietnamization of El Salvador. He was not going to sign off on it now.

Within a month, Alexander Haig, the new Secretary of State, called White to Washington. Haig was not happy with his work as Ambassador and White was relieved of his post. As a career Foreign Service officer, he had to be assigned to some new position of equal rank. Haig made him some offers he had to refuse, then effectively fired him from the diplomatic corps.

Colonel Jaime Abdul Gutiérrez took a cigarette from the reporter and loosened his tie. The colonel was relaxing in the Casa Presidencial as he reminisced about the October coup some 15 months before. He smiled as he talked about his feud with Majano, who, after all, had never been a commander as he had, had never been in private enterprise as he had. The fall of the first junta brought a laugh. Now the Christian Democrats were irritated because the head of the treasury police was still at his post, contrary to their little agreement. But that could be worked out. Duarte had proved to be very flexible.

The war was going all right. Of course, Gutiérrez couldn't say that it would be over in four months or one year or two. The guerrillas were pretty heavily dug in in the mountains of the north. There was always the danger that if they pulled off some spectacular victory, the people who thus far had stood apart from them would suddenly and finally rush to their sides as saviors. But the government reforms were working better than anybody—especially Gutiérrez—ex-

pected they would, and maybe the government had won more hearts and minds than anyone knew.

Of course, the problem, thought the reporter, was that no one knew. No one ever knew anything. Elections were being planned with the idea that the people could finally express their preference for one man, one course of action or another. Gutiérrez was very enthusiastic about the idea. It would give the Salvadoran government some legitimacy. But both the left and the right were rejecting the elections as a ploy by the Christian Democrats.

Ah, politics. Gutiérrez just wanted to save his country from the Communists and his army from disintegration and humiliation, and always there were these politicians complicating things.

But finally Washington had come around. As Gutiérrez sat talking to the reporter, there were American cargo planes unloading new guns a few miles away. The Hueys patrolled the skies. Scattered around the country were 54 U.S. advisors to turn his troops into crack units. If more equipment were needed, more advisors, the Yankees now seemed to be dependable suppliers.

The reporter had met some of the advisors. Clean-faced and enthusiastic, full of talk about the great morale of the Salvadoran army and the fight against international communism. They were going to show the Salvadorans how to fight a guerrilla war "even better" than the way the United States had fought it in Vietnam, as Colonel Cummings used to say.

So the colonel had many reasons to be confident about the future. But he was a Salvadoran, and the future, he knew, was never certain.

What if there were peace? That worried him.

"I want to tell you," said Gutiérrez, "my impression is that peace is tougher than war. What I mean is that in this condition, in this present circumstance, you are concentrating everything on one objective. And no matter how many different trends there are in the army, you can manage, because there is one enemy, because there is danger because of lots of things. But when all that ends, then comes the question of how to bring together all these forces afterward."

But, Colonel, aren't you worried that there might be some other Gutiérrez out there plotting against you? Would you know it if there were?

He thought for a moment. "No," he said, smiling at the reporter, "you can't know that. Really, when these things happen, the last to know. . . ."

Outside the Casa Presidencial, the streets were quiet, more quiet than usual.

---

[From the Washington Post magazine, Aug. 16, 1981]

EL SALVADOR: FROM CONQUISTADORES TO COMUNISTAS, WHY THE KILLING WILL NEVER END

(By Loren Jenkins)

(NOTE.—Last month, after Loren Jenkins had left El Salvador, government troops came again to La Bermuda. This time, special correspondent Alma Guillermoprieto reported, the troops swept up all the 600 peasant refugees who still remained at the camp and took them six miles away to the Government prison at Suchitoto, where they were crowded into cells under military guard.

(Col. Adolfo Cotto, a military spokesman, said, "I know both places, the camp and the prison, and they are better off in the prison."

(The commander of the Guardia Nacional in Suchitoto, who supervised the transfer, asserted, "There are people in that camp who have been very closely connected to the guerrillas, and the Suchitoto community is afraid they might try something funny."

(La Bermuda itself was burned to the ground.)

La Bermuda is not a place mentioned in the public pronouncements, official communiques and white papers offered up to a puzzled world to explain the savage conflict tearing apart the minuscule Central American nation of El Salvador. The omission is understandable; La Bermuda does not easily reinforce the official wisdom about the nation's crisis. Though it sits a mere 17 miles northeast of San Salvador, the capital, it is never visited by those who speak so volubly about the issue being only a question of a demonic communist subversion, armed and guided by Havana. And when authorities from the capital do send emissaries, they come in jeeps and trucks bristling with guns and waste no time chatting about the state of the hearts and minds of those they profess to defend.

It is in La Bermuda and in hundreds of similarly sad communities across the breadth of this weeping and wild land that the grim daily realities of life and death challenge the pat political analyses of those who make policy and war. Whatever thin veneer of civilization once existed there has been stripped bare, exposing darker, more complex and primitive forces at play than those that so hypnotize the political theorists of our times.

The tragedy that is El Salvador today is an ancient human drama that has been trying to play itself out since 1525 when the first conquistadores moved south from Mexico to claim for the Spanish crown the land and the Nahua tribes that inhabited it. The imperial feudalism that was imposed then with the warrior's sword and the priest's cross set the tone for a Salvadoran society that has changed little over the past four centuries. Neither national independence in the 19th century, the age of industrialism, successive political coups d'etat, local wars with neighboring nations, or peasant uprisings against the landed oligarchs, has done much to alter the legacy of violence and exploitation handed down by the Spanish conquistadores.

To visit La Bermuda now is to understand how little really has changed in the lives of the rural campesinos, or peasants, who make up the vast majority of the nation's population. Life in the countryside remains, in the words of the 17th century philosopher Thomas Hobbes, "poor, nasty, brutish and short."

In another era not that long past, La Bermuda was one of those bucolic rural oases that could have been a setting for a story by Gabriel Garcia Marquez, the Colombian writer. Carved out of a rough tropical countryside at the foot of a massive, now-dormant, volcano named Guazapa, La Bermuda was one of El Salvador's oldest haciendas, or estates. Built in the 19th century, its white plastered adobe outbuildings and the stately wide sweep of the main house's thick-beamed veranda still speak of a time when the land-owning gentry gathered in the cooling shade of sundown to sip iced rums while watching the campesinos troop home from the fields with the last rays of daylight flailing their backs.

That was before this tiny, overpopulated nation of 4.7 million souls went to war with itself in the wake of the captains' coup of 1979 that not only antagonized the rich oligarchs with its promises of reform but also alienated the hopeful because of the few changes they brought. The new age of democracy, justice and social equality promised by the coup-makers has not materialized. And now in the second year since the dictator, Gen. Carlos Humberto Romero, was ousted and relegated to the dustbin of history, La Bermuda has become just another grim testimonial to the revival of an ancient barbarism that is being variously called a civil war, a subversion from abroad, or simply "la violencia," the violence.

The idyll that—for landed gentry, at least—was once La Bermuda, has been transmogrifted into a Goyaesque ghetto stalked by pestilence, war, famine and death. The hacienda owner and his family have long since fled to well-protected villas in the capital or lavish suburban homes in Miami, where their class has established its capital-in-exile to dream and plot their return. In their stead have come some 5,000 terrified campesinos fleeing the now-scorched neighboring countryside which, in the ways of modern anti-guerrilla warfare, has become just another free-fire zone where anything that moves by day or night is fair game for the armed bands of soldiers and guerrillas who hunt each other.

After days in the surprisingly still-bustling San Salvador, La Bermuda is a shock to the senses. The once-elegant hacienda is now but a muddy slum of pathetic bamboo and thatch hooches, hellishly smoking communal cook fires, banners of tattered laundry on the dry, and aswarm with gaunt and skittish beings wandering aimlessly through a squalor that is almost medieval.

What haunts most is the women. They stare out with frightened eyes from behind an undulating sea of sick and undernourished children and when they determine that the stranger is not one of those who comes to harm, they begin to move forward, hesitantly at first, then in a determined surge. They group around urgently and in voices as soft as rustling palms they beg for help in discovering what has happened to their missing loved ones.

"Please help me," says the first to speak up to the stranger, her voice unwavering with the stoicism of one familiar with the ubiquity of tragedy. "They came and took away my husband last week. He is 52 and is called Antonio Morales and he is all I have left in the world. Please ask someone if he is alive or dead. He did nothing."

One by one the women—old, young, middle-aged—take their turns at reciting the names of their missing, sometimes two or three or even four, their ages, and dates of disappearance from La Bermuda. The recitation takes on the monotony of a litany, a rote incantation of pain and fear of those dying in spirit, if not yet in body.

There are tales of murders, too, men dragged off in front of their eyes and killed and women raped, then shot. But it is the disappearances that oddly are more unsettling. None vanished on their own accord; they were all taken by armed and uniformed men who ride into the camp in olive-drab vehicles with the regularity of a harvest moon. At gunpoint the refugees are lined up, then the unfortunate are brusquely yanked out of line, seemingly at random with no explanation ever given, finally to be marched off down the road never to be seen again.

The sweep that carried Antonio Morales away numbered eight in all; the oldest was 59, the youngest, a boy of 14, and with them went a mentally retarded 16-year-old. Another 28 were seized the next month, bringing the total since January to more than 75. The story of the "disappeared" of La Bermuda is one a traveler across El Salvador today stumbles across everywhere, every day. Only the names, dates, ages and locales vary.

According to the conservative count of the U.S. Embassy, which cables a daily "Grimgram" to Washington to update its figures, the number of the dead and missing since the captains' coup is more than 10,000. The Catholic Church, with contacts throughout the country at once broader and more reliable, places the number now at 18,000—8,316 in the first six months of this year alone. For the purpose of comparison, in the United States the same percentage of the total population would be half a million dead or vanished.

The only real difference between the dead and the disappeared lies in the degree of torture such classifications inflict on the liv-

ing. The dead have bodies that can be recovered, cleaned, prayed over. The disappeared are but disembodied names existing as little more than futile hopes in the tormented memories of those from whom they were taken.

The overwhelming number of those killed are not casualties of war, in the classic sense, but victims of political murder: cold, simple, final. In the capital not a day goes by without someone being ambushed at a traffic light, ice cream stand, restaurant or shopping center or gunned down by a passing car at the doorsteps of his own home. But it is at night, after the government begins to enforce its no-nonsense 10 p.m.-to-dawn curfew, that the real slaughter begins. Sometimes the shooting by the death squads, the "escuadrones de la muerte," is so close in the back streets behind the luxury hotels where the few visiting foreigners stay that it sends guests fleeing from the cold comforts of the bar. More often it is further away in the suburbs, discernible as a hollow popping that reminds of firecrackers.

By the first light of day the pulse of the violence is measured, as people go out to pick up their dead. There are days when only a handful of corpses are found scattered in city streets or abandoned on rural roads. Other days there are as many as a dozen bodies in one neighborhood alone, the corpses grotesquely draped across the street with drying rivulets of blood trailing toward the sidewalks.

Whole families have been found slaughtered in pajamas still in their homes, the doors they refused to open battered down. So callous has the killing become that in the eastern city of San Miguel recently residents woke to find that 11 of the city's habitual drunks had all been shot in the head and dumped in a park with two dozen slain stray dogs under a hand-lettered sign that said: "Limpieza de San Miguel"—cleansing of San Miguel.

The standard form of execution is a bullet to the temple or a blast in the chest from semiautomatic G–3 rifles that are the favorite weapon of both the guerrillas and the government forces. But not a day goes by without evidence of many gruesome and sadistic modes of dispatch. Bodies turn up regularly with their heads or limbs severed by machete, the traditional weapon of the land that still is carried by troops in full battle dress. Other cadavers have been found charred by a torturer's blowtorch or with their skin peeled off their faces or with steel spikes driven through their ears. "How can we talk of civilization here," asks a shaken Catholic priest who like most people is afraid to have his name used lest he too become a target. "These are barbaric times we are living."

For an outsider, even one conditioned over a decade to the standard savageries of Asian wars and African rebellions, El Salvador is a nightmare beyond comprehension.

There are no battle lines, no safe sanctuaries, no neutral corners. No one is safe and everyone knows it. Anybody and everybody is a potential victim. One need not even have taken a political stance for or against the ruling junta that the captains have installed to be marked for execution. A malicious rumor from a personal enemy or a suspicion based on nothing more than an individual's family background, education or profession will do.

The lucky are only those with the money, mainly the very rich of the old oligarchy of famous families, who have moved their bank accounts and bodies abroad, either to Miami or Guatemala City. Those who can not afford such luxury have been reduced to turning their comfortable homes into fortresses protected by steel doors and high concrete fences, and patrolled by armed guards. If they can, they drive about in armored Cherokee vans (a status symbol in Salvador to rival Mercedes-Benz), wear bulletproof vests and pack handguns tucked into their waistbands. The rest, the majority of the population, just go on about their lives as best they can, caught up in the numbing fatalism of those who have always been aware that they have no control over their destiny.

The daily newspapers, cautious, conservative and self-censored, try to keep up with the fallen the best they can, giving over their pages to the identification portrait photographs of the victims over brief captions giving their names, means of death and place felled.

The list of victims runs the gamut of society from peasants to socialites, taxi drivers to businessmen. But reading through the names carefully over a period of time, it becomes apparent that it is a special strata of the society that is clearly getting the worst of it: the doers, leaders, managers, educated. It is as if a decision had been made to eliminate the very people on whom the country's future depends.

In the countryside the main victims are those who emerged as community leaders under church-inspired comunidades de base (grassroots communities), activists in the peasants' union or those who have tried to administer new cooperatives created by the first stage of the government's land reform. In the towns it is the school teachers, nurses, church catechists, neighborhood leaders and secondary students who are killed most. In the city it is those feared to be the most likely to have political views: politicians (those that have not fled or gone underground), university professors, lawyers, labor organizers, students, professionals, administrators and managers.

In the country at large the target is the Catholic Church, a pillar of the established order before it turned to a liberation theology that has allied it with the poor. Twelve priests have been gunned down, including Archbishop Oscar Arnulfo Romero (no relation to the ousted dictator), who was assassinated last year while saying mass in the capital. A tearful woman in the western city of Santa Ana put it like this recently, as she described how her 23-year-old engineering student son was shot to death in her arms while she pleaded with the assassins who had invaded her home: "They just don't want this country to have any talent. To think today is to be dangerous."

There are probably as many different groups involved in the bloodletting as there are methods of killing. There are the death squads funded by the rich and reactionary discomfited by the 1979 coup that go by such names as the "white warriors union" and the "anticommunist armed forces of liberation." There are such murderous vestiges of the ancient dictatorships as ORDEN, an uniformed rural militia set up to terrorize peasants into obeisance at the whims of the landowners and the military that supported them. There are also groups of dissident soldiers and police, extreme leftist urban guerrillas, anarchists, four left-wing guerrilla groups in the hills and the armed forces themselves with the three ill-disciplined security forces under their command.

Despite this multiplicity of agents of death, the consensus, supported even by U.S. diplomats backing the ruling junta, is that most of the killings are the work of rightists, either those believing in the pre-coup order or those backing, or even belonging to, the present military-dominated regime. One diplomat estimates the breakdown at 40 to 60 percent in favor of the right; another puts the rightist killings higher still but no one is in any position to prove the case.

U.S. officials embarrassed by these conclusions try to rationalize them by predicting, as is their habit in such cases, a "bloodbath" should the left, backed by the guerrillas of even more extreme views, ever come to power. With no hard evidence to justify such a conclusion, they predict the left would kill 100,000 people if they ever won. In almost the same breath, however, these same diplomats admit that Roberto d'Aubuisson, a former Army major who is the darling of the reactionary right, has openly talked of the need to kill 200,000 to 300,000 people to restore peace to El Salvador.

* * * * *

To make any sense of El Salvador's current tragedy, one is forced to probe its past. And nothing in its long black history explains events today better than the aborted revolt in 1932, the last serious uprising against the nation's rulers. That event labeled by history books as "La Matanza," the butchery, was the death of 10,000 to 40,000 Salvadorans.

The stage was set in 1931 when the then-minister of war, Gen. Maximiliano Hernandez Martinez, overthrew the nine-month-old government of President Arturo Arrujo, to this day the only person to have ascended to the presidency of El Salvador by a free and democratic election.

Arrujo, the engineer son of a wealthy landlord, was a liberal whose vague notions about bettering social conditions in the country were quickly taken as dangerous heresies by the coffee and sugar plantation oligarchs, and the military who diligently served their interests.

The revolt against Hernandez's coup was the brainchild of Agustin Farabundo Marti, a mestizo of peasant ancestry who was one of El Salvador's first genuine communists. (He discovered Marx while attending, but failing to graduate from, the National University in 1914.) Though Marti's 1932 revolt has often been termed Latin America's first communist uprising, few other communists other than Marti were involved. There were few around. Most of the rebels were angry campesinos or young radicals who were incensed that their hopes of changing El Salvador's plantation feudalism once again had been stifled by the landowners and the military.

The revolt was a disaster. Marti and his two closest collaborators were arrested four days before the Jan. 22 date that had been planned for the uprising. Their followers, mostly from around the small towns of the western provinces of Sonsonate and Ahuachapan, revolted on schedule anyway, even though martial law had already been decreed to dissuade them.

Armed only with machetes and the odd pistol or hunting rifle, the rebels were disorganized and badly led and never had a chance. They took over half a dozen small towns, killed a few dozen local officials or landowners, and marched around the countryside waving their machetes in the air. The military routed them easily, first chasing them out of the towns, then hunting them down in the countryside. For all intents and purposes the revolt, which began Jan. 22, was over by Jan. 25, 1932. In all, counting rebels, police, soldiers and civilians, no more than 100 persons were estimated to have died.

With the passage of time the facts about the rebellion have been intentionally blurred by the military men who have ruled uninterruptedly since Hernandez's coup. As taught to schoolchildren in doctored history books, Marti's revolt was a savage class war where peasants, armed and led by hard-core communists, fell upon sleeping provincial towns and massacred the innocent caught in their beds by the tens of thousands.

The true story of the Matanza is more chilling. As University of Nebraska historian Thomas P. Anderson discovered while doing research for his book, Matanza, the first objective history of the 1932 revolt, the real killing only began after the rebellion had been put down.

"The Matanza began against anyone caught with a machete, or who looked too dark, or Indian, or too campesino," Anderson writes in describing the military actions that followed the revolt's failure. "Tied by their thumbs in groups of 50, they were led to walls where they were executed by machine guns mounted on trucks." By the thousands they were slaughtered and buried in huge pits throughout western El Salvador. Marti and his two colleagues were given a summary court-martial and hanged. Estimating that 10,000 died in the repression (others count the victims as many as 40,000), Anderson notes that his figure means the government "exacted reprisals at the rate of 100 to one."

In San Salvador today the Army leaders, who remain the dominant force behind the junta, angrily reject any suggestion that such repressive military traditions of their past might account for the ferocity of the killings going on today. As the doctored histories of the Matanza blamed all the 1932 deaths on the rebels, today's military men seek to blame the recent wave of killings and disappearances on the "subversivos," their term for the rebels who—as in times past—are depicted all as communists armed and directed through the international communist movement.

That there are communists involved in today's rebellion is beyond doubt, just as Marti's allegiances were not hidden in 1932. But the communist party of El Salvador is only on of four leftist groups fighting in the countryside and at least two of those have very little time for Havana or Moscow. Supporting or sympathetic to this armed struggle are many who are actually anti-communists—social democrats, liberals, Catholics. To tar the whole opposition movement against the government with the brush of communism, as the State Department clumsily attempted with its error-filled white paper, is to miss the point of the real issues in El Salvador.

Today's military leaders in San Salvador, however, persist in identifying their critics as communists. In the convoluted official logic of autocracies, the killings and disappearances are offered as evidence that the junta is winning the hearts and minds of the populace.

"The guerrillas have failed militarily," boasts Col. José Guillermo Garcia, the defense minister and current military strongman. "When the subversivos failed to trigger a popular rising in January they were reduced to terrorism against the people who did not join them. Because of that the people are now against them."

The boast ignores the evidence that the guerrillas have mastered the elusive art of hitting and running and that the government's forces suffer the greater numbers of casualties when they encounter the guerrillas in the bush. The notion that the people have turned against the rebels is not the view of things that an inquisitive outsider comes away with after a month of wandering around the countryside, visiting places that policymakers never visit and talking to the simple people to whom they rarely talk. In a code that in this land of death and retribution quickly states the unstatable, those the government calls subversivos are usually referred to sympathetically as los muchachos, the boys. After a while, one concludes that fear more than lack of sympathy prevented a popular uprising.

Rural peasants, country villagers and refugees admit that los muchachos occasionally come to population centers to demand food and supplies, to recruit new members when they can, or to execute those believed to be orejas (ears)—government informers, collaborators or ORDEN or the local representatives of the junta. But for every tale of guerrilla excess a visitor hears, he is told 10 of more methodical and random repression by members of Col. Garcia's own security forces.

At La Bermuda, for instance, the women with their tales of grief insist that the raiders of their camp are not any of the muchachos who operate from bases on the Guazapa volcano.

Those who have come to kidnap and kill and rape all ride in military vehicles, they say. Though some wear motley civilian clothes, most are dressed in the unmistakable black helmets and olive-drab fatigues of the Guardia Nacional, one of the Defense Ministery's paramilitary security forces created at the turn of the century to impose the government's writ on the countryside, where 60 percent of the populace lives. The same noncommissioned officer from La Guardia, the women say, always has led the raids on their camp.

Official disclaimers of responsibility for the national terror have suffered of late. In April, 30 bodies, some of children, most in pajamas, were found one dawn in the streets of a suburb of the capital named Soyapango. Neighbors who in the past would have kept their mouths shut, were so outraged that they contradicted the official explanation that the killings resulted from an after curfew clash between security forces and guerrillas. The witnesses said that the dead had all been hauled out of their homes in the middle of the night and shot by uniformed members of the Finance Police, another security force, which is commanded by Col. Francisco Moran. One western diplomat contemptuously labels Moran the "Darth Vader" of the armed forces.

In May, after six months of junta foot-dragging and bitter internal debates within the military, U.S. pressure—and an FBI analysis of the evidence—forced the reluctant junta to arrest six members of the Guardia Nacional on "suspicion" of involvement in the killing of four U.S. missionaries—three nuns and a lay woman—last December after the group was stopped at a roadblock. The military's grudging admission that its forces are not, after all, blameless was speedily followed by an insistence that such cases are exceptions, not the rule.

"This has nothing to with the armed forces," Col. Garcia claimed at a press conference in which he announced the guardia arrests while flanked for support by his fellow brass. "If they did what they are accused of doing, they did not do so under orders. Hence they [the killings] are individual acts that the armed forces cannot be held responsible for."

The military's many critics in the land are not prepared to buy this view. "What you foreigners do not seem to understand is that the real issue in El Salvador is the armed forces and the power they still wield in this country," says a lawyer, a social democrat, over dinner in his home in the capital. Other guests, a university professor and an agronomist, nod in agreement, "The issue here is not ideology, or even the poverty and misery of most of our people. What has fueled the leftist movement, the guerrillas, is simple outrage at the injustice and repressiveness of the military that is ruling us today just as it ruled us in the past. What you have here is what we've always had: a war of the military against its people."

The real failure of the expectations that flowered with the 1979 coup, its opponents argue, is that the military refused to relinquish any of the prerogatives of power and control that had long been its monopoly. The officers moved against Gen. Romero not because they opposed military rule but because his style had become an embarrassment at a time the popular Sandinista revolt in Nicaragua to the South had just swept out the dictatorship of Anastasio Somoza. The colonels who rule today were appalled at how quickly Somoza's National Guard was disbanded and persecuted after his fall and were eager to appear to move with the times to avoid a like fate in El Salvador.

The colonels argue that the changes they have tried to introduce have not been merely cosmetic. They point out that they were prepared to share power by bringing three eminent civilians to join their two representatives on the junta, Cols. Jaime Abdul Gutiérrez and Adolfo Arnoldo Majano. Didn't they also agree to a sweeping land reform program which if ever fully implemented would finally alter the plantation feudalism that lies at the root of so many of the country's ills? Didn't they sack all military generals and many, though hardly all, of the most neolithic of their fellow officers? Hadn't they agreed that national elections will be held in 1982?

True. But all the eminent civilians brought into the junta quit within months to run to exile in Mexico after denouncing the military for refusing to share actual power and failing to halt the repression. Col. Garcia, a man who might have been dictator back in 1975 had he not been outmaneuvered at the time by Gen. Romero, has refused all requests that he quit and instead has emerged as the real strongman of the government. President José Napoleon Duarte, a Christian Democrat with previously impeccable credentials, was eventually brought into the junta to replace the civilians who quit, but though he was named president, he has proven increasingly powerless.

And Col. Majano, one of the few certifiable liberals in the military hierarchy, was forced out of the junta six months ago and now lives in the United States. In El Salvador, there is a warrant out for his arrest.

President Duarte remains the junta's most eloquent salesman. A former mayor of San Salvador and politician who built his career on opposing the military regimes of the past, he stunned the armed forces in 1972 by beating their own hand-picked choice in a presidential election whose displeasing results the armed forces quickly abrogated. His expressionless, immobile visage testifies to the ministrations of military torturers, who broke most of the bones in his face in a concerted effort to convince him of the evil of his political ways before sending him off to seven years of exile in Venezuela.

Few doubt that Duarte is sincere and honorable. He and his moderate Christian Democratic party, at most a collection of several thousand centrist politicians, are the only civilians of any stature still prepared to work with the military. Duarte's role has become more ceremonial than executive under the colonels and his efforts to push reforms, including the land reform, have stalled.

His association with the military has eroded his past support and credibility in the country and his own party is split over the benefits of continued links with the military at a time when all other political groups have rallied to the leftist antigovernment coalition led from Mexico by Guillermo Ungo, a social democrat and one of the three civilians in the original junta.

Duarte's enemies accuse him of clinging to the presidency because of his long-frustrated ambition to hold the job. The more charitable say he continues hopeful that his presence will put at least some brake on the military. The military leaders seem happy to keep him as windowdressing to impress Washington, on which they realize their ultimate survival depends.

In recent days U.S. officials for the first time have begun to mutter about the possibility of seeking some negotiated settlement to the Salvadoran crisis, but the armed forces remain adamant that the solution is a military elimination of the guerrilla forces. "The problem is they know any negotiation means compromise," says Salvador Samayoa, a former philosophy professor and minister

of education under the junta's first government. Today he is one of the Mexico-based strategists for the umbrella group representing the dozen-odd political, professional and labor organizations that are seeking politically and diplomatically to undermine the junta. "Even a minimum compromise would affect military power directly and that is something they will not allow. Military power is the issue."

With negotiations ruled out by the military, Duarte has put all his political efforts into convincing his skeptical citizens and the world that the only way to resolve the tragedy of their nation is by having free elections in 1982, a strategy initially recommended by the United States. Such a proposal is hard to argue with in principle, but one has only to look at Duarte's wounded face to understand why to Salvadorans such promises of free—and binding and unreversible—elections have a hollow ring. The only free election in the country's history was Arrujo's in 1931 and that led to the military coup that produced the Matanza a year later and left a legacy of 50 uninterrupted years of military rule.

For the moment it is difficult to see a future for El Salvador much different than its present. The political situation is clearly blocked by refusals of any negotiations by the military. The land reform is barely in motion. The economy, even without the serious disruptions of violence is collapsing with the collapse of the world coffee and sugar prices on which it depends. Despite the infusion of $35 million dollars of military aid this year for helicopters, weapons, and the U.S. advisers to teach their use, the war in the hills is stalemated, with the guerrillas proving increasingly able to punish El Salvador's 18,000-man armed forces. That point alone bodes ill for those attracted to the seeming simplicity of military solutions.

By now it should have begun to become clear to the policymakers of the Reagan administration that bombast and hyped white papers attacking Nicaragua, Cuba and the Soviet Union are no real alternatives to a serious policy to deal with a crisis that would exist anyway whether or not those countries existed and regardless of what aid they really give the rebels.

Until such a policy can be formulated, and El Salvador's colonels can be induced to accept it even at the diminishment of their political monopoly on power, it seems difficult to see how the present Matanza, which has probably already exceeded the horrendous carnage of 1932, can realistically be brought to an end.

---

EXHIBIT 2

Provision relating to military aid to El Salvador as contained in the proposed International Security and Development Cooperation Act of 1981 (S. 1196), reported from the Committee on Foreign Relations May 15, 1981.

EL SALVADOR

SEC. 707. (a) Funds may be obligated for assistance for El Salvador under chapter 2 or 5 of part II of the Foreign Assistance Act of 1961, letters of offers may be issued and credits and guaranties may be extended for El Salvador under the Arms Export Control Act, and members of the Armed Forces may be assigned or detailed to El Salvador to carry out functions under the Foreign Assistance Act of 1961 or the Army Export Control Act, only if prior to each such obligation, issuance, extension, or assignment, the President makes a certification in accordance with subsection (c) and that certification takes effect.

(b) Thirty days after the date of enactment of this section and at the end of each succeeding six-month period thereafter, the President shall make a certification in accordance with subsection (c) if he is able to make the determinations required by paragraphs (1) through (5) of that subsection. If at any of the times specified in the preceding sentence of this subsection the President does not make such a certification, then the President shall immediately—

(1) suspend all expenditures of funds and other deliveries of assistance for El Salvador which were obligated under chapters 2 and 5 of part II of the Foreign Assistance Act of 1961 after the date of enactment of this Act;

(2) withhold all approvals for use of credits and guarantees for El Salvador which were extended under the Arms Export Control Act after the date of enactment of this Act;

(3) suspend all deliveries of defense articles, defense services, and design and construction services to El Salvador which were sold under the Arms Export Control Act after the date of enactment of this Act; and

(4) order the prompt withdrawal from El Salvador of all members of the Armed Forces performing defense services, conducting international military education and training activities, or performing management functions under section 515 of the Foreign Assistance Act of 1961.

Any suspension of assistance pursuant to paragraphs (1) through (4) of this subsection shall remain in effect until such time as the President makes a certification in accordance with subsection (c) and that certification takes effect.

(c) The certification required by subsections (a) and (b) is a certification by the President to the Speaker of the House of Representatives and to the chairman of the Committee on Foreign Relations of the Senate of a determination that the Government of El Salvador—

(1) is making a concerted effort and significant progress in controlling indiscriminate and gross violations of internationally recognized human rights;

(2) is moving to achieve control over all elements of its own armed forces, so as to bring to an end the indiscriminate torture and murder of Salvadoran citizens by these forces;

(3) is making continued progress in implementing essential economic and political reforms, including the land reform program;

(4) is committed to the holding of free elections at an early date; and

(5) has demonstrated its willingness to negotiate an equitable political resolution of the conflict with any group which renounces and refrains from further military or paramilitary opposition activity.

Each such certification shall discuss fully and completely the justification for making each of the determinations required by paragraphs (1) through (5).

(d) The President may not make the first certification under subsection (a) of this section until after he has certified to the Speaker of the House of Representatives and the chairman of the Committee on Foreign Relations of the Senate that he has determined that the Government of El Salvador has made good faith efforts both to investigate the murders of the six United States citizens in El Salvador in December 1980 and January 1981 and to bring to justice those responsible for those murders.

---

REPORT NO. 97-83

Excerpt from Report (No. 97-83) on the proposed International Security and Development Cooperation Act of 1981 by the Committee on Foreign Relations.

SECTION 707—EL SALVADOR

Section 707 was introduced by Senator Dodd. It requires as a condition for U.S. assistance to El Salvador that the President certify that the Government of El Salavador is meeting five specific tests relating to human rights, control over the armed forces, economic and political reforms, free elections and a negotiated solution to the present conflict.

Subsection 707(a) requires a Presidential certification for El Salvador prior to each (1) obligation of MAP or IMET funds; (2) issuance of letters of offer for an arms sale; (3) extension of FMS financing; or (4) assignment of U.S. Armed Forces personnel to El Salvador.

Subsection 707(b) requires similar certifications each six months. If the President is unable to make such a certification, due to the failure of the Government of El Salvador to pursue those objectives in accordance with these standards, then the President is to take various actions to suspend aid and remove military personnel. Those actions include: (1) suspension of all assistance funds and deliveries under chapters 2 and 5 of Part II of the Foreign Assistance Act; (2) withholding all FMS credits approvals for new uses of previously extended and guaranties; (3) suspending all deliveries of defense articles, defense services and construction services; and (4) prompt withdrawal from El Salvador of all U.S. Armed Forces personnel providing services under the Foreign Assistance Act and the Arms Export Control Act.

Subsection 707(c) sets forth the conditions required by the certification to be made in subsections (a) and (b). The five conditions are that the Government of El Salvador:

(1) is making a concerted effort and significant progress in controlling indiscriminate and gross violations of internationally recognized human rights;

(2) is moving to achieve control over all elements of its own armed forces, so as to bring to an end the indiscriminate torture and murder of Salvadoran citizens by these forces;

(3) is making continued progress in implementing essential economic and political reforms, including the land reform program;

(4) is committed tao the holding of free elections at an early date; and

(5) has demonstrated its willingness to negotiate an equitable political resolution of the conflict with any group which renounces and refrains from further military or paramilitary opposition activity.

Each criterion is to be discussed fully and completely as part of the certifications. In considering these five conditions, the Committee adopted suggestions by the Chairman to make changes in items (1) and (3). These changes brought the conditions more closely into line with reasonable expectations given the current situation in El Salvador.

Subsection 707(d) requires a one-time certification that the Government of El Salvador has made good faith efforts both (1) to investigate the murders of the six United States citizens in El Salvador; and (2) to bring to justice those responsible for those murders.

In adopting section 707, it is not the intent of the Committee to preclude the continuation of assistance to El Salvador in the event that one or more of the standards set in subsection (c) was not met due to actions by other parties or events outside the control of the Government of El Salvador.

This section represents the Committee's bipartisan view concerning El Salvador. The Committee believes that the amendment would strengthen President Duarte's ability to undertake the basic reforms necessary to bring peace to his nation.

The provisions of the amendment also closely parallels the Administration's stated objectives in El Salvador. With respect to economic and political reforms, a recent letter to the Chairman by Under Secretary of State James Buckley (see below) reemphasizes the Administration's support for Duarte's social and economic reforms.

UNDER SECRETARY OF STATE
FOR SECURITY ASSISTANCE,
SCIENCE AND TECHNOLOGY,
*Washington, D.C., May 13, 1981.*

Hon. CHARLES H. PERCY,
*Chairman, Science Foreign Relations Committee, Dirksen Senate Office Building, Washington, D.C.*

DEAR MR. CHAIRMAN: As your Committee continues its deliberations over the foreign assistance authorization bill for fiscal 1982, I thought it appropriate to take the opportunity to restate the Administration's strong support for the Duarte Administration's efforts to achieve social and economic reforms. The success of those efforts represent a necessary component of our national security posture in Central America.

In March, 1980, the moderate government of President Duarte initiated a large-scale land reform program which will ultimately provide land to some 300,000 rural families. The Administration believes that it was in good measure the successful initial implementation of this program which thwarted the efforts of revolutionary groups to seize control of the government earlier this year. It is our view that the continued success of the Duarte program is necessary if that government is to retain popular support in its efforts to resist renewed leftist threats to its political and economic life. I strongly believe it to be in the best interest of the United States to continue our support for this program.

I hope you find these remarks useful as you proceed through mark-up of the foreign assistance bill.

Sincerely,

JAMES L. BUCKLEY.

---

SECTION 707 (EL SALVADOR)

Mr. KENNEDY. Mr. President, I welcome the steps the Committee on Foreign Relations has taken to press the administration toward a new policy in El Salvador. The committee has moved to condition further military assistance to El Salvador on Presidential certification that the Government of El Salvador is meeting five specific tests relating to human rights, control over the armed forces, economic and political reforms, free elections, and a negotiated solution to the present conflict, as well as pursuing the investigations into the murders of six Americans in El Salvador.

Since 1977, I have spoken and worked against U.S. assistance which could be used to increase repression or to escalate violence in El Salvador.

Last March, my friend and colleague, Senator PAUL TSONGAS, joined with me in legislation (S. 728) which would go much further than section 707 of the International Security and Development Cooperation Act of 1981 (S. 1196), by suspending all U.S. military assistance and support unless important conditions are met. Only after both the Senate and the House were satisfied that the conditions had been fulfilled could military assistance and support be resumed.

Senators BURDICK, LEAHY, LEVIN, and WILLIAMS have joined us as cosponsors of this legislation, which is supported by a wide spectrum of religious leaders in the United States.

Senator TSONGAS and I have worked with the committee and the sponsors of section 707 to insure that it reflects as many elements as possible of our own bill. Despite the opposition of the administration, notable progress has been achieved in the committee.

However, we continue to believe that the United States should end its military aid and support, and should pursue instead a mediated and negotiated political solution. We are prepared to bring our bill to a Senate vote if section 707 does not have its desired effect and administration policy remains unaltered. That policy aids and abets continued repression and violence in El Salvador, and it should be ended.

Mr. President, the provisions of section 707 constitute the minimum set of conditions for U.S. support to the Government of El Salvador. But it is sadly evident that these conditions—particularly with regard to violence and human rights abuses—are not being met today by that Government. Unless there is prompt and very substantial improvement in the situation, military assistance should therefore no longer be supplied to that Government.

It is important to bear in mind what we are talking about when we say that violence and human rights abuses are occurring in El Salvador. In El Salvador, violence and human rights abuses do not mean isolated cases of brutality by a new recruit in a remote district of the country.

Violence and human rights abuses mean deliberate, planned abductions by members of the security forces and right-wing death squads of teachers, labor representatives, leaders of respectable, middle-of-the-road political parties, priests, sisters, doctors, lawyers, and peasants. It means subjecting them to the worst tortures before casting their mutilated bodies on the street to perpetuate an atmosphere of fear. And none of these people are combatants or can be called guerrillas. They are not in any way legitimate targets of force.

Violence and human rights abuses mean the unsolved murder, in cold blood, of an archbishop of the Catholic Church. They mean the unsolved murders, in cold blood, of American women. They mean the unsolved murders, in cold blood, of American labor representatives.

They mean a pattern of gross and continued abuse of a defenseless population. In short, they mean a government incapable, by all intents unwilling, to control itself or other perpetrators of enormous and outrageous injustices against the people of El Salvador.

During 1980, some 12,000 persons were killed in El Salvador, which, in terms of the size of the population of the United States, would have meant the deaths of 500,000 Americans.

Already during 1981, more than 9,000 persons have been slain, so that, since the escalation in American military aid, the rate of killing has increased, not decreased. Thousands more persons have been wounded. And the United Nations High Commission for Refugees now estimates that at least 600,000 Salvadorans, or fully 12 percent of the population of El Salvador, have been displaced. This includes 100,000 refugees in Mexico, 60,000 in Guatemala, 45,000 in Honduras, 10,000 each in Costa Rica and Nicaragua, 15,000 in Panama, and 5,000 in Belize. The vast majority is made up of women, children, and older people.

The International Commission of Jurists, in their June 1981 review of human rights in El Salvador, amply document these abuses and violations. As one of their members summarized the Salvadoran situation before the United Nations Commission on Human Rights:

> There has been a spectacular increase in the violations of human rights, and this small country is plunged in a bloodbath.

I ask that a section of the ICJ review entitled, "Status of Other Human Rights," be entered in the RECORD at the conclusion of my remarks.

No one can any longer talk about the government with its military high command and its security forces standing somehow in the center between violent extremes of left and right. It is the people who are in the center. The opposition to the government includes those who have committed themselves to violence, many certainly because of their adherence to extremist philosophies, but most because opportunities for democratic change have been denied to them.

But included among those in power are those who have committed themselves to violence to maintain a grossly unequal social system— and among that group on the right are the government's security forces.

Only a few weeks ago, the Apostolic administrator of San Salvador, Bishop Arturo Rivera Y Damas, who wrote me in April to plead for an end to outside military intervention in his country, and who has no identification at all with any armed insurgency, publicly accused the government security forces of being responsible for a vast amount of killing of innocent people in that country and for harrassment of the Catholic church.

The bishop has pleaded for negotiations to end the suffering of the Salvadoran people. I request that my exchange of letters with Bishop Rivera Y Damas be placed in the RECORD at the conclusion of my remarks.

Within these same few weeks, we have seen numerous reports in the press and by respected nongovernmental organizations, including Amnesty International, which have stated, for example:

That on July 17, 13 teachers were abducted by the security forces and have disappeared;

That on July 4, Edgar Vallejo, a well-known writer, aged 23, not known to be involved in politics, and father of an 18-month-old child, was abducted in San Salvador by masked men in plainclothes and driven away in a Jeep without number plates;

That on July 6, two women were abducted by plainclothes officials of the national police and held incommunicado;

That on July 7, 28 peasants were murdered, their bodies mutilated and buried under a bridge by security forces;

That on July 30, at least 19 persons were taken away from their homes by soldiers and slain after a roadside quarrel, murders publicly condemned by Bishop Rivera Y Damas;

That, and I quote from a report by Amnesty International:

> The majority of reported human rights violations in El Salvador including torture,

"disappearances" and deliberate cold-blooded killings, have been carried out by the security forces and have been directed against people not involved in guerrilla activities.

Testimonies received by Amnesty International implicate all branches of the Salvadoran security forces, whether nominally military, military police or paramilitary, in violations which have occurred on such a scale that they constitute a gross and consistent pattern of human rights abuses. Amnesty International has documented case after case of abduction, murder, and torture by troops and police of nonviolent opponents, human rights workers, priests, teachers, students, journalists, medical workers, and others.

At the end of August, two countries close to the United States in friendship and alliance—Mexico and France—declared that the Frente Farabundo Marti Para La Liberacion Nacional and the Frente Democratico Revolutionario are a representative political force in El Salvador, which should be able to participate in seeking a negotiated political solution to the crisis.

This is an important development, and an opportunity to break the stalemate in El Salvador and end the violence.

In September, the United Nations Subcommission on Prevention of Discrimination and Protection of Minorities, of the Commission on Human Rights, adopted their own resolution on El Salvador, emphasizing concern over human rights abuses. I ask that the important and timely resolution of the UNCHR subcommission be inserted into the RECORD at the conclusion of my remarks.

Mr. President, it is abundantly clear that the present policy of the United States toward El Salvador is failing and is even making matters there worse. I say this in full recognition of the recent statement by Assistant Secretary of State Thomas Enders, which offers the well-intentioned but mistaken thesis that the present course of U.S. policy should not be changed if El Salvador is to overcome its problems.

I believe that the present course of U.S. policy can and should be changed, and section 707, as I have stated, provides the minimum set of conditions designed to produce such a change. It is most unfortunate that even this minimum set of conditions is not being fulfilled.

To see that this is, sadly, the case, let us examine these conditions one by one.

Section 707 requires, before military aid can continue, that the administration must certify that El Salvador has made good-faith efforts both to investigate the murders of the six American citizens killed in El Salvador last December and January, and to bring to justice those responsible.

Despite an occasional report in the press that progress has been made in these investigations, it is painfully obvious that little is happening. Those arrested in the murders of the missionaries are not known—their names and addresses have not been officially revealed.

In fact, disturbing reports have appeared recently that suggest that there is evidence connecting individuals in official places above the level of soldiers manning roadblocks, with these savage murders; and if this evidence is being acted upon, neither the administration nor the government of El Salvador has seen fit to tell us about it.

I call on the administration to apply all its available influence now to see that these outrageous murders are fully investigated and justice is brought to bear.

Second, section 707 requires certification that the Salvadoran Government is making a concerted and significant effort to control gross violations of internationally recognized human rights; and is moving to achieve control over each and every part its armed forces, in order to stop the indiscriminate torture and murder of Salvadorans.

Mr. President, I think it is completely obvious that the Government of El Salvador, whatever efforts it might be making, is failing dismally to make significant progress in controlling indiscriminate and gross violations of internationally recognized human rights. The statements of Amnesty International are ample testimony to this fact. Again, the minimum conditions of section 707 are not being satisfied.

Section 707 imposes the further condition that the Salvadoran Government must make continued progress in implementing essential economic and political reforms—reforms essential to a strong and continued civilian component in the government. The administration's increased military support is having the effect forecast months ago by Ambassador Robert White: The conversion of the Junta into a right-wing dictatorship, controlled by the military in the service of the most unrepresentative elements in Salvadoran society.

Again, there must be strong United States and international pressure for control of the military by the civilians in the Salvadoran Government, for meaningful land reform to give the dispossessed and wretchedly poor in El Salvador some small chance for an improved lot—and to make it possible to bridge the chasm between rich and poor in that society.

And finally, section 707 requires that the Salvadoran Government must demonstrate its willingness to negotiate an equitable political resolution of the civil strife there with any group that renounces and refrains from further military or paramilitary opposition activity.

I regret to say that not only is the administration not actively encouraging international efforts to reach a negotiated, mediated solution to the Salvadoran violence with an in place truce and no foreign military intervention—efforts being undertaken by Mexico, Venezuela. the Socialist International, by the Salvadoran Catholic Church, by the Organization of American States, and by other friends and allies of the United States, But it appears to be discouraging such efforts. The chilly response by the administration to the August 28 Franco-Mexican declaration is an unfortunate example of this policy.

Nor has the Salvadoran Government indicated a willingness to negotiate such a resolution of the conflict. The Congress should judge the administration's future request for assistance to El Salvador by evidence of a change in this mistaken and misguided policy.

And I repeat the call made by Bishop Rivera y Damas, that a dialog between the contesting parties should be initiated.

Section 707 requires that the Salvadoran Government be committed to the holding of free elections at an early date. The administration has placed considerable emphasis on the declarations of the Salvadoran Government to hold elections, and has recently stated that discussions or negotiations on electoral issues among opposing parties could play a role leading up to elections.

I agree that elections are essential when they can indeed be free elections providing genuine choices for the Salvadoran people.

But I also believe that present conditions are such that a mediated, negotiated solution to the basic conflict, and an internationally monitored cease fire are required so that competing parties can campaign in freedom from fear of abduction and murder, which has been the fate of opposition politicians during the past months.

Recognizing this situation, the Salvadoran Bar Association has concluded that condtions are impossible for holding elections, and has therefore decided to decline to participate in the work of the election commission which has been set up to prepare for elections in the spring of 1982.

With regard to the conditions for negotiation and for elections, section 707 requires that some consistent and coherent attempt be made to establish a future in El Salvador with political agreement and ballots, instead of military power and bullets.

The people must know that the security forces of the Junta are not determining who can campaign, who can vote, who can speak, who can hold rallies, and who will count the votes. Only a process that permits full participation by the Junta and the opposition in establishing the electoral rules and framework in which such an election will occur. And that process requires an outside mechanism of mediation to permit the parties "to negotiate an equitable political resolution of the conflict."

An election without that element, as the experience with the abortive internal settlement in Zimbabwe shows, will yield nothing.

It will not halt the fighting and the killing and it will not produce any new possibility to end the distintegration of the fabric of society in El Salvador.

I fear, Mr. President, that the administration may close its eyes to the realities of the situation in El Salvador and may attempt to certify that the conditions imposed by section 707 are being met. If that becomes the case, and the situation in El Salvador continues as it is now, then full and open hearings should be held on any such certification. The administration should know that it is not form that counts, but that the substance of U.S. policy is at issue.

and that it will have to make a considerably better case than that contained in Assistant Secretary Enders' recent remarks for the certification to be accepted by the Congress.

As I have noted, Mr. President, the legislation which Senator TSONGAS and I have sponsored (S. 728) goes considerably further than the provisions of section 707. Our legislation requires a suspension of all military assistance and support to El Salvador until the United States actively encourages—and El Salvador cooperates in—international efforts to reach a fair and peaceful mediated solution to the conflict, to obtain an in-place truce between the parties involved, to seek a conference of these parties, and to oppose the introduction of any arms or military personnel from any foreign source into El Salvador.

Military assistance and support would be suspended until the United States vigorously investigates reports of, and prosecutes any individual in the United States found to be responsible for, the financing of assassination squads or other terrorist activities in El Salvador.

Our bill would also require that the Government of El Salvador carry out a thorough and complete investigation of the murders of the six American citizens, and take definitive steps to bring to justice those responsible for such murders, before military aid could be provided. The Salvadoran Government would also have to investigate and seek the prosecution of individuals—inside or outside the security forces—responsible for acts of murder and terrorism.

Salvadoran citizens would have to continue to have a substantial role in the decisionmaking and leadership of their government, and specific written requests by El Salvador for any future aid would be required.

I believe that reliance on a military solution to the tragedy of El Salvador continues to be a grave error on the part of the administration. The administration should read in section 707 a clear warning to reconsider its policy and to pursue the avenues for peace urged by many of my colleagues, by our friends and allies, by American religious leaders, and by the church in El Salvador.

I believe that the administration should resolve to get at the bottom of the murders of American citizens in El Salvador, and I believe that the administration should change its policy toward the great numbers of homeless cast out of El Salvador by the violence there, and to grant Salvadoran refugees the same status that refugees from conflicts in Southeast Asia and elsewhere are granted.

It is clear that American arms and American military personnel have not improved the situation in El Salvador. I am concerned that the American military presence continues to expand in the area, now including reports of green berets in neighboring Honduras.

And no one in the administration has faced the question: What will the United States do if one of these American soldiers is killed in guerrilla fighting in El Salvador? As the violence and murders and suffering continue unabated, the junta gives precious little evidence of responding to the real needs of the people. Only a mediated and negotiated solution to that civil strife, only more representative government, only social and economic justice for all the people of El Salvador will bring to an end the violence and devastation in that tortured land.

I have already mentioned the finding of Amnesty International that the Salvadoran security forces have engaged in a gross and consistent pattern of human rights abuses. In view of the requirements of section 502(b) of the Foreign Assistance Act, I believe that the administration has a prior obligation to stop all security assistance to the Government of El Salvador forthwith, or immediately to provide the Congress with its justification of extraordinary circumstances warranting, in its opinion, the continuation of this assistance.

I believe, furthermore, that the Committee on Foreign Relations, or the Senate as a whole, should request the Secretary of State to provide the statement on observation of human rights in El Salvador as specified in section 502b, paragraph (C).

In conclusion, Mr. President, I wish to point out that the House version of section 707 of the Senate bill contains certain provisions which impose more stringent conditions on the continuation of military assistance to El Salvador.

I hope that, in conference, the conferecs will recognize the considerable sentiment in the Senate to move beyond the conditions as expressed in section 707, and accede to the House version.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[Letter from Apostolic Administrator of San Salvador]

ARZOBISPADO, EL SALVADOR, C.A.,
*April 10, 1981.*

HON. EDWARD M. KENNEDY,
*U.S. Senator,*
*Boston, Mass.*

DEAR SENATOR KENNEDY: Your warm greetings to me on the occasion of my visit to Harvard were most gratefully received. I am likewise pleased at your sentiments of support for the purpose of my visit which is to make contribution as best I can toward a solution of the problems afflicting my country.

May I be so presumptious to ask that you use your position in the Congress of the United States to see that military aid to my country will cease and that support is given to a process of dialogue that will bring about a just and peaceful solution to the present conflict and violence.

I am especially heartened by your pledge of assistance to do what you can to further a political solution, end military intervention and to see that the conflict of our country be resolved in a political way rather than military.

In order to achieve that it is needed that the military sectors of El Salvador receive the necessary pressures so they might open themselves to dialogue and negotiations.

Sincerely yours in Christ,
ARTURO RIVERA Y DAMAS,
*Apostolic Administrator,*
*Archdiocese of San Salvador.*

---

U.S. SENATE,
*Washington, D.C., May 5, 1981.*

Most Reverend ARTURO RIVERA Y DAMAS,
*Apostolic Administrator,*
*Archdiocese of San Salvador.*

DEAR BISHOP RIVERA Y DAMAS: Thank you very much for your thoughtful letter of April 10, which I have just received.

I completely agree with you that military aid to El Salvador should cease and that all our efforts should be devoted to dialogue and negotiations leading to a just and peaceful solution to the present tragic conflict. I wish to assure you that I will do all I can to press for this policy in the United States Senate, and I am enclosing a copy of the legislation I have introduced with Senator Paul Tsongas and others to this end.

I very much welcomed your recent visit to the United States. I pray for the success of your efforts to achieve peace, justice and reconciliation in El Salvador, and I hope that you will let me know if there is anything further that I can do to help from the United States.

With my deep respect and best personal wishes,

Sincerely,

EDWARD M. KENNEDY.

---

RESOLUTION ON EL SALVADOR ADOPTED BY THE UNITED NATIONS SUB-COMMISSION ON PREVENTION OF DISCRIMINATION AND PROTECTION OF MINORITIES

Question of the violation of human rights and fundamental freedoms, including policies of racial discrimination and segregation and of apartheid, in all countries, with particular reference to colonial and other dependent countries and territories: Report of the Sub-Commission under Commission on Human Rights Resolution 8 (XXIII).

Draft resolution submitted by: Mr. Chowdbury, Mr. Eide, Mr. Foli, Mr. Joinet, Mr. Khalifa, Mr. Martinez Baez, Mr. Masud, Mr. Mubanga-Chipoya, Mr. Mudawi, Mrs. Odio Benito, Mrs. Perdomo de Sousa, Mr. Tosevski, Mr. Whitaker, Mr. Yimer.

The Sub-Commission on Prevention of Discrimination and Protection of Minorities,

Guided by the principles and purposes of the Charter of the United Nations, the Universal Declaration of Human Rights, the International Covenant on Civil and Political Rights, particularly articles 1 and 25 of the Covenant which relate to the right to self determination, and the provisions of the Geneva Conventions, particularly article 3 which is common to those Conventions,

Emphasizing that suppression of the will of a people or a group, and gross violations of their human rights are incompatible with the right to self-determination,

Recalling the well-respected principle that peoples under suppression of any form, or under domination, have the right to resist such suppression or domination, and should be supported by the international community,

Recalling that in its resolution 35/192 the General Assembly expressed its deep concern at the grave violations of human rights and fundamental freedoms in El Salvador and requested the Commission on Human Rights to examine, at its thirty-seventh session, the situation of human rights in that country,

Taking note of the decision taken by the Commission on Human Rights in its resolution 32 (XXXVII) of 11 March 1981 to designate a special representative with the mandate to investigate the reports about grace violations of human rights in El Salvador and make recommendations as to what steps the Commission could take to help to secure the enjoyment of human rights and fundamental freedoms, including economic, social and cultural rights,

Deeply alarmed by information submitted to the Sub-Commission at the present session from which it appears that the situation of human rights in El Salvador continues to gravely deteriorate,

Convinced that only respect for article 25 of the International Covenant on Civil and Political Rights will assure to the Salvadorean nation, though the participation of all political forces, the full exercise of its fundamental rights in establishing a democratically elected Government,

Convinced also, however, that at the present time the conditions for holding truly democratic elections do not exist in El Salvador,

Agreeing with the call addressed by the Commission to all parties to bring about a peaceful settlement and to seek an end to acts of violence in order to end the loss of lives and the suffering of the people of El Salvador,

Expressing the need for all the Salvadorean political forces to contribute to the initiation of this peaceful settlement and that all efforts to this end should be welcomed,

Recalling meanwhile that the Commission referred, in its resolution 32 (XXXVII) to the rules of international law, particularly to article 3 common to the Geneva Conventions of 12 August 1949 concerning the law of war, which are applicable to armed conflicts not of an international character and which require the parties to the conflict to apply a minimum standard of protection of human rights and of human treatment,

Convinced in this respect of the necessity for urgent humanitarian intercession, in the spirit of the Geneva Conventions and the Protocols thereto, especially by the International Committee of the Red Cross,

1. Recommends to the Commission that it continue to consider the situation of human rights violations in El Salvador as long as the necessary conditions for a just solution are not present;

2. Decides to request the Secretary-General to bring to the attention of the Commission and its Special Representative the information received by the Sub-Commission concerning the grave violations of human rights and fundamental freedoms;

3. Takes note of the co-operation shown the International Committee of the Red Cross, the humanitarian actions of which contribute to lessening the grave suffering of numerous groups of civilian population and hopes that such action spreads to persons who are in conflict on both sides.

4. Requests the Secretary-General to inform the Sub-Commission at its thirty-fourth session of the action of the Special Representative of the Commission and of the deliberations of the Commission on this matter as well as of any consideration which may be given to it by the General Assembly, the Economic and Security Council or the Security Council.

(NOTE.—This resolution was approved 9 September 1981. Twenty-three countries voted in favor and one against (Argentina).)

The PRESIDING OFFICER. The Chair recognizes the Senator from North Carolina.

UP AMENDMENT NO. 414

Mr. HELMS. I thank the Chair.

Mr. President, I send an unprinted perfecting amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from North Carolina (Mr. HELMS) proposes an unprinted amendment numbered 414 as a perfecting amendment to the bill.

Mr. HELMS. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 59, line 18, strike out "(a) Funds" and all that follows through page 62, line 18 and insert in lieu thereof the following:

"SEC. 707(a) The Congress finds that peaceful and democratic development in Central America is in the interest of the United States and of the community of American States generally, that the recent civil strife in El Salvador has caused great human sufferings and disruption to the economy of that country, and that substantial external assistance to El Salvador is necessary to help alleviate that suffering and to promote economic recovery within a peaceful and democratic process.

"(b) It is the sense of the Congress that assistance furnished to the Government of El Salvador, both economic and military, should be used to encourage—

"(1) the realization of the United States policy objective of achieving a peaceful and democratic resolution to the strife in El Salvador;

"(2) full observance of internationally recognized human rights in accordance with sections 116 and 502B of the Foreign Assistance Act of 1961;

"(3) full respect for all other fundamental human rights, including the right of freedom of speech and of the press, the right to organize and operate free labor unions, and the right to freedom of religion;

"(4) continued progress in implementing essential economic and political reforms, and support for the private sector;

"(5) a complete and timely investigation of the deaths of all United States citizens killed in El Salvador since October 1979;

"(6) an end to extremist violence and the establishment of a unified command and control of all government security forces in this effort;

"(7) free, fair and open elections at the earliest date, the modalities of which should be negotiated between all groups which renounce and refrain from further military or paramilitary opposition activity in pursuit of an equitable political resolution of the conflict;

"(8) increased professional capability of the Salvadoran Armed Forces in order to establish a peaceful and secure environment in which economic development and reform and the democratic process can be fully implemented, thereby permitting a phased withdrawal of United States military training and advisory personnel at the earliest possible date.

"(c) Within six months after the date of enactment of this section, the President shall report to the Congress concerning the status of his efforts in implementing the U.S. policy objective of a peaceful and democratic resolution to the strife in El Salvador and shall identify any remaining obstacles to achieving that objective."

Mr. HELMS. The perfecting amendment is almost precisely the same as the amendment of the Senator from Indiana.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. PELL. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

UP AMENDMENT NO. 415

Mr. PELL. Mr. President, this seems to be a parliamentary day, and I rise again to offer an amendment to the perfecting amendment to section 707 of the bill. The perfecting amendment to the text of the first-degree amendment would have on page 1, line 17, before the word "funds" insert the words "in the fiscal years 1982 and 1983".

I send the rest of the text to the Chair.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Rhode Island (Mr. PELL) proposes an unprinted amendment numbered 415.

The PRESIDING OFFICER. The Chair would advise the Senator from Rhode Island that the amendment is drafted to the language of the bill and it must be directed to the perfecting amendment proposed by the Senator from North Carolina.

Mr. PELL. Mr. President, my understanding, then, is that the amendment is in order.

The PRESIDING OFFICER. The amendment is not in order.

Mr. PELL. In what way is it not in order?

The PRESIDING OFFICER. The amendment is directed toward the language of the bill. In order for the amendment to be in order, it must direct itself to the perfecting amendment filed by the Senator from North Carolina.

Mr. PELL. In that case, would it be in order to ask the Chair if I could modify my amendment to have it dependent upon the language of the Senator from North Carolina? I would move my language be so modified.

The PRESIDING OFFICER. The Senator can modify his amendment at any time until such time as the Senate has taken action on it. But we must have the modification sent to the desk.

Mr. PELL. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. DOMENICI. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOMENICI. Mr. President, I know there is no time limitation on this, but, for purposes of judging my own time, I yield myself 10 minutes.

## THE BUDGET SITUATION: WHERE WE STAND NOW

Mr. DOMENICI. Mr. President, after several weeks of public discussion and intensive private meetings, the Nation's leaders are faced with a most typical situation: The Federal budget seems likely to produce deficits larger than economically healthy and politically acceptable.

This situation occurs annually. That it occurs again this year should surprise no one. After all, relatively large deficits were projected by President Reagan for the fiscal years 1983 and 1984 when he transmitted his budget message in March. He noted that in order to achieve a balanced 1984 budget, we would have to cut about $30 billion in 1983 and $44 billion in 1984, beyond what we had cut through reconciliation.

In short, total cuts in 1983 would amount to about $77 billion and total cuts needed in 1984 would reach about $100 billion below what current policy as of January of this year would produce.

The Congress has already been through one large budget cutting exercise, an exercise we all knew was only the first step. Wall Street knew months ago what the

facts were. All of us in policy positions knew months ago what we faced. The present projected deficits are no shock and no surprise.

They are entirely part of what the President has already told us. And, more pessimistic economic projections—as speculative as any that either the administration might use or any other group trying to predict events 30 months away—would yield theoretically larger deficits. This, of course, is no surprise, either.

That the President is now under some pressure to reveal his plan for continuation of budget cuts is also no surprise. We need some outline of where further cuts might be proposed so that we could begin planning for the budget process for the rest of this year and next year and even into 1984. And, with a jittery Wall Street so sensitive to interest rate movements, any plan that holds the promise for suppressing future deficits seems especially timely right now.

There is nothing new in all this. What is new is a surprising vague consensus that things are going wrong, that the economy is getting worse—and that there is nothing we can do about it.

I am surprised that Members of Congress are expressing that consensus, if that is what it is, particularly Members of my own party in the Congress.

Did we think we could solve the economic problems of this country in 8 months? Had we not been saying, literally for years, that drastic measures would be needed, that sustained and long-range budget restraint would be needed to bring down the Federal budget deficit and move toward a balanced budget? That is what I had been saying, and what I am still saying, as chairman of this Senate's Budget Committee.

Here is our current situation, as I see it. The Federal Government's accounts can be grossly summarized as follows: Defense spending, entitlement spending, discretionary appropriated accounts other than defense, and revenues. If you want to change the deficits projected, you must take some actions in these areas. And, using these general categories, we find that Federal spending projections between now and 1984 reveal just where our opportunities are for spending restraint and/or deficit reduction.

First, entitlements, all pensions, AFDC, medicaid, and similar programs and interest on the debt, will comprise about 57 percent of the Federal budget by 1984—the single largest category of spending.

Second, defense spending as a percentage of the budget will increase to about 29.4 percent of outlays by 1984.

Third, discretionary appropriated accounts—all other programs under the Federal Government—will make up 20 percent of spending, if none of those $44 billion in additional cuts are made; or will comprise about 16.7 percent of Federal spending in 1984, if we assume that most of that $4 billion will come from this category. Either way, discretionary appropriated accounts will decline as a percentage of the budget.

Our National Government will receive less revenue than before, as we return to our people large quantities of what would otherwise have been taxed away from them, all of which occurs automatically because of the tax package.

I would think that such a clear picture would rapidly yield a consensus for action. After all, without any action, we could confront historically large deficits, perhaps nearing $100 billion by 1984.

Such deficit projections have contributed to high interest rates, the market slowdown, and the general pessimism that has grasped part of the marketplace. We all know that even if interest rates come down, absent any action aimed at the 1983 and 1984 deficits, those rates will surely rise again.

Yet, in recent days, the newspapers have carried the dismal story: We—the Members of Congress—apparently think we can do nothing. Or, at least, we think that doing nothing is preferable to doing anything about the four elements of fiscal policy within our control, or even some of them.

There has been entirely too much political rhetoric. For example, surrounding suggested changes in the way we would like to handle entitlements over the next few years. What this Senator would ask of those who receive Federal pensions is this: Would you refuse to take a 20-percent, instead of a 30-percent, increase over the next 3 years, if it would make the social security system solvent for all time, and remove the fear we have engendered in our elderly people?

Or are you telling us that you are not willing to put off a pay raise for yourselves for 6 months, or a year, while your country works its way out of economic crisis?

I do not believe the question has been put to Federal pensioners in that way. Instead, the people are asked if they want to cut social security, a question aptly designed to create panic among our old people. That causes obvious political problems, problems many of us cannot seem to face.

Others are saying that attempting to cut appropriations by large amounts beyond the cuts we have already imposed is politically impossible. Still others say that any cuts in national defense larger than those recently proposed by the President would endanger our Nation's security and send the wrong signal to both our allies and our adversaries.

And, where revenues are concerned, I see no consensus to raise revenues by delays or deferrals of the recently enacted tax cuts or by elimination of special tax treatment, and I see no move to address the myriad possible user and excise taxes that are on the books.

And, yet, we still turn to the President for action. I must ask: What action can he propose that we will accept?

It seems to me that what we have been saying to the President and the people is that maybe all our problems will go away.

Perhaps we will survive the interest rates we see now and the downturn in the economy that seems to be taking place. Maybe it will work out without our help.

Perhaps we will not have to bite any more bullets. Perhaps problems in social security insolvency will miraculously disappear without our intervention. Perhaps indexed programs will decrease instead of increase. Perhaps events will solve our problems for us.

My experience tells me that none of this will happen and that we are like railroad engineers watching two trains headed for a collision, hesitating as we reach for the switch because we hope someone else will intervene.

My view is that we have to intervene. The President cannot do it alone. Now is the time to act.

Mr. President, the second concurrent budget resolution will soon be before us. My committee will have to face within the next few weeks the problems so many seem unable to face this week. Because the Budget Act orders it, and because it is good policy to do so, we will prepare a second budget resolution.

Many of those solutions that we seem to reject out of hand this week may very well be among those solutions that my committee will recommend to our colleagues.

We will not do so with any great enthusiasm, and not with any illusions that we will prevail if others disagree with our prescriptions. But, we will do so because good public policy and the needs of the Nation dictate that we do so.

We will recommend some changes in the entitlement programs and their increasing cost. I believe that we can run, but we cannot hide from entitlements and other problems I have discussed. They are too large a part of the Federal budget and they are growing too fast.

When the President presents his spending reduction goals tomorrow night, I will do all I can to help him achieve those goals in this Congress, and the next. I believe that that is my job as chairman of the Senate Budget Committee and as a Senator concerned.

I know I can count on the members of the committee, on both sides of the aisle, to carefully and objectively consider the President's proposals, to develop proposals of their own, and to work to give you a second concurrent budget resolution that truly faces and addresses the economic problems facing us today. I do not expect this Senate to panic before the need to exert leadership. We cannot escape but we must proceed.

We must face these problems. We were elected to do this. Good public policy and the needs of the Nation dictate that we do so.

Mr. President, I yield the floor.

Several Senators addressed the Chair.

The PRESIDING OFFICER. The Chair recognizes the Senator from South Carolina.

Mr. HOLLINGS. I thank the distinguished Chair.

Mr. President, I agree that we should have a second budget resolution. In fact, it should have been adopted by September 15. However, work on it has been

delayed by the administration's recent change in signals.

Let us talk about those changes in signals so we will understand the task that is ahead of us with the second budget resolution, and its relationship to President Reagan's program for economic recovery.

On February 18, the President presented his plan of spending cuts for 1982. At that time, Mr. President, he said it was a complete and full revision of the fiscal year 1982 budget. That fully revised budget was submitted to Congress on March 10.

When we had that program submitted, we heard various rumors about further cuts. Shortly thereafter, Mr. Stockman testified before the Budget Committee that there would need to be further cuts of $30 billion in 1983 and $44 billion in 1984. But he emphasized in his statement that those were cuts to be proposed in future years.

The truth of the matter is, as the distinguished chairman of the Budget Committee knows, there was a tentative list of further cuts that had been worked out at OMB which got characterized as a doomsday list.

I was told at one time that a similar list was presented to our distinguished chairman by Mr. Stockman. Upon hearing the list of added cuts, Mr. Stockman was told to close the black notebook and leave. His list of further cuts would only make the job of passing 1982 budget more difficult.

The Director of the Office of Management and Budget said he would refine those cuts later this year and submit them next year.

That brings us to tomorrow night and the remarks of the distinguished chairman of our Budget Committee. There is no nationwide effort to change the Reagan program except by President Reagan himself. Tomorrow night he will ask to change his own program and he will ask for further spending cuts now that he told us would come in the future.

This Senator, as everyone knows, thought that we ought to make the budget reductions specific and not rely on unspecified cuts in the future because the market would not react to future-year promises.

It is ironic that an administration that complained of gyrating fiscal policy has now changed its own budget. It is the distinguished President himself who is changing the Reagan economic plan by cutting defense. He came to Washington pledging to increase defense. We knew of those increases. Now he says we need cuts.

So, the administration is making two major changes to its plan. These changes are not being made by panicky Senators or others. They are being made tomorrow evening by the President himself.

Mr. President, let me get right to the core of the problem. Then I shall be glad to yield, because other Senators want to talk. Suppose President DOMENICI came to me and said, "Now, Hollings, I want you to write me a talk on spending cuts; I have to go on national TV tomorrow. We have to outline our plan and you have to make the talk realistic, plausible, appealing—you know, I am a great communicator, and you have to write me a very persuasive talk on how to cut spending."

I would say, "Mr. President, you have certain things that you are not going to be able to cut through the Appropriations Committee. You have $48 billion in the medicare account. You have some $20 billion for unemployment compensation. That is almost $70 billion. You have $20 billion, President DOMENICI, in retirement pensions for Senators and civil service workers. Then you have $15 billion for the veterans."

Instead of decreasing that, they increased it yesterday afternoon in the House.

So I would say, "Mr. President, you cannot touch that $100 billion. You cannot touch $116 billion in interest payments. That is over $200 billion. You cannot touch the $200 billion in defense; you have already cut that enough. And you have the social safety net, so you cannot cut social security. So that is $560 billion out of a $720 billion budget."

So I would say, "President DOMENICI, you should not talk about a 10-percent cut across the board. That is not an appealing, persuasive, great communicator speech. Don't make the talk."

That is what I would have to counsel him: "Don't talk about large across-the-board slashes in spending because this thing is too serious. Such statements lack credibility.

"The high interest rates are causing problems for Republicans, Democrats, small business, farmers, everybody. To restore the confidence of the financial markets in your plan, you have to go back, President DOMENICI, to your revenue picture. The tax cut was where you really made your mistake.

"You went farther than you ever expected to go."

I am confident that 3 years ago the distinguished Senator from Delaware never expected Kemp-Roth to pass. They expected the Democrats to have Congress. They expected the Democrats to have the White House and it was going to be the Democrats' deficit. That did not bother them, because that was their plan for cutting back the size of Government. But now they are in and playing the game for keeps. And we have the high interest rates to prove it. I would plead with the President to give his existing cuts time to work. It is not even October 1. That is what they are telling us on taxes.

The President must go to the revenue side of the budget. There are those who think that would be unseemly. I went to one little conference this morning. They said, "Senator, don't you think it is a little unseemly to ask the President to go back on tax cuts now, just a month after they were passed?"

I said "You don't understand the economy and the high interest rates. Last year, President Carter made his budget speech and called it austere. Within 4 weeks, we asked him to go back—the Democratic leadership asking a Democratic President, "Go back, Mr. President, take your entire austere budget talk and resubmit it."

All we are asking the President of the United States to do is not to belabor the Congress and the people of this land for the impossible. I can think up a few more cuts. Senator DOMENICI can think up a few more cuts, President Reagan can think up a few more cuts. But they need $100 billion by 1984 to get us into the black.

That is what is bothering the market. Now is the time for the administration to listen—not to me—to the business community. The corporate leaders, the investors—they are telling him loud and clear. The stock market has dropped 100 points and the bottom has nearly fallen out of the bond market.

Now is not the time to come and get the distinguished Senator from New Mexico, who has done a magnificent job on this budget, to bolster the troops for more spending cuts. That is not the problem—the problem is the tax cut.

Mr. President, you know it, I know it, everybody on Wall Street knows it. But they will not write it.

Arthur Burns says, "No, I am not for the tax cut." Where did you ever see that in the newspaper, Mr. President? Go look in the record of the Budget Committee. Herbert Stein said so. I quoted them in an article I wrote for the Washington Post.

They said it was not going to work. Now it has begun to work and we can see the damage around us. We have not done anything as Democrats, to change the Reagan program. It is the President who will be changing his own program tomorrow night. He said those future cuts were to be in future years. We cannot cut programs in 1983 or 1984 for which there are no appropriations. Right now we can only make future cuts in social security and other entitlements which the President said were a safety net and, therefore, should not be touched.

So, Mr. President, do not keep giving the people a good Hollywood show. Give them the truth now and tell them what is going on in this land: Kemp-Roth is a time bomb.

Mr. President, I am glad to yield the floor.

---

## INTERNATIONAL SECURITY AND DEVELOPMENT COOPERATION ACT OF 1981

The Senate continued with consideration of the bill.

The PRESIDING OFFICER. The Chair recognizes the Senator from Rhode Island.

UP AMENDMENT NO. 415

Mr. PELL. Mr. President, I rise to offer an amendment to the perfecting amendment offered earlier by Senator HELMS to section 707 of the bill. I send it to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Rhode Island (Mr. PELL) proposes an unprinted amendment numbered 415.

Mr. PELL. Mr. President, I ask unanimous consent that further reading of the amendment be suspended.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 1 of Helms UP-414, strike subsection (b) and all that follows and insert the following:

"(b) (1) In fiscal years 1982 and 1983 funds may be obligated for assistance for El Salvador under chapters 2 or 5 of part II of the Foreign Assistance Act of 1961, letters of offer may be issued and credits and guarantees may be extended for El Salvador under the Arms Export Control Act, and members of the Armed Forces may be assigned or detailed to El Salvador to carry out functions under the Foreign Assistance Act of 1961 or the Arms Export Control Act, only if every 120 days after enactment of this Act, the President makes a certification in accordance with subsection (c).

"(b) If the President does not make such a certification, then the President shall immediately—

"(1) suspend all expenditures of funds and other deliveries of assistance for El Salvador which were obligated under chapters 2 and 5 of part II of the Foreign Assistance Act of 1961 after the date of enactment of this Act;

"(2) withhold all approvals for use of credits and guarantees for El Salvador which were extended under the Arms Export Control Act after the date of enactment of this Act;

"(3) suspend all deliveries of defense articles, defense services, and design and construction services to El Salvador which were sold under the Arms Export Control Act after the date of enactment of this Act; and

"(4) order the prompt withdrawal from El Salvador of all members of the Armed Forces performing defense services, conducting international military education and training activities, or performing management functions under section 515 of the Foreign Assistance Act of 1961.

Any suspension of assistance pursuant to paragraphs (1) through (4) of this subsection shall remain in effect during fiscal year 1982 until such time as the President makes a certification in accordance with subsection (c).

The certification required by subsections (a) and (b) is a certification by the President to the Speaker of the House of Representatives and to the chairman of the Committee on Foreign Relations of the Senate of a determination that the Government of El Salvador, to the extent not precluded by forces outside its control—

"(1) is making a concerted and significant effort to control gross violations of internationally recognized human rights;

"(2) is moving to achieve control over all elements of its own armed forces, so as to bring to an end the indiscriminate torture and murder of Salvadoran citizens by these forces;

"(3) is making continued progress in implementing essential economic and political reforms, including the land reform program;

"(4) is committed to the holding of free elections at an early date and to that end has demonstrated its willingness to negotiate an equitable political resolution of the conflict with any group which renounces and refrains from further military or paramilitary opposition activity.

Each such certification shall discuss fully and completely the justification for making each of the determinations required by paragraphs (1) through (4).

(d) On making the first certification under subsection (a) of this section, the President shall also certify to the Speaker of the House of Representatives and the chairman of the Committee on Foreign Relations of the Senate that he has determined that the Government of El Salvador has made good faith efforts both to investigate the murders of the six United States citizens in El Salvador in December 1980 and January 1981 and to bring to justice those responsible for those murders.

Mr. PELL. What this amendment does, Mr. President, is exactly the same as the previous amendment I offered. It provides for certification three times a year and softens the language of paragraphs 1 and 4 of the various items that are to be certified. I hope this compromise will be acceptable to my colleagues.

I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second.

The yeas and nays were ordered.

Mr. PERCY addressed the Chair.

The PRESIDING OFFICER. The Chair recognizes the Senator from Illinois.

Mr. PERCY. Mr. President, we now have a very complex situation facing us.

Mr. President, I should like the Parliamentarian to confirm this, as I try to sort out what has happened here, to see whether the sequence is as I have jotted it down as we have gone along.

Senator LUGAR offered a first-degree amendment which was a sense of the Senate resolution involving El Salvador and our assistance to El Salvador.

Senator HELMS offered a substitute amendment which constituted the Lugar amendment but deleted the words "land reform" from the Lugar amendment.

Senator PELL offered a perfecting amendment which, in a sense, required three certifications by the President each year as to whether or not the conditions enumerated in the amendment were being met. If those conditions were not being met, then the aid program would be terminated.

Mr. HELMS. Mr. President, if the Senator will yield, the Senator from Rhode Island offered a perfecting amendment to the Lugar amendment. I believe that is correct.

Mr. PERCY. Yes.

The PRESIDING OFFICER (Mr. WARNER). The Senator is correct.

Mr. PERCY. Senator PELL offered a perfecting amendment to the Lugar amendment. That is right.

Then, Senator HELMS offered a perfecting amendment to the bill.

Mr. HELMS. That is correct.

Mr. PERCY. This was again the Lugar sense-of-the-Senate resolution deleting "land reform."

Mr. HELMS. That is correct.

Mr. PERCY. Senator PELL has now offered a perfecting amendment which again brings us to the point where the first vote of the Senate will be on three certifications per year.

Mr. President, I find myself in an unusual position, being a positive person, to be voting "no" five times in a row, if each of the amendments, or perfecting amendments, or whatever, should fail. I should like to explain why I do.

In a sense, our objectives and goals overall are similar. We want, in every way we can, to strengthen the people of El Salvador and its present government. None of us feels that an alternative government is available. This is not a perfect government, by any means.

José Napoleón Duarte, the president of the governing junta indicated forcefully to us at coffee yesterday afternoon, in the Foreign Relations Committee room, that they are going to hold elections.

We recognize that they must have free elections so that their country can have a government that is installed by the people and that, truly, they would have a chief executive who could be held responsible for his actions and would be responsible to the people. They look upon this as absolutely essential. And we believe it is a fact that José Napoleón Duarte is one of the forces in the country that is working toward this goal. We support that goal, and we support him—on both sides of the aisle.

The question, then, simply, is how best to get there? We have a variety of opinions.

I believe it might be well to start with the opinions rendered by José Napeleón Duarte, because yesterday he made a very moving statement, and his responsiveness to our questions was forthright.

We saw him as a man of eminent goodwill, with a strong desire to serve his country and his people and to bring to an end the crisis that his people and his government and country have been subjected through the months and years.

Perhaps I can begin with a letter that was delivered to me this afternoon, a letter written by José Napoleón Duarte, president of the junta, reflecting on our meeting yesterday. He says in this letter, dated September 23:

EMBAJADA DE EL SALVADOR.
*Washington, D.C., September 23, 1981*

Hon. CHARLES H. PERCY,
*Chairman, Committee on Foreign Relations, U.S. Senate,*
*Washington, D.C.*

DEAR MR. CHAIRMAN: I want to thank you and the members of the Committee on Foreign Relations for the opportunity you afforded me to discuss with you the serious situation confronting El Salvador and my commitment toward a peaceful democratic solution.

My government continues: to struggle in defense of human rights and to put an end to the violence which has beset us from radical sectors of the right and the left; to continue the process of social and economic reforms that will improve the quality of life of our people; and to achieve political stability through free, just and democratic elections which will enable the Salvadorean people to choose their own destiny.

All of our efforts and energy are concentrated in achieving these objectives. The very reason for our presence in the Government is their pursuit and realization.

I pledge to you that I will continue to work to achieve the stated goals. I want my countrymen to live in a free democratic and just society. You can be assured that you can rely on this commitment. I will never abandon my fight in defense of these principles and objectives.

I welcome the support and understanding of friendly governments, and especially that of the United States, in favor of a democratic and peaceful solution in our country. I reiterate the call that we have made to the FDR, as well as all political groups in El Salvador, to lay down their arms and register as a political party and thus incorporate it-

self into the electoral process. Full participation in the political dialogue and the elections will define the fundamental bases of our country's future.

The objectives which I have cited are embodied in the set of conditions included in S. 1196 which the Senate will soon be considering. The rationale reflected in the conditions coincides with my own stated objectives but the Government and the people of El Salvador would consider legislative conditions unwarranted. I hope that the Senate will recognize the conditions as an unacceptable imposition on a government friendly to the United States and fully committed to fulfill its pledge.

I would appreciate your conveying to the members of the Senate the position of the Government of El Salvador on this important issue.

Sincerely,

JOSÉ NAPOLEÓN DUARTE,
*President,*
*Junta Revolucionaria de Gobierno.*

During our meeting with President Duarte, he talked about the alternatives. He asked the guerrillas in his country to lay down arms. We recognize the repression that the extreme right and the extreme left would offer in El Salvador. It would be the kind of "freedom" that Khomeini has offered in Iran—the day before yesterday another 149 people before the firing squad, without the right of trial. The excesses that might be wreaked upon the people of El Salvador would be unbearable. We recognize, also, the efforts toward moderation by the president of the junta, President Duarte. The expressions made to us, and what he is trying to do, represent the best possible hope, at this time, for his people.

When President Duarte discussed the language of our bill with us in our session in the Foreign Relations Committee, we saw the certification criteria as goals that we share together.

Mr. President, I hope that those in my own State of Illinois who in good conscience have protested vigorously against economic and military assistance to the junta in El Salvador will look at the sincerity of the words expressed by José Napoleón Duarte—sincere, because 17 Members of the Senate, sitting with him, could feel that sincerity, could feel his commitments as he spoke about his people, about his desire to serve them, and about his desire to move toward free elections.

We on the committee are not trying to tell another people what to do. We are simply saying: "These are goals. Do you share them with us? Yes." We heard no dissent from anyone in the room. Other members of his government were with him. There was not one word of dissent about those goals.

But President Duarte recognized that the Senate might put conditions on American assistance. And he said, "We cannot accept conditions established by another people. We have to set our own."

It is our responsibility to make our expectations clear. If I walk into a bank and I say to the banker, "I want to borrow your money, your depositors' money," the bank has the right to lay down the conditions. If you accept those conditions, then you accept the money, and you have the money. Otherwise, you are not likely to get the money.

In this case, the money we are offering is the money of the taxpayers of this country. They have certain aspirations and goals and there must be some guidelines by which we judge when aid can be offered. We have a responsibility to our own taxpayers and to our own conscience to state that there are certain goals on which we would like to see progress.

Mr. President, I should like to reiterate what those goals are, because they have been carefully crafted. And I give considerable credit to the distinguished Senator from Connecticut (Mr. DODD), who has served in the Peace Corps in Latin America, who speaks fluent Spanish and who has an empathy with everyone from Latin American countries. The President pro tempore of the Senate, Senator STROM THURMOND, and I were green with envy in Mexico when the Senator from Connecticut conversed with people there in their own language.

These objectives and goals were read, by José Napoleón Duarte, and he agreed with them as goals. They are not absolutes; they ask for a sense of movement toward a goal or an objective. What we are looking for is progress.

The language of the first goal asked for "concerted effort and significant progress." I think I added one word in that sentence "significant." We argued about what kind of progress and I felt "significant progress" could be measured in "controlling indiscriminate and gross violations of internationally recognized human rights."

We all share that goal. There was no disagreement with it in that room yesterday.

The second goal asked for movement in achieving "control over all elements of its own armed forces." Any government, worthy of its name, should have control over its armed forces.

The head of the National Guard of El Salvador was in the room with us yesterday. There was no objection from him.

The third goal or objective asks for continued progress in implementing essential economic and political reforms including the land reform program.

This goal, including the land reform program, was a goal which yesterday we heard the junta in El Salvador supports. This is a part of their program, part of the progress they want to make.

The fourth goal or objective asks for commitment to the holding of free elections at an early date, a commitment which unequivocally Mr. Duarte committed himself to yesterday.

And a fifth goal asked that the government has demonstrated its willingness to negotiate an equitable political resolution of the conflict with any group which renounces and refrains from further military or paramilitary opposition activity. Again this was a goal on which there was no disagreement whatsoever.

These five goals, plus continuing in good faith efforts to investigate the murders of the six U.S. citizens in El Salvador and to bring to justice to those responsible for those murders were goals that the committee, in its wisdom, felt were noble and worthy goals that should be embodied in the legislation and would be guidelines by which we could gage the direction El Salvador is going in.

I think most of the people of El Salvador would concur, these are the very actions that will give them stability and hope for the future. Without such expectation there would be disillusionment, discouragement, and continued chaos.

As friendly observers, we felt, as a committee, it was useful to offer to the Senate, a statement of the goals and objectives by which we would guide ourselves in evaluating to our continuing ability to be supportive of the Government of El Salvador.

We also made our statement as representatives of the American people, because, as is well known, there are very strong protests and have been very strong protests in the country. The adoption of this language has been reassuring to many of the people who protested our financial assistance to El Salvador. It has answered many of the questions that they asked.

A sense-of-the-Senate resolution, which has no binding effect, is a guideline, appeared to be too weak, at least, to some constituents in Illinois who are deeply concerned about this problem. They wanted it stronger than that. The fact that the committee embodied it in the statute that it was recommending to the Senate was very reassuring to clergymen, priests, nuns, and others with whom I talked who feel very deeply and very strongly about this issue.

So it is for that reason that I shall have to vote, beginning at the sequence at the opposite end, the way they were introduced, against the Lugar first-degree amendment, the sense-of-the Senate because, though the goals and objectives are noble and worthy, I think they must be stronger, they must be embodied in the statute.

Second. I shall have to vote against Senator HELMS' amendment, though we have worked closely together on common objectives and goals in providing stability and peace to an area, but I do feel that land reform is extremely important. It was important, yesterday, when enunciated by José Napoleón Duarte for it offers hope. It is one of the best single things that have happened to that country because it has caused the rug to be pulled out from under those on the left who promise everything, a millennium. It gives something in hand, a piece of soil to work on, something they can call their own. That is what the people want. These people perhaps never thought they would see that day or a government that would provide that to them.

On the issue, let me read into the RECORD an extract from a letter from our former colleague, Senator James Buckley, who is now the Under Secretary of State for Military Assistance. He wrote this letter to me dated May 13, 1981, and he said this in part:

In March, 1980, the moderate government of President Duarte initiated a large-scale land reform program which will ultimately provide land to some 300,000 rural families.

The administration—

This is the Reagan administration—

The administration believes that it was in good measure the successful initial implementation of this program which thwarted the efforts of revolutionary groups to seize control of the government earlier this year. It is our view that the continued success of the Duarte program is necessary if that government is to retain popular support in its efforts to resist renewed leftist threats to its political and economic life. I strongly believe it to be in the best interest of the United States to continue our support for this program.

I am afraid the interpretation would be, if we voted to delete those two words, that we, in effect, would imply we are against land reform.

In a sense we had land reform in this country years ago with the Homestead Act. That act gave a chance, an incentive, to move west and start to work the soil. It was the program that was responsible for the westward movement of this country, a movement I might say regretfully is still going on, depleting our State, taking two congressional seats away in 1980.

The program down there is adapted to their economy. A question was asked by Senator HELMS yesterday about whether this means confiscation without compensation, and the answer was definitely no. There is compensation provided, compensation based on the tax valuation assessment put on by the individual who owned the property.

And there is no confiscation of business or commercial property. The reform program is for agriculture, to bring Salvadorans to a condition where they can feed themselves and provide work for their people.

So I have to regretfully vote against the Helms substitute amendment.

I shall vote against the Pell perfecting amendment simply because I do feel that three certifications a year imposes a tremendous degree of uncertainty into the program.

I feel that three times a year is too much. How could we possibly plan? We plan on an annual basis. We do it on somethings at 3 and 5 years, for our own revenue sharing. Mayors, city councilmen, county board members, township officials pleaded for us to give them some continuity so they could plan and they wanted 3 years. This perfecting amendment would only offer 4 months, 4 months to plan ahead, not knowing whether the next 4 months they would have a program in being or not.

So I felt three certifications are just too many. I would have preferred 1-year certification. The administration obviously prefers no certification. They would simply like to report to us frequently and periodically. Their willingness to do so was evidenced always in a cooperative spirit, but they do not feel we should insert any degree of uncertainty, other than the fact that we are on an annual authorization and appropriation basis.

I would, therefore, have to vote against the Helms perfecting amendment to the bill, which then reinstitutes the Lugar amendment, minus land reform, and the final amendment, the Pell amendment, the perfecting amendment, because that simply refers back to the three certifications a year.

It would be my intention, in the event that all five do not receive a majority vote of the Senate, to offer a new amendment that would incorporate two certifications a year and a report every 4 months—let me correct that, every 3 months—so that every quarter we would get either a certification or a report.

I frankly can say the administration would feel that this frequency is too great. They would prefer none. They would accept one, but they would oppose two. However, if all five have gone down maybe by then we can work something out. For these reasons I respect, as I said to begin with, the intention, the goal, the objectives of my colleagues which cause us to share in common a desire to help El Salvador. The question is how do we do it, answering to our own consciences, to our constituents, and to ourselves.

For the reasons I have enumerated, I would have to oppose all five of the next votes and I hope they will not receive a majority vote, and I would then be pleased to be joined, as I understand I would be, by a number of my colleagues, in offering a final amendment that would be based on two certifications a year and a quarterly report to the Senate.

I feel, Mr. President, unless my distinguished colleague would like the floor, that we would be ready for a vote. I yield the floor.

The PRESIDING OFFICER. The Senator from North Carolina.

Mr. HELMS. I thank the Chair.

I notice with interest that my friend from Illinois was lamenting the fact that he was going to have to vote "No" five times in a row. I would remind him that the Ten Commandments are in the main negative, so there is nothing wrong with voting "No."

I am going to make the distinguished Senator from Rhode Island a proposition that he cannot refuse, if I may have his attention.

I have in mind withdrawing my amendment, which would bring down the Senator's amendment to my perfecting amendment to the bill, so that we can proceed on whatever basis the Senate decides.

I will say, frankly, my purpose here this afternoon was in part to give the administration time to explain its position with respect to the Lugar amendment which the administration supports. I have carried out my responsibility to the administration in that regard.

Mr. President, before I vote I wonder if I might ask the distinguished managers of the bill if they would be willing to lay aside all of the pending amendments for about 2 minutes while we clear a noncontroversial amendment?

Mr. PERCY. It would be perfectly acceptable to the managers of the bill that we do that, but before we do, Senator HELMS, I wonder if I could just indicate that I do feel, as chairman of the committee, a responsibility to support the committee bill wherever I possibly can.

Mr. HELMS. I understand that.

Mr. PERCY. I would like to indicate that the Percy amendment, if we ever get to it, and we are close to it now by taking down your amendment, if we get to the Percy amendment, the Percy amndment would then conform at least in the frequency of certifications.

The committee bill provides for two certifications a year, so we are right back to where we would have been if we had had the bill, except for a confusion which we did not, any of us, detect. As the bill was reported, it would have required innumerable certifications—as the distinguished Senator from North Carolina has correctly said—every time you send a bullet or a jeep, then you would have to write a new certification. I believe that was unintended by the committee. It was an oversight. Everyone has agreed to correct that confusion, so we revert back to the two certifications a year of the original bill.

Mr. HELMS. Mr. President, if the Senator will yield, the question is whether there will be no certification, two certifications as suggested by the Senator from Illinois, three certifications as suggested by the Senator from Rhode Island, and four suggested by Senator DODD; is that essentially correct?

Mr. PERCY. Senator DODD, as I understand it, has accepted and supported the Pell amendment which is the Dodd amendment changed from four times to three.

Mr. HELMS. So it is zero, two, three, is that correct?

Mr. DODD. That is correct.

Mr. PELL. That is correct.

Mr. HELMS. Mr. President, I ask unanimous consent that all pending amendments be laid aside temporarily while we consider a noncontroversial amendment.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

UP AMENDMENT NO. 416

(Purpose: To insert provisions relating to food for peace programs)

Mr. HELMS. Mr. President, I send an unprinted amendment to the desk and ask that it be stated.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from North Carolina (Mr. HELMS) proposes an unprinted amendment numbered 416.

Mr. HELMS. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 52, between lines 1 and 2, insert the following:

TITLE VII—FOOD FOR PEACE PROGRAMS

REPEAL OF OBSOLETE FOREIGN CURRENCY PROVISIONS

SEC. 701. The Agricultural Trade Development and Assistance Act of 1954 is amended—

(1) in section 101, by striking out "for foreign currencies" and inserting in lieu thereof ", to the extent that sales for dollars under the terms applicable to such sales are not possible, for foreign currencies on credit terms and on terms which permit conversion

to dollars at the exchange rate applicable to the sales agreement";

(2) by amending section 103(b) to read as follows:

"(b) except where the President determines that it would be inconsistent with the objectives of this Act, determine the amount of foreign currencies needed for the uses specified in subsections (a), (b), (e), and (h) of section 104 and in title III, and the agreements for credit sales shall provide for payment of such amounts in dollars or in foreign currencies upon delivery of the agricultural commodities; and such payment may be considered as an advance payment of the earliest installments;";

(3) in section 103(d), by striking out "(1)" and by striking out ", or (2) for the purpose only of sales of agricultural commodities for foreign currencies under title I of this Act, any country or area dominated by a Communist government";

(4) in section 103(1), by striking out "obtain commitments from friendly" and all that follows through "United States of America, and ";

(5) in section 104—

(A) in the text preceding subsection (a), by striking out "this title" and inserting in lieu thereof "agreements for such sales entered into prior to January 1, 1972,"; and

(B) in paragraph (3) of the proviso following subsection (k), by striking out "(except as provided in subsection (c) of this section),";

(6) in section 106(a)—

(A) by inserting "(1)" after "(a)"; and

(B) by adding at the end thereof the following:

"(2) Payment by any friendly country for commodities purchased for foreign currencies on credit terms and on terms which permit conversion to dollars shall be upon terms no less favorable to the United States than those for development loans made under section 122 of the Foreign Assistance Act of 1961.";

(7) by repealing section 108; and

(8) by repealing section 109(b).

EMERGENCY OR EXTRAORDINARY RELIEF REQUIREMENTS

SEC. 702. Section 104(d) of the Agricultural Trade Development and Assistance Act of 1954 is amended by striking out "$5,000,000" and inserting in lieu thereof "$10,000,000".

SELF-HELP MEASURES TO INCREASE AGRICULTURAL PRODUCTION

SEC. 703. Section 109(a) of the Agricultural Trade Development and Assistance Act of 1954 is amended—

(1) in paragraph (3), by inserting immediately before the semicolon ", and reducing illiteracy among the rural poor";

(2) by striking out the period at the end of paragraph (10) and inserting in lieu thereof "; and"; and

(3) by inserting the following new paragraph immediately after paragraph (10):

"(11) carrying out programs to improve the health of the rural poor.".

ASSESSMENT OF SELF-HELP PROVISIONS

SEC. 704. Section 109 of the Agricultural Trade Development and Assistance Act of 1954 is amended by adding at the end thereof the following new subsection:

"(d)(1) In each agreement entered into under this title and in each amendment to such an agreement, the economic development and self-help measures which the recipient country agrees to undertake shall be described (A) to the maximum feasible extent, in specific and measurable terms, and (B) in a manner which ensures that the needy people in the recipient country will be the major beneficiaries of the self-help measures pursuant to each agreement.

"(2) The President shall, to the maximum extent feasible, take appropriate steps to assure that, in each agreement entered into under this title and in each amendment to such an agreement, the economic development and self-help measures which the recipient country agrees to undertake are additional to the measures which the recipient country otherwise is undertaking irrespective of that agreement or amendment.

"(3) The President shall take all appropriate steps to determine whether the economic development and self-help provisions of each agreement entered into under this title, and of each amendment to such an agreement, are being fully carried out.".

On page 52, line 2, strike out "TITLE VII" and insert in lieu thereof "TITLE VIII".

On page 52, line 4, strike out "Sec. 701." and insert in lieu thereof "Sec. 801.".

On page 52, line 13, strike out "Sec. 702." and insert in lieu thereof "Sec. 802.".

On page 52, line 17, strike out "Sec. 703." and insert in lieu thereof "Sec. 803.".

On page 53, line 2, strike out "Sec. 704." and insert in lieu thereof "Sec. 804.".

On page 53, line 10, strike out "Sec. 705." and insert in lieu thereof "Sec. 805.".

On page 54, line 3, strike out "Sec. 706." and insert in lieu thereof "Sec. 806.".

On page 59, line 17, strike out "Sec. 707." and insert in lieu thereof "Sec. 807.".

On page 62, line 20, strike out "Sec. 708." and insert in lieu thereof "Sec. 808.".

On page 64, line 8, strike out "Sec. 709." and insert in lieu thereof "Sec. 809.".

On page 65, line 22, strike out "Sec. 710." and insert in lieu thereof "Sec. 810.".

On page 71, line 18, strike out "Sec. 711." and insert in lieu thereof "Sec. 811.".

On page 79, line 5, strike out "Sec. 712." and insert in lieu thereof "Sec. 812.".

On page 81, line 13, strike out "Sec. 713." and insert in lieu thereof "Sec. 813.".

On page 82, line 14, strike out "Sec. 714." and insert in lieu thereof "Sec. 814.".

On page 83, line 17, strike out "Sec. 715." and insert in lieu thereof "Sec. 815.".

On page 84, line 4, strike out "Sec. 716." and insert in lieu thereof "Sec. 816.".

On page 84, line 5, strike out "section 712" and insert in lieu thereof "section 812".

Mr. HELMS. Mr. President, this amendment makes certain changes in the Agricultural Trade Development and Assistance Act of 1954, commonly referred to as Public Law 480. In brief, it would delete certain obsolete language referring to purchases for foreign currencies; it would raise from $5 to $10 million the annual limit on the use of foreign currencies generated under title I to meet emergency nonfood relief requirements; and it would strengthen the requirements for self-help measures to be undertaken by countries receiving title I financing.

These same provisions, with only minor, technical changes, were just adopted by the Senate on Friday, September 18, 1981, as a part of the Agriculture and Food Act of 1981. I am offering this amendment on the foreign assistance bill basically as an accommodation to the House Foreign Affairs Committee and to facilitate conference action on these provisions.

In the Senate the Public Law 480 program is wholly within the jurisdiction of the Committee on Agriculture, Nutrition, and Forestry. In the House, on the other hand, the program falls within the jurisdiction of two different committees—the Agriculture Committee and the Foreign Affairs Committee. Traditionally, after the Senate Agriculture Committee finished its work on the farm bill, the Senate agreed to insert the Public Law 480 provisions from that bill that were within the jurisdiction of the House Foreign Affairs Committee in the Senate Foreign Assistance bill. Several other changes to the Public Law 480 program that are also in the farm bill are not included in the amendment I am offering since they are within the jurisdiction of the House Agriculture Committee.

This procedure then sets the stage for conferencing the different Public Law 480 provisions at the time when the respective House committee is considering legislation within its jurisdiction. The Senate Agriculture Committee conferees participate in both conferences.

Mr. President, as I said earlier, this procedure has been followed in the past and is now looked upon as a tradition. Since I have no strong desire to break with tradition, and since this procedure is satisfactory to me as chairman of the Agriculture Committee and to the distinguished chairman of the Senate Foreign Relations Committee, I ask that my amendment be adopted.

I again remind Senators that the provisions contained in the amendment were just adopted by the Senate and are noncontroversial.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from North Carolina.

Mr. PERCY. I would like to indicate on behalf of the managers of the bill that we appreciate very much Senator HELMS bringing this to our attention. It would be in accordance with past procedures to adopt the amendment, and I fully support it.

Mr. PELL. I concur.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from North Carolina.

The amendment (UP No. 416) was agreed to.

Mr. HELMS. I move to reconsider the vote by which the amendment was agreed to.

Mr. PERCY. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 414

Mr. HELMS. Mr. President, I withdraw my perfecting amendment to the bill.

The PRESIDING OFFICER. I understand the Senator from North Carolina indicates he wishes to withdraw his amendment. Is there objection? The Chair hears none, and it is so ordered, and the amendment is withdrawn.

Mr. HELMS. I thank the Chair.

Mr. LUGAR. Mr. President, as I understand the parliamentary situation at this point, with the Senator from North Carolina having withdrawn his perfecting amendment, taking with it the second Pell amendment, we are now back to a situation of my first-degree amendment, the substitute perfecting amendment of Senator HELMS of North Carolina, and then the perfecting amendment of Senator PELL on top of that, so we have those three now with us at this point.

The PRESIDING OFFICER. The Senator from Indiana is correct.

Mr. LUGAR. Let me offer a short argument, and there may be other Senators who are on the floor to debate the issue, and I would simply indicate, so they will be alerted, that I intend to offer a motion to table the Pell amendment in due course, but I do not want to be premature in that if there are other Senators who wish to debate the issue longer.

I want to suggest, however, before offering that motion, Mr. President, an argument of this general proposition. We are now talking about my original amendment, which was a sense-of-the-Congress amendment that assistance should be furnished to the Government of El Salvador and that the President of the United States should report to the Congress 6 months after enactment of this section concerning the status of his efforts in implementing the U.S. policy.

Now, the gist of our amendment comes down to whether we should have a sense-of-the-Congress resolution with the President offering a report in 6 months or whether we should have these certifications suggested by Senator PELL and Senator DODD every 3 months.

I cite once again, Mr. President, our dilemma here. It is not one over goals or objectives, but it is, in fact, that the language of the bill that we started out with and that we still have offers such goals or conditions as the case may be. And I cite No. (3):

(3) Is making continued progress in implementing essential economic and political reforms, including the land reform program;

(4) Is committed to holding of free elections at an early date; and

(5) Has demonstrated its willingness to negotiate an equitable political resolution of the conflict with any group which renounces and refrains from further military or paramilitary opposition activity.

Secretary Haig, on May 11, pointed out the dilemma that this presents, not to President Duarte, but to President Reagan, the President of the United States. In fact, Secretary Haig pointed out that El Salvador's rightist terrorists or Marxist guerrillas could disrupt these procedures and lead to a finding, if we are getting into a certification, that progress has not been made; as a matter of fact, it could not be made under those conditions.

In essence, Mr. President, if we go the certification route we are turning over our foreign policy to disruptions of the right or the left. That is an unacceptable procedure for a great power attempting to exercise a foreign policy of our own.

As Secretary Haig pointed out, the conditional certification route—the Pell-Dodd route—would encourage Cubans, their wives, and their surrogates in El Salvador to tailor their strategy so as to create precisely the conditions that would make it difficult, it not impossible, for the President to make a certification. Once again, we play into their hands.

Therefore, Mr. President, I think the issues are reasonably clear in this respect.

I ask, as a point of clarification, if there are others who wish to continue the debate. Does the distinguished Senator from Rhode Island wish to make another statement?

Mr. PELL. No. I just wish to have the floor in my own right.
